● Mr. HUGHES. Mr. Speaker, we are all aware of the tragic events recently occurring in the Chicago area, where bottles of Extra-Strength Tylenol were tampered with, and a lethal substance inserted into the pain killing tablets. Seven people died as a result. Following the events in Chicago, several copycat tampering incidents occurred across the country, involving a number of products used regularly by consumers. Unfortunately, I think the citizens of this country now have a legitimate concern about the rises of buying over-the-counter drugs and food products. Obviously, this is an intolerable situation, and those who attempt such tampering must be dealt with speedily and severely.

While State and local laws will in almost every case cover these situations, the penalties for tampering with consumer products vary from jurisdiction to jurisdiction, as do the resources to combat these incidents. In addition, there is a clear and strong Federal interest in such matters because the products themselves are or have been in interstate or foreign commerce. The transitory nature of the crime and of products that are manufactured in one place and then distributed throughout the Nation make this kind of action appropriate for Federal intervention.

I am, therefore, introducing a bill today that will create Federal jurisdiction over such an offense. It will punish by a fine of $20,000 and a prison term of 20 years any person who tampers with or attempts to tamper with such consumer products with intent to cause bodily injury. If in fact such action causes the death of any individual, the offense is punishable by any term of years, or life in prison.

We all recognize that the jurisdiction of the Federal Government over criminal matters is limited, and that the primary responsibility for law enforcement lies with the States. However, when the case for Federal jurisdiction is made, as it is so clearly here, the Federal Government should not hesitate to step in. This bill is, I believe, an appropriate and effective mechanism to protect all of us as consumers. I urge your support of it.●

A TRIBUTE TO RAY MANCINI

(Mr. WILLIAMS of Ohio asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WILLIAMS of Ohio. Mr. Speaker, I would like to pay tribute to a young man from Youngstown, Ohio, who epitomizes the spirit and determination of the people of Youngstown and the entire Mahoning Valley.

The man is Ray Mancini. Ray is the WBA's lightweight champion of the world. Ray decided as a child to win the lightweight championship for his father, who was denied that chance because of wounds he suffered during World War II. This year, Ray achieved his goal.

Recently, after his second title defense, a tragedy occurred.

Ray pondered his future and wondered if he should give up boxing. But, with an abiding faith in God and at the urging of Kim's mother, who said there could be no greater tribute for her son than for Ray to continue fighting and to become the greatest champion ever, Ray has decided to stick with boxing.

Demonstrating the strength of will that characterizes the people of the entire Mahoning Valley, Ray has faced adversity after adversity without hesitation and without complaint.

I hope you will all join me in honoring Ray Mancini—a first-class person as well as a first-class fighter.

BOOM-BOOM MANCINI

(Mr. CONTE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONTE. Mr. Speaker, it could never be said that I would forgo any opportunity to address this House on the many fine qualities embodied in those of us of Italian descent. We are strong of mind, powerful of body, and fair of looks.

My colleague from Ohio, Mr. WILLIAMS, and I, are presenting all of you with a rare opportunity to meet one of our country's newest stars from the Italian-American firmament, the young scrapper from Youngstown, Boom-Boom Mancini.

Yes, Mr. Speaker, in one corner, we will have the benevolent bantamweight bouffant barber, the champion of small business, and my catcher for the GOP baseball team, the gentleman from Ohio (Mr. WILLIAMS).

And, in another corner, in the blue pinstripe trunks and white bucks, the heavyweight Republican from the Appropriations Committee, and I might add, the humble king of the baseball diamond, the silver fox himself, the gentleman from the First District of Massachusetts.

And, in the center of the ring, the star of the city of steel, the World Boxing Association lightweight champion of the world, Boom-Boom Mancini, gracing our Nation's Capital for a special appearance.

Yes, sports fans, do not miss the action—do not be left on the ropes. Join us Thursday, December 9, from 6 to 8 in 2358 Rayburn.

You will not regret it.

A MEMORABLE FILM—"HAIL COLUMBIA"

(Mr. AKAKA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. AKAKA. Mr. Speaker, I think that all of us will agree that lameduck sessions are not easy for any of us. We have very difficult decisions to make in a very short space of time.

Most of the issues we confront each day require a great deal of explaining and defending—and we find ourselves in the position of arguing a lot among ourselves. There is one thing, however, that we do not have to defend and we do not have to argue about—and that is the success of our Space Shuttle program. It was on April 12, 1981, in the early hours of the morning that the first flight of the Space Shuttle *Columbia* opened the doors to a new era of manned space flight.

The story of that first flight has been documented in a moving film called "Hail Columbia!" "Hail Columbia" is the story of many stories: It is

the story of the men and women who worked on the development of *Columbia*; it is the story of astronauts Young and Crippen; and it is the story of the vehicle itself. In short, "Hail Columbia" is the story of America's triumph in opening the skies to manned space flight.

This remarkable film will be shown at the National Air and Space Museum on Tuesday, December 7 during the course of a reception hosted by NASA, the Smithsonian Museum, and the Air and Space Museum. Every Member of Congress has received an invitation to bring his family to the reception for this special screening. Astronaut Joe Engle will be on hand to meet you and your children and sign pictures. The reception begins at 6:30-9 p.m., with special screenings of the film at 7 and 8 p.m.

I urge each of my colleagues to bring their families to see this memorable film. It is an uplifting experience—and a welcome break from the normal course of our business. Let us gather on December 7 to pay tribute to one of our Nation's finest accomplishments. Let us indeed hail *Columbia* and those who make it happen.

NOTICE OF SPECIAL ORDER

(Mr. DORNAN of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORNAN of California. Mr. Speaker, I am taking out a special order this afternoon to discuss a war crime that is going on in four different countries across our planet at this very moment, what has come to be called yellow rain, red rain, and now the nerve gas being used by the Soviet Union, blue rain. I know there are many Members interested in this. I will ask during the special order for 5 legislative days for any other material to be added to the special order.

I am researching what kind of debate went on in this distinguished body in the 1930's when Mussolini was using poison gas in the nation of Ethiopia. That is one of those four tragic nations that has been victimized by poison gases of seven different types over the last 3 or 4 years: Laos, Kampuchea, Afghanistan, and, ironically, decades later, Ethiopia. Any Members interested in joining me in this special order tonight, please do so.

WITHDRAWAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 3269

Mr. LOWRY of Washington. Mr. Speaker, I ask unanimous consent to withdraw my name as a cosponsor of the bill, H.R. 3269, the beer distribution bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

COMMUNICATION FROM HON. JAMES J. HOWARD

The SPEAKER pro tempore laid before the House the following communication from the Honorable JAMES J. HOWARD:

HOUSE OF REPRESENTATIVES,
Washington, D.C., December 2, 1982.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker, House of Representatives,
Washington, D.C.

DEAR MR. SPEAKER: Pursuant to Rule 50 of the Rules of the House of Representatives, I forward herewith a Subpoena which was delivered Wednesday, December 1 to my office, Room 2245 of the Rayburn House Office Building.

Thank you for your assistance in this matter.

Every best wish.

Most sincerely,

JAMES J. HOWARD,
Member of Congress.

□ 1230

SOVIET USE OF POISON GAS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DORNAN) is recognized for 60 minutes.

Mr. DORNAN of California. Mr. Speaker, the United States of America is the subject on a recurring basis for parades and demonstrations around the world, even in friendly countries such as the Netherlands, for imagined affronts to human dignity around the world. We have gone through a tremendous period of criticism because some of the weaponry used by the nation of Israel in its invasion of Lebanon and in its attempt to stop the constant Soviet rockets pounding into the northern part of the Israeli territory, originated in the United States under our manufacture, cluster bomb units and things of that sort.

If the United States were ever to engage in biochemical warfare on even a miniscule scale compared to what the Soviet Union is doing in Afghanistan and through its Communist puppet agents in Indochina today, through the Vietnamese against Cambodia and Laos, the outcry across the world would probably have seen no equal, and properly so; but this double standard whereby the Soviet Union is able to get away with murder, international killing on a massive scale, and all the nations of the world, particularly the Third World and, tragically, even the nations of the democracies of the free world, including some who are alive with us in NATO, turn their backs on these ongoing war crimes. This is an afront to decency and fairness that knows no parallel since Nazi Germany.

We still hear raging discussions and debates across this country on agent orange, a chemical substance devised to hurt foliage, to uncover jungle overgrowth so as to uncover the guerilla forces in Indochina 10 to 15 years ago. Agent orange was designed to hurt trees and bushes. Yellow rain, red rain, and now a frightening new form of nerve gas called blue rain is used by the Soviet Union or its agents to kill human beings.

This week, Secretary of State George Shultz signed off on a report from the U.S. Department of State called "Chemical Warfare in Southeast Asia and Afghanistan, An Update." There was a major press conference at the State Department where gas masks brought out of Afghanistan used by Soviet soldiers (one of them was taken off a dead Soviet soldier) were found to be contaminated in the collection device at the bottom of the gas mask with mycotoxins, the infamous yellow rain.

This month's issue of Soldier of Fortune magazine has a brilliant article entitled "Red Rain" dedicated to the whole proposition of the Soviet Union getting away with a massive war crime. The title is, "Red Rain—Anybody Ready For Communist Chemicals?" by David C. Isby.

I would like to submit for the RECORD, for the edification of my fellow peers in the House of Representatives and in the U.S. Senate, the entire body of this State Department report on chemical warfare and the entire article, "Red Rain" by David D. Isby from Soldier of Fortune magazine.

Mr. Isby is an excellent legislative assistant working for my California colleague Congresswoman BOBBI FIEDLER:

THE SECRETARY OF STATE,
Washington.

To the Congress of the United States And Member States of the United Nations:

Chemical and toxin weapons are of special concern to mankind. Used against civilian populations, or even against soldiers with protective equipment, they can cause protracted and indiscriminate physical and psychological suffering and, as we witnessed in World War I, widespread death as well. For such reasons, the international community has outlawed the use of these weapons. The 1925 Geneva Protocol, one of the oldest arms control agreements still in force, forbids the use of chemical and biological weapons in war. The 1972 Biological and Toxin Weapons Convention prohibits the mere possession of toxin weapons. In an effort to extend such legal constraints still further, the United States—together with other countries in the Committee on Disarmament at Geneva—is seeking an outright ban on the development, production and stockpiling of chemical weapons.

I regret, then, to report that chemical and toxin weapons are nevertheless being used today in Laos, Kampuchea and Afghanistan by the Soviet Union and its allies. In March of this year, we reported on this subject to the Congress, the United Nations, and to the members of the international community. Our report, which contained a comprehensive and detailed compilation of the evi-

dence available to the United States Government, was designed to bring the issue to the attention of the world community. In presenting it, we invited others to join us in examining the evidence and in confirming the truth.

These efforts have not led the Soviets and their allies to halt their illegal use of chemical and toxin weapons. Instead, they continue to deny the truth about their illegal activities. The world cannot be silent in the face of such human suffering and such cynical disregard for international law and agreements. The use of chemical and toxin weapons must be stopped. Respect for existing agreements must be restored and the agreements themselves strengthened. Respect for the dignity of humanity must be restored. Failure to achieve these goals can only have serious implications for the security of the world community, particularly for the security of smaller nations, like those whose people are being attacked. If such basic elements of human rights can be so fundamentally ignored, how can we believe any pledges to respect human rights?

All who would seek to promote human rights, and all who would seek to maintain the credibility of international agreements, have a duty to call world attention to the continuing use of chemical and toxin weapons, and to seek a halt to their use. It is for this purpose that the United States provides the following report.

Sincerely,

GEORGE P. SHULTZ.

CHEMICAL WARFARE IN SOUTHEAST ASIA AND AFGHANISTAN: AN UPDATE

(Report from Secretary of State George P. Shultz, November 1982)

UPDATED FINDINGS

Based on a thorough analysis of this new information, we are able to conclude the following:

Reports of chemical attacks from February through October 1982 indicate that Soviet forces continue their selective use of chemicals and toxins against the resistance in Afghanistan. Moreover, new evidence collected in 1982 on Soviet and Afghan Government forces' use of chemical weapons from 1979 through 1981 reinforces the previous judgment that lethal chemical agents were used on the Afghan resistance. Physical samples from Afghanistan also provide new evidence of mycotoxin use.

Vietnamese and Lao troops, under direct Soviet supervision, have continued to use lethal and incapacitating chemical agents and toxins against the H'Mong resistance in Laos through at least June 1982.

Vietnamese forces have continued to use lethal and incapacitating chemical agents and toxins against resistance forces in Kampuchea through at least June 1982.

Trichothecene toxins were found in the urine, blood, and tissue of victims of "yellow rain" attacks in Laos and Kampuchea and in samples of residue collected after attacks.

We continue to find that a common factor in the evidence is Soviet involvement in the use of these weapons in all three countries. Continued analysis of prior data and newly acquired information about Soviet mycotoxin research and development, chemical warfare training in Vietnam, the presence of Soviet chemical warfare advisers in Laos and Vietnam, and the presence of the same unusual trichothecene toxins in samples collected from all three countries reinforce our earlier conclusion about the complicity of the Soviet Union and about its extent.

INTRODUCTION

Our March study showed that casualties and deaths resulted from chemical attacks in Southeast Asia and Afghanistan and that trichothecene toxins were used in both Laos and Kampuchea. The new evidence shows that these attacks are continuing in all three countries and that trichothecene toxins have been used in Afghanistan as well.

The same rigorous analytical processes employed in our March study, and outlined in detail there, were followed to arrive at the judgments contained in this update. In light of the widespread publicity given the March report, special efforts were made by U.S. Government analysts to preclude being led astray by any possible false reports that might be generated for propaganda or other purposes and to eliminate the possibility of making erroneous judgments about the chemical or toxin agents involved because of tampering or improper handling. Every report has been carefully checked.

The evidence in the March study was based on a broad range of data, including testimony by physicians, refugee workers, journalists, and others. Although some of the new reports are anecdotal, we have been able to corroborate most of them by other sources and sample analysis. Moreover, personal testimony tends to add credence to other accounts which, taken together, form a coherent picture. The material presented in this report represents only a relatively small amount of the total accumulated evidence. This additional information is examined in greater detail in the annexes. Improved sample collection procedures, a better quality of medical histories and physical examinations, documentation including photographs of lesions and hospital charts from Southeast Asia, and interviews by trained personnel have reinforced our earlier conclusions and led to new discoveries.

As international concern about this subject has increased, based on the development of evidence from many countries, independent analyses have been initiated by foreign chemical warfare experts, physicians, journalists, and independent nongovernmental scientists and laboratories. Analysis in the United States have found this research very helpful both in supporting their own conclusions and, more importantly, in expanding on them.

SUMMARY OF EVIDENCE

Afghanistan

Evidence indicates that the Soviets have continued the selective use of toxic agents in Afghanistan as late as October 1982. For the first time we have obtained convincing evidence of the use of mycotoxins by Soviet forces through analyses of two contaminated Soviet gas masks acquired from Afghanistan. Analysis and quantification of material taken from the outside surface of one mask have shown the presence of trichothecene mycotoxin. Analysis of a hose from a second Soviet mask showed the presence of several mycotoxins. In addition, a vegetation sample from Afghanistan shows preliminary evidence of the presence of mycotoxins. (See Annex A.)

Our suspicions that mycotoxins have been used in Afghanistan have now been confirmed. Reports during 1980 and 1981 described a yellow-brown mist being delivered in attacks which caused blistering, nausea, vomiting, and other symptoms similar to those described by "yellow rain" victims in Southeast Asia. Because of limited access to survivors who still exhibited symptoms, as well as great difficulties in collecting environmental and other physical samples from attack sites, we were unable to conclude with certainty in the March 22 report that mycotoxins were being used in Afghanistan. We have now concluded that trichothecene mycotoxins have been used by Soviet forces in Afghanistan since at least 1980.

A number of reports indicate that chemical attacks are continuing in 1982. While we cannot substantiate every detail, the pieces of evidence in these reports add up to a consistent picture. For example, a physician in a facility treating casualties among the *mujahidin* (resistance fighters) has reported that he treated 15 *mujahidin* for red skin lesions that he said were caused by Soviet chemical attacks in Qandahar Province in May-June 1982. Three *mujahidin* died within 12 hours of one attack in the general area of Maharijat south of Qandahar. The *mujahidin* claimed that Soviet helicopters fired rockets that emitted black, yellow, and white gases on impact. The physician said that the surviving victims failed to respond to conventional medical treatment.

We have received reports that on September 20, 1982, Soviet soldiers poisoned underground waterways in Lowgar Province south of Kabul where the *mujahidin* were hiding. According to a *mujahidin* commander in Pakistan, a similar event occurred in the same province on September 13, 1982, resulting in the deaths of 60 adults and 13 children. These two independent accounts described a Soviet armored vehicle pumping a yellow gas through a hose into the waterways.[1]

According to the accounts of the September 1982 attacks, the victims' bodies decomposed rapidly, and the flesh peeled away when attempts were made to move the bodies. Since 1979, *mujahidin* resistance leaders, refugees, journalists, and Afghan defectors have described chemical attacks causing almost indentical symptoms. Most reports have described the skin as being blue-black after death. Although such symptoms seem bizarre, the large number of reports from a variety of sources since 1979 suggests that they cannot be dismissed (see our March 22 report, p. 16).

In 1982, a Soviet soldier who defected to the *mujahidin* said in an interview with a British journalist that a Soviet toxic agent, termed "100 percent lethal," causes the flesh to become very soft. The Soviet defector stated that the Soviets maintained stores of "picric acid" (probably chloropicrin, a potentially lethal tear gas), the "100 percent lethal" agent, and an incapacitating agent near the cities of Qonduz and Kabul. The defector also reported that:

Unidentified toxic agents had been used in June 1982 on the highway between Termez and the Salang Pass north of Kabul;

The "100 percent lethal" agent was delivered by rockets; and

"Picric acid" and an incapacitating agent were delivered by air-dropped canisters.

The defector stated that the Soviets have been preoccupied with protecting the roads and that chemicals were sprayed by planes along the areas adjacent to highways. Chemical grenades reportedly have been used, but the data are inadequate to allow us to hypothesize about the contents, al-

[1] We know from other sources that Soviet chemical agent delivery methods include this technique, as reported, for example, by a Cuban emigre trained by the Soviets in the use of chemical weapons.

though some symptoms are indicative of mycotoxins.

The reports of rapid skin decomposition as quickly as 1-3 hours after death continue to concern us. There is no recognized class of chemical or biological toxin agents we know of that could affect bodies in such a way. If we assume occasional inaccuracies in reporting by journalists and survivors of attacks, it is possible that phosgene or phosgene oxime could cause such effects after 3-6 hours but with much less softening of tissues than is consistent with stories of "fingers being punched through the skin and limbs falling off." The reported medical effects of other toxic agent attacks are consistent with use of the nerve agent tabun. We have information that both phosgene oxime and tabun are stored by the Soviets in Afghanistan.

The British journalist, who interviewed the Soviet defector, also reported on two attacks described to him by the *mujahidin*, which have not yet been confirmed. One was an attack in the spring of 1982 on Kaiba, where Soviet soldiers reportedly shot victims already rendered unconscious by a gas; the other was in the summer of 1982 near Herat where Soviet troops reportedly loaded the bodies from a gas attack onto a truck and removed them. Reliable information indicates that the Soviets used chemical bombs against *mujahidin* forces in late September 1982 and in early October 1982 in Baghlan Province.

Our earlier findings are reinforced by several reports received this year about earlier attacks not covered in our March report:

According to a former Afghan Army officer, in September 1981 a Soviet helicopter sprayed a yellow mist in Paktia Province (Sheikn Amir) causing 16 deaths. The survivors had bloody noses and tears; extensive bleeding was reported in those who died. The Afghan officer described a similar attack in Nangarhar Province during the same month in which four persons were killed.

In early December 1981, according to interviews with survivors, 15 refugees attempting to escape to Pakistan were attacked by a helicopter using gas; four or five people were killed (the youngest and the eldest), while the rest became unconscious for 5-6 hours. The attack occurred about 60 kilometers northwest of Jalalabad.

According to a Soviet soldier who served in Afghanistan in 1980 and personally observed the use of chemical weapons, the Soviets dispersed chemicals from fighter-bombers and assault helicopters. He said that an aircraft or helicopter first would drop a container and then, on a second run, drop a bomb, resulting in a mixture of two different chemicals that killed everything within the contaminated area. We believe that the soldier may have been describing the delivery of two separate chemical agents, an occurrence described by other eyewitnesses.

An Afghan veterinarian recently has described an incident in May 1979 in which 20 people and a number of sheep were killed near Qandahar. Soviet lab technicians explained that the incident resulted from anthrax, but the doctor knew that the explanation did not fit the effects observed. Local Afghans told the veterinarian that Soviet vehicles had been in the area spraying a yellow/white powder before the incident.

In June 1980, an airport official described seeing 200-300 gas containers painted in greens and browns at Qandahar Airport. The containers averaged 35-40 inches high and 26-30 inches in diameter. A subordinate reported three types of gases in the containers: one causing burning in the throat as well as suffocation; one causing what looked like smallpox and blistering; and one making victims tired and sleepy and unable to run or fight. Further, the subordinate stated that the containers were placed in special casings that were dropped from aircraft and exploded on impact, emitting a large cloud of smoke, usually yellow but sometimes other colors. He said he had heard mujahidin describe these gas attacks and had himself seen animals that had been killed by the gases. We lend credence to this report because we know from other evidence that chemicals are stored at Qandahar Airport, which is an important staging area for Soviet military operations.

Finally, information received this year revealed that a Soviet adviser inspecting sites for housing Soviet troops before the Afghan invasion indicated that Soviet chemical defense forces entering Afghanistan would bring in extensive stores of toxic materials. The adviser indicated that a proposed garrison in Kabul would be inappropriate for the Soviet chemical defense unit because the materials it transported could devastate the city if an accident occurred.

Laos

H'Mong refugees, recounting details of toxic agent attacks and exhibiting severe medical symptoms from exposure to the agents, fled to Thailand every month from January through June 1982. They brought out more samples contaminated by a yellow, sticky substance described as a "yellow rain" dropped by aircraft and helicopters on their villages and crops. We have preliminary reports on attacks as recent as October 1982. We now know that the yellow rain contains trichthecene toxins and other substances that cause victims to experience vomiting, bleeding, blistering, severe skin lesions, and other lingering signs and symptoms observed by qualified physicians. Experts agree that these people were exposed to a toxic agent and that no indigenous natural disease, plant, or chemical caused these unique physical effects.[2]

Laboratory analyses of blood samples from these victims and studies on experimental animals have shown that trichothecene toxins are retained in the body for much longer periods of time than previously thought. Scientific research has shown that the multiple-phase distribution pattern in animals includes a secondary half-life of up to 30 days. We believe that the severe skin lesions observed on victims by doctors are also relevant. Victims whose blood proved on analysis to have high levels of trichothecene mycotoxins exhibit such skin lessions.

Descriptions of the 1982 attacks have not changed significantly from descriptions of earlier attacks. Usually the H'Mong state that aircraft or helicopters spray a yellow rain-like material on their villages and crops. In some reports the symptoms are similar to those described in our March 22 study, and we attribute them to the use of trichothecene toxins. However, in many cases there was no bleeding, only abdominal pains and prolonged illness. These symptoms, described in previous years, suggest that another agent or combination of agents is still being used. The explanation is complicated because different symptoms are ascribed to men, women, children, and animals. It is possible that different agents, lower concentrations of the same agents, or climatic conditions have affected the efficacy of the agents.

Medical personnel in Lao refugee camps in Thailand were much better organized in 1982 to screen victims than in past years. Doctors now routinely use extensive questionnaires and conduct comprehensive medical examinations, including some onsite, preliminary blood analysis. Skilled paramedical personnel oversee preparation of blood and serum samples for proper transport and shipment to the United States or other countries for chemical analysis. Some patients with active symptoms are now being monitored extensively over time.

A number of blood samples have been collected from Laos for analysis in the United States. All biological specimens were drawn by qualified medical personnel, and samples were refrigerated until analyzed in the United States. Analysis of these samples shows that trichothecene mycotoxins continue to be used against H'Mong villages. In addition to blood and urine specimens from victims exposed to chemical warfare, we have collected additional physical samples this year. These physical samples consist of more residue of yellow rain containing mycotoxins from the same attacks that yielded human biological specimens positive for these same toxins. (See Annex A.)

The number of reported attacks in Laos in 1982 did not differ significantly from the frequencies reported for comparable periods in the years 1977 through 1981. Reported fatalities per attack during 1981 and 1983 showed an apparent decrease, suggesting the possibility that less lethal toxic agents, or lower concentrations of the same agents, are now being used. This apparent decrease, however, was not statistically significant and could have been caused by a number of other factors, including the following:

Due to emigration and the high number of fatalities since at least 1976, the H'Mong were living in smaller, more scattered communities.

H'Mong survivors still in Laos were warier and quicker to take cover and to use rediментary protective measures at the first sign of attack.

The H'Mong were not taking time to count victims—this is supported by the existence of very few reports that indicate the precise number of people affected by a toxic agent attack.

As stated in the March report, the Soviet Union maintains in Laos significant numbers of advisers who provide maintenance assistance, technical support, and training in both conventional and chemical warfare. A former Lao transport pilot who defected early this summer has described the aerial movement, under Soviet supervision, of toxic agents within Laos.

Kampuchea

Most reports of toxic attacks in Kampuchea for the period 1978-June 1982 come from Democratic Kampuchean (DK) sources, including interviews with DK military personnel. Evidence from other sources confirmed most of these reports. In 1982, most reported attacks occurred near the Thai border, making it easier to obtain samples and other direct evidence of toxic agent use.

In the first 6 months of 1982, the number of reported toxic agent attacks in Kampuchea was about half the number reported during the same periods in 1980 and 1981.

[2] See Canadian report to the United Nations: "Study of the Possible use of Chemical Warfare Agents in Southeast Asia," Dr. H. B. Shiefer, University of Saskatchewan.

The number of reported deaths per attack also decreased, but data were insufficient to determine if this decrease was statistically significant. We also have preliminary reports on attacks through early November 1982.

In February and March 1982, several attacks occurred just across the Kampuchean border in Thailand. Analysis of samples collected from the attacks was performed in Canada, Thailand, and the United States. Although differing sampling techniques give rise to significant sampling error and lead to slightly different analytical results, both the U.S. and Thai analysts, using different analytical techniques, found trichothecene mycotoxins in their samples.[3] The Canadian team investigating these attacks has published a detailed medical assessment of the victims' symptoms; it concluded that illness had in fact occurred and was caused by a toxic agent, although preliminary tests for trichothecenes proved inconclusive in the Canadian sample.

Blood and urine samples from Kampuchean victims of a toxic agent artillery attack on February 13, 1982, contained trichothecene toxins (Annex A). In addition, post-mortem tissue from a victim of this same attack confirmed the presence of trichothecene toxins (Annex B). Analysis of additional samples showing the presence of trichothecenes taken from other attacks is also found in Annex A.

The Vietnamese conducted toxic agent attacks this year against another resistance group, the Kampuchean People's National Liberation Forces. On several occasions in March-May 1982, the resistance camp at Sokh Sann was hit with toxic artillery shells and bombs. Samples of contaminated vegetation and yellow residue from these attacks are now being analyzed. Attacks occurred in Kampuchea through June 1982, providing new samples; qualitative tests indicate that the presence of trichothecenes is probable. The results of confirmatory analyses are pending.

Several Vietnamese military defectors from Kampuchea have provided valuable information in 1981 and 1982 on chemical weapons use and on the Vietnamese chemical warfare program and have reported that some types of agents are supplied by the Soviet Union. Information from other sources also confirms our earlier view that the Vietnamese possess toxic agent munitions and are equipping their own troops with additional protective equipment.

TABLE 1.—AFGHANISTAN: REPORTED ATTACKS, 1982

[3] It was thought initially that a harmless yellow powder had been dropped on Thai villages as part of a disinformation campaign attempting to discredit U.S. sample analysis results. Within days of such an attack, the Thai Ministry of Health announced that only ground-up flowers had been found. However, Thai officials later stated that further analysis showed traces of toxin and that the earlier Health Ministry announcement was based on incomplete investigation.

TABLE 3.—KAMPUCHEA AND THAILAND: REPORTED ATTACKS, 1982—Continued

ANNEX A

ANALYSIS OF SAMPLES FOR CHEMICAL WARFARE AGENTS AND TOXINS

The identity of the agents and toxins being used in Laos, Kampuchea, and Afghanistan cannot be determined without collection and analysis of at least one of the following: environmental or physical samples contaminated with agent, the munitions used to deliver agents, or biological specimens from attack victims.

The likelihood of detection of chemical agents and toxins in contaminated samples depends on a number of factors. These include the persistency of the agent; the ambient temperature; rainfall; wind conditions; the media on which the toxic agent was deposited; and the time, care, and packaging of the sample from collection to laboratory analysis. Many standard chemical warfare agents and toxins disappear from the environment within a few minutes to several hours after being dispersed. These include, for example, the nerve agents sarin and tabun, the blood agents hydrogen cyanide and cyanogen chloride, the choking agents phosgene and diphosgene, and the urticant phosgene oxime. Other standard agents—such as the nerve agents VX and thickened soman and the blistering agents sulfur mustard, nitrogen mustard, and lewisite—may persist for several days to weeks depending on weather conditions. The trichothecene toxins are stable under laboratory conditions but degrade in field samples due to metabolism by micro-organisms contained in the sample. To maximize the chances of detection, sample collections should be made as rapidly as possible after a toxic agent assault; with many agents this means minutes to hours. Given the situation in Southeast Asia and Afghanistan, this usually has not been possible. Although numerous samples were collected, few held any realistic prospects for yielding results. However, when immediately collected and properly handled and using the advanced technology now available, trichothecenes may be detected in both physical and biological materials up to several months after the attack.

Samples have been collected from Southeast Asia since mid-1979 and from Afghanistan since May 1980. To date, more than 350 individual samples—of greatly varying types and utility for analytical purposes—have been collected and analyzed for the presence of traditional chemical agents. About 100 additional samples are pending completion of analysis. All environmental and nonmedical samples were submitted to the U.S. Army Chemical Systems Laboratory for analysis for traditionally recognized chemical warfare agents and other toxic materials. Tissue specimens and body fluids from attack victims were submitted to the Armed Forces Medical Intelligence Center. Under the sponsorship of that organization, the biomedical specimens were analyzed for the presence of trichothecene mycotoxins and other toxins by Dr. Chester Mirocha, University of Minnesota; Dr. Joseph Rosen, Rutgers University; and Dr. Tim Phillips, Texas A&M University.

To date, biomedical samples (blood, urine, and/or tissue) from 33 alleged victims have been screened. Specimens from 16 of these individuals show the presence of trichothecene mycotoxins. In addition, six environmental samples from alleged attack sites have been analyzed by Dr. Mirocha. Five show the presence of unusually high concentrations and combinations of trichothecene mycotoxins.

EVIDENCE OF CHEMICAL AND TOXIN AGENT USE IN SOUTHEAST ASIA AND AFGHANISTAN, 1982

Sample	Result
Laos:	
Blood	Trichothecene toxin.
Blood (post-mortem).	Trichothecene toxin.
Yellow residue	Trichothecene toxin.
Vegetation	Trichothecene/aflatoxin B1.
Kampuchea/Thailand:	
Blood	Trichothecene toxin.
Urine	Trichothecene toxin.
Tissue (autopsy)	Trichothecene aflatoxin B1.
Yellow residue	Trichothecene toxin.
Vegetation	Trichothecene toxin.
Water	Trichothecene toxin.
Water	Cyanide.
Afghanistan:	
Gas mask (2 sets)	Trichothecene toxin.
Vegetation	Trichothecene toxin.

Details concerning samples analyzed since the March report—including the circumstances of their collection, analysis, and the results—are provided in this annex. Results of analysis of earlier samples were included in our March 22, 1982 report.

POSITIVE SAMPLE RESULTS

Afghanistan

One-quarter of the external surface of a Soviet gas mask, obtained near Kabul in September 1981, was recently processed for analysis, employing techniques not previously used, and showed the presence of T-2 toxin. This analysis has been verified by two other laboratories. Similar analysis of material from the hose connections of another Soviet gas mask removed from a dead Soviet soldier in December 1981 in Afghanistan is indicative of the presence of the trichothecene toxins, T-2, DAS, verricarol, and another type of mycotoxin—zearalenone. It is believed that these protective masks were worn during operations in which a toxin agent was used.

Preliminary analysis of a third sample acquired in February 1982 also indicates the presence of trichothecenes.

Laos

(1) Blood samples were drawn from an ill H'Mong couple on March 21, 1982, by a physician in the Ban Vinai refugee camp. The victims were exposed to toxin agent attacks on November 11, 1981, and January 4, 1982. They remained ill and under treatment on March 21, 1982, when blood samples were obtained. During the November 1981 attack, an aircraft sprayed a yellowish agent. Although no one died in the village, symptoms such as bloody diarrhea were experienced by most of those exposed. In the January 1982 attack, a greenish chemical was sprayed from an airplane. Vomiting with blood, bloody diarrhea, blurred vision, chest pain, eye irritation, and skin rash were reported. Lingering effects included rash, pain in the joints, and fatigue. The blood samples were analyzed for three trichothecene toxins: DAS, T-2 and HT-2. The blood sample from the male was found to contain 13.5 ppb T-2 toxin. The female was negative for all toxins analyzed.

(2) Three blood samples were drawn by a U.S. physician on April 17, 1982, from three H'Mong refugees: Bloc Her, an 8-year-old boy; Tong Her, a 6-year-old boy; and Xia Sue Xiong, a young girl. They were among a group exposed to a toxic agent attack in late March 1982 in Laos. The agent used was described as being yellow to reddish brown. It was sticky and dried to a powder. Bloc Her had been severely ill with bloody diarrhea and coughing of blood. Xia Sue Xiong was suffering from bloody diarrhea and abdominal pain. The blood samples were analyzed for three trichothecene toxins: DAS, T-2, and HT-2.

TRICHOTHECENE TOXIN ANALYSIS

Victim	DAS	T-2	HT-2
Bloc Her	Negative	Negative	Negative
Tong Her	Negative	110 ppb	296 ppb.
Xia Sue Xiong	Negative	46 ppb	Negative.

ppb = parts per billion.

(3) Post-mortem blood samples were taken from a 25-year-old H'Mong refugee who had been admitted earlier to a refugee hospital at Ban Vinai, Thailand. Just before death he had suffered from a massive gastrointestinal hemorrhage. He had claimed exposure to a toxic agent attack sometime earlier in Laos. The blood was drawn in the hospital on April 17, 1982, and analyzed for three trichothecene toxins: DAS, T-2, and HT-2.

TRICHOTHECENE TOXIN ANALYSIS

Specimen type	DAS	T-2	HT-2
Heparinized blood	Negative	15ppb	19 ppb.

(4) Blood was drawn on April 6, 1982, from Neng Xiong, a H'Mong refugee in Thailand. She was suffering from the effects from a

toxic agent attack that occurred in Phou Bia, Laos, on March 25, 1982. The entire population of the village (40 families) suffered from vomiting, fever, backaches, headaches, and chest pain after a helicopter dropped a yellowish agent. Many villagers also developed swollen eyes. It was reported that one woman and several animals died. Neng Xiong's blood was analyzed for three trichothecene toxins: DAS, T-2, and HT-2.

TRICHOTHECENE TOXIN ANALYSIS

Specimen type	DAS	T-2	HT-2
Heparinized blood	Negative	100 ppb	8 ppb.
Nonheparinized blood.	Negative	33 ppb	34 ppb.

(5) A H'Mong refugee reported being subjected to a toxic agent attack on March 17, 1982, in Phou Bia, Laos. The agent, which "looked like yellow rain," was sprayed by a helicopter at low altitude. The sticky yellow spots dried to a powder in 3-4 hours. Immediately after the attack, the victim developed stomach and chest pains and vomited. Vomiting with blood began later and continued over the next 24 hours. Other symptoms included headache, shortness of breath, dizziness, eye irritation, and vision disturbances. The refugee also developed a rash and blisters. Blood samples were drawn by a physician at Ban Vinai refugee hospital in Thailand on March 31, 1982. The samples were anaylzed for three trichothecene toxins: DAS, T-2, and HT-2.

TRICHOTHECENE TOXIN ANALYSIS

Specimen types	DAS	T-2	HT-2
Heparinized blood	Negative	19 ppb	Negative.
Non-Heparinized blood.	Negative	3 ppb	2 ppb.

(6) Results of analysis of two environmental samples from attack sites in Laos were reported in our March 22 report and are not repeated here. An additional set of environmental samples taken from an allegedly contaminated area in Laos near Phu He was obtained for analysis. Although symptoms were manifested in individuals collecting and handling the sample, no trichothecenes were detected upon analysis.

Kampuchea/Thailand

(1) On February 13, 1982, at least 100 Kampuchean soldiers were subjected to an artillery-delivered toxic attack by Vietnamese forces and became ill. The attack took place near the village of Tuol Chrey in an area north of Khao Din, about 300 meters from the Thai-Kampuchean border. One individual subsequently died (see autopsy results, Annex B). Reported symptoms included burning eyes, blurred vision, shortness of breath, chest pains, vomiting, and vertigo. Some victims also trembled and generally felt weak. Blood and urine samples were taken from a number of victims at various times after the attack as well as from a control group of individuals living under similar conditions but not subject to the toxic agent attack. Blood and urine samples from the control group were negative for all analyzed toxic agents, including trichothecene toxins.

On February 14, 1982, 1 day after the attack, blood samples were taken from two victims: Pen Nom and Prek Reth. On February 15, a urine sample was taken from Pen Nom, while on February 16, a urine sample was taken from Prek Reth. Both blood and urine samples were analyzed for the presence of the trichothecene mycotoxins T-2 and HT-2.

TRICHOTHECENE TOXIN ANALYSIS

Victim	Specimen	T-2	HT-2
Prek Reth	Blood	18 ppb	22 ppb negative.
	urine	negative	
Pen Nom	Blood	11 ppb	10 ppb
	urine	trace	18 ppb.

On March 4, 1982, 19 days after the incident, some victims still showed effects of the attack and were being treated in Nong Pru hospital in Kampuchea. Further blood samples were drawn at that time from Prek Reth and five additional victims.

Trichothecene toxin analysis

Victim	T-2 Toxin
Prek Reth	Negative.
Kin Ving	7 ppb.
Mau Sereth	Negative.
Seng Nem	Negative.
Ching Soeum	Negative.
Chem Ron	3 ppb.

Analysis of tissue samples from a victim of the February 13 attack is described in Annex B.

(2) On March 5, 1982, a small Vietnamese aircraft sprayed a white powder in an area near Pailin, Kampuchea. On March 6, 1982, 10 of a group of 15 Kampucheans were unable to continue walking due to illness after passing through the area. Symptoms included nausea, vomiting, shortness of breath, blurred vision, diarrhea, bloody discharge from the nose, and burning sensation in the chest and abdomen. A second attack occurred on March 7, 1982, when some of the same Kampucheans were subjected to Vietnamese toxic artillery shelling. The agent produced nausea, dry mouth, and blurred vision and also caused loss of consciousness and muscle twitching. Despite medical treatment, a number of the victims died.

Samples were taken from three survivors exposed to the contaminated area on March 6 and 7. Blood and urine were taken on March 13, 1982.

TRICHOTHECENE TOXIN ANALYSIS

Victim	Specimen [1]	DAS	T-2	HT-2
Neung Hon	Urine	Negative	5 ppb	2 ppb.
	Blood	Negative	7 ppb	Negative.
Chan Saran	Urine	Negative	4 ppb	1 ppb.
	Blood	Negative	Negative	8 ppb.
Bun Thoeum	Urine	Negative	22 ppb	7 ppb.
	Blood	Negative	Negative	Negative.

[1] Blood samples was heparinized.

(3) A sample of contaminated vegetation was obtained following spraying by a Vietnamese aircraft in Pong Nam Ron District near the Thai-Kampuchean border on February 19, 1982. Analysis of this sample for known chemical agents was negative. However, the trichothecene toxin T-2 was present at a level of 86 ppb. DAS was also present at 30 ppb. The sample was of insufficient size to analyze accurately for the toxins nivalenol and deoxynivalenol.

ANNEX B

AUTOPSY RESULTS OF A CHEMICAL WARFARE ATTACK VICTIM IN KAMPUCHEA

Chan Mann was one of several victims of a February 13, 1982, toxic agent attack in the area of Khao Din. The victim, being treated at Nong Pru Hospital, reportedly made a brief recovery on March 12 and 13, followed by a relapse when he became anuric, feverish, restless, and slightly jaundiced. On March 17, he lapsed into a coma and died. A urinary catheter was inserted approximately 4 hours before death, but only minimal blood-tinged urine was obtained. Shortly before death the victim vomited blood. Kampuchean physicians performed a necropsy. Tissue sections of heart, esophagus/stomach, liver, kidney, and lung were taken and fixed in formaldehyde. Tissue samples were given to both U.S. and Canadian officials for analysis.

The samples delivered to the United States were submitted to several U.S. laboratories for gross, microscopic, histopathological, and chemical-toxicological analysis.

RESULTS OF ANALYSIS OF TISSUE SAMPLES FOR DAS, T-2, AND HT-2TH [1]

Material	Amount (g)	Toxins detected		
		DAS [2]	T-2	HT-2
Heart	7.9		([3])	1 ppm.
Stomach	13.5		25 ppb	4 ppm.
Liver	9.5			
Kidney	10.4	3 ppm [4]	7 ppb	
Lung	4.5		9 ppb	
Intestine	5.3		88 ppb	10 ppb.

[1] DAS (Diacetoxyscirpenol), a trichothecene toxin; T-2, a trichothecene toxin; HT-2, a metabolic product of T-2.

[2] DAS was used as internal standard—i.e., DAS was added to each tissue sample as a standard to check accuracy of analysis. Only the kidney had a concentration of DAS greater than the amount added.

[3] Toxins were not detected. Concentration of DAS was no greater than the added internal standard.

[4] Endogenous DAS in sample detected in concentration greater than the standard.

Note: Tissues were analyzed for trichothecene toxins by Dr. C.J. Mirocha, University of Minnesota. A parallel analysis performed by Dr. J. Rosen, Rutgers University, also revealed the presence of high levels of trichothecene toxins.

A high incidence of natural aflatoxin contamination of food in Southeast Asia has been well documented. Linderfelser and coworkers (1974) have shown that aflatoxin and T-2 toxin in combination have a synergistic effect and, therefore, it was of interest to determine the extent of aflatoxin in tissue of this individual.

RESULTS OF ANALYSIS OF SAMPLES FOR AFLATOXIN

Material	Weight of sample (g)	Sample	
		Actual (ng/g) [1]	Adjusted [2] (ng/g)
Stomach	3.04	19.8	22.5
Liver	3.00	20.2	23.2
Kidney	7.50	15.3	17.4
Intestine	3.02	11.2	12.7

[1] Nanograms per gram.

[2] Values adjusted on basis of 88 percent recovery—that portion of aflatoxin found when a known amount is added to the sample.

Note: Aflatoxin analyses were conducted by Dr. Phillips, Texas A&M University.

Levels of aflatoxin detected in the tissues were so high that it seemed prudent to investigate the possibility that this individual exposure to aflatoxin was not due to a natural contamination but may have been related to the chemical attack. To this end, portions of the sample of yellow rain from Laos previously shown to contain 143 ppm of T-2 toxin and 27 ppm of DAS were submitted to Dr. Mirocha and Dr. Phillips for analysis for aflatoxin B1. Independent thin-layer chromatography and high-performance liquid chromatography analyses were negative for aflatoxin, supporting a hypothesis that this toxin is not always a component of a yellow rain sample and that the victim's exposure

to aflatoxin may have been due to contamination of the food source. It does not, however, rule out the possibility that aflatoxin is a component of some yellow rain attacks. Preliminary analysis of some more recent yellow rain samples indicates the presence of aflatoxin in these tissues is important since the high incidence of exposure to natural outbreaks of aflatoxin contamination in Southeast Asia may induce a greater susceptibility to trichothecenes in this population.

Portions of each tissue sample were submitted to Dr. Charles Stahl, University of Tennessee Medical School, for histopathological examination. A summary of the pathology found included: hemorrhage into the heart tissue with evidence of cell destruction and inflammation, cirrhosis of the liver, hemorrhage and cellular destruction of kidney tubules, hemorrhage in the bronchi, and congestion and destruction of the lung. The details of these results and similar findings by other pathologists are consistent with results and similar findings by other pathologists are consistent with results of analysis of animals exposed to trichothecenes.

No single post-mortem finding proves cause and effect of toxin exposure and death, but these data taken together provide objective evidence that:

Reports from witnesses of yellow rain attacks are valid and that bleeding sometimes occurs in the lung, stomach, intestine, and kidney or bladder.

Persons already debilitated by disease or exposure to other toxins have a greater risk of death from trichothecene toxicosis.

Microscopic examination shows that tissue damage occurs in humans after moderate-to-heavy exposure to trichothecenes. The damage is similar to that found in experimental animals.

Microscopic damage persists for 1 month or longer.

Trichothecenes are known to cause long-term damage to rapidly dividing tissue. These toxins accumulate and persist at least in the organs that were examined.

Aflatoxin found in the tissues may be foodborne and is not necessarily a component of the yellow rain substance. However, aflatoxins and trichothecene toxins act synergistically, and they could be components of a toxic crude extract mixture. Emerging data from several sources lend credibility to such a hypothesis; therefore, investigation seems warranted.

ANNEX C

DISCUSSION OF ANALYTICAL FINDINGS [4]

The finding of T-2 toxin and HT-2 toxin in blood, urine, and tissue samples from yellow rain victims is highly significant in view of the fact that no trichothecenes could be detected in similar samples from the control population who were not exposed to yellow rain. The finding of such high levels of trichothecenes weeks after exposure is surprising and raises questions concerning the distribution, metabolism, and excretion of these toxins as well as their long-term effects.

Only limited research concerned with elimination rates of the trichothecenes has been conducted. Ueno, et al., 1971, reported that orally administered fusarenon-x was rapidly distributed to the tissues and reached peak levels by 3 hours after dosing. The kidney was believed to be the major organ of excretion. Matsumoto, et al., 1978, conducted studies with T-2 toxin which led him to conclude that the liver and biliary system were the major organs of T-2 excretion. Chi, et al., 1978, administered oral doses of T-2 to broiler chickens. Peak tissue levels were reached by 4 hours after dosing, and the liver contained the greatest amount of toxin. By 12 hours after dosing, however, the muscle, skin, and bile contained the highest amounts of detectable toxin. By 48 hours, 82% of the adminstered dose had been excreted. Robinson, et al., 1979, showed that T-2 toxin was excreted into cow milk at levels up to 160 ppb after daily administration of 0.6 mg/kg doses.

Studies concerned with metabolism of the trichothecenes have also been limited in number. Yoshizawa, et al., 1980, reported that in rat liver *in vitro* studies with the S-9 fraction of rat liver homogenates, HT-2 made up 50% of the metabolic products. Other metabolites included TMR-2 (19%), TMR-2 (2%), and T-2 tetraol (4%). In *in vivo* studies, HT-2 was one of the major products eliminated in the excreta of chickens (Yoshizawa, et al., 1980) as well as urine, feces, milk, and blood of dairy cattle (Yoshizawa, et al., 1981).

The finding of T-2 toxin and HT-2 in the blood and tissue of humans weeks after their exposure to the toxins would seem to indicate that enough toxin remains bound in body tissues to allow detection by sensitive instrumentation. Trichothecenes have been shown to bind to ribosomal proteins (Ueno, 1975) and to react with sulfhydryl containing compounds such as glutahione (Foster, et al., 1975) and with proteins such as albumin (Chu, et al., 1979). It would appear that although most of the toxin would normally be expected to be excreted within 48 hours after exposure, small amounts of the toxin and its metabolites remain bound to body tissues for much longer periods. The size of the dose administered and the route of exposure may have a significant effect on the proportion bound, since a sudden, rapidly absorbed, massive dose may overload normal excretion and detoxification mechanisms, resulting in greater tissue binding of the toxin. Similar apparent long-term storage of mycotoxins has been reported previously for aflatoxin B. Although most of the administered dose of aflatoxin is rapidly metabolized, Shank, et al., 1971, demonstrated in studies of monkeys that unmetabolized aflatoxin B could be detected up to 6 days after administration of a sublethal dose.

Additional significant findings lie in the trichothecenes found in the leaf samples (T-2, DON, nivalenol) and yellow powder (T-2, DAS). The concentrations found and their combination are not normally found in nature and it would appear that these mycotoxins found their way into the environment by the intervention of man. The most compelling evidence is the presence of T-2 and DAS in the yellow powder. Both toxins are infrequently found in nature and rarely occur together. In our experience copious producers of T-2 toxin *(F. Tricinctum)* do not produce DAS and, conversely, good producers of DAS *(F. reoseum* 'Gibbosum') do not produce T-2. This is also supported by our experience that a good producer of DON does not produce T-2 or DAS but could produce nivalenol. Thus, we have more than just the quantity of toxins produced to explain, but also the kinds that respective species and their isolates produce. Theoretically, it is possible to genetically manipulate or select an isolate that would produce copious amounts of two or more of these toxicants, but this would require a sophisticated research effort and sophisticated technology based on experience.

It is difficult to explain the presence of trichothecenes on leaf surfaces. Fusarium is not a leaf pathogen, and so we would not expect it to colonize leaves indiscriminately. Fusarium does colonize the roots and vascular tissue (causes wilt diseases) of some plants, and it would have to produce the toxins *in situ* and translocate them to the leaves. This has never been demonstrated in the pathogenesis of Fusarium-infected plants. If a pathogen like *F. oxysporum* f. *lycopersici*, pathogenic to tomatoes, were to produce trichothecenes and translocate them to the leaves, one would not expect such high concentrations and combinations of toxins. Moreover, we are not certain that pathogenic isolates of the latter produce trichothecenes during pathogenesis. It is a well known plant pathological principle that production of toxins by pathogens in laboratory culture does not signify that these toxins also are produced in the host.

Apart from the controversy of the trichothecenes occurring on the leaves, it is difficult to imagine a reasonable explanation for the appearance of T-2 and DAS in the yellow powder. To those who claim that they dropped onto the soil and rocks from overhanging leaves, this is contrary to any known facts about trichothecene occurrence or distribution. The burden of proof remains with those alleging such an unlikely hypothesis.

The finding of T-2 toxin, diacetoxyscirpenol, deoxynivalenol, zearalenone, and *Fusarium* pigments in leaves, water, yellow powder, and fragments originating at sites of yellow rain attacks in Southeast Asia and their absence in background samples (leaves, corn, rice, water, soil) from areas not exposed to yellow rain strongly implicates their use as warfare agents. Moreover, the finding of T-2 toxin and HT-2 toxin (a metabolite of T-2 toxin in animals) in the blood, urine, and tissue of victims of these attacks provides unequivocal evidence of their use as weapons.

Details of the experimental procedures used in these analyses were presented at the Society of Toxicology meeting in Louisville, Kentucky, on August 16, 1982; at an international mycotoxin symposium in Vienna, on September 1, 1982; and at the Association of Analytical Chemistry meeting in Washington, D.C., on October 28, 1982.

Two scientific manuscripts describing those analyses have been submitted for publication in refered journals and other studies pertaining to nongovernmental analyses are in press.

RED RAIN: ANYBODY READY FOR COMMUNIST CHEMICALS?

(By David C. Isby)

Not normally lethal, they are not banned under the 1925 Geneva Accord. The North Vietnamese fired captured CS tear gas at U.S. forces in Vietnam. The Soviets apparently made extensive use of a concentrated version of CN gas in Afghanistan. The North Vietnamese used the same sort of gas in Laos, but with a twist—they dropped it into water supplies. These agents are fatal if swallowed, but normally only irritate if inhaled. They last only a few minutes.

---

[4] Based on excerpts from a paper by Dr. C. J. Mirocha and Dr. S. Watson, presented at an international symposium on mycotoxins in Vienna on Sept. 1, 1982.

INCAPACITATING AGENTS

These attack not the body, but the mind. The U.S.-developed BZ gas—basically LSD-25—was a failure. Soviet research and development, however, appears to have yielded a breakthrough in this type of gas. In Laos, Cambodia and Afghanistan, there have been reports of a gas that rapidly causes nausea, vertigo and unconsciousness. Only gas-warfare technology far advanced from that known in the United States could produce such a weapon. Its tactical significance is obvious—it can allow victories without bloodshed. Gas such as this could be used in close proximity to friendly troops or civilians. Non-fatal, it could be used under the provisions of the 1925 Geneva convention.

CHOKING AGENTS

Largely obsolete, these were the most deadly gasses of the First World War. Fatal if inhaled, they can be stopped by most standard gas masks. They are still deadly against unprotected troops. There is strong evidence of Soviet use of phosgene—the most common choking agent—in Laos, Cambodia and Afghanistan.

VOMITING AGENTS

These agents, of which Lewisite is the best known, are also old. They can be used against troops not wearing their gas masks—vomiting would make it hard to put on masks. They persist for several hours. No Soviet use has been reported in recent years, but it is probable that this gas remains in stockpiles.

BLISTER AGENTS

The first persistent gasses, the best-known of which is mutard gas, which blisters and destroys lungs if inhaled. Its fumes can blister skin and blind. Impregnated garments are required for protection. The Soviets may still have stockpiles of this old gas, although it is likely to have been replaced.

BLOOD AGENTS

An old, easily produced, non-persistent gas which must be delivered in quantity to be effective, but then can be deadly. Hydrogen cyanide is the best known. The Soviets have large, active stockpiles.

NERVE AGENTS

These are the main weapons of modern chemical warfare. Invented by the Germans before the Second World War, nerve agents restored a decisiveness to chemical warfare that it had not had since 1915. The starting point for both U.S. and Soviet poison-gas research and development was *Tabun*, a wartime German nerve agent, which, while obsolescent, may remain in Soviet service. The workhorses of the Soviet stockpile appear to be Sarin (GB), Soman (GD, the most common) VR-55 (thickened GD) and VX gasses. They are inhaled or absorbed and a minute amount will cause death within 15 minutes unless treated with an antidote. Persistence varies from hours to weeks, and they must be carefully washed from contaminated personnel and equipment. Extensive evidence exists that the Soviets have used nerve agents in Afghanistan. They have also been used in Laos, Cambodia and Yemen.

While "poison gas" is the generic term for these weapons, it is not a strictly accurate one. Many of them are liquids. The "Yellow Rain" itself is a fine solid, although some particles are reportedly so coarse that they can be heard as they come down. Most agents are deadliest when breathed. Most are also deadly when applied directly to unprotected skin in larger doses—although phosgene and hydrogen cyanide cannot cause casualties this way, all the nerve agents certainly can. All except the nonpersistent gasses, such as phosgene, hydrogen cyanide and some nerve agents such as Sarin can also cause casualties if simply sprayed on the ground. They persist there, active and deadly, waiting to be inhaled or absorbed.

The Soviets believe in chemical weaponry. There are more than 50 plants producing or capable of producing chemical weapons in the Soviet Union, and more than 40 chemical and biological weapons storage depots in Eastern Europe and European Russia alone. The Soviets realize that if chemical weapons are to be decisive, they must be used extensively.

The United States and the Soviet Union both started from the same point in poison-gas technology—with the capture of German Tabun nerve gas in 1945. This gas—aa quantum jump in lethality over earlier gasses—led to more advanced families of nerve gasses which emerged in the 1950s and 1960s. U.S. chemical warfare research and development, however, seemed to move like a minuet—one step forward, one step back, one step to the side—while that of the Soviet Union advanced to a driving tempo. After the widespread slowdown of U.S. chemical warfare capabilities in the early 1970s, the gap can only have widened.

We are now faced with the possible existence of a family of Soviet chemical weapons that have no Western equivalent, simply because no one except the Soviets have expended the time and money to deploy gasses that are not even thought of in the United States. If one nation were to halt its development in any critical field of modern weaponry, such as, say electronic warfare, while its competitor treated it as a high-priority area, it should be to no one's surprise that a tremendous disparity in the quality as well as quantity would result.

This, it appears, is what has happened in chemical warfare. The Soviets have fielded a new range of poison gasses so advanced that we have a difficulty understanding them—let alone devising countermeasures. They are so advanced we do not even know what to look for—which is why it took so many years for the West to determine what Yellow Rain was.

The most chilling, potentially decisive of the new Soviet gasses is called simply "The Flash." Only once has it left hard evidence: a firing line of Afghan guerrillas, peering through the sights of their rifles, cold, stone dead—as if frozen. Reports of other uses of this gas have come out of Afghanistan. An examination of reports from the Yemen War of 1963-67 has also supposedly brought to light an incident that might be a use of this gas. Other, unconfirmed, reports has suggested that it may even have been used against Eritrean guerrillas.

There is no nerve agent known in the unclassified literature that produces symptoms like The Flash. Even the most concentrated nerve agent does not kill instantly, but causes initial convulsions. Tactically, the delivery of nerve gas will usually give time for some countermeasures or, failing that, for the application of antidotes if troops have been exposed. The Flash would apparently give no warning of any sort. Those who died from it, in the words of a State Department official, "just forgot to breathe." We do not know what it is, how it acts, how widespread it is in the Soviet stockpile, or whether any of the U.S. Army's protective equipment is effective against it. The Flash is perhaps the ultimate nightmare weapon, and the nightmare is not made any less frightening by ignorance.

More widely known, but just as hard to explain, is the new Soviet incapacitant, "Blue-X." It has seen relatively widespread use. The State Department has presented clear and convincing evidence of its use in Laos, Cambodia and Afghanistan. Other reports suggest that it was also used during the Sino-Soviet border clashes in 1969.

The tactical value of this gas, which quickly causes unconsciousness, is tremendous. Just imagine, for example, how the U.S. raid on Teheran could have been carried out if supported by this sort of gas—the objective taken with no resistance or bloodshed. Taking prisoners for intelligence-gathering becomes simple, Better still, under the Anglo-American interpretation of the 1925 Geneva Protocol prohibiting use of chemical weapons, Blue-X is not covered because it is not a lethal gas. What could an opponent do against a Soviet force using Blue-X? Escalate to nerve gas? Fire back tear gas? The options are as unpleasant as the gas itself. As with The Flash, the exact nature of Blue-X is unknown.

The third type in the new family of Soviet chemical weapons, tricothecene toxins, is the infamous Yellow Rain. Thanks to the devoted efforts of a few people—State Department officials, journalists (including, I am proud to say, some of my *Soldier of Fortune* colleagues—see "Yellow Rain!" SOF, March '82), Members of Congress and others—the Yellow Rain is fast becoming the symbol of the new Soviet imperialism, made more brutal by the application of a highly advanced technology.

In the words of the Wall Street Journal: "Except on the fringes of opinion, no informed American any longer doubts that Soviet-supplied armies are using 'yellow rain' in Southeast Asia."

The toxins are a simple sort of weapon. Developed from a form of bread mold that has been endemic to the Soviet Union for centuries, they represent a new type of poison gas. They have the potential to be up to 100 times as effective as nerve agents. They are hard to detect—current U.S. Army gas alarms would probably not be adequate. Their small particles allow them to go through most filters. While no official reports have been published as to whether the standard M17 U.S. gas mask can be penetrated, it is not an encouraging situation, especially if the Yellow Rain is used in conjunction with other gasses. Indeed, it appears that most Soviet protective equipment may not be proof against Yellow Rain—which explains why its use in Afghanistan is limited to areas in which no Soviet troops are operating.

Tactically, Yellow Rain is an economy-of-force weapon par excellence. One airstrike can wreak as much havoc and destruction as a large-scale ground operation, without fighting or casualties. In Afghanistan, the Soviets realize that since, as Mao said, the guerrilla moves among the people as a fish moves in the sea, it is necessary to drain the ocean. The Soviets obviously do not want the Afghans to stay at home where they can feed and shelter their countrymen who are fighting the invaders. They want the Afghans to die, or, failing that, to become refugees in Pakistan, further burdening that nation. In some areas, the Soviets do this by moving in with combined-arms ground assaults, destroying the agriculture. The other alternative is the Yellow rain. When the Afghans see people dying in agony, they are not going to wait around for the Soviets to

come back and try again. They are likely to head for Pakistan and safety. Terror is an effective weapon in the hands of those who know how to employ it. To the Soviets, it seems a natural tool.

The Soviet arsenal of overlapping families of chemical weapons allows them to tailor each chemical strike to the specific tactical situation. For example, the U.S. POMCUS equipment parks, pre-positioned in Germany for use by troops flown in from the States, are splendid targets for a persistent nerve agent such as VR-55, delivered by aircraft or long-range missiles. By the time the U.S. Army had decontaminated the hardware, the Soviets could well have arrived to take over what was left. Airfields are also targets for persistent gas—not least because it leaves the runways intact for subsequent Soviet use.

Nonpersistent gas would be used against units holding ground that the Soviets themselves want to occupy, such as an important hilltop. Hydrogen cyanide, delivered by multiple rocket launchers, could well be the weapon of choice in these circumstances. The nonpersistent nerve gas, Sarin, could also be used. Most nerve agents can either be sprayed into the air or used as a ground contaminant. Mustard gas is also primarily a contaminant. Although this makes the gas slower acting and higher doses are needed to kill than when gas is distributed in the air, ground contamination by a persistent agent could allow the Soviets to put an effective barrier to troop movement on a battlefield.

The interaction of gases make each more effective. A strike with hydrogen cyanide will saturate the filters of U.S. gas masks. While the GIs are trying to cope with that the Soviets will hit them with something more lethal. (Unmasked troops might be hit with a vomitifg agent to prevent their donning masks, the felled by a quick follow-up strike gf more deadly gas.) The Soviets believe in the effectiveness of interlocking, complementary systems throughout their armed forces—be they radars, anti-aircraft guns, or poison gas. The whole is much worse than the sum of its parts.

Just about any Soviet weapon at least as large as a 120mm mortar is capable of delivering chemical projectiles. The whole range of soviet artillery—especially the standard 122mm and 152mm towed and self-propelled howitzers—is considered to be capable of using chemical weapons. The standard Soviet artillery units of fire contain no gas shells. When the decision is made to use gas, gas shells that are held, in peacetime, by special caretaker units will be delivered to the guns. Estimates of the total Soviet artillery stockpiles of gas shells vary widely, but the most reliable figures put it at about five percent of the total number of rounds.

The best Soviet weapon for gassing front line troops, however, is the multiple rocket launcher. Advanced versions of the Katyusha "Stalin Organs" of WWII, the most common version is the 40-tube 122mm BM-21 truck-mounted rocket launcher. This rocket also comes in individual, manpacked tube versions, allowing light infantry such as Soviet special forces—or the People's Army of Vietnam—to bring them where the action is. The sound of the "one-two-two" rocket is terrifying. The gas they can carry is a lot quieter, but even more deadly. These rockets are area-fire weapons—they saturate an area, rather than seeking out a pinpoint target.

A battalion of 18 BM-21s in one salvo can create lethal concentrations of gas over an area greater than two square kilometers. This concentration makes them especially effective in using blood agents, which require a high concentration to work and would dissipate if agent density had to be built up slowly. Because the 720 122mm rockets of a BM-21 battalion salvo will arrive on target within a few seconds of each other, they maintain the vital element of surprise for the Soviets, unlike howitzers or mortars, whose first gas shells could alert those on the receiving end. With the rocket launchers, by the time you realize what you've been hit with, it's probably too late. It is estimated that up to one-third of the Soviet rockets stockpiled for multiple rocket launchers are filled with chemicals.

The FROG surface-to-surface rocket is like the old American Honest John. The larger SCUD-A and SCUD-B missiles are similar to the Pershing. All are reported to have chemical warheads. The sheer size of these weapons means that they can produce high concentrations of gas with a single round.

Combat experience, however, has shown that the usual way of delivering Soviet gas is by air. Bombs may be dropped by both aircraft and helicopters. While Aerosol spray systems have so far only been reported on fixed-wing aircraft, there is no reason why they could not also be installed on Soviet helicopters. Just about anything that flies with red stars painted on it is a potential chemical warfare delivery system. One source of grave concern for Western analysts is the many agricultural crop-spraying aircraft run by the governments of potential adversary nations, including the Soviet Union and Cuba. While few of the fixed-wing aircraft could operate in the face of modern air defenses, Aeroflot also uses standard Mi-8 Hip transport helicopters in this role in the USSR. Against people who lack heavy weapons, or in a surprise attack, these crop-dusters have the potential to become horribly effective weapons, since their airframes are already treated against the corrosive effects of chemicals, and their air and ground crews trained in the handling and delivery of toxic substances.

The air-delivered systems have a devastating potential. A *Hind* helicopter gunship could carry four standard Soviet chemical bombs, believed to be 250kg types containing about 100kg of agent. Filled with Sarin, a single bomb could cover half a square kilometer. Standard aerosol spray tanks contain about 400kg of agent. A MiG-27 *Flogger-D*, the standard Soviet-bloc attack aircraft (also used by the Cubans) can carry four of these. Just one tank can cover four square kilometers with Sarin. The thought of a single flight of *Floggers* flying down the front lines of unprotected troops, spray tanks squirting, is not a pleasant one, but it is a reminder that chemical weapons are a powerful "force multiplier." They allow a small force to have far greater effectiveness.

These major systems can be supplemented by a number of smaller ones. The Soviets use a number of chemical-filled land mines. Reports from Afghanistan have mentioned the use of incapacitating agents in hand-held anti-tank rocket launchers. If these reports are true, then every level of Soviet military command, from sergeants leading squads to the old men in the Kremlin, has the capability to deliver chemical weapons.

Defensive preparations are a vital part of the Soviet emphasis on chemical warfare. Because of the weakness of the chemical weapons used by the United States and their absence in the arsenals of other potential Soviet adversaries—in NATO only France has chemical weapons and Chinese capabilities are thought to be limited—the Soviets have really not had to plan against the extensive use of poison gas against them. Yet for many years, despite the lack of credible U.S. chemical-warfare deterrent, Soviet defensive chemical warfare was the finest in the world. It was only in the late 1970s that the U.S. Army started to take defensive chemical warfare seriously, and it still has a long way to go before it is as capable of operating in a chemical environment as the Soviet Army.

Defensive chemical warfare is the responsibility of the *Voenno Khimicheskaya Voiska*—the Military Chemical Forces. Commanded by a Deputy Minister of Defense, the 100,000 men of the Military Chemical Forces serve all of the Soviet armed services, not just the Army. They are specialists in detecting chemical weapons, conducting reconnaissance for their effects, and in decontaminating personnel and equipment. Units of the Chemical Forces are found at all levels of command, with each regiment having a company, each division a battalion, each army (equivalent to a U.S. corps) a reinforced battalion. They train the chemical warfare specialists found in each Soviet company.

But while these specialists devote their full attention to chemical warfare, the defensive capabilities of the average Soviet soldier are not neglected. Unlike his U.S. counterpart, he probably has the benefit of a collective protection system. First-line Soviet BTR-60PB APCs and BMP infantry fighting vehicles all have chemical defenses, as do Soviet tanks. But only the BMP adds a chemical/biological-agent filter to the combination of overpressue and a blower/dust extractor mounted on the other vehicles. These are more effective systems than the largely nonexistent U.S. protective measures but they still do not provide a "shirtsleeve" fighting environment. Only the Czech-designed OT-64 APC, used by non-Soviet Warsaw Pact forces, does that.

Thus, on foot or mounted, the Soviet soldier will have to rely on his personal defensive equipment. Like most of what he uses, it is simple, cheap, poorly engineered, but highly effective. He has an OP-1 protective suit, made out of nonpermeable rubberized fabric. When combined with the required protective undergarments, it is an airtight garment that is hellishly uncomfortable to wear for anything more than minutes. The standard ShM gas mask is also fatiguing to wear, but offers effective protection. Only officers and designated personnel have gas masks with voice emitters.

Everyone else, in true Soviet fashion, is expected to keep quiet and do as he is told. The individual soldier also carries an MSP-18 treatment kit, which includes antidotes for a number of nerve agents and other chemical weapons. (It also includes a roll of "anti-radiation tablets" that are actually placebos.) He also carries an IDP weapons decontamination kit and an IPP personal decontamination kit.

Large-scale decontamination is the responsibility of the Military Chemical Forces, and they have a wide variety of specialized equipment. Most spectacular is the TMS-65. Basically an aircraft turbojet on a truck, it uses heat and decontamination fluid to clean off a tank in one to three minutes. Like most Soviet decontamination equipment, it has nonchemical warfare roles: It can be used as a smoke generator, can melt ice on runways or spray insecticide.

More common is the earlier ARS-12U and ARS-14 tank trucks, used to hose down equipment and troops, which also make an acceptable field shower. The DDA-53, also truck-mounted, provides two steam chambers and a boiler for clothing and equipment decontamination.

A number of systems detect chemical contamination. They range from squadlevel chemical detectors to sophisticated BRDM-2rkh scout cars that use remote robot arms to take soil samples and automatically dispense warning flags if contamination is found.

But more important still is the Soviet training for defensive chemical warfare. Everyone in the army, from private to marshal, is taught to think in terms of nuclear, biological and chemical war. The Soviet soldier wears his protective suit for up to 25 percent of his field training. Of the total training time of a typical Soviet soldier, 12 percent is devoted to NBC training. The Soviet protective suit is worn on peacetime exercises for up to eight hours. Not only field training is undertaken in full protective gear, but jobs such as vehicle maintenance and games such as basketball. Soldiers train the way they fight, and Soviet NBC training is extensive. Diluted versions of actual toxic chemicals are used in some exercises. The resulting casualties are accepted as part of the realism of training—the Soviets consider three-percent losses acceptable on a major exercise.

Soviet chemical-warfare training starts early. It is part of the pre-induction military training that, by law, every Soviet high-school student is supposed to receive. As a result, the Soviet press runs pictures of schoolchildren being taught how to use their gas masks by their smiling teacher. Soviet Civil Defense forces—an important part of their strategic power—are also trained and equipped for defense against chemical weapons.

Perhaps the strongest element of the Soviet defensive chemical warfare effort is its place in the Soviet war effort. It is not a second-rate backwater. The Chemical Troops are a well-placed, well-respected force. All officers of any branch of the Soviet Army are required to know about chemical operations.

However, nothing in the Soviet Union works the way it is supposed to. While the total first-priority treatment given to the armed forces ensures that they are far and away the most effective institution the Soviet Union has ever created, there are still very real gaps between paper and performance. Soviet defensive chemical warfare is no exception. The Soviets complain openly that the rigorous training programs are not followed at unit level. Reports of technicians who do not know their jobs and equipment—forcing the officers to do jobs for them—are frequent.

One key limit to Soviet chemical defenses is that they are not set up to deal with an enemy that will use chemicals against them. Their defensive efforts are aimed at reducing the effects of nuclear weapons or in allowing Soviet units fast and safe passage through areas contaminated by their own chemicals. That is why they have retained their heavy, bulky suit. Although troops do wear it for up to eight hours, in temperate conditions performance begins to deteriorate after 20 to 30 minutes in the suit. The Soviets obviously do not anticipate having to wear the suits for extended periods while waiting for enemy chemical attacks, as the U.S. Army will.

Soviet defensive equipment is old technology and not apparently suited for defense against some of the latest chemical weapons the Soviets have in their own arsenal—which means that the Soviets would not be able to use such weapons in close proximity to their own troops. It is believed that a new generation of defensive chemical equipment will soon be in Soviet service.

The Soviets have professed to have nothing at all to do with biological warfare. They cite their adherence to the 1925 and 1972 conventions and maintain that only the capitalists would use such a horrible weapon. Thus they were able to report an outbreak of an airborne strain of anthrax after a mishap at a suspected biological weapons establishment near the city of Sverdlovsk in 1979 as caused by "bad meat."

Western sources believe that until the 1972 Biological Warfare Convention and probably—given the evidence at Sverdlovsk—after it as well, the Soviets developed a wide range of diseases as well as countermeasures to them. The Soviets are believed to have developed agents that produce plague, cholera, anthrax, tularemia, lassa fever, ebola fever and marburg fever.

The Soviets define biological warfare as being identical with bacteriological warfare. To the Soviets, the trichothecene toxins of Yellow Rain are not biological weapons because, although organic, they do not reproduce.

The Soviets are less likely to use biological weapons than gas, since the biologicals are less predictable in their results and harder to store and deliver. The Sverdlovsk incident shows that a little accident case be very embarrassing.

The Cuban Armed Forces, following their Soviet mentors, are fully trained in both offensive and defensive chemical warfare. Cuban units have chemical defense troops attached. The scale of issue is smaller than in Soviet units and the equipment less lavishly provided, but the principles are the same as those of the Soviet Military Chemical Forces.

There are unconfirmed reports that there is at least one offensive chemical weapons depot in Cuba. Even if this depot is filled only with small amounts of gas for training purposes or nonlethal gas, the Soviets could lift in large quantities of chemical weapons in a crisis. Chemical weapons would give Cuba, even with its existing forces, the capability to inflict immense damage to the United States or Latin America. Its existing MiG-27 force, armed with chemical bombs and spray tanks, could slip under the frayed and tattered U.S. radar curtain (which does not detect most of the drug runners, who do not use electronic contermeasures).

If they were to hit cities or strategic targets along the Gulf coast, the effect would be devastating. Against Latin American targets, the Cubans' large crop-dusting fleet coud do the same thing. Chemical weapons are a potential equalizer, allowing even little Cuba to do tremendous harm to the United States. Should the balloon ever go up, it would be hard to imagine that Fidel Castro—whom the United States once tried to kill with shellfish toxin—would have too many qualms about carrying out such wholesale destruction.

It may be that, in Afghanistan, Southeast Asia, Yemen and possibly Eritrea, we have only glimpsed the sort of horrors that the Soviets have made part of chemical warfare. In yellow Rain, The Flash and The Blue-X incapacitant, we have seen evidence of a sophisticated offensive chemical-warfare technology far beyond what has appeared in the West. There is no reason to assume that the list of new and advanced weaponry stops with these three items. There may well be even more advanced, even more deadly gasses that the Soviets are not willing to test in action, lest the secret eventually reach their opponents. If the Soviets have been willing to invest a tremendous amount of research and development in chemical weapons—as the United States has not—then it may be that they have unlocked a Pandora's box of such weapons. If we do not even know what they are, it is unlikely that we will be able to defend against them.

For many years, the reaction to Soviet chemical warfare has been that of the ostrich—pretend it isn't there and maybe it will go away. Only now is this attitude changing. The U.S. Army is now doing more training under simulated chemical conditions, although both its training and equipment still have a long way to go before they are as effective as those of the British or the West Germans. As the evidence piles up, it has by now become apparent to anyone not wearing the blinders of ideology that the Soviets and their clients have been using chemical weapons (although formal U.S. protests under the 1925 and 1972 Geneva Accords have been conspicuous by their absence). It should also be more apparent that the Soviets have only refrained from using chemical weaponry when their opponents—such as the Germans in 1941-45—possessed both the ability and training to defend themselves and the capability to retaliate in kind. Where these capabilities are lacking, the Russians use chemical and biological weapons to render the battlefield uninhabitable for the unprepared.

That is why the Soviets put a correspondingly heavy emphasis on defensive chemical warfare—it is impossible to wage offensive chemical warfare without it. The lack of a serious retaliatory threat, however, has made the Soviets' task easier. Together with the equipment, there is the training, tactics and thinking that sees fighting under chemical conditions not as an unusual or special case, but something that can happen at any time, anywhere on the modern battlefield.

"We have never rejected terror on principle, nor can we do so. Terror is a form of military operation that may be usefully applied." So wrote V. I. Lenin, laying down guidance his heirs still follow faithfully today. To the Soviets, a just war is not won when fought according to agreements or even the standards of common decency, but one that advances the cause of socialism. If the war does that, then victory can be the only end, and to quail at the means used is simply the soft-headed "bourgeois morality" that Lenin despised. Philosophically as much as militarily, the Soviet use of chemical weapons is a complete, well-thought-out system for war.

Now, just briefly to go over this because it is a late hour and many Members have to catch airplanes, I would like to touch on a few salient points and then implore the membership to not go through the tragedy of the 1930's when Haile Selassie flew from Ethiopia up to the League of Nations. We sent up to Geneva and at those same buildings used by the United Nations at Geneva, he pleaded with the world to do something about a Fascist dictator, Mussolini, killing thousands of his humble

tribespeople with poison gas and he predicted prophetically that if the world turned a deaf ear to the plea of Ethiopia, it would bring about the dissolution of the League of Nations, and it did, and it would probably lead to a greater war, and it did. It took the lives of 55 million people in World War II and ended with the firestorm nightmares in Hamburg and Dresden from incendiary bombing and the holocausts of Nagaski and Hiroshima in Japan.

Now, the Soviets used the poison gas, RCIA, and the defense intelligence agency tells me for three simple reasons:

First. It is very inexpensive.

Second. It is extremely efficient as a form of killing human beings.

Third. And I underscore this one, because this one is really offensive, the world does not give a damn that it is going on.

There are three countries that are exemplary in joining the United States of America in trying to seek the truth of red rain, yellow rain, and now blue rain; our neighbor to the north, a decent, moral country, Canada; our mother country, Great Britain; and Thailand; although they are not mentioned in the government reports, Australia has also done excellent work in trying to ferret out this ugly story.

The Soviets continue their use of chemicals and toxins against the resistance people in Afghanistan and we now have the physical evidence of mycotoxins in these gas masks.

I only regret that the President of the United States had an important trip this week in South America, that he himself was not able to conduct the press conference and that he himself was not able with his great skills as a communicator to hold up this hard evidence and to have in his hand before the cameras and the newspapermen of the world the physical evidence of these Soviet gas masks.

Vietnamese and Laotian troops under Soviet supervision continue to use lethal and incapacitating chemical agents against the H'Mong people. We used to call them, imprecisely, the Mao tribespeople in Laos. These are the indigenous mountain people, similar to what we now call first Americans, Indian Americans in this country. They were there before the Vietnamese, before the Chinese invasions and the incursions over the last 3,000 years. Their roots disappear in the mists of prehistory, and they are being genocided—and that is the exact precise fair word to use—genocided off the face of the Earth because of one thing and one thing only, they befriended the United States in what was called the secret CIA war in Laos for most of the sixties and part of the seventies.

In Afghanistan, the chemical attacks have been documented up through last month. In Cambodia and Laos they have been documented up through November. At this point, I would like to include some other examples.

First in Afghanistan, a Soviet soldier who defected to the Mujahidin in Afghanistan this year said a Soviet toxic agent turned 100 percent lethal, causes flesh to become very soft. The Soviet defecting soldier also said the Soviets maintain stores of Picric acid of potentially lethal tear gas, the 100-percent lethal gas agent, and these incapacitating agents are sometimes used together.

A British journalist has described two unconfirmed attacks, one where Soviet soldiers reportedly shot victims already rendered unconscious by the poison gases and another where Soviet troops reportedly loaded bodies from a gas attack onto a truck and removed them for laboratory chemical analysis.

In September of 1981, in Afghanistan, firsthand reports tell of a Soviet helicopter spraying yellow mist in Paktia Province causing 16 deaths. Survivors had bloody noses and extreme crying and extensive bleeding was reported in those who died.

In December 1981, 15 refugees attempting to escape to Pakistan were attacked by a Soviet helicopter using gas; 4 or 5 people dead, the rest unconscious for 5 to 6 hours.

□ 1240

These may be the nerve gas agents that render people unconscious in great pain, but not necessarily lethal.

According to another report by a Soviet soldier who personally observed the use of chemical weapons, aircraft, or helicopters would first drop a bomb resulting in a mixture of two different chemicals that would kill everything within the contaminated area.

Our State Department says that the soldiers may have been describing the delivery of two separate chemical agents, an occurrence also described by other witnesses.

An Afghanistan veterinarian described an incident in May of 1979 in which 21 people were killed, plus countless sheep. The Soviets blame that incident on the outbreak of anthrax, but the Soviets had been in the area spraying a white powder before the incident. It is interesting that the Soviets would try to blame anthrax as the cause of these deaths, since the Soviet Union, in their chemical experimentations in their own country years ago, had an outbreak of anthrax that may have killed thousands of people in the Siberian area just east of the Urals. So that is a strange cover story for them to use.

In June 1980, an airport official in Afghanistan described 200 to 300 gas containers painted green and brown. At the Qandahar Airport a subordinate described one gas as burning the throat as well as suffocating the victim, one causing what looked like smallpox and blistering, and one making victims tired and sleepy, unable to run or fight.

The likelihood of detection of these chemical agents and toxins depends upon a number of factors: Persistency of the agent, the ambient temperature, the immediacy of rainfall after their use, the wind conditions, the medium upon which the toxic agent was deposited, and then the time and the care and the packaging of the sample from collection to laboratory analysis.

This is one of the many reasons that there has been such difficulty in bringing this case before the world court of public opinion.

Here are other examples from Laos:

H'Mong refugees, recounting details of toxic agent attacks and exhibiting severe medical symptoms, continued to flee to Thailand every month from January through June 1982—brought out more samples contaminated by a yellow sticky substance described as "yellow rain."

Experts agree that these people were exposed to a toxic agent and that no indigenous natural disease, plant, or chemical caused these unique physical effects—vomiting, bleeding, blistering, severe skin lesions.

Laboratory analyses of blood samples from these victims show that trichothecene toxins are retained in the body for much longer periods of time than previously thought.

Description of 1982 attacks:

First, aircraft or helicopters spray a yellow rain-like material on their villages and crops—symptoms are similar to those described in the March 22 study—attributable to trichothecene toxins.

Second, bleeding did not occur in all cases, only abdominal pains and prolonged illness—these symptoms have been described in previous years, which suggest that another agent or combination of agents is still being used.

Medical personnel in Thai refugee camps are better organized in 1982.

First. Doctors use extensive questionnaires and conduct comprehensive medical examinations, including preliminary blood analysis.

Second. Skilled paramedical personnel oversee preparation of blood and serum samples for proper transport and shipment to the United States.

Third. Patients with active symptoms are monitored extensively over time.

Fourth. Biological specimens are drawn by qualified medical personnel and samples refrigerated until analyzed in the United States.

In Laos the Soviet Union maintains significant numbers of advisers who provide maintenance assistance, tech-

nical support and training in both conventional and chemical warfare. A former Lao transport pilot who defected early this summer has described the aerial movement, under Soviet supervision, of toxic agents within Laos.

And examples from Cambodia/Kampuchea:

Most reported attacks in 1982 occurred near the Thai border, making it easier to obtain samples and other direct evidence of toxic agent use.

February and March 1982—several attacks occurred just across the Cambodian border in Thailand—samples taken from the Thai attacks were studied in Thailand, Canada, and the United States—United States and Thai officials found evidence of trichothecene mycotoxins—Canadian team found evidence of a toxic agent but tests for trichothecenes proved inconclusive.

Toxic agent artillery attack on February 13, 1982—blood and urine samples contained trichothecene toxins and post-mortem tissue from a victim confirmed the presence of trichothecene toxins.

Vietnemese conducted toxic agent attacks against the Kampuchean People's National Liberation Forces—samples from this attack are being analyzed.

Now that we have the State Department documentation, now that we have the French Government, through its intelligence sources, on the verge, possibly in March or April, of also going public with this, we simply have to face up to this coverup problem that at the United Nations—and this is what our Committee on Foreign Affairs in the House has unfortunately relied upon—the United Nations body that is given the responsibility for investigating this, is commanded by a high-raking Soviet official of the KGB. Of the 17 people who have commanded this secretariat in the U.N. that has the responsibility for this, 16 of the 17 have been KGB officers of colonel or full general rank, and the only non-KGB officer since 1945 has been a Polish dedicated Communist officer of their intelligence forces. This structure was set up under President Roosevelt and the other early architects of the U.N. to coax the Soviet Union into that world body, similar to the outrageous fact that they are the only nation in the world that has three votes in the General Assembly. They sit there with supposedly three distinct nations, the Ukraine, Byelorussia, or White Russia, and the other 13 so-called Republics of the Soviet Union.

Well, the fact that we gave them three votes in the General Assembly has enabled them to cripple every single investigation of biochemical warfare that has taken place over the last few years.

I will close my formal part of this presentation, other than putting in the Soldier of Fortune magazine "Red Rain" article and the State Department report, with the following observation:

The Soviet Union has now had a new leader assume the reins of power with the 12, soon to be 14, members of the Politburo that controls the world's only other superpower. Andropov, now the principal Communist in the world, commanded the KGB forces of the Soviet Union for 15 of the 18 years that Leonid Brezhnev was head of the Soviet Union. he only resigned from that KGB position last May so as to set himself up for assuming all of the power he has accumulated since then.

All of these instances of biochemical war crimes were authorized, as was the assassination attempt upon the Pope, from the Kremlin during the period that Yuri Andropov was head of the KGB. This new leader of the Soviet Union is as conversant and as fully aware of what is taking place in Afghanistan, Ethiopia, Kampuchea, and Laos as any person in the world today. And if we are approaching a situation where nuclear weapons are going to become the poison gas of World War II, an untouchable weapon, every man or woman of good conscience hopes they will remain untouchable weapons for all of whatever God has left the human race time on this planet.

Would it not be an ironic reversal that the poison gas of World War II, the weapon that even Hitler would not touch except for one ghastly footnote, poison gas, was used against people in concentration camps, particularly 6 million Jews, the Zyklon-B gas, and it was used by Mussolini before warfare started. But Churchill did not unleash the poison gas stocks of Great Britain, which he had said in secret papers now being released he would have done if Nazi Germany had sent the invasion ships across the channel in the summer of 1940. Hitler, even though he was pulling his own people down around him and saying they all deserved to die, still would not touch poison gas, at least on the battlefield.

The United States of America, with a good case for saving lives and preventing the invasion of Japan and costing ourselves 100,000 dead and possibly 1 million or 1½ million dead Japanese, did use poison gas of a type radiation poisoning through the nuclear weapons used on Hiroshima and Nagasaki.

Would it not be ironic if we sealed off the radiation poisoning that the world has developed and then the Soviet Union would have carte blanche to use the biochemical warfare that it has built into a massive advantage over the remaining free nations of the world, and all we would have accomplished is this ugly role reversal of atomic bombs being the untouchable weapon but poison gas being now acceptable. It is being used at this monent in foreign nations. Why would not the Soviet Union, with the nuclear freeze, feel that they were free to use it, since all of their tank-armored units are biochemically sealed, as are their armored personnel carriers? I have seen these biochemically sealed weapons systems in the captured weapons in the intelligence areas in Israel.

Would it not be ironic if they were suddenly to decide they could dictate foreign policy to the world because not only are they three to four times superior in conventional weapons of death, but they have such a superior advantage in biochemical warfare, a weapons system that they feel is more efficient than nuclear weapons, far cheaper, and the world does not give a damn that it is being used to kill humble, simple people in four countries today?

Where would we be in this raging debate that I welcome that is coming up with the Catholic bishops, Protestant bishops, this current administration, and I am sure next year the 98th Congress, both of its bodies, arguing constantly and ferociously about what we are going to do about disarmament while the Soviet Union gets a free ride with biochemical war crimes because the world does not care? What an insane, maddening situation that would be.

Every single Congressman elected to serve and to be sworn in on January 3 of next year, or sometime in January, the 5 new Senators and the 95 returning Senators, will be betraying their constitutional oath to defend this country if they do not make themselves as conversant on the use of biochemical warfare at this moment today in 4 countries as they are on any other agriculture issue, economic issue, budget issue, or other issue in their office. They are failing their constitutional oath and they are a failure as a Congressman of the United States or a Senator of the United States if this is not one of the major issues discussed in this body, coequally discussed with nuclear disarmament, bionuclear freezes, MX missiles, B-1 bombers, or whatever else we decide to spend with the appropriations bill from the people's House, the House of Representatives, with its power of the purse, the money that we decide under the preamble of the Constitution to provide for the common defense.

This should be the burning issue in the streets and demonstrations of Rotterdam, Amsterdam, Brussels, and every other European capital across this world.

All you have to do is travel behind the Iron Curtain, as I have done, and talk with the freedom-loving people in the East-bloc nations or in China or anywhere in the world and ask them

what they think is one of the major crimes of our generation, and they will say red rain. They cannot believe that it is not a major item of discussion here or the Parliaments and Knessets in the remaining democracies of the free world.

□ 1250

I hope that my colleagues in this House will avail themselves of this special order, read the report, at least from our own State Department, and see if this is not one of the compelling issues of the 1980's.

DR. JAMES PAUL TURNER DESERVING OF HONOR

(Mr. SUNIA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SUNIA. Mr. Speaker, I rise today to place in the CONGRESSIONAL RECORD the name of someone I consider to be fully deserving of that honor, a person I am proud to have known for many years, and a citizen who is a credit to this great country of ours. He is Dr. James Paul Turner.

Dr. Turner celebrated his 80th birthday last week. For the past 15 years of his life—a period when he should have been enjoying retirement with children and friends—he has been serving the people of American Samoa in the field of medicine. Several times during that period, he directed the entire health care program of the territory. He came to American Samoa for a 2-year contract in 1967, fell in love with the people and the territory, and like Robert Louis Stevenson, he stayed to make his home amongst us islanders. Dr. Turner, a widower when he came on island, married Rose Fano Shimasaki of Fagaalu, American Samoa, and they have made a beautiful home on a hillside close to the hospital where he works everyday.

James Paul Turner was born in Harrisburg, Ill., on November 24, 1902. He attended grade school in Little Rock, Ark., high school in Hamburg, Ark., and graduated from Quachita Baptist College in Arkadelphia, Ark., with a bachelor of arts degree in June of 1923. Through cafeteria, supermarket, road paving and hospital jobs, and with the aid of used textbooks, Dr. Turner was able to work his way through the University of Arkansas Medical School graduating in 1927 with an M.D. and a bachelor of science degree.

Followed his internship at the Baptist Memorial Hospital, he was employed by the Santa Fe Railroad Co. to work in their hospital at Topeka, Kans., as assistant surgeon. In 1937, he resigned from the railroad and move to Carizozo, N. Mex., where he established a private practice. He was the only medical doctor in that county. With a staff of two registered nurses and two nurse aides, he operated a private hospital providing general medical and surgical services for the people who otherwise had to travel 90 to 150 miles for treatment.

When he came to American Samoa 30 years later, Dr. Turner had already contributed a major part of his life to the care of Americans in his part of the country. He was ready to retire. But seeing how the Samoans needed his services, he became committed and has served my community with patience, diligence, and a combination of fatherly and friendly approach which has endeared him to the people.

Mr. Speaker, I am proud to be Dr. James Paul Turner's representative in Congress. He is another reason why this is such a great country. And yes, he is another reason why Samoans are proud to be Americans.

REASONS FOR COMING FOR CONGRESS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. COLLINS of Texas) is recognized for 30 minutes.

Mr. COLLINS of Texas. Mr. Speaker, as I am finishing up eight terms of Congress, I look back with a grateful feeling of appreciation to Texas for giving me the opportunity to serve. And as I look back, I have warm memories of the fine Members with whom I have served.

The other day, this most interesting comment was made. "There are four reasons that motivate people to serve in Congress. They are love, cause, power, and money."

Love is the one that I hope inspires most of us to come up here. We believe that America as a Republic, is the greatest Government that has ever existed in the history of the world. We appreciate our religious freedom to worship God. We appreciate our system of private enterprise which leads to our high standards of living. Yet, love is the greatest need that we have in America today. Love for God, family, and country was the patriotic spirit that built our country. The Golden Rule is the finest message on true love.

The second motivation is cause. There are different causes that have motivated us. In my own case, I believe that America has more government than we want, more regulations than we need, and more taxes than we can afford to pay. In my own heart, I am convinced that unless we can turn this country around, that we are going to lose our Republic. As they said in the days of ancient Greece, "When the populace learns that they can vote themselves the largesse of the government, they will vote for more and more." And we see the liberals today in this country, who work overtime trying to figure out more ways for the Government to give.

The third factor that influences some is power. In all history, men and women have enjoyed the excitement of power. Power means recognition. Power means the opportunity to enjoy special benefits. It also means giving to your friends the privileges and opportunities that you want to bestow. But power is the least desirable of all the characteristics. And yet, constituents and press alike say that many people campaigned for Congress because of their desire for power. They want the special parking, the seat at the Kennedy Center, telephone direct to a leader, naming an appointee.

And the fourth reason is the one that we should never have. It is the desire for money. It has been said that some people come to Congress because they can make more money than they could make in civilian life. I believe that money should never be an incentive to go to Congress. If you want money, go into business. We should be here for service to the country.

Before I ever came to Congress I wanted to be entirely financially independent. It is a wonderful feeling, as I leave Congress, to know that I can support my family. It was with deep satisfaction while I was in Congress, I could turn half of my salary back for taxes and give the other half away to charity. So I never felt beholden to any special interest.

But above all, I think every Member of Congress should always campaign with the feeling that if he lost, his family would be better off in an economic way. When election year comes up, the fear of defeat could be most overbearing for a young Member with children who wonders what would happen to his family if he got beat. His uncertain economic future puts pressure on him.

There is one positive solution for money. Congress should not stay in session as long as it does. I have introduced a bill which I would strongly recommend for future sessions of Congress. In the days when this Republic was established, the Congressmen met and went home. They worked on their farms. They handled their law cases. They ran the store. They were doctors. They were responsive to their constitutents and to the needs of their home States. But what is more, they made a living. They made a living and they were able to meet the basic needs for their family. They would also spend more time with their family while they were back home.

The subject of money for Congressmen was covered so well by Otis G. Pike of New York when he made a speech February 14, 1978, on the House floor, about his decision to not run again after 18 years of service:

There is now abroad in the land the concept that every aspect of my private life should also be public property. Having fought and voted for years against people having their phones tapped, their mail opened, their tax returns publicized, their bank accounts examined, and for their right of privacy, I am expected to give up all of my own. Public servants are people, too. I would rather give up my public life and get out of the fish bowl. So that's another reason.

Last year the Congress was in session 174 days. This means that it was not in session 191 days, more than half the year. Last year the Congress voted a so called "Ethics Bill". Most of the bill I supported, but I opposed as hard as I could the one provision in the bill which said that I could only earn, outside of Congress, a minimal amount. If I take those 191 days when Congress was not in session and go junketing all around the world at your expense, I am ethical. If I go home and work in my law office, I am unethical. There were loopholes for certain professions. If I write a book, I am ethical. If I get a hundred thousand dollars a year sitting on my butt and collecting dividends, interest, rents, and royalities, I am ethical. If I work and earn $10,000, I am unethical. Our new no-work ethic makes no sense to me.

Frankly, there are enough loopholes so that by itself, there is no way that the new ethics can either force a Congressman out of office or even cut his income. Congressmen who control businesses can reduce their salaries, which are deemed unethical; increase their dividends, which are deemed ethical. Lawyers can be quote, bought out, unquote by their partners, instead of earning money. Anyone in business can be paid rent, which is ethical, instead of fees or salary which are not. Wives and children can get money the Congressman used to earn. I decline to play any of those games. My own ethics tell me to get out.

In any event, neither the Democratic party nor the House of Representatives is a comfortable place for a Congressman who believes that people should work when they can, earn what they can, save what they can, pay their bills and balance their budgets. And that nations should, too.

Let me add this thought in closing. If Members went home to earn a dollar, they would be effectively reminded just how hard it is to earn one. There would be less Government spending and we would have a balanced budget.

This morning I read an interesting statement by Congressman DANNEMEYER, of California. He said the Federal Government borrowed $212 billion in 1982 and saved only $213 billion. This means high interest rates as there is no money for the private sector.

In the State of Texas our legislature only meets 5 months every 2 years. And there is an old saying "No one's life or property is safe when the Texas Legislature is in session." But we have a constitutional limit that they must balance the budget.

We meet too much in Congress. The more we meet, the more we spend. Congress needs an amendment requiring a balanced budget.

THE REVISED "OMNIBUS BANKRUPTCY AND COURT IMPROVEMENT ACT"

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Virginia (Mr. BUTLER) is recognized for 60 minutes.

● Mr. BUTLER. Mr. Speaker, the 97th Congress has returned to Washington for a lameduck session expected to last only 3 weeks. The press has been full of stories about the great issues we confront—a highway jobs bill, an acceleration of the tax cut, MX missile spending, regulatory reform, and so on. But I want to raise the consciousness of the Members—and of the media—regarding an issue which in my view has been comparatively ignored. I have in mind of course, the urgent need for the House and Senate to enact a bill conferring article III status on the bankruptcy court before the expiration of the stay of the Supreme Court's order in the Marathon case on December 24. That case held that the system of article I bankruptcy courts created by the Bankruptcy Reform Act of 1978 cannot constitutionally exercise the broad jurisdiction conferred by that act so long as the judges are without protection against salary diminution and without life tenure.

What will happen if Congress fails to act? In a word, disaster. A cascade of hundreds of thousands of bankruptcy cases will pour into the Federal district court system which is grievously ill-equipped by experience or physical resources to handle such an immense burden. I wish all Members would reflect on whether they really wish to see that happen.

I can well appreciate the fact that a massive disinterest in the subject of bankruptcy by the average Member of Congress is but a reflection of the lack of concern expressed by his constituents. But we must act, and we must act before the clock runs out on December 24.

Just before the recess, which enabled the more ambitious of our Members to secure their further employment for the next 2 years, I introduced an omnibus bill, H.R. 7294, which ties together into one package a number of legislative proposals in the areas of general court reform and bankruptcy court and Code improvements, including an article III bill. As I said in my introductory remarks on October 1, I recognize that such a bill will not be completely palatable to anyone, including myself, but it constitutes an honest effort to reconcile the differences and provide something we all can live with.

On Thursday, I introduced a revised version of H.R. 7294, the Omnibus Bankruptcy and Court Improvement Act which is now numbered H.R. 7349. I am hopeful that this will be perceived by Members to be a compromise package which can resolve many matters at once, ranging from article III to bankruptcy code reform, and from abolition of diversity jurisdiction to judicial survivors' annuities benefits. I hope it will gather strength from those attracted to some combination of its merits, if not the whole package. In the other body, Senator DOLE is moving with an omnibus package based in considerable part on H.R. 7294, and if that should pass and come to us, perhaps as an amendment on one or more Senate or House bills, I hope that my revised bill will establish a point of departure and reference for House consideration of the Senate action.

The differences in this bill from the original H.R. 7294 are for the most part in three subtitles. The Bankruptcy Court Act, subtitle A of title II, has been amended to provide that the appointment of 227 article III bankruptcy judges to a bankruptcy division of the district court system will be staggered so that a share will fall to whomever is elected to the White House in 1984. In making this change I bow in the direction of political reality. In the first year, the President will be required to appoint at least one article III judge in each district, and until their successors are appointed the present bankruptcy judges are carried over and will serve on the bankruptcy division of the district court. The bankruptcy court is also given authority to appoint its own clerk, a more important change in the interest of efficient operation than many may realize.

The second group of changes occurs in the consumer credit amendments, subtitle A of title III. In an effort to effect a reasonable compromise with the consumer finance interests which have so strongly promoted reform legislation in this Congress, I have agreed to changes in the definition of what constitutes a reasonable portion of a debtor's debts, the addition of a small amount exception into the preference section, deletion of one of the tests required to be satisfied to dismiss a chapter 7 case, placing a $5,000 cap on the value of property subject to redemption, and a few other changes described in the sectional analysis which follows at the end of my statement. There were a number of amendments which the consumer credit industry wanted, however, which I frankly found myself unable to support.

Finally, I have amended the shopping center bankruptcy amendments, subtitle C of title III, to delete the word "substantially" in section 365(b) to make clear that lease provisions such as the tenant mix and use clauses are to be respected by the trustee.

In broad outline, Mr. Speaker, my bill consists of four titles, as follows:

Title I, court reform, contains in subtitle A the Federal Court Reform Act of 1982, which has already passed the House as H.R. 6872. This provides greater discretion to the Supreme Court in selecting the cases it will review and makes other necessary reforms. Subtitle B abolishes diversity jurisdiction, which has congested Federal courts with cases which have no business being there and would not be there but for the accident of diverse citizenship of the parties. Subtitles C, D, E, and F provide respectively for judicial survivors annuities, for the establishment of a State Justice Institute to improve judicial administration in State courts, for a Federal Courts Study Commission to study current Federal court jurisdiction and other matters and develop long-range plans, and for an intercircuit tribunal of the U.S. court of appeals. Subtitle G places the U.S. trustees system on a permanent, nationwide basis, which it conspicuously deserves.

In title II, judicial powers, subtitle A places the bankruptcy court system on a firm article III constitutional footing by establishing the court as a division of the U.S. district court system and giving the judges lifetime tenure and protection against salary diminution as required by the Marathon Pipeline decision. Subtitle B is the omnibus judgeship bill providing for 45 additional Federal district and appellate court judgeships. This is substantially the same as the Judicial Conference recommendation of March 5, 1981.

Title III, bankruptcy improvements, contains in subtitle A those consumer credit amendments to the 1978 Bankruptcy Code which in my judgment have substantial support and are not excessively favorable to either debtors or creditors. This reflects my conviction that in general the balance which we struck in 1978 was a good one. Subtitle B makes necessary amendments for handling grain elevator bankruptcies, including expedited judicial procedures. Subtitle C contains provisions relating to shopping center bankruptcies, and subtitle D amendments relating to the old bankruptcy referees salary and expense fund previously passed by the House. Finally, title IV contains the House bankruptcy technical amendments bill, introduced as H.R. 3705, which crosses many t's and dots many i's throughout the code but makes no substantive amendments.

Mr. Speaker, the Administrative Office of the U.S. Courts has promulgated a proposed district court local rule to govern the operation of the bankruptcy courts after December 24 if no article III legislation is adopted. The proposed rule assigns to the bankruptcy courts in each district the district court's jurisdiction over "all cases under title 11 and all civil proceedings arising in or related to cases under title 11." (Proposed rule (b)(1).) District courts are authorized to withdraw any reference to a bankruptcy judge, in whole or part, upon the court's own motion or the motion of a party. In addition, the district courts must review de novo any proposed judgment of the bankruptcy court in any proceeding "related to" but not "arising under" a case under title 11 and in any other proceeding where such de novo review is constitutionally required. However, the proposed rule does not define those other cases in which district court de novo review is constitutionally required.

In testimony before the Senate Judiciary Subcommittee on Courts on November 10, the Assistant Attorney General in charge of the Office of Legal Policy, Mr. Jonathan Rose, declared that the Department of Justice was frankly uncertain whether the proposed rule would withstand a judicial challenge. The proposed rule is based on the assumption that the court's decision has left untouched the broad bankruptcy jurisdiction conferred upon the district courts by section 241(a) of the act, in 28 U.S.C. 1471 (a) and (b). In fact, it is unclear whether the Court's holding may be limited in that fashion. See 102 S.Ct. at 2880 n. 40 (plurality opinion); *Id.*, at 2882 (Rehnquist, J., concurring). Furthermore, there are serious questions whether the proposed rule legitimately may assign to the bankruptcy courts significant portions of the district court's broad bankruptcy jurisdiction over the act, since this is precisely what the Court refused to do in holding that the jurisdiction which the bankruptcy court cannot constitutionally exercise could not be severed from the remainder of the jurisdiction conferred on the bankruptcy courts under the 1978 act.

The Department of Justice has no confidence that the proposed rule would be proven an effective interim remedy to the bankruptcy court crisis, thereby enabling Congress to take more time to determine how it wishes to resolve this matter. The permissible scope of district court jurisdiction over bankruptcy matters would, of course, be subject to substantial litigation before it could be firmly settled. Even more extensive and difficult litigation would be required to determine which questions could be safely delegated to the bankruptcy courts and which would have to be heard de novo by the district courts.

The Assistant Attorney General went on to say that if district courts recognize the problems with the rule and withdraw the reference of many bankruptcy matters from the bankruptcy courts or attempt to review de novo large numbers of bankruptcy matters, the resulting delays will severely hinder the operation of the bankruptcy system. The district courts are not at present capable of expeditiously handling both their own large workloads and the enormous volume of bankruptcy matters. Over 700,000 bankruptcy estates—and 100,000 adversary proceedings—currently are pending. New bankruptcy petitions are being filed at the rate of more than 10,000 per week.

On the other hand, if the district courts permit the bankruptcy court to adjudicate a broad range of cases and proceedings pursuant to the local rule there is a substantial risk that these cases and proceedings will have to be relitigated if the local rule is found invalid. Under either alternative, the bankruptcy court system will operate under a cloud of uncertainty. In the light of such jurisdictional uncertainty, it would be especially difficult to proceed with any large commercial bankruptcies or reorganizations, where debtors, creditors, and purchasers of assets must be able to rely on the validity of the bankruptcy court's orders and cannot proceed subject to the risk of judicial invalidation of their acts.

In short, the Department of Justice does not believe that the bankruptcy court system can operate effectively after December 24 in the absence of remedial legislation. Nor do I. The disruption of this system will ultimately result in losses in millions of dollars and thousands of jobs, as reorganizations of our Nation's productive resources are delayed by legal uncertainties. I also agree with the Justice Department's concluding point that we cannot rely on a prospect of a further stay from the Supreme Court. The Court's stay has been extended once, to coincide with the adjournment of this Congress, almost six months after the Court's decision. As a practical matter, the deferral of this issue until the next Congress would make final action by Congress unlikely before late spring of 1983, a delay the Court is hardly likely to countenance.

In addition to the interim rules proposed by the Administrative Office, we have a legislative solution proposed by the Judicial Conference, which has been introduced in this body as H.R. 7132, which would in effect provide for a district court determination of ancillary matters, those matters which caused the court to be called unconstitutional in the first place. This proposal, if anything, is even more inefficient than the pre-1978 summary and plenary jurisdiction system that the 1978 Code sought to eliminate. The Judicial Conference's proposed legislative remedy is really a trifurcated jurisdictional system that would produce endless litigation over which forum would handle an issue. Rather than create judicial unity and clarity and provide constitutional certainty, it would create confusion and judicial dispute. Such an inefficient and costly ap-

proach to bankruptcy administration and adjudication would dilute the assets of an estate, reduce the return of creditors, jeopardize reorganization efforts, and tax the resources of already overburdened district courts, while requiring a massive duplication of effort by bankruptcy judges and magistrates.

In summary, while I always strive to keep an open mind, my present view of the Judicial Conference proposal is somewhat negative.

Mr. Speaker, the bankruptcy law has been one of my abiding interests ever since I came to this body nearly 10 years ago. I am continuing to work on this issue right into the final weeks of my service as a Member of the House of Representatives because of my conviction that our present situation demands that one final effort be made to forge compromise legislation before this Congress passes into history, and I want to contribute whatever I can to that compromise. Toward that end, I am prepared to work with every interested party who shares my concern.

A section-by-section analysis of my bill follows:

OMNIBUS BANKRUPTCY AND COURT REFORM ACT

TITLE I—COURT REFORM

Subtitle A—Federal Court Reform Act

Part I of the Subtitle substantially eliminates the mandatory or obligatory jurisdiction of the Supreme Court. Under current law, certain cases may be appealed directly to the Supreme Court when the Court is obligated to hear and decide those cases, although in most instances they do not involve important issues of federal constitutional law. These amendments convert the method of Supreme Court review to a discretionary, certiorari approach. Part II of this Subtitle makes changes in the law relating to jurors' rights, and Part III eliminates most of the existing civil priorities with the exception of those involving personal liberty (criminal cases and habeas corpus), application for temporary restraining orders and injunctions, and other cases where good cause has been shown.

This Subtitle is idential with H.R. 6872, the Federal Court Reform Act of 1982, which passed the House on September 20, 1982 and is pending in the Senate, except for one technical change. See House Report 97-824, Part I.

Subtitle B—Diversity jurisdiction

This Subtitle abolishes the invocation of federal court jurisdiction based solely on diversity of citizenship.

This Subtitle is identical with H.R. 6816, the Diversity Jurisdiction Reform Act of 1982, which was reported from the House Judiciary Committee on September 15, 1982. See House Report 97-808.

Subtitle C—Judicial Survivors Annuities

This Subtitle makes equitable adjustments in the law dealing with annuities for the families of deceased judges.

This Subtitle is identical with the Judicial Survivors Annuities Act, S. 1874, introduced by Senator Thurmond at the request of the Chief Justice and currently pending in the Senate Judiciary Committee. See Senator Thurmond's introductory remarks, Congressional Record, page S13782, November 19, 1981.

Subtitle D—State Justice Institute

This Subtitle creates a private, non-profit corporation to further the development and adoption of improved judicial administration practices in State courts.

This Subtitle is identical with the State Justice Institute Act, S. 537, which passed the Senate on August 10, 1982 and is now pending in the House Judiciary Committee, except for a conforming amendment, Section 162A.

Subtitle E—Federal Courts Study Commission

This Subtitle establishes a commission to study aspects of federal and State court jurisdiction including problems of substantive law, civil and criminal procedure, workload and caseload of the courts, case processing, and State and federal bars, and to make recommendations for legislative action.

This Subtitle is identical with S. 675, which passed the Senate on October 1, 1982 and is now pending in the House Judiciary Committee, except for minor technical and clarifying changes.

Subtitle F—Intercircuit Tribunal

This Subtitle creates an Intercircuit Tribunal of the United States Court of Appeals to exercise reference jurisdiction from the Supreme Court.

This Subtitle is identical with H.R. 4762, introduced by Representative Kastenmeir on October 15, 1981 and now pending in the House Judiciary Committee, except for a clarifying amendment in 28 U.S.C. 1272 as added by Section 184 and in making the effective date October 1, 1983.

Subtitle G—United States trustee program

This Subtitle creates an Administrative Center of the U.S. Trustees, supervised by a Director and Deputy Director appointed by and subject to removal by the Chief Justice in consultation with the Judicial Conference. An Office of the U.S. Trustee will be established in each judicial district where its creation is recommended by a majority of the bankruptcy judges and the duties of the U.S. Trustee under the provisions of this Subtitle will generally parallel those under the existing pilot program.

The Bankruptcy Reform Act of 1978 created a five-year trial pilot program of United States Trustees to be supervised by an assistant attorney general in the Department of Justice. Ten pilot programs were established in various geographical areas of the country covering 18 judicial districts.

The principal role of the U.S. trustee is to relieve the bankruptcy judges from administrative and supervisory duties, leaving them free to resolve disputes untainted by knowledge of matters unnecessary to a judicial determination, and to provide close supervision of panels of private trustees. One of the primary goals of the 1978 Act was to restore public confidence in the fairness of the bankruptcy court system and remove some real and many perceived abuses in the administration of bankruptcy cases. It was essential that bankruptcy judges, with their expanded judicial powers, be perceived as impartial arbiters, and to accomplish this it was recognized that they must be relieved from their previously active role in managing and administering cases.

Active supervision of bankruptcy cases is necessary because of the public interest in the proper administration of bankruptcy, the many people affected by bankruptcy proceedings, and "the significant potential for fraud, for self-dealing and for diversion of funds." (H. Report 95-595, 1977, p. 88).

The United States Trustees program performs the essential administrative and supervisory functions in bankruptcy proceedings, and generally acts as the watchdog of the bankruptcy system and its participants. Among the duties and responsibilities of the U.S. trustees are overseeing the qualifications and appointments of private trustees in bankruptcy cases and supervising their performance, serving as trustees in no-asset cases where private trustees may be unwilling to serve and as standing trustees in chapter 13 cases where no standing trustee may be willing to serve, investigating misconduct or impropriety, monitoring the hiring of professionals and experts and the reasonableness of their fees and compensation, examining the debtor or presiding at meetings where the creditors examine the debtor, objecting in appropriate cases to the discharge of the debtor, reviewing the adequacy and completeness of financial statements submitted by the debtor, reviewing the final reports on estates that trustees have administered, forming representative creditors' committees, and supervising creditors' committees to ensure that they perform their statutory duties.

Section 224 of title 2 of the House Amendment to H.R. 8200, the 1978 Bankruptcy Reform Act, created nine sections in chapter 39 of title 28 providing the details of the U.S. trustee system. During the pilot period, the Attorney General was directed to appoint a U.S. trustee for each of the ten pilot programs covering 18 judicial districts. The U.S. trustee is appointed for a term of seven years, though if the pilot program were to be terminated after five years, his appointment would also terminate. The U.S. trustee is subject to removal for cause by the Attorney General, and the maximum annual compensation for a U.S. trustee may not exceed the lowest annual rate of basic pay for a GS-16. The U.S. trustee system is patterned after the U.S. attorney system regarding civil service benefits.

The House Judiciary Subcommittee on Monopolies and Commercial Law has been particularly active in monitoring the performance of the U.S. trustee program and at an oversight hearing conducted by that Subcommittee on May 7, 1982, testimony was received which substantiated the previously reported outstanding success of the U.S. trustees program to date in the pilot project offices. The former director of the Executive Office for United States Trustees in the Department of Justice, Mr. Richard L. Levine, testified that the U.S. trustees have won the support of the bankruptcy judges and work very effectively in their courts. He went on to say that the U.S. trustees have established a significant influence over the appointment of creditors' committees in chapter 11 cases, which are complex cases under which business corporations attempt to reorganize themselves and continue their operations. In the U.S. trustee districts there has been an organizational meeting of creditors called in virtually every significant chapter 11 case by the U.S. trustee in order to ensure that the creditors have an opportunity to become organized, select whatever functionaries they wish to select, and to hold the debtor accountable.

Mr. Levine also testified that the U.S. trustees have been instrumental in the operations of efficient first meetings of creditors under Section 341 of the Bankruptcy Code. They have also generally been of assistance

in training trustees to serve effectively on panels of bankruptcy trustees.

In sum, the Monopolies Subcommittee has been told by practitioners, creditors, and academic experts that in the pilot project districts, handling approximately one-fourth of all bankruptcy proceedings in the United States, the U.S. trustees have been essential to the fair, efficient, and effective operation of the bankruptcy courts.

A most serious and continuing problem since the inception of the program, however, has been budget uncertainty. During a period in which the numbers of business and personal bankruptcies has sharply increased, the program has been consistently underfunded, so that not a single office, according to Mr. Levine's testimony, has ever been staffed to the level that it ought to have. The program has never had sufficient advance planning because in no fiscal year has it known how much it would have until it was too late to spend it. This problem has been exacerbated to the point of impossibility by the present disposition of the Administration that it be terminated. These efforts reached a climax in the effort earlier this year to shut down the Chicago office of the U.S. trustee program completely, in violation of the the express mandate of Section 581 of title 28, which requires the Attorney General to carry out the program in ten trustee districts, including the Northern District of Illinois. The Department of Justice has been unable or unwilling to reprogram funds from other activities to meet the needs of the U.S. trustees program, and it has become evident to all concerned that the Department is not an appropriate or hospitable environment for the U.S. trustee program. It was argued in 1978 that placement of this office in the Executive Branch violated the doctrine of separation of powers and that placement specifically in the Department of Justice created a potential conflict of interest in those bankruptcy cases in which the Government was a creditor.

Placing the appointment and supervision of U.S. trustees under the Administrative Office of the U.S. Courts was also carefully considered in 1978 and rejected as inappropriate (see House Report op. cit., pp. 110–115).

In the judgment of those Members of the House and Senate Judiciary Committee who have been most actively involved in bankruptcy code reform and the administration of the bankruptcy court system, the course taken by this legislation of establishing a nationwide U.S. trustees program as an independent establishment in the judicial branch of government is eminently sound. A section-by-section analysis follows.

SECTION-BY-SECTION ANALYSIS—UNITED STATES TRUSTEES PROGRAM

Section 190 states the short title of the subtitle as the "United States Trustee Program Act of 1982."

Section 191 reenacts and redesignates chapter 39 of title 28, United States Code, as chapter 44 of title 28, United States Code, and sections 581 through 589 of title 28, United States Code, as sections 651 through 659 of title 28, United States Code. This redesignation transfers the United States trustees program from Part II (the Department of Justice) to Part III (Court Officers and Employees) of title 28, United States Code, and is consistent with the transfer of the management of the United States trustees program from the Attorney General to the judicial branch of government.

Section 192 amends 28 U.S.C. § 651, as redesignated, to establish an Administrative Center of the United States Trustees in the judicial branch of the government, and to provide for its responsibilites and authority. the Director and Deputy Director of the Administrative Center shall be appointed and removed by the Chief Justice of the United States in consultation with the Judicial Conference of the United States. The Director's salary shall be determined by the Chief Justice of the United States in consultation with the Judicial Conference, but shall not exceed the lowest annual rate of basic pay in effect for Grade GS-18. The section also provides that the Deputy Director's salary, to be determined by the Director, shall not exceed the lowest annual rate of basic pay in effect for Grade GS-16.

The Director shall have the powers necessary to discharge his duties under the subtitle, and may delegate those duties. The Director is required to prepare a proposed annual budget for the Administrative Center, to submit it to the Director of the Administrative Office of the United States Courts and to the Judicial Conference, and to submit the budget as they approve it to the Congress. The Director shall also appoint necessary employees of the Administrative Center.

Section 192 also amends 28 U.S.C. § 651(b), as redesignated, to provide for the establishment of an office of the United States trustee in each judicial district for which such an office is recommended by a majority of the United States district judges assigned to the bankruptcy division of the district court. The United States trustees shall be appointed by the Director in consultation with Judicial Conference of the United States. As under present law, a United States trustee may be assigned to serve more than one judicial district.

Sections 651(b)(3)-(5) are amended to provide for the appointment, removal, and supervision of United States trustees. These provisions essentially continue present law under 28 U.S.C. § 581, except that the Director of the Administrative Center is substituted for the Attorney General.

Section 193 amends 28 U.S.C. §§ 652, 654, 655, 656, 657, 658, and 659, as such sections are redesignated by this subtitle, by striking out "Attorney General" each place it appears and inserting in lieu thereof "Director". These sections detail the stations, vacancies, duties, salaries, expenses, and staff authorizations of United States trustees, and have been changed to reflect the transfer of the management of the United States trustee program from the Attorney General to the Director of the Administrative Center of the United States Trustees.

Section 194(a) amends 28 U.S.C. § 656(a), as redesignated, by adding to the powers of the United States trustees in some respects and by codifying their existing practice in other respects. The basic purpose of these changes is to allow the United States trustee to assume more of the administrative burden of case management and the resolution of uncontested matters, in order to allow the district judges assigned to the bankruptcy division to concentrate on substantive issues and contested matters. The powers and duties are divided into three types.

1. The first type of duty is added to the existing list of duties in 28 U.S.C. § 656(a), as redesignated. These duties, which are framed in mandatory terms, are as follows:

(a) Appointment of a private trustee in chapter 7 cases, if possible, or service as interim trustee. This provision reflects the current practice of United States trustees.

(b) Appointment of a committee of creditors in chapter 11 cases, and additional committees if necessary. This provision is substantially similar to the provision of 11 U.S.C. § 151102.

(c) Conducting examination of the debtor at a meeting of creditors pursuant to 11 U.S.C. § 341. This provision derives from current practice.

(d) Determination of the amount and sufficiency of a bond under 11 U.S.C. § 322(a)(2). This provision also reflects current practice of the United States trustees.

2. A second type of duty, codified in a new subsection (b) to 28 U.S.C. § 656, as redesignated, is phrased in permissive terms to leave discretion to the United States trustee. These permissive duties are as follows:

(a) Service as trustee in certain chapter 11 cases. This provision reflects the current practice of the United States trustees.

(b) Requiring periodic reports on bankrupt estates and the progress of their administration. This provision codifies a rule already found in some districts, and allows the United States trustee to oversee the efficient management of estates without having to invoke the aid of the court.

(c) Aggregating monies from several estates in which the United States trustee serves as trustee, in order to achieve a higher yield. This provision reflects the current discretionary practice of the United States trustees.

3. Finally, a third type of powers, set forth in a new subsection (c) to 28 U.S.C. § 656, as redesignated, may be exercised by the United States trustee only where the parties in interest do not object. This subsection provides that, in the absence of objection the United States trustee may approve any uncontested application or submission, and may grant an uncontested discharge. Granting these powers to the United States trustee will free the district court from having to consider and decide matters that are not in dispute. However, the United States trustee is not required to approve an uncontested application or submission or grant an uncontested discharge; in appropriate cases these matters may be referred to the district court for decision.

Section 195 amends the chapter headings and table of sections of chapter 14 of title 28, United States Code, to reflect the addition of sections 651 through 659 as redesignated. This amendment is consistent with the transfer of the United States trustees program from Part II (the Department of Justice) to Part III (Court Officers and Employees) of title 28, United States Code.

Section 196 amends section 1501 of title 11, United States Code, to reflect the redesignation of 28 U.S.C. § 581 as 28 U.S.C. § 651.

Section 197 contains technical amendments to section 15326 of title 11, United States Code, to reflect the redesignation of 28 U.S.C. § 586 as 28 U.S.C. § 656.

Section 198 repeals section 408 of the Bankruptcy Reform Act of 1978 (92 Stat. 2685), which concerned the Attorney General's supervision and evaluation of the pilot United States trustee program, and provided for the repeal of the pilot program in 1984.

Section 199 provides that the provisions of this subtitle relating to the United States trustee program shall be effective on October 1, 1983, the effective date of the Bankruptcy Division Act of 1982, which is included in Title II of this Act. Section 199 also provides that districts which currently have

United States trustees shall continue to have an office of United States trustee unless a majority of the federal district judges assigned to the bankruptcy division in the district recommend the abolition of the office. Existing United States trustees, assistant United States trustees, and employees of a United States trustee will be transferred to an office of United States trustee in the same district for which they were appointed.

TITLE II—JUDICIAL POWERS AMENDMENTS

Subtitle A—Bankruptcy Court Act

Subtitle A establishes a bankruptcy division of each of the United States district courts to adjudicate bankruptcy cases and civil proceedings arising in or relating to bankruptcy cases. The proposed bankruptcy division would resolve the constitutional crisis now facing the bankruptcy court system as a result of the United States Supreme Court decision in the case of *Northern Pipeline Construction Company* v. *Marathon Pipe Line Company,* U.S. , 102 S. Ct. 2858 (1982). The Supreme Court held in *Northern Pipeline* that the grant of jurisdiction to the bankruptcy courts in section 241(a) of the Bankruptcy Reform Act of 1978 was unconstitutional because the bankruptcy judges are not afforded the protections provided by Article III of the Constitution.

The Court stayed initially its order invalidating the jurisdictional grant to the bankruptcy courts until October 4, 1982, in order to give Congress time to establish a constitutional judicial system for the adjudication of bankruptcy matters. Subsequently, at the request of the Solictor General, the Court extended its stay until December 24, 1982. After that date, the existing bankruptcy courts will no longer have any statutory jurisdiction over bankruptcy matters and will cease functioning. Absent Congressional action to provide a constitutional forum for bankruptcy matters, there is some doubt that such matters can be adjudicated at all. There are presently pending in excess of 700,000 bankruptcy cases—including over 100,000 adversary proceedings—which involve millions of dollars in assets and creditors' claims. Failure of the Congress to act in a timely fashion would, at the very least, result in a chaotic and highly uncertain situation for debtors and creditors alike, as well as considerable delay in the adjudication of bankruptcy matters.

The reasoning expressed by the plurality and concurring opinions in *Northern Pipeline* make clear the practical need for an Article III tribunal to resolve the constitutional problems inherent in the current bankruptcy court system. The plurality found that the constitutional jurisdiction of an Article I court must be limited to the adjudication of "public rights." The Court does not define with precision what constitutes "public rights" but notes generally that they must at a minimum arise "between the government and others." (102 S. Ct. at 2870). By contrast, private rights, which must be adjudicated by Article III courts, are those involving "the liability of one individual to another." (102 S. Ct. at 2870-71). The concurring opinion authored by Justice Rehnquist would have decided the case on narrower grounds, holding that traditional common law claims arising under state law must be decided by Article III judges.

Under either rationale, there is no practical way to construct an effective Article I bankruptcy court which will not be subject to serious and continuing constitutional challenge. There is no reason to assume that even the majority of cases arising under Title II involve solely public rights which could be constitutionally litigated by an Article I court under the rationale advanced by the plurality. For example, the adjudication of a proof of claim generally involves claims by one private party against another which, by their nature, seem clearly matters of "private right." A strong argument may be made that a creditor's claim does not cease to be a private claim merely because the defendant is bankrupt.

Even under the more narrow holding offered by Justice Rehnquist's opinion, it is clear that an Article I bankruptcy court would be subjected to continual and very serious constitutional challenge. Cases arising under Title 11 frequently entail consideration of state law or traditional common law issues in many different contexts. To take the most obvious example once again, proofs of claim offered by a claimant against the bankrupt will generally be predicated on the state laws (of contract, agency, property, etc.).

Finally, even if constitutional jurisdiction over certain aspects of Title 11 proceedings could be defined, any system under which such matters are relegated to Article I courts while other matters involving private rights are referred to Article III courts would result in an inefficient bifurcation of the proceedings. One of the primary purposes of the 1978 Bankruptcy Reform Act was to provide a single forum in which all claims necessary to the expeditious resolution of a bankruptcy proceeding could be consolidated. After the *Northern Pipeline* decision, it is clear that this can only be achieved through an Article III court.

While an Article III solution is dictated to the problems presented by Northern Pipeline, it is clear that the existing district courts could not effectively manage the enormous volume of bankruptcy filings currently handled by the bankruptcy courts. In 1981, 506,829 bankruptcy petitions were filed. This would almost quadruple the civil caseload now handled by the district courts (there are slightly over 180,000 civil cases filed annually). The district courts are in many cases already experiencing substantial case backlogs and will be unable to handle the added burden of bankruptcy cases without considerable delay and disruption in these bankruptcy cases as well as the rest of the civil case calendar. Moreover, concern has often been expressed in the past that district judges who supervise general litigation would not have sufficient expertise in bankruptcy matters to expeditiously handle complex bankruptcy problems.

To avoid the evident problems with the assignment of bankruptcy cases to the existing district courts, H.R. 6978, currently pending before the House of Representatives, would create a new trial court under Article III to handle solely bankruptcy cases and proceedings. This approach, however, creates some difficulties of its own. At present, there is only one federal trial court constituted under Article III, the district courts. H.R. 6978 would continue the present system of a parallel system of trial courts for bankruptcy, which would inevitably result in some duplication and overlap. As the Chairman of the Judiciary Committee proposes to amend the bill on the floor to eliminate "fungibility," there would also be problems resulting from the inflexible assignment of specific numbers of judges to the district court and the bankruptcy court, regardless of the changes in the relative number of bankruptcy cases on one hand and civil and criminal cases on the other. Although some of these problems could be resolved through allowing such mechanisms as the temporary designation of judges of one court to sit as judges of the other, the establishment of an independent, parallel court structure would always present the likelihood of friction and inefficiency.

This bill adopts a somewhat different solution to the problem. The goal is on the one hand to avoid the creation of a separate court structure, yet on the other to achieve the benefits of a more specialized judiciary that can concentrate on bankruptcy matters. The solution is to vest bankruptcy jurisdiction in the district courts, but to expand their size and to assign additional district judges specifically to bankruptcy matters. This scheme will promote bankruptcy expertise among the judges assigned to the bankruptcy division of the district court, and will serve to keep bankruptcy matters separate from the backlog of civil and criminal cases pending before the other district judges.[1] In this way, the litigation of bankruptcy matters can be integrated efficiently into the workload of the district court, while at the same time assuring that bankruptcy cases will be handled promptly and knowledgeably by Article III district judges who specialize in bankruptcy law.

The district judges who are assigned to the bankruptcy division will be United States district judges for all purposes under title 28 of the United States Code. Thus, unless specifically provided to the contrary, such judges would be governed by the existing provisions of law, such as those relating to retirement, law clerks and seniority. The district judges assigned to the bankruptcy division would, however, deal primarily with cases under title 11 and civil proceedings arising under or related to cases under title 11.

The bill provides for the appointment of 227 additional district judges to serve in the bankruptcy division,[2] and directs that all bankruptcy matters before the district court be assigned to that division. This assures that bankruptcy matters will come before judges who have experience in the field, and that there will be district judges specifically assigned to hear such matters. The bill also allows other district or circuit judges to be assigned temporarily to perform the duties of a district judge in the bankruptcy division.

Further, district judges in the bankruptcy division can be assigned to hear non-bankruptcy matters pending before other divisions of the district court, and to sit by designation on other district courts and the courts of appeals on the same basis as other district judges. However, the bill would allow such designation or assignment only to the extent that it would not interfere with the expeditious determination of cases and proceedings pending in the bankruptcy division. This provision will assure that bankruptcy matters will not be unduly delayed because of the assignment of district judges to hear other types of cases, whether civil or criminal.

---

[1] The assignment of district judges and bankruptcy cases specifically to the bankruptcy division will assure that cases pending in that division will not be affected by the Speedy Trial Act or other laws creating priorities for certain types of civil or criminal cases.

[2] The bill provides the same number of judges, distributed in the same districts, as provided by H.R. 6978.

Jurisdiction and venue over bankruptcy matters would be the same for the bankruptcy division of the district courts under this bill as was intended for the bankruptcy courts under the Bankruptcy Reform Act of 1978, Public Law 95-598, after the effective date of April 1, 1984.

Each bankruptcy division is authorized to appoint a clerk who is subject to removal by the division. The bankruptcy judges have exercised the power of appointment of supporting personnel since 1946 (Public Law 464, 79th Cong., c. 512, 2d Sess., approved June 28, 1946). In the late 1960s and early 1970s there were experiments with the concept of merging the support personnel of the bankruptcy court with the office of the district court clerk and placing them under the supervision of the district court clerk. This experiment was not inspired by an interest in saving money or improving bankruptcy administration. The experiment failed in most districts and detracted from the orderly administration of bankruptcy cases. Congress intervened and called a halt to the experiment in 1978 by enactment of S. 3107, 95th Cong., 2d Sess., approved September 22, 1978.

It is not feasible for the clerks of the district court to assume responsibility for the separate and much greater volume of work now handled by the offices of clerks of the bankruptcy court. The responsibilities and duties of the clerk of the bankruptcy court are quite different in many respects from those of the district court clerk. The bankruptcy court clerk is responsible for scheduling meetings of creditors and promptly notifying creditors of the filing of the cases and of the meetings. The clerk, or the designee of the clerk, has responsibility for conducting the meetings of creditors, and the personnel of the clerk's office have been selected with these additional duties in mind. The district court clerk cannot assume responsibility for running the office of the bankruptcy court clerk and also continue to perform the duties of his own office in a satisfactory manner. Past experience has demonstrated that the functioning of the district court clerk's office and the bankruptcy court clerk's office will be impaired by such a merger.

An appeal from a final order or judgment of the bankruptcy division of a district court would, as with any final order or judgment of the district court, be taken to the court of appeals for the circuit. However, as provided in the 1978 Act, the judicial council of a circuit, at its option, could establish, for any district, bankruptcy appellate panels composed of three district judges assigned to bankruptcy divisions of districts within the circuit. In any district where such bankruptcy appellate panels are established, an appeal from a bankruptcy division judgment would be taken to the panel, and then from the decision of the panel to the court of appeals, unless the parties agreed to appeal directly to the court of appeals.

The bankruptcy judges who are serving on the date of enactment of the legislation would constitute the bankruptcy courts for the period beginning on the date of enactment and ending on September 30, 1983 (referred to as the "transition period"). During the transition period, such judges would be authorized to exercise jurisdiction over all cases under title 11 of the United States Code and all proceedings arising under title 11 of the United States Code or arising in or related to a case under title 11 of the United States Code. Such judges would be continued at their present salary level.

After the end of the transition period on September 30, 1983, and until the expiration of his term of office, a presently serving bankruptcy judge will serve as a judge of the bankruptcy division of the district court, where he may exercise the jurisdiction and powers conferred by title 28 and title 11 of the United States Code on the bankruptcy division, except for jurisdiction and powers which he was not authorized to exercise before the date of enactment of this subtitle. The term of office of a bankruptcy judge serving on the date of enactment shall expire on September 30, 1985, or on the date such judge's successor is appointed, whichever occurs first. Not more than 75 of the 227 authorized Article III judges may be appointed to the bankruptcy division before March 31, 1984, and not more than 151 before March 31, 1985. An Article III judge must first be appointed for the bankruptcy division of each judicial district. Provision is made for carryover bankruptcy judges to be replaced or reappointed in reverse order of seniority as established by broad classes based on their date of appointment.

Section 202 adds a new section 132A to title 28 of the United States Code, providing for the establishment of a bankruptcy division in each United States District Court. The bankruptcy division shall consist of the active district judges designated and assigned to the division, but other judges may be assigned to sit as judges of the division. The bankruptcy division is not a separate court but an integral part of the district court in each district, and except as otherwise provided, the district judges assigned to the bankruptcy division shall have the same powers and duties of any district judge.

In order to conform the terminology of title 11 and other provisions of law to the district court bankruptcy division system created by the bill, this section (which becomes effective October 1, 1983) also provides that any reference to a bankruptcy court shall be deemed to be a reference to the bankruptcy division of a district court.

Section 203 provides for the appointment by the President, by and with the advice and consent of the Senate, of additional district judges to be assigned to the bankruptcy division of the district courts. The number and allocation of additional judgeships in each judicial district is identical to that provided in H.R. 6978, except that the judges are appointed as additional district judges rather than as bankruptcy judges.

Section 204 amends section 137 of title 28, United States Code, which governs the division of business among the district judges of a district. All bankruptcy cases and civil proceedings arising under or related to cases under title 11 of the United States Code are assigned to the bankruptcy division of the district court. As provided in this section and in section 132A(b) of title 28, United States Code (added by section 2 of this Act), other district judges may be assigned under the district court's rules to hear cases pending in the bankruptcy division if needed. Also, the district judges in the bankruptcy division may be assigned to hear other cases pending in the district court, but only if the assignment will not impair the expeditious determination of cases and proceedings pending in the bankruptcy division. These provisions allow some flexibility in the assignment of the workload of the district, while assuring that the resolution of bankruptcy questions will not be hindered as a result of the assignment of the district judges in the bankruptcy division to hear other cases.

Section 205 amends section 139 of title 28 to provide special rules for the prompt and convenient consideration of bankruptcy cases and proceedings by the bankruptcy division of the district court.

Section 206 amends chapter 5 of title 28 by adding a new section 145, which authorizes the creation and appointment of bankruptcy appellate panels in a district, at the option of the judicial council of the circuit. This provision reenacts the provision of Public Law 95-598, which authorized the use of bankruptcy appellate panels. Appeals are heard by a three-member panel composed of district judges in the bankruptcy divisions of the districts within the circuit, or such other judges as may be designated and assigned under chapter 13 of title 28.

Section 207 amends section 295 of title 28 of the United States Code to preclude the designation and assignment of district judges in the bankruptcy division to sit on other courts if such designation and assignment will impair the expeditious determination of cases pending in the bankruptcy division.

Section 208 amends section 296 of title 28 of the United States Code to make clear that circuit and district judges may be designated and assigned under chapter 13 of title 28 to carry out the duties of a district judge in the bankruptcy division. The duties of a district judge in the bankruptcy division would include, where appropriate, service on a bankruptcy appellate panel constituted under section 145 of title 28.

Section 209 amends the table of sections of chapter 17 of title 28, United States Code, by striking out the item relating to section 375.

Section 210 amends section 376 of title 28 to provide that qualifying present bankruptcy judges who serve as long as they are needed during the transition period may participate in the judicial survivor's annuities system.

Section 211 adds a new section 377 to title 28 to provide improved retirement benefits for qualifying present bankruptcy judges who remain on the bankruptcy court for the complete transition period. Under this section, a former bankruptcy judge, who is not appointed to the district court after September 30, 1983, would be eligible to receive improved retirement benefits after attaining the age of 60 years old, if such judge continues in service until September 30, 1985, or until such judge's successor is appointed, whichever occurs first; had served as a bankruptcy judge for at least ten years; and advises the President in writing of his willingness to accept appointment to the bankruptcy division.

The retirement provisions contained in proposed section 377 constitute an equitable retirement scheme for judges who have performed under an increasingly burdensome workload. Moreover, it is important that there be a smooth and orderly transition to the Article III bankruptcy court. That can only occur, especially under the present workload, if experienced judges remain on the bench during the transition period. Proposed Section 377 provides an incentive for the present bankruptcy judges to remain during the transition period. A qualifiying present bankruptcy judge who does so would receive an annuity calculated in conformity with the provisions governing the annuity of Members of Congress in 5 U.S.C. 8339(c).

Section 212 is a technical amendment to correct errors in designation of paragraphs

in 28 U.S.C. 604(a) and an erroneous cross-reference in 28 U.S.C. 602(b).

Section 213 makes a conforming amendment to 28 U.S.C. 620(b)(3) by deleting a reference to referees.

Section 214 amends 28 U.S.C. 621(a)(2) to provide that four district judges, one of whom is assigned to the bankruptcy division, shall serve on the Board of the Federal Judicial Center.

Section 215 makes a conforming amendment in 28 U.S.C. 631(c) by deleting a reference to referees in bankruptcy.

Section 216 makes a conforming change in 28 U.S.C. 634(a) by deleting a reference to referees in bankruptcy.

Section 217 amends 28 U.S.C. by adding a new chapter relating to the bankruptcy division. Within the new Chapter 50, section 771 authorizes each bankruptcy division to appoint a clerk who shall be subject to removal by the division, and the clerk is authorized to appoint, with the approval of the division, necessary deputies, clerical assistants and other employees as may be approved by the Administrative Office. Such employees are made subject to removal by the clerk with the approval of the division. Other subsections relate to clerk residence requirements, outside compensation, payments of fees into the Treasury, and returns to the Director of the Administrative Office. Section 772 provides for the appointment of other employees by the bankruptcy judges. Section 773 authorizes each bankruptcy division judge to appoint one or more court reporters, the number to be determined by the Judicial Conference, and contains further provisions relating to the qualification and oath taken by such reporters, the appointment of temporary reporters, the combination of duties of reporters with those of any other employee of the division, the recording, transcription and certification of judicial proceedings, supervision of reporters, record keeping, salaries, fees, and contract services. Section 774 provides that whenever a majority of the judges of any bankruptcy division cannot agree upon the appointment of any officer of the division the chief judge shall make such appointment. Section 775 provides for salary comparability with other employees of the district court.

Section 218 adds a new section 1293 of title 28 to provide that the courts of appeals shall have jurisdiction of appeals from all final decisions of the bankruptcy appellate panels established in section 145 of title 28. A court of appeals shall have jurisdiction over an appeal from a final judgment, order, or decree of a bankruptcy appellate panel or, notwithstanding section 1480 of title 28, from a final judgment, order, or decree of the bankruptcy division of a district court of the United States if the parties to such appeal agree to a direct appeal to the court of appeals.

Section 219 amends 28 U.S.C. 1294 to provide that an appeal from a bankruptcy appellate panel lies to the court of appeals for the circuit in which the bankruptcy appellate panel is located.

Section 220 makes certain technical amendments correcting errors in designation, cross-reference, and spelling.

Section 221 repeals 28 U.S.C. 1334, relating to district court jurisdiction of bankrupty cases.

Section 222 makes a technical amendment to 28 U.S.C. 1360(a) relating to the status of Alaska as a territory.

Section 223 adds a new chapter 90 to title 28 entitled "District Courts; Bankruptcy," governing jurisdiction and procedure for bankruptcy matters. Rules of jurisdiction, removal, and venue are the same for the bankruptcy division as provided by Public Law 95-598 for the bankruptcy courts.

Section 224 makes a conforming change to 28 U.S.C. 1827(i) by deleting a reference to referee in bankruptcy.

Section 225 amends 28 U.S.C. 1963 to make applicable to discharges and confirmation orders the registration provisions applicable to district court judgments.

Section 226 makes a conforming change to 28 U.S.C. 2107 relating to time for appeals to courts of appeals. This section only places an outside limitation on the time for appeals.

Section 227 adds a new section 2256 to title 28 relating to habeas corpus in bankruptcy matters.

Section 228 makes conforming and technical amendments to 5 U.S.C. 8331, 8339, 8341, and 8344 relating to certain civil service retirement provisions.

Section 229 makes a conforming amendment to section 402(b) of the Act of November 6, 1978 (Public Law 95-598; 92 Stat. 4682) relating to certain effective dates.

Section 230 makes a conforming change to Section 406(a) of the Act of November 6, 1978 (Public Law 95-598; 92 Stat. 2686) relating to certain studies and surveys required to be made by the Director of the Administrative Office of the United States Courts.

Section 231 makes conforming amendments by repealing sections 404, 405(a), 405(b), 405(c), 409, and 410 of the Act of November 6, 1978 (Public Law 95-598; 92 Stat. 2683).

Section 232 provides that the offices of bankruptcy judges for which appointments are authorized, by laws in effect immediately preceding the date of the enactment of this Act, to be made in a judicial district shall constitute the bankruptcy court of such judicial district during the period beginning on the date of the enactment of this Act and ending on September 30, 1983 (referred to as the "transition period").

The bankruptcy courts established in this section shall be deemed to be the bankruptcy courts for purposes of this Act; the Acts amended by this Act; title 28 of the United States Code, as amended by this Act, other than sections 133A, 293(b), 294, 295, 331, 372, and 451 of such title; title 11 of the United States Code; and the Acts amended by the Act of November 6, 1978 (Public Law 95-598; 92 Stat. 2549).

During the transition period and in addition to cases and proceedings commenced during such period, all cases under title 11 of the United States Code and all proceedings arising under title 11 of the United States Code or arising in or related to a case under title 11 of the United States Code pending on the date of enactment of this Act shall be heard by the bankruptcy courts established in subsection (a) of this section as though such cases and proceedings had been commenced in such courts.

Section 233 provides that the judges of the bankruptcy courts established in section 32(a) of this Act shall have the title United States bankruptcy judges. Section 233(b) provides that until the expiration of his term of office, a United States bankruptcy judge may exercise the jurisdiction and powers conferred by title 28 and title 11 of the United States Code on the bankruptcy division of the district courts, except that such judge may not exercise any jurisdiction or power he was not authorized to exercise before the date of enactment of the subtitle.

Section 233(c) provides that, notwithstanding section 34a of the Bankruptcy Act as in effect on September 30, 1979, and section 404(b) of the Act of November 6, 1978, as in effect before the date of the enactment of this Act, the terms of office of all United States bankruptcy judges who are serving on the date of the enactment of this Act in the bankruptcy courts established in section 232(a) expire on September 30, 1985 or on the date such judge's successor is appointed, whichever occurs first.

Section 233(d) provides that after the transition period and until the expiration of his term a carryover judge shall serve as a judge of the bankruptcy division of the district court for the district for which such judge's bankruptcy court had been established, subject to section 233(b).

Section 233(e) provides that during the transition period and for any subsequent period of service in the bankruptcy division, the levels of salaries of United States bankruptcy judges are continued at the levels in effect on the date of the enactment of this Act, subject to adjustment under section 225 of the Federal Salary Act of 1967 (2 U.S.C. 351-361) and section 461 of title 28, United States Code.

Under Section 233(e), an appeal from a judgment, order, or decree of a United States bankruptcy judge during the transition period shall be:

(a) if the judicial council of the circuit in which the bankruptcy judge sits so orders for the district in which the bankruptcy judge sits, to a panel of three bankruptcy judges appointed in the manner described in section 145 of title 28, United States Code, as added by this Act,

(b) if no panel is appointed under subparagraph (A) for the district in which such bankruptcy judge sits, to the district court for such district, or

(c) if the parties to the appeal agree to a direct appeal to the court of appeals for such circuit, to such court of appeals.

During the transition period the district courts of the United States will have jurisdiction to hear appeals from the judgments, orders, and decrees of bankruptcy courts.

Section 234(a) transfers on October 1, 1983 to the appropriate United States district court—

(1) cases, and matters and proceedings in cases, under the Bankruptcy Act that are pending, at the end of September 30, 1983, in the bankruptcy courts established in section 32(a) of this Act, other than cases, and matters and proceedings in cases under—

(A) section 77 of chapter IX of the Bankruptcy Act, or

(B) chapter X of the Bankruptcy Act in which a general reference under section 117 of the Bankruptcy Act is not in effect, and

(2) cases under title 11 of the United States Code and proceedings arising under title 11 of the United States Code or arising in or related to cases under title 11 of the United States Code, that are pending at the end of September 30, 1983, in the bankruptcy courts established in section 232(a) of this Act.

Section 234(b) transfers on October 1, 1983 to the appropriate bankruptcy appellate panels established in section 145 of title 28, United States Code, appeals from final judgments, orders, and decrees of the bankruptcy courts established in section 32(a) pending at the end of September 30, 1983, in the panels appointed under section 233(e)(1)(A).

Section 234(A)(a) provides that, notwithstanding 28 U.S.C. 133A, as added by Section 202 of the subtitle, no more than 75 of the judgeships there authorized may be filled before March 31, 1984, and not more than 151 before March 31, 1985. No time limit is provided for the appointment of the remainder of the 227 authorized judgeships, but it is anticipated that this will be accomplished to the extent possible prior to September 30, 1985, when the terms of all judges continued in office under Section 233(c) not previously reappointed or replaced must expire.

Section 234(A)(b) provides that there shall first be appointed in each judicial district specified in Section 133A a district judge to be assigned to the bankruptcy division for such district. Such judge shall succeed a bankruptcy judge appointed after December 31, 1975, to the bankruptcy court for the district, or, if no such judge exists, then to succeed the most junior bankruptcy judge in that district. After one bankruptcy judge has been appointed in each judicial district, judges shall be appointed to succeed other bankruptcy judges appointed after December 31, 1975. After every member of that class has been reappointed or replaced, appointments shall be made to succeed bankruptcy judges appointed after December 31, 1967 and before January 1, 1976, and after successors have been appointed for every member of that class, appointments may be made to succeed bankruptcy judges appointed before January 1, 1968. The provisions regarding the order of succession shall not apply, however, to vacancies created by the death or retirement of a bankruptcy judge.

Section 235 authorizes the Supreme Court to issue such additional rules of procedure, consistent with Acts of Congress, as may be necessary for the orderly transfer of functions and records and the orderly transition to the new system of bankruptcy divisions of the district court created by this Act.

Section 236 provides for the selection of United States judges in the bankruptcy division on the basis of merit. Whenever a vacancy occurs in such a judgeship, the President shall appoint persons whose character, experience, ability, and impartiality qualify such person to serve in the Federal judiciary.

Since the quality of justice in our Nation depends on the quality of our judges, it is important that they be chosen on the basis of their qualifications and proven excellence. The criteria listed in this section are good character, experience, ability, impartiality and a record of commitment to equal justice.

Extensive practice in bankruptcy law, while desirable, is not a required qualification under this provision. However, judicial nominees should possess the legal qualifications to effectively preside over cases which call for a knowledge of substantive law, and both federal and bankruptcy rules of procedure.

The criteria set forth in this provision do not impinge on the constitutional prerogative of the President to select judicial nominees.

Section 237(a) provides that, except as provided in subsection (b), this Act and the amendments made by this Act shall take effect on the date of enactment.

Section 237(b) provides that sections 132A and 145 of title 28, United States Code, as added by this Act, shall take effect on October 1, 1983.

Subtitle B—Omnibus judgeships

This Subtitle would create 45 additional judgeships. These include 11 permanent circuit court judgeships; three temporary circuit court judgeships; 24 permanent district court judgeships; and seven temporary district court judgeships. The bill would also convert a temporary judgeship for the Northern District of Ohio into a permanent position.

This Subtitle is substantially the same as the proposal submitted to the Congress by the Judicial Conference on March 5, 1981. The Judicial Conference based its recommendations on a 1980 biennial survey, which in turn was based on the recommendations of the individual courts and a statistical profile developed by the Administrative Office of the United States Courts.

TITLE III—BANKRUPTCY IMPROVEMENTS

Subtitle A—Consumer credit

Subtitle A of title III contains 20 sections referred to as Consumer Credit Amendments. These sections amend title 11 and title 28 of the United States Code to restore equilibrium to the treatment of debtors and creditors in consumer debtor cases under the Bankruptcy Code.

Section 301 contains two amendments that add definitions to the Bankruptcy Code. The definitions are added to facilitate drafting of other consumer credit amendments, including the so-called "threshold test".

Section 301(a)(1) adds a new § 101(3) to title 11 defining "anticipated disposable income". The definition will require an estimate of future income and expenses in order to calculate the defined term.

Section 301(a)(2) adds the definition of "reasonable portion of debts" to § 101 of title 11. The definition requires a calculation determined by taking 50% in amount of the debtor's debts excluding debts secured by an unavoided lien encumbering the debtor's principal residence. As the debtor's debts are liquidated during the course of a case, the calculation under "reasonable portion of debts" will be refined.

Section 302(a) amends § 341(c) of title 11 to clarify that the court will be available to resolve any dispute that might arise during a § 341 meeting.

Section 302(b) amends § 521(1) of title 11 with respect to the debtor's duties to include additional categories of information that the debtor must supply to the court. It is expected that the Rules of Bankruptcy Procedure will specify the time within which the debtor must perform such duties.

Section 303 amends the exemption section of the Code to delete the language exempting the debtor's interest in a tenancy by the entirety or joint tenancy to the extent that the interest was exempt from process under applicable non-bankruptcy law. To the extent the debtor's interest is exempt under non-bankruptcy law, it will be exempt by virtue of the language retained in § 522(b)(2). Thus, § 303 clarifies that the language contained in § 522(b)(2)(B) was not intended to create an additional categgry gf exempt property.

Section 304 clarifies that the lien avoidance powers set forth in § 522(f) shall not apply with respect to liens perfected gr enforceable befgre October 1, 1979& Since § 305(b) deletes the lien avoidance powers with respect to non-purchase money, nonpossessory liens, the effectiveness of this amendment will apply only with respect to judicial liens.

Section 305 contains additional amendments to the exemption provisions of the Code. Specifically, subsection (a) places a $3,000 aggregate limit on items of household furnishings and household goods, etc. that may be exempted under § 522(d)(3) of the federal exemptions. Subsection (b) amends § 522(f) to eliminate the debtor's ability to avoid non-possessory non-purchase money security interests in certain household goods and furnishings, etc. Thus, in conjunction with the amendment made by § 304, the debtor will only be able to avoid judicial liens first perfected and enforceable after October 1, 1979. Subsection (c) amends § 522(m) of the Code to permit joint debtors in a consolidated case to exempt either the federal exemptions or, in the alternative, the state exemptions. Under present law, it has been common in joint cases for one debtor to choose the federal exemptions and other debtor to choose the state exemptions. Note, however, that debtors are free to exempt property of their choice if their case is not a joint case under § 302(b) or their case is a joint case in which the estates have not been substantively consolidated.

Section 306 of title III amends the Bankruptcy Code with respect to the exceptions to discharge. In particular, a consumer debt incurred within 40 days before the date of the filing of the petition is presumed to be non-dischargeable. The presumption is rebuttable and shifts the burden of persuasion to the debtor. In addition, the provision respecting attorneys' fees formerly found in § 523(d) is moved to § 523(e) of title 11 and the standard is changed to permit the court to award attorneys' fees to the debtor if the creditor's motion was not filed or pursued in good faith.

Section 307(a) contains a technical amendment clarifying that liens that are not avoided under title 11 are enforceable after bankruptcy notwithstanding discharge of the underlying debt.

Section 307(b) makes major amendments to the reaffirmation provisions formerly contained in § 524(c) and (d) of title 11. Essentially, the debtor is permitted to reaffirm most kinds of debts without any court review or limitations. The debtor may reaffirm a consumer debt not secured by real property if certain statutory standards are met. Essentially the agreement will be enforceable without a court hearing as long as the debtor is given 60 days to rescind the agreement and the court does not disapprove the agreement on any equitable ground.

Section 308 amends the preference section of the Code to provide a "small amount" exception whereby the trustee may not avoid aggregate transfers of less than $1,000 with respect to a particular creditor.

Section 309 establishes the so-called "threshold test". Traditionally, bankruptcy has been available for use by poor but honest debtors. Recently, however, wealthy and dishonest debtors have availed themselves of the bankruptcy laws. Section 309 creates a basis to dismiss a chapter 7 bankruptcy case to deny bankruptcy relief to those who can afford to repay their debts. Section 309 establishes a new § 707(b) that sets up a three part test to dismiss a chapter 7 case. The case will be dismissed on motion of a party in interest prior to the time of discharge if (1) the debtor is an individual; (2) the debtor's anticipated disposable income for a reasonable period after the commencement of the case would be sufficient to repay a reasonable portion of debts; and (3) dismissal of the case would not impose an undue hardship on the debtor or

his dependents. If such a motion to dismiss is granted, the Code stays the effect of the dismissal order for 20 days and for any additional time during which a request to convert the case is pending. If the case is converted to chapter 11 or chapter 13, then the court is required to vacate the dismissal order. In order to discourage creditors from requesting dismissals under § 707(b), the court may award the debtor costs and attorneys' fees if the court determines that the creditor's motion was not filed or pursued in good faith in instances when dismissal is not ordered.

Section 310 amends the redemption section of the Code. In particular, § 722 is amended to give the debtor a five year period to redeem tangible personal property from a non-purchase money security interest. The liberalized redemption provision compensates for the debtor's loss of the power to avoid such liens formerly contained in § 522(f)(2) of title 11. The debtor may avoid such a security interest to the extent enforcement thereof would impose a hardship on the debtor or his dependents as long as the protected kind of collateral has a value of not more than $5,000.

Section 311 contains a clarifying amendment to § 1103(b) of title 11. In particular, the restriction on representation is limited to professional persons such as attorneys and accountants. Thus, a non-professional person such as a credit manager may serve as secretary to a creditor's committee and continue to represent creditors.

Section 312 contains an amendment to the so-called "co-debtor stay" contained in chapter 13 of the Bankruptcy Code. Under former law, creditors entitled to relief from the co-debtor stay were burdened with obtaining relief from the bankruptcy court by filing a complaint. Section 312 permits a creditor to take action against a co-debtor or guarantor by filing a proposed notice of action and notifying the co-debtor or guarantor of their right to object. If no objection is filed within 10 days, the creditor may take the action against the co-debtor or guarantor without the necessity of a court order, unless the court orders otherwise.

Section 313 amends § 1321 of title 11 with respect to a chapter 13 plan for individuals with regular income. A new subsection (b) establishes a general rule requiring dismissal of the case unless payments under the plan commence within 30 days after the filing of the plan. Any payments must be made to the trustee and retained by the trustee until a plan is confirmed or confirmation is denied. Upon confirmation, the trustee will distribute the funds in accordance with the plan. If confirmation is denied, the funds are returned to the debtor after deducting costs of administration.

Section 314(a) contains amendments regarding the chapter 13 plan for individuals with regular income. In the first part of § 314, which was intended to be designated § 314(a), an amendment is made to § 1322(b)(1) of title 11 with respect to classification in a chapter 13 plan. A great deal of confusion has been generated in cases interpreting the classification requirements applicable to a chapter 13 plan. The amendment made by § 314 clarifies that a plan may designate a separate class or classes for non-dischargeable unsecured claims or claims of co-debtors or guarantors, but the plan may not discriminate unfairly against any class so designated. Presumably, the plan may afford preferential treatment to such class and may discriminate unfairly against general classes of unsecured claims.

Section 314(b) specifies the limits on duration of a chapter 13 plan. In particular, the plan may not provide for payments over a period that is longer than 5 years. As under former law, there is no minimum period over which payments must be made in a chapter 13 plan that can otherwise meet the requirements of confirmation.

Section 315 contains major amendments to the requirements necessary to confirm a chapter 13 plan for the adjustment of debts of individuals with regular income. In particular, the section establishes a new § 1325(b) of title 11 that requires a more stringent standard of confirmation if a party in interest objects to confirmation. Specifically, upon such objection, the court may not approve the plan unless, as of the effective date of the plan, unsecured creditors receive under the plan money or property with a present value equal to the allowed amount of their claims—payment in full—or, the plan provides that all of the debtor's projected disposable income to be received during the course of the plan beginning on the date that the first payment is due under the plan is applied to make payments under the plan.

Section 316 contains modifications to § 1329 of title 11 regarding modification of a chapter 13 plan for the adjustment of debts of debtors with regular income. To the extent the debtor's disposable income changes after confirmation of the plan, the plan may become modified on the request of the trustee or the holder of an allowed unsecured claim. Modification of payments could require the debtor's payments under the plan to increase or decrease depending upon the change in the debtor's projected disposable income.

Section 317 amends § 1326 of title 11 to permit payment of a reasonable attorneys' fee for the debtor's attorney. This amendment is surplusage and clarifies former law which required compensation of administrative claims with priority under § 507(a)(1). By virtue of § 503(b)(2) the administrative claims included the compensation of a debtor's attorney as awarded under § 330(a) of title 11.

Section 318 amends the discharge provisions of chapter 13 to provide that all nondischargeable debts specified in § 523(a) are nondischargeable in a chapter 13 case. This changes prior law which, in some circumstances, only made certain debts for alimony, child support, and long-term debts nondischargeable.

Section 319 of title III contains a technical amendment to § 1329 of title 11.

Section 320 contains an amendment to § 1471 of title 28 by adding what was intended to be this subsection (f) to § 1471. This new subsection solved a problem caused under former law regarding complaints for relief from the automatic stay. Under former law, it was unclear whether parties seeking relief from the automatic stay could file a complaint in a court other than the "home" court. This amendment clarifies that the court in which the case under title 11 is pending has exclusive and original jurisdiction to grant relief from the automatic stay. The amendment also contains a provision specifying that an order or judgment granting, denying, terminating, annulling, modifying or conditioning relief is deemed to be a final decision or order for purposes of appeal. This clarifies some uncertainty in prior case law regarding the status of an order granting or denying relief from the automatic stay as an interlocutory order rather than a final order. The amendment made by this section is not exclusive. Thus, it is intended that the "home" court will have jurisdiction that is exclusive and original with respect to many administrative matters in the bankruptcy case such as objecting to discharge, determining non-dischargeability of a debt, determining the debtor's exemption, and other matters.

Section 321 specifies that the amendments made by title III, subtitle A, apply to cases commenced on or after the date of enactment of H.R. 7294, except that the amendment made by Section 320 is effective on the date of enactment in pending cases as well.

Subtitle B—Grain elevator bankruptcy amendments

Subtitle B contains amendments to the Bankruptcy Code to remedy a perceived problem that occurred in some Midwest states with respect to grain stored in grain elevators. Rather than requesting relief from the automatic stay in the manner provided by law, some state officials took the position that the federal bankruptcy law was subservient to their state regulatory procedures. Predictably, the Federal Court sustained the supremacy of the federal law as required by the United States Constitution. These amendments are enacted in order to make the relief available under federal law clear and unmistakable so that state officials will not be misled in the future and so farmers will be protected in the event of a grain elevator bankruptcy.

Section 341 amends § 546 of title 11 to create a limitation with respect to certain of the trustee's avoiding powers with regard to the right of reclamation of a seller who is a producer of grain sold to a grain storage facility owned or operated by the debtor. Only the rights or powers of the trustee under §§ 544(a), 545, 547, and 549 are limited. In order to be limited, the producer must have demanded written reclamation of the grain before ten days after receipt thereof by the debtor. The court is given the option to deny reclamation and to provide the producer with a claim secured by a lien. The Code does not specify the property with respect to which the producer's claim must be secured.

Section 332 of subtitle B creates a new § 555 of title 11 requiring expedited determination of interests in and disposition of grain. This section applies only in a case concerning a debtor that owns or operates a grain storage facility and only with respect to grain and the proceeds of grain. The court is commanded to expedite procedures for the determination of interests in and the the disposition of grain and proceeds of grain by shortening to the greatest extent feasible time periods that otherwise apply under the code in §§ 362, 363, 365, and 554. Although the time periods established by the court may be modified, in no case may the final disposition of grain or the proceeds of grain occur later than 120 days after the date the petition is filed, except to the extent provided in § 555(f). Section 555(f) permits the court to extend the period for final disposition of grain or proceeds beyond 120 days if the interest of justice so requires in light of the complexity of the case and the interest of those in the grain or the proceeds thereof will not be materially injured by the delay. Section 555 sets forth numerous factors that are to be considered by the court in determining the expedited period. Section 555(e) gives any governmental unit that has regulatory jurisdiction over the operation or liquidation of the debtor or the

debtor's business notice of the expedited hearings and the standing to appear and be heard on any issue relating to the grain or proceeds of grain in a case. Significantly, the governmental unit is not made a party in interest and would not have a right to appeal from any order entered in the bankruptcy case. Nothing would prevent the governmental unit, however, from joining in the appeal made by any other party in the case. Section 555(g) protects dispositions of grain unless the order approving such disposition is stayed pending appeal.

Section 333 of subtitle B amends title 9 of the Bankruptcy Code to specify that the special grain provisions apply in a case concerning a municipality under chapter 9.

Subtitle C—Leasehold management

Under the Bankruptcy Code, courts have afforded debtors in possession and trustees extensive periods of time in which to assume or reject leases. Subtitle C is designed to afford some protection for loadlords and lessors.

Section 342 amends § 365(d) of title 11 by providing a new paragraph (3) to permit the debtor or trustee in a case under chapter 9, 11, or 13 to assume or reject an unexpired lease of the debtor within 120 days after the order for relief. Any unexpired lease of the debtor not assumed within such time is deemed rejected unless the court, within such 120 day period, fixes a different period for cause. In a complicated case, it would not be unusual for the court to grant the debtor 180 days, 270 days, or longer depending upon the nature, extent and complexity of the leases involved. In a case involving one lease, however, the court might shorten the 120 day period. The discretion of the court will be afforded great deference by appellate courts. Significantly, this section applies only to unexpired leases, not to any other category of executory contract.

This subtitle also amends Section 365(b)(3) of the Bankruptcy Code to delete the word "substantially" to make clear that lease provisions such as the use and tenant mix clauses are to be observed by the trustee.

S. 2297, the Shopping Center Protections Improvement Act of 1982, which passed the Senate on October 1, 1982, requires an election to assume or reject a lease within 60 days and deletes the word "substantially" from Section 365(b)(3) of the Code; it also requires the trustee to perform all of the obligations of the tenant under the lease, including the payment of rent and other charges, until the lease is assumed or rejected. See Senate Report No. 97-527.

Subtitle D—Referees Salary and Expense Fund

Legislation similar to this Subtitle was passed by the House on December 16, 1981 as H.R. 5116 and H.R. 4353. See House Report 97-415 and House Report 97-414.

This title makes conforming amendments to § 403(e) of the Bankruptcy Reform Act to place reasonable limits on the fees that can be charged in cases under the Old Bankruptcy Act with respect to the defunct Referees Salary and Expense Fund. In certain cases, fees chargeable by the Referees Salary and Expense Fund have constituted millions of dollars that would otherwise be available for distribution to creditors. A fundamental theme of the Bankruptcy Reform Act was that the bankruptcy system is no longer self supporting and has not been self supporting for quite some time. Under the circumstances, the limits imposed by § 352 of subtitle D are reasonable.

This Subtitle provides for a $200,000 cap on payments made under Chapter VII into the former Bankruptcy Referees Salary and Expense Fund and for a $100,000 cap for similar payments under Chapter XI.

TITLE IV—TECHNICAL BANKRUPTCY AMENDMENTS

Title IV of H.R. 7294 contains approximately 127 sections making amendments to various sections formerly enacted in Public Law 97-598. To a great extent, these amendments are technical in nature, correcting spelling errors, diction errors, and grammar errors. A few of the amendments clarify the intent of the draftsmen and are considered to be declarative of existing law rather than substantive amendments.

Significant technical amendments made by title IV include the following:

Section 401(3) creates a new § 102(8) of title 11 defining "United States" to include the Commonwealth of Puerto Rico and the territories and possessions of the United States. This clarifies the intent of Pub. L. No. 95-598.

Section 418 contains an amendment to § 364(f) of title 11 limiting the exemption given from the requirements of the Trust Indenture Act and any state or local law to debt securities that are not convertible into an equity security. This is a substantive change that represents a departure from prior law and is inconsistent with the plain language of Pub. L. No. 95-598.

Section 420(a) amends § 502(a) of title 11 to indicate that a limited partner in a partnership that is a debtor in a case under chapter 7 is not a party in interest with standing to object to the allowance of claims filed against the partnership. The amendment accomplishes this result by inserting the word "general" before "partner" in § 502(a).

Section 420(b)(6) amends § 502(b)(8) to clarify that the damage limitation applies to the claim of an employee for damages and not to the claim of an employer. This eliminates an ambiguity in prior law.

Section 422 amends § 506(a) to clarify that a creditor who does not have recourse will not be given an unsecured claim to the extent such creditor is undersecured in a chapter 7 or 13 case. *See* § 1111(b) of title 11 for a contrary result in a chapter 11 case.

Section 423(b) redrafts § 507(b) to clarify certain aspects of the so-called "super priority" given to a creditor whose adequate protection turns out to be inadequate. The amendment clarifies that the super priority claim comes ahead of expenses of administration in a superseded chapter 11 or chapter 13 case. This section will apply, however, only if adequate protection is provided by the trustee subject to court approval and not when adequate protection is provided by consent of the parties without notice to parties who might be adversely affected by such super priority agreements.

Section 439 amends § 551 of title 11 to delete restrictive language that was inadvertently inserted in § 551 when enacted by the 95th Congress.

Section 469 clarifies the scope of § 1111(b) of title 11 consistent with the intent of the draftsmen of Pub. L. No. 95-598. Section 1111(b) was drafted late in the 95th Congress and this amendment refines the language originally enacted by the 95th Congress.

Section 473(b) contains clarifying amendments to § 1125(e) of title 11 indicating that the safe harbor should apply to acceptance or rejection of a plan whether or not the plan provides for the offer or sale of securities. Although it is doubtful that the plan itself should ever be construed to constitute the offer or sale of securities, this amendment is designed to provide protection in the unlikely event that a court would decide otherwise.

Section 475(b) deletes language from the preamble of § 1129(b) and transfers the language to § 1141(a) to clarify that a plan may affect the rights of subordinate creditors under an otherwise enforceable subordination agreement.

Sections 519, 520 and 521 permit recordation and enforcement of bankruptcy court judgments. These amendments were inadvertently omitted upon enactment of Pub. L. 95-598.●

IN PURSUANCE OF RESOLUTIONS OF IMPEACHMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 60 minutes.

Mr. GONZALEZ. Mr. Speaker, I rise to continue yesterday's resumption of my efforts in behalf of two resolutions and three bills that I have introduced during the course of this Congress.

As I said yesterday, we are at the waning hours of this Congress. We must of a necessity begin anew on January 3 and I wanted to round out what I initiated in the beginning of the first session of this Congress and have followed through as best I could consistently all during this Congress and particularly during the midpoint and up until now.

As I said yesterday, the particular resolution, which type of resolution tends to get lost because it is considered flamboyant, bombastic and not seriously, and that is a resolution seeking the impeachment of Paul Volcker, the Chairman of the Federal Reserve Board. But I also have companion resolutions that direct the same thrust of action towards the Open Market Committee, so-called, of the Feds, which means the board itself, plus the five nonboard private bankers who constitute the Federal Reserve Open Market Committee.

As I also said yesterday, I consider that the events have so caught up with us that the primary intent I had at the time of the introduction of these measures, I was hopeful that at least those committees having prime jurisdiction would have some reactive interest as a result of the initiation of these legislative bills and resolutions because now I feel that the course of events is irreversible, that whatever will be done will be continued to be done under an atmosphere of crisis where we will have the tendency to react in haste, not to slow deliberation at this very intricate matter requires.

On the other hand, when I use the work "intricate" I also succumb to one of the big problems and that is that this subject matter, like mathematics generally, is considered to be a sort of

a hidden science or such an obtuse matter that only a few selected minds can understand.

As a matter of fact, it is not that complicated and what it calls for is not that complicated either. But it calls for, first, an honest confrontation with the knowledge of the times and a desire and an untrammeled intent to do something about it.

□ 1310

As I said yesterday and I repeat today: the remedy perforce lies in this body, the Congress of the United States of America. The Federal Reserve Board, as I keep saying, is not this autonomous, independent body that has no accountability to anybody. As a matter of fact, there are so many of my colleagues and so many of the citizens that I have had a chance to meet and correspond with throughout the country that have been impressed by that remark, more than anything else, because of their impression that the Federal Reserve Board was indeed an autonomous, absolutely unrestrained, independent body, and that they consider it a Federal entity, that is, a branch of the Federal Government. The truth is that it really is not. And the truth is that it is a creature of the Congress of the United States, which gave birth, through the adoption of the Federal Reserve Act of 1913, to this entity we call the Federal Reserve Board.

Now, since our country is structured and historically has developed quite differently from the other industrialized nations, the Federal Reserve Board, since its inception, has since attempted to fill the role as central banker for the country. Every other country has what they call the central bank. We really legally, formally do not. But because it is necessary to have that equivalent, it has posed a problem from the very beginning of our national origins.

As I have said before, it was the one big issue in the First and the Second Continental Congresses during the time of the Articles of Confederation which reflect the first 10 years of national existence, and certainly in the very beginning of the formation of our Government under the Constitution in 1789 and since then.

The fact that every President and every formidable leader has recognized that as the prime problem confronting the Government has been lost sight of. Therefore, I want to point out some of the things that some of these men through history have said, because this is exactly what the issue is today.

The matter of fact is that President Lincoln, for instance, in the middle 1860's shortly, in fact, before his assassination, had that primarily and uppermost in his mind, because it coincided with enactment of the act of 1864 and 1865. The first, the act of 1864, was generally entitled the National Banking Act; the 1865 act is known as the National Currency Act. But there, the same forces that even from the beginning, and particularly in the 20th century, have always attempted to take over control and the power of such a fundamental thing as the allocation of credit and resources for the Nation's economic life and activities. This has always been the big power tussle and struggle.

Now, President Lincoln, on the eve of his assassination said—and this is because of what he saw happening here on the congressional level when they were forging the 1864 act and then what turned out later to be the 1865 act:

> I see in the future a crisis approaching that unnerves me and causes me to tremble for the safety of my country. Corporations have been enthroned. An era of corruption in high places will follow, and the money power of the country will endeavor to prolong its reign by working upon the prejudices of the people, until the wealth is aggregated in a few hands and the Republic destroyed.

But President Wilson, after his hopes were shattered as he saw the reality that was emerging after the adoption of the 1913 Federal Reserve Act—let me say that that was born out of a similar period as that which we are about to have to suffer the consequences from fully. We are just beginning to. If my colleagues think that prosperity is around the corner, like this President says now, and Hoover and the others were saying in 1932, I am afraid that they are in for a very serious deception because we are only beginning. And since, as I say and repeat, there is nothing here being done on any level of consequence, it seems to me that this process is irreversible.

I naturally hope I am dead wrong. But unfortunately I will say when I spoke out, almost singlehandedly 1 year and 10 months ago, at the beginning of the administration, and the utterances of some of the leaders urging the adoption of policies here, that I was pointing out the fallacy of those policies and assumptions, above all, and particularly the assumptions of the Federal Reserve Board Chairman, who triggered off my protest by the utterances he gave us in the committee I belong to, the Banking and Currency Committee, to which I have belonged for 21 years, when he said, in response to questions I asked, "Yes, the standard of living of some Americans will suffer. Of course."

That shocked me. This is not the power and prerogative of the Federal Reserve Board. Policymaking is that of the national legislative or policymaking body, which is the U.S. Congress, not a creature entity of the Congress. And he was saying our policy is not what legally is defined. The true, legal definition of the Federal Reserve Board or its Chairman is that it is the fiscal agent of the U.S. Treasury. That is all. The fiscal agent of the U.S. Treasury. Now, "agent" means "acting in behalf of a principal or a master." What we have now is the agent as the master in the most authoritative and autocratic of exercise of that function of master that this country has ever recorded in any official or any official invested with power.

Remember, President Wilson ran on the promise to put through "monetary reforms that are truly a reform." However, within 3 years of the passage of the Federal Reserve Act, that is, by 1916, President Wilson saw, too late, what was obvious. And here is what he said then:

> A great industrial nation is controlled by its system of credit. Our system of credit is concentrated. The growth of the nation, therefore, and all our activities are in the hands of a few men. We have come to be one of the worst ruled, one of the most completely dominated governments in the civilized world—no longer a government by free opinion, no longer a government by conviction and the vote of the majority, but a government by the opinion and duress of small groups of dominant men.

□ 1320

How much more can the power be concentrated than what confronts our country today? As a matter of fact, it is even progressing to the point of nausea, these giant mergers. And the concomitant cause underlying—my colleague awhile ago from Texas was talking about interest rates and blaming the Government and saying that the single cause was that.

Well, even the Federal Reserve tried to get away with that and offered that big argument. And whenever I would ask, not only the Chairman, but other members of the Board who appeared before the committee, other Congressman, other former Congressman, the leading economists of this country, why it was then that at the height of World War II, so-called, in 1945, over 45.5, about 46.2 percent of the gross national product of our country, total output in production, in services, was being controlled and dominated by the Federal level—that is the Federal Government. Naturally, completely consecrated to the waging and the winning of the war.

But the Government never had to pay anything over 2 percent. In fact, it averaged in the servicing of its debt, paying less than 2 percent. How could that happen? Where we now have the Government paying as high as 14¾ percent, not for short-term bills, notes or what have you, but long term. That is an absolute extortion, and a complete capitulation of a country's destiny to the predatory, selfish, greediest natures that mankind in its history has recorded, with no protection.

There is absolutely no protection that the people of this country have.

Well, now, as I said yesterday, public officials and these great leaders in finance and the like, they like to think that the people—the people—do not understand. They do not know. What do you want to discuss that for, they do not know what you are talking about.

And as I said yesterday, and repeat today, I have news for you. The people are way ahead and have been all along-way ahead of us all. The people are there. They know what is happening. They do not understand why. The only shield between them and being stripped naked of any defense from the most predatory of forces is in responding to that defense. That is what they do not understand. Mechanics, truck drivers, sales people in a produce market asked me, "We thought there was law against this," meaning a law against usury.

It so happens I am speaking out now of course, but it is not that I am a latecomer. I noticed that some of the advocates last year of these assumptions on the economic and fiscal policies they were asking us to adopt have now joined the chorus and are saying we have got to do something about the Feds.

But all along, they went along, including this administration. I did not hear anybody making speeches or asking questions about the nature or the cause or the possible remedies. So that I do not have too much sympathy for those laments now, and what they are advocating including a cross sectional bipartisan group amounts to saying to Mr. Volcker, "Oh, Mr. Volcker, please, please do not be so mean. Please, you have got to reduce interest rates a little bit."

And then they hit him with a powder puff.

Well, shucks, what the times call for is a sledge hammer, not powder puffs. It is too late for that stuff. In fact, it is ridiculous, and it is an insult to the intelligence of those of us who have been working on this, not now, not 5 years ago, not 10 years ago, but more than 15 years ago, and particularly on the history of the Federal Government's role, going back to 1964, and given the reason for the concern expressed by President Abraham Lincoln.

At this point I wish to include in the RECORD an article I wrote for the personal finance law quarterly issue reprinted in the winter of 1965, but actually I wrote it in 1964, entitled, "Bank Interest Rates and the Federal Law."

The article follows:

[Reprint from winter 1965 issue of the Personal Finance Law, Quarterly Report]

BANK INTEREST RATES AND THE FEDERAL LAW

(By Henry B. Gonzalez)

James J. Saxon, Comptroller of the Currency, ruled recently that National Banks may charge interest at the maximum rate permitted by applicable state law to any competing lending institution including small loan companies.[1] The significance of this ruling is seen in the fact that in Texas, under the Regulatory Loan Act of 1963,[2] small loan companies, may charge rates up to 300% on loans of $100 or less. (Ed. Note: On loans above $100 the rate is much less, i.e. on a loan of $1500 the true annual rate would be 21.14%.) Banks were excluded from this law and they may charge no more than 10% interest. The new ruling would permit National Banks to charge the maximum rates permitted under the Regulatory Loan Act of 1963. The State Banks, of course, would still be excluded from that law.

The Comptroller's ruling is based on Section 85 of the Federal Banking laws.[3]

Last August, in his testimony before the House Banking and Currency Committee on the proposed Federal Banking Commission Act,[4] Mr. Saxon submitted for the record written answers to 29 questions which had been propounded to him by the Committee. Answer No. 26 was an explanation of his ruling on interest rates that National Banks may charge. In his answer, Mr. Saxon states that his ruling:

". . . is merely a restatement of relevant court decisions (see, for example, *Rockland National Bank of Boston* v. *Murphy*, 110 N. E. 2d 638, Mass. 1953) and is entirely consistent with the objectives of Congress beginning in 1863 and 1864, as was clearly stated in the legislative history of section 85, as has been uniformly recognized by previous Comptrollers, and as is reflected in the applicable court decisions."

BACKGROUND SKETCH

A brief sketch of the background and development of the current Federal rate of interest provisions (12 USC 95) is helpful to the understanding of the problem created by Mr. Saxon's recent ruling, particularly as it affects Texas. The present law is derived directly from the National Bank Act of 1864,[5] which was in turn based on the Act of 1863.[6] Section 46 of the 1863 Act stated:

". . . every association may take, reserve, receive and charge on any loan, or discount made, or upon any note, bill of exchange, or other evidence of debt, such rate of interest or discount as is for the time the established rate of interest for delay in the payment of money, in the absence of contract between the parties, by the laws of the several States in which the associations are respectively located, and no more . . ."

There was considerable debate in Congress on the proposed changes of this section of the law during the discussion of the National Bank Act of 1864. Obviously, the substance of this debate is of extreme importance in the construction of the law as there is very little else to shed light on the intent of Congress in enacting this provision. Hearings were not then recorded or published. Therefore, almost all we have of what the members of Congress intended is what was printed in the Congressional Globe, a commercial predecessor of the Congressional Record.

The bill setting forth the National Bank Act of 1864 originally provided for a uniform Federal rate of interest in the amount of 7% per annum. The Senate Finance Committee proposed to delete the uniform rate from the bill, and the following amendment was offered on the floor of the senate:

"The rate allowed by the laws of the State or Territory where the bank is located, and no more. And when no rate is fixed by the laws of the State or Territory, the bank may take, receive, reserve, or charge a rate not exceeding 7%." [7]

POINTED DEBATE

The debate which followed was quite pointed. Sen. James Grimes of Iowa spoke first. He said that in Iowa the legal rate of interest was 6%, but for special contracts it could be 10%. Under the proposed language, he said, the State banks would be limited to 6% while the National banks could charge 10%. He thus vigorously opposed the amendment. Sen. John B. Henderson of Missouri took the same position and said succinctly:

"I desire to allow these banks to charge just exactly what other banks of issue in the State charge. I do not want to make any difference between them."

Several other Senators spoke up in agreement, including Sen. John R. Doolittle of Wisconsin who said:

"I can only say, for one, that I will never vote for a bill allowing national banks to go into the States and Territories and charge a rate of interest equal to 10 percent, unless that State or Territory where they are located allows its banking associations to do the same."

The opponents to the amendment remained firm, and no arguments from the other side could explain to their satisfaction why National banks should be given the power to charge higher rates of interest than State banks. This, of course, is precisely the issue raised by Mr. Saxon's ruling. The issue was not immediately resolved when it was taken up in 1864. The amendment first came to the floor on May 5, 1864. The statements I have quoted were all made on that day. Instead of taking a vote, however, the matter was passed over and then taken up again the following Saturday, May 7, 1864. On that day, the following additional language was proposed, to be inserted after the words "no more": "except that where by the laws of any State a different rate is limited for banks of issue organized under State law, the rate so limited shall be allowed for associations organized in any such State under this Act."

This amendment to the amendment was agreed to, and the amendment as amended was passed; all without any debate. The language finally adopted and incorporated into the 1864 Act was therefore:

"Sec. 5197. Any association may take, receive, reserve, and charge on any loan or discount made, or upon any note, bill of exchange, or other evidence of debt, interest at the rate allowed by the laws of the State, Territory or district where the bank is locat-

[3] 12 U.S.C. 85.

[4] H.R. 107. Also considered at the hearing was H.R. 6885, providing for the transfer of the powers of the Comptroller of the Currency to the Secretary of the Treasury.

[5] 13 Stat. 108, Sec. 5197 (1864).

[6] 12 Stat. 665, Sec. 46 (1863), the National Currency Act. This Act and the National Bank Act of 1864 remained the basis of Federal Banking Legislation until passage of the Federal Reserve Act of 1913. The amendments of 1864 were designed to meet certain objections of State bankers. See, *Banking and Monetary Studies*, Ch. 2, p. 17 (a project of the Comptroller of the Currency).

[7] 38th Congress, 1st Session (1864), Congressional Globe, p. 2123.

ed, and no more, except that where by the laws of any State a different rate is limited for banks of issue organized under State laws, the rate so limited shall be allowed for associations organized or existing in any such State under this Title. When no rate is fixed by the laws of the State or territory or district, the bank may take, receive, reserve, or charge a rate not exceeding seven per centum . . ."

Except for the insertion of a clause bearing on another problem, the 1933 Act carried forward the language of 1864 intact. The present law, 12 U.S.C. 85, is thus almost exactly as it was written in 1864.

DEEP CONCERN

As I read the debate of the 1864 Act, there was deep concern as there is today, that National banks might be given the power to charge higher rates or interest than the State banks. The ojections made on the floor of the Senate May 5, 1864 held up action on this section of the bill until new language could be agreed upon. The crucial language is the wording added on May 7, namely, that where State law limited interest rates for the State banks then the National banks would also be so limited. This language could have been added only to remove the objections of Senators Grimes, Henderson, Doolittle and the others who would "never vote for a bill allowing National banks to go into the States and Territories and charge a rate of interest equal to 10 percent, unless that State or Territory where they are located allows its banking associations to do the same."

The intent of Congress in 1864 was plainly to permit the National banks to charge the same rates of interest as State banks, but no more, regardless of the rates allowed for persons other than banks, as, for example private persons who enter into special contracts. In all the modifications of the banking law over the past 100 years, the law regarding interest rates that National banks may charge has remained the same. So has the intent of Congress.

RULING OPPOSED

I strongly oppose the ruling of the Comptroller of the Currency which would give to the National banks a power they have not had and should not have, that is, the power to charge higher rates of interest than the State banks in a State where higher rates are permitted to small loan companies to the exclusion of the State banks. For the judicial interpretation of Sec. 85 I could quote no case better than the one cited by Mr. Saxon, *Rockland National Bank of Boston* v. *Murphy*. The court stated in that case:

"A national bank in making loans is allowed by the Federal law to take, receive, and charge the same rate of interest, if one is established by the statutes of the State where the bank is located, as may be charged by the State banks. 12 U.S.C. 85. The purpose of this act of Congress is to put national banks on an equality with State banks in competing in the business of lending money. *The lawful rate permitted to State banks is the measure which national banks must adopt in conducting the business of making loans.*" (Emphasis added)

The Murphy case happens to support my views, not Mr. Saxon's. Congress never intended to permit a National bank to charge more interest than a State bank merely because loan companies are permitted to charge more than the maximum rate allowed under State law on small loans. Congress would be particularly opposed to giving the National banks such an advantage where, as in Texas, the State law specifically excludes both the State banks and the National banks from the higher rates.[8] It should also be pointed out that the ruling of an earlier Comptroller of the Currency on which, Mr. Saxon relies, in part, refers to State commercial banks or State industrial banks, not to small loan companies.[9]

Perhaps one benefit that has resulted from this controversy has been the attention focused on the Federal law covering interest rates. I fail to see why, in this day and time, there should be different rates of interest in each State. If there was good reason for permitting higher interest rates in the Western States than in the Eastern States, because of the remoteness of the West and the lack of capital in that underdeveloped area, that reason does not hold true today. The reason for the law allowing higher interest rates in one area than in another has long ceased to exist.

In this regard, the Federal Government follows an obsolete rule of law which undercuts the present policy of eliminating poverty and helping the lower income group. For the sake of uniformity, and to remove those obstacles in the law which militate against the War Against Poverty, Congress should seriously consider legislation establishing a uniform rate of interest for all banks belonging to the Federal Reserve System.

I am not going to burden anybody or consume time in order to bring out the history of that. But let me say that the resulting article was only because we had to do the deepest digging. At that time there were no such things as CONGRESSIONAL RECORDS being published. And we had to go in. And if you think there were not Congressmen, like myself, if I would be presumptuous enough to make that comparison—I am sure there are greater men—not saying the same thing.

I ask my colleagues to read that history of the existing privately published records of the proceedings of the time.

Let me just say that at the time I was raising the issue, the President was a fellow Texan, President Johnson. And I was equally critical then, as I have been successively through those years. I have had the honor and the great experience of working with six different Presidents in the 21 years I have been here. And I will just say this, that at that time the Comptroller of the Currency ruled in such a way that the beginning, the planting of the seeds of the runaway high interest—I tell them extortionate, not only usurious, but criminally extoritionate interest rates, there was the beginning of that ruling that triggered off my interest and the writing of the article. I offer it for the RECORD because I know of no other articles on that subject matter written in any publication that I have been aware of.

I also refer at this time to an article in the most recent, just delivered today, issue of Business Week, December 13, entitled, "The Feds Plan for Economic Recovery." And in the subtitle, "Monetarism Is Dead, Interest Rates Down, but Growth Will be Slow."

Well, now, let us see. Since that announcement there has been little reactive interest in the prime interest rate markets. They are not going down. In fact, there has been an announced increase in some areas. Because the main issue is not have you in a preelection period managed such things as that you can say on paper at least that interest rates have gone down from 16 percent to 12½ or 13 percent. That means nothing. When they say interest rates are down, like all of these folks who are talking about inflation having gone down, they are not persuading any of the people back home or anywhere else that this is so. They are talking about words on paper, based on a statistical evaluation that is not real to life.

I asked yesterday and I repeat today: Is there anybody present hearing or reading this that has recently gone to the grocery store to do the family shopping?

□ 1330

Has inflation gone down? Are you paying less for the necessities of life there? If you are, I would like to know where.

Second, are rents going down for shelter? Are mortgage interest rates really going down or are the gimmickries that have been advanced, as another periodical points out, because of this high interest rate rampage since 1980, particularly.

Mr. Speaker, I refer at this point to an article in the Business Week, "The Fed's Plan for Recovery."

Among other things, there is a little boxed-in note that I think is of tremendous interest because it is the first time that I see it in a paper of general circulation.

It says, "How the Fed Manages Money."

Now, all through these years we have had the Federal Reserve Board members and their Chairman coming and telling us that interest rates are an act of God. Why, if anybody is to blame, it is you, the Congress. You are spenders and you are profligates and your pressures on the markets, if that is the reason, if there is any reason; but we cannot do anything about it. It is like an act of God; but here is what they are saying now, what we have been saying all along:

The Federal Open Market Committee, made up of the Chairman of the Federal Reserve Board, its six Governors, and five presidents of the 12 regional Fed banks.

What does that mean? That is five private bankers who have the biggest stake in what they do for their own gain and profit and lucre. As I have charged in my specifics in the im-

[8] Art. 6165b V.A.T.C.S. Sec. 6(a)(1) and (11).
[9] Paragraph 9510, Digest of Opinions.

peachment resolution, they have violated the trust by leaking out on several occasions information that has redounded to the personal lucre and benefit of only a handful of interests, most of them in the New York area where, incidentally, in a 3-mile radius over 30 percent of the total financial resources of this country are concentrated.

If the Federal Open Market Committee wants to ease credit, it instructs the New York Fed to buy Government securities.

This is why I said yesterday that the Open Market Committee can make or break any administration when it wants to or if it chooses to.

The transaction raises security prices and lowers the interest rate. The yield on the securities is fixed, so a rise in the price means that a security pays a lower interest rate. The insurance company deposits a check in the commercial bank, which gets a credit on its reserve account at the Fed. Banks must keep $1 of reserve for every $8 they hold in checking accounts. The rise in reserves means that the bank can hold more checking deposits and thus boost loans to businesses; that is, creates money, manufactures money. When the Fed wants to tighten credit it reverses the process.

Lo and behold, this must be like a revelation to many, many Americans, who have argued with me that, like the Federal Reserve Chairmen have before their audiences in our committee, that their policies do not control, that there is nothing they can do, that this is determined by these untoward events over which they have no control.

Now, here, I think, is a pretty accurate description of what we have been saying all along.

In connection with that, let me say, they talk about reserves. Now, ever since the last collapse, toward which we are headed now—in fact, we are in the throes of it—the Congress had in reaction to the crisis passed legislation. It set up the Federal Deposit Insurance Corporation.

Well, where are we on that now? Well, the truth is that you have total resources of the Federal Deposit Insurance Corporation of about $12.3 billion.

Then they have as residual on-the-side drawing powers on the Treasury of about an additional $3 billion, meaning that the total amount available for insurance in case of need is about $15.3 billion, to cover what—over $1 trillion of covered deposits; $15 billion to insure $1-plus trillion.

Now, what about the savings and loans? Well, that is even worse. You only have a meager less than $6 billion to cover about three-quarters of a trillion dollars; so you know, is that bad? Is that good? Should anybody not say that for fear that somebody might lose confidence?

Well, I think that process has set in to the point where as late as the day before yesterday, our President has to go all the way to Brazil in order to say: "Hey, boys, if you will just roll over the interest payments to the Chase Manhattan and First City National and Hanover Manufacturers Trust in New York, we are going to let you have $1.3 billion worth of credit from our taxpayers."

Now, a month and a half ago they did that for Mexico. Now, the American people read the headlines and they think we are helping Mexico. We are not. The only reason we are doing it is to bail out our bankers that are worse off in other countries. When you total what there is in bad, bad loans—no small bankers' loan committee would make the loans that these fellows have made in billions and billions of dollars—threatening now, it is so interrelated, not just the U.S. system, and making us vulnerable to other forces.

Even the Arabs, as late as the crisis in Lebanon, we had the Arab Finance Minister calling and saying: "Mr. Reagan, if you don't take off the Israelites, we are going to pull our money out of the New York banks and create a crisis for you."

Well, the rest is history. I think you know the President did react; but unfortunately, I feel it is too late. We are not doing what we ought to do and we have not done what should have been done since 1923 and the emergence of the Open Market Committee, and that is, regain the destiny and the economic well-being and future of our people and country by regaining control to the people from this oligarchic predatory group, a handful of powerful bankers—powerful bankers who finally have succeeded when they could not when Thomas Jefferson was around.

If you think what I say is harsh, well, let me say first, like old Lloyd Garrison said, "I intend to be as harsh as truth and as uncompromising as justice."

This is what is called for now on all levels. I am not casting myself in a heroic role. I am just merely saying that if I were not, I would not have any ability to look myself in the eye.

As I said, it is just a fight that antedates my even coming to the Congress. I fought this fight in the Texas Senate, high interest rates, to the point that by the time I wrote that article in 1964, it was just 3 years after I had led the fight successfully to prevent by filibustering then in the State Senate what was obviously an exponential increase in the allowable usury limits on small loans—mind you, small loans. Always the justification is done in the most charitable and generous terms or framework of reference.

This was to enable the poorest of the poor to be able to go to the corner loan shark and get $5 and have a glorious, glorious opportunity to pay back 1,000 percent before the end of the month. Texas law made it allowable exactly the first month I came up and was sworn into the Congress in a special session they had down there, or the beginning of one, which they had failed when we filibustered even the beginning of the thread of that effort on the Senate level, the House of Representatives and the State legislature had approved, incidentally.

This is where we are today, except a lot worse, because in the meanwhile not only have we allowed, and this with congressional assent—as a matter of fact, on the last night of our session before the recess before the election; if I recall correctly it was October 2 when we broke up, on the last night of the session where we had activity, closer to 11 p.m. or 11:30 than 9—the Congress approved and the House passed the most far-reaching changes in our basic structural financial institutional setups since the 1935 Banking Act with not even a whimper. We were overwhelmed, and all in the name of what—that it was going to save savings and loans by creating a new paper or gimmick.

□ 1340

At this point, I wish to refer to the newsletter—and this is the last that I understand is being published—entitled "Credit and Financial Newsletter." It is published for the members of the National Association of Credit Management. It reflects, without intending to do so, very dramatically what we have done to ourselves, and why it is that, at this time, we on the congressional level have failed in two very important respects: First, to continue to represent the people, where all power rests.

We have gotten away from the basic constitutional thrust of our Government. The most revolutionary words in the world are still those first five words in the preamble to the Constitution. They were revolutionary in 1789 and they certainly are now, where it says, "We the people of the United States, in order to form a more perfect Union," et cetera. It does not say, "We, the Congress," or "I, the President," or "We the courts," or judges; it says, "We the people."

This is sovereignty. This is where the power comes. We have just gotten away from that and do not realize it.

What we are saying is that we developed into sort of an oligarchic control where basic decisions are not being made here in open debate; they are being made in those plush, carpeted offices of big bankers in New York and elsewhere.

There is an interesting paragraph, because they decided that this last issue would comprise what they call the new financial products. They say, "These accounts were all introduced," and incidentally approved by the Congress, "as a result of the high level of

interest rates that emerged during the 1970's, combined with the interest rate ceilings that constrained traditional banks and thrift institution deposits."

Then they list a host of, I call them gimmicks, what they call financial products, gimmicks. They have not worked. They have just postponed a little bit, but they are not saving anybody. They are going out like popcorn in a popper, businesses are going out.

Your hear about how interest rates have gone down. That was before the election. But businesses are still going out. They are going out in my hometown; they are going out throughout the country in record number.

The only reason is that never has history recorded in any country, much less in ours, which is predicated on the type of economy that I call the unique American—as I have said before, and apparently I guess I am believed to be so innocent or dumb that I have seen no adoption of that, but we are predicated on mass production based on mass consumption, and since World War II the other leg of that tripod, mass credit.

I come from a background that exposes me to the type of history that the average American is not exposed to. Therefore, I am quick to sense when things are happening up here and have spoken out accordingly. I have seen the puzzle of some of my colleagues at the time.

In the countries outside of our boundary, particularly south of us, right now interest rates—in the first place, we cannot equate our system at all. You have to make all kinds of allowances. But suppose you wanted to borrow money in Mexico 10 years, 15, 20, 5 years ago. If you could get 16 percent, you were lucky. Right now it is over 50 percent.

But the economy and the structure there is no comparison. There is no use trying to compare. But what is at balance now in this powerful, powerful struggle that, as I said, has been won by these powerful oligarchic and predatory interests. They have done, I am sorry to report—is that what is happening is that in their greed they have not seen that they have played around with this rather sensitive mechanism, and that what you have is the destruction of that apparatus.

How in the world are you going to revive these businesses that are dying? As one case in my district, an 80-year-old family business of the most serious type, nobody could accuse that family or its present directors of being profligate or being poor managers, but there is no way in the world that I know that any ordinary businessman can afford to fund his inventory for floor display or whatever you have at 17, 18, 16, or even 12 or 13 percent interest. There is no way you are going to stay alive, no way, unless you happen to have the resources that, incidentally and ironically, are available only to the multi-billion-dollar giants, gobbling each other up. Exxon and the other giants struggle to further, further consolidate this tremendous control and tremendous power.

One of the articles of impeachment that I have on Paul Volcker is that he has violated his trust as fiscal agent by exposing the American people to being defrauded and cheated and made bankrupt.

Secret meetings in Florida—mind you, not even in the New York Federal Reserve Board building, but in Florida—with Bunker Nelson Hunt, because he was able to tie up all of these allocations of bank credit which the small businessman is dying because he cannot receive. After all, banks are chartered. They are supposed to be chartered for public need and convenience.

Who says that is true any longer? Banks now divert over 50 percent of their resources in gobbling up other banks, in expanding and gobbling more, not to provide the fuel for the engines of industry and commerce and manufacture, but for speculative purposes that do not produce one job but, rather, diminish. They have sold the American birthright, and, of course, for more than a mess of pottage this time.

So I offer that article on credit and finance.

Now, there is also an interesting article that I think echoes this. If this can happen to such a sacred entity as the Vatican, can you imagine why it should not happen to our more human bankers?

I refer to an article, also in Business Week for December 13, on page 39, entitled "The Vatican: Tighter Strings on the Papal Purse."

Their bank got tied in with this horrible scandal which, incidentally, was sort of reminiscent of Wall Street collapsing when bankers were throwing themselves out of the windows. One Italian banker was found hung under a bridge in London. Another was mysteriously killed or died. They still have not discovered which.

□ 1350

I am just going to quote one sentence from this article:

> At the top of a growing list of Vatican embarrassments is the Ambrosiano case. In a complicated affair, Calvi, chairman of the bank, made $1,2 billion worth of unsecured loans to Ambrosiano's Latin American subsidiaries.

What has yet not come out is where, even tangentially, the American banks are also involved and have a few billions to worry with in that scandal, but also reflects that temptation for more, more, more. These interests, the more they have, the more they want. They will never satiate this kind of interest.

Humanity never has, as I said yesterday it has had to guard itself even 7,000 years before Christ in the Court of Hammurabi, where they had antiusury laws even then. All through Roman history, that was a big struggle. In England, that has been a struggle.

It is just impossible to believe when we in successive decades in the Congress, particularly, would have sold, abdicated, this very serious responsibility. As I said, after all, the Congress created the Federal Reserve Board. It was not a constitutional provision set up in the Constitution. It is something that was born out of laws, supposedly debated and passed here, but even then it is an interesting—intensely interesting—history.

The reason why we ended up with the Federal Reserve Act of 1913 was the reaction to the calamitous developments of 1980, in which we had precisely the same thing. That is, except that at that point our country was still burgeoning west, still opening up, but we had the same thing, that struggle to control what? The allocation of vital credit and resources. The struggle essentially is one that has yet to be determined, and that is whether the people under the Constitution will rule again, or the bankers.

INTRODUCTION OF IMMIGRATION BILL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kentucky (Mr. MAZZOLI) is recognized for 5 minutes.

● Mr. MAZZOLI. Mr. Speaker, I have introduced today a new version of the Immigration Reform and Control Act of 1982. This bill is identical in all respects to the bill reported after full and complete deliberation by the Committee on the Judiciary except one.

In order to avoid what would be a technical violation of the Budget Act, I have added language to the bill which makes the salaries of the Immigration Board subject to available appropriations. This bill is identical in all other respects to the version which the committee ordered reported.

I intend to ask the Rules Committee to make this bill in order so as to avoid a potential problem under the Budget Act. In order to protect the rights of all others concerned, I shall also request that the Rules Committee make in order all amendments reported by other committees to the previous version of the bill, H.R. 6514, in the appropriate place in the new version.

All Members should be advised that the committee intends to request the Rules Committee to require that all amendments which Members intend to offer be printed in the CONGRESSIONAL RECORD in advance. Members who intend to submit such amendments are

advised that they should be drafted as amendments to this new version of the bill.●

TRIBUTE TO RAY MANCINI

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. HORTON) is recognized for 5 minutes.

● Mr. HORTON. Mr. Speaker, I want to take this opportunity to say a few words about an outstanding individual and one of the best lightweight boxing champions to ever compete in this sport, Ray "Boom Boom" Mancini. We are all familiar with the tragedy surrounding Ray's recent defense of the WBA lightweight boxing championship title, which he holds. I extend my sympathy to the survivors of Du Koo Kim and also to Ray during this difficult period. It was my pleasure to have met Ray at a White House reception this year, and I know the anguish he must feel at this time.

Ray has faced many adversities in his quest for the lightweight title. But he has faced these adversities with courage and integrity, and he has won the title for which he worked so hard to achieve. Along the way, he has also won the respect and admiration of millions of fans from around the world, myself included among them. I wish him well, and I look forward to his return to the ring.●

THE LAW OF THE SEA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. LEACH) is recognized for 60 minutes.

Mr. LEACH of Iowa. Mr. Speaker, in Jamaica next week representatives of the vast majority of the world's nations will sign one of the most important and far-reaching treaties in the history of multilateral diplomacy—that establishing a law of the sea. The fact that the United States will not be a party to this historic convention marks a shameful blot in this country's diplomatic history.

We have much to lose and little to gain by turning our backs on the world community's efforts to govern access to and exploitation of the oceans and their resources. Not only has our choice to become an international pariah squandered 16 years of arduous negotiations that we largely initiated and produced a treaty that meets 95 percent of our needs—better in fact than we expected when we began the process—it has also removed any credible hope of using the Law of the Sea forum to improve the remaining 5 percent—the portion concerning deep seabed mining—that dissatisfies the affected U.S. interest groups.

It now appears that the administration has under consideration a unilateral declaration establishing an exclusive economic zone in the seas surrounding the United States, under the assumption that such a declaration would continue to have meaning under international law even after the ratification of the Law of the Seas Treaty. Such an action by the United States disregards the history of the treaty process itself. We pushed energetically for a "law of the sea" conference in the first place, precisely because of our desire to forestall the unilateral establishment of conflicting rules for access and exploitation of the oceans and their resources.

The administration now apparently thinks it can conduct "have your cake and eat it too" diplomacy, accepting treaty provisions it likes and ignoring features it does not even though from the beginning it was clear that there would of necessity be a "give and take" approach to the thorny issues involved. This mischievous tactic belies our original intentions and jeopardizes the strategic provisions of the treaty, such as those establishing on a permanent basis the right of passage through various straits, which are so essential to our national interests. It also sets a precedent for other countries to declare unilaterally economic zones and possibly sovereign jurisdiction more ambitious than we are contemplating declaring for ourselves. This U.S. precedent could initiate a series of discussions in precise contradiction to U.S. economic and commercial interests.

In his July 9 statement the President recognized that the vast majority of the provisions in the treaty serve U.S. national interests, but he noted that he made his decision to withdraw from further treaty discussions and not to sign the final documents based on imperfections in the seabed mining provisions. This over emphasis on an area of still unproven value appears to be a mistake of massive proportions, the full legal, political, and strategic ramifications of which could be centuries in unfolding.

The treaty has been opposed primarily by only one industrial group. However, it is conjectural whether any American mining company is likely to mine in international waters without the sort of international guarantee provided by a multilateral treaty. If an American-controlled company attempted to carry out mining operations at its own discretion, the United States could conceivably be challenged at the International Court of Justice—with a strong likelihood that the ICJ would be obligated to determine the United States to be a "pirate country" at the very time when few would deny the import of building up rather than shrinking international law.

Critics of the deep seabed mining provisions of the treaty have many valid points. However, some weaknesses of the treaty may still be modified at the Preparatory Commission.

In retrospect, it is difficult to imagine how we can with confidence refuse to attend Preparatory Commission meetings and refuse even to attempt to play a constructive role in the negotiating process, or how we can assume that the extremely desirable aspects of the bulk of this treaty will endure while we actively undermine the full treaty's legal foundation.

If the mining provisions are as unworkable as critics contend, it should become obvious to the international community, since no mining will take place. Modifications will necessarily be made—but in this case without effective U.S. input. In any case, our goal should be to insure that the 95 percent of the treaty that is vital to our strategic interests as well as the survival interests of mankind will remain in force during the period in which modifications of the mining provisions take place.

It cannot be emphasized enough that history is replete with wars that sprang from conflicts at sea. Our own War of 1812 comes to mind, and of course the resource acquisition traumas of the 1930's helped lead to the Japanese decision to carry out a preemptive attack on Pearl Harbor. The Reagan administation appears to have lost historical perspective on this issue and as a result sent an irascably counterdproductive delegation to attempt to deal with the deficiencies of the treaty. I know of no instance in U.S. diplomatic history in which U.S. interests at a vital negotiation were so ill-represented by a negotiating team as the post-Richardson delegation to law of the sea discussions. The lack of professionalism and the idealogical rigidly characteristic of our negotiators is unprecedented in American history.

Particularly unfortunate is the evidenced failure of the administration to develop a structure for responsible decision making on an issue which, with the exception of arms control, is likely to have as great historical ramifications as any decision this President is likely to make during his term of office.

In retrospect, it can only be described as extraordinary that the position of the United States of America at the first negotiating session in 1981—a session which was intended to be the culmination of a decade of multilateral negotiations—was that we had no position. At United States request, a second negotiating session was then called so that American concerns could be accommodated. Yet, again 5 months later at the second 1981 session, the position of the United States of America was that we had no position. We were still apparently assessing the merits of the treaty. This unprecedented negotiating nonposition

could not exemplify more how intransigent positions foster countervailing intransigence. By compounding ideological biases with a refusal to work forthcomingly with those who shared a differing perspective, the administration's nonnegotiating team forfeited any claim to be other than a saboteur of our broadest national interests.

A review of the U.S. decisionmaking process leads to the uncomfortable conclusion that professionals in the State Department—indeed Secretary Haig himself—had little say in the development of the U.S. position. Mining interests worked assiduously to place sympathetic individuals in key positions at State and Interior and kept a lock on NSC discussions which in turn appear to have been minimal and, particularly at the key early stages of treaty consideration, poorly staffed. As time elapsed and our negotiating techniques failed to achieve satisfactory accommodation on the seabed mining provisions the ideals greatly rigid rhetoric of our negotiators led to the locking in of the United States to a position of dubious viability.

The effort to expand the rule of law over two-thirds of the Earth's surface now appears to be jeopardized, potentially dooming what may well prove to be the most significant peacekeeping agreement of the latter half of the 20th century. For even if we see substantial progress in arms control in the next several decades, the probability remains that a number of countries, including our own, will continue for the foreseeable future to possess arsenals of war of civilization threatening proportions.

Under these circumstances, it is imperative that every effort be made to establish and broaden a regime of international law which makes conflict less likely to occur. This is in the final measure what the Law of the Sea Treaty is all about. Yet narrow ideology and commercial self-interest appears to have blinded us to a pragmatic and proper historical perspective on the issue. It simply becomes impossible not to question the administration's priorities when unrestrained defense spending is embraced but serious negotiations are abandoned. Given the enormous sacrifices the American people are being called upon to make for the sake of protecting national interests through defense spending, they deserve a good faith effort to accomplish the same ends through diplomacy. The refusal to negotiate responsibly under these circumstances was and is unconscionable.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. PHILLIP BURTON (at the request of Mr. WRIGHT), for today, on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. PEYSER, for 30 minutes, December 7, 1982.

Mr. GONZALEZ, for 60 minutes, on December 6, 1982.

Mr. GONZALEZ, for 60 minutes, on December 7, 1982.

Mr. GONZALEZ, for 60 minutes, on December 10, 1982.

(The following Members (at the request of Mr. DAUB) to revise and extend their remarks and include extraneous material:)

Mr. LEACH of Iowa, for 60 minutes, today.

Mr. BUTLER, for 60 minutes, today.

(The following Members (at the request of Mr. HOYER) to revise and extend their remarks and include extraneous material:)

Mr. GONZALEZ, for 60 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. WILLIAM J. COYNE, for 5 minutes, today.

Mr. MAZZOLI, for 5 minutes, today.

Mr. PEYSER, for 60 minutes, December 13.

(The following Member (at the request of Mr. COLLINS of Texas) to revise and extend his remarks and include extraneous material:)

Mr. HORTON, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. BUTLER, and to include extraneous matter in the RECORD and include therein extraneous material notwithstanding the fact that it exceeds two pages and is estimated by the Public Printer to cost $3,984.75.

(The following Members (at the request of Mr. DAUB) and to include extraneous matter:)

Mr. YOUNG of Alaska.

Mr. MCCLORY.

Mr. BEREUTER.

Mr. FISH.

Mr. PURSELL.

Mr. HYDE in two instances.

Mr. LAGOMARSINO.

Mr. COLEMAN.

Mrs. ROUKEMA.

Mr. CARMAN in two instances.

(The following Members (at the request of Mr. HOYER) and to include extraneous matter:)

Mr. DE LA GARZA in 10 instances.

Mr. WASHINGTON in two instances.

Mrs. KENNELLY.

Mr. MOFFETT.

Mr. BARNES in two instances.

Mr. BONIOR of Michigan.

Mr. FLORIO.

Mr. LUNDINE.

Mr. RATCHFORD.

Mr. ROE.

Mr. OBERSTAR in two instances.

Mr. DONNELLY.

Mr. SKELTON.

Mr. HUBBARD.

□ 1400

ADJOURNMENT

Mr. GONZALEZ. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 2 o'clock and 2 minutes p.m.), under its previous order, the House adjourned until Monday, December 6, 1982, at 2 p.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

5206. A letter from the Assistant Secretary of the Army (Installations, Logistics and Financial Management), transmitting notice of the proposed conversion to contractor performance of the supply, storage and warehousing, and logistics management office at Harry Diamond Laboratories, pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

5207. A letter from the Principal Deputy Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting notice of the proposed conversion to contractor performance of the custodial services function at the Naval Air Rework Facility, Alameda, Calif., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

5208. A letter from the Principal Deputy Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting notice of the proposed conversion to contractor performance of the motor vehicle maintenance, refuse collection, and taxi operation functions at the Naval Shipyard, Charleston, S.C., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

5209. A letter from the District of Columbia Auditor, transmitting a report on the "lease of public space under Dupont Circle," pursuant to section 455 of Public Law 93-198; to the Committee on the District of Columbia.

5210. A letter from the General Counsel, Department of Energy, transmitting notice of a meeting relating to the international energy program to be held on December 2 and 3, 1982, London, England; to the Committee on Energy and Commerce.

5211. A letter from the Administrator, Environmental Protection Agency, transmitting the semiannual report of the Agency's Inspector General, covering the period ended September 30, 1982, pursuant to section 5(b) of Public Law 95-452; to the Committee on Government Operations.

5212. A letter from the Secretary of Labor, transmitting the semiannual report of the Department's Inspector General, covering the period ended September 30, 1982, pursuant to section 5(b) of Public Law 95-452; to the Committee on Government Operations.

5213. A letter from the Secretary of Transportation, transmitting the semiannual report of the Department's Inspector

General, covering the period ended September 30, 1982, pursuant to section 5(b) of Public Law 95-452; to the Committee on Government Operations.

5214. A letter from the Clerk of the U.S. Claims Court, transmitting a copy of the court's opinion in Docket No. 363, *Lower Sioux Indian Community in Minnesota, et al* v. *the United States*; to the Committee on Interior and Insular Affairs.

5215. A letter from the Secretary of Transportation and the Chairman of the Interstate Commerce Commission, transmitting a report making recommendations for a more efficient and equitable system of State regulations for interstate motor carriers, pursuant to section 19 of Public Law 96-296; to the Committee on Public Works and Transportation.

5216. A letter from the Chairman, Federal Election Commission, transmitting the Commission's fiscal year 1983 request for a supplement appropriation, pursuant to section 307(d)(1) of the Federal Election Campaign Act, as amended; jointly, to the Committees on Appropriations and House Administration.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. PEPPER: Committee on Rules. House Resolution 620. A resolution providing for the consideration of H.R. 6211, a bill to authorize appropriations for construction of certain highways in accordance with title 23, United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes. (Rept. No. 97-944). Referred to the House Calendar.

Mr. PERKINS: Committee on Education and Labor. H.R. 7130. A bill to provide a national policy for engineering, technical, and scientific manpower, to provide for cost sharing by the private sector in training such manpower, to create a national Coordinating Council on Engineering and Scientific Manpower, and for other purposes; with an amendment (Rept. No. 97-933, Pt. II). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. MAZZOLI (for himself and Mr. FISH):

H.R. 7357. A bill to revise and reform the Immigration and Nationality Act, and for other purposes; to the Committee on the Judiciary.

By Mrs. BYRON (for herself, Mrs. HOLT, and Mr. DYSON):

H.R. 7358. A bill to insure that rates charged by natural gas companies are market sensitive; to the Committee on Energy and Commerce.

By Mrs. COLLINS of Illinois:

H.R. 7359. A bill to amend title 18 of the United States Code to make unlawful the adulteration of food, drugs, and cosmetics carried out for the purpose of causing death or injury; to the Committee on the Judiciary.

By Mr. ANDERSON (for himself, Mr. SHUSTER, Mr. HOWARD, and Mr. CLAUSEN):

H.R. 7360. A bill entitled "Surface Transportation Assistance Act of 1982"; to the Committee on Public Works and Transportation.

By Mrs. HOLT:

H.R. 7361. A bill to require the Secretary of the Interior to convey certain land located in the State of Maryland to the Maryland-National Capital Park and Planning Commission; to the Committee on Interior and Insular Affairs.

By Mr. HUGHES (for himself, Mr. RODINO, Mr. MCCLORY, Mr. BROOKS, Mr. SAWYER, Mr. FISH, Mr. HYDE, Mr. MOORHEAD, Mr. CONTE, Mr. MAZZOLI, Mr. MCCOLLUM, and Mr. SHAW):

H.R. 7362. A bill to amend title 18 of the United States Code to provide additional Federal penalties for tampering with certain consumer products, and for other purposes; to the Committee on the Judiciary.

By Mr. LUNDINE:

H.R. 7363. A bill entitled "The Specialty Steel Fair Trade Act of 1982"; to the Committee on Ways and Means.

By Mr. McCOLLUM:

H.R. 7364. A bill to amend title 11 of the United States Code with respect to interests in timeshare premises; to the Committee on the Judiciary.

By Mr. SEIBERLING:

H.R. 7365. A bill to amend title II of the Social Security Act to liberalize the earnings test for postsecondary students who have attained age 18, but who nevertheless continue to qualify for child's insurance benefits under section 202(d) of such act (on a specially reduced basis) despite the general elimination of all benefits for such students in 1981, so that further reductions because of such students' outside earnings will not prevent them from continuing their education; to the Committee on Ways and Means.

By Mr. SKELTON:

H.R. 7366. A bill to establish the Harry S Truman National Historic Site in the State of Missouri, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. ZABLOCKI (for himself, Mr. FASCELL, Mr. BROOMFIELD, and Mr. DERWINSKI) (by request):

H.R. 7367. A bill to amend the Board for International Broadcasting Act of 1973 to authorize additional appropriations for fiscal year 1983; to the Committee on Foreign Affairs.

By Mr. OTTINGER:

H. Res. 618. Resolution to commend St. Paul's Church in Mount Vernon, N.Y., in recognition of its significant role in the development of the bill of rights; to the Committee on Post Office and Civil Service.

By Mr. SOLOMON (for himself, Mr. FIELDS, Mr. WHITEHURST, and Mr. MONTGOMERY):

H. Res. 619. Resolution expressing the sense of the House of Representatives concerning the validity of the current Selective Service Registration System; to the Committee on Armed Services.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 1129: Mrs. HOLT.

H.R. 2034: Mr. GOODLING.

H.R. 5531: Mrs. SCHNEIDER and Mrs. HECKLER.

H.R. 6009: Mr. MINETA.

H.R. 7108: Mr. PATMAN, Mr. DANNEMEYER, and Mr. MARKEY.

H.R. 7322: Mr. WEISS, Mr. UDALL, Mr. ROUSSELOT, Mr. LOWRY of Washington, Mr. NEAL, Mr. SEIBERLING, Mr. MARKEY, Mr. CROCKETT, Mr. LAGOMARSINO, Mr. BARNES, Mr. FRENZEL, Mr. HUGHES, and Mr. BROWN of California.

H.J. Res. 539: Mr. ERDAHL, Mr. SIMON, Mr. KEMP, Mr. ASPIN, Mr. ALBOSTA, Mr. GILMAN, Mr. ATKINSON, Mr. SANTINI, Mr. KRAMER, Mr. OBERSTAR, Mr. HANSEN of Idaho, Mr. EMERY, and Mr. SWIFT.

H. Con. Res. 425: Mr. RATCHFORD, Mr. GILMAN, and Mr. GUARINI.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 3269: Mr. LOWRY of Washington.

PETITIONS, ETC.

Under clause 1 of rule XXII,

668. The Speaker presented a petition of the Aerospace Lodge 2297, International Association of Machinists & Aerospace Workers, North Carolina, relative to the civil service retirement system; which was referred to the Committee on Post Office and Civil Service.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 6211

By Mr. APPLEGATE:

(To the amendment in the nature of a substitute.)

—Strike out section 401 and insert in lieu thereof the following new section:

SEC. 401. Section 401 of the Surface Transportation Assistance Act of 1978 is amended to read as follows:

"SEC. 401. (a) Notwithstanding any other provision of law, the Secretary of Transportation shall not obligate any funds authorized to be appropriated by this Act or by any Act amended by this Act or, after the date of enactment of this Act, any funds authorized to be appropriated to carry out this Act, title 23, United States Code, or the Urban Mass Transportation Act of 1964 and administered by the Department of Transportation, unless steel, cement, and other manufactured products used in such project are produced in the United States.

"(b) The provisions of subsection (a) of this section shall not apply where the Secretary determines that such products are not produced in the United States in sufficient and reasonably available quantities and of a satisfactory quality.

"(c) As an exception to subsection (a), for the procurement of bus and other rolling stock under the Urban Mass Transportation Act of 1964, the manufactured products which go into the vehicles may be of foreign origin to the extent of 50 percent of the cost of all components of the vehicles. Final assembly of the vehicles must take place in the United States.

"(d) For purposes of this section, in calculating components' costs, labor costs in-

volved in final assembly should not be included in the calculation.

"(e) The Secretary of Transportation shall not impose any limitation or condition on assistance provided under this Act, the Urban Mass Transportation Act of 1964, or title 23, United States Code, which restricts any State from imposing more stringent requirements than this section on the use of articles, materials, and supplies mined, produced, or manufactured in foreign countries in projects carried out with such assistance or restricts any recipient of such assistance from complying with such State imposed requirements.".

By Mr. SHAW:
—Page 33, strike out section 121.
—Page 37, section 121, line 12, strike out "unless" and all that follows through the semicolon on line 15.

H.R. 6957

By Mr. DANNEMEYER:
—Page 14, line 19, strike "$63,638,000" and insert in lieu thereof "$60,838,000".

H.R. 7355

By Mr. GARCIA:
—At the end of title VII (page —, after line —), insert the following new section:

SEC. —. None of the funds appropriated by this Act may be used—

(1) to operate, maintain, or provide personnel support services for the dining room of the Secretary of Defense in the Pentagon;

(2) for the pay of enlisted members of the Armed Forces assigned to duty as personal aides to general and flag officers; or

(3) for the provision of veterinary care for pets of members of the Armed Forces or their dependents.

SENATE—*Friday, December 3, 1982*

(Legislative day of Tuesday, November 30, 1982)

The Senate met at 10:30 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Happy is he that hath the God of Jacob for his help, whose hope is in the Lord his God, which made Heaven, and Earth, the sea and all that therein is; which keepeth truth for ever, which executeth judgment for the oppressed.—Psalm 146 : 5-7.

Thy word declares, O Lord, that "Rulers are not a terror to good works, but to the evil"—that they are "the ministers of God for good." (Romans 13:3, 4). Let this be true of the Senate, O God, and the leadership of our Nation.

Sovereign Lord, in the confrontation and confusion of conflicting theories and ideologies, lead Thy servants in the way of divine wisdom—in the way of truth and justice and integrity. Help them not to major in minors and play political games that polarize, paralyze and frustrate constructive action. May these fast closing hours of the 97th Congress not be a waste of energy and time and money. In Jesus' name we pray. Amen.

RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. The acting majority leader is recognized.

THE JOURNAL

Mr. STEVENS. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

SENATE SCHEDULE

Mr. STEVENS. Mr. President, in the absence of the majority leader, I point out to Members of the Senate that, according to our announced goal, the Senate has 10 working days remaining before we would adjourn on December 17. During that time, we have a series of appropriations bills, a series of bills that have been listed as must legislation by many people, and a continuing resolution to complete in order to prevent, once again, the last-minute crisis that comes from the failure to fund the actions of the Government for a full fiscal year.

The leadership requests all Senators to assist in expediting the consideration and the completion of those bills in the appropriations area which we feel can and should be passed before the final consideration of the continuing resolution.

The priority items will be cleared on both sides. We do have an increasing number of Senators who are indicating an unwillingness to recognize the necessity for acting on some of those bills. Again, I point out that the distinguished majority leader has indicated that he is not committed to a December 17 adjournment sine die. There are things that must be done before we go home; and, if necessary, we will stay beyond December 17.

Mr. WARNER assumed the chair.

THE U.S. COMMITMENT TO NATO

Mr. STEVENS. Mr. President, during the month of November, together with Senator JACKSON, Senator MCCLURE, Senator ANDREWS, and Senator MURKOWSKI, I visited several NATO countries. We had the opportunity to address problems of the United States at the meeting of the North Atlantic Assembly.

In particular, I made a statement to the military committee session of the North Atlantic Assembly on the subject of U.S. troops committed to NATO.

For some time now, the Defense Subcommittee of the Appropriations Committee has been looking at the question of U.S. troop levels and the relationship of those troop levels not only to our spiraling Federal deficit but also to the NATO commitments made and kept by other members of NATO. There is no doubt that the trend in the cost of the U.S. commitment to NATO has surged upward.

Mr. President, in 1981, that cost was $78 billion. In the bill we will bring before the Senate next week, the cost of the NATO commitment is $133 billion, a $55 billion increase in 2 years.

We must come to grips with this situation or we will face demands in the not-too-distant future that the troop strengths in Europe be reduced dramatically in order to continue our modernization program. As one who is committed to the modernization program, I fear greatly that one or the other must give, unless we put controls on the ever-expanding troop commitment to Europe.

Some people have accused me of recommending withdrawal of troops from Europe. That is not so, and I do not know how strenuously I can state it to the Senate. The disturbing numbers are that within the last decade, 60,000 additional U.S. troops have been committed to the NATO forces, while at the same time Central European forces of the NATO countries have been reduced by 56,000.

When I was in Britain and met with the British Defense Minister, I was informed, as were the other Senators I mentioned who were there, that the British will withdraw an additional 2,000 of their troops from the Continent in the immediate future, reducing their troop strengths from 57,000 to 55,000. That is being done because their commitment is, in fact, 55,000. They are coming back to the level of their actual commitment to NATO, and no one is disturbed by that, because that is the level of their commitment.

We are trying to make the U.S. Senate and Congress face up to the question of determining what is the level of our troop commitment to NATO. When we look at the entire budget of the United States in 1965, I think the Senate would be surprised to find that in that year, the total budget of the U.S. Government—the total budget—was approximately $133 billion. As I have said, in the fiscal year we are now entering, the commitment of the U.S. Government to NATO alone is $133 billion. Our commitment to NATO in 1983 is equal to the total expenditures of the Federal Government in 1965.

I am a supporter of NATO. I firmly believe in NATO. With the exception of the years I was unable to go because of the accident I was involved in, I have gone to NATO as a representative of the Senate.

I ask the Senate to be realistic. The U.S. per capita defense expenditure is double that of any other NATO country. In 1981, we spent $730 per person, as compared to $442 per person for France and $62 per person for Turkey.

Mr. President, many people are telling me that we cannot afford to take up this question. I say that the Nation cannot afford not to take up the question of the level of our troop commitment to NATO.

I support a strong defense. I want a strong NATO alliance, and I want one that will survive. In order to accomplish those goals, our expenditure of

resources must be rational, reasonable, equitable, and effective. If we do not make the decisions that must be made, future Congresses will have no choice but to make quick decisions as to whether to continue our modernization program or to reduce dramatically our force commitment to NATO at a time when it would be misunderstood. I am asking the Senate to understand.

I ask unanimous consent to have printed in the RECORD—and I urge Members of the Senate to read—the statement I made, as the chairman of the Defense Appropriations Subcommittee, to the NATO parliamentarians in Europe.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY U.S. SENATOR TED STEVENS

There have been comments made about the Senate Appropriations Committee's recommendation to stabilize the growing number of U.S. troops committed to NATO—comments which require clarification.

According to the Defense Department's figures, the cost of the U.S. commitment to NATO in 1981 was $78 billion, and in 1983 it has risen to an estimated $133 billion. This is a staggering increase—particularly when we examine the relative defense burdens per capita of our NATO allies.

Per capita defense expenditures, 1981

	U.S. dollars
United States	730
France	442
United Kingdom	439
Norway	402
Germany	348
Belgium	377
Netherlands	319
Denmark	280
Greece	238
Canada	211
Italy	151
Portugal	84
Turkey	62

As pointed out in Mr. Forrestall's Draft Report, between 1975 and 1982 U.S. forces in Europe have increased by 58,000—but during the same period active duty forces of our European allies decreased by 56,000. Much of the U.S. increase is in support—not combat personnel.

Our problem relates to increased manpower actually in Europe as we increase the deployment of high technology weapon systems to our NATO forces in Europe. In 1971, during the Mansfield resolution debates—resolutions, incidentally, which I and Senator Jackson vociferously opposed and voted against—there were approximately 300,000 U.S. troops in Europe. Today, the Defense Department tells us there are about 355,000, although the end strength ceiling for September 30 was 346,500.

We have to face reality; the trend here in costs of the U.S. commitment and the manpower deployed in Europe have surged upward. Those of us who have supported our NATO commitment, as I have now for 14 years, must take the responsibility for leveling off the costs of that commitment or we will face demands in the Congress that the commitment itself be reduced.

While the Mansfield debates were taking place, so were the mutual balanced force reduction talks. No progress has been made in those talks in the intervening eleven years, but we are still asked to await their outcome. We must maintain our commitment to NATO on the basis of deployments we can afford—but we cannot afford both to modernize our defense systems and continue to increase U.S. military manpower in Europe.

In addition to the costs of the manpower, we now have new requests for NATO military construction costs—a program exceeding $10 billion in four years for the Army alone. It is unrealistic to believe the host nation will pay those costs—costs associated with increased demands for real property, for troop and dependent housing, and modernization of existing facilities.

We are not talking about a costly troop withdrawal. We have recommended adjusting year-end permanent troop levels consistent with the total end strength troop levels Congress has authorized. There will be no cost increases associated with stabilizing U.S. troops in Europe under the Senate Appropriations Committee proposal. Above all, we will not face increased military construction costs in the U.S. of the magnitude of $10 billion in four years.

Our nation now faces a projected $200 billion deficit in 1984. Anyone who believes that we can endure such a deficit—particularly as we struggle to recover from the worst recession since the '30s—is just not facing reality.

I am firmly committed to NATO, and the Senate Appropriations Committee has never faltered in its support for NATO. Those of you who hear and see the debate in your homes on other shores must, I feel, realize that this, as I said in the beginning, is an economic issue, not a military or diplomatic debate. When it occurs, I urge you to realize that U.S. appropriations for defense grew from $85.7 billion in 1975 to $178.4 billion in 1981, and they increased by $35.7 billion in 1982 and are to increase by another $43.4 billion in 1983.

That trend cannot continue, for we in the United States face a compounding national debt. That debt is now over $1.2 trillion with annual interest payments accelerating from $95 billion in 1981 to about $130 billion in 1983.

Common sense requires those of us in the Senate who want a strong defense and particularly want NATO to remain the deterrent to war that it has been for 35 years must take the lead in adjusting our defense spending. If we do not, we will be replaced in Congress by people who come to office dedicated to drastic defense cuts. We will lose the vital public support for a strong defense program, and our United States commitment to NATO will be jeopardized.

The choice as I see it is to manage our defense expenditures widely now—including NATO support—or risk damaging cutbacks in 1984 and succeeding years.

ORDER OF PROCEDURE

Mr. PROXMIRE. Mr. President, the minority leader told me that I could use his time. I also have a special order.

Does the Senator from Virginia wish time?

Mr. HARRY F. BYRD, JR. No.

Mr. PROXMIRE. So I shall proceed as rapidly as I can.

I understand the Senator from Michigan also has a special order which will follow mine.

Mr. STEVENS. May I inquire of the Senator from Wisconsin?

Mr. PROXMIRE. Certainly.

Mr. STEVENS. Mr. President, may I inquire of the Senator from Wisconsin then, is it the Senator's intention to utilize 25 minutes at this time and then yield to the Senator from Michigan? Is that the plan? I have no objection. I just wish to plan my schedule.

Mr. PROXMIRE, Yes. What I wish to do is use my own 15 minutes first and reserve as much of the leader's time as possible for him if he wishes to use it at a later time. I think I can probably finish in 15 minutes and yield to the distinguished Senator from Michigan. I may take a minute or two more.

Mr. METZENBAUM. Mr. President, will the acting majority leader yield for a question?

Mr. STEVENS. If the Senator from Wisconsin will yield to me, yes.

Mr. PROXMIRE. Yes.

Mr. METZENBAUM. Could the acting majority leader perhaps also apprise the Senator of this? Could we be given some indication as to what the intended schedule is for today, or if he cannot do that, can we be placed upon at least 20 minutes or a half hour's notice in the case that the Senator might move to matters that I may have been interested in?

Mr. STEVENS. I might say to the distinguished Senator from Ohio I thought perhaps he and I may be able to get a time limitation to take up the Alaska railroad bill so we would not have to argue that for the next 6 years.

Mr. METZENBAUM. I was just about to commend the Senator from Alaska on his fine speech that he made limiting the number of troops we have in Europe until he got me so upset by this new suggestion of his.

Mr. STEVENS. Perhaps we might make a time agreement on the timber bill or some other bill here. We are trying to get a time agreement on some bills today. I am happy to see the Senator from Ohio here because I think he, above all people, would be in a position to assist us to get some business before the Senate today.

Does the Senator from Ohio have some bill he wishes to take up today?

Mr. METZENBAUM. The Senator from Ohio has no particular bill, nor does he have any objection to the Senate proceeding with normal routine matters in accordance with the President's suggestion that we reconvene.

I wish to be as helpful as possible to the leadership. I only wish to be apprised if there are some matters in which I do have great concern that may be coming to the floor.

Mr. STEVENS. I might say to my good friend we will be pursuing the question of trying to find some busi-

ness today and we will, of course, notify the leadership on the other side if we intend to call up anything. We have several bills that we are looking at now, and we wish to do some business today, but so far we have been frustrated as far as being able to find anything that could be taken up by agreement.

I am trying to reach the majority leader now to see whether we should attempt to move to take up something else under the circumstances. I cannot definitively answer the Senator's question, but I have nothing cleared at this moment to take up other than routine business.

Mr. METZENBAUM. I thank the acting majority leader.

Mr. HARRY F. BYRD, JR. Mr. President, will the Senator from Alaska yield?

Mr. STEVENS. I will yield if the Senator from Wisconsin will yield to me?

Mr. PROXMIRE. I am happy to yield.

Mr. HARRY F. BYRD, JR. May I ask the acting majority leader, is there any plan to take up H.R. 5427, which is on page 27 of the calendar, an act to provide for the broadcasting of accurate information to the people of Cuba, Radio Marti?

Mr. STEVENS. I might say to my good friend, although I joined in the letter to the Senate yesterday urging that that be cleared, that matter has not yet been cleared on either side, I am sorry to report.

Mr. HARRY F. BYRD, JR. I thank the Senator.

Mr. STEVENS. Again I inquire of the Senator from Wisconsin, is it his intention than to reserve the leadership time for later and proceed with the special order?

Mr. PROXMIRE. Yes, indeed, I wish to do that, but I will use such part of the leadership time if I have to do that.

Mr. STEVENS. I have no objection to the Senator from Wisconsin using leadership time on any matter he wishes. It is my understanding that following the Senator from Wisconsin the Senator from Michigan will be recognized for 15 minutes and after that time there will be a period for the transaction of routine morning business.

EXTENSION OF ROUTINE MORNING BUSINESS

Mr. President, I now ask unanimous consent that the time for the transaction of routine morning business be extended to not past 11:45 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER. The Senator from Wisconsin is recognized.

WHAT'S WRONG WITH THE 5-CENT GASOLINE TAX

Mr. PROXMIRE. Mr. President, if there has been any simple, clear, and overwhelmingly accepted assumption, it is that the so-called lameduck session of Congress would pass the gasoline tax to fund an expanded highway program.

I am not so sure that is going to happen without considerable change in the program, of course it may happen. Many people assume it is going to happen because the Speaker of the House of Representatives has announced his support as has the majority leader of the Senate. The President of the United States has said he will support it, and the Ways and Means Committee yesterday reported out a 5-cent gasoline tax for this express purpose.

However, Mr. President, there are some who have studied this problem carefully who question whether this is a sensible idea, and I refer especially to the Governor-elect of Wisconsin, elected November 2, Anthony Earl, who has written a letter to the Washington Post expressing why the gas tax idea is a bad idea, a bad idea for our State, a bad idea, I might say, for Michigan, and a bad idea for Ohio, Indiana, and a number of other States that are particularly hard hit by unemployment.

I am going to read this letter into the RECORD and I am going to interpolate observations as I go along because I think it is so important that Members of Congress be aware of a legitimate, intelligent, thoughtful objection to proceeding so rapidly with a program that might be a serious mistake.

Governor-elect Earl writes:

As governor-elect of an economically distressed Midwestern state, I have spent the four weeks since the election in transition briefings learning in minute detail about the problems and the policy choices that will confront me in January. Not once so far in the search for answers has anyone jumped up in a briefing and said, "What this country needs is a good 5-cent gas tax increase."

So before Congress constructs a bona fide bandwagon for highway legislation during the lame-duck session, will somebody explain once again why this particular highway legislation is important and why those of us digging out of the economic rubble in the Midwest should be happy to see it?

It is not that the roads and bridges in Wisconsin and the Midwest do not need attention. On the contrary, the amount of investment needed for basic road preservation efforts is staggering, as it is in other parts of the country.

It is not that we feel that enough money is already being devoted to highway needs. Rather, stagnant highway revenues and repeated deferral of necessary revenue increases at all levels have contributed greatly to the current situation.

And it is not that jobs are not needed in the region. New jobs are in desperate demand, especially jobs related to a productive investment in our economic future, like highway jobs.

Yet, on balance, it appears that the legislation likely to be considered by Congress will do more harm than good for Wisconsin and much of the Midwest. Unless the highway legislation that is actually passed makes some significant changes in the traditional Federal highway program, passage of highway legislation this session will be one more problem to be overcome by several distressed States.

First, the jobs issue: everyone agrees that the highway legislation being proposed is not a jobs bill, as such. But everyone recognizes that if there were not intense pressure for some Federal action to stimulate job creation, this legislation would not have such a high priority.

What seems to be overlooked in the rush for legislation is that the existing Federal highway program, with its dedicated user taxes and categorical distribution formulas, is highly redistributive. It taxes all highway users equally, but sends far more back to some states in proportion to their contributions than to others. Thus a dollar of Federal highway taxes will result in $1.50 in Federal aid in one State, but will produce only 65 cents of Federal aid in another.

For the "loser" States, the Federal highway program actually exports jobs to other States. A 5-cent Federal gas tax increase would cost Wisconsin highway users about $100 million annually, but we would expect to get back only $70 million under existing formulas. The $30 million difference would be our contribution to highway construction employment in other States, most of which have lower unemployment than ours.

There are even bigger losers under the highway program who can afford their losses even less. Michigan (14.5 percent unemployment) would get back only 67 cents per dollar contributed, and would export about $150 million in Fiscal Year 1983 under the highway legislation under consideration by the House; Ohio (12.3 percent unemployment) would get 76 cents back, and export about $134 million; Indiana (11.4 percent unemployment) would get back only 68 cents, and export about $125 million.

Now, Mr. President, I might point out that the unemployment percentages that I give here are already out of date. This morning the Bureau of Labor Statistics reported the newest unemployment figures, unemployment figures for November, and they show a sharp increase, one of the sharpest increases we have had. We now have 12 million people out of work in this country, and the figures I have given here are worse now, particularly worse, in these States, in Michigan, in Indiana, Ohio, and Wisconsin, than they were when Mr. Earl wrote this letter a couple of days ago.

As Governor-elect Earl points out:

This inequity exists in the current highway program at current tax levels. If the federal gas tax is raised and highway funding increased without changing the pattern of spending, the percentage relationships will remain the same, but the absolute amount of dollar loss from these states will, of course, grow even larger.

Unless the highway legislation expressly recognizes unemployment as a factor for distributing funds, or some realistic minimum level of return on contributions is established, an expanded highway program could actually worsen the relative economic

positions of some of the most severely affected states.

This minimum is not as farfetched as some might think. We have a minimum, as we all know, for every State. No State will get less than one-half of 1 percent, which means some States get a far higher return of highway dollars than they contribute in gasoline taxes.

It has been proposed that instead of getting 67 cents, as Michigan now gets, or 70 cents as Wisconsin gets, or something similar as Ohio and Indiana get, the minimum any State gets be 85 percent or 90 percent of what they contribute. Of course, that is politically difficult to achieve because it means some States that get a great deal, in fact get more than $1 for every $1 they pay in taxes, would have to share part of that benefit and would get less.

The other argument that is most often made in support of immediate action on an expanded federal highway program is that we can no longer ignore our decaying "infrastructure," especially the roads and bridges that serve as the basic arteries of mobility and commerce.

Mr. President, I have heard this over and over again, people say that this is not a jobs program, it is a reconstruction program, and we should do it whether or not we had unemployment, we should do it because our roads and highways are falling into bad condition.

Governor Earl meets that issue and he meets it head on, he meets it properly.

This is also not simply a repair program for our highways. It is something else.

Again, this concern is valid. There is a need for greater resources to be devoted to highway system preservation at all levels.

Most often, rehabilitation of aging Interstate routes and repair or replacement of vital bridges are cited as examples of what increased emphasis on the highway program will accomplish.

But under last year's program, only 22 percent of the federal aid was directed at those two critically important needs. Under the bill to be considered by the House for an expanded program, in FY 83 the proportion of federal aid for these categories would rise only to 29 percent. By contrast, by conservative estimate, probably more than 40 percent of the expenditures from the Highway Trust Fund under the House bill would go for new construction.

This is not repairing roads and bridges that are in bad shape. this would go for new construction.

The remainder would probably be used for resurfacing, rehabilitation and reconstruction of routes not on the Interstate system.

Further, much of the work that is usually associated with road and highway repair is not done with federal aid: pothole repair, joint and shoulder repair, minor bridge repair and resurfacing of many older roads. These are specifically excluded from the federal program because they are defined as maintenance, which is a state or local responsibility, or because the most cost-effective repair or resurfacing alternative did not allow for widening shoulders, grading new sightlines or leveling hills, which is necessary to qualify for federal aid.

Two other factors about a federal gas tax increase and an expanded federal highway program appear to raise red flags at the state level.

First, most states are currently facing a need for increased revenues to fund their own basic preservation efforts. If a federal gas tax is passed along with a federal aid program geared to upgrading and new construction, many states may find it difficult to raise their own taxes next year enough to fund basic state and local preservation programs.

Second is the broad consensus that is developing in favor of completely redefining and restructuring federal-state highway relationships.

There is agreement that essentially local needs should be met locally, and that the future federal responsibility should only involve highways of overriding national concern. There is not yet agreement on where the lines of local and national interest should be drawn, on whether responsibilities and fiscal capacity will be passed in tandem to states, or on what the size and scope of the remaining federal programs should be.

Just 2 weeks ago, as a matter of fact, the Governors proposed that the so-called new Federalism embrace a complete assumption or virtually complete assumption by the States for transportation, education, housing, urban development, and that the Federal Government take over among other responsibilities the full cost or welfare programs and health programs, medicaid, and so forth, completely.

This seems to me to be a sensible proposal because the biggest losers in the so-called new Federalism as originally proposed would undoubtedly be the poor for many reasons with which we are all familiar. But in the new trade off the poor would fare far better. It would mean the Federal Government would have full responsibility for those who are poor and have been discriminated against in States, whereas the States have the political incentive that they have always had to take care of these other programs which are within their jurisdiction.

If that were the case and they should take over transportation, of course this program, a 4-year program, could very well interfere with it.

Further, as documented by a Congressional Budget Office study this summer, there is increasing uncertainty regarding whether there exists either the fiscal capacity or the justification to continue blindly to pour money into a pot called "Interstate completion" since only one-quarter of the remaining cost actually represents unbuilt links in the intercity network, the rest being local segments primarily of benefit to commuters in various cities.

Then Governor-elect Earl concludes as follows, and I think this conclusion makes some sense. I realize it is late in the day comparatively as this lame-duck session moves along. We have only a few days left and we have, as I say, the Speaker, the majority leader, the President of the United States, and the Ways and Means Committee all behind the present version of the gas tax highway bill, which means it may be very hard to slow it down, but Governor-elect Earl says this:

Considering the serious, informed questioning of the existing program that is going on, in contrast to the almost universal support that it has historically enjoyed, this does not appear to be the time for Congress routinely to authorize, and in fact to expand, the traditional program for four more years. If such authorization is enacted, it should come only after Congress has had time to examine the alternative approaches that have been proposed. The current session does not appear likely to offer an opportunity for realistic consideration of alternatives.

Mr. President, I do hope Members of Congress will consider this objection by a brilliant new Governor-elect of a State that would be, as he pointed out and he documents this very well, adversely hit by the program that is now pending in the House and that could sweep through the Congress unless we revise it sharply or, as the Governor-elect asks, that we postpone it until we can give it much more adequate consideration.

I also hope that Members of Congress would recognize the fact that at a time when we are greatly reducing the burden of income taxes on our people, a reduction which does sharply decrease taxes for people with high incomes, that we be very careful about increasing a regressive tax, a flat tax, a sales tax, a tax which hits people with modest incomes, those who have to drive long distances to work and may have small pay when they get to work.

HUMAN RIGHTS VIOLATIONS IN UGANDA GIVE A NEW URGENCY FOR THE ADOPTION OF THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, in December 1980 Dr. Milton Obote, the new President of Uganda, pledged in his inaugural address that he would construct a "government of law" that would "work for human compassion, rights, and dignity." These words were received with great joy and relief by a nation that had just experienced 8 years of widespread and wanton violence under Gen. Idi Amin Dada. It seemed then that Uganda had finally been delivered from Amin's genocidal legacy and was set on a course of national consolidation and rejuvenation. Unfortunately, recent testimony reaching the West from within Uganda paints quite a different picture and it now appears that the short period of calm after Amin's fall will prove only a temporary respite from further terrorization.

According to Amnesty International's latest report, "systemic torture of

prisoners and mass arbitrary executions" have reappeared in Uganda and are being conducted largely by official branches of the Government. The report, "Human Rights Violations in Uganda: Extrajudicial Executions, Torture, and Political Imprisonment," documents human rights violations perpetrated by Ugandan security forces and regular army units. The investigation raises serious questions concerning the sincerity of the Obote government in its promise that it would "work for reconciliation" and would insist that no revenge or unlawful violence be taken by its security or military forces. The report cites widespread arbitrary arrests, prison abuse and neglect, disappearances, and other extrajudicial actions carried out by the Government and its agents.

This most discouraging and ominous report comes in the wake of the discovery of two mass graves in Uganda. In mid-May of 1982 the bodies of 50 young men were found in Lake Victoria, the infamous dumping ground during the Amin massacres of the early 1970's. As in many of these earlier cases, all of the corpses bore signs of sexual torture and mutilation.

Yet another mass grave was found in mid-June on wasteland north of Kampala. This grave contained 80 bodies which, like Lake Victoria's victims, were without any indication as to their origin or their crime. However, unlike Lake Victoria, this case had a survivor who has testified that he and the other 80 individuals were prisoners of the Makindye and Latabu military barracks and were taken to the site in trucks at night and shot.

These ugly incidents, and the many others now coming out of Uganda, may foreshadow even worse times yet ahead. The use of Lake Victoria as a mass grave to hide the bodies of prisoners brings back tragic memories and should serve as a warning of the new direction in which Ugandan politics seems to be moving. Today Dr. Obote's inaugural words are being remembered within Uganda more as a subject for sarcasism than for solice.

The rapid deterioration of human rights in Uganda, and other nations like it, bring new urgency for the adoption of the Genocide Convention, a document that has waited 35 years for this body to give its final advise and consent. While no one has yet suggested that the Obote government is guilty of genocide, its behavior in recent months can not help but resurrect the painful images of the Amin period. The tools of genocide are within the grasp of most modern nations and all that is required today in the inclination to match the capability.

LET'S GET SOMETHING FOR THE MX

Mr. PROXMIRE. Mr. President, with the upcoming debate on the MX missile in mind, I was intrigued by a compelling letter written to me by Jeremy J. Stone, director of the Federation of American Scientists.

Dr. Stone's proposal could save Congress billions of dollars, put the MX missile issue to rest forever, reduce the Soviet threat to our national security and strengthen the existing agreement to adhere to SALT II.

First, some history.

The SALT II agreement permits each side only one new land-based ICBM over and above the ones each now have. The MX was to be ours. We do not know the Soviet choice.

With this in mind, Dr. Stone proposes that an appropriate bill be amended to require that no funds be spent to produce or deploy the MX until the President certifies to Congress that the Soviet Union has their new ICBM in the works.

The amendment contains the following language:

No funds shall be spent to produce or deploy operational versions of the one new land-based missile permitted in the United States under the SALT II agreement, whether it be the MX or some other substitute, unless and until the President certifies to the Congress that the Soviet Union is producing or deploying operational versions of the one new land-based ICBM which it is, likewise, permitted.

The proposal, in effect, simply removes the option for the one new ICBM that SALT II permitted both sides.

Can the agreement be monitored? Would the United States know if the Soviets began to seriously test a new ICBM?

Stone says yes, because the SALT II agreement requires both sides to inform the other when they begin testing ICBM's.

I think Dr. Stone's proposal should be seriously considered in the debate about the MX missile. And I am prepared to offer his language as an amendment at that time.

I ask unanimous consent that the letter from Jeremy Stone to me be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

FEDERATION OF AMERICAN SCIENTISTS,
Washington, D.C., December 1, 1982.

Senator WILLIAM PROXMIRE
Dirksen Senate Office Building,
Washington, D.C.

DEAR SENATOR PROXMIRE: Whether or not the MX missile survives impending votes for initial production money in the House of Representatives and in the Senate, its future, and the future of land-based missiles more generally, can only be decided by arms control. If the Soviet Union goes forward with land-based ICBMs of new and different kinds, eventually we will also—whether it be an MX or a single warheaded mobile missile or some other substitute. And vice versa.

Happily, there is at hand a simple and complete solution to this problem which arises out of the SALT II agreement that both sides are now respecting. Recall that the agreement permits each side only one new land-based ICBM over and above the ones each now has. The MX was to be our permitted new ICBM; uncertainty still surrounds the Soviet choice because they have so many different possibilities in development to choose from.

With all this in mind, Congress should amend the appropriations bill to offer this kind of language:

"No funds shall be spent to produce or deploy operational versions of the one new land-based missile permitted the United States under the SALT II agreement, whether it be the MX or some other substitute, unless and until the President certifies to the Congress that the Soviet Union is producing or deploying operational versions of the one new land-based ICBM which it is, likewise, permitted."

If approved, this proposal would have three advantages. First, whether or not production money for MX is defeated in one or both Houses this year, this amendment provides a solution to MX—and to substitutes for it—that can last. In effect, it closes a loophole in the SALT II agreement and simply removes the option for the one new ICBM that SALT II permitted both sides.

Second, for that growing number of observers, whether Congressmen or not, who think that the MX is doomed, this amendment "gets something for it" while saving tens of billions of dollars. In this regard, it follows the path which our Nation followed in 1970 when, seeing that we did not really want to build an anti-ballistic missile system, we proceeded to secure Soviet agreement not to build one either in the ABM agreement of 1972.

Finally, this approach will build on, and hence strengthen, the SALT II regime that we presently adhere to—a baseline and core of those future agreements we are considering whether they be freezes or reductions. Indeed, this agreement improves on SALT II by constraining modernization of ICBMs.

But can the United States live with the present situation without a new missile? It can. The Soviet threat to our existing land-based missiles is highly theoretical and uncertain. Even if the U.S. had nothing other than 1,000 ICBMs, no political figures we can imagine would dare to risk their fate, and their Nations, on untried launches against a force so powerful. A residual ten percent of that force would destroy the 100 largest Soviet cities and devastate that Nation. And we do not have *only* this force, we have also an enourmous deterrent at sea and on bombers carrying a total of another 7,000 warheads at the ready.

Moreover, if we have to live with this situation, so must the Soviets. More than half of their warheads are on about 600 ICBMs. And these could be destroyed by *our* land-based missiles. So even if these theoretical first-strike calculations are assumed, there is no "vulnerability gap"—we can destroy a higher percentage of their overall force than they can of ours.

Can we monitor the agreement set up by this amendment? We can. The SALT II agreement actually requires both sides to inform the other when they begin to test their one new ICBM and both sides are only just beginning two to three years of flight tests which can be monitored and con-

trolled. Indeed, ironically, the history of the negotiations shows that both sides proposed exactly what we are proposing, during the SALT negotiations. The problem was that they proposed it at different times and so never reached agreement. Removing this one-new-missile exception will, in fact, make SALT II easier to verify since we will not have to deal with yet another missile deployment.

In sum, with one stroke, Congress can save tens of billions of dollars, reduce the impending Soviet threat against us, and strengthen—and even improve on—the existing agreement to adhere to SALT II.

With this in mind, we wonder if you would be willing to champion this approach in the Congress?

Respectfully,

JEREMY J. STONE.

Mr. President, I yield the floor and I reserve the remainder of the leader's time, if there is any time, for his purposes later.

RECOGNITION OF SENATOR LEVIN

The PRESIDING OFFICER. The Chair recognizes the Senator from Michigan.

Mr. LEVIN. I thank the Chair.

PROPOSED GASOLINE TAX INCREASE

Mr. LEVIN. Mr. President, first, I commend my friend from Wisconsin for again bringing to the attention of the Senate the inequities of the distribution formulas under the gasoline tax.

As a matter of fact, I had intended to talk today about the proposed gasoline tax increase, but in light of the unemployment figures which have been released this morning I must tell my colleagues that I do not see how we can go home for the holidays in good conscience without doing something real about the problem of unemployment.

Those figures should be seared on every one of our minds; 10.8 percent national unemployment—10.8 percent—up almost half a point in 1 month and in my State of Michigan up over a point, from 16.1 percent to 17.2 percent. And everybody in this Chamber should know what 10.8 means—the highest unemployment rate in this country since the Great Depression.

It is shameful, and there is no other word for it. These are shameful statistics, and the administration should be ashamed of what is happening in this country.

The fact that there is no program to change this is bad enough. What grinds our faces into it even worse is the fact that there is so much callousness and insensitivity that accompanies the pain. We have been told over the last years, "If you don't like where you live, go vote with your feet. Go look for jobs elsewhere." We have been told to read the want ads. We have been told it is not newsworthly if some person is unemployed in South Succotash. We have been told unemployment is part of the cure. Some members of the administration's staff last week even said we maybe ought to tax unemployment benefits to give an incentive to people to get back to work. They do not need any incentive. They need jobs.

I do not see how this Senate or this Congress can, in good conscience, leave for the holidays without doing something significant about jobs and about unemployment benefits. And if we leave, we should be ashamed.

How long do we stay the course? Can we get some guidance from the administration? How long? Eleven percent unemployment, twelve percent unemployment? When will they tell us the course has been run and it is time to try something new?

We need some guidance. We need some hope. January, February, June, next November? How many more months of double-digit unemployment? In my State again, over 17 percent unemployment. How long?

We need some guidance from the White House. We need some hope. We do not need any more insensitivity and callousness and talk about, well, maybe people need incentives to go out and find some work.

Now if this administration is unable or unwilling to act—and apparently they are both—Congress has to fill the vacuum on a bipartisan basis. This is not a partisan issue. It is an issue which affects every American whether Democratic or Republican or whatever. We are all affected by it. There is a vacuum and we have to fill it and we have to fill it on a bipartisan basis and, again, in good conscience.

We should not leave for the holidays without filling that vacuum, without acting on jobs and unemployment benefits.

As I said, I intend to talk today, Mr. President, about the proposed gasoline tax increase. My good friend from Wisconsin has already done a noble job of talking on it and he is right on point, as he usually is, may I say. He has directly put his finger on the problem. Let me be very blunt about it as it affects my home State—and he was right, my home State is one of those donor States. We give a lot more than we receive in the so-called user fees, which is no user fee at all. Because we are paying not for our roads, we are paying for roads elsewhere in disproportionate amounts. We are told by the President we need this gas tax because people who use the roads should pay for the roads, and that sounds great. But that is not what is happening.

Since 1957, when the first allocations were made, my State of Michigan has received back an average 83 cents for every dollar it has contributed to the highway trust fund. The national average for the rate of return for the trust fund over that period of time has been $1.07, with one State receiving over $9 and others receiving well over $2 for every dollar they contribute.

Now on the face of it this is an intolerable inequity. Why should the people of my State, who are now enduring the highest rate of unemployment—and whose roads, by the way, are ranked among the worst, among the worst, in need of repair—why should we dig deeper into our pockets to pay an additional tax for the roads in other States where those roads are on the average in better condition than ours. We are among the States with the roads in the worst condition. Why should we do that, when at the same time the unemployment rate in many of those States which get back more than they give is half of our rate? I cannot see any justification for this.

Now, if the goal of this tax increase is to further inject user concept into both raising the tax and the allocation of its revenues, then it is not only inequitable, but it is downright illogical, as well. The current allocation formulas emphasize such factors as the State's land area, and amount of roads, miles of roads. And it is clear from these formulas that some States are being shortchanged because these formulas do not reflect adequately the actual use of the roads in our States and, therefore, the gas tax contribution and the likely need for the repair of the roads.

Let me give the 1981 example. In 1981, Michigan had 4.29 percent of the total vehicle miles traveled within the United States—4.29 percent. Nevertheless, in the same year, Michigan only received 2.65 percent of the payments for the trust fund. The effects of this are that Michigan ranked seventh in vehicle miles actually traveled but ranked 46th in its rate of return from the highway trust fund. It is hard to imagine a greater disparity between the purpose of this tax and its actual effect.

This being the case with the current law, I will strongly oppose a simple gasoline tax increase because it would only serve to compound this inequity and this illogic. In a State such as Michigan, which is suffering from 17.2 percent unemployment and which has endured double-digit unemployment for now 35 consecutive months, an increase of 5 cents in the price of every gallon of gasoline purchased will add to the hardship already existing for the victims of this deep depression.

The gasoline tax must not pass without significant correction of these inequities. I will vote to correct those inequities, and, if they are corrected, I

will vote for the tax. In the absence of that, however, I will work just as hard to defeat this inequitable tax, as much as we need the road repairs and the spinoff of jobs which will result.

I thank the Chair.

(Mr. MURKOWSKI assumed the chair.)

Mr. PROXMIRE. Will the Senator from Michigan yield?

Mr. LEVIN. I am happy to yield.

Mr. PROXMIRE. I am not a fan of the new Council of Economic Advisers, of Mr. Feldstein. I think he is wrong in the argument that this whole program is going to cost more jobs than it brings in. But is it not true, I ask my good friend from Michigan, that in a State like Michigan or Wisconsin, where you get back 67 cents for every dollar you pay in gasoline taxes, and that dollar you pay in taxes goes out elsewhere, that the net effect on Michigan and Wisconsin would be to cost jobs, because that money taken from your people is money they cannot spend elsewhere in Michigan, money we cannot spend elsewhere in Wisconsin?

It is true that there will be some net stimulus and some net jobs that will come maybe if you keep 85 or 90 cents of the gas tax in the State, but if you keep only 70 cents, or 67 cents as in Michigan, the result in Michigan will be that unemployment will be higher than it otherwise would be and higher in Wisconsin than it otherwise would be.

It will be worse for our States. It will not be the same. It will be worse.

Does the Senator agree with that?

Mr. LEVIN. The Senator is correct. There is no doubt about it that the donor States, the States that get back less than they give up in the gas tax, will be out of jobs, not in with jobs. That is why I say unless the inequities are corrected, with the guarantee of return of gas tax money or some reasonable proportion of what is contributed to the trust fund created by this gas tax, I am going to strongly oppose this gas tax.

It is only if these inequities, these absurdities, that the Senator from Wisconsin pointed out are corrected that I could in good conscience vote for this.

Mr. PROXMIRE. I can see in the Upper Peninsula of Michigan and in Wisconsin, where we attract hundreds of thousands of people every year, that the gasoline tax will be an inhibitor. It will mean that fewer people will come up. These people in business in the northern parts of our States are very conscious of what the increase in the gasoline tax will do to them. I think they are right.

I think there is a tradeoff we can consider in the event we have an opportunity to rebuild our roads and repair our bridges, and so forth, but that tradeoff is obviously so unfair and inequitable.

The Senator gave some very pertinent statistics. He pointed out there was one State that got nine times as much as it contributed and other States that got $2 back for every $1 they contributed. There are a number of States in that category or close to it.

How can the Senator from Michigan and the Senator from Wisconsin permit that to go through? We have an opportunity here in the Senate. I do not like filibusters, and I am sure the Senator from Michigan does not either. We want to avoid them if we can do so. We want this legislation to go through. It has overwhelming support from the President, from the Speaker, from the majority leader, and the Ways and Means Committee. But it seems to me we have an obligation to examine very carefully and consider the advice of Governor-elect Earl, which is when we have something this far reaching and complex in its consequences unless we can get an adjustment, it would be better for us to fight to postpone it until next year when we can have full hearings and see what we are doing, see what the effect that this will have on jobs, as well as the inequities which exist.

Mr. LEVIN. The Senator put it eloquently. This is touted as a user fee. It is not. It is an abuser tax. It abuses those States which put in more than they get back.

The President touted this as a user fee. It is not. As long as you have States that give significantly more than they get out, and they are building highways and repairing highways in other States, that is not a user fee. It is an abuser fee. It is an abuse of people who are purchasing gasoline in the donor States

I will do what I can to stop this tax from being adopted unless those inequities are corrected. I feel very strongly about it. I feel particularly strong on this day and in this economic climate, in this day when we now have a new 10.8 unemployment rate.

Mr. PROXMIRE. Twelve million Americans are out of work—12 million. There has never been anything like that since the terrible Depression of the 1930's.

Mr. LEVIN. Again, this is going to have to be corrected by the Congress on a bipartisan basis because I do not think we are going to get any change from the administration on their determination to stay the course.

I challenge the administration to tell us how long they want us to stay the course, what rate of unemployment they will finally find unacceptable, no longer part of their cure. How long? January? March? November of next year? What rate? We have not heard that.

We need some hope, we need some commonsense. We need a bipartisan solution from this Congress to fill the vacuum that is being left by this administration.

Mr. PROXMIRE. Mr. President, I understand that after the completion of the two orders, we go into morning business. Is that correct?

The PRESIDING OFFICER. The Senator is correct.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business, not to extend beyond the hour of 11:45 a.m., with statements therein limited to 5 minutes each.

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION OF TIME FOR MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I have cleared this request with the distinguished majority leader.

I ask unanimous consent that the time for morning business be extended for not to exceed 1 hour and that Senators may be permitted to speak therein.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. May I say parenthetically, at the beginning, that I am going to make another in my series of speeches on the U.S. Senate, but I am very willing to yield the floor at any time if another Senator wishes to address the body; or, at any time additional legislation is scheduled to be taken up, I will yield the floor.

THE UNITED STATES SENATE FROM 1833 TO 1840: BOOM AND BUST, SLAVERY AND FRANCE

Mr. ROBERT C. BYRD. Mr. President, it is hard to imagine that there could have been issues before the Senate during the Twenty-Third and Twenty-Fourth Congresses as monumental as the censure of President Jackson at the beginning of his second term and the equally dramatic expunging of the censure that I discussed in my last statement on the United States Senate. But a host of other matters engaged the Senate, demanding close attention. Major crises arose during Andrew Jackson's second

Footnotes at end of article.

term, and the four years that followed, under his political heir, Martin Van Buren. They involved troubles with France and Texas, a serious financial panic that sent businessmen and farmers reeling in all sections of the country, and problems with the Treasury, set in motion by the Bank issue. These and the slavery issue would require long and intense Senate sessions.

Giants like Henry Clay of Kentucky, John C. Calhoun of South Carolina, and Daniel Webster of Massachusetts still strode these halls during this period. I have spoken often of these men, and their genius, and their quarrels will infuse today's statement as well. It always helps to make historical figures come alive if we can turn to some of the Senate's fine art work, because, without our even realizing it, these men stare down upon us every day. We have only to step out into the adjacent reception room to feel the presence of all three of these Senate giants, peering at us from their "portholes."

Each time we enter this chamber through the main corridor, we also must pass muster before the keen eyes of this triumvirate. Next time, before opening the swinging doors, glance to the right, in fact, toward the Democratic Leader's office, and you will find that Calhoun, looking every bit the "Iron Man," with his mane of steely hair, Clay, "Harry of the West," looking deceptively benign, and the "Magnificent Daniel" are watching from their frames high on the east wall. Webster, in fact, also stands guard in all his sartorial splendor over the staircase right outside the president's room off this chamber. Calhoun keeps an even closer eye upon us. There he is up there (Calhoun is the last statue on the west wall, right where it joins the north wall), scowling above us, filling his niche by virtue of being a vice president, a most unhappy vice president, under Andrew Jackson. These are just some of the likenesses of the men of this era with which we live every day. Keep in mind their stern gaze as you pass before them. They are our senatorial forefathers and surely they are watching us.

In 1833, these men sparred with one another in the Old Senate Chamber down the hall. In the Senate, the first session of the Twenty-Third Congress was totally absorbed with the bitter effort to censure the president for removing federal deposits from the bank. The House, however, had its own moment of drama, which I mention only because it involved a notable former senator whom we have met before in one or more of my earlier statements. Eccentric John Randolph of Roanoke, once the scourge of the Senate, though wracked by illness, had been elected to the House for the Twenty-Third Congress. He died, however, on May 24, 1833, before the Congress convened. Shortly after the House next met, Randolph's successor, Thomas Bouldin, fifty-two, arose to announce Randolph's death. He had uttered only a few words when, as the *Congressional Globe* reports, Representative Bouldin "swooned, fell, and in a few minutes expired" on the floor of the House. It was almost as if Nature herself was thrown into perturbation by the final disappearance of so great and untrammeled a natural force as John Randolph once had been.[1]

After the drama of the censure debates, the final days of the Twenty-Third Congress were relatively colorless. No Senate session, however, with Thomas Hart Benton still smarting over the censure of his friend, the president, could be entirely lackluster. Earlier in the year, Benton's nemesis, Henry Clay, had demanded from Secretary of the Treasury, Roger Taney (pronounced tawnee), a full report of the nation's finances. At the time, Clay and his pro-Bank cohorts were deluging their Senate colleagues with doleful descriptions of the wrack and ruin brought on by the president's actions, and Clay was certain that the report would back them up. Unfortunately for him, the facts set forth were a startling contrast to the grim picture he and his followers had painted. Even more unfortunately for Clay, the administration decided that this report to the Senate deserved the greatest possible publicity.

Taney and Benton conferred at the Treasury and worked on a speech for Benton to deliver when the report was introduced. As could be expected, the reading of the Secretary's report had not proceeded far when an embarrassed Daniel Webster, the Bank's staunchest friend, arose to move that further reading be dispensed with and the report quietly sent to the Finance Committee. Benton, of course, objected. The report was read. Then the Missourian, at his flamboyant best, arose to give his speech.

"Well, the answer comes," he exclaimed. "It is a report to make the patriot heart rejoice, replete with rich information, pregnant with evidences of national prosperity. How is it received—how received by those who called for it: With downcast looks and wordless tongues. A motion is made to stop the reading." He went on" . . . a pit was dug for Mr. Taney; the diggers of the pit have fallen into it: the fault is not his; and the sooner they clamber out, the better for themselves." Regardless of any embarrassment to the conspirators, Benton declared his determination to let the country know that "never since America had a place among nations was the prosperity of the country equal to what it is this day."[2]

At the end of the first session of the Twenty-Third Congress, President Jackson, with his customary confidence in the people, set off for the Hermitage and a much needed rest. His friends, however, were not so complacent and had given orders to take nothing in the fall elections for granted. Their purpose was twofold—to at least hold the line in the Senate, and to defeat, wherever possible, any senatorial enemies who were candidates for reelection.

These elections in the fall of 1834 were the first in which the Opposition to the Jacksonian Democrats would fight under its new party name of Whig. In an earlier statement, I discussed the birth of this new party, essentially an uneasy alliance of old National Republicans, Southern states' righters, bank supporters like Webster, and disgruntled Westerners, held together by their hatred of "King" Andrew. It was John Forsyth, the caustic senator from Georgia whose services as the administation's floor leader had been of immense value, who said, when he learned of the new party's title, "It is a glorious name, and I have no doubt they will disgrace it."[3]

Let us look at a few of these Senate elections, where the Bank issue still burned, because this was the era of what historian Claude Bowers calls "political hydrophobia," when elections were vicious affairs. The elections in New Jersey and Pennsylvania were held in October, a month before most others, and they brought the Whigs their first shocks. They had rightly expected little success in Pennsylvania but much was expected from New Jersey where Senator Theodore Frelinghuysen was up for reelection. Frelinghuysen had consistently voted on the side of the Bank. When the New Jersey legislature adopted resolutions commending the president's actions and urging its senators to support him, too, Frelinghuysen and his colleague, Samuel Southard, chose to ignore them. Frelinghuysen even boasted that he and Southard had "dared to meet the frowns of their constituents," and would not "bow the knee to these instructions." Now he was before these constituents for reelection. Their verdict was unmistakable. New Jersey swept into the Jackson column with a substantial majority; Frelinghuysen was retired in favor of good Democrat Garrett Wall.[4]

Two of the most bitter Senate fights that fall were waged in Virginia and Mississippi. Virginia was anti-Bank but also anti-Jackson. The Democrats' strategy was to make the most of the unpopularity of Benjamin Leigh, the Whig candidate. Leigh had been widely disliked since his bitter fight in the Constitutional Convention against the extension of the suffrage. He was also as strongly for the Bank as the voters were against it. Every poll and

canvass revealed a majority of the people were against him. But the Whigs pulled off his election in the state legislature reflecting a flagrant disregard of the will of the people. Newspapers were flooded with resolutions and letters protesting Leigh's victory. The battle, from the Democrats' point of view, however, was only half lost, for they were supplied with ammunition proving the Whig's callous disdain for the masses that they would use to drive both of Virginia's anti-Jackson senators, Leigh and John Tyler, from office in little more than a year.[5]

In Mississippi, the Jacksonians were determined to prevent the reelection of Senator George Poindexter, once the idol of the Mississippi Democracy. Poindexter had turned on Jackson with a virulence scarcely equaled in any old-line Federalist, and cast his lot with Clay. With the adjournment of Congress, Poindexter hastened home where the Whigs had planned a series of banquets at which he was to denounce the president. The Democrats, delighted with a slashing and brilliant assault on Poindexter by young lawyer Robert J. Walker, put him up as their candidate. Within a week, Walker was engaged in one of the most spectacular canvasses Mississippi had ever known, stirring up enormous meetings of frenzied Jacksonians wherever he stopped. The outcome was the election of Walker—a victory sweet to Jackson, and all the more so since Poindexter had not only supported Clay on the Bank, but Calhoun on Nullification.[6]

Thus, the elections of 1834 were more than pleasing to the Democrats and the president. Two of Jackson's strongest senatorial foes, Frelinghuysen and Poindexter, had been swept away because of their opposition, and Leigh, who had been saved by an action in clear defiance of the popular will, would not remain in the Senate for long. The administration's forces were clearly strengthened in the Senate. In the House, the Democratic majority was reduced by eight votes, but still held a majority of 46 in that 242-member body.

Webster accepted the verdict of the election as the final statement on the Bank issue and, much to the distress and indignation of Bank president Nicholas Biddle, announced that he was through with it. Clay, whose own political interests had forced Biddle into making early recharter an issue in the first place, was also glad to dump the Bank from his shoulders. Most of their colleagues were ready to join them in abandoning the Bank as dead, but one last unfortunate incident at the very end of the Twenty-Third Congress proved that the issue was still very much alive.

The event was the attempt on the life of President Jackson at the Capitol on January 30, 1885. No other incident so well illustrates the venomous hatreds engendered by the struggles of the preceding years. Senators, editors, and the president himself were sullied in the aftermath.

Jackson had visited the House chamber to attend funeral services for the late Representative Warren R. Davis of South Carolina. The chaplain's sermon spoke to the fact that life is uncertain, particularly for the aged. "There sat the gray-haired president," wrote English visitor Harriet Martineau, "looking scarcely able to go through this ceremonial."[7] The discourse finished, Jackson filed past the casked and descended to the rotunda of the Capitol.

As Jackson entered the Rotunda, a young stranger, his face covered with a thick black beard, stood six feet away. No one noticed him draw a small, bright pistol, or aim it at the president, until they heard the shot ring through the stone chamber. Calmly, the man produced another pistol and fired again. Jackson raised his cane and started for his assailant but an army officer reached him first. The president was unharmed. By some miracle, only the caps of the pistols had exploded, the charges failing to go off.

The assailant was Richard Lawrence, an unemployed house painter, who claimed to be the rightful heir to the British throne and blamed Jackson's opposition to the Bank for his difficulty in finding work. When Lawrence was quickly dispatched to a lunatic asylum, partisans on both sides objected to the undramatic disposition of the case. Frank Blair, the rabidly Jacksonian editor of the Washington *Globe* hinted strongly that Lawrence was the tool of Jackson's enemies, part of a conspiracy. In opposition to that view, Senator John Tyler saw things in an even more sinister light and suggested that the assassination attempt may have been staged for "political effect" by Jackson's own supporters, in an effort to create popular sympathy for the president.[8]

Both sides deeply resented any suggestion of complicity or motive in the near tragedy. None could escape the fact that this was the first time an attempt had been made upon the life of a president, and it was a president who had been intemperately denounced as a tyrant, despot, and wrecker of American institutions and liberties. Soon the capital was further shocked by the linking of the name of Senator Poindexter, about to leave the Senate in defeat, with that of the assailant. On the slimmest of evidence, the idea grew in Jackson's mind that his Mississippi enemy had instigated the assassination attempt, and he spoke of his suspicions to many visitors to the White House.

Hearing of Jackson's charges, Poindexter wrote him that he would discredit the reports unless confirmed by the president, but that a failure to reply would be accepted as a confirmation. Jackson made no response. To understand the bitterness behind this feud, let us look a bit more closely at this departing senator.

George Poindexter was a genius and, before his break with Jackson, the idol of all of Mississippi, the leader of the state's Democrats, and its former governor and representative. One who knew him in his early days noted, "his mind was logical and strong; his conception was quick and acute; his powers of combination and application were astonishing; his wit was pointed and caustic, and his sarcasm overwhelming."[9] All of these qualities made him a awesome stump speaker. He had further endeared himself to Mississippians during the War of 1812 with his patriotic appeals for preparation, and, after he had aroused the people to fever heat, his volunteering as an aide to General Jackson. Along the way, it was inevitable that such a charismatic man should make enemies. So unscrupulous were his speeches, and so bitter his denunciations of his political enemies that at one time a conspiracy was formed to force him into a duel and kill him.

Nowhere in the presidential campaign of 1828 did Jackson receive more ardent support than in Mississippi where his old comrade-at-arms directed his forces. A year after Jackson's inauguration, Poindexter was in the Senate where he was expected to be a loyal supporter. Unfortunately, the feud between the erst-while friends began almost immediately. Jackson wanted to appoint a Tennessean, a neighbor of the Hermitage, to the land office of Mississippi. Poindexter protested that this patronage belonged to him. Jackson refused to yield. Poindexter prevented the confirmation. Jackson made a recess appointment and from then on the old comrades were at swords' points.

Poindexter abandoned not only the president but all the principles he had previously embraced. He stood with the Bank, favored the censure, sided with Clay, and espoused Nullification. Had his personal life been irreproachable, Poindexter might have been immune from the barbs of his new enemies, but his domestic relations had become the scandal of Mississippi. He had divorced his wife, denied the paternity of his children, and plunged into a life of reckless dissipation. His indecent remarks upon the purity of his former wife drove her family, which was rich and powerful, into the hands of his enemies as well. At the time of Lawrence's attack on the president, Poindexter was preparing to leave not only the Senate, but, with his second wife, to leave Mississippi as well.

Despite Poindexter's sullied reputation, no one except Jackson seriously suspected him of conspiring to assassinate the president. In February, only a few days before the expiration of his term and that of the Congress, he asked the Senate to investigate the charges being made in the White House against him. Three days later, a committee exonerated him from suspicion. Webster asked for the yeas and nays on accepting the committee's verdict; every senator voted yea. No matter what his personal reputation, Poindexter left the Senate with this blot on his record corrected.[10]

At the end of the Twenty-Third Congress, in March 1835, a long-simmering dispute with France came to a head and its peaceful resolution marked a major victory for Henry Clay over President Jackson.

On July 4, 1831, a treaty had been signed in Paris by which France had agreed to pay 25 million francs for outrages committed upon American commerce during the Napoleonic wars. The payments were supposed to have begun in 1832, and King Louis Philippe was most anxious to carry out the agreement. Unfortunately, the French Chambers were less than anxious to make the necessary appropriations. President Jackson waited almost two years, his anger mounting all the while, and then he ordered his Secretary of State, John Forsyth, the former senator from Georgia, to call the French minister to the State Department. The minister nervously asked if Forsyth expected a "collision," a diplomatic euphemism for war, over the issue. Forsyth said he wouldn't doubt it. Jackson ordered the Navy to prepare for sea duty and wrote a strong message to Congress on the subject.[11]

Congress received Jackson's message on December 2, 1834. It began calmly enough, restating the history of the case, but then it turned belligerent. The United States, he claimed, should insist upon "prompt execution" of the treaty, and, in case it be refused or longer delayed, "take redress into our own hands." He recommended that provisions be passed authorizing the seizure of French property to the amount of the debt, in case the next session of the Chambers refused once again to pass the appropriation.[12]

Couriers spurred their horses, perspiring firemen piled wood beneath the boilers of locomotives and steamboats to speed the message abroad in the nation. A flurry swept the commercial world. Marine insurance companies refused to assume risks resulting from a rupture with France. France recalled its minister.

Jackson's message was sent to the Senate Foreign Relations Committee of which Clay was the chairman. Clay had not been averse to reprisals against France when he was Secretary of State, but now he viewed the situation with alarm. While political considerations probably influenced him (they were never far from Clay's mind), he seems also to have been sincerely alarmed over the possibility of war. He wrote his son, Henry Jr.:

> The most engrossing subject of the Session is likely to be the President's Message relative to our French affairs. His rashness, in advising a war-like measure, without waiting for the decision of the French chambers . . . seems to be generally condemned . . . Irritation begets irritation, and I should not be surprised if, in the sequel, two gallant nations, hitherto entertaining for each other the greatest respect, shall be found unexpectedly engaged in War.
>
> The Senate has placed me at the head of the Committee of Foreign Affairs—the most responsible situation of the Senate. I shall endeavor to discharge my duty, but I confess I have less heart than ever to exert myself in public business.[13]

Despite this weary disavowal, Clay appears to have been delighted to have a hand in such an important issue. On January 6, 1835, Clay reported the Committee's resolution stating "That it is inexpedient at this time to pass any law vesting in the President authority for making reprisals upon French property . . .," and accompanied it with a report devoid of partisan animus. Clay was gratified that his mild report was accepted without a dissenting vote.[14]

The House was in a far more beligerent mood, however, and went so far as to appropriate three million dollars for the president's use in defending the country. When this came to the Senate, a storm predictably broke out. Webster and Calhoun wanted the Senate to disagree. Leigh averred that to pass such a bill would be the equivalent of saying "that the President should be made Counsul for life, or Emperor of the American people." Wright and James Buchanan of Pennsylvania, on the other hand, painted the horror of a French attack upon our defenseless shores. Calhoun retorted that there was about as much danger of the Capitol being swallowed by an earthquake before Congress met again! Clay counciled against the measure, and it went down to defeat.[15]

In April 1835, the French Chambers finally passed the necessary appropriation, but with a proviso that it not be paid unless some satisfactory explanation could be given for Jackson's harsh language. This only angered Jackson more. He recalled our minister to France, and drew up another bellicose message to Congress. Forsyth and Van Buren succeeded in softening his language a bit and worked in a denial of any intention to menace or insult France. At this juncture, England offered mediation to smooth the path, the French professed themselves satisfied, and the long awaited payments began, with interest, in the spring of 1836.

The crisis was over. And Henry Clay, according to his biographer, Glyndon Van Deusen, felt proud of his unselfish role in averting a costly war. His committee report had been spread abroad in France, where it was taken as evidence that the United States was not bent on a fight, and thus it helped keep open the pathway of negotiation.[16]

From the adjournment of the Twenty-Third Congress in March 1835, until the Twenty-Fourth Congress convened in December, its members were preoccupied with presidential politics. The struggle for position was desperate and unscrupulous. Within the Democratic party, it eventually pitted President Jackson against another former friend, Hugh Lawson White of Tennessee, who had succeeded Jackson to the Senate when he resigned in 1825. Though obscure today, White was familiarly known to his own generation as "the Cato of the Senate." Though he lacked sparkle and magnetism, the purity of his character and his fidelity to duty commanded great respect. His senatorial speeches were noteworthy for their temperate tone—rare in his generation. Always heard with attention, he was attentive to others, and he was frequently the one listener to other senators' routine speeches. No member of the Senate more impressively looked the part. Tall, slender, and well-proportioned, with a broad forehead and deep-set, serious, penetrating blue eyes, he was the embodiment of senatorial dignity. With long gray hair, brushed back from his forehead, and curling at some length on his shoulders, he appeared every inch the patriarch. This was the man who was to give Jackson, in the election of his successor, his only uneasy hours.[17]

From the beginning of Jackson's first administration, when the president, fearing an early death, had expressed a preference for Van Buren as his successor, the latter had been looked upon as the crown prince. By 1834, it was clear to the White House that the most serious challenge to these plans would come from Hugh Lawson White, considered a renegade from the Jackson camp. The once close attachment of the president and his Senate successor had cooled perceptibly in the year following the 1829 inauguration. White had become estranged by his old friend's growing intimacy with the new school of practical politics. First White had drifted into a position as independent supporter of the administration, but, by 1834, his position was one of open hostility.

By the spring of 1834, White had announced his candidacy for the Democratic presidential nomination, throwing down the gauntlet to Jackson and Van Buren in Tennessee, which

became the battleground. Though James K. Polk marshalled the support of his Tennessee newspapers behind Jackson, White did succeed in embarrassing the president by convincing the state legislature to nominate him for the presidency. But this would be the last of his successes. The Van Buren steam-roller would prove too powerful for the renegade White, or any other upstart Democrat for that matter.

When the Twenty-Fourth Congress convened in December 1835, the slavery issue reemerged with renewed vehemence. The establishment, in 1831, of William Lloyd Garrison's *Liberator* in Boston had revived the abolition movement, which got another boost in 1833 when Great Britain emancipated her West Indian slaves. At the opening of the new Congress, its members were apprehensive because of the anti-slavery and anti-abolition riots of the year before. Adding to the turmoil was the American Anti-Slavery Society, which began to deluge the South with abolitionist circulars calculated to arouse the slaves to insurrection.

It was specifically those abolitionist tracts that precipitated the renewed fight in the Senate over slavery in the winter of 1835. In July, the citizens of Charleston, South Carolina raided the post office, stole and burned a sack of the pamphlets, and informed the postmaster in New York not to forward any more to them or they would suffer the same fate. The New York postmaster laid the matter before Amos Kendall, Postmaster-General and Jackson's close friend. Kendall expressed his belief that the federal mails could not carry any matter prohibited by state laws, thus opening the door to the wholesale destruction of the incendiary documents. Though Kendall acted without legal authority, he did act with the president's blessing. In his message to Congress that December, Jackson denounced abolitionists as plotters of a civil war with all its horrors and asked that Kendall's *fait accompli* be legalized by the passage of a law prohibiting the circulation of publications intended to incite slaves to insurrection.

The howls from Northern liberals against this proposal were loud and immediate. But the proposal was even too drastic for Southerners like Calhoun, whose veneration for the Constitution guaranteed his fiery opposition. To those who accused Calhoun of opposing the measure simply because his enemy, Jackson, supported it, he bitterely replied, "I have too little regard for the opinion of General Jackson, and if he were not President of the United States, I would say for his character, to place myself in such a position." [18] Whatever his reasons, Calhoun led the debate that dragged on for months. In the end, the measure went down to defeat, with even Clay and Benton for once voting on the same side.

But the issue of the mails proved to be only the opening trumpet of the slavery issue before this Congress. It was followed by a chorus of dissent on the issue of abolitionist petitions. The question was not new. The usual practice had been to receive the petitions and to table them instantly. But in January 1836, Calhoun decided that he had had enough. When, on January 7, an abolition petition was presented by some Ohio citizens, Calhoun moved that it not be received and supported his motion with such an intemperate speech that even pro-slavery senators were alarmed. "We must meet the enemy on the frontier—on the question of receiving," he thundered. "We must secure that important pass—it is our Thermopylae." [19]

By 1836, Calhoun was far more than merely the aspiring politician who had feuded with Jackson in 1830. Personal ambition was now increasingly submerged in a cold monomania for South Carolina and for slavery. Friends like Harriet Martineau found they could no longer communicate with him. He felt, says historian Arthur Schlesinger, so deeply that he rarely heard argument, so passionately that he never forgot his responsibility. "There is no relaxation with him," cried his devoted friend Representative and later Senator Dixon Lewis of Alabama. He appeared to many to exist in an unimaginable intellectual solitude, his mind committed to his interminable obligation, focusing forever on a single shining point. He was, said Miss Martineau, "the cast-iron man who looks as if he had never been born, and never could be extinguished." [20]

Colleagues and observers testified that Calhoun was still a startling figure when he rose to speak in the Senate, with eyes burning like live coals in his pale face, hair bristling and erect, skin loose over his prominent bones, words pouring out in a closely reasoned flow. His voice was metallic and harsh, his gestures monotonous, yet his commanding eye, grim earnestness, and utter integrity, held the galleries in anxious attention. When standing in the narrow aisle of the Senate, bracing himself against the desks, he averaged perhaps one hundered eighty words a minute of terse and unconquerable argument.

Calhoun was still the supreme intelligence among the statesmen of his day. Clay relied on richness and audacity of feeling, Webster on mellifluous rhetoric, Benton on the sheer weight of facts, and all indulged in shameless orgies of verbiage. But Calhoun's speeches were stripped bare, arguing the facts alone with an iron logic. Nourished on Aristotle, Machiavelli, and Burke, he displayed the uncanny ability to cut quickly through to the substance of the issues before the Senate. [21]

This was the man whose proposal for rejecting abolition petitions still hung fire when, four days later, James Buchanan presented a petition even more odious to him. Buchanan stepped forward to offer a memorial from a group of Quakers in Pennsylvania praying for the abolition of slavery in the District of Columbia—an extremely delicate matter because it lay entirely within the power of the Congress to act in this case. Buchanan made it quite clear that "I entirely dissent from the opinion which they express," but urged that the memorial from his constituents deserved to be received. Calhoun, however, plunged the Senate into a heated two-month debate on whether it should be received at all. [22]

Calhoun ultimately lost again (though the request contained in the petition was rejected), but the intensity of the debate stirred new fears on both sides and widened the gap between supporters and opponents of slavery. Abolition entreaties had flooded the House as well, but there efforts like Calhoun's met with more success. The result was the infamous "gag rule" banning all such petitions and the beginning of the courageous crusade for free speech by sixty-nine-year-old John Quincy Adams, who, two years after his term as president had ended, returned to Washington to represent Massachusetts in the House for the next seventeen years.

I have mentioned James Buchanan several times thus far and I would like to take a closer look at the freshman senator from Pennsylvania. Buchanan arrived in the Senate after serving ten years in the House and two years as Minister to Russia. During his first four terms in the House, Buchanan had been a Federalist, and many of the Jacksonians, whom he joined in 1828, doubted the sincerity of his conversion to the Democratic faith. During the Twenty-Third and Twenty-Fourth Congresses, however, Buchanan proved himself a loyal Democrat by joining Senators Wright of New York, William King of Alabama, and Benton as defenders of the president in the Senate.

At forty-two, Buchanan was a heavy-set bachelor, the only bachelor, in fact, to become president. The story goes that in 1819, while still a struggling young lawyer, Buchanan had become engaged to a belle whose father was one of this country's first millionaires. A combination of the father's objections, gossip that Buchanan was interested chiefly in her fortune, and the young swain's apparent neglect of his fiancee in favor of clients led to a broken engagement, followed by the young lady's sudden death. Buchanan resolved to honor

her memory by remaining a bachelor for the rest of his days.

Buchanan had a large head and pudgy features. He usually wore a high-collared coat to conceal a neck scar. And an eye defect caused him to tilt his head slightly forward and to one side so that he always seemed to be listening intently and with great concern. His oddly cocked head sometimes got him into trouble. As one of his biographers noted, his "mere appearance conveyed so definite an impression of assent and approbation that many people, on early acquaintance, sincerely believed that they had completely captivated James Buchanan and reciprocated by attentions to him which he attributed to traits more complimentary to him than a wry neck." [23]

Still another dimension was added to the increasingly volatile slavery issue in the final days of the Twenty-Fourth Congress. Though the question of Texas would chiefly preoccupy future Congresses, Calhoun used an early reference to the turmoil in the Southwest to further alienate North and South (Texas, under Sam Houston, friend of both Jackson and Benton, had declared its independence from Mexico after the Battle of San Jacinto on April 21.) Calhoun enraged abolitionists and frightened many lukewarm Northerners by calling for the immediate annexation of Texas in order to extend the reach of slavery. Though immediately pounced upon by Benton, and though Calhoun's motion lost, a new and troubling dimension had been added to the festering slavery question.

In the midst of this turmoil, the presidential elections had taken place in the fall of 1836, between the first and second session of the Twenty-Fourth Congress. After all the preelection jockeying, the actual campaign was hardly as exciting as that of 1832. The Whigs were still only a loose coalition and could not choose a single candidate. Instead, various elements put up a number of individuals, such as Senators White and Webster, with strong followings, hoping to throw the election into the House.

None of these candidates had a chance. The Democrats met in Baltimore and unanimously chose Jackson's hand-picked successor, Martin Van Buren. As the results began to come in that fall, it was clear that the "Sly Fox," would accede to the White House.

Van Buren was content with his victory margin of forty-six electoral votes. And Andrew Jackson, whose long reign was now nearly over, was content as well. He finally had the satisfaction of seeing Senator Benton's annual resolution to expunge the 1834 censure vote of the president succeed at last. Clay, Calhoun, and Webster fought against it to the end, as I noted in my last statement, but the tide of Jackson's popularity had finally engulfed even the Senate.

Andrew Jackson left his protégé, Martin Van Buren, and his other followers with a warning: "Of all things, never once take your eyes off Texas, and never let go of fifty-four-forty." [24] Both the South and the Southwest would indeed prove troublesome in the years to come, but Jackson badly misjudged the real and nearest threat to national stability. The nation was then poised on the brink of financial disaster. Unfortunately, Jackson would have to own up to the fact that his real legacies to his friend Van Buren were the makings of the worst depression in the nation's sixty-year history and a hopeless mire of monetary problems.

The financial bubble that burst during the Twenty-Fifth Congress had been building for at least two years. On June 23, 1836, after Nicholas Biddle's Bank of the United States had finally become merely a state bank, the Senate and House had passed the Deposit Act, requiring the Secretary of the Treasury to select one or more banks in each state and territory to receive federal deposits and perform the services previously provided by the Bank of the United States. The stability of the country's economy, however, had been gravely shaken by the disappearance of the old National Bank and, with government money pouring into a wide variety of local banks, an uncontrolled inflation began.

These banks began to issue huge amounts of paper money against the new funds in their vaults, and prices began to skyrocket. Hoping to curb the spiral, Jackson had issued the "Specie Circular," drafted for him by Senator Benton, whose hard-money views were soon to win him the name "Old Bullion Benton." The Specie Circular announced that, from that point on, to curb the "ruinous extension" of paper money, the government would accept only specie—gold or silver—in payment for public lands.

The circular did burst the inflationary bubble but started, in its place, a financial panic. State banks did not have enough specie to cover the paper money; loans could not be covered; land prices plummeted.

All this had happened while Congress was out of session. When it returned in December 1836, the Senate Whigs put forth a resolution demanding repeal of the circular. By March 1, 1837, that measure had passed both houses, but Jackson, with only three days left in office, used a pocket-veto to kill it. Jackson, by the way, was the first president to veto bills of Congress for other than "Constitutional" reasons.

Thus, the stage was set for financial disaster. Eight weeks after Van Buren entered the White House, the Panic of 1837 exploded with full fury. On the morning of May 10, 1837, a card was pinned to the door of a New York bank, reading simply, "Closed Until Further Notice." By afternoon, New York Whig Philip Hone, watching the gathering mob, heard the screams of trampled women and curses against Jackson and Van Buren.

The Panic of 1837 was not a slump of a year's duration. It was the depression of an era. It was not national; it was world wide. Depression in England drastically lowered the price paid for American cotton, for example. It climaxed the dizziest, fastest, richest boom era the young Republic had ever known. Slowly the great, evil flood moved over America. It took almost a year for this tide of woe to spread across the Southern back-country, but when it did, the ruin was complete. It engulfed the Mississippi delta country, leaving behind a trail of empty plantation houses and barns, and crudely lettered signs flapping from trees, "Gone to Texas." It ravaged the country from New Orleans to Cincinnati, where hungry mobs smashed down doors, tore apart furniture, and looted the strong-boxes of banks and brokerage offices. Bankruptcies multiplied, unemployment rose, and interest rates mounted. Eight hundred fifty banks were closed; three hundred forty-three never to reopen again. [25]

The cries of the ruined were not long in reaching Washington. Van Buren reluctantly called Congress into session three months early. Henry Clay, like the other Whigs, was convinced that the distress was the result of the Democrats' policies, and thus, that it was up to the Democrats, not the Whigs, to furnish a program of relief. They expectantly awaited the new president's economic proposals. When the "Sly Fox" sent his message up to the Hill, it attributed the hard times primarily to undue business expansion, distribution of the surplus, and the drain of gold abroad. Van Buren flatly refused to consider reestablishing a National Bank. The main feature of the message was the proposal that the Treasury keep its own money in its own hands—the so-called "Sub-Treasury" or "Independent Treasury" plan. Other than this, Van Buren urged the lawmakers to allow the depression to run its course.

Clay and the Senate Whigs pronounced the program barren. Daniel Webster accused the president of "leaving the people to shift for themselves." While many of Van Buren's measures were essential to staunch the flow of money, the Whigs, in a purely partisan move, refused to support them. They took their main stand against the Sub-Treasury bill and were joined by conservative Democrats such as Nathaniel Tallmadge of Van Buren's own state of New York and

William Rives (pronounced ree-ves) of Virginia. But, since the regular Democrats still controlled the Senate, they were able, under the leadership of party stalwart Silas Wright, New York's other senator, to beat back the forces of Clay and Webster. The House, however, due to a combination of Whigs and conservative Democrats, voted down the bill and a long struggle began.[26]

Van Buren recommended the Sub-Treasury plan again in his December message to Congress, and on January 16, 1838, Silas Wright reported it out of the Finance Committee. Few positions had been altered in the interval. Clay pounced on it immediately, blustering "that all the calamities of war with the most potent power on earth would be a blessing compared with the consequences of this measure." By an amazing feat of mental legerdemain, he even claimed that it was both dangerous because it centralized power, and that it promoted disunion.[27]

On February 19, Clay spoke for four and a half hours against the bill. This speech included a bitter attack on Calhoun, who, to the surprise of friends and foes alike, had come out in favor of the Sub-Treasury bill. The South Carolinian's Whiggery, it seemed, had been based as much upon his hatred of Jackson and his hope of dominating the Whig party as it was on principle. Dominating Jackson had proved impossible and now Calhoun could see that to remain in an uneasy coalition with Clay and Webster would probably mean his own political annihilation. Calhoun's support for the bill signaled his return to the Democratic fold, and the clash between Calhoun and Clay, which followed hard upon Clay's speech, marked the resumption of warfare between the two men.[28]

Despite the vigorous opposition of Clay and Webster, the Sub-Treasury bill again passed the Senate in March 1838, by a vote of 27 to 25. But in the House, it again went down to defeat. Silas Wright was very depressed. Even in January, the bill's chief defender had complained of "an unusual visitation of hypocondria" that he was unable to shake off, and in August, after the session had ended, he wrote, "I have experienced a sort of mental apathy . . . I have been compelled to devote myself so entirely to the questions now at issue before the country for more than a year that they have become sickening almost to disgust and I find it difficult to rouse myself up to the point of attempting to think upon them." Other administration defenders were as tired as Wright. As James Buchanan said during the spring session, the endless debate had worn the subject "thread-bare," and most of the senators left the chamber whenever the Sub-Treasury bill was being discussed.[29]

Reintroduced and fought over each year, the Independent Treasury Act finally became law on July 4, 1840, only to be repealed the next year by a legislature dominated by Whigs, and then reinstated by the Democrats in 1846. The scheme established regional subtreasuries with their own vaults, collecting all federal receipts, disbursing all payments in silver and gold, and serving the financial needs of the different sections of the country. It was retained, essentially unchanged, as the organizational basis of the nation's fiscal system until the passage of the Federal Reserve Act in 1913.[30]

Before moving on to the raucous election of 1840 that brought to a close this period in the Senate's history, I would like to pause, as I have occasionally in previous statements, to look at some of the less monumental, but perhaps no less important, events in the Senate's own internal development during this period. For, while major issues were debated and catastrophes like the Panic of 1837 were dissected, bills and resolutions were introduced and rules were adopted and changed that shaped and directed the day-to-day life of the Senate and affected the lives of our predecessors.

Physically, the Senate was growing. Two new states joined the Union during this period, raising the number of senators from 48 to 52. To preserve the delicate balance established in the wake of the Missouri Compromise, Arkansas, a slave state, had been admitted in 1836, followed by Michigan, a free state, in 1837. All four of the new senators turned out to be faithful Democrats, much to the joy of the administration.

The Senate chamber was filling up not only with senators but with reporters, the predecessors of our observers up in the gallery above. There was a great flurry of activity among the "scribblers" that made its way into the Senate rules. In earlier statements, I have discussed the opening of the Senate chamber to observers and the first admittance of designated reporters into its midst to record the Senate's activities in 1802. During the next few years, these reporters and those who had come to join their ranks were seated in the eastern gallery, above the presiding officer, and this was the arrangement in 1835.

On February 27, 1835, Senator Alexander Porter of Louisiana introduced a motion that a committee of three be appointed to look into "the expediency of so arranging the seats in the Senate chamber as will promote the convenience of members, and facilitate the dispatch of public business." Among the eventual recommendations of that committee was the following, "That the reporters be removed from the eastern gallery, and placed on the floor of the Senate, under the direction of the Secretary." The proposal was approved during the Twenty-Fourth Congress, and thus, for the first time specific provision was made for the press in the Senate's Standing Rules.[31]

This was the situation when the Senate eyed the press in 1838 as it was considering changes in Rule 47, which listed the persons who might be admitted to the Senate floor. Buried in the changes was the following provision permitting ". . . two reporters for each of the daily papers, and one reporter for each tri-weekly paper published in the City of Washington . . ." to be seated in the chamber.[32] The press, both in Washington and the rest of the country, apparently overlooked this change, which was adopted on the last night of the session in the usual close-of-session rush. But not for long. It slowly dawned on them that all but the Washington press were to be excluded from the chamber where, before, many had sat. Rumor had it that the measure had been slipped through by Senator John Niles of Connecticut, who loathed the press.

The out-of-town reporters had mobilized by the second session of the Twenty-Fifth Congress and they convinced new Senator John Norvell of Michigan to present their memorial, protesting that:

> By the rule of the Senate they are deprived of the opportunity and privilege of obtaining information of Congressional proceedings for their respective papers; that the provision of the Senate exclusively furnishing the facilities they ask to city reporters, does not furnish the people of the country with full reports of what takes place until several days after the date of such transactions . . .; and praying that the Senate may assign them such seats on the floor or in the galleries, as may enable them to discharge their duties to those whose agents they are.[33]

In January 1839, the committee to which the memorial was referred proposed that the front seats of the eastern gallery be set apart for the out-of-town reporters as well as the local ones. The report generated a debate that runs for almost four pages of the *Congressional Globe* and elicited some rather violent remarks from Senator Niles:

> He was somewhat surprised at a proposition that the body should sanction, and in some manner endorse, the vile slanders that issue daily from these letter writers by assigning them seats within the chamber. Who were these persons who styled themselves reporters. Why miserable slanderers, hirelings hanging on to the skirts of literature, earning a miserable subsistence from their vile and dirty misrepresentations of the proceedings here, and many of them writing for both sides . . . Perhaps no member of that body had been more misrepresented and caricatured than himself by those venal and profligate scribblers, who were sent here to earn a disreputable living by catering to the depraved appetite of the papers they work for . . .[34]

Apparently, many Senators agreed with Senator Niles. His motion to table the memorial finally passed 20 to 17.

The reporters were not about to take such insults lying down. Niles and the other supporters of their exclusion were excoriated in editorial after editorial. Here is just a sample of their invective:

> The bitter hostility of such men as Niles to a Free Press is easily accounted for as it tears the Lion's Skin from the Jackass, and distinguishes the braying of that stupid beast from the roar of the Noble Monarch of the Wood.
>
> . . . then for Doctor Niles of Connecticut. Nature made him an ostler (stableboy). Chance, and his own roguery made him a United States Senator . . . Never was fellow meaner than this same Niles who with the fancies of a dolt makes pretensions to the intellect of the most talented man in the country. His manners are bad, and his breeding worse . . .
>
> On Saturday last the poor reporters who had petitioned for a separate seat in the eastern gallery of the Senate, were rowed up Salt River by the locofoco (radical Democrats) members, who seemed to be in a terrible fury with the letter writers for not allowing them to have more talent and decency than they possess.[35]

Despite their outrage, here the matter stood at the end of the Twenty-Fifth Congress. For the next 3 years, out-of-town reporters, aided by local journalists, used all sorts of subterfuges to get around this exclusionary rule, but the rule stuck. It was not until 1841, when the Whigs became a majority in the Senate, that the rule would be changed and the doors were once again opened to the reporters.

As the 1840 elections approached, the Senate once again became infused with presidential fever. Both Clay and Webster hoped to receive their party's nomination at the Whig convention in Harrisburg.

Webster was fifty-seven-years-old in 1839, and had begun to take on the appearance of a venerable statesman. The Webster paunch had become as noticeable as the famous dome and the fierce brows. His steps was heavier, his manner even more deliberate. In his customary dress—the black, long-tailed coat with gold buttons and buff-colored vest and pantaloons, he moved through the streets of Washington and Boston like a revolutionary frigate under full sail.

Unlike his rival, Clay, whose feelings were always close to the surface and who was addicted to profane tantrums in times of stress and disappointment, Webster was sanguine, almost glacial, in his ability to accept temporary defeat. As one of his biographers, Irving Bartlett, points out, even before Van Buren's 1837 inauguration, Webster had begun to plan for 1840. In a candid letter to a supporter, he outlined his plans for the next four years. He would leave the Senate for two years. (He did not—agreeing to stay after much imploring by New England businessmen.) During this period he would travel, keep himself before the public, and at the same time get his personal financial difficulties under control so that, upon his return to political life he would not have to divide his efforts between the Senate and his very lucrative law practice. Meanwhile, he reasoned, Van Buren would have revealed enough of the vulnerability of administrative policies to be effectively attacked.[37]

Clay, however, was also busy laying his plans. From the beginning of Van Buren's administration, he too had pictured himself as the "Little Magician's" opponent in 1840. Yearning for the nomination manifested itself in his letters, and as the summer of 1837 wore on, he discovered prospects of being "again forced into the Presidential arena." It didn't take much forcing. Clay's satisfaction over evidences of support was unconcealed.[38]

As the Van Buren administration wore on, the Senate Whigs saw abundant reason to believe that 1840 would be their year. There was certainly no better time to be in the opposition, they believed, than in periods of financial depression. A Whig victory seemed almost inevitable. But it was not clear what role the two sparring Whig senators would take. Their colleagues looked on with interest as they courteously greeted each other day after day.

To their tremendous disappointment, Clay and Webster were bypassed at the Whig convention in Harrisburg. Wanting desperately to win, and fearing that both men were too controversial, the Whigs decided to follow the Democrats' example of selecting a miliatry hero. They nominated Ohio's General William Henry Harrison of the Battle of Tippecanoe and War of 1812 fame, who had served in the Senate from 1825 to 1828. "I am the most unfortunate man in the history of parties," mourned Clay, "Always run . . . when sure to be defeated, and now betrayed for a nomination when I, or any one, would be sure of an election."[39] Both Webster and Clay, their own ambitious thwarted, might have had excuse for sulking in their separate tents, but neither did so. both had dreams of leading a Whig-dominated Senate and, like gallant troupers, toured with the grand Whig bandwagon.

The campaign of 1840 was the most ludicrous of any in American history up to that time. The Whigs presented no platform and carefully hid any views Harrison might have had on the issues. Instead, they whipped up an emotional circus, promoting the myth that Harrison, a man of means whose wealthy father had been a signer of the Declaration of Independence from Virginia, had been born in a frontier log cabin and raised on hard cider. They portrayed him as more a man of the people than the effete little man in the White House. As his partisans sang songs like "Tippecanoe and Tyler Too," (John Tyler, recent senator from Virginia, was Harrison's running mate), Harrison overwhelmed Van Buren and the Democrats.

The election of 1840 brought not only the nation's first Whig president, but also Whig majorities in the Senate and House. It inaugurated a decade of national expansion and of increased sectional tensions. This was to be a decade of political warfare, between the Whigs and the Democrats, between the president and the Congress, and finally between the North and the South. The principal battleground was to be the floor of the United States Senate, as we shall see in my next statement.

Mr. President, I ask unanimous consent that various footnotes be printed in the RECORD.

The PRESIDING OFFICER (Mr. DURENBERGER). Without objection, it is so ordered.

The material follows:

Mr. ROBERT C. BYRD. Mr. President, I believe there is about 3 minutes left in morning business.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. HAYAKAWA). Without objection, it is so ordered.

VIRGIN ISLANDS TAX REDUCTION

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate Calendar No. 936, H.R. 7093.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Alaska?

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, that matter has been cleared with Mr. LONG and others on this side of the aisle, so there is no objection.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 7093) to amend the Internal Revenue Code of 1954 to reduce the rate of certain taxes paid to the Virgin Islands on Virgin Islands-sourced income.

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Finance with an amendment, as follows:

On page 4, after line 14, insert the following:

SEC. 2. CONTINUED PAYMENT OF DISABILITY BENEFITS DURING APPEAL.

(a) Section 223 of the Social Security Act is amended by adding at the end thereof the following new subsection: "Continued Payment of Disability Benefits During Appeal

"(g)(1) In any case where—

"(A) an individual is a recipient of disability insurance benefits, or of child's, widow's, or widower's insurance benefits based on disability,

"(B) the physical or mental impairment on the basis of which such benefits are payable is found to have ceased, not to have existed, or to no longer be disabling, and as a consequence such individual is determined not to be entitled to such benefits, and

"(C) a timely request for a hearing under section 221(d), or for an administrative review prior to such hearing, is pending with respect to the determination that he is not so entitled,

such individual may elect (in such manner and form and within such time as the Secretary shall by regulations prescribe) to have the payment of such benefits, and the payment of any other benefits under this Act based on such individual's wages and self-employment income (including benefits under title XVIII), continued for an additional period beginning with the first month beginning after the date of the enactment of this subsection for which (under such determination) such benefits are no longer otherwise payable, and ending with the earlier of (i) the month preceding the month in which a decision is made after such a hearing, (ii) the month preceding the month in which no such request for a hearing or an administrative review is pending, or (iii) June 1983.

"(2)(A) If an individual elects to have the payment of his benefits continued for an additional period under paragraph (1), and the final decision of the Secretary affirms the determination that he is not entitled to such benefits, any benefits paid under this title pursuant to such election (for months in such additional period) shall be considered overpayments for all purposes of this title, except as otherwise provided in subparagraph (B).

"(B) If the Secretary determines that the individual's appeal of his termination of benefits was made in good faith, all of the benefits paid pursuant to such individual's election under paragraph (1) shall be subject to waiver consideration under the provisions of section 204.

"(3) The provisions of paragraphs (1) and (2) shall apply with respect to determinations (that individuals are not entitled to benefits) which are made on or after the date of the enactment of this subsection, or prior to such date but only on the basis of a timely request for a hearing under section 221(d), or for an administrative review prior to such hearing."

SEC. 3. PERIODIC REVIEWS OF DISABILITY CASES.

Section 221(i) of the Social Security Act is amended—

(1) by inserting "(1)" after "(i)";

(2) by inserting ", subject to paragraph (2)" after "at least every 3 years"; and

(3) by adding at the end thereof the following new paragraph:

"(2) The requirement of paragraph (1) that cases be reviewed at least every 3 years shall not apply to the extent that the Secretary determines, on a State-by-State basis, that such requirement should be waived to insure that only the appropriate number of such cases are reviewed. The Secretary shall determine the appropriate number of cases to be reviewed in each State after consultation with the State agency performing such reviews, based upon the backlog of pending reviews, the projected number of new applications for disability insurance benefits, and the current and projected staffing levels of the State agency, but the Secretary shall provide for a waiver of such requirement only in the case of a State which makes a good faith effort to meet proper staffing requirements for the State agency and to process case reviews in a timely fashion. The Secretary shall report annually to the Committee on Finance of the Senate and the Committee on Ways and Means of the House of Representatives with respect to the determinations made by the Secretary under the preceding sentence.".

(b) The amendments made by subsection (a) shall become effective on the date of the enactment of this Act.

SEC. 4. MEDICAL EVIDENCE.

(a) Section 221 of the Social Security Act is amended by adding at the end thereof the following new subsection:

"(j) In any case of a medical review of the continuing disability of an individual, before making a final determination with respect to any such individual, the Secretary shall make every reasonable effort to seek and obtain all relevant medical evidence from all persons or institutions which have diagnosed or treated such individual with respect to his impairment or impairments within the preceding 12-month period.".

(b) The amendment made by subsection (a) shall become effective on the date of the enactment of this Act.

SEC. 5. REPORT BY SECRETARY.

Section 221(i) of the Social Security Act (as amended by section 3 of this Act) is further amended by adding at the end thereof the following new paragraph:

"(3) The Secretary shall report semiannually to the Committee on Finance of the Senate and the Committee on Ways and Means of the House of Representatives with respect to the number of reviews of continuing disability carried out under paragraph (1), the number of such reviews which result in an initial termination of benefits, the number of requests for reconsideration of such initial termination or for a hearing with respect to such termination under subsection (d), or both, and the number of such initial terminations which are overturned as the result of a reconsideration or hearing.".

Mr. STEVENS. Mr. President, I ask unanimous consent that there be a time agreement of 10 minutes equally divided on this bill.

Mr. ROBERT C. BYRD. Will the Senator make that 30 minutes?

Mr. STEVENS. We will make that 30 minutes at the request of the minority leader.

Mr. DOLE. There is an amendment that is going to be accepted.

Mr. STEVENS. And I ask unanimous consent that the time agreement be in the usual form and that the time limit on the amendment be 15 minutes on a side.

Mr. DOLE. All right.

Mr. ROBERT C. BYRD. Only one amendment, one or two?

Mr. STEVENS. How many amendments are there?

Mr. DOLE. One.

Mr. STEVENS. The only amendment to be in order is the amendment agreed to by the Senators from Kansas and Michigan.

Mr. ROBERT C. BYRD. So there will be no surprise amendments that may come in here.

Mr. STEVENS. Mr. President, that will be 15 minutes on each side on an amendment to be offered by the Senator from Kansas and agreed to by the

Senator from Michigan and 30 minute time limit on the bill with no other amendments to be in order.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, on September 28, the Finance Committee approved several disability insurance amendments to H.R. 7093. They deal with two problems in the continuing disability investigation (CDI) process mandated by the Social Security Disability Amendments of 1980—the lack of benefits during the appeals process and the rate at which States must review beneficiaries. There are four provisions in all, two of which were contained in S. 2942, introduced by Senator Cohen and others.

Briefly, the bill would continue disability insurance payments and medicare coverage, at the individual's option, through the hearing decision issued by the administrative law judge (ALJ). Repayment would be required if the ALJ upholds the decision to terminate benefits. This provision would apply to individuals who have appeals pending at the time of enactment and to those who are terminated and appeal before July 1, 1983. However, the committee bill does not allow for any payments to be made under this provision beyond July. I will offer an amendment to improve the way this is sunsetted.

Also, the bill would authorize the Secretary of Health and Human Services to slow the continuing eligibility reviews, taking into consideration State agency workload and processing time. The Secretary would be authorized to grant waivers only to States that demonstrate a good faith effort to meet their staffing needs and process the reviews in a timely fashion.

Two additional provisions are included which would require the Secretary to gather medical evidence over the 12-month period preceding review—a practice recently adopted by the administration—and also require the Secretary to report to Congress semiannually on the number of terminations and appeals requests.

These amendments do not, of course offer a solution to the key structural problems in the disability insurance program—such as the lack of uniformity in decisionmaking between State agencies and ALJ's. Nor do they deal with other substantive issues—such as whether the individual must have experienced medical improvement before he can be terminated from the rolls. However, these amendments do provide an emergency solution to the suffering of families who are temporarily denied benefits pending an ALJ hearing. Among the many options, it seems to be one with broad bipartisan support. Since the provision allowing benefits to be continued past termination is sunsetted, the committee's bill acknowledges that futher substantive legislation will be required.

REASONS FOR ACTION NOW

In the early stages of the periodic review process, States have been terminating benefits in approximately 45 percent of the cases reviewed. Of those cases which appeal, approximately 65 percent have benefits reinstated by an administrative law judge. This wide variation between the decisions made by State agencies and ALJ's is a long recognized problem and stems from a number of factors. For example, the beneficiary can introduce new medical evidence at the ALJ hearing; the ALJ hearing is the first face-to-face contact between the reviewed beneficiary and the decisionmaker; and the standards of disability used by State agencies and ALJ's differ in some important aspects.

The lack of uniformity of decisionmaking is a fundamental problem which must be dealt with administratively and which must be carefully considered when the committee takes up substantive legislation. In the meantime, some emergency relief is clearly warranted for workers who are having benefits terminated by State agencies and then—in more than half the cases appealed—having their benefits reinstated by an ALJ.

The committee's decision to extend benefits during the appeals process should not be considered a judgment that it disagrees with the standards being applied by the State agencies. Likewise, this legislation does not in any way represent a reversal of the 1980 mandate that the Social Security Administration work diligently to remove ineligibles from the benefit rolls. Rather, it is a temporary expedient to help deal with some of the problems incident to the implementation of that mandate.

Another problem addressed by this legislation is the unavoidable difficulty some States are experiencing in implementing the periodic review procedures. The bill authorizes the Secretary to take into account the capabilities and workloads of the State agencies in assigning cases to the States for review. To some extent, actions already implemented administratively may have relieved the situation in some States, but this bill will make clear the Secretary's authority to provide such relief even if this means that the statutory schedule of reviewing one-third of the caseload each year cannot initially be met. We consider it essential, however, that the intent of the 1980 amendments not be violated. The accuracy of the decision granting or terminating DI benefits must be achieved in all States by the prompt implementation of a thorough program of periodic review.

It should be noted that the Secretary of Health and Human Services and the Social Security Administration have already taken a number of important steps to respond to many of the criticisms which have been leveled against the CDI process. I believe these are important steps—particularly the new face-to-face interviews for beneficiaries at their local social security offices. I urge the administration to continue its efforts to improve the quality and the accuracy of the reviews.

BACKGROUND ON THE 1980 AMENDMENTS

I would like to take this opportunity to remind my colleagues why we have a continuing disability investigation review process. During the 1970's, the Congress became alarmed at the rapid growth of the disability rolls and the rising cost of the program. Between 1970 and 1980, the cost of DI rose fivefold, from $3.3 billion to $15.8 billion. Between 1970 and 1977 alone, the number of disabled workers on the rolls almost doubled, from 1.5 million to 2.9 million. Counting spouses and children, the benefit rolls swelled from 2.6 million to 4.8 million people. Almost two-thirds of the people who came on the rolls since the beginning of the program in 1957 came on between 1970 and 1981.

The DI program, as a result, was seriously underfinanced and deficits were reported by the Social Security Board of Trustees on 15 occasions. Furthermore, the Congress learned that the then existing continuing review criteria and procedures were inadequate and resulted in the continued payment of benefits to many persons who had medically or otherwise recovered from their disability.

The Social Security Disability Amendments of 1980 were enacted as a response to this rapid growth in cost and in the number of beneficiaries. The amendments passed the Senate by a vote of 87 to 1 and had the express purpose of weeding out ineligibles and controlling program costs.

A number of significant reforms in the act tightened administrative oversight and control of the DI benefit rolls. The provision of current concern mandated that, effective January 1, 1982, DI beneficiaries must be reexamined at least once every 3 years to determine their continuing eligibility for benefits. This continuing disability investigation requirement specifies a minimum level of review.

SSA accelerated the CDI process in response to SSA quality control studies and also a GAO report which revealed a significant number of ineligibles on the rolls. SSA began the new review in March 1981 rather than waiting until January 1982, using procedures to target reviews on those most likely to be ineligible. It is estimated that the periodic review will save the trust funds $700 million in fiscal year 1983 and $1 billion in fiscal year 1984.

A DIFFICULT SITUATION

Although allowance rates vary widely among States, recent data indicates that only about 54 percent of cases reviewed are found to continue to meet eligibility requirements. In other words, 46 percent of those reviewed are being terminated from the benefit rolls. For those individuals that appeal, administrative law judges are reversing the State agency decisions—and reinstating benefits—in 60 to 65 percent of the cases.

This is clearly a difficult situation: Some States are feeling hard pressed to meet the workload demands of the stepped-up review. People who have been on the rolls for many years—having never been reexamined—are now coming up for review and having benefits terminated. Many people are confused about the process and the importance of providing sound medical evidence on their condition. Significant discrepancies between State agencies—responsible for performing CDI's and determining eligibility—and the ALJ's is causing great concern about the reliability and fairness of the disability determination process.

It is my hope that this emergency legislation will provide us the opportunity to consider carefully the major problems in the disability determination and appeals process in the Finance Committee.

I might point out in closing that there are no easy or obvious solutions to these problems. H.R. 6181, introduced by Representatives PICKLE and ARCHER, was marked up in the House Ways and Means Committee last March and was reported out of the committee on May 26. The bill has not yet made it to the House floor. Opinions vary widely and in all these months a consensus has not been reached. Forging a consensus will take time and cooperation.

Mr. President, before I ask unanimous consent to print in the RECORD a more detailed description of the disability provisions, I would like to express my thanks, and those of Senator ARMSTRONG, chairman of the Social Security Subcommittee, to the dedicated group of Senators who have devoted so much time to working out a consensus on this limited response to the problems created by the new continuing disability investigation process. Senators COHEN and LEVIN, who became interested in the CDI procedure as a result of oversight hearings they held in the Government Affairs Subcommittee last May, approached the problem in a compassionate yet reasonable and constructive manner. They, along with Senators HEINZ and DURENBERGER on the Finance Committee, were instrumental in gaining support for these provisions. Senators METZENBAUM and RIEGLE were also actively involved in the deliberations.

Now, Mr. President, I ask unanimous consent to print in the RECORD a detailed description of the disability provisions in the bill and the amendment.

There being no objection, the material ordered to be printed in the RECORD, as follows:

PROVISIONS RELATING TO SOCIAL SECURITY DISABILITY INSURANCE (DI)

CONTINUATION OF DI BENEFITS TO CERTAIN INDIVIDUALS PURSUING APPEAL

Present law.—A social security disability insurance (DI) beneficiary who is found by the State agency to be no longer eligible for benefits continues to receive benefits for two months after the month in which he ceases to be disabled. (As an administrative practice, individuals are not generally found to be "not disabled" no earlier than month is which the agency makes the termination decision.) The individual may request a reconsideration of the decision and, if the denial is upheld, he may appeal the decision to an Administrative Law Judge (ALJ). The individual is not presently eligible for benefits during the appeals process. However, if the ALJ reverses the initial termination decision, benefits are paid retroactively.

Explanation of provision.—The Committee amendment would continue DI benefits and medicare coverage (at the individual's option) through the month preceding the month of the hearing decision for terminated beneficiaries pursuing an appeal. These additional DI payments would be subject to recovery as overpayments, subject to the same waiver provisions now in current law, if the initial termination decision were upheld.

Effective date.—This provision would be effective for termination decisions occurring between the date of enactment and July 1, 1983, but in no case would payments be made for months after June 1983. Cases now pending an ALJ decision would also be covered by this provision, although lump sum back payments would not be authorized. Individuals terminated before the date of enactment who have not appealed the decision would qualify for continued benefits only if they are still within the allowable period for requesting a review.

SECRETARIAL AUTHORITY TO CONTROL FLOW OF CONTINUING DISABILITY INVESTIGATION REVIEWS

Present law.—As mandated by the Social Security Disability Amendments of 1980, all DI beneficiaries except those with permanent impairments must be reviewed at least once every 3 years to assess their continuing eligibility. Beneficiaries with permanent impairments may be reviewed less frequently. The provision in present law specifies a minimum level of review.

Explanation of provision.—The Committee amendment would provide the Secretary of Health and Human Services the authority to slow—on a State-by-State basis—the flow of cases sent to State agencies for review of continuing eligibility. The Secretary would be instructed to take into consideration State workload and staffing requirements, and would be authorized to slow reviews only in States that demonstrate a good faith effort to meet staffing requirements and process claims in a timely fashion.

Effective date.—This provision would be effective on enactment.

MEDICAL EVIDENCE REQUIREMENT

Present law.—Although current law does not specify a time period for the collection of medical evidence, current procedures, detailed in the guidelines used by State agencies, require the Secretary to seek to obtain all medical evidence from all persons or institutions which have diagnosed or treated the individual within the 12-month period preceding the review of an individual's continuing eligibility.

The adoption of this procedure was announced by the Administration in May, 1982. Previously, any requirements as to the length of the period over which medical evidence should be sought were left up to the States. For some individuals, medical evidence was gathered over more than a 12-month period. For others, medical evidence was gathered over a shorter period.

Explanation of provision.—The Committee amendment would put into law the requirement that the Secretary must attempt to seek and obtain all relevant medical evidence from all persons or institutions which have diagnosed or treated the individual within the 12-month period preceding the review of an individual's continuing eligibility.

Effective date.—This provision would be effective on enactment.

REPORT TO CONGRESS

Present law.—There is no requirement for periodic reporting to the Congress by the Secretary of Health and Human Services with respect to continuing disability investigations.

Explanation of provision.—The Committee amendment would require the Secretary to report to the Senate Finance Committee and the House Ways and Means Committee semiannually on the number of: continuing eligibility reviews, termination decisions, reconsideration requests, and termination decisions which are overturned at the reconsideration or hearing level.

Effective date.—This provision would be effective on enactment.

DOLE AMENDMENT

This amendment would make two changes in the disability provisions of the committee bill, H.R. 7093. It would:

Continue disability payments through the ALJ hearing to terminated beneficiaries pursuing an appeal before October, 1983. This would extend the provision in H.R. 7093 by 3 months. (No payments under this provision would continue beyond June 1984.)

In reviewing an individual's continuing disability, require the Secretary to consider all evidence in the individual's file and require that such evidence be discussed in the denial notices.

CBO COST ESTIMATES

H.R. 7093: $35 million in fiscal year 1983, −$15 million in fiscal year 1984.

H.R. 7093 as amended: $60 million in fiscal year 1983, $60 million in fiscal year 1984.

This amendment would increase the cost of H.R. 7093 by $25 million in fiscal year 1983 and $75 million in fiscal year 1984.

Mr. DOLE. Mr. President, I wish to thank the distinguished Senator from Louisiana, Senator LONG, for his cooperation. Senators METZENBAUM, LEVIN, COHEN, ARMSTRONG, DURENBERGER, and others, including Senator RIEGLE, Senator HEINZ, Senator HATCH, have worked with me to find something we might all agree on in the area of continuing disability investigations. The bill (H.R. 7093) was postponed prior to

the election. Senator LONG wanted to take another look at it. He has now consented to its consideration with an amendment which I shall offer as a part of my amendment to which he has no objection.

This bill is a step in the right direction. I certainly commend my colleagues for their patience. I also commend the Social Security Administrator John A. Svahn, and Secretary Schweiker of the Department of Health and Human Services for their willingness to help us work out some of these very real problems.

Mr. President, I ask unanimous consent that the committee amendment be agreed to and considered as original text.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, I thank Senator DOLE for his leadership on this issue and the speed with which he has moved this bill out of his committee. I commend him.

I and several of my colleagues have been working on a legislative solution to the problems in the review process of social security disability for over a year now. The situation has reached a crisis point. My staff has documented at least 32 deaths of persons who were told by SSA that their benefits were being terminated because they were no longer disabled and who then died shortly thereafter of their disabling condition.

Most Senators are by now all too familiar with the frequent stories of truly disabled persons who have been callously and erroneously removed from the social security disability rolls. SSA would have us believe these are isolated instances, but the sheer number belies that possibility.

The tragedy is that while two-thirds of those who appeal their termination decision eventually have their benefits restored by an administrative law judge, they are often left with no other source of income during this long appeal process. Of the 32 deaths, in almost every case a surviving relative, the treating physician, or some other interested person has stated their belief that the wrongful termination decision and resulting loss of benefits was a contributing factor in the person's death.

It is a tragic fact that, in despair at losing their benefits, a number of individuals have committed suicide. Other victims have been forced back into institutional care. Families have had to separate. And for many, these callous and unfair procedures have brought financial ruin.

The bill before us today is a short-term, emergency measure. Much more needs to be done. I understand that the chairman of the Senate Finance Committee agrees that comprehensive reform legislation must be enacted next year. I urge him to act quickly on such legislation.

In the meantime, this measure is desperately needed. Perhaps at least some of those 32 persons who died would be alive today if they had not suffered the stress associated with the loss of benefits. This bill would have allowed them to continue to receive those benefits pending their appeal. Some of those persons were granted their appeals posthumously. We cannot allow this intolerable situation to continue any longer. We must pass this measure immediately.

I do not agree with the July 1, 1983 date for the sunsetting of this provision to extend benefits pending appeal. I believe that this provision should become a permanent part of the social security disability law. This would merely place SSDI recipients in the same position as SSI recipients who already have the right to elect to continue to receive benefits pending their appeal to an administrative law judge. However, the one positive aspect of this July 1 deadline is that it will provide a strong incentive to the Congress to enact more comprehensive legislation to correct the existing problems in the disability program as soon as possible.

I believe that the provision of the bill requiring the Social Security Administration to obtain all relevant medical evidence from treating institutions and individuals will be extremely beneficial to recipients who are subject to continuing disability investigations. At the present time, it is my belief that the Social Security Administration is not, in all instances, making a vigorous enough effort to obtain such evidence. The recipient's treating physician is the person in the best position to provide the most comprehensive and qualified report on the individual's medical condition. The treating physician usually has an historical perspective.

On the individual's condition which is simply not available to a physician performing a consultative examination on behalf of the State disability agency. Such a consultative examination is, at best, a brief, one-time glimpse of that person's condition. In the case of many mental disabilities and some physical disabilities, an individual's outward symptoms of his or her disabling condition may be in remission during particular periods. In a recent report, the General Accounting Office concurred with this view:

> To base a decision on only the recent examination—often a purchased consultative examination—could give a false reading of that person's condition. This is especially true for those impairments subject to fluctuation or periodic remission, such as mental impairments.

The provision of this bill requiring SSA to obtain treating physician evidence is a reaffirmation of the importance of such evidence and is a signal to SSA that more credence should be given to such evidence. It is very possible that with this increased and improved effort to obtain such evidence, there will be much less of a need for consultative examinations, thus saving the Government money as well as improving the quality of decisions. Of course the sponsors of this legislation recognize that in certain circumstances, it will not be possible for SSA to obtain reports from the treating physician despite every reasonable effort. An example of such a circumstance would be the death of the physician, the destruction of past medical records or other similar circumstances.

Finally, I am very pleased about the inclusion of the provision requiring SSA to give consideration to all evidence in the recipient's file, including the medical evidence upon which the original determination that the individual was disabled was based. This provision simply follows a recent GAO recommendation to this effect which GAO has transmitted to SSA and Congress.

Many recipients mistakenly believe that SSA is presently considering all the medical evidence in their file when it undertakes a CDI review. They rely, to their detriment, on the sometimes voluminous medical evidence which they submitted at the time of the initial determination of eligibility. With this provision, SSA must now consider all historical medical evidence and, if SSA determines that the disability has ceased, it must provide the recipient with a statement explaining why this evidence is no longer sufficient. For example, there may be more recent evidence available that the individual's condition has now improved to the point that they no longer meet the definition of disability.

Of course, in some cases, SSA may find that the original decision granting disability benefits was clearly erroneous and not in accordance with the law. In that instance, where the initial decision was incorrect, SSA may terminate benefits even though the individual's medical condition has not improved. This is the reason for the next to the last sentence of the amendment offered by Senator DOLE. This bill in not intended to preclude SSA from reversing clearly erroneous incorrect decisions. However, the bill is not intended to change any current case law on the subject of when a showing of medical improvement is required. It merely clarifies that SSA may terminate benefits where their initial determination was legally incorrect at the time it was made.

UP AMENDMENT NO. 1413

(Purpose: To extend the effective date of continued payment of disability benefits and to require that a complete medical history be obtained prior to making a final determination)

Mr. DOLE. Mr. President, I send an amendment to the desk for myself, Mr. COHEN, Mr. LEVIN, Mr. METZENBAUM, Mr. DURENBERGER, Mr. HEINZ, Mr. RIEGLE, Mr. SASSER, Mr. BIDEN, and Mr. JEPSEN and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE), for himself and others proposes an unprinted amendment numbered 1413.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 5, lines 22 and 23, strike out "June 1982" and insert in lieu thereof "June 1984".

On page 6, strike out lines 12 through 17 and insert in lieu thereof the following:

" '(3) The provisions of paragraphs (1) and (2) shall apply with respect to determinations (that individuals are not entitled to benefits) which are made—

'(A) on or after the date of the enactment of this subsection, or prior to such date but only on the basis of a timely request for a hearing under section 221(d), or for an administrative review prior to such hearing, and

'(B) prior to October 1, 1983.' ".

On page 8, line 8, before the quotation marks insert the following: "In making such final determination the Secretary shall consider all evidence available in such individual's case record relating to such impairment or impairments, including medical evidence used in making the initial determination that the individual was under a disability and medical evidence used in any subsequent review, determination, or judicial review relating to such impairment or impairments. Nothing in the preceding sentence shall be considered to preclude the Secretary from finding an individual to be ineligible on the basis that such individual is not disabled within the meaning of the term disability for purposes of initial determinations under this title even if such individual's medical condition has not improved or otherwise changed since any prior determination of his eligibility. Discussion of such evidence shall be included in the statement of the case required to be provided under section 205(b).".

Mr. DOLE. Mr. President, I shall take a couple of minutes to explain this important amendment.

One of the disability provisions agreed to by the Finance Committee and incorporated in the bill before us now has caused confusion and concern. The problem pertains to the payment of disability benefits through the administrative law judge (ALJ) hearing and, in particular, the sunsetting of the provision in July 1983.

Under the committee bill, no payments will be made under this provision for months after June 1983. In other words, people terminated from the rolls after that date will not be provided any additional payments during the appeals process; instead, existing law will prevail. This was clearly understood.

The amendment has another effect, however, which I believe was unintended. Since no payments can be made past June 1983, this means that even someone terminated today, next month, or any time prior to July, will not be granted payments through their entire appeal—unless their hearing happens to be held before July. Since an ALJ hearing can take up to 6 months to 1 year to receive, many of the people terminated from the rolls in the next 6 to 9 months will not receive payments through the ALJ hearing—only until July.

The amendment I now offer on behalf of myself and Senators COHEN and LEVIN would correct this problem and, since action has been delayed on this bill, extend the date when the provision sunsets by 3 months. In particular, it would insure that people who are terminated from the rolls before October 1, 1983 will be eligible to receive payments through th ALJ hearing, as long as that hearing is held before July 1, 1984. In the event the hearing should take longer, payments would not be continued beyond June 1984.

I believe this amendment is consistent with the committee's desire to sunset the provision while not violating the concept that for a temporary period of time payments should be continued through the ALJ hearing.

This amendment would also put into law a requirement that, in reviewing the continuing eligibility of beneficiaries, all evidence in the individual's record be examined. In the case of a denial decision, such evidence would be discussed in the denial notice.

These are limited changes in the disability provisions of H.R. 7093 and have broad support.

According to the Congressional Budget Office, this amendment would increase the cost of the disability provisions in fiscal year 1983 from $35 million to $60 million.

Mr. President, I ask unanimous consent to have printed in the RECORD a letter from Social Security Commissioner Svahn. This letter details steps already taken by the Social Security Administration dealing with many of the concerns raised by Members of this body in connection with the disability program. I commend Commissioner Svahn for taking these administrative steps to improve the disability review process.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

COMMISSIONER OF SOCIAL SECURITY,
Baltimore, Md., September 16, 1982.

Hon. ROBERT J. DOLE,
Chairman, Senate Finance Committee, Washington, D.C.

DEAR MR. CHAIRMAN: As you know, the Administration shares your concern and that of other members of the Finance Committee with regard to the fair and equitable carrying out of the provisions of the 1980 Amendments for better assuring the integrity of the Social Security disability rolls through the periodic review of the continuing disability status of people receiving disability benefits. This process of continuing disability investigations—the so-called CDI process—has been a source of major concern to us, as well as to the Congress and the public generally and we have been moving in both legislative and administrative areas to deal with problems that have arisen in this area.

Secretary Schweiker and I have been strongly supportive of major elements of a Ways and Means Social Security Subcommittee bill, now awaiting action in the House, that would lead to improvements in the quality and fairness of the CDI process. We feel that the House bill—H.R. 6181, with provisions paralleled in several bills pending before the Senate—would provide us with the additional tools necessary to accomplish this.

However, pending completion of action on that legislation, we have given the very highest priority to those actions which we can take administratively—in close concert with the States—to implement a fundamental reform of the CDI program. These reforms will, I believe, go a long way toward solving many of the problems and resolving many of the issues that have led to the current concern about the CDI process.

Indeed, these reforms will take us about as far as we can go toward those ends without substantive legislation along the lines of the provisions in H.R 6181 that we support to correct some of the anomalies in present law and practice which have helped make this program far more complex and controversial than any other administered by this agency.

Twelve major steps SSA is taking to reform the CDI process are as follows:

(1) In March, SSA initiated a policy of determining that, in general, a person's disability ceases as of the time the beneficiary is notified of the cessation. This change reduces situations where the beneficiary is faced with the need to pay back past benefits because of a retroactive determination.

(2) Since May, SSA has mandated that States review all medical evidence available for the past year—a directive which ensures that every State is looking at every piece of evidence that might be pertinent to a case.

(3) SSA has underway, in two States, a study to test the value of obtaining more than one special mental status examination in cases where evidence from the beneficiary's treating source is incomplete or inadequate. This is intended to determine whether a person's mental condition can drastically change from one day to another. One criticism of SSA's practice of getting only one mental status examination is that it gives a misleading "snapshot" of a person.

(4) Since March, SSA has required State agencies to furnish detailed explanations of their decisions in all cases in which a person's disability has ceased.

To insure quality in CDI cases, SSA conducts a quality review of a sample of cases before benefits are stopped. In June 1982,

SSA doubled the number of quality reviews of termination cases. The quality has been holding very high at 97.5 percent. In addition, to demonstrate the importance of quality in the CDI process, SSA established an interim accuracy goal for the State agencies without waiting for publication of regulations.

(6) SSA has consistently monitored State agency resources and workloads closely and adjusts the flow of cases to the individual States to avoid backlogs when problems have arisen in their acquiring adequate resources. The selective moratoriums on new CDI cases that SSA has implemented for August and September (and even earlier in some States) has been easing problems in specific States that have had unusually large backlogs.

(7) Starting in October, SSA will use a new procedure for beginning a CDI review: each beneficiary will have a face-to-face interview with an interviewer in the local Social Security office. The interviewer will explain how the review works and what the beneficiary's rights are, obtain information about the beneficiary's medical care and treatment and current condition, and—in some cases—conclude the reviews process where it is clearly warranted based on the beneficiary's current medical condition.

This will correct the single most glaring anomaly in the CDI process. Recipients whose cases are selected for review under the 1980 Congressional mandate rarely, if ever, come face-to-face with a decisionmaker until and unless the case is pursued to the third level of review and appeal—a process which may drag on as much as 6 months to a year after benefits have been stopped. This one flaw in the program is perhaps more to blame than any other factor for the seemingly senseless "horror stories" we have all seen from time to time of people being dropped from the rolls despite glaringly obvious disabilities.

(8) To improve the quality of determinations in difficult cases where it is necessary to determine a person's capacity to do work-related activities despite a severe impairment, SSA is requiring that the determinations as to remaining capacity be more detailed and explicit so that the basis for the final decision is clear.

(9) SSA has taken many actions to improve the quality of consultative examinations purchased by the Government in cases where medical evidence from a person's physician is unavailable or incomplete.

(10) SSA has been very sensitive to the need for special handling of cases involving psychiatric impairments. SSA has met with mental health groups to obtain their recommendations for improvements and is reevaluating all guidelines for evaluation of mental impairments. SSA has also encouraged the States to increase the number of psychiatrists on their staffs in order to enhance their ability to review cases involving mental impairments. Secretary Schweiker has asked the American Psychiatric Association for assistance in recruiting psychiatrists for the States.

(11) SSA has added more than 140 Administrative Law Judges to what is already perhaps the largest single adjudicative system in the world, bringing their total number to more than 800 and providing them with significantly more support staff to help reduce the backlog of cases that has been a chronic problem in past years.

(12) Based on our findings in the first year of the CDI program, SSA has broadened the definition of the permanently disabled who need not be subject to the every-three-year CDI process mandated under the law. As a result, SSA expects to exempt an additional 165,000 beneficiaries from the CDI process during the next fiscal year—which will mean reducing the total from about 800,000 to about 640,000, a major reduction in workloads for the State agencies.

In summary, we believe that with the implementation of these administrative steps, we can very substantially improve the quality and the fairness of the CDI process, prevent the kinds of mistakes that have lead to true horror stories and given rise to some exaggerated concerns, and move toward guaranteeing the integrity of the disability rolls in a way that is equitable and humane as well as effective and efficient. While we do support legislation—such as the provisions we have sought in H.R. 6181, including face-to-face evidentiary proceedings at the very first level of appeal—to enable us to further improve the process, we believe that with the steps outlined above, substantial progress is now being made.

Sincerely,

JOHN A. SVAHN.

Mr. COHEN. Mr. President, I rise in support of the amendment offered by my distinguished colleague from Kansas (Mr. DOLE) and in support of the bill H.R. 7093.

Mr. President, I ask unanimous consent that a list of cosponsors, including Senator LEVIN and myself be added not only to the bill itself but also to the amendment (UP No. 1413) offered by Senator DOLE.

The PRESIDING OFFICER. Without objection, it is so ordered.

The list of cosponsors follows:

Senator Cohen, Senator Levin, Senator Dole, Senator Armstrong, Senator Metzenbaum, Senator Heinz, Senator Riegle, Senator Durenberger, Senator Chafee, Senator Sasser, Senator Quayle, Senator Cochran, Senator Biden, Senator Boren, Senator Burdick, Senator Thurmond, Senator Cannon, Senator Dixon, Senator Leahy, Senator Cranston, Senator Pell, Senator Stafford, Senator Dodd, Senator Nunn, Senator Gorton, Senator Kennedy, Senator Eagleton, Senator Pryor, Senator Chiles, and Senator D'Amato.

● Mr. BOREN. Mr. President, I am pleased to cosponsor the amendment offered by my distinguished colleagues from Michigan and Maine. This change in the law has been desperately needed as thousands of disabled persons across the country have seen their benefits terminated arbitrarily. My field offices in Oklahoma have been inundated with complaints of unjustified disability terminations. In the past year, I have received over 550 calls from disability recipients from all over the State who are no longer drawing their disability benefits.

The amendment considered by the Senate today will continue disability payments to social security recipients until all appeals are exhausted. This change will allow an individual in the process of appealing a decision concerning his disability certification will continue to receive benefits until an administrative law judge determines he is not disabled.

Cutting off someone's disability benefits before he's had a chance for a full hearing is sort of like declaring someone guilty before they are proven innocent. We should not penalize those with true needs because of bureaucratic backlogs. I am the first one to want to reduce Federal spending, but it is not right to use Government delays to deny funds to those who are truly helpless for physical reasons.●

Mr. COHEN. Mr. President, I move the adoption of the amendment.

The PRESIDING OFFICER. Is all time yielded back?

Mr. LEVIN. I yield back our time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Kansas.

The amendment (UP No. 1413) was agreed to.

Mr. COHEN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LEVIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. COHEN. Mr. President, I rise in support of the disability reform amendments included in H.R. 7093.

Section 2 of this legislation contains amendments that Senator LEVIN and I, along with 28 of our colleagues, have sponsored to provide a short-term solution to the grave problems affecting the Social Security Administration's reviews of individuals receiving disability benefits.

The purpose of our proposal is to provide immediate relief to the thousands of disabled people whose benefits are being erroneously terminated and subsequently restored after a lengthy appeals process has run its course.

The Social Security Administration, in response to a congressional mandate, has been reexamining the eligibility of hundreds of thousands of individuals with nonpermanent disabilities. In my judgment, Congress was correct in mandating periodic reviews to identify those individuals who have recovered sufficiently to be able to resume working. Unless we eliminate from the program those individuals who no longer require assistance, we will limit our ability to provide fully for those who do. The implementation of this law, however, has created chaos and inflicted pain that Congress neither envisioned nor desired when it enacted what was intended to be a sound management tool.

The problem is not with principle of the periodic reviews, but rather with the manner in which they are being conducted. And we in Congress share a large measure of responsibility for failing to establish specific guidelines for selecting the cases and conducting the investigations.

Last May, Senator LEVIN and I held a hearing in our Oversight of Government Management Subcommittee to investigate numerous reports from all over the country that truly disabled people are having their benefits terminated as a result of the new reviews.

What we found was most disturbing. Benefits are being discontinued in more than 40 percent of the cases reviewed—far above the 20-percent rate predicted by the General Accounting Office. In the State of Maine alone, benefits for more than 1,200 people have been ended since the reviews began, despite the fact that in a number of cases the claimants still appear to be severely disabled and unable to work. And about two-thirds of the claimants who appeal are eventually reinstated to the program after a hearing before an administrative law judge.

The situation is both absurd and cruel. It makes no sense to inflict pain, uncertainty, and financial hardship on disabled workers and then tell them, "Sorry, we made a mistake." It makes no sense to overburden the State agencies and further clog the appeals process with cases where the individuals clearly remain disabled.

The tragedy is that, in waiting for reinstatement, these severely disabled persons and their families must go without benefits for months—or even a year or more—due to the tremendous backlog of appeals. One of my constituents, who was reinstated to the program last August, has been without his disability checks for 16 months. Lacking any income and too proud to accept welfare, this desperate man recently attempted to take his own life.

This is not an isolated example. Witnesses at our hearing recounted case after case in which truly disabled individuals lost their benefits and suffered financial hardship and emotional trauma because of an unjust system.

We identified several flaws in the continuing disability investigations:

First. The SSA does not provide the claimants with an adequate notice explaining the gravity of the review and the beneficiaries' responsibilities. Instead, a misleading notice is provided which simply informs the claimant that his case is "under review" to determine if he "continues to meet" the requirements;

Second. No face-to-face interview is held with the claimant until the hearing before an administrative law judge. This absence of personal contact gives the claims examiner an incomplete picture of the claimant's condition and reinforces the beneficiary's feeling of bureaucratic indifference;

Third. Decisionmakers use different and, at times, conflicting standards to determine disability. For example, there is confusion of the proper evaluation of a claimant's pain;

Fourth. In a number of cases, the medical files which the claims examiners rely on are incomplete and lack current medical evidence from the treating physician;

Fifth. No presumption of validity is accorded the initial decision which entitled the claimant to receive benefits. Instead, as the General Accounting Office has said, a system of "zero-based eligibility" is used, in which the claimant must prove all over again that he is entitled to benefits; and

Sixth. In a number of cases, individuals whose medical conditions have actually deteriorated since they started receiving benefits many years ago are having their benefits ended.

In short, our hearing revealed a disturbing pattern of misinformation, incomplete medical examinations, inadequately documented reviews, bureaucratic indifference, erroneous, decisions, financial and emotional hardships, and an overburdened system.

The Social Security Administration has taken some steps, such as improving the notice, to remedy these problems. But rectifying such fundamental deficiencies will require comprehensive legislation. I applaud Senator DOLE for his willingness to thoroughly review the disability program next year. Since it will take time for Congress to consider reforms in the disability program, we must act now to provide short-term relief to disabled individuals whose benefits are being terminated and then reinstated.

Our legislation has three parts: First, it would direct the Secretary of Health and Human Services to determine on a State-by-State basis the appropriate volume of cases so that these investigations may proceed at a more measured pace; second, it would continue disability payments until the administrative law judge stage of the appeals process; and third, it would mandate a more thorough evaluation of the medical evidence pertaining to each case.

Slowing down the number of cases reviewed would help both claimants and the State agencies which conduct the investigations. Currently, case files are literally overflowing out of boxes, and unreasonable burdens have been placed on many State agencies, particularly in those States where personnel freezes have prevented the hiring of needed staff. By directing the Secretary to proceed with the reviews at a pace which recognizes the necessity for careful evaluations and a more even workload, our legislation would improve the quality of the decisions and lessen the huge backlog of cases. It provides the Secretary with the flexibility that he needs to make adjustments in the States' workload after consulting with the State administrators.

In addition, by continuing benefits pending appeal, this legislation would eliminate the needless financial burden now imposed on disabled people who are mistakenly removed from the program, despite being unable to resume work. Currently, claimants who are successful in appealing their termination decisions receive back benefits, but only after months of disruption and delay. Our proposal would prevent the interruption of benefits which these individuals eventually would receive anyway.

To control the cost of this proposal and to discourage frivolous appeals, our bill would require individuals whose terminations are upheld by an administrative law judge to repay the benefits paid pending appeal unless repayment would cause a severe financial hardship.

Again, I emphasize that fundamental reforms in the SSA review procedures are absolutely essential. Senator LEVIN and I, along with several other Senators, have proposed comprehensive legislation to make the system more equitable and efficient. Congress would, however, be remiss in waiting for comprehensive legislation to solve these urgent problems. While we should continue to seek long-term reforms, including a medical improvement standard, we should act immediately to provide protection for the disabled Americans who are the victims of a faulty and unfair system.

Disability benefits are not welfare. A worker earns this insurance through the social security taxes that are deducted each week from his paycheck, and he must have worked a minimum amount of time in order to qualify for those payments. He must also be so disabled that he not only cannot perform the work that he had been doing but cannot engage in any kind of substantial gainful activity which exists anywhere in the country.

Surely when we are dealing with the most disabled workers in our society, we should enact every safeguard to insure that the Government does not add another burden to the ones they already must bear.

I would like to thank Senator DOLE for working with us in fashioning a solution to this problem, and I commend Senator LEVIN for his distinguished leadership and hard work on this issue.

I urge the adoption of the legislation.

I want to take this opportunity to thank Senator DOLE again for the extraordinary courtesy and interest he has shown to all of us who have been working on this matter since early last summer, and as a result of Senator DOLE's participation and meetings and negotiations not only among the members but with the administration, we were able to bring this measure to the floor today.

So I think all of us owe him a measure of gratitude which is really significant.

Mr. HEINZ. Mr. President, I am pleased to add my support for this emergency piece of legislation regarding the social security disability program, and I want to commend Senator DOLE and Senator ARMSTRONG for giving this emergency legislation the priority it deserves.

The four major provisions of this Finance Committee bill—continuation of benefits through the administrative law judge's decision, legal authority for the Secretary to slow down the reviews where it is necessary, the obligation to collect all medical evidence pertaining to the individual's disability, and periodic reports to Congress—are all found in S. 2731, the comprehensive continuing disability investigation (CDI) reform bill which Senator DURENBERGER and I introduced on July 14. Therefore, it is as a cosponsor of the Cohen/Levin bill (S. 2942), a supporter of this bill before us today, and an author of similar provisions, that I must point out to my colleagues that this emergency legislation does not completely solve the problem of the unfair terminations of hundreds of thousands of disabled individuals.

What this bill does is very important, nonetheless. It means that for the immediate future, at least, individuals who have been wrongly terminated will not be financially ruined because they have been deprived of their benefits during a lengthy appeals process. I have seen cases in my own State of Pennsylvania—and elsewhere across the country—where individuals have lost their homes and sustained other financial damages because they were deprived of their benefits during a long appeals process which resulted in a determination that they never should have been kicked off the rolls at all. The continuation of benefits through the administrative law judge's decision is a major, positive step.

The bill also gives the Secretary the discretion to slow down the reviews. I want to be among the first to let the Secretary know in clear and uncertain terms that we expect him to invoke this authority in the coming months. The backlogs which are contributing to hasty processing of disability reviews must be cleared up. I support the selective moratorium which the Social Security Administration announced in August—indeed I would have gone much further and imposed a total moratorium until the end of this year. I also support SSA's reduction in the number of planned reviews for fiscal year 1983—from the 806,000 originally proposed in the President's fiscal year 1983 budget to the current projection of 640,000. But 640,000 is still far in excess of the 506,000 reviews processed in fiscal year 1982—and it is a number which every piece of evidence I have seen suggests cannot be intelligently managed or handled. When the Federal Government starts running 500,000 to 800,000 people per year through a mass reexamination mill, there are bound to be too many instances where individual rights are violated and mistaken judgments rendered.

What we really want to see is better quality in the disability review process. That is why this bill will give the force of the law to the requirement that the Social Security Administration must—at a minimum—seek and obtain all relevant medical information from all medical personnel and institutions which have diagnosed or treated the individual in the past 12 months. And the bill also requires SSA to consider the original medical evidence supporting the disability award, along with all subsequent medical evidence.

Despite the obvious merits of these three provisions, I must point out that we have not given beneficiaries the additional protections they deserve against unfair terminations; namely, before kicking someone off the rolls who was correctly awarded benefits in the past, the Secretary should have the burden of showing that the individual has improved medically or that the individual is the beneficiary of some advance in medical therapy or technology which makes the individual able to work.

Furthermore, this bill does not have any provisions to ease the transition back to work for individuals who are severely disabled, who have been on the rolls for years, and who are now denied benefits because they do not meet the current standards. These people need adjustment benefits and vocational rehabilitation during this transition period.

I want my colleagues to know that we will be taking up these issues early next year. Until we address these issues, comprehensively, we will not have solved the problem of unfair terminations of hundreds of thousands of disability beneficiaries.

In the meantime, I would urge that the Social Security Administration heed this message: Congress is concerned that beneficiaries are not being given the benefit of the doubt; that bureaucrats have become overly zealous in kicking people off the rolls with the thinnest of justifications; and that we want to see a change in the adjudicative climate from one which presumes benefits are erroneously being paid to one which seeks to find out who no longer qualifies for benefits and why.

The goal of reviewing the disability status of beneficiaries is sound and necessary; but entitlement rights of individuals must not be summarily abridged by a process that is often thoughtless and inhumane. I urge the Social Security Administration to use the next few months and prepare itself to come forward to the Congress with some concrete proposals on medical improvement and other provisions which will restore the balance in a review system that now appears to be out of control.

Mr. President, the continuing disability review process is so plagued with problems at this time that emergency relief is crucial. We are, quite literally, putting lives in jeopardy by the haphazard manner in which these reviews are being conducted and decisions reached. Indeed, the Southern Governors' Association recently adopted a resolution condemning the fact that disabled persons are being "unjustly and abruptly removed from the social security disability rolls as a result of a hasty and erroneous review." The Southern Governors' Association, in this resolution which I ask unanimous consent be entered at this point in the RECORD, calls upon Congress "to clarify the disability review process, to provide safeguards that will protect eligible disability benefit recipients, and to provide fair and just treatment for those whose disability benefits are terminated."

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SOUTHERN GOVERNORS' ASSOCIATION,
Atlanta, Ga., September 16, 1982.

Hon. H. JOHN HEINZ,
Chairman, Committee on Aging,
Washington, D.C.

DEAR SENATOR HEINZ: Enclosed is a set of the resolutions adopted by the Southern Governors' Association at the conclusion of our 48th annual meeting.

As chairman of the Southern Governors' Association, I am most pleased to transmit these resolutions to you and to urge your support of these policies.

In your position as chairman of the Select Committee on Aging, I urge that you give special attention to the resolution entitled "Clarify Social Security Disability Benefit Review Process" (No. 16).

Yours sincerely,
WILLIAM P. CLEMENTS, Jr.,
Chairman.

SOUTHERN GOVERNORS' ASSOCIATION RESOLUTION—CLARIFY SOCIAL SECURITY DISABILITY BENEFIT REVIEW PROCESS

Whereas the social security disability insurance program provides much needed support for the disabled people in our nation; and

Whereas the Social Security Administration has instituted an accelerated program of review of the existing disability rolls as a part of the Administration's budget incentives for fiscal 1982; and

Whereas the states administer this program under regulations and rules established by the Social Security Administration; and

Whereas this accelerated review program has resulted in an initial termination of benefits to more than 40 percent of the recipients whose cases have been reviewed since March 1981; and

Whereas over two-thirds of those recipients whose benefits were terminated after

initial review have had their benefits reinstated on appeal; and

Whereas severe hardships have resulted to those disabled persons unjustly and abruptly removed from the social security disability rolls as a result of a hasty and erroneous review; and

Whereas the administration of the social security disability benefit program has been made unduly burdensome and chaotic to the states; and

Whereas review of the social security disability rolls should be conducted on a careful, regular and periodic basis and decisions on disability determination should be made in a uniform fashion: Now, therefore, be it

Resolved, That the Southern Governors' Association call upon Congress to clarify the disability review process, to provide safeguards that will protect eligible disability benefit recipients, and to provide fair and just treatment for those whose disability benefits are terminated.

Mr. HEINZ. Similar cries for congressional action have come from State officials in my own State of Pennsylvania, as well as from State officials all across the country.

Congress simply cannot tolerate such capriciousness in a Federal program which affects the lives and the livelihood of the millions of disabled workers and their families who rely on this social security income to survive.

Our action today in passing this emergency legislation would merely be a first step—but a vital one—toward fulfilling the responsibility Congress has to reform the disability program in a comprehensive way. I am pleased to endorse this bill and I urge my colleagues to vote its immediate passage.

Mr. COHEN. Mr. President, I have always believed that the problems plaguing the Social Security Administration's disability reviews required both short-term emergency action and long-term comprehensive reforms. I should like to ask the distinguished chairman of the Finance Committee, who has been so instrumental in expediting the emergency legislation that we are considering today, what his plans are for considering comprehenisve legislation. I know that the Senator from Kansas shares my concern that there are fundamental deficiencies in the system that the Finance Committee will want to examine.

Mr. DOLE. As the Senator from Maine knows, several comprehensive bills to alter the disability insurance program have been referred to the Finance Committee, including legislation introduced by Senator LEVIN and Senator COHEN.

It is my intention that the Finance Committee would consider this legislation early next year and that comprehensive reform legislation would be reported by the committee as soon as possible in the next Congress.

Mr. COHEN. A key component of most of the bills that have been introduced is a medical improvement standard. Such a standard would require the Social Security Administration to show that the beneficiary's medical condition had improved before his eligibility for benefits could be terminated. Of course, exceptions would be made for cases involving fraud or a clear mistake in the original decision entitling the claiment to benefits. Because of the complexity of the medical improvement issue, I believed that it was more appropriate for inclusion in long-term legislation, rather than in a short-term bill. I do hope, however, that the distinguished chairman will be able to provide assurances that the Finance Committee will seriously consider a medical improvement standard during its examination of disability legislation early next year.

Mr. DOLE. I am certain that the medical improvement issue will be fully debated by the Finance Committee. While I cannot predict what action the committee will take on this issue, I can assure the Senator that I realize its importance to him and many other Members.

As the Senator knows, our staffs spent many hours trying to work out langauge on the medical improvement issue, but the complexity of this issue requires hearings and further study. I look forward to working with interested Senators as we seek to resolve this issue next year.

Mr. COHEN. I thank the Senator for his assurances.

● Mr. ARMSTRONG. Mr. President, I urge immediate passage of the pending bill providing emergency benefits for the disabled. Once passed this bill will correct a tragic and terrible flaw responsible for terminating benefits to the Nation's disabled.

Here is the situation we face: Social security disability insurance is the Nation's largest disability-connected cash benefit program. About 4.2 million Americans receive benefits, at a current annual cost of $17 billion. Just 10 years ago, 3 million Americans received $4 billion in benefits. Obviously, there has been explosive program growth.

In response to concerns about rapid increases in costs, poor administration, and work disincentives, President Carter in 1980 signed a law that requires Federal and State officials to review disability rolls, and to end benefits for those no longer eligible. This law required a dramatic increase in the amount of management review and oversight of the program. It was badly needed. Both the General Accounting Office and the Social Security Administration found lax administration, gross inconsistency in awarding benefits, and horrendous fraud. In fact, GAO estimates that as many as 20 percent of those now receiving benefits are clearly ineligible, at an annual taxpayer cost of $2 billion.

Prior to 1980, there were no legislative requirements for periodic determination of disability for or even most persons receiving disability benefits. This oversight was corrected by the 1980 law. Congress required disability beneficiaries to be reexamined at least once every 3 years, unless their conditions were expected to be permanent. The law also required disability determinations to be made according to Federal written regulations. States failing to comply would have their authority to make disability determinations preempted by the Secretary of Health and Human Services.

As a result of the 1980 law, the Social Security Administration has sent 1.6 million disability determination cases to States for review. Of these, 46 percent have had benefits terminated at the initial decision level. In other words, half of those now receiving assistance are being denied further benefits. Colorado is a classic example. In Colorado, 17,106 persons receive social security disability. About half of the cases have been reviewed, and State officials have terminated 40 percent of those cases.

Here is the problem: Both in Colorado and nationwide, many cases are being appealed to administrative law judges. Of cases appealed, more than 60 percent have had their benefits restored. There are a number of reasons for this high reversal rate: shoddy staff work at the time of initial decision; beneficiaries can be represented by legal counsel before administrative law judges; the law judges use a different set of standards in determining disability; and other factors.

In any event, reversals are high, and benefits are being restored to a large number of disabled. Here is the problem: Once a State terminates benefits, and even though the case is appealed to an administrative law judges—and there is a better than 60 percent chance benefits will be restored, and retroactively.

What does all this mean to a person who is initially declared ineligible for benefits, only to have the benefits restored under appeal?

It means havoc through an unnecessary disruption of their life and income. Think about it. Imagine you received disability benefits for 8 years, then receive a notice that your case is being reviewed, then a notice that your benefits are being terminated. Benefits end, you appeal the decision, it takes 6 months for the case to be heard—then the benefits lost during appeal are paid back retroactively. In the meantime, you are behind on mortgage payments, rent, utilities—and the necessities of life.

Hence this legislation now before the Senate. The bill has two major provisions. It pays full benefits while cases are appealed; second, it gives the Secretary authority to slow down case review by States unable to give full

and careful review to each and every case.

These reforms—coupled with a number of administrative changes now underway—will make more responsible the continuing disability review program. I urge immediate passage of this bill providing emergency benefits for the disabled.

Let me conclude with a word of thanks to a number of people responsible for this legislation. Senators COHEN and LEVIN spearheaded the efforts, with the assistance of Senator HEINZ, and others. Senator DOLE ably shepherded the bill through quick Senate Finance Committee passage. In drafting the final bill, I received helpful legislative guidance from the Disabled American Worker Security, a Colorado organization representing the State's disabled.●

● Mr. DOMENICI. Mr. Chairman, I rise in support of the provisions of H.R. 7093 which correct some of the recent problems in the social security disability program.

In 1980 Congress passed legislation requiring the Social Security Administration to review all nonpermanent disabilities once every 3 years. We were concerned about GAO reports that as many as 20 percent of the disability recipients did not meet the eligibility criteria, and that incorrect payments could be as high as $2 billion to $4 billion each year.

The administration shared our concern and made a great effort to implement the congressional mandate. But it has become clear that rushing this process has led to hardship for many disabled recipients. In its efforts to weed out those people who are quite able to work, the disability program has denied benefits to some individuals who clearly are not capable of self-support.

This is the problem we must must solve: How do we administer the program so that we can weed out the clearly ineligible, without harming those recipients who are too disabled to work?

The administration has announced some modifications in the way it handles reviews of disability cases that should substantially improve the situation. By easing the administrative burden and allowing States more time to develop evidence in each case, the disability units will make fewer errors that disadvantage recipients.

The legislation before us provides further protection for the beneficiary. It insures that cases will be developed fully, with adequate evidence, so that the disability recipient will receive the best possible decision.

For those disability recipients who do not agree with the results of the review, this legislation would allow them to continue to receive benefits while they appeal the decision. This provision protects recipients who are later determined to be eligible from an unfair termination of benefits. To help preserve the financial integrity of the social security trust funds, the bill requires that benefits to which a recipient is not entitled be paid back. The provision is also time limited; Congress can deal with the problem if it persists when it considers the solvency of the social security system.

Mr. President, I believe this legislation strikes a critical balance between protecting disability beneficiaries from the abuse of hasty decisions while exercising our responsibility as guardians of the disability trust fund. It allows the administration to carry out the congressional mandate to weed out the many recipients who are able to work. At the same time it insures that no recipients will be unfairly denied disability benefits to which they are entitled.●

Mr. DOLE. Mr. President, I want to thank particularly Senators COHEN and LEVIN for their leadership in this area. I think this has been a constructive effort even though it did not go as far as some had wanted. In my view, however, it will give us time to take a hard look at the problem.

I want to commend all the interested Senators, but particularly Senators COHEN and LEVIN who started working on this early in the year. They led the effort to make what I consider to be appropriate changes in the disability review procedures.

Mr. HEINZ. Mr. President, this emergency piece of legislation is absolutely necessary, and I am pleased to see it come to the Senate floor today. I want to commend both Senator DOLE and Senator ARMSTRONG for their prompt and effective response to the problems with social security disability, which were brought out in great detail at the August 18 hearing of the Finance Committee. I am an original cosponsor of S. 2942, and I note with satisfaction that the basic provisions of this Finance Committee bill are very close to those embodied in S. 2731, the comprehensive continuing disability (CDI) reform legislation that Senator DURENBERGER and I introduced on July 14.

Having said that, I want to point out that this bill has a serious omission: It fails to require that the Social Security Administration—before it may terminate benefits—show that an individual who was correctly awarded disability benefits has either experienced significant medical improvement or else that the individual is the beneficiary of advances in medical or vocational technology which clearly make the individual capable of working, despite the impairment.

Such a provision is absolutely essential to insure that we do not terminate individuals whose medical conditions have not improved—and may even have deteriorated—since that time they were originally awarded disability benefits. A sample study done by the Social Security Administration found that only 51 percent of those removed from the disability rolls had actually improved; and 35 percent were in the same or even worse medical condition.

I remind my colleagues that the statutory definition of disability has not changed since 1967—and yet today, fewer people are being admitted to the disability rolls than ever before. Forty-five percent of the beneficiaries being reexamined are being terminated by the Social Security Administration.

In fact, as the Senator from Kansas knows, I had intended to offer an amendment to the debt ceiling bill on this very subject of medical improvement.

Mr. DOLE. I thank the senior Senator from Pennsylvania for the work he has done to bring the problems relating to the social security disability program to the attention of the Finance Committee and the Congress. I could not support an amendment on medical improvement at this time, however, regardless of the merits of such a proposal. Without a unanimous consent agreement, we could not bring this bill to the floor, and as the Senator from Pennsylvania has pointed out again and again, we need some emergency legislation to alleviate this problem. And time is running out.

Mr. HEINZ. Will the Senator from Kansas work next year with me and other Senators who I know share my concerns to develop medical improvement legislation which makes allowances for advances in medical technology?

Mr. DOLE. I shall certainly want to join you in looking at this issue next year—as part of a comprehensive review of the disability program. As the Senator from Pennsylvania knows, members of the staff of the Finance Committee have been exploring precisely such language, along with Aging Committee staff and the staffs of other interested Senators: ARMSTRONG, COHEN, LEVIN, DURENBERGER, METZENBAUM and RIEGLE. I think a lot of progress has been made in understanding the implications of such legislative language. We are not yet at the point where all the concerns about medical improvement have been resolved. But we certainly haven't ruled it out, not by any means.

Mr. HEINZ. Will the chairman of the Finance Committee agree to hold hearings early in the next session of Congress to deal with the medical improvement issue and the other major unresolved issues in the disability program?

Mr. DOLE. The issue is an important one, and I agree that we should hold hearings on this subject. We will

address the issue early in next year's session.

Mr. HEINZ. I thank the distinguished Senator from Kansas. The continuing disability reviews are so riddled with problems that emergency relief is critical at this juncture. This bill does some of what needs to be done as part of comprehensive legislation. I support the bill as a vital first step to assure at least limited relief to some 640,000 individuals targeted for review in fiscal year 1983. But we cannot consider any CDI procedural reform complete until action is taken reflecting the need for explicit, stringent medical improvement language.

At this time, I ask unanimous consent to enter into the RECORD a letter from the American College of Cardiology in support of my proposed amendment on medical improvement. The endorsement by this prestigious group of medical professionals is certainly compelling testimony that medical improvement is a sound and necessary approach to meaningful CDI reform.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

AMERICAN COLLEGE OF CARDIOLOGY,
Bethesda, Md., September 20, 1982.

Hon. H. JOHN HEINZ III,
Chairman, Special Committee on Aging, Dirksen Senate Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: On behalf of the American College of Cardiology, representing more than 11,500 physicians, scientists and educators, I am pleased to provide you and your committee with our views on an amendment to the Social Security disability program relating to termination of disability benefits.

We support your amendment to the Social Security disability program which is designed to limit or eliminate the termination of disability benefits by the Social Security Administration in the absence of clinical findings of significant medical improvement in an individual's medical condition. The College believes that the persons affected by your amendment should include those with demonstrable medical improvement due to healing, correction of the disabling impairment, absence of symptoms, or application of new and effective therapies.

In addition to the above, we would like to call to your attention the fact that there are some people who, when initially determined to be disabled by accepted medical criteria, never, or very rarely improve medically. Such is the case of heart patients whose conditions are correctable neither surgically nor medically. Therefore, for these patients, assuming proper initial adjudication and determination of disability, periodic review is both inappropriate and unnecessary. It also would not be cost effective. In addition, we believe that a person's mental status must be considered independent of other medical improvement.

Please let me or Roger C. Courtney, J.D., Director of Government Relations for the College know if we can provide you with any additional assistance.

Sincerely,

SUZANNE B. KNOEBEL, M.D.F.A.C.C.,
President.

Mr. LEVIN. Mr. President, the provisions of this bill are to become effective immediately upon passage. I have been asked, and would therefore like to clarify, how this bill will affect those persons who have been terminated, but who are presently in the process of appealing that termination decision. It is the intention of the sponsors, Senator COHEN and myself, that the disability benefits will be recommenced for those persons appealing their termination decision or those persons eligible to appeal their termination, once they file their appeal. We do not intend that benefits be paid retroactively, but that benefits be recommenced as of the date of this act. I would like to ask the chairman of the Finance Committee, the Senator from Kansas, Senator DOLE, if that is his understanding of how this bill will affect persons presently appealing.

Mr. DOLE. That is my understanding, Senator LEVIN. I am glad that we had the opportunity to clarify that for the record.

The PRESIDING OFFICER. Is all time yielded back?

Mr. COHEN. I yield back my time.

Mr. LEVIN. First, let me add my thanks to my friend from Kansas who has played a critical role in this effort to correct an egregious problem. Let me add that Senator LONG has been most helpful, as well.

Senator COHEN and I have been working on this matter now for many, many months. This is the end of a long process. It really started with some hearings before the Subcommittee on Oversight of Government Management that he chairs with such distinction, and of which I am the ranking member.

This legislation will prevent gross injustice to about 200,000 Americans who will be removed from the social security disability rolls who should not be removed. They will be reinstated by an administrative law judge, but that will come after 9 to 12 months of tremendous anxiety and suffering.

This legislation addresses an egregious, urgent problem. Individuals—who have been workers in this country—who have contributed to social security under the expectation that if disabled they will be protected—who subsequently have become totally disabled and therefore eligible for social security disability—are being unfairly and unjustifiably terminated from the program. They are caught in the dragnet of the social security disability review process which was well intended but disasterously enacted. That review process was not intended to kick eligible persons out of the disability program; it was intended to get rid of people who do not belong there.

The program is having the unintended effect of terminating eligible persons, and it is imperative that we do something now to alleviate the pain of this wrongdoing. This legislation will do just that—it will both slow down the number of cases being reviewed and of greater importance continue the payment of benefits until such time as an individual has the opportunity for a hearing before an administrative law judge. This latter provision would be effective only through September 1983, hopefully giving Congress sufficient time to address the underlying substantive problems in the review process.

Let me go into a little of the background of this issue.

Significant structural and managerial failings in the social security disability program have been well documented in critical reports and investigations by the House Ways and Means Committee, the General Accounting Office, and the National Commission on Social Security.

Without going into great detail, the problems in the program include: Unmanageably large caseloads at all levels; unreasonably long delays in processing cases and in scheduling appeals; conflicting standards for making disability determinations at the State and appeals level; inadequate managerial standards and procedures for acquiring and evaluating medical evidence.

When the current Social Security Administration management team assumed responsibility for this program in January 1981, it inherited that list of problems I just outlined and a program which had been managed primarily from crisis to crisis with little recovery between crises. And it also inherited the mandate that there be reviews every 3 years of those cases which had not been previously reviewed.

Rather than waiting until 1982 as the Congress had recommended, the Social Security Administration decided to accelerate the periodic review process. In March 1981, SSA started sending to the States the first of 357,000 cases to be reviewed by the end of the year, although previously the States had only reviewed less than 160,000 cases per year.

The predictable and resulting overload of cases piled onto an inadequate and troubled process, lengthened delays, increased confusion over the standards for reviewing disability, and lead to hundreds of thousands of erroneous and unjust benefit terminations. The outcry from these results has come from all across the Nation.

Even normally dry statistics on what has happened speak with rare clarity and passion. In 1979 and 1980, the Social Security Administration reviewed approximately 160,000 cases for continuing eligibility. In 1981, the number rose abruptly with little warning to State agencies, to 357,000. SSA plans to send 567,000 cases in fiscal

year 1982 to the States for review and, orginally, 840,000 cases in fiscal year 1983. This 1983 figure has recently been reduced by SSA to a projected 640,000. This is coupled with the fact that the SSA has not been staffed sufficiently, nor has it staffed the State agencies sufficiently, to handle the increased workload. Thus, it is no surprise that delays and backlogs have dramatically increased.

What is most striking, however, is the eventual outcome in the cases reviewed under this overburdened system. Between March 1981 and April 1982 SSA reviewed 405,000 cases and nearly half—191,000—were terminated from the program. This rate of termination far exceeds the 10-percent projection of GAO or the 20-percent projection of SSA. The tragedy derives from the fact that 67 percent or two-thirds of the appeals of termination decisions to the administrative law judges result in reversals a year or so later. During that 9 to 12 month appeal period, however, the terminated beneficiary suffers without benefits and without accompanying medical coverage. So, of the 109,000 persons whose benefits were terminated between March 1981 and April 1982, half of those persons will appeal the decision to an administrative law judge and two-thirds will be reinstated. That means 36,000 people will have to go without needed disability income and medical coverage for anywhere from 9 months to a year, when in fact they never should have been terminated in the first place.

If the present volume of reviews continues it will mean that through 1983, the Social Security Administration will have terminated and subsequently reinstated over 200,000 individuals who deserve to remain on disability. That is the real tragedy—the unnecessary and unjustified suffering of 200,000 severely disabled people and their dependent families whose benefits are stopped while they wait reinstatement to a program they never should have been dropped from in the first place.

Mr. President, as much as we do not want people in the disability program who do not belong there, we must, with at least equal fervor, want to keep truly disabled people in this program.

On June 24, Senator COHEN and I introduced a comprehensive reform bill designed to correct the problems and abuses in the disability review process. It would streamline and strengthen the procedures for reviewing cases, establish standards for reviewing eligibility, require uniformity in standards throughout the system, and require a showing of medical improvement or an error in the initial decision before benefits could be terminated.

But it will take some time for that legislation to get enacted. The Senate Finance Committee wants to study the issues carefully and review the various proposals for reform. Such study takes time, and for this Congress, time is running out. Meanwhile, eligible persons are continuing and will continue to be terminated from the disability program. Real substantive reform will have to wait for next year, but we in good conscience cannot let another several months, let alone a year, go by under the present circumstances. We have to provide immediate relief from a system we know to be unjust. We have to give the State disability offices and administrative law judges some breathing room to do competent reviews, and we have to lessen the hardship to those who pursue an appeal to the administrative law judge. We can do this by slowing down the number of reviews and continuing the benefits through the appeals stage.

I urge my colleagues to join us in support of this measure.

Before I close my remarks, I want to make it clear that this amendment, in terms of the standards now applied in disability reviews, does not change current law. It maintains the status quo. We are not, by this amendment, overturning current caselaw. We are merely stating that the language of this amendment itself does not address the question of whether or not there should be a showing of medical improvement.

I also want to take this opportunity to thank the many Senators who have strongly supported Senator COHEN and myself in these efforts, Senator HEINZ, Senator METZENBAUM, Senator RIEGLE, Senator SASSER, and Senator DURENBERGER.

Again let me thank the Senator from Maine for his great effort in this legislation. Since we will be continuing benefits to persons who appeal, I think we can now look at more comprehensive reform next year. We will have stopped the massive injustices while we are taking the necessary time to critically evaluate the social security disability program.

Finally, without long and complex work of the staff of a number of Senators this needed legislation would not have been accomplished. I particularly want to pay tribute to Linda Gustitus and Barbara Savage of my staff for their wonderful effort.

● Mr. PRYOR. Mr. President, I strongly support H.R. 7093, as amended by the Finance Committee. This legislation corrects serious inequities which now exist in the social security disability insurance program.

This needed legislation amends the Social Security Act to provide continued disability insurance and medicare benefits through the hearing and appeal process until a final decision on the case is rendered. It provides authority to the Secretary of Health and Human Services to determine on a State-by-State basis that the mandated review of nonpermanent disability cases every 3 years by the State disability determination offices may be slowed down where it is appropriate to do so. The Secretary will decide the appropriate number of cases to review in each State, based on backlog and staffing considerations. The legislation also addresses the current weakness whereby the State disability determination agencies do not consider complete medical histories of the individuals they review. The legislation instructs the Secretary to make every reasonable effort to seek and obtain all relevant medical evidence which exists within the preceeding 12-month period. The legislation also provides that the Secretary make semiannual reports to Congress with respect to the disposition of continuing reviews.

Each Member of Congress has heard of numerous horror stories involved in recent administrative efforts to weed the disability program of ineligible beneficiaries. No one can argue with a need for continuing reviews of nonpermanent disability recipients. However, when Congress mandated such reviews in 1980, I believe it did not intend the review process to cause so much unnecessary hardship for so many people. Literally, many thousands of individuals have had their benefits taken away although they are still disabled and their benefits are eventually reinstated after a lengthy appeal process.

When I questioned the Social Security Administration at at May 1982 hearing by Governmental Affairs Committee on this issue and in particularly about a case of a Vietnam veteran who had his jaw wired shut and had lost a leg, two fingers, his spleen and parts of both his stomach and buttocks, but who despite these injuries had his benefits terminated. I was told "mistakes do occur." Well, mistakes may occur but they are occuring all too often and they are resulting in horrendous hardships.

Several others who have been denied continued disability benefits have reportedly died shortly after the denial determinations. In September 1982, the Los Angeles Times documented 11 individuals who were cut off from or denied social security disability benefits because they were "well enough" to work and have died this year of the same disability for which they had requested benefits. At least one of these reported deaths occurred in Arkansas. Some of the families of these individuals have plainly stated that it was the denial letter that killed the claiment.

Mr. President, I would like to share some of the findings of the field hearings which I held regarding the social security disability review process that was recently held in Fort Smith, Ark. on November 19. The field hearing

was authorized by the Special Committee on Aging and the Governmental Affairs Subcommittee on Civil Service, Post Office, and General Services. I was particularly interested in holding the hearing in Arkansas because of the unique situation in the State regarding this program. The State of Arkansas has the second highest percentage of individuals age 65 and over—second only in the Nation to Florida. Arkansas has an unemployment rate of 10.6 percent which is the highest rate in region VI and ranks 48th in per capita income level. In addition to these nationwide statistics, 51 out of every 1,000 Arkansans are disabled and receiving social security disability.

Since the Social Security Disability Amendments of 1980, the annual cessation rate in Arkansas has risen to 48.7 percent, higher than the average cessation rate for the entire Dallas region, yet about two-thirds of the approximately 50 percent who appeal are eventually reinstated at some level during the appeals process.

Testimony at the hearing was heard from several witnesses who have had their benefits terminated and eventually reinstated. The lengthy appeals process that these individuals must endure can take anywhere from 6 to 18 months during which the beneficiary may be receiving no income and suffering from great financial, emotional, and physical strain.

Mrs. Anna Lee McNoel from Fort Smith who suffers from acute asthma, spastic colon, colitis, chronic anemia, and has only one arm was heard at the hearing. Her benefits were terminated and subsequently reinstated. She was informed by the Social Security Administration that she could do sedentary work. When Mrs. McNoel asked what that meant the worker replied, "You could be a secretary."

Several other beneficiaries also testified of the hardships, and confusion and stress they experienced while appealing initial denials of their disability benefits.

Other witnesses who testified included several local attorneys and physicians of the beneficiaries, the director of the State of Arkansas Disability Determination Office, and the three administrative law judges from the Office of Hearings and Appeals in Fort Smith. All had very shocking stories to relate regarding the resulting problems of the continued review process. They also endorsed several proposed solutions including much of what is in this legislation.

Although the Social Security Administration was requested to appear at the hearing to present testimony and answer questions, they refused my request.

I was very disappointed by the refusal and I feel that in this instance, they failed to respond adequately to the concerns of Congress and the approximately 2 million disability beneficiaries who are being reviewed over the next few years.

Mr. President, when I concluded the hearing in Fort Smith I pledged my support to make immediate corrections in this unfair system which has caused so much pain and anguish to so many individuals. I, therefore, strongly endorse this emergency measure offered today and I urge my colleague to also support this needed legislation.

Let me also add that I intend to pursue more lasting solutions to this problem in the 98th Congress.

I would also like to commend Senators LEVIN, METZENBAUM, DOLE, COHEN, and others for their work in developing this legislation and bringing it to the floor today.

I ask unanimous consent that a copy of my prepared statement at the Fort Smith field hearing, a relevant newspaper article from the Arkansas Democrat, and an editorial on the same subject from the Southwest Times Record be printed in the RECORD following my remarks.

The material referred to follows:

OPENING STATEMENT OF SENATOR DAVID PRYOR

I am pleased to be here today to hold a joint hearing of the U.S. Senate Special Committee on Aging and the Subcommittee on Post Office, Civil Service and General Services of the Governmental Affairs Committee on "Social Security Disability: The Effects of the Accelerted Review Process." I would like to thank both Senator John Heinz of Pennsylvania, who chairs the Aging Committee, and Senator Ted Stevens of Alaska, Chairman of the Governmental Affairs Subcommittee, for authorizing me to hold this official Senate hearing here in Fort Smith.

I believe it is most appropriate that we have brought this meeting to Arkansas, and particularly to Fort Smith. Our state has the highest disability rate in the nation—approximately 51 out of every 1,000 Arkansans are receiving Social Security disability. And, although Arkansas has the highest number of individuals applying for disability, it has the highest denial rate for initial applications.

With the institution of the continuing disability eligibility reviews which were mandated by the Social Security Disability Amendments for 1980 and which began in March, 1981, about 49 percent of those Arkansans who are being reviewed are being told they are no longer eligible for benefits. About two-thirds of the approximately 50 percent who appeal are eventually reinstated at some level during the appeals process.

These figures alone indicate that there are some serious problems associasted with these continuing disability reviews. But these statistics become even more alarming when viewed as representative of the thousands of individuals who have been erroneously terminated and whose lives are being needlessly and adversely affected.

One case which has received some notoriety wes reported in the Wall Street Journal. It involved a Vietnam veteran who had his jaw wired shut and had lost a leg, two fingers, his spleen and parts of both his stomach and buttocks, who despite these injuries had his benefits terminated. When I questioned a Social Security administrator about this case I was told "Mistakes do occur."

Another case, which was the focus of a recent Governmental Affairs Subcommittee hearing involved a man with acute diabetes who had only limited vision in one eye and suffered from the effects of a stroke, arteriosclerosis and heart disease. This elderly man was suddenly cut from the rolls after seven years. In August of 1981 he began the appeals process. Although the Social Security Administration was quick to terminate, the reinstatement was not so rapid. Finally in February, 1982, they admitted their mistake and agreed to restore benefits retroactive to July, 1981. Unfortunately, the claimant had died the previous November.

Several others who have been denied continued disability benefits have reportedly died shortly after the denial determination. In September 1982 the Los Angeles Times documented eleven individuals who were cut off from or denied Social Security disability benefits because they were "well enough" to work and have died this year of the same disabilities for which they had requested benefits. At least one of these reported deaths occurred in Arkansas. Some of the families of these individuals have plainly stated that it was the denial letter that killed the claimant.

A recent Arkansas Democrat newspaper article gave the details of several Arkansans who have experienced serious financial, mental and physical hardships when their benefits were denied. Mistakes do occur. But they are occurring too often and they are too damaging to the lives they affect. Many times there is no way for the claimant to continue to pay his rent or buy his food during the appeals process. And, in most cases when disability is cut off, so is the Medicare which is so important in paying the ongoing medical bills which many of the claimants continue to incur.

Before we more closely explore the causes of these problems, and, hopefully, some potential solutions, it may help to briefly review the history of the disability program itself, and the application and review process.

The disability insurance program had its beginnings in 1956, when the Congress authorized cash benefits for totally disabled workers 50 or over. Since then, benefits have been expanded to include dependents, the age-50 eligibility requirement for disability has been eliminated, and health benefit coverage through the Medicare program has been added. In addition, action was taken to raise taxes and further define the term "disability".

In 1980 the Congress passed the Social Security Amendments of 1980, which included provisions which sought to make certain management improvements. A cap was placed on total family benefits, benefits for younger disabled workers were reduced, Medicare benefit coverage was expanded and the Secretary of Health and Human Services was given the authority to set up performance standards for the state disability determination agencies to follow.

Another provision, which at the time of passage was considered only a minor change, was a requirement that the Secretary of Health and Human Services conduct reviews of all non-permanently disabled beneficiaries every three years. Permanently disabled individuals were to be reviewed periodically as well, but the length of time between the reviews was up to the discretion of the Secretary. The three-year re-

views came about in response to a General Accounting Office report that estimated that approximately 20 percent of all individuals on Social Security disability were on the rolls erroneously.

It is important to note that although concern over the financial stability of the Social Security system dates back to the late 1970s, the Disability Insurance Trust Fund is the only one of the three Social Security Trust Funds which is considered to be in good financial condition. In fact, this fund is predicted to show a surplus over both the short and long run, even under pessimistic economic assumptions. This may, to some degree, be due to the tightening up of eligibility criteria.

The reviews were originally scheduled to begin in January, 1982, and were expected to net $10 million in savings over fiscal years 1982 through 1985. However, the reviews were begun in March of 1981, and, despite an increase of 400 percent in the number of reviews between 1980 and 1982, staffing levels were increased by only 27 percent nationally. Social Security recently revised their savings estimates, saying that the reviews will produce a net savings of between $2.6 and $3.2 billion between fiscal years 1982 and 1985. I am certainly in favor of achieving government savings by eliminating ineligible recipients, but let us look more closely at what has transpired.

The Social Security Adminstration chooses which cases are to be reviewed on the basis of likelihood of medical improvement or ineligibility. Cases are submitted to the state office. The state office notifies the beneficiary of his upcoming review, and that he should submit evidence of his continued disability. If the claimant is found to be eligible by the state agency, he is notified of his continued benefits.

In the case where a beneficiary is found no longer eligible, he is informed of that fact and told of his right to submit additional medical evidence and reevaluation. If the beneficiary is still considered ineligible, he is notified and told that he has the right to appeal the decision within 60 days to an Administrative Law Judge. This is the first opportunity for the individual to meet face-to-face with a decision-maker. Should the ALJ rule against the claimant, the next step of appeal is through the Appeals Council, a 15-member panel within the Office of Hearings and Appeals which may rule on the ALJs decision. If the claimant is not satisfied with the Appeals Council decision his final appeal would be to the Federal district court.

The fact that so many individuals are being terminated from benefit status only to be reinstated during the appeals process indicates that the accelerated reviews have created some serious problems in the disability program.

Among them are:

The number of cases—in 1980 about 100,000 cases were reviewed; 650,000 will be reviewed in 1983 and thereafter;

Accelerated review—the reviews were instituted 10 months ahead of time, which did not allow enough lead time for staff preparation;

Criteria changes—individuals under review who have not improved medically may still be terminated due to changed criteria; and

Appeal delays—the appeals process may take anywhere from 6 to 12 to 18 months—during which most claimants are not receiving benefits.

These are only a few of the most apparent problems which we will explore today.

There has been widespread Congressional concern over this topic. Earlier this year I attended an oversight hearing of the Senate Governmental Affairs Committee on this topic, and the Senate Aging Committee, of which I am a member, has also explored the issue and has put together a report which outlines many of the problems in the review process.

There have also been some administrative reforms instituted as of October 1982. But I believe the time has come for the Congress to face head-on these many concerns. Just as financing of the Social Security System is one of the very most crucial issues we now face in terms of financial costs, so reform of the current disability review process is critical in terms of real human costs. This will be documented through the testimony we hear today.

I have already pledged my full support to legislation by Senators Cohen and Levin which would extend benefits through the appeals process. This legislation will be a key provision of legislation expected to be considered in the upcoming lame duck session of the Congress.

However, additional, more comprehensive legislation is necessary, and the Congress must address this in 1983. I intend to remain very actively involved in that process.

I look forward to hearing today's testimony.

[From the Arkansas Democrat, Oct. 31, 1982]

MASS DISABILITY CHECK CUTS "CAUSING A LOT OF GRIEF"

(By Carl T. Hall)

Out of every 100 Arkansans who get monthly disability checks from the Social Security Administration, about 49 are being found well enough to go back to work and are having their payments stopped.

Included in that category are people who apparently have no reason to complain. Some are even being investigated for fraud. Others have been ordered by the courts to repay the government, usually because they were receiving disability checks while working on the side.

But about half of those affected by the cutoffs do complain, and about 60 percent of the complainers are being upheld when they take their cases before administrative law judges, who hear appeals. Hundreds of those who lose ultimately sue in federal court.

"It's still too soon to tell how the courts are going to go on this," said James W. Stanley, a North Little Rock lawyer whose firm is handling about 75 pending appeals.

The new wave of scrutiny on disabled Social Security recipients began in early 1981, after the General Accounting Office audited the rolls and found evidence of gigantic waste and abuse.

People who didn't qualify were draining off an estimated $2 billion a year, the study said.

"The necessity of making these reviews was obvious," said Dee O'Neil, program analyst at the Dallas regional office of the Social Security Administration.

Social Security responded to the GAO audit by first conducting some studies of its own which confirmed that something needed to be done and doubled the GAO's estimate of waste. Congress stepped in and directed that all recipients be reviewed at least once every seven years. Many have to be reviewed every three years.

In the year that ended May 28, 5,054 Arkansans were asked to prove they were still disabled by Social Security's standards. Of that number, 2,709, or 54 percent, were judged to be "capable of performing some type of substantial work activity."

For the most recent three-month period, the figure dropped to 48.8 percent in Arkansas, which is still higher than the National average and is second-highest in the five-state region headquartered in Dallas. (Officials said they can't explain the variations.)

Critics complain that the system is unfair and clumsy. They say much of the money being saved on people judged healthy enough to work is being lost on the 30 percent of them who successfuily appeal, a process that can drag on for as long as a year.

But the sharpest criticism, concerns the effect on the honest recipients whose lives are disrupted. Bewildered by the form letters and frightened at the prospect of losing their income, some people say they are being forced into bankruptcy or onto welfare, face foreclosure on or eviction from their homes only to be reinstated to the disability rolls after having fought the system for months.

"I can understand people's feeling," said Herbert R. Louks, Social Security district manager in Little Rock.

That comes as little comfort to people like Hazel Boyer, a 50-year-old North Little Rock woman who hasn't worked since 1977. She sufferes from lower intestinal problems that cause her to lose control of her bowels.

Mrs. Boyer said she got a termination letter in the fall of 1981 from the Social Security office. She continued receiving checks through March 1982 but now has to pay some of them back.

Last Christmas, Mrs. Boyer suffered a heart attack. She said she can't walk more than a half a block now without feeling ill. Social Security was told about the heart attack, but Mrs. Boyer who has only a fifth-grade education, said: "They didn't say nothing—just you'll hear from us."

Right now with a federal suit against Social Security pending, Mrs. Boyer is surviving on $70 a month in food stamps and the help of her family. But she said her crisis has led to two divorces in the family and has strained everyone's resources.

Because of the Social Security Administration's decision, Mrs. Boyer also lost her right to Medicare and faces about $20,000 in unpaid medical bills.

"I can tell you it hasn't been easy . . . I'm always depressed. It was a terrible thing to do at the time they did it," she said.

Joe Bledsoe, 55, of Pettus said he worked at two jobs for about 20 years, putting in 16-hour days regularly as a washroom attendant and working in a packing house. He never finished the third grade.

Suffering already from a heart condition and high blood pressure, Bledsoe underwent surgery for kidney trouble in 1979 and had to stop working. He got his first disability check in November 1979.

His last check was in February. "I get $69 worth of food stamps every month and my wife has a part-time job," he said "But, she has to drive so far, most of it goes back into the gas tank. It's getting hard."

Social Security isn't welfare. All the people being cut from the disability rolls are sidelined workers who, after long absences from the labor market, are expected to find a job during a recession. Some are trying and failing, often hampered by their history

of incapacity. "Every one of these disability cases makes a story in itself," Stanley said.

At the Social Security office in Little Rock, B. J. Hauser, assistant district manager, said these sad stories are also familiar to him and his staff, but he added that is only part of the picture.

"We often think, 'Gosh, it would be nice to do something for this person.' Your heart may bleed for this person, but what can you do? He just doesn't fit into the program," Hauser said.

Administrators at the Little Rock office point with pride to their employees' record of generosity. The local Social Security office was the only federal agency to receive a gold award last year from the Pulaski County United Way Campaign.

"We're not a bunch of cold-hearted people," Louks said.

Lawyers representing the claimants don't necessarily argue with that point. But they say the system itself is wrong and needs changing.

"There is a need for this kind of review," said Anthony Bartels, a Jonesboro lawyer. "But right now, I'd say it's a little cold. They're just wholesale terminating people, and it's causing a lot of grief."

Bartel said he knows of two people, both on disability because of mental illness, who received termination notices and committed suicide soon afterward. However, he said there was no proof the suicides was a direct result of the cutoffs. Regardless, Bartels said, "There are a lot of injustices taking place."

A publication called Social Security Forum, produced by a lawyers' group, reprinted a letter recently from Joseph M. McGuire, a disability case examiner in Texas.

In the letter, McGuire said it was his opinion—based on nine years' experience—that "20 percent of the truly disabled and needy claimants are being victimized" in the rush to get the shirkers off the disabled list.

". . . We are doing irreparable damages to the lives of many of our fellow citizens," McGuire wrote.

Social Security administrators like Bill Shadle, staff assistant in Little Rock, agree that some "horror stories" may have occurred where obviously disabled people were cut off by mistake. But they say steps are being taken to improve the system.

A key change now being implemented will affect the manner in which initial notice of review is given to recipients. Personal letters will be used instead of form letters.

"The real horror stories, like people who were on life support systems and were cut off, will be nipped in the bud," by this change, Shadle said. The idea is not only to save money but to avoid serious mistakes in making disability determinations.

The personal contact also will allow officials to better explain the system to recipients.

Officials say they expect the rate of removal from the rolls to decrease by about 50 percent because, today, mostly people with treatable conditions have been checked. Those whose conditions are not likely to show any improvement with time or treatment, and who are more likely to pass the review, haven't been checked yet.

Standards are also being revised. People with certain types of health problems won't have to worry about losing benefits, O'Neil said, because the list of allowable health problems is being expanded.

Meanwhile, the U.S. District Court at Little Rock, has assigned the job of screening the burgeoning Social Security caseload to a federal magistrate. About 200 cases are pending.

Also, federal officials are investigating 79 cases in Arkansas where people may have deliberately gotten more disability benefits than they deserved.

In June, a Texarkana man convicted of failure to report work activity was ordered to repay $11,348 he had received while supposedly being unable to work.

A year before that, a Hot Springs man was convicted of using false information to obtain another Social Security card so that he could collect benefits and work at the same time. He was ordered to pay back $2,024.40.

"It's kind of hard for me to say I'm proud of what's been done when there's some guy who's been cut off, but the program has done what we expected it to do," said Louks.

A figure on the amount of savings that has been created by the removals isn't available yet, officials said. But O'Neil said the early indications are that the initial estimates will prove accurate.

"We're talking about maybe $4 billion in taxpayers' money here. This is something we had to do, and now that we've had some experience, we expect to be doing it better," O'Neil said.

IT'S "NO DEAL" FOR 75.7 PERCENT IN ARKANSAS

(By Mike Masterson)

James Biggs sat alone on the railroad tracks beside his rural trailer home. Frustrated and despondent over losing his Social Security disability benefits, he could not understand why the system that so willingly helped him for years had now cut him off cold.

Raising a shotgun barrel to his chest, he drew a long, deep breath and asked for forgiveness. His finger gently squeezed the trigger and a muffled explosion sent him reeling sideways onto the tracks. A dozen iron pellets had shredded his heart. He was dead instantly.

Three weeks later, an administrative law judge ruled that Biggs should never have been removed from the disability rolls. He granted the man's back benefits to the widow and family.

Biggs, a mental patient, died last year in Ola, Ark. Those who knew about his condition said he was the victim of a system in this state and nationwide that has cut thousands of persons from the disability rolls.

Records from the latest Commerce Clearing House Unemployment Report show Arkansas leading the nation in the number of people initially denied for disability benefits. Nearly 76 people of every 100 who apply in Arkansas are denied. Only Puerto Rico denies more.

Evidence abounds that many disabled Arkansans also have suffered enormous trauma after being cut from existing rolls during an ongoing review process that has become contradictory and confusing to almost everyone.

In addition Arkansas may be the only state, according to 1981 records, that does not have a state agency to monitor the handling of disability claims and the overall performance of the state's Social Security disability services office.

The absence of such a watchdog agency has been cited as one reason why Arkansas leads the nation in initially denying benefits. Critics charge that the disability office in Little Rock and those in other states exist only as "puppets" of the various federal regional Social Security offices in their quest to cut spending.

In Arkansas, state disability director Ken Patton, who is appointed by the governor, answers directly to regional officials in Dallas. The Dallas officials, in turn, respond to the national Social Security Administration headquarters in Baltimore, Md.

In other states, disability program directors must respond also to state agencies that exist as buffers between the needs of the state and those of the Social Security Administration, one source said.

All of Arkansas' disability claims and those in other states, are currently under review by congressional order. Every claim filed in Arkansas is automatically reviewed and "graded" in Dallas for adherence to the increasingly restrictive Social Security definitions of disability.

Patton said if the Arkansas office grants too many claims that regional federal officials disagree with, his office could be in danger of "being taken over and run by Social Security."

Patton said that while Arkansas may lead all other states in the number of initial claims that it denies, Arkansas also leads the nation in the number of disabled people on the rolls in proportion to population.

"About 51 of every 1,000 people in Arkansas are drawing disability," he said. "If you want to be fair, you'll print that."

He said his office denies so many initial claims because "more people apply for disability in Arkansas than anywhere else. For every 10 who apply in Oklahoma, we have 15 in Arkansas," he said. "Consequently, we have to deny more."

The director blamed the larger number of applicants here on the fact that opportunities for welfare assistance in Arkansas are limited, implying that many who seek disability are not actually disabled by definition. An administrative law judge who has heard hundreds of disability cases and who frequently overrules the claims denials from Patton's office during appeals, disagreed with the director.

"It doesn't matter whether 100 or 1,000 people apply for disability in Arkansas," he said. "When you're measuring our state's performance record, it is based only on the percentage per 100 who apply for benefits. And Arkansas is the best in the country—or the worse, depending on your perspective—for denying people initially."

The judge, who asked not to be identified, said he believed more people apply for disability in Arkansas "because there are a lot more elderly, minority and illiterate people here than in other states. And those people may well be disabled."

Records show that claimants who are denied benefits and who pursue the lengthy appeal process wind up having their benefits reinstated about 60 percent of the time.

Administrative law judges who hear those appeals traditionally have reversed decisions of the Social Security claims examiners in the majority of cases. Claims examiners collaborate with physicians retained by Social Security in making the initial determinations for each case. Their decisions are based on medical records.

Patton said that Arkansas in recent years has had an award winning office with "one of the best records in the nation for processing claims quickly and accurately in the eyes of Social Security.

"We really are not a so-called denying state with disability claims," he said. We actually allow a lot more claims in proportions to our population.

Patton said his Little Rock office denied his own uncle who was suffering with heart disease. "You can imagine how badly I felt a few weeks later when my uncle died of that same heart problem. But we didn't have any choice. He didn't meet the criteria for disability that Social Security has set out for us to follow."

"I wish we could allow everyone who applies, but we can't" he continued. "I know we have problems. But if we don't strictly adhere to the guidelines and definitions that Social Security has given us, they will come in and take over the office. That would mean 161 people out of work."

The situation has led Patton to unlist his phone number for the first time in 16 years. "I could take the abusive calls," he said, "but it was too much when they started on my kids."

In the *Congressional Record* of June 22, 1982, Patton said that a professional organization he belonged to estimated that "at least 20 percent of the recipients whose benefits are being cut in Arkansas are unable to work."

The state office of disability determination will review some 39,000 cases this fiscal year and about 44,000 disability cases next year, according to a recent report issued by Patton's office.

The story of James Biggs' suicide, while painting an extreme picture of how wholesale disability cuts have hurt Arkansans, is not an isolated example of such despair.

A similar thing happened just over a year earlier when Dale M. Barnett, a 58-year-old Baptist minister with a history of serious mental and heart disorders, shot and hanged himself in his Harrison home after losing his benefits.

An administrative law judge found that the claims examiner who decided to drop Barnett from the rolls had not considered all of the available medical evidence, particularly the more recent information about the man's heart ailment.

The judge reinstated the dead man's benefits that were later paid to his family.

Others like Wanda Coleman, 48, of Green Forest (who attended her October disability hearing in Harrison hobbling on a cane from the crippling effect of multiple sclerosis, wearing dark prescription glasses for impaired vision and taking medication to avoid a second heart attack) also cannot understand why they have been purged from the system.

The claims examiner in Little Rock who cut her name from the list of eligible recipients after six years wrote in an opinion that the woman "could sit eight hours a day and perform unskilled work in a clerical position." But the examiner had never seen the woman.

At the hearing before an administrative law judge, her back was hurting so badly that she could only sit for a few minutes at a time in the witness chair. When the judge asked her to pick up papers on a desk, her hands trembled uncontrollably and the papers shook. After a 20-minute interview, her benefits were reinstated by the judge, who said she should never have been cut in the first place.

Ralph Irvan of Fort Smith wasn't as fortunate. He died last year, 18 days after his disability application was denied by the Appeals Council in Arlington, Va. The council reversed the decision of an administrative law judge who, in turn, had overruled the initial state decision to dent Irvan's claim.

In his ruling, the judge said Irvan was so weak at his hearing that he could "barely hold his head up," and said the man had to be force fed by squeezing food down his throat. "Of course he was eligible," said the judge.

An autopsy showed that Irvan's internal organs were filled with malignant tumors.

The situation is such in Arkansas and elsewhere that claim examiners who initially approve or deny the application say they feel "trapped" between the increasingly restrictive Social Security Administration definitions of disability and the people they frequently must reject because of those guidelines.

Whereas up until 1977, people who applied for disability were examined for functional limitations, vocational problems and other such social limitations, today's decisions are based primarily on medical evidence that proves a person cannot work at any job anywhere in the country.

There is no consideration given to the availability of such jobs in a given area, only that a person could perform a type of job "somewhere" in the United States.

Adding to the complications of those cut from the rolls of existing benefits is that Social Security disability payments are also tied to Medicare and Medicaid eligibility. So people losing their disability benefits are also cut from those rolls.

The claims examiners who are forced to adhere strictly to the Social Security definitions of what constitutes a disabled person are also frustrated at being frequently overruled by administrative law judges who routinely apply a more liberal set of criteria to judge a person's condition.

Ironically, there are also some claims examiners who secretly agree with the findings of those judges, according to discussions with several examiners at their national convention in Hot Springs. But none wanted to be identified for fear of political retribution.

"The worse thing about it is that we, the claims examiners, come out looking like the bad guys because we are forced to follow these rigid eligibility guidelines," said one examiner.

If examiners fail to keep up with the large volume of reviews, they face the possibility of losing annual merit raises, one outspoken examiner said. "It makes most of us sick, but who wants to risk losing their raise by taking more time with their reviews?"

Even Patton acknowledged that in some cases he has called some administrative law judges to ask if they would overrule his office's denial decision when the disabled person's appeal reached the judge.

"I'm not proud of it," he said, "but I've done it because I knew that person was disabled, they just didn't meet the precise definitions we have to use."

Richard Simmons, deputy director for the Social Security Administration, said efforts are under way that would force the administrative law judges to use only the Social Security guidelines and definitions in making their decisions.

Observers believe the net effect of that change (while making the decisions more uniform), would tighten down even more on the number of disabled people who are reinstated by the judges.

SOCIAL SECURITY CUTBACKS BORDER ON TERRORIZATION

(By Jack Moseley)

Grabbing away the crutches of a one-legged man and kicking him in the shin is not going to cure the problems of the Social Security System.

That makes about as much sense as trying to fix a blown engine by popping in a new oil filter. It just won't work.

But what a bunch of federal bureaucrats are doing to sick and disabled Americans is even worse than attacking a cripple. In some instances, it borders on terrorizing those least able to defend themselves, stripping them of dignity creating added anxiety for heart and lung patients, forcing them onto welfare rolls and forgetting they even exist. The coldest, cruelest form of man's inhumanity to man must be bureaucratic indifference in a government that is intended to be "of, by and for the people."

I'm talking about the current wave of undeserved cutoffs of Social Security disability benefits here and across the nation. This will be the subject of public hearings in Fort Smith next Friday by Sen. David Pryor. Hopefully, those hearings will be a step toward correcting an awful mess that is inflicting misery on far too many people.

I'm a hard-nose when it comes to disabled and handicapped people. I have quoted John Kennedy that "life itself is not always fair." I have deplored welfare cheats and those who abuse other public benefit programs. I have argued that the taxpayers cannot afford to put elevators in every two-story school house in America for the benefit of those in wheelchairs. But I have never denied a public responsibility for those who cannot work because of physical and mental conditions totally beyond their control, especially for those who paid into the Social Security System the same as most of us.

As I understand it, here is what has happened:

Under the Carter administration, Congress passed a law ordering regular reviews of people drawing disability benefits to eliminate ongoing cash payments to people who had recovered from one disability or another and were still receiving monthly government checks. That made sense. Then under the Reagan administration, this review procedure was accelerated. Meanwhile, Social Security was getting into deep financial trouble, but the Disability Trust Fund was strong and healthy. It was so healthy, in fact, that last week money was borrowed from this fund to meet the financial obligations of Social Security to millions of retirees.

Now, bureaucrats charged with reviewing whether people are entitled to continued disability benefits appear to have worked themselves into a zealous frenzy to see just how many people they can disqualify, regardless of medical evidence to the contrary.

Look at a few local examples:

Under the law, any person with an I.Q. of less than 60 is considered disabled. But that didn't carry much weight for a 47-year-old man with an I.Q. of 43. Cared for by his mother, who happened to be hospitalized when his benefits were cut off, this man appealed to an administrative law judge and won back his benefits. But until the appeal hearing, there was no money coming in for his care.

A local man was sent to a doctor selected by the government. The physician found that his back was 75 percent disabled. But the bureaucrats ruled that he was 75 percent physically fit and chopped off his disability.

A western Arkansas physician was angered that his heart patient was being cut off disability. "How can you stupid bastards even consider that this lady is capable of any type of gainful employment?" he wrote. The lady had a medical history showing her right ventricle is one and a half times normal, her heart pumps at only 40 percent normal, she is physically weak and in constant danger of a heart attack.

Would you believe this? A 23-year-old man, borderline retarded since brain surgery and blind in one eye (limited vision in the other), is confined to a Fort Smith nursing home and has to be told when to eat, bathe and dress. But he had his benefits cut off.

Fortunately, people like this have a way to fight back, even though they and their families find themselves without benefits while they're fighting. They can appeal the bureaucrats' decisions to one of three local administrative law judges who reexamine the evidence. These judges, by the way, usually are the first representatives of the federal government to actually see those appealing their cases face to face in an open, on-the-record hearing. The decisions to cut off benefits have been made by bureaucrats shuffling stacks of government forms that frightened, confused, and threatened the people who tried to fill them out.

Now, even the judges are receiving pressure from Washington to hold down the number of cases in which they reinstate benefits for disabled people. There have been rumors that the Fort Smith appeals office "could be closed" if things don't go more to the whims of Washington. All rulings against the bureaucrats from here now automatically go to Washington for yet another review.

Before anyone gets the idea the local law judges are just a trio of bleeding hearts wildly giving away Social Security dollars, consider a few more facts. Arkansas has the lowest rate of approved disability claims in the country. And it is the fourth lowest among the 50 states in reinstating benefits for those who appeal bureaucratic decisions to halt payments. The local judges do reinstate more disability claims than their counterparts in other Arkansas cities, but U.S. Rep. John Paul Hammerschmidt is the only Arkansas congressman who has a personal representative helping disabled constituents gather and present medical evidence in appeal cases. That means local people frequently have their appeals better organized and feel more confident because they have a member of the congressman's staff sitting next to them at the hearing.

There is no question that the Social Security system is in serious trouble, and the very real problems must be faced. No one is suggesting that people who do not deserve benefits should receive them.

But insanely whacking benefits from people those benefits are intended to help is WRONG. That will not solve Social Security's problems. It makes about as much sense as re-arranging the deck chairs on the Titanic; it will not change the ultimate fate of the ship.

Meanwhile, people right here where we live are hurting and being hurt because someone in Washington is playing games with statistics spit out of computers. Each of those statistics is a human being. Don't they deserve to be treated as such?

● Mr. RIEGLE. Mr. President, I am extremely pleased that finally after 22 months since this administration started reviewing social security beneficiaries, we are beginning to take steps to correct this urgent problem. Many of us in Congress have been fighting for months and months for immediate action, and now, almost 2 years after the onset of the continuing disability investigations, we are taking the first steps toward seriously dealing with this wretched and heartbreaking situation.

I am convinced that all Americans would be outraged if they were fully aware of congressional inaction in the face of the unnecessary suffering and hardship that millions of our disabled citizens have experienced and continue to experience as a result of the way the administration is implementing the disability reviews. I will not rehash the stories of those individuals found no longer disabled by social security who a few days or months later have died from their disabilities. Nor will I relate the numerous stories of disabled persons who, upon learning that their benefits were terminated, committed suicide. I also will not now supply my colleagues with a list of the hundreds of thousands of beneficiaries who, after having their benefits stopped, had these critical funds restored by an administrative law judge after months and months of appeals. The entire process implemented by this administration has been needless and heartless and must be changed.

While H.R. 7093 clearly does not solve the problems in our social security disability program, it does nonetheless provide relief in the form of continuing benefits through the appeals process. It does not adequately address the manner in which the Social Security Administration is implementing the review process and it fails to confront the serious problem of the high reversal rate we are seeing for beneficiaries who chose to appeal their termination decision. However, hopefully,

during the opening weeks of the 98th Congress, we will swiftly move to enact comprehensive legislation that will not simply patch up but will reform the unacceptable practices and procedures that are inflicting serious harm on a group of Americans least able to fight back.

Mr. President, it is important to note that it was not the intent of the section of the amendment to H.R. 7093 dealing with the meaning of disability to alter the standards relating to the determination of when an individual is under a disability. The question relating to the legality of the current standards of determining when an individual is under a disability should be undertaken at the time Congress considers comprehensive legislation during the 98th Congress.

Mr. President, recognizing that H.R. 7093 is simply a first step in dealing with a situation that clearly requires comprehensive reform, I urge all of my colleagues to support this measure.●

SOCIAL SECURITY DISABILITY REVIEWS

Mr. ROBERT C. BYRD. Mr. President, 2 years ago the Congress enacted legislation to phase in periodic and systematic review of social security disability cases. This legislation was intended to improve the administration of the disability program, by insuring the removal of beneficiaries from the disability rolls who had medically recovered and could return to productive employment.

The reviews were to be phased in over time so that State agencies would be able to prepare for greatly increased workloads. However, when the Reagan administration took office, it moved to accelerate the review process. In the past year, hundreds of thousands of diabled individuals have had their disability benefits abruptly terminated, with little advance notice, only to have benefits reinstated after many months of waiting to appeal the termination decision.

Many of those whose benefits were cut have never seen the State examiner, but have had their case decided by a review of their file, which often does not contain recent or pertinent medical information. The waiting period for a review of the termination decision can be as long as a year. And, for many people—who are without other income—this is simply too late. Seriously ill people are forced to sell their homes or take other desperate, irreversible actions. Regrettably, most of us in this body have heard of suicides by individuals, who grew terribly despondent during this waiting period limbo. Other people have actually died from their disability during this time.

I know of one constituent of mine, Mrs. John Carter, whose plight was highlighted by the Charleston Gazette for the people of the State. Mrs. Carter attempted to go back to work when her disability benefits were cut. She worked less than 3 days before she collapsed. Mrs. Carter aggravated her disabilities in her employment attempt and subsequently underwent surgery. It is unclear how permanent the health damage will be. I ask unanimous consent that the August 29 article on disability from the Charleston Gazette be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. A majority of individuals who are being forced to undergo this painful process are truly disabled. Almost two-thirds of those who appeal have their benefits restored.

This legislation will give the Congress time to study the disability review process. More legislation may be needed to insure that Social Security Administration officials do not continue a pattern of cruel benefit terminations in an effort to meet over-zealous cost savings goals.

Mr. President, all social security beneficiaries have worked and paid into the disability trust fund in the same fashion they have paid into the retirement fund. The social security commitment is the same in each case. These people have earned and been promised the right to modest economic assistance in the event they become disabled. They should be secure in this right.

With the Government rolling back on this commitment to disabled Americans, it further undermines confidence in the social security system and leads to distrust of Government by the American public. I hope passage of today's legislation is still another step toward instilling and restoring confidence. Without a doubt, we will be taking others in the not too distant future. I commend Senators LEVIN, METZENBAUM, DOLE, and COHEN for the spirit in which this bipartisan compromise legislation was reached.

(EXHIBIT 1)

[From Outlook, Aug. 29, 1982]

DISABILITY—QUESTION OF BENEFIT ELIGIBILITY LEAVES THOUSANDS IN LIMBO

(By Beth Spence)

Two months after her disability Social Security benefits were cut off, Anna Carter went back to the work she knew best—waitressing.

She lasted less than three days before she collapsed and had to be carried out of the restaurant by her disabled husband, John.

That was in May. Today the 51-year-old Mrs. Carter is in a wheelchair with both her legs in knee-high casts. She has had one operation on her feet and faces further surgery, but she already has been told she probably will never again walk unaided.

"I went back to work because I was thinking we couldn't make it on what John gets a month on his disability," said Mrs. Carter, a serene-looking woman with a hint of Virginia in her Monroe County speech. "We were have a hard enough time with both our checks."

Mrs. Carter's case is not unique. Across the country, thousands of disabled people have been cut from the Social Security rolls during the past year and a half.

Between May 1, 1981, and May 28, 1982, state disability determination boards terminated benefits for 106,862 persons—or more than 44.4 percent of the cases reviewed. In West Virginia, 1,509 people lost their benefits.

A majority of the cases—Social Security officials say 55 percent—eventually are won on appeal, but lawyers representing disabled clients are frustrated with the length of time it is taking to process the appeals.

They also say tremendous pressure to deny claims is being placed on examiners who make the determinations and on administrative law judges who hear the appeals.

Joseph D. Coffman, manager of the Charleston Social Security office, said the reason for the increased number of re-evaluations is 1979 congressional action requiring review of all claims at least once every three years to make sure recipients still qualify for benefits.

Thomas H. Zerbe, managing attorney for the West Virginia Legal Services Plan in Lewisburg, argues that the review is being used as an excuse to terminate benefits for recipients whose conditions have not improved.

"Sometimes this results in a disabled individual being forced to go against his doctor's advice and return to work while his case is pending," Zerbe said. "The consequences can be tragic."

Anna Carter can attest to that. A sickly child, Mrs. Carter can remember that her father had to carry her from room to room when at 9 she developed a condition doctors diagnosed as an inflammation of the bones in her legs.

Through the years, the infection has recurred in different parts of her body. Mrs. Carter says the initial attack left her legs so weak that even as an adult her ankles turn if she steps on something as small as a matchstick.

At 16 she quit school to get married and she and her husband moved to Virginia. By the time she was 19, she was divorced, on her own, and had a child to support.

She took a job waiting tables, but was soon forced to take a second job at a ribbon factory to make ends meet. For six years, she worked 16 hours a day—an 8-hour shift at the restaurant, followed by an 8-hour shift at the factory.

When the ribbon factory closed, she worked for three years at a book-binding factory, standing on her feet 8 hours a day.

During that time her health began to deteriorate. Between 1949 and 1980 Mrs. Carter had 23 operations, including the removal of 16 inches of her intestines, part of her stomach, her gall bladder, a disc from her back and a large gland from her neck.

In addition, she was diagnosed as having angina, for which she takes nitroglycerine, and an aneurysm in her temple.

Mrs. Carter qualified for Social Security disability benefits in 1973, after she had to quit working at the small grocery store she and Carter, her second husband, bought after they were married in 1967.

One of her more severe health problems is dumping syndrome, a condition in which food passes rapidly through the body. She developed the problem after 75 percent of her stomach was removed in 1963.

"When I eat, it goes right through me," she explains, "I got to where I only weighed

98 pounds and the doctor told me to eat six times a day and lie down for an hour after I eat."

By following her doctor's instructions, Mrs. Carter had managed to spend more than a year off the operating table when she was told by Social Security officials to go for an examination early in 1981.

"The doctor told me to move my neck and hands, which I did, and touch my toes, which I couldn't do, and that was the examination," she explained.

In February, examiners determined that Mrs. Carter again could work in a store, and she was told that her checks would be cut off in March and her Medicare benefits would end in April.

"I knew I had to go to work," she said. "I thought I was lucky to find the job I did."

The first day, her heels bothered her, but she thought they would be all right, that she just had sore feet because she wasn't used to standing all day.

"For the three days I worked I never ate a mouthful of food because I knew the owner would let me go if I had to keep going to the bathroom," Mrs. Carter explained.

The second day her feet were worse. "The third day I just couldn't put weight on my heels. John had to come and get me and carry me out. If he couldn't have helped me, I would have had to crawl."

Her doctor said the infection, which has spread through her body since childhood, had been touched off again and she should not bear weight on her feet.

"But you know how it is, sometimes you have to get around," she said. "I let the dog out and she was in heat. A male dog came around and I just forgot about my feet. I took two steps toward the dog and I must have hit the back of my heel on the doorsill. The tendons snapped in both my heels."

Mrs. Carter had to have the tendons wired back to the bones in her ankles. Complications developed in her right leg, which doctors have told her will require further surgery, and a large sore has appeared on her ankle.

"I asked if I would walk and the doctor said he was afraid I'd never walk like I did," she said.

As Mrs. Carter's medical bills mount and her appeal drags on, she and her husband are trying to sell their two-story farmhouse just outside Alderson in Monroe County. They plan to move to Virginia and care for Carter's aging mother in exchange for food and shelter.

"We had planned on this for our retirement home," said Carter, who has had a heart attack and triple bypass surgery. "We've been more contented here than anywhere we ever lived. But we just can't make it."

Social Security officials are convinced that situations like Mrs. Carter's are rare.

"We are concerned that some people have been taken off the rolls who are indeed disabled, although we believe that number is small," said John Trollinger, deputy press officer for the Social Security Administration in Baltimore.

Trollinger said the agency has found an error rate of only 3 percent in monitoring state decisions.

In West Virginia, Social Security disability claims are reviewed by the Disability Determination Section of the state Division of Vocational Rehabilitation.

A. J. Allen, administrator of the DDS, said reviews show that the conditions of a number of individuals have improved, making them no longer eligible for benefits. Others weren't disabled in the first place, he said.

Allen said he believes "far too many claims" denied by examiners are being reversed by administrative law judges.

Asked if the Reagan administration has set a national goal of terminating 25 percent of the cases reviewed, Allen said bruskly, "No. But we'll probably terminate more than that."

Trollinger cited a number of reasons for the high number of reversals by administrative law judges.

"Sometimes the condition may have worsened," he said. "Sometimes medical evidence can be presented that wasn't available when the decision was made to terminate benefits. And when the administrative law judge hears the case, he or she has the ability to look at the person. Sometimes you can tell a lot more when you see someone."

For Janet Friedman, the paralegal in Lewisburg who is handling Mrs. Carter's appeal, the reversals aren't happening quickly or often enough.

"I feel that attitudes are changing," Ms. Friedman said. "I'm just not winning the cases I used to win. One examiner as much as said to me that he wanted to decide the case in favor of the client, but he was afraid it would be kicked back to him.

"It's a waste of time, energy and money," she said. "They hired more people in DDS when they had to start making the decisions, they get rooms at Holiday Inns, hearing assistants are paid. Where's the saving? It seems like the money is being redirected instead of going to recipients."

A case that was decided quickly, according to Ms. Friedman, involved a client whose benefits were cut off in March. His hearing was Aug. 11 and the decision to restore his benefits made on Aug. 19.

But that was "unusually fast," according to Zerbe. More typical is the case of a client who was terminated in March 1981, had a hearing in November and didn't get a decision until the following June.

"So many of these people are being asked to do without benefits for more than a year and, because our funds have been cut, we're having to turn away clients," Zerbe said. "There's not only an injustice here, but peoples' ability to respond legally is being cut off."

Zerbe said examiners and administrative judges have admitted privately they are under a lot of pressure to get people off the disability rolls.

He said decisions in favor of the clients—both by DDS officials and administrative law judges—are being carefully scrutinized, while decisions against clients are not being monitored.

Trollinger said his statistics show more reviews of cases decided against clients. "We have reviewed twice as many reviews that terminated benefits as those that allowed benefits," he said.

Social Security "is such a political football and no one wants to cut old age and survivors off," according to Zerbe. "This seems to be a way that required no congressional action and no one had to take the heat."

No one, that is, except people like Anna and John Carter, who can't hide their bitterness toward the Reagan administration.

Wiping tears from her eyes, Mrs. Carter said, "When I woke up after that last surgery, if President Reagan had been standing at the foot of my bed, I would have told him what I thought. Just think, all of this for 2½ days work."

"This is all on account of Reagan," Carter said. "Because of him, what walking she'll be doing will be on crutches."

● Mrs. HAWKINS. Mr. President, the much-needed benefits of disabled individuals in this country are being unjustly terminated due to the Social Security Administration's continuing disability investigation (CDI) process. To correct this situation, I have cosponsored a measure that imposes a temporary, moratorium on new disability terminations under the program of accelerated CDI's. It is essential at this time to remedy the Social Security Administration's (SSA) procedure for determining continuing disability for those that receive disability benefits. Today we have an opportunity to pass reform legislation on the CDI process.

In 1980 Congress passed the Social Security Disability Amendments of 1980. This legislation mandated the SSA to review the eligibility of current recipients at least once every 3 years unless the disability was permanent. In March 1982 the SSA accelerated the periodic review process. The subsequent increase in the number of cases reviewed nationally is astounding: In 1980 the SSA reviewed 185,000 cases for continuing disability; in 1981 351,000 cases were reviewed; in 1982, 567,000 cases were reviewed; and the estimate for 1983, is 806,000 cases.

The review program was enacted in good faith—to insure that disability benefits were awarded to those truly in need. The effect of the periodic review of disability cases, however, was disastrous. Between March 1981 and April 1982, the SSA reviewed 405,000 cases and 45 percent of those cases had their disability benefits terminated. Of those who appealed their terminations, 67 percent had their benefits reinstated. The irony is that eligible disabled individuals were temporarily deprived of benefits—and waited 9 to 12 months for eventual reinstatement. The only alternative for some was to accept welfare. Worse yet, because of the high volume of CDI's, reviewers no longer have the time to make considered and equitable decisions.

In May the Subcommittee on Oversight of Governmental Management held hearings to determine why benefits were discontinued, only to be reinstated at a later date. Later, in August, the Senate Finance Committee held hearings on the social security disability insurance program. As a result of these hearings, several bills were introduced to correct the inequities caused by the acceleration of CDI's. Senator HEINZ introduced S. 2731, which affects the CDI process in basically three ways: By first, improving the management and administration of CDI's; second, by providing more protection against improper terminations; and finally by helping those legitimately terminated to return to the

labor force more easily. In addition, Senators METZENBAUM, MOYNIHAN, and CHAFEE introduced S. 2739, which makes four basic changes in the current SSA review procedure. First, there could be no termination unless a recipient's medical condition improved or the original determination of disability was clearly erroneous. Second, the SSA must attempt to obtain medical evidence from the treating physician before requiring a consultative examination at the taxpayers' expense. Third, even though disabilities are not listed in the SSA regulations, they shall be considered of equal severity. And finally, benefits will be continued pending the final decision by the administrative law judge. Other valuable proposals have been introduced, too.

However, while these proposed solutions are most constructive, we must provide our disabled with a speedier solution.

I am therefore pleased to support H.R. 7093 today. The provisions contained in H.R. 7093 will give our disabled immediate, temporary relief. This measure does so by: First, continuing payment of disability benefits through appeal; second, permitting the Secretary to slow the CDI process; third, requiring the Secretary to review medical evidence for the 12-month period preceding the CDI, and finally, requiring the Secretary to report semiannually on various aspects of the CDI process. Although this legislation is intended to be only a short-term solution to the CDI problem, I fully support it. It provides badly needed relief to those who receive disability benefits and it gives Congress time to find an acceptable permanent solution to the review procedure.●

The PRESIDING OFFICER. The bill is open to further amendment. If there be further amendment to be proposed, the question is on the engrossment of the amendment and the third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. Is all time yielded back on the bill?

Mr. COHEN. Yes.

Mr. LEVIN. I yield back the remainder of my time.

Mr. COHEN. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The bill having been read a third time, the question is, Shall it pass? The clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from New Mexico (Mr. DOMENICI), the Senator from Arizona (Mr. GOLDWATER), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Maryland (Mr. MATHIAS), the Senator from Illinois (Mr. PERCY), the Senator from Indiana (Mr. QUAYLE), the Senator from Delaware (Mr. ROTH), the Senator from Vermont (Mr. STAFFORD), the Senator from Idaho (Mr. SYMMS), and the Senator from Wyoming (Mr. WALLOP), are necessarily absent.

I further announce that, if present and voting, the Senator from Illinois (Mr. PERCY), would vote "yea".

Mr. ROBERT C. BYRD. I announce that the Senator from Arkansas (Mr. BUMPERS), the Senator from Texas (Mr. BENTSEN), the Senator from Delaware (Mr. BIDEN), the Senator from California (Mr. CRANSTON), the Senator from Illinois (Mr. DIXON), the Senator from Connecticut (Mr. DODD), the Senator from Missouri (Mr. EAGLETON), the Senator from Colorado (Mr. HART), the Senator from Alabama (Mr. HEFLIN), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Hawaii (Mr. MATSUNAGA), the Senator from Maine (Mr. MITCHELL), the Senator from Georgia (Mr. NUNN), the Senator from Rhode Island (Mr. PELL), the Senator from Michigan (Mr. RIEGLE), and the Senator from Massachusetts (Mr. TSONGAS) are necessarily absent.

I further announce that, if present and voting, the Senator from Delaware (Mr. BIDEN), the Senator from Michigan (Mr. RIEGLE), the Senator from Illinois (Mr. DIXON), and the Senator from Rhode Island (Mr. PELL) would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 70, nays 4, as follows:

[Rollcall Vote No. 394 Leg.]

YEAS—70

Abdnor	Ford	Melcher
Andrews	Garn	Metzenbaum
Armstrong	Glenn	Moynihan
Baker	Gorton	Murkowski
Baucus	Grassley	Nickles
Boren	Hatch	Packwood
Boschwitz	Hatfield	Pressler
Bradley	Hawkins	Proxmire
Brady	Hayakawa	Pryor
Burdick	Hollings	Randolph
Byrd, Robert C.	Huddleston	Rudman
Cannon	Humphrey	Sarbanes
Chafee	Inouye	Sasser
Chiles	Jackson	Schmitt
Cochran	Jepsen	Simpson
Cohen	Kassebaum	Specter
D'Amato	Kasten	Stennis
Danforth	Kennedy	Stevens
DeConcini	Laxalt	Thurmond
Denton	Leahy	Tower
Dole	Levin	Warner
Durenberger	Lugar	Weicker
East	Mattingly	
Exon	McClure	

NAYS—4

Byrd, Harry F., Jr.	Helms	Zorinsky
	Long	

NOT VOTING—26

Bentsen	Bumpers	Dixon
Biden	Cranston	Dodd
Domenici	Mathias	Riegle
Eagleton	Matsunaga	Roth
Goldwater	Mitchell	Stafford
Hart	Nunn	Symms
Heflin	Pell	Tsongas
Heinz	Percy	Wallop
Johnston	Quayle	

So the bill (H.R. 7093), as amended, was passed.

Mr. LEVIN. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LEVIN. Will the majority leader yield for a moment?

Mr. BAKER. Yes.

Mr. LEVIN. I ask unanimous consent that Senators BOREN, LEAHY, BOSCHWITZ, DECONCINI, and JEPSEN be added as cosponsors of the amendment which we adopted as part of the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

The title was amended so as to read:

"An Act to amend the Internal Revenue Code of 1954 to reduce the rate of certain taxes paid to the Virgin Islands on Virgin Islands source income, to amend the Social Security Act to provide for a temporary period that payment of disability benefits may continue through the hearing stage of the appeals process, and for other purposes.".

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I have tried for most of this day and a good part of yesterday to identify other pieces of legislative business or executive business that we might be able to take care of today. I have not been able, for a variety of reasons, to find anything that looks as if it would occupy at least the useful attention of the Senate. Therefore, I announce that there will be no further rollcall votes today.

ORDER FOR RECESS TODAY UNTIL MONDAY, DECEMBER 6, 1982, AT 11 A.M.

Mr. BAKER. Mr. President, I ask unanimous consent that, when the Senate completes its business today, it stand in recess until the hour of 11 a.m. on Monday next.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR PERIOD FOR TRANSACTION OF ROUTINE MORNING BUSINESS ON MONDAY

Mr. BAKER. Mr. President, I ask unanimous consent that, after the recognition of the two leaders under the standing order and any special order which may be ordered, there be a time for the transaction of routine morning business to extend not past the hour of 12 noon on Monday, in which Sena-

tors may speak for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business, in which Senators may speak for not more than 5 minutes each, to extend not past the hour of 2:30 p.m. today.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

(Mr. GORTON assumed the chair.)

Mr. HAYAKAWA. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MARIHUANA FARMERS

Mr. HAYAKAWA. Mr. President, on September 30 of this year, I chaired a hearing in the Subcommittee on Forestry, Water Resources, and Environment of the Senate Agriculture Committee. The hearing, was the first attempt by Congress to explore this pervasive problem. It was most informative, and, I believe, productive. We heard from several Federal, State, and local law enforcement and land management agencies, as well as a number of concerned citizens.

The subject of the inquiry was the growing of marihuana on Federal lands.

Several very important points were brought out at the hearing, and I would like to highlight three of them. First, the problems associated with the cultivation of marihuana on our public lands, and for that matter our private lands, will only worsen as we are successful in stopping the drug before it reaches our borders. Currently, we are able to locate, at best, 10 percent of the domestically grown marihuana—obviously a low-risk factor for the grower. Second, there is a tremendous need for greater coordination between Federal, State, and local law enforcement officials. In addition, greater financial and manpower resources must be committed to bringing the cultivation under control.

Finally, we must begin immediately to improve our knowledge of where and how much of the plant is being grown in the United States. The paucity of reliable data is appalling. How can we target resources effectively if we do not even know where our target is?

I think we should all be grateful for a recent issue of Newsweek magazine which made a rather intensive study of this matter in an issue 3 or 4 weeks ago.

We have developed technology in our satellites, which we are only beginning to put to work. The time to move is now, before the problems gets any further out of hand.

I shall ask unanimous consent that three articles regarding domestic marihuana cultivation be printed in the RECORD. These are interesting articles and will bring to my colleagues a flavor of just what is going on in the marihuana fields of California.

Let me call attention to the fact that California is only one of the many States in which marihuana is being grown in enormous quantities. Hawaii, Mississippi, Florida, and many other States are involved in this same activity.

These stories are from the San Francisco Examiner, the Bureau of Land Management newsletter known as BLM Newsbeat, and the third story is also from BLM Newsbeat.

Mr. President, I ask unanimous consent to have printed in the RECORD these three articles to which I have made reference.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the San Francisco (Calif.) Examiner, Nov. 7, 1982]

SEARCH AND DESTROY: VIET-STYLE WAR AGAINST POT FARMERS

(By Ivan Sharpe)

GARBERVILLE, HUMBOLDT COUNTY—The white-and-gold Huey helicopter with its tense flak-jacketed and heavily armed occupants zoomed over the ridge with a thumping roar just as it did 20 years ago on Vietnam combat missions.

San Francisco Police Sgt. Richard Cairns, one of the seven men squeezed into the cabin, gripped his M-16 and prepared to jump. He was ready to blast at anyone who took a shot at him.

As a narcotics officer, he'd seen the little drug wars that often erupted on San Francisco street corners. The growers claimed they didn't hurt anybody, but he didn't agree.

He didn't think of himself as a crusader, but he felt a grim satisfaction. He couldn't do anything about heroin in Mexico or cocaine in Colombia, but he was going to enjoy cutting down some of the most highly prized pot in the world right here in Humboldt County.

Here they were, living in their little utopia, he thought, cultivating and harvesting the bright-green sinsimella plants as if they were tomatoes or turnips. Well, the law said growing marijuana was a crime.

And if some hippie decided to make a stand in his pot field, he was ready to defend himself like everybody else in the state Bureau of Narcotics Enforcement's tiny paramilitary task force.

It was a clear day, just after lunch. A KERG-FM talk show in Garberville was being swamped with angry calls from pot growers, who talked excitedly of military-style assaults and helicopters blackening the skies. But there was only one chopper, albeit busy, lent by U.S. Customs to the state.

The shattering whump-whump-whump of the chopper as it cleared the treetops north of Alderpoint and about 20 miles northeast of Garberville paralyzed the small family in the trailer atop the ridge.

Cairns could see a man outside the trailer squinting at the helicopter hovering a few feet above the ground. As he turned and started to run back toward the trailer, Cairns jumped and charged after him up the hill, yelling to him to halt.

In moments, Cairns had the man on the ground with his arms handcuffed behind his back.

The initial assault team had split up after jumping out of the chopper. Two had headed down the hill toward the pot gardens. Two had joined Cairns. They pointed their guns at the trailer and yelled at its occupants, "Police! Come out. We have a search warrant."

Nothing happened. They could see figures moving inside. The tension grew. They imagined guns being aimed at them behind the windows. A state agent banged on the door.

Finally, they came out—cowed and frightened. A 49-year-old woman and her two small children, and two other women.

The dichotomy between growers and cops in southern Humboldt County is curious. Both sides firmly believe with moral certainty that right is on their side. And they are downright paranoid about the other.

The Garberville area is like the Wild West, where long-haired men with guns—former hippies, refugees from the cities and the campuses, adventurers, thieves—and their sometimes scruffy women righteously defend lifestyle and property.

Kent Pollock, publisher of the Star Route newspaper in Redway, is sympathetic to the growers. He believes marijuana should be legalized.

Winner of numerous journalism awards, including a shared Pulitzer Prize when he worked on big newspapers back East, he bought the tiny bimonthly seven months ago and increased circulation to 3,600. A popular feature is a full page of "Marijuana Obituaries," which detail raids in the county (this year deputies seized a record 12,894 plants).

"Part of the problem up here," he explains, "is that both sides don't understand each other. Of course there are some crazy growers who would shoot at planes. And it would be foolish to ignore that. On the other hand, the vast majority of people growing pot in the hills are peaceful families with children.

"What I think is wrong here is that this whole problem is a manifestation of a law that's out of kilter with society. It's that simple. Here we are in an era when a joint is no big deal and yet we have agents in the woods armed and camouflaged as if they were fighting in Vietnam.

"And yet there are thousands up here who used to be on welfare and now grow pot. They don't feel like criminals. They are producing what this country wants. Are these raids worth the real social and mental havoc they create?"

This widely-held view has divided the county's officialdom, chiefly along the lines of how much outside law enforcement help the county should seek and who should control it. But recent violence on the pot farms is hardening opposition to the pot growers.

Eureka businessman Danny Walsh, chairman of the Board of Supervisors, is losing sympathy with the growers. "As long as vio-

lence is involved, they are getting what they deserve," he says.

"These guys are a bunch of phonies," says the outgoing sheriff of Humboldt County, Gene Cox. "They're blowing smoke, buddy. If they are such heroes, how come there are five dead people this past year directly connected to narcotics, mostly in Humboldt? Is this what America wants?

"These guys won't admit they are doing something illegal. And yet they don't want it legalized. There's too much big money in it right now. They're hollering like a wounded eagle right now, because they are getting hurt in the pocketbook."

Pete Mouriski is the field agent in charge of the state's narcotics task force. He doesn't see pot growers as any different from heroin dealers in San Francisco.

"I think they are crooks and that's the way we go about it. I think I'm helping society. I'm anti-dope, I believe weed is evil, and I love doing what I do," he says.

He scoffs at growers' complaints about the helicopter. It can be frightening, he admits, but he sees it as mostly a work-saving device that gets agents to the scene of a raid quicker than by vehicle.

This year's sweep by up to 20 agents and reserve deputies in the extreme northern counties began near the Oregon-California border Oct. 11, and then moved south, not attracting public notice until they made 13 raids in the more populated area around Garberville.

In a Eureka motel room recently, the 38-year-old Mouriski tallied up the results of the sweep: 2,227 growing plants, 1,186 pounds of processed weed, with a total weight of 9,099 pounds. And eight arrests.

It doesn't bother him that he has been accused of running a military-style operation.

"Of course we're fearful. We'd be fools if we weren't," he says. "Everyone has weapons. They are committing a felony and they stand to lose a lot of money. I've no doubt in my mind that given the opportunity, some of them would shoot at law enforcement people."

The mother had been dressing the children for a rare pickup-truck ride to Garberville to buy some animal feed, to be followed by an even rarer treat—dinner in a restaurant.

The 52-year-old man lying in front of her with his face in the dirt was her husband. She yelled "Fascists!" at the grim-faced law enforcement officers.

The mother felt miserable. So this was it, the end—after all those lonely nights with no neighbors to talk to, the cruel winds and the snow, the crummy water system, the flickering television set, the back-breaking toil to establish a home.

They had quit city life 18 months ago. He was a driver and she a teacher. A year or so before, they had been driving around Garberville on vacation. They decided to buy 50 acres, isolated but with an enchanting view.

And, later, when they decided to sell their home, they bought a large, yellow mobile home with three bedrooms, a kitchen and a living room for $50,000 in Eureka, and drove it over the dirt roads to the top of their hill. Here they would start a new life. The feeling of freedom was exhilarating.

Then her husband began to study books on growing marijuana. She wasn't enthusiastic about his new hobby. She knew many of the people in the area were growing the weed. But she was still nervous.

It wasn't the illegality of it that bothered her. She thought the law was silly; the effects of marijuana, she felt, were not any worse than those of alcohol. But she'd heard of the ripoffs and the violence and the occasional police raids. And she didn't even like to smoke pot herself.

But her husband wanted to grow it, and the money the crop fetched would be welcome. So she pushed her fears to the back of her mind and watched, with dwindling unease, as her husband trotted off almost every day down the hill to cultivate his plants.

He was harvesting his first crop of sinsimella when the cops came.

The couple were flown by helicopter to Alderpoint and transported by car to Eureka for booking in the county jail.

The officers set to work cutting down the plants that had been spotted by aerial reconnaissance several days before. There were two small plots in the trees down the hill—80 plants in one and 72 in the other. But the biggest plants were in the greenhouse—20 thriving monsters 18 feet and taller, the sticky THC-loaded resin on the buds twinkling like diamonds.

Inside the trailer, the police found floors and tables covered with drying processed weed. There were bags of it in the closets. There was so much of it around, in fact, the kids couldn't help tripping over it.

Sgt. Cairns gazed at the 1,290-pound haul with satisfaction. The man had said it was all destined for San Francisco. He did a quick calculation. Depending on how much it was sold for, the family could gross up to $300,000. But after passing through the hands of distributors and street peddlers, the stuff could be worth as much as $2.5 million on the streets.

"I was very impressed with the operation," Cairns would say later. He was with the task force as an observer for two days. When he returned, he would recommend to Police Chief Cornelius Murphy that San Francisco cops join state narcotics agents in next year's raids.

BLM Announces Policy to Eradicate Marijuana

The Bureau of Land Management will give full support to cooperative efforts with other federal, state and local agencies to eradicate illegal cultivation of marijuana on public lands in California, according to Ed Hastey, State BLM Director.

Hastey said there has been a growing public awareness of the problem of widespread growing of marijuana on public lands in the state and the public expects a solution.

In a policy statement on the issue, he said the illegal cultivation often has adverse impacts on public resources, public access and the safety of the public and BLM employees.

"Therefore, it is the goal of BLM in California to work cooperatively with other land management and law enforcement agencies to prevent the cultivation of marijuana on the public lands," Hastey said.

"BLM managers and law enforcement personnel will coordinate among themselves and with local law enforcement officials to meet this goal. The local law enforcement officials have the lead responsibility for taking enforcement and legal action," he added.

He said BLM will develop and maintain a law enforcement records system on marijuana cultivation, instruct BLM employees on methods of reducing personal danger to themselves while on field assignments, conduct a public awareness program to keep the public informed about eradication efforts, and provide financial and personnel assistance to law enforcement agencies to help eradicate marijuana on BLM administered land.

In addition to its illegality, Hastey said the cultivation of marijuana on public lands is harmful to the environment because of the use of certain pesticides, herbicides, and other chemicals to protect the crops. He said the illegal use also has an adverse impact on legitimate land and resource users such as miners, ranchers and loggers.

Marijuana Raid Nets Big Haul

(By Tom Evans)

One rendezvous for the marijuana raid was the California Highway Patrol Office in Garberville. Several deputies from the Humboldt County Sheriff's Substation and two BLM Special Agents met there. There also were two drivers with rental trucks parked down on Main Street.

The rest of the task force was assemblying in Eureka and consisted of more deputies, headed by Capt. James Sintic; and U.S. Customs Agents, who were supplying a seven-passenger helicopter and pilots. The fifth agency participating was the California Department of Justice's Narcotics Bureau.

While we were waiting for word to roll, one of the truck drivers came up to the Highway Patrol Building and said he had been approached by a local resident down at the street.

"Going to get the hippies' grass today?" the resident had asked.

"No sir," the driver said, "we're hauling furniture today."

"You go ahead and get the grass," the man said and walked on.

When the driver got out of the truck he noticed a baggy in the gutter and picked it up. The plastic envelope contained about two ounces of dried green marijuana. Street value of that amount is about $150.

Finally the word came to go and the convoy moved north on Highway 101 to Redway, then westward toward Shelter cove in BLM's King Range National Conservation Area, designated by Congress for enjoyment by all people. About an hour later, near Shelter Cove, we turned north and traveled along an extremely dry, dusty road toward the Gitchell Creek drainage. The final rendezvous point was only two miles from BLM's Horse Mountain campground.

In total there would be 36 law enforcement officers participating, more than enough to discourage resistance by illegal growers. The plan was to get an early start but heavy fog had the helicopter grounded at Eureka. There was no choice but to wait for the fog to burn off.

The helicopter was essential because the ocean side of King Range is rugged country. The mountains rise to an elevation of 4,000 feet within a mile of the surf. Much of it usually is considered inaccessible. That's one of the main reasons it's considered ideal for growing marijuana. Slopes with southern exposure and a source of water are the other key requirements.

While we waited, David Howard, Special Agent-in-Charge for the Bureau of Land Management in California, said the Horse Mountain Campground is in an area classi-

fied for primitive recreation but there is little hiking in the area.

"You can't hike anywhere in there now without being afraid of running upon a marijuana plantation," he said.

There also have been reports in the press that growers set booby traps such as sharp steel spikes that can penetrate the soles of boots, explosives activated by trip wires, and fish hooks hung at eye level in the brush.

Finally the loud speaker on top of the Sheriff's car crackled and announced that the helicopter was airborne. Soon afterward it landed in an area that once had been used for loading logging trucks. After a briefing on how to enter and leave the chopper, it was time to move.

First to go was a group of deputies armed with semi-automatic rifles. The second and third groups were the BLM Special Agents and State Narcotics Officers. Because of the extremely steep terrain, the helicopter had to hover in the area of the fields at an elevation of about 10 feet off the ground. The officers had to jump to the ground.

As a field was secured, the total group would help chop down the plants and tie into bundles of four—the weight that a person could lift without difficulty. The bundles later were piled in a cargo net and hoisted by the helicopter for transport to the main landing site. There the bundles were weighted and loaded into the rental trucks.

When it came time for the officers to leave the fields, they climbed up on the skid of the chopper, one at a time, and held on to the co-pilot's hand while climbing into the door. Other hands grabbed their clothing and pulled them inside.

At the end of the two-day operation, three fields had been harvested, yielding a little more than 4,700 pounds, including stalks and stems. Howard estimated the street value of the usuable portions of the plants at $600,000.

He said he field raided on the second day with a smaller force appeared to be an experimental patch, with many plants grafted with shorter, heavier varieties.

"There were varieties from Pakistan, Brazil and Hawaii," he said. A number of the plants were tagged by the grower for identification.

There was only one casualty. One of the BLM Special Agents got tangled up with a nest of yellow jackets and was stung 12 times. First aid was given quickly and he continued to help out.

The yield from both days harvest was taken to a disposal area in Eureka by Sheriff's Deputies and burned.

Mr. HAYAKAWA. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION OF ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. The time for morning business has expired.

Mr. BAKER. Mr. President, I ask unanimous consent that the time for the transaction of routine morning business be extended until 2:45, in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE CALENDAR

Mr. BAKER. Mr. President, I have a few items that appear to have been cleared on both sides of the aisle for action routinely. I wonder if the minority leader would be prepared for me to go through that list now and to ascertain his willingness or unwillingness to deal with these matters at this time.

Mr. ROBERT C. BYRD. Yes, I am prepared.

Mr. BAKER. I thank the minority leader. The first is Calendar Order No. 942, S. 1340. If it is agreeable to the minority leader, I would like to proceed to that at this point.

Mr. ROBERT C. BYRD. Mr. President, may I say, for the information of the majority leader, that three measures are cleared on this side, including Calendar Order Nos. 942, 943, and 945, if it will be of help to him.

Mr. BAKER. It is most helpful, and I am very grateful.

USE AND DISTRIBUTION OF CERTAIN INDIAN JUDGMENT FUNDS

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of S. 1340, Calendar Order No. 942.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 1340) to provide for the use and distribution of Clallam judgment funds in docket numbered 134 before the Indian Claims Commission, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill which had been reported from the Select Committee on Indian Affairs with amendments, as follows:

On page 2, line 13, strike "20", and insert "80";

On page 2, line 14, strike "in", through and including "percentum" on line 15;

On page 2, line 15, after "projects", insert the following: "and the balance in an investment program";

On page 2, line 23, strike "20 per centum", and insert "the balance";

On page 3, line 4, after "that", insert "up to";

On page 3, line 6, strike "50 per centum", and insert "the balance";

On page 3, strike line 8, through and including line 20, and insert the following:

SEC. 5(a). The shares of funds apportioned under the first section of this Act shall be advanced to the respective groups within 60 days of this Act: *Provided*, That in the case of the Jamestown Band, a formal organization has been approved by the Secretary. At the time the funds are advanced, the Secretary shall account to the respective groups for all investments made and income received since May 4, 1977.

(b) Except as otherwise provided in this section, funds held and administered by the respective groups which are the subject of this Act, and income derived therefrom, shall be treated in the same fashion as if held in trust by the Secretary of the Interior, *Provided*, That such funds may be invested or expended by the respective groups in accordance with their plans without requirement of prior approval by the Secretary.

(c) Upon advancement of the funds to the respective groups the Secretary shall have no further trust responsibility for the investment, supervision, administration or expenditure or expenditure of such funds, and the United States shall be exempt from any liability for such investment, supervision, administration or expenditure of such funds.

SEC. 6. None of the funds distributed under this Act shall be subject to Federal or State income taxes or be considered as income or resources in determining eligibility for or the amount of assistance under the Social Security Act.

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding any other provision of law, the funds appropriated by the Act of May 4, 1977 (91 Stat. 61), in satisfaction of a judgment awarded in favor of the Clallam Tribe of Indians of the State of Washington in Indian Claims Commission docket numbered 134, less attorney fees and litigation expenses, and including all interest and investment income accrued, shall be divided by the Secretary of the Interior (hereinafter referred to as the "Secretary"), in shares of one-third to each, as agreed to by the adoption of tribal resolutions cited in sections 2, 3, and 4 of this Act, among the Port Gamble Indian Community, the Lower Elwha Tribal Community, and the Jamestown Band of Clallam Indians.

SEC. 2. The share of the funds apportioned to the Port Gamble Indian Community under the first section of this Act shall be used as provided in tribal resolution numbered 79-A1, dated January 9, 1979, requiring that 80 per centum of such share be used in a revenue supplement fund for community projects and the balance in an investment program.

SEC. 3. The share of the funds apportioned to the Lower Elwha Tribal Community under the first section of this Act shall be used as provided by tribal resolution numbered 8B-78, dated August 27, 1978, requiring that up to 80 per centum of such share be used in a land acquisition program that includes the payment of an outstanding loan on land purchased by the community and the balance in economic development projects for the benefit of all tribal members.

SEC. 4. The share of the funds apportioned to the Jamestown Band of Clallam Indians under the first section of this Act shall be used as provided by resolution numbered 78-1, dated October 1, 1978, requiring that up to 50 per centum of such share be used in a land acquisition program and the balance in a business development program.

SEC. 5 (a). The shares of funds apportioned under the first section of this Act shall be advanced to the respective groups

within 60 days of this Act, *Provided*, That in the case of the Jamestown Band, a formal organization has been approved by the Secretary. At the time the funds are advanced, the Secretary shall account to the respective groups for all investments made and income received since May 4, 1977.

(b) Except as otherwise provided in this section, funds held and administered by the respective groups which are the subject of this Act, and income derived therefrom, shall be treated in the same fashion as if held in trust by the Secretary of the Interior, *Provided*, That such funds may be invested or expended by the respective groups in accordance with their plans without requirement of prior approval by the Secretary.

(c) Upon advancement of the funds to the respective groups the Secretary shall have no further trust responsibility for the investment, supervision, administration or expenditure or expenditure of such funds, and the United States shall be exempt from any liability for such investment, supervision, administration or expenditure of such funds.

SEC. 6. None of the funds distributed under this Act shall be subject to Federal or State income taxes or be considered as income or resources in determining eligibility for or the amount of assistance under the Social Security Act.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

PEMBINA CHIPPEWA INDIANS

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of S. 1735, Calendar Order No. 943.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 1735) to provide for the use and distribution of funds awarded the Pembina Chippewa Indians in docket numbered 113, 191, 221, and 246 of the Court of Claims.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Select Committee on Indian Affairs with amendments, as follows:

On page 2, line 13, after "Tribe,", insert "the Little Shell Tribe of Chippewa Indians of Montana";

On page 2, line 18, strike "or 6(a)", and insert "6(1) or 7(a);;

On page 2, line 25, strike "plus";

On page 2, line 25, insert the following:

(4) the number of members of the Little Shell Tribe of Chippewa Indians of Montana as described in section 6(1), plus

On page 3, line 4, strike "(4)", and insert "(5);

On page 3, line 5, strike "6(a)", and insert "7(a)";

On page 3, strike line 24, through and including "Indians." on line 3, page 4;

On page 4, strike line 24, through and including line 12, page 5, and insert the following:

(A) economic programs

(B) recreation or

(C) tribal administration

On page 6, after line 20, insert the following:

SEC. 6. The funds allocated by section 2 to the Little Shell Tribe of Chippewa Indians of Montana shall be used and distributed as follows:

(1) Eighty per centum of such funds shall be distributed in the form of per capita payments (in sums as equal as possible) to all enrolled members of the Little Shell Tribe of Chippewa Indians of Montana who are living on the date of enactment of this Act and who meet the enrollment criteria under Sec. 7(a) of this Act.

(2) Twenty per centum of such funds shall be held in trust and invested by the Secretary for the benefit of the members of the Little Shell Tribe of Chippewa Indians of Montana. The governing body of such tribe is authorized to use the interest and investment income accrued on such 20 per centum portion, on an annual budgetary basis subject to the approval of the Secretary, for—

(A) the administration of such tribe, or

(B) social and economic programs;

Provided, That the Secretary shall act on the Tribe's petition for Federal recognition prior to September 30, 1985. In the event that recognition is not approved, the twenty per centum portion shall be distributed in the form of per capita payments (in sums as equal as possible) to those persons who qualify for per capita payments under Sec. 6(1);

Provided further, That if the Secretary fails to act on the recognition petition by September 30, 1985, the Secretary shall make a report to Congress on that date outlining the reasons for his failure to act and shall make no per capita payments under this subsection until action on the petition is final.

SEC. 7. (a) In order to establish eligibility to participate in the distribution of the funds allocated to the nonmember Pembina Chippewa descendants under section 2, the Secretary shall develop a roll of all individuals who—

(1) are of at least one-quarter Pembina Chippewa blood,

(2) are citizens of the United States,

(3) are living on the date of the enactment of this Act,

(4) are not members of the Red Lake Band of Chippewa Indians, the Turtle Mountain Band of Chippewa Indians, the Chippewa Cree Tribe, or the Minnesota Chippewa Tribe, and (5) are—

(A) enrolled, or the descendants of a lineal ancestors enrolled—

(i) as Pembina descendants under the provisions of the Act of July 29, 1971 (85 Stat. 158), for the disposition of the 1863 Pembina Award, or

(ii) on the McCumber roll of Turtle Mountain Indians of 1892, or

(iii) on the Davis role of Turtle Mountain Indians of 1904, or

(iv) as Chippewa on—

(I) the tentative roll of the Rocky Boy Indians of May 30, 1917, or

(II) the McLaughlin census report of the Rocky Boy Indians of July 7 1917, or

(III) the Roe Cloud roll of Landless Indians of Montana, or

(B) able to establish Pembina ancestry on the basis of any other rolls or records acceptable to the Secretary.

(b) The Secretary shall promulgate regulations regarding Pembina enrollment procedures and shall utilize any documents acceptable to the Secretary in establishing eligibility of an individual to receive funds under this section.

(c) Funds allocated to the nonmember Pembina decendants under section 2 shall be distributed on a per capita basis to the individuals enrolled under subsection (a).

SEC. 8. (a) Any payment of a per capita share of funds to which a living, competent adult is entitled under this Act shall be paid directly to such adult.

(b) Any per capita share of funds to which a deceased individual is entitled under this Act shall be paid, and the beneficiaries thereof determined under regulations prescribed by the Secretary.

(c) Any per capita share of funds to which a legally incompetent individual or an individual under eighteen years of age is entitled under this Act shall be paid in accordance with such procedures (including the establishment of trusts) as the Secretary determines to be necessary to protect and preserve the interests of such individual.

On page 10, strike line 11, through and including line 17, and insert the following:

SEC. 9. None of the funds distributed under this Act shall be subject to Federal or State income taxes or be considered income or resources when determining eligibility for, or the amount of, assistance under the Social Security or any Federal or federally-assisted program.

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding any provision of the Act of October 19, 1973 (87 Stat. 466; 25 U.S.C. 1401, et seq.), or any other law, regulation, or plan promulgated pursuant thereto, any funds appropriated in satisfaction of a judgment awarded to the Pembina Chippewa Indians in dockets numbered 113, 191, 221, and 246 of the Court of Claims shall be used and distributed as provided in this Act.

SEC. 2. All of the funds appropriated with respect to the judgment awarded the Pembina Chippewa Indians in dockets 113, 191, 221, and 246 (less attorney fees and litigation expenses), including all interest and investment income accrued, shall be divided by the Secretary of the Interior (hereinafter in this Act referred to as the "Secretary") among the Turtle Mountain Band of Chippewa Indians, the Chippewa Cree Tribe of Rocky Boy's Reservation, the Minnesota Chippewa Tribe, the Little Shell Tribe of Chippewa Indians of Montana and the nonmember Pembian descendants (as a group) so that each is allocated an amount which bears the same relationship to such funds as the number of members of such band, tribe, or group who are described under section 3(1), 4(1), 5(1), 6(1) or 7(a) bears to the sum of—

(1) the number of members of the Turtle Mountain Band of Chippewa Indians described in section 3(1),

(2) the number of members of the Chippewa Cree Tribe of Rocky Boy's Reservation described in section 4(1),

(3) the number of members of the Minnesota Chippewa Tribe described in section 5(1),

(4) the number of members of the Little Shell Tribe of Chippewa Indians of Montana as described in section 6(1), plus

(5) the number of nonmember Pembina Chippewas enrolled by the Secretary under section 7(a).

SEC. 3. The funds allocated by section 2 to the Turtle Mountain Bank of Chippewa Indians shall be used and distributed as follows:

(1) Eighty per centum of such funds shall be distributed in the form of per capita payments (in sums as equal as possible) to all enrolled members of the Turtle Mountain Band of Chippewa Indians who are living on the date of the enactment of this Act.

(2) Twenty per centum of such funds shall be held in trust and invested by the Secretary for the benefit of the members of the Turtle Mountain Band of Chippewa Indians. The governing body of such band is authorized to use the interest and investment income accrued on such 20 per centum portion, on an annual budgetary basis subject to the approval of the Secretary, for—

(A) the administration of such band, or

(B) social and economic programs.

Such 20 per centum portion of the principal shall not be available for per capita payments.

SEC. 4. The funds allocated by section 2 to the Chippewa Cree Tribe of Rocky Boy's Reservation shall be used and distributed as follows:

(1) Eighty per centum of such funds shall be distributed in the form of per capita payments (in sums as equal as possible) to all enrolled members of the Chippewa Cree Tribe of Rocky Boy's Reservation who—

(A) establish Pembina Chippewa ancestry to the satisfaction of the Secretary, and

(B) are living on the date of the enactment of this Act.

(2) Twenty per centum of such funds shall be held in trust and invested by the Secretary for the benefit of the members of the Chippewa Cree Tribe of Rocky Boy's Reservation. The governing body of such tribe is authorized to use the interest and investment income accrued on such 20 per centum portion, on an annual budgetary basis subject to the approval of the Secretary, for—

(A) economic programs

(B) recreation or

(C) tribal administration

Such 20 per centum portion of the principal shall not be available for per capita payments.

SEC. 5. The funds allocated by section 2 to the Minnesota Chippewa Tribe shall be used and distributed as follows:

(1) Eighty per centum of such funds shall be distributed in the form of per capita payments (in sums as equal as possible) to all enrolled members of the Minnesota Chippewa Tribe who—

(A) are designated as Pembina Bank Chippewas on the basis the tribal procedures which are approved by the Secretary, and

(B) are living on the date of the enactment this Act.

(2) Twenty per centum of such funds shall be held in trust and invested by the Secretary for the benefit of the members of the Minnesota Chippewa Tribe. The White Earth Reservation Business Committee, in consultation with the Pembina Program Planning Committee, is authorized to use the interest and investment income accrued on such 20 per centum portion, on an annual budgetary basis subject to the approval of the Secretary, for—

(A) a joint investment and use program for the bans affiliated with the reservation, or

(B) reservation social and economic programs.

Such 20 per centum portion of the principal shall not be available for per capita payments.

SEC. 6. The funds allocated by section 2 to the Little Shell Tribe of Chippewa Indians of Montana shall be used and distributed as follows:

(1) Eight per centum of such funds shall be distributed in the form of per capita payments (in sums as equal as possible) to all enrolled members of the Little Shell Tribe of Chippewa Indians of Montana who are living on the date of enactment of this Act and who meet the enrollment criteria under Sec. 7(a) of this Act.

(2) Twenty per centum of such funds shall be held in trust and invested by the Secretary for the benefit of the members of the Little Shell Tribe of Chippewa Indians of Montana. The governing body of such tribe is authorized to use the interest and investment income accrued on such 20 per centum portion, on an annual budgetary basis subject to the approval of the Secretary, for—

(A) the administration of such tribe, or

(B) social and economic programs;

Provided, That the Secretary shall act on the Tribe's petition for Federal recognition prior to September 30, 1985. In the event that recognition is not approved, the 20 per centum portion shall be distributed in the form of per capita payments (in sums as equal as possible) to those persons who qualify for per capita payments under Sec. 6(1);

Provided further, That if the Secretary fails to act on the recognition petition by September 30, 1985, the Secretary shall make a report to Congress on that date outlining the reasons for his failure to act and shall make no per capita payments under this subsection until action on the petition is final.

SEC. 7. (a) In order to establish eligibility to participate in the distribution of the funds allocated to the nonmember Pembina Chippewa descendants under section 2, the Secretary shall develop a roll of all individuals who—

(1) are of at least one-quarter Pembina Chippewa blood,

(2) are citizens of the United States,

(3) are living on the date of the enactment of this Act,

(4) are not members of the Red Lake Band of Chippewa Indians, the Turtle Mountain Band of Chippewa Indians, the Chippewa Cree Tribe, or the Minnesota Chippewa Tribe, and

(5) are—

(A) enrolled, or the descendants of a lineal ancestors enrolled—

(i) as Pembina descendants under the provisions of the Act of July 29, 1971 (85 Stat. 158), for the disposition of the 1863 Pembina Award, or

(ii) on the McCumber roll of Turtle Mountain Indians of 1892, or

(iii) on the Davis role of Turtle Mountain Indians of 1904, or

(iv) as Chippewa on—

(I) the tentative roll of the Rocky Boy Indians of May 30, 1917, or

(II) the McLaughlin census report of the Rocky Boy Indians of July 7, 1917, or

(III) the Roe Cloud roll of Landless Indians of Montana, or

(B) able to establish Pembina ancestry on the basis of any other rolls or records acceptable to the Secretary.

(b) The Secretary shall promulgate regulations regarding nonmember Pembina enrollment procedures and shall utilize any documents acceptable to the Secretary in establishing eligibility of an individual to receive funds under this section.

(c) Funds allocated to the nonmember Pembina descendants under section 2 shall be distributed on a per capita basis to the individuals enrolled under subsection (a).

SEC. 8. (a) Any payment of a per capita share of funds to which a living, competent adult is entitled under this Act shall be paid directly to such adult.

(b) Any per capita share of funds to which a deceased individual is entitled under this Act shall be paid, and the beneficiaries thereof determined under regulations prescribed by the Secretary.

(c) Any per capita share of funds to which a legally incompetent individual or an individual under eighteen years of age is entitled under this Act shall be paid in accordance with such procedures (including the establishment of trusts) as the Secretary determines to be necessary to protect and preserve the interests of such individual.

SEC. 9. None of the funds distributed under this Act shall be subject to Federal or State income taxes or be considered income or resources when determining eligibility for, or the amount of, assistance under the Social Security or any Federal or federally-assisted program.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CERTAIN LANDS HELD IN TRUST FOR THE PASCUA YAQUI TRIBE OF ARIZONA

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of H.R. 4364, Calendar Order No. 945.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 4364) to declare that the United States holds in trust for the Pascua Yaqui Tribe of Arizona certain land in Pima County, Arizona.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Select Committee on Indian Affairs with amendments, as follows:

On page 2, strike line 3, through and including line 15, and insert the following:

(1) the east half of southeast quarter of section 22;

(2) the northeast quarter of northeast quarter, south half of northeast quarter, north half of southeast quarter, south half of northwest quarter, southwest quarter of section 23;

(3) the southwest quarter of northwest quarter of section 24; and

(4) the southeast quarter of northeast quarter of northwest quarter of section 24.

SEC. 2. Nothing in this Act shall deprive any person or entity of any legal existing right-of-way, legal mining claim, legal grazing permit, legal water right, or other legal right or legal interest which such person or entity may have in land described in section 1.

On page 3, line 6, strike "Sec. 2.", and insert "Sec. 3.".

The amendments were agreed to.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I next have three discharge requests dealing with Senate Joint Resolution 244, Senate Joint Resolution 264, and Senate Joint Resolution 258. Would the minority leader advise me as to whether he has any objection to discharging the Judiciary Committee in each of those?

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

PUBLIC EMPLOYEES' APPRECIATION DAY

Mr. BAKER. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged from further consideration of Senate Joint Resolution 244, a joint resolution designating January 17, 1983, as Public Employees' Appreciation Day, and I ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will state the joint resolution by title.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 244) designating January 17, 1983, as "Public Employees' Appreciation Day."

The PRESIDING OFFICER. Without objection, the joint resolution will be considered as having been read the second time at length, and the Senate will proceed to its consideration.

The joint resolution (S.J. Res. 244) was considered, ordered to a third reading, read the third time, and passed.

The preamble was agreed to.

The joint resolution with its preamble, reads as follows:

S.J. RES. 244

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That January 17, 1983, is designated "Public Employees' Appreciation Day". The President is authorized and requested to issue a proclamation inviting the Governors of the several States, the chief officials of local governments, and the people of the United States to observe that day with appropriate ceremonies and activities.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL CHILDREN AND TELEVISION WEEK

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of Senate Joint Resolution 264, a joint resolution designating the week of March 13, 1983, as National Children and Television Week and I ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered. The joint resolution will be stated by title.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 264) to designate the week of March 13, 1983, through March 19, 1983, as "National Children and Television Week".

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration, and, without objection the joint resolution will be considered to have been read the second time at length.

The joint resolution (S.J. Res 264) was ordered to be engrossed for a third reading, was read the third time, and passed.

The preamble was agreed to.

The joint resolution, with its preamble, reads as follows:

S.J. RES. 264

Whereas television can create an intellectual and emotional environment which can play a decisive role in shaping individual development and perception;

Whereas parents and other adults should be able to look to television to provide children with true pictures of the world and positive models for behavior;

Whereas many dedicated groups and individuals strive to improve the quality of television programing viewed by children and their families; and

Whereas this Nation has a continuing responsibility to provide appropriate, stimulating programing for children and adolescents: Now therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of March 13, 1983, through March 19, 1983, is designated as "National Children and Television Week" and the President of the United States is authorized and requested to issue a proclamation calling upon all government agencies and the people of the United States to observe the week with appropriate activities supporting television programs which are attentive to the needs and interests of children.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, may I say for the advice of the distinguished minority leader and other Senators that as to Senate Joint Resolution 258, to which the minority leader indicated he could agree to a discharge and immediate consideration, there is one Senator on this side who wishes to be present at the time that matter is dealt with. I am advised he is on his way to the floor at this time, so I will forebear to make that request now.

COMMITTEE DISCHARGED FROM FURTHER CONSIDERATION AND S. 3072 ORDERED PLACED ON THE CALENDAR

Mr. BAKER. Mr. President, there is one other item that is cleared on this side to discharge the committee and place the bill on the calendar. I refer to S. 3072.

I wonder if the minority leader is in a position to entertain a request to that effect.

Mr. ROBERT C. BYRD. Yes, Mr. President, I am advised that the minority on the committee has cleared this request.

Mr. BAKER. I thank the Senator.

Mr. President, in view of the statement of the minority leader, I ask unanimous consent that S. 3072, a bill to amend the Urban Mass Transportation Act of 1964 to authorize additional appropriations, to establish a formula grant program, and for other purposes, which was referred to the Banking Committee, be discharged from that committee and placed on the calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, may I ask the distinguished majority leader what his plans are for the rest of the day and for Monday?

Mr. BAKER. Yes, Mr. President.

As I previously announced, there will be no more record votes today and, other than Senate Joint Resolution 258, I know of no other matter that can be dealt with today. There will be no record votes, either on the Calendar of General Orders or on the Executive Calendar. Therefore, I do not expect to transact any further business today.

I might say that on Monday next, December 6, it is hoped that we can deal with the concurrent resolution dealing with Poland, which has been cleared, perhaps, on both sides; a bill, S. 2607, Calendar Order No. 656, relat-

ing to housing, on which they may be a time agreement arrived at but which has not yet been fully completed; and other items which may be available after further negotiations may be dealt with on Monday.

I had hoped that we could do the D.C. appropriations bill on Monday. I am now advised that that is not feasible. Therefore, I would suggest that Members should assume that that appropriations bill will be dealt with on Tuesday, as soon as possible.

There are other items, including nominations on the Executive Calendar and perhaps treaties that are on the calendar, as well, that we are still trying to clear for Monday. I would anticipate that there will be votes on Monday. I have asked for an order for the Senate to convene at 11 a.m. I believe there are no requests for special orders on Monday. There is a time for the transaction of routine morning business provided in that same request to extend not past the hour of 12 noon, in which Senators may speak, as I recall, for not more than 5 minutes each.

I would not anticipate that the Senate will be in session late on Monday. However, Senators should understand that beginning next week late evenings may be anticipated because we will then have only 2 full weeks left of the scheduled lameduck session and we have still a great deal of work to do.

I hope that is a capsule summary at least of what is available on Monday and a little bit of what I see of the prospects on Tuesday.

Mr. ROBERT C. BYRD. I thank the distinguished majority leader.

It is the plan to recess over until Monday?

Mr. BAKER. Yes, there is an order to that effect.

Mr. ROBERT C. BYRD. Does the majority leader have anything he can say with respect to Radio Marti?

Mr. BAKER. Yes, Mr. President, I hope we can take up the Radio Marti measure on Monday. I support that measure. I hope we can do that. It is my hope we can clear it for action on Monday. It has not yet been done. There are certain complications that have developed since I last spoke with the minority leader, but they are not irreconcilable. I would fully expect Radio Marti will be available for Senate consideration on Monday.

Mr. ROBERT C. BYRD. I thank the majority leader.

For the record, may I say that there are no objections on my part to proceeding, though there are some problems on my side of the aisle.

Mr. BAKER. I think there are on both sides. It is my hope that we can get our respective parties together and work something out.

Mr. President, may I say to the minority leader that I do not plan to transact any further business today with the exception of the disposition of Senate Joint Resolution 258.

Mr. ROBERT C. BYRD. I thank the majority leader.

Mr. BAKER. As soon as that is disposed of, it is my intention to ask the Senate to recess over until Monday at 11 a.m. as previously ordered.

Mr. ROBERT C. BYRD. I thank the majority leader.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

DESIGNATION OF DECEMBER 1982 AS "NATIONAL CLOSED-CAPTION TELEVISION MONTH"

Mr. BAKER. Mr. President, earlier, the minority leader had indicated that Senate Joint Resolution 258 was cleared on his side of the aisle to discharge the Judiciary Committee and proceed with the immediate consideration of that measure.

I now ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of Senate Joint Resolution 258, a resolution to designate the month of December 1982 as "National Closed-Caption Television Month," and I ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will state the joint resolution by title.

The legislative clerk read as follows:

A Senate Joint Resolution (S.J. Res. 258) to authorize and request the President to designate the month of December 1982 as "National Closed-Caption Television Month".

The PRESIDING OFFICER. Without objection, the joint resolution will be considered as having been read the second time at length, and the Senate will proceed to its consideration.

The Senate proceeded to consider the joint resolution.

Mr. WEICKER. Mr. President, I am pleased to support Senate Joint Resolution 258, designating December 1982 as "National Closed-Caption TV Month."

Communication technology is progressing at an awesome rate, and never have its effects been more impressive than when a large portion of the population can benefit from its application. Closed captioning, for example, has revolutionized the use of TV media for people who are hearing impaired. By being able to read on the screen what they cannot hear, the deaf now have equal access to the wealth of information so abundantly available to the general public.

Openly providing subtitles on TV has sometimes caused distraction to hearing viewers. Closed captioning, however, has been developed, whereby subtitles are invisible until displayed by special decoding equipment. This unique service has been provided since March 1980 by the Closed Captioning Institute, a nonprofit corporation, who reports that in the first year of availability America's hearing-impaired population invested $10 million in decoding services.

Some 16 million people in the United States are affected by hearing loss and the incidence is growing. Thousands of letters already attest to the enrichment these people enjoy in no longer being isolated from major sources of information and enjoyment.

While the full educational impact is probably yet to be seen, it is already being applauded by many thankful parents on behalf of their children.

As 1982 is the year of disabled persons, it is a fitting time to commend the Closed Captioning Institute for the invaluable service it provides through closed-captioned decoding systems. By calling closed captioning TV to the attention of the general public, we celebrate the American committment to promoting equal opportunity to all its citizens.

I urge my colleagues to support this resolution.

Mr. President, I ask unanimous consent that the Senator from South Carolina, the Honorable STROM THURMOND, be added as a cosponsor to Senate Joint Resolution 258, which designated December 1982 as "National Closed-Caption Television Month."

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RANDOLPH. Mr. President, as an original sponsor of Federal support for the captioned films program, it is gratifying for me to know that the results of the amendments to this program have reached their zenith this year in a telecommunications breakthrough called closed captioning. Hearing-impaired Americans may now read by subtitles on the television screen what they cannot hear. The National Captioning Institute, a not-for-profit, tax-exempt corporation reports that in the first year of availability alone the hearing impaired of this country invested $10 million in decoding services. The educational, vocation, and social enrichment of this service has brought great benefits to hearing-impaired people from the very deaf child to the hearing-impaired senior citizen. This new communication technology provides opportunities to hearing-impaired Americans to experience more fully the benefits of our hearing world. I commend the National Cap-

tioning Institute for their contribution in advancing this new technology.

I am gratified to cosponsor this resolution by the able Senator from Connecticut (Mr. WEICKER) who chairs the Subcommittee on the Handicapped, to designate the month of December as "National Closed-Captioned Television Month." It will serve to highlight the value of this service to hearing-impaired Americans.

The joint resolution (S.J. Res. 258) was ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to.

The resolution with its preamble, reads as follows:

S.J. RES. 258

Whereas the Congress has officially proclaimed 1982 as the National Year of Disabled persons;

Whereas hearing-handicapped Americans of all ages traditionally have suffered isolation from society and too often have unwilling ended up as burdens to society rather than participating citizens;

Whereas the recent telecommunications breakthrough of "closed captioning" now enables these people to read on the television screen what they cannot hear and thus share—for the first time in history—that wealth of information entertainment and language so abundantly absorbed by the general public;

Whereas the innovative service, provided through the nonprofit and tax-exempt National Captioning Institute (NCI), represents the culmination of almost ten years of technological research and development, market exploration and cooperation between government, industry, and community;

Whereas the nationwide service which began in March 1980 on ABC, NBC, and PBS is already proving to open up new educational horizons and new avenues toward equal opportunity for this severely disadvantaged population, particularly its children and youth;

Whereas hearing-impaired citizens have personally invested over $17,000,000 to date for purchase of decoding devices;

Whereas many Members of the Congress have long been actively supporting development, implementation, and expansion of the closed-captioned television service which is the first of its kind anywhere in the world; and

Whereas President Reagan, referring to the closed captioning of his inaugural ceremonies and televised addresses to the Nation, has stated: "I feel very honored to be the first President in history to have spoken directly to people who had never before experienced this historic tradition": Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President of the United States is authorized and requested to issue a proclamation designating the month of December 1982 as "National Closed-Captioned Television Month" in recognition of this invaluable new service for deaf and hard-of-hearing American citizens, and calling on the people of the United States to observe the month with appropriate programs, ceremonies, and activities.

Mr. BAKER. I move to reconsider the vote by which the resolution was passed.

Mr. WEICKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CUTS IN SCHOOL LUNCH PROGRAM RESULT IN DECREASED PARTICIPATION

Mr. SASSER. Mr. President, the school lunch program has fed meals to millions of American children in its 36 years of operation. Often children would go without a balanced meal if it were not for the school lunch program. Indeed, it has been pointed out that low-income children depend on the school lunch program for one-third to one-half of their daily nutritional needs.

This is a critical fact to remember. There is a very strong link between health and nutrition. Growing children need a nutritious, balanced diet to help insure that they are healthy and fit both in school and in their later years.

Tragically, the value of this lesson seems to be losing importance with many today. We have witnessed major cuts in the school lunch program during the budget trimming process. These cutbacks have taken their toll on the program. I know that in my home State of Tennessee, approximately 68,000 children have dropped out of the program.

The New York Times recently ran an article on the impact of these budget cuts on the program nationwide. I strongly urge my colleagues to read this article and reflect on the decline of this worthwhile program. I ask my colleagues to remember that the health and well-being of our Nation's children is protected by a strong and vital school lunch program. It is our duty to make sure that we maintain the integrity of this worthwhile program.

Mr. President, I ask unanimous consent that the New York Times article dealing with the school lunch program be inserted into the RECORD immediately following my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Nov. 1, 1982]

IN A YEAR 3.2 MILLION STUDENTS AND 2,700 SCHOOLS DROP OUT OF THE NATIONAL LUNCH PROGRAM

(By Robert Pear)

WASHINGTON, Oct. 31—The number of children participating in the national school lunch program declined 3.2 million in the last year, and more than 2,700 schools have dropped out of the program, according to the Department of Agriculture.

One-third of the children who no longer participate are from low-income families, the statistics show.

The figures were made available by the Federal Food and Nutrition Service as a nonprofit law firm, the Food Research and Action Center, issued a report describing the effects of reductions in spending for child nutrition programs.

In 1981, at the request of the Reagan Administration, Congress reduced Federal subsidies for school meals. Schools, in turn, raised their prices, and fewer children bought lunch at school. The number of children in the program dropped 12 percent, to 23.6 million in 1981-82 from 26.8 million in 1980-81.

CENTER CALLS DROP SIGNIFICANT

Lynn Parker, a nutritionist with the Food Research and Action Center, said Friday that the decline was significant because "low-income children depend on the school lunch program for one-third to one-half of their daily nutritional intake."

In questionnaries distributed by the food research group, 26 states, including Connecticut and New Jersey, reported a drop of more than 10 percent in the average number of school lunches served each day.

Agriculture Department officials said the lunch program cost $2.5 billion in the last school year, or $1 billion less than it would have cost under the old law. The savings were achieved through tightening of eligibility criteria, reduction of cash and commodity subsidies and the serving of fewer meals.

School lunch is one of the child nutrition programs that the Federal Government would turn over to the states as part of President Reagan's "new federalism." The House of Representatives, opposing this aspect of the proposal, approved a resolution last month declaring that "the Federal Government should retain primary responsibility for the child nutrition programs." The Senate has not voted on the resolution, although several influential Republican Senators, including Bob Dole of Kansas, support it.

PROGRAM BEGAN IN 1946

The lunch program was created in 1946. It was the first of half a dozen Federal programs designed to improve child nutrition.

David A. Stockman, director of the Office of Management and Budget, said in April 1981 that "middle- and upper-income students will stay in the program" even after lunch prices increased.

Agriculture Department officials were more cautious, saying there might be some decline. However, Mr. Stockman and the other officials said that schools would not drop out of the program. But, according to the department, the number of schools serving subsidized meals fell 3 percent, from 93,982 in 1980-81 to 91,233 in the last school year.

Despite the decline in participation, Edwin L. Dale, Jr., a spokesman for the Budget Office, said, "It certainly looks to me as if we still have a very large school lunch program." He noted that President Reagan had proposed no further reductions for the program in the budget he submitted to Congress last February.

Administration officials said they now saw some merit in the contention that schools might drop out of the program if the Government abolished the subsidy for meals served to children from upper- and middle-income families. Many schools said they could not afford to operate the program without such subsidies.

TUITION LIMIT WAS SET

Some private schools were forced out of the program by a new section of the law that said the Federal Government could not subsidize lunches at schools charging tui-

tion of more than $1,500 a year. The Administration assumed that students at such schools were not needy. Jane E. Mattern, a spokesman for the Food and Nutrition Service, said that at least 500 public schools had also dropped out of the program.

The statistics indicate that there was a decline in the number of students buying lunch at schools that continued to participate.

The Government provides subsidies only for meals that meet nutritional standards set by Federal regulations. Children who do not participate in the program may bring food from home or buy items at school or off campus. Miss Parker said that these children "generally get less nutritious meals—less milk, fruit and vegetables, more snack and 'junk' foods" than those in the school lunch program.

President Reagan retreated from his proposal for further cuts in the program last year after Democrats and others ridiculed the idea of listing ketchup and pickle relish as vegetables. But last month the Food and Nutrition Service, in confidential budget documents, proposed indexing the maximum charge for a reduced-price meal. That would permit the charge to rise with food costs. Congress last year set a limit of 40 cents on the charge to the pupil for such meals.

FISCAL NOTE LAW WILL HELP CONGRESS EVALUATE PENDING HIGHWAY BILL

Mr. SASSER. Mr. President, the administration proposal for a 5-cent-a-gallon gasoline tax in order to finance a nationwide program of transit-related construction and repairs will bring into play the purpose and value of a law passed by the Congress and signed into law last December 23, the State and Local Government Cost Estimate Act of 1981 (Public Law 97-108).

Also known as the State and local government fiscal note law, this measure requires the Congressional Budget Office (CBO) to prepare and submit, for every bill or resolution reported in the House or Senate which has certain specific economic consequences, an estimate of the cost (or "fiscal note") which would be incurred by State and local governments in carrying out or complying with such bill or resolution.

Prior to this law, we in the Congress had established as a part of our budget process a fiscal note requirement for pending legislation as it affects the Federal budget. (See 31 U.S.C. 1353.)

Extension of this procedure so that it covers legislation affecting state and local government made good sense. It makes especially good sense in an environment in which the Reagan administration is pressing forward in its efforts to turn over to State governments more and more governmental programs and responsibilities.

It was my intention and the intention of all of us in both the House and Senate who pushed for the fiscal note law that the procedure be implemented only in the case of significant bills or resolutions. We wanted to prevent the CBO from being inundated with fiscal note requests on matters involving small or slight fiscal consequences.

So, "significant bill or resolution" is defined by the law as "any bill or resolution which in the judgment of the Director of the Congressional Budget Office is likely to result in an annual cost to State and local governments of $200,000,000 or more, or is likely to have exceptional fiscal consequences for a geographic region or a particular level of government.

The combined gas tax and public works proposal of the administration will involve considerably more than the $200,000,000 threshold. Discretionary grants proposed under the bill call for a 50-50 share of the costs between State and local governments. Capital infrastructure funds involve an 80 percent Federal contribution, with a 20 percent share of the cost of the projects in question to be picked up by local governments.

The latter, a $1.1 billion a year program is in itself enough to mandate the preparation of the State and local government fiscal note by the CBO.

When I first introduced the fiscal note law in the Senate in January 1981, I said then that the process was necessary to show the Congress the fiscal consequences ahead when it considers costly legislation.

This is precisely the situation the $5 billion gas tax proposal presents and precisely the situation a State and local government fiscal note is designed to address.

No one seriously disputes the need to attack the infrastructure problems which the proposal is designed to confront. But we ought to know how much it will cost our States and our local governments.

Where will they raise the money required to finance their share of the program. Seven States ran budget deficits for fiscal year 1982, according to the Council of State Governments. The elections last month saw the defeat, by referenda, of a number of State tax proposals. Across the Nation in 1982, State and local governments find their bond ratings dropping because of their diminishing fiscal capability.

So, in order to make their share, will States try to impose gasoline taxes of their own? Will governments float general obligation bonds at higher-than-usual interest rates? In other words, could it be possible that some State lucky enough to be awarded a project grant has to add another 3-, 4-, or 5-cent-a-gallon gasoline tax of its own? Or could it be possible that a city must raise its property tax rate because of increased debt service requirements brought on by the new bond issue designed to pay for its share of this new Federal program?

The administration proposal poses some very serious fiscal questions, questions involving the capabilities of State and local governments at a time of fiscal duress, questions that will be better understood and brought into better focus with a fiscal note procedure.

The law provides that the fiscal note accompany the committee report on the legislation in question, and I plan to see to it that the law is abided.

Mr. President, I ask unanimous consent to have printed in the RECORD the full text of Public Law 97-108.

There being no objection, the text was ordered to be printed in the RECORD, as follows:

STATE AND LOCAL GOVERNMENT COST ESTIMATE ACT OF 1981

An act to amend the Congressional Budget Act of 1974 to require the Congressional Budget Office, for every significant bill or resolution reported in the House or the Senate, to prepare and submit an estimate of the cost which would be incurred by State and local governments in carrying out or complying with such bill or resolution

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "State and Local Government Cost Estimate Act of 1981".

SEC. 2. (a) Section 403 of the Congressional Budget Act of 1974 is amended—

(1) by inserting "(a)" before "The";

(2) by striking out "and" after the semicolon in clause (1) of subsection (a) (as redesignated by clause (1) of this subsection);

(3) by inserting after clause (1) the following new clause:

"(2) an estimate of the cost which would be incurred by State and local governments in carrying out or complying with any significant bill or resolution in the fiscal year in which it is to become effective and in each of the four fiscal years following such fiscal year, together with the basis for each such estimate; and";

(4) by redesignating clause (2) of such subsection as clause (3);

(5) by striking out "(1)" in clause (3) of subsection (a) (as designatd by clauses (1) and (4) of this subsection) and inserting in lieu thereof "(1) and (2)";

(6) by striking out "estimate" each place it appears in clause (3) of subsection (a) and in the last sentence of such subsection, and inserting in lieu thereof "estimates"; and

(7) by inserting at the end thereof the following new subsections:

"(b) For purposes of subsection (a)(2), the term 'local government' has the same meaning as in section 103 of the Intergovernmental Cooperation Act of 1968.

"(c) For purposes of subsection (a)(2), the term 'significant bill or resolution' is defined as any bill or resolution which in the judgment of the Director of the Congressional Budget Office is likely to result in an annual cost to State and local governments of $200,000,000 or more, or is likely to have exceptional fiscal consequences for a geographic region or a particular level of goverment.".

(b) The amendments made by subsection (a) shall apply with respect to bills or resolutions reported by committees of the House of Representatives and the Senate after September 30, 1982.

SEC. 3. There are authorized to be appropriated such sums as may be necessary to carry out this Act.

SEC. 4. The authorization granted under the terms of this Act shall expire on September 30, 1987.

Approved December 23, 1981.

MODIFICATION OF THE DAIRY PRICE SUPPORT PROGRAM

Mr. PRESSLER. Mr. President, I have joined with a number of my colleagues in introducing legislation, S. 3053, to repeal the Secretary of Agriculture's authority to reduce the dairy price support level by 50 cents on December 1, 1982, and April 1, 1983. This authority was granted in the Omnibus Reconciliation Act of 1982.

It is clear that the cost of the dairy price support program must be reduced, but the proposed 50-cent reduction in the support level will not achieve this. The proposed 50-cent reduction in the dairy price support level will do nothing to reduce production or increase consumption. It does not address the real problem. The dairy price support level has been frozen for over 2 years and that has not solved the problem, and a 50-cent reduction will not solve it either. To reduce the cost of the program, we must provide dairy farmers with an incentive to reduce production, control subsidized dairy product imports such as casein, and increase consumption of dairy products. Reducing farmers' incomes and forcing some of them out of business will do none of these things.

Nobody will benefit from the reduction. Consumer prices will not fall because the 50-cent reduction will go to the Commodity Credit Corporation, rather than reduce retail milk prices. Taxpayers may not benefit much since the proposal encourages most dairy farmers to increase production, rather than cut back. Finally, dairy farmers would experience income reduction at a time when the farm economy is already in great economic distress. The 50-cent reduction should not be implemented until a comprehensive program can be established to effectively control dairy production, reduce the cost of the program, and benefit all Americans.

Mr. President, I urge my colleagues to join me in support of this legislation and to work for an effective proposal to increase consumption, control production, and move the present dairy surplus.

EXPORTS

Mr. PRESSLER. Mr. President, it is with extreme disappointment that I have read the reports on the failure of the recent GATT Ministerial Conference to produce any meaningful agreement.

I have long been a staunch supporter of increasing American exports, particularly U.S. agricultural products. In a time of serious economic depression for American farmers, our export markets are more important than ever.

While I realize that worldwide economic problems have colored the perceptions of our foreign trading partners, I'm afraid that their shortsightedness may be the beginning of the end for an open system of international trade.

Currently, the European Community's grain export subsidy program gives European grain exports an unfair advantage on the world market and has allowed them to replace the United States as the chief supplier of grain to several foreign markets. The European Community subsdizes their wheat exports at a rate of $1.77 per bushel, which allows them to underprice other grain exporters. The United States has objected to this policy for years and filed complaints under GATT, but the European Community continues to use these policies.

Japan also uses several policies which unfairly restrict U.S. farm product exports in Japan. The Japanese use a very restrictive beef inspection system, which prohibits most U.S. meatpackers from exporting to Japan and also dramatically increases the retail price of beef, thus sharply limiting demand. These restriction are in addition to Japan's general annual quota. These restrictions and the Japanese price markup more than double the cost of beef to the Japanese consumer. The United States has made numerous attempts to reduce these restrictive trade barriers with little success.

There is already wide support in America for protectionist legislation which would severely curtail the importation of foreign goods.

The loss of American jobs as a result of unfair foreign trade practices will increase the pressure for action in the weeks ahead.

There is reciprocal trade legislation, of which I am a cosponsor, on the Senate calendar which I believe more than ever requires our attention. We should address this important legislation during the lameduck session. It is time that we play hardball with the rest of the world.

INTERNATIONAL FINANCIAL SITUATION

Mr. JACKSON. Mr. President, due to the seriousness of the global financial situation, I would like to bring to the attention of my colleagues my remarks on the crisis delivered during the recent congressional recess.

As great as the world's financial problems are, including the ballooning debt burden of the developing countries, I believe they are manageable if we and the other major financial powers move immediately and act wisely and decisively.

I ask unanimous consent that my remarks to the Washington Council on International Trade in Tacoma, Wash. on October 14, 1982, be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

REMARKS ON THE INTERNATIONAL FINANCIAL SITUATION

(By Senator Henry M. Jackson)

I am honored to be with you this morning. The Washington Council on International Trade does a superb job in assembling groups like this one to focus on the trading and financial problems facing this country and the world economy. I am delighted to have the opportunity to start off the day's discussions.

I intend this morning to explore some of the implications of the international banking crisis now full upon us. The foundation of our interenational trading structure is, after all, the integrity of the international banking and debt system. If that integrity is called into question, if the vulnerabilities become severe, if confidence is lost, there can be worldwide financial and economic chaos.

Thanks to this country's diligent pursuit of bigger markets, our economy has become increasingly dependent on imports and exports. In 1950, this country was virtually a closed economy, with exports and imports accounting for only 6.8 percent of GNP. Today they account for nearly 16 percent. Since 1950, U.S. direct investment overseas rose from $19 billion to $377 billion, and foreign direct investment in the U.S. rose from $3.4 billion to $41 billion.

Many great American companies in 1980 earned half or more of their profits abroad: for example, IBM, Allied Chemical, International Paper, Mobil, ITT, American Can, Johnson and Johnson, Pfizer, Exxon, Asarco, Xerox, B. F. Goodrich, Goodyear, and Coca Cola.

For the last three years, the Boeing company has derived between 49 to 62 percent of its earnings from foreign sales.

Though many Americans are unaware of it, about one out of every six Americans employed in manufacturing industries are producing goods to be exported abroad. Indeed, about one of every four of Washington State's jobs in manufacturing industries are export related—and that is a statewide percentage surpassed only by Alaska. All of us are aware of the critical importance of the export market for the American farmer, and notably for the economy of Washington State.

In short, over recent years we have witnessed a transformation in our Nation's economic life-style.

Along with it, global financial and banking arrangement have evolved—a loosely operating system of national and private banks, multilateral banking networks, topped off the Bank for International Settlements, the International Monetary Fund, the World Bank.

And it now this international lending and repayment system that is in crisis.

There can be no doubt that the international financial situation is becoming increasingly precarious. The Mexican collapse is only the tip of the iceberg.

All told, the debt burden of developing countries has soared from $100 billion in

1973 to about $540 at the end of the last year. It could reach $640 billion this year. More than half of this debt is owed to commercial banks in the West, the rest is due governments and international lending institutions.

More and more countries in the developing world are finding it impossible to meet interest and principal payments when due. At the same time, renewal of early economic growth in the industrialized countries seems less and less likely to occur.

The policy question is not whether one or the other of us believes that the financial system's problems will remain "manageable." The policy question is, rather, what steps should be taken to assure their manageability?

The queue of countries requiring debt rescheduling is an immediate problem. In fact, the opprobrium which attaches to a single country's inability to meet its debt grows less and less and debt rescheduling becomes more generalized; finance ministers in such an international environment might come to believe that the present opportunity to lighten their debt burdens is a blessing in disguise! Debt rescheduling is clearly becoming a growing and respectable form of enterprise, making our problem of combining prudence in borrowing and lending with continuing economic development politically and economically even more difficult than it normally is.

Meanwhile, the continuing reduction in bank and Euro-currency lending throughout the world which has gone on over the past months threatens to squeeze liquidity and thus debt roll-overs to the point of precipitating the critical situation which we are seeking to avoid. Each bank is obviously seeking to assure its own soundness.

The danger of our present situation is not only a continuing drying up of bank and business liquidity, debt defaults and flat or worse economic performance. A major danger is the possible combination of an unforeseen financial crisis with a simultaneous political crisis in some important country or region. It is this kind of contingency that can set off chain reactions which are difficult or impossible to contain. Manageability of the system must provide maneuverability for the unforeseen. Thus resources and policies in place are important components in persuading financial institutions and the public that effective international financial management can be counted on.

The primary responsibility of public leadership is not to put out fires once they've started, but to anticipate the sparks and insure that they don't erupt into a blaze.

As I see it, the essential task at present should be to put in place—in our own country and collectively with others—a set of policy measures which are likely to persuade the international financial community that the debt situation and the international financial system are manageable.

Let me briefly mention six measures I think should be seriously considered to help achieve this aim.

First: There should be an increase in the resources of the International Monetary Fund (IMF). The first steps toward this goal were taken at the IMF/World Bank meetings in Toronto in September. An increase of 50% in the country quotas would seem to be the minimum step necessary. Perhaps there should be more of an increase. Adding substantially to the $25-30 billion currently available to the IMF would convey to the world an important message by governments of their recognition of the need for adequacy in IMF resources.

Secondly: Since a decision on a quota increase and its magnitude will not be made before April 1983 at the earliest, a more immediate step is also required. The United States proposal for an IMF reserve fund for emergencies—to be subscribed by individual countries—seems to me highly desirable. I would insist that this be in addition to an adequate increase in quotas, not a substitute or an addition to only a minimal quota increase.

Such an emergency reserve fund, if agreed to by Congress, could probably be brought into being before quota increase ratification can take place. Also, it could be available as a supplement, if needed, after the quota increase is completed.

Assistance from the emergency reserve fund should be subject to special disciplinary provisions. For example, it might be made available only to countries which have effectively implemented the IMF's conditionality terms on assistance received from the IMF.

The fact that resources are in place to deal with unforeseen events strikes me as essential to effective containment of possible crises.

In the third place: I think it important for the central banks and finance ministries of the major industrial countries to provide clear policy guidelines to the banks in their respective countries as to the circumstances under which they will come to the assistance of those banks whose liquidity has been seriously eroded by virtue of defaults arising out of loans to foreign borrowers, particularly sovereign borrowers.

Fourthly: There needs to be greater discipline here in this country on behalf of sound bank management. It appears to me that clear policy guidelines on the part of the Federral Reserve and the Treasury as to the circumstances under which assistance to U.S. banks would be available, would be more useful as a tool of discipline than the current policy of uncertainty. For example, whether justified or unjustified, there is a widespread belief that in the interests of sound bank management and discipline, the Federal Reserve may not necessarily come to the assistance of relatively small banks that find themselves in difficulty, but that the authorities would not let a major money center bank go under because of the widespread financial, economic and political ramifications of such an event.

In the fifth place: The industrialized countries need to cooperate far more effectively in monitoring the financial viability of the East European countries with respect to external credits and borrowings. There needs to be greater agreement on the criteria for granting such credits and loans and the terms thereof. In this connection, I suggest thought be given to the optimum role of The Bank for International Settlements where the U.S. is an active participant even though not a member. This institution of central banks has the important assets of experience, personnel and international standing.

Finally, a sixth suggestion: Attention should be directed to getting greater stability of exchange rates. It is now about ten years since the system of fixed exchange rates broke down or was abandoned, and the results have not been particularly encouraging. Whereas a regime of free floating exchange rates was initially envisaged, we have had, instead, a regime of sporadic management by individual central banks of their own currencies, with the consequences of highly volatile exchange rates and distortions of trade. This has been costly to both the private and the public sectors.

It would have been highly constructive, for example, if the heads of government at Versailles in June had invited the Governors of the IMF to focus their attention on this problem and to make an interim report on proposals for reform at the next IMF annual meeting in September 1983. Perhaps this can be done at the next summit effort.

While there seems to be no widespread desire for a return to a fixed exchange rate system á la Bretton Woods, there is strong belief in financial and business circles that more order and stability in the system are necessary. A re-directed focus on this subject would further convince the international community and the public generally that governments are endeavoring to direct events rather than allowing drift to be the only order of the day.

In conclusion, let me add just this:

The immediate danger is a serious slide in confidence in the global financial system. Signs of a slippage in confidence are already evident—bank depositors becoming fearful, precautionary deposit withdrawals being made. Should alarm spread generally throughout international financial markets, the current bankers' crisis centering on the credit worthiness of country borrowers could be compounded by a depositors' crisis centering on the credit worthiness of banks.

The momentum is there. In the absence of prompt leadership by the United States and concerted action by the major financial powers, a first-order global financial crisis may not be avoided.

In one of Sherlock Holmes' famous cases, a vital clue turned out to be a watchdog that failed to bark. At a time of grave disorder in the world's banking system, I believe the Administration in Washington, D.C. is playing the role of the silent dog. It is high time they woke up to the gravity of the problems and got back on their job as watchdog.

As big as the problems are, they are still manageable—if we move now and act wisely and decisively.

THE HOTLINE AND UNITED STATES-SOVIET CONSULTATION

Mr. JACKSON. Mr. President, there is today still no adequate communications safeguard against the outbreak of a nuclear war, started not by deliberate design, but by accident, or mistake, or misunderstanding.

That is why I have been urging that our Government put a high priority on establishing with the Soviets a permanent Soviet-American Joint Consultation Center—a new institution for facilitating immediate information exchanges and consultations between the two countries when events occur that could trigger a nuclear war not intended or desired by either side. During the recent congressional recess, I spelled out this proposal to a university audience in Washington State and to the North Atlantic Assembly in London.

I ask unanimous consent that my October 22, 1982 address to the Washington State University Convocation, and my November 16, 1982 remarks before the Political Committee of the

North Atlantic Assembly be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S.-U.S.S.R CONSULTATION: A NEW PEACE INITIATIVE

(By Senator Henry M. Jackson)

I am delighted to be here this morning to share in this auspicious occasion with members of your University family and with the wider Pullman community.

We come together at a time when those who speculate about what the future holds for Americans have grounds for both hope and concern.

On the good side, those who predicted that scores of millions of Americans would have long since met their end in a nuclear holocaust have been proven wrong. Also wrong have been those who predicted that the Soviet Union would have long since imposed its will upon us. We are today neither dead nor Red; we are very much alive and free.

On the bad side, today's structure of peace rests on foundations that are far from firm. Peace-threatening problems abound—take Afghanistan, or Poland's agony, or the Middle East turmoil, just for starters.

One peace-threatening problem, of course, overshadows all others. This is the problem of preventing a nuclear war. For a long time, most people imagined that if a nuclear war ever broke out, it would begin with a premeditated and carefully planned surprise assault. Today, however, it is more and more being recognized that a nuclear war could break out even though neither side had planned or wanted it. It could break out not by deliberate intent, but by accident or misunderstanding. There could be an accidential missile launch. Or an intelligence-gathering error might lead one side to believe that the other was about to launch a nuclear salvo when in fact it was not. Redeployments of strategic weapons could be misinterpreted. Terrorist groups could detonate a nuclear device and one superpower might think it was the responsibility of the other.

Nobody in this auditorium can lay claim to all the answers to the problems of peacekeeping. But if we are all still learning, we are at least students with a body of prior experience to draw upon and to profit from.

One thing we ought to have learned is that there is no place for bombast and stridency in our discourse with other nations. If other powers fail to heed the rules of civility, so be it. A competition to see who can sound the most threatening and shout the loudest is one contest we need not enter.

History teaches also that our diplomacy must never promise more than we can deliver. A commitment that lacks the resources needed to back it up sooner or later becomes exposed for what it is—a sham. Benjamin Franklin had the words for it: "Promises may get thee friends but non-performance will turn them into enemies."

Past experience further underscores the central role that patience and perseverance must play in any successful diplomacy. There are no quick cures.

The past also teaches that our diplomacy should reflect a mature patriotism that sees our nation for what it is—a country with both strengths and weaknesses, but also a country in which the good much outweighs the bad. If there is no call for jingoistic chest-thumping, neither is there any need for self-flagellation.

And of special importance, history shows how essential it is that governments stay in touch and keep talking with each other—above all when peace-endangering developments threaten.

In this regard, World War I and the Cuban missile crisis present contrasting lessons. In 1914, Europe's statesmen failed to keep talking and consulting with each other in the weeks and days preceding the war's outbreak. They let unfolding events get out of hand. Millions then died in a war that none of the great powers had really wanted. In 1962, American and Soviet leaders did keep talking with each other, when superpower war threatened following the introduction of Soviet missiles into Cuba. The leaders of the two sides thereby kept matters under control. War was averted.

If there were now to be some accident or misunderstanding that could cause either superpower to fear that a nuclear assault against it was imminent, it would be of literally life and death importance that the two sides keep talking with each other. Otherwise, a runaway chain reaction of political-military measures and countermeasures and counter-countermeasures could end in a nuclear holocaust that neither side intended.

The only instrument currently available for direct consultation between the two superpowers is the 20-year-old Washington-Moscow hotline.

But the hotline has important limitations as a peace-keeping institutional mechanism. The heads of state do not actually talk with each other over the hotline. They communicate only through exchanges of teletype messages that must be transcribed, encoded, transmitted, decoded, translated and retranscribed. None of the subtleties of direct give-and-take—so crucial to understanding—can be conveyed by such disembodied messages. As of today, President Reagan and Chairman Brezhnev have yet to lay eyes on each other. They do not know each other. In an emergency, they would be communicating as virtual stangers.

Commendably, the President has suggested that the possibility be explored of technologically updating the hotline to permit voice communication. Certainly this should be done.

Yet, even a modernized hotline is not of much help if a peace-threatening emergency occurs when the heads of state are out of effective touch both with each other and with their key advisers. During 1981, the President was out of Washington for all or most of 106 days, the Secretary of State for 129 days and the Secretary of Defense for 154 days. I would be surprised if the away-from-Moscow figures were greatly different for their Soviet counterparts.

Moreover, there is no way in which Americans or Soviets below the highest government levels can now quickly confer with their counterparts when emergencies arise. Under existing procedures, it could take many days to secure the needed clearances and concurrences, and to work out the required administrative arrangements.

What must now be done seems to me self-evident.

Clearly, we must pursue nuclear arms reduction, with a steady and relentless determination. Nuclear force levels at their present size and balance are manifestly dangerous. We need to win Soviet agreement to deep cuts in our nuclear arsenals to a far lower, less menacing level—and then keep working for the elimination of all nuclear weapons.

Yet, major and mutual arms cuts, vitally needed though they are, won't by themselves assure peace. We must also face up to the shortcomings of the hotline. We must supplement it by building additional institutional mechanisms for keeping Moscow and Washington in close and continuing touch with each other, so that accidents or misunderstandings do not get out of hand.

Specifically, I have been urging that our government negotiate with the Soviet Union the earliest possible creation of a Joint U.S.-USSR Consultation Center—a new institution to facilitate immediate information exchanges and consultations between the two countries when events occur that could trigger a nuclear war not intended or desired by either side.

The Center would be a permanent organization at a location agreeable to both sides. It would have areas where the Soviet and American representatives would meet and consult together, and also areas where they could work and confer in private. The American staff would be linked to Washington by secure American-controlled communication links, and the Soviets would be tied to Moscow through their own communications system. The Center would be open, fully staffed, every hour of the day and every day of the year.

The two staffs should include technical advisers and military representatives knowledgeable about such matters as command, control and surveillance systems, force deployments, readiness testing procedures and the like. However, the center's basic mission would be neither technical nor military. The decisive issues of nuclear war or peace are and always will be political and diplomatic, and the Center's staffing should reflect this fact.

The Center would be instantly alerted when there were any war-threatening developments. It would supplement, and work in tandem with, the modernized hotline. The superpower dialogue in time of crisis could thus become vastly more effective. The two sides at the Center would consult by actually talking with each other face-to-face across the width of a conference table, and each side would report its assessment as quickly as possible to the tops of their governments. As needed, Soviet and American experts on the kind of problem threatening the peace could meet with each other without any bureaucratic delays. The two teams would be known quantities to each other, and this could assist in understanding and in judging the credibility of their counterparts.

The Center could work on crisis prevention as well as crisis resolution. It might draft proposed codes of nuclear conduct for the two superpowers. Each side might agree to refrain from doing things—undertaking certain types of force deployments or readiness exercises, for instance—that might appear threatening to the other side.

The early establishment of a Joint Center would produce still further benefits.

Popular fears over nuclear war are fueled in part by a concern that war might break out by accident just because Moscow and Washington were out of touch and not talking to each other. This permanent Center—in business around the clock—could do much to lessen these apprehensions.

Furthermore, agreement on the Center could help strengthen our relations with our friends and allies, and our European partners in particular. They have as big a stake as we do in preventing an accidental nuclear war. They would surely applaud an American initiative to create an institution making such a conflagration less likely.

And, very important, I believe an early accord on creation of the Joint Center would increase the chances of success in the Geneva Arms Reduction Talks. The road we will have to travel to arrive at peace-serving weapons cuts will almost certainly be difficult and long. But the Center could so clearly serve the interests of both our sides that it should be possible to bring it into being at an early date. A negotiating success in this regard would be reassuring, and it could help build world confidence in the possibilities for stability and peace.

Finally, let me just add this:

The people of the world have created international arrangements and institutions for all sorts of purposes and almost every imaginable human concern. There is even an International Wizard of Oz Club, an International Save the Pun Foundation, the International Old Lacers—IOL for short, an International Barbie Doll Collection Club—with its code name IBDCC, and the International Flat Earth Research Society, better known as the IFERS.

Among all the thousands and thousands of international undertakings and organizations, there is still no adequate institutional safeguard against the accidental outbreak of a nuclear war. I think the time has come to have one.

There are scores of major issues on which we and the Soviets now differ. But there is one issue on which we should not disagree—the need for both of us to do everything within our power to prevent the outbreak of a war neither of us wanted. There would be no winners in a nuclear war—not us, not the Soviets, not any other nation. Everybody would lose.

By making war by mistake less probable, a Joint Consultation Center would make everybody winners. Let us now get about the job of creating it.

CONSULTATION AND THE ATLANTIC ALLIANCE

(By Senator Henry M. Jackson)

Mr. Chairman, this Assembly takes place at a time when those concerned with the future of our Alliance have many reasons to be pleased.

When our partnership came into being in 1949, not a few believed that NATO would before long succumb to threats from without. They thought that the fledgling organization would prove unequal to the task of keeping Soviet power from spilling over the boundaries of the Alliance. But they were wrong.

Others believed that NATO would succumb to problems from within. They questioned whether its members would be willing to subordinate narrowed interests to the interests of the community as a whole. But they too were wrong.

Only a handful of the collective security organizations known to history have matched NATO's record of longevity. And none has surpassed NATO's record of accomplishment. At the age of thirty-four, the Alliance is not just still alive—it is flourishing.

For all our partnership's successes, important problems from time-to-time beset it. Our Rapporteurs report—Alliance Political Developments—discusses many of these problems in great detail. And the report correctly stresses that we have not been doing enough, soon enough, in consulting with each other on critical political issues.

In this connection, let me cite just two examples.

Example one concerns our failure as a community to have moved more quickly than we did to seize the initiative in quest for nuclear peace. Warning signs of impending trouble became apparent some two years ago. In all our countries, increasing numbers of people were questioning the depth of their government's commitment to peace-serving arms cuts. They did not think their governments were doing all they should be doing to occupy the high ground on the issue of mutual and major arms reductions.

Some of us sitting in this committee urged our governments to concert with our NATO partners toward the end of removing any reasonable doubts on this score. We urged consultations aimed at formulating and then advancing arms reductions proposals that would make plain our commuity's devotion to the cause of peace. But the consultations were too long in coming, and we are now paying the price in terms of citizens of our community who are not yet persuaded of our desire to negotiate with the Soviets in good faith at Geneva.

The problem of the Soviet natural gas pipeline provides another example of what can happen when we get caught off guard. On the one hand, none of us are indifferent to the tragic happenings in Poland. And none of us wants to endanger our community's security, either by giving the Soviets militarily-useful technology or by becoming excessively dependent on energy sources outside of our control. On the other hand, nobody wants needlessly to deny equipment sales to our manufacturing companies and their workers. And nobody wants our countries to get reputations as unreliable suppliers.

Given such wide areas of agreement among us, it should have been possible for our community to arrive at an agreed-upon position on the pipeline. But we failed to consult early enough and to search hard enough for a generally acceptable approach. National positions then hardened, and months elapsed before we could solve a problem that need never have arisen in the first place.

Mr. Chairman, our Alliance needs a better early warning system for spotting impending political troubles for the partnership. The system must be one which alerts us to upcoming problems before they reach crisis dimensions.

We now have in being elaborate early warning systems of possible trouble in the military realm. We employ batteries of super-sophisticated intelligence gathering and analytical techniques to flag potentially dangerious military moves on the part of our adversaries. We likewise employ elaborate management control techniques to identify prospective technology development problems which, if uncorrected, could delay the introduction of new weapons systems into the military inventories of our members.

The immenssely successful nuclear submarine construction program offers a prime example of the use of such early warning techniques. The system employed by Admiral Rickover and his key aides included the regular preparation and issuance of so-called critical items lists. These lists drew early attention to management and technological development problems that would slow the building of the submarine fleet unless quick and decisive remedial action was taken.

Our partnership now needs the political equivalent of such critical items lists. Thus, the North Atlantic Council might regularly identify for the Alliance issues just coming over the horizon that have the potential of developing into pipeline-type controversies. The Council might at the same time request the members to report back to it steps being taken to handle and correct them.

I would put high on such a critical list the huge problem of the debt overhanging many East bloc and developing countries, notably Poland and Mexico, and the evident dangers to international financial stability.

At a time when the Alliance faces so many important and intractable challenges to which no ready solution is apparent, we simply cannot afford the luxury of letting troubles get out of hand that should never have been troubles to start with.

If it is essential that we consult in timely fashion with friends and allies, it is just as important that we talk with our adversaries. The Rapporteur of our Committee quite correctly reminds us of a key point of the Bonn Summit communique: As he puts it, "the necessity to keep the lines of communication open—in CSCE, in arms negotiations fora and in personal meetings, such as those pursued by both U.S. Secretaries of State, Messrs. Haig and Shultz, with the Soviet Foreign Minister, Andrei Gromyko."

This need to keep the lines open to the Soviets is dramatically true when war threatens, and nuclear war most of all. Yet there is today still no adequate communications safeguard against the outbreak of a nuclear war, started not by deliberate design, but by accident or error or misunderstanding.

There are scores of major issues about which our partnership has one view while the Soviets have another. But there is surely one issue on which the members of our Alliance should disagree neither with each other nor with the Soviets. This concerns the necessity of everybody doing everything they can to prevent an unwanted war. Nobody would win such a war—not the Soviets, not my country, not the other fifteen members of our Alliance, or not any other nation. Everybody would lose.

As of now, there is only one institutional mechanism for direct consultation between Washington and Moscow when war-threatening developments occur—the 20-year-old hotline. But the hotline is a relatively antiquated teleprinter system that requires a time-consuming process of encoding and transcription. President Reagan has proposed that ways be explored of technologically updating the hotline to permit voice communication, and certainly this should be done. But even if the hotline were thus modernized, it might not serve well when the President and his chief security advisers were scattered on trips and not readily able to confer with one another. Last year, President Reagan was out of Washington for more than 100 days. And so were the Secretary of State and the Secretary of Defense. I would be surprised if the away-from-Moscow figures were much different for Chairman Brezhnev and his top national security advisers.

The moral of the situation is to me obvious. We need additional arrangements for keeping matters from getting out of hand when one side has reason to question the intentions, and especially the nuclear intentions, of the other. This view, I might note, is shared by many of my Senate colleagues, among them Senator Sam Nunn who this year initiated a U.S. Defense Department study of ways to prevent nuclear war by accident.

Toward this end, I would like to see the Soviet Union agree with my government to establish as quickly as possible a Joint U.S.-U.S.S.R. Consultation Center—a new insti-

tution to facilitate immediate information exchange and consultation when things happen that could trigger a nuclear war that nobody had planned or wanted.

The Joint Center would be a permanent organization located at some mutually agreeable place. It would be in operation, fully staffed, every hour of the day, every day of the year. Secure unilaterally-controlled communications systems would link the staffs to their respective capitals. The Center's staffs would include technical experts and military representatives. But as we at this Assembly have particular reason to know, the make-or-break issues of nuclear war or peace are not technical or military—they are political and diplomatic—and the Center's staffing should reflect this fact.

The Center would supplement, and work in tandem with, the hotline. It would be instantly alerted when incidents that could spill over into nuclear war occurred. The staffs would communicate by talking with each other face-to-face, and each side would report its assessment as quickly as possible to the top levels of their governments. The two staffs would be known quantities to each other, and this would assist in understanding and in judging the credibility of their counterparts.

The Center could work on crisis prevention as well as crisis resolution. It might draft codes of conduct under which each side would agree to refrain from actions—certain types of readiness exercises, for instance—that the other side might regard as provacative and threatening.

Furthermore, an early agreement to create a Joint Center should increase the chances of success in the Geneva Arms Reduction Talks. Very probably, it will take long and difficult negotiations to reach an accord on arms reductions of the nature and dimensions the world needs. And along the way there are bound to be setbacks. Some may be tempted to stop trying. But a Joint Consultation Center so clearly serving the interests of both the Soviets and our side should be negotiable at an early date. A success in this regard would fortify our resolve to persevere in the Geneva negotiations for as long as may be necessary to achieve success.

Let me just say this in closing:

The circumstances of 1982 are not the circumstances of 1949. As times change, the Alliance will undergo many changes. It must if it is to serve the interests of its members. But the all-important truth remains: We cannot entrust the fate of our peoples to muddling through and improvisation. There must be political early warning systems, advance plans and preparations. We must have in being before crises occur institutional mechanisms whose job it is to help resolve them. Picture the impossibility of our holding Soviet power in check without the institutional underpinning provided by the North Atlantic Treaty Organization.

Mr. Chairman, it is in this spirit that I welcomed the opportunity to address your Committee today.

RAYMOND WEEKS—A TRUE PATRIOT

Mr. HEFLIN. Mr. President, a few weeks ago, on November 11, National Veterans Day, President Reagan awarded the Presidential Citizens Medal to an Alabamian, Raymond Weeks. I would like to share with my colleagues in the Senate a few details of Raymond's story.

Raymond Weeks has been active in business and civic life in Alabama for more than 50 years. Prior to entering the military service in World War II, he assisted in the organization of several successful war bond campaigns, and was active in the USO, was a director on the State rationing board and the manpower board.

After serving in the military from May 1943 to November 1945, Raymond became active in veterans affairs, and has gone on to serve on many national committees of the various veterans organizations.

In 1947, Weeks went about organizing a celebration in Birmingham to pay tribute to the veterans of all the wars in which the United States has been involved. The date he chose for the celebration was November 11, which was then officially known as Armistice Day. Raymond called the Birmingham ceremonies Veterans Day.

Over the years, the ceremonies in Birmingham, still directed by Raymond Weeks, became a model for other cities and States, which started their own Veterans Day observances. Finally, in 1954, Congress changed the name of Armistice Day to National Veterans Day.

It has become an official national holiday, a fitting tribute to all of American's veterans—those who returned home as well as those who died fighting for our country.

For his efforts in establishing this holiday, Raymond Weeks has become known as the "Father of National Veterans Day."

Besides his activities in veterans organizations, including a year as State Commander of the American Legion, Raymond has been active in numerous civic and community projects. He has served as a member of the Alabama House of Representatives, a member of the State Democratic executive Committee, and as a delegate to three Democratic National Conventions.

He has received Alabama's highest award, the Distinguished Service Medal, for his accomplishments, and has also received the Army's Outstanding Distinguished Civilian Service Medal.

On November 11, Raymond Weeks became only the seventh person to receive the Presidential Citizens Medal, which is awarded American citizens for exemplary service for their country or for their fellow citizens. The award is made at the discretion of the President.

Raymond Weeks is certainly deserving of this tribute, and all of us from Alabama extend him our thanks and congratulations.

Mr. President, I ask unanimous consent that articles from the Birmingham News and the Birmingham Post-Herald be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Birmingham News, Nov. 10, 1982]

WEEKS TO GET CITIZEN MEDAL AT WHITE HOUSE

(By Tom Scarritt)

WASHINGTON.—Raymond Weeks of Birmingham, who is given credit for founding Veterans Day, will receive a special award from President Reagan Thursday at the White House.

The presentation of the Presidential Citizens Medal to Weeks will highlight a Veterans Day observance in the State Dining Room Thursday morning, according to the White House announcement.

Weeks, a White House spokesman said, is the person responsible for changing Nov. 11 from Armistice Day, marking the end of World War I, to Veterans Day, honoring all of America's veterans.

A Navy veteran of World War II, Weeks on Nov. 11, 1947, organized in Birmingham the first program honoring the veterans of all wars. He called it Veterans Day.

In 1954, Congress officially changed the name of the Nov. 11 holiday to Veterans Day.

Birmingham's National Veterans Day continues to be the largest such program in the country, and Weeks continues to serve as its director.

Reared in Birmingham, Weeks attended local public schools and Birmingham-Southern College.

He has served as a Democratic member of the Alabama House of Representatives, a member of the State Democratic Executive Committee and a delegate to the Democratic National Convention.

He has received the Distinguished Service Medal of Alabama and the Army's Outstanding Distinguished Civilian Service Medal.

The Presidential Citizens Medal he will receive on Thursday was established by executive order in 1969 "to recognize citizens who have performed exemplary deeds of service for their country or for their fellow citizens."

It is awarded at the discretion of the President.

[From the Birmingham Post-Herald, Nov. 12, 1982]

BIRMINGHAM VETERAN RECEIVES SPECIAL TRIBUTE

(By Gayle McCracken)

WASHINGTON.—While soldiers marched through Birmingham yesterday in the country's largest annual Veterans Day parade, the founder of the holiday was being honored by President Reagan at the White House.

Raymond Weeks, a World War II veteran and Birmingham resident, became the seventh person to receive the Presidential Citizens Medal for organizing in Birmingham the first program honoring American veterans of all wars.

"He was the driving force behind the Congressional action which was taken in 1954 to establish this holiday," Reagan said during a Veterans Day ceremony in the White House dining room.

Then the president pinned the medal on Week's coat lapel as the veteran's wife watched, "Mr. Weeks, in honoring you, we honor the ideals we hope to live up to,"

Reagan told him. "Your country is mighty grateful to you for what you have done."

Weeks reached for Reagan's hand and said, "Thank you, Mr. President. Thanks on behalf of all veterans."

When Weeks returned from fighting in World War II, he was concerned about the problems and needs of veterans. He began working on national committees of several veterans' organizations and served for two years as state commander of the American Legion.

In 1947, Weeks rallied together Alabama's veterans of all wars in which the U.S. has been involved. A parade and several ceremonies paid tribute to those who returned home, and to those who didn't.

Weeks called that first Nov. 11 celebration Veterans Day. The idea caught on and military units and bands from across the nation poured into Birmingham each year for the memorial activities. Other cities and states started their own, and the holiday became known as Armistice Day.

"Along with Raymond Weeks, I may be one of the few people in this room who remember when Veterans Day was called Armistice Day," Reagan said.

Then in 1954, Congress changed the name to Weeks' choice, National Veterans Day. Now, it is an official national holiday. Government offices and schools close, retailers take advantage of an extra shopping day before Christmas—and for a few hours, special respect is paid to those who have carried their country's flag.

"It is fitting that we pay tribute to Mr. Weeks on this day when we honor those who donned uniforms to protect their country," Reagan said. "Nothing is more important to the soul of America than remembering and honoring those who fought for her."

During the year's Veterans Day celebration, national attention has focused on the black granite monument to be dedicated in the capital tomorrow as a tribute to Vietnam veterans.

The veterans are at last being given the national homecoming they have waited for—one they hope will begin a healing of wounds created by the controversial war.

"For so long Americans have closed their hearts, but the Vietnam veterans will take their rightful places now," Reagan said. "Certainly, mistakes have been made . . . (but) this Saturday, we will put behind us the ingratitude and injustice of the past."

The Presidential Citizens Medal is an award established in 1969 to recognize U.S. citizens for exemplary service to their country and other Americans. The president may bestow the award upon any U.S. citizen at his discretion at any time.

"As founder of the National Veterans Day celebration in Birmingham for the past 36 years, Raymond Weeks, a World War II veteran himself, has devoted his life to serving others: his community, the American veteran, and his nation," Reagan said.

E. L. McGRAW RETIRES

Mr. HEFLIN. Mr. President, Auburn University, and all higher education in the State of Alabama, recently lost the services of a truly fine individual with the retirement of E. L. McGraw, editor and head of the Department of Research Information at Auburn's Agricultural Experiment Station.

McGraw first came to Auburn, then Alabama Polytechnic Institute, in 1941, as assistant extension editor. Except for a brief stint during and immediately after World War II, he has remained at Auburn for the 41 years since.

Through the years, he has moved up through the ranks. After his first position, McGraw has successively served as a subject matter specialist in vocational agriculture, as associate editor at the Agricultural Experiment Station, and, beginning in 1968, as editor, the position from which he retires. His work at Auburn spanned the terms of four university presidents.

Under McGraw's leadership, publications of the Alabama Experiment Station have earned a national reputation for both their professional handling of scientific information and their attractiveness. This, in large part, has been due to McGraw's cooperative work with the research staff in getting scientific information disseminated to users.

McGraw has coauthored two books, and edited another. He has also been very active in the professional organization, Agricultural Communicators in Education, serving as secretary treasurer and national headquarters coordinator for 3 years.

The Auburn community has also benefited from McGraw's involvement. He has been an active member of the Auburn United Methodist Church, and, for 34 years, has been active in the leadership of the Auburn Lions Club.

E. L. McGraw's dedication to his campus and community has been of tremendous benefit to education, agriculture, and Alabama as a whole. This talented individual will be sorely missed by his university and all those who have worked with him.

Mr. President, I ask unanimous consent that an article from the A.U. Report be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the AU Report, Nov. 8, 1982]

McGRAW CLOSES OUT AU CAREER

The Oct. 31 retirement of E. L. McGraw, head of the department of research information, closes out an achievement-filled career that included work in all three divisions of Auburn and service under four university presidents.

McGraw's first Auburn job was assistant Extension editor, during 1941-44, when the then Alabama Polytechnic Institute was headed by President L. N. Duncan. After a brief stint in the U.S. Army and as teacher of vocational agriculture at Town Creek, he returned to Auburn in 1948 as subject matter specialist in vocational agriculture, during the administration of President Ralph Draughon.

The longest period of service, and the one of greatest pride of McGraw, was in the Agricultural Experiment Station, which began in 1957 and included administrations of Presidents Draughon, Harry Philpott, and Hanly Funderburk. He was associate editor until 1968, when he moved up to editor and head of the Department of Research Information.

Contributions by McGraw to Auburn University and to all facets of Alabama agriculture were recognized at a retirement dinner held Oct. 27. More than 200 friends and coworkers paid tribute to McGraw for his professional, community, and church work, the occasion culminating with presentation of tickets for a cruise to the Bahamas for McGraw and his wife, Johnnie.

McGraw's work in his professional organization, Agricultural Communicators in Education, has earned him a national reputation among agricultural college editors. He served as ACE secretary-treasurer and national headquarters coordinator for three years, along with numerous committee assignments, in his 25 years of active membership.

In a presentation that named McGraw Editor Emeritus, Experiment Station Dean and Director Gale A. Buchanan lauded McGraw for the expansion and upgrading of research reporting that has occurred during his tenure.

DR. WILLIAM R. LUCAS HONORED

Mr. HEFLIN. Mr. President, I have long been an ardent supporter of our Nation's space programs, and it is in connection with that program that I rise today to address the Senate.

We in Alabama are very proud, and rightly so, of the Marshall Space Flight Center in Huntsville, and we are also very proud of the Director of the Marshall Center, Dr. William R. Lucas.

Our pride in the achievements of Dr. Lucas can perhaps best be illustrated by the fact that he has recently been chosen by the American Astronautical Society to receive their highest honor—the Space Flight Award. The award is given at the society's annual meeting.

The Space Flight Award is given annually to the person who through his efforts has, in the judgment of the society, contributed the most to the advancement of space flight and exploration.

Dr. Lucas was selected to receive the award because of his distinguished scientific, technical, and managerial leadership associated with the development of the Space Shuttle, according to officials of the American Astronautical Society.

While serving as director at the Marshall Space Flight Center, Dr. Lucas is responsible for managing the development of the Space Shuttle's main engines, solid rocket boosters and external propellant tank, as well as being in charge of development of NASA's new space telescope, and many other diverse research and development projects.

This recognition given Dr. Lucas is certainly well deserved. The outstanding work that he and others at Marshall Space Flight Center have done has been largely responsible for the

safe and successful completion of all the missions of the space shuttle. Dr. Lucas is indeed a true credit to our Nation's vital space program.

A TRIBUTE TO JUDGE RICHARD T. RIVES

Mr. HEFLIN. Mr. President, during the month of October, our country lost one of the true giants of its legal system when retired U.S. Circuit Court of Appeals Judge Richard T. Rives passed away at the age of 87.

I have always thought it crucial for our court system to have honest, capable, and hard-working judges at the State, local, and Federal levels. From my personal experience, I can tell you that Judge Rives was such a judge.

Having served as chief justice of the Alabama State Supreme Court, I can testify to the difficulty of being a judge. Oftentimes, the decisions you make may be unpopular. A good judge, whether the decision is popular or unpopular, must follow the dictates of the law and his own conscience. Without a doubt, Richard T. Rives was a good judge.

More than anything else, Judge Rives became well known for his decisions in the field of civil rights. A native Alabamian, whose family had lived in Montgomery since 1819, these decisions had to be difficult ones for Judge Rives. Despite threats, snubs, and abuses, Judge Rives persevered in doing what he thought was right under the law.

The judge was a true credit to the legal community, both of Alabama and America. President Harry Truman should certainly have been commended for appointing Judge Rives to the bench.

Judge Rives was indeed a giant of the legal community, and will be missed by all whose lives he touched.

Mr. President, I ask unanimous consent that an editorial from the Birmingham Post-Herald be printed in the CONGRESSIONAL RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Birmingham Post-Herald, Oct. 30, 1982]

JUDGE RICHARD T. RIVES

"He has lived to see what he stood for proved right."

These words once spoken by his wife, Martha B. Rives, sum up the career of retired U.S. Circuit Court of Appeals Judge Richard T. Rives, who died this week at 87.

Appointed to the appeals court by President Harry Truman, Judge Rives joined with then U.S. District Judge Frank Johnson to lead this state, often kicking and screaming, out of the swamp of segregation during the 1950s and 1960s.

Although Johnson subsequently was to achieve more fame and be the target of more abuse, Rives was the one whose position on segregation was most resented at first.

After all, Johnson was practically an outsider, being from Winston County—which had even tried to secede from Alabama during the Civil War—far from the heart of Alabama's segregated society. But Rives had been a partner in one of Montgomery's leading law firms before his appointment to the bench. And the Rives family had lived in Montgomery since 1819. Many white Alabamians thought they were being betrayed by one of their own when Rives teamed with Johnson to form the majority of a three-judge panel which declared segreation on Montgomery buses unconstitutional in the mid-1950s.

The bus case was to be only the first in a long series of desegregation cases decided by Rives, Johnson and various third judges. Those landmark decisions changed this state for the better, as most Alabamians now know.

Judge Rives' anti-segregation attitudes no doubt grew stronger during his years on the bench. But they were not a product of his appointment to a lifetime position. In the mid-1940s, while still in private practice, Rives joined with other Alabamians in an attempt to defeat a state constitutional amendment designed to stop blacks from registering to vote. He didn't succeed, but the amendment was subsequently declared unconstitutional in federal court.

Despite the many threats, snubs and other abuse he and his family endured, Rives never lost faith in his fellow Alabamians. In 1964, Time magazine mentioned in an article on the adverse reaction to civil rights rulings that ". . . Rives was honored by his fellow Alabamians—they threw garbage on his son's grave."

Rives rebuked the magazine in a letter for a "serious injustice to my fellow Alabamians . . ., the overwhelming majority of whom are as fine, decent and fair-minded people as can be found anywhere."

This self-educated lawyer followed the dictates of his conscience and the law in doing what had to be done. He left his native state a better place than he found it.

Judge Richard T. Rives deserves to be remembered as a giant among the public figures of his era. We never have enough individuals like him.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. KASTEN, from the Committee on Appropriations, without amendment:

S. 3075. An original bill making appropriations for foreign assistance and related programs for the fiscal year ending September 30, 1983, and for other purposes (Rept. No. 97-672).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. WARNER (for himself, Mr. HARRY F. BYRD, JR., Mr. GOLDWATER, Mr. JACKSON, and Mr. GARN):

S. 3073. A bill to provide for the distribution within the United States of the U.S. Information Agency film entitled "Dumas Malone: A Journey With Mr. Jefferson"; to the Committee on Foreign Relations.

By Mr. COCHRAN:

S. 3074. A bill entitled the Agricultural Act of 1982; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. KASTEN:

S. 3075. An original bill reported from the Committee on Appropriations making appropriations for foreign assistance and related programs for the fiscal year ending September 30, 1983, and for other purposes; placed on the calendar.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. HAYAKAWA (for himself, Mr. JACKSON, Mr. GORTON, and Mr. CRANSTON):

S. Res. 500. Resolution commending the Government of Zimbabwe; to the Committee on Foreign Relations.

By Mr. HAYAKAWA (for himself, Mr. MELCHER, Mr. MCCLURE, Mr. THURMOND, Mr. SARBANES, Mr. PELL, Mr. LEAHY, Mr. MATTINGLY, Mr. FORD, Mr. BUMPERS, Mr. COHEN, Mr. LUGAR, Mr. CRANSTON, Mr. DECONCINI, Mr. HOLLINGS, Mr. DOMENICI, Mr. ZORINSKY, Mr. SASSER, Mr. GLENN, Mr. DURENBERGER, Mr. BRADLEY, Mr. PERCY, Mr. STENNIS, Mr. LONG, Mr. RUDMAN, Mr. KENNEDY, Mr. D'AMATO, Mr. RIEGLE, Mr. BRADY, Mr. LEVIN, Mr. INOUYE, Mr. BOSCHWITZ, Mr. LAXALT, Mr. TSONGAS, Mr. HUMPHREY, Mr. MURKOWSKI, Mr. WALLOP, Mr. BIDEN, and Mr. JEPSEN):

S. Con. Res. 131. Concurrent resolution to express the sense of the Congress concerning Americans missing and unaccounted for in Southeast Asia; to the Committee on Foreign Relations.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. WARNER (for himself, Mr. HARRY F. BYRD, JR., Mr. GOLDWATER, Mr. JACKSON, and Mr. GARN):

S. 3073. A bill to provide for the distribution within the United States of the U.S. Information Agency film entitled "Dumas Malone: A Journey With Mr. Jefferson"; to the Committee on Foreign Relations.

DISTRIBUTION OF U.S. INFORMATION AGENCY FILM

Mr. WARNER. Mr. President, today I am introducing legislation allowing domestic release of the USIA-produced video tape recording, "Dumas Malone: A Journey With Mr. Jefferson."

This recording is an interview with Dumas Malone, the renowned biographer of our second President, Thomas Jefferson.

The purpose for seeking congressional consideration on this matter is twofold:

One, the Smithsonian Institution and the Thomas Jefferson Memorial Foundation are planning exhibits of Gilbert Stuart's "Edgehill" portrait of Jefferson both here in Washington, at

the National Portrait Gallery, and at Monticello in Charlottesville early this spring. In conjunction with these exhibits, the Institution and the foundation wish to show the USIA program. Delay or postponement of this legislation until the start of the 98th Congress would surely preclude showing this program with the Stuart exhibition.

Two. The law establishing the U.S. Information Agency prohibits the distribution within the United States of materials the Agency produces. However, from time to time legislation has been enacted exempting specific works and titles from the prohibition. I believe that this bill is in keeping with the history of exemptions and the new procedures for exemptions adopted by the Committee on Foreign Relations and published in the CONGRESSIONAL RECORD on March 31, 1982.

In "Dumas Malone: A Journey With Mr. Jefferson," Professor Malone of the University of Virginia is interviewed by Marc Pachter, Chief Historian of the National Portrait Gallery of the Smithsonian Institution. The 89-year-old Malone, who was the recipient of the Pulitzer Prize for history in 1975 and a Presidential citation in 1979, completed his monumental six-volume work "Jefferson and His Times" in 1981.

Filmed on location at the University of Virginia and Monticello in November 1981, the program concentrates on Jefferson's personality and career. Malone and Pachter discuss Jefferson's life from the Declaration of Independence through his 5 years in France, his two-term Presidency, to his retirement at Monticello.

Malone comments on Jefferson's political philosophy; his relationships with John Adams, Madison, Franklin and Washington; the Louisana Purchase; the Lewis and Clark expedition; and the French Revolution. In addition, Malone reflects on his own role as biographer.

The film was issued for international showing in February 1982.

Release of this work in the United States would enable people all across the country, and especially those viewing the Edgehill exhibit at the Smithsonian and Monticello this spring, to gain richer insights into our second President by the man who knows him best.

As Professor Malone points out in his conversation with Mr. Pachter, the work of more than 50 years and the privilege of reading all of Jefferson's extant correspondence with his family and his contemporaries have created a special understanding of and unique relationship with his subject.

Mr. President, my Virginia colleague in the House of Representatives, J. KENNETH ROBINSON, is introducing an identical bill in an effort to expedite congressional approval. I am joined in sponsoring this measure by Virginia's senior Senator HARRY F. BYRD Jr., and the three Senate Regents on the Smithsonian's Board: Mr. GOLDWATER, Mr. JACKSON, and Mr. GARN. We urge our colleagues to give early and favorable consideration to this legislation.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3073

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) notwithstanding the second sentence of Section 501 of the United States Information and Educational Exchange Act of 1948 (22 U.S.C. 1461)—

(1) the Director of the United States Information Agency shall make available to the Administrator of General Services a master copy of the film entitled "Dumas Malone: A Journey with Mr. Jefferson", and

(2) the Administrator shall reinburse the Director for any expenses of the Agency in making that master copy available, shall secure any licenses or other rights required for distribution of that film within the United States, shall deposit that film in the National Archives of the United States, and shall make copies of that film available for purchase and public viewing within the United States.

(b) Any reimbursement to the Director pursuant to this section shall be credited to the applicable appropriation of the United States Information Agency.

By Mr. COCHRAN (for himself and Mr. HUDDLESTON):

S. 3074. A bill entitled the "Agricultural Act of 1982"; to the Committee on Agriculture, Nutrition, and Forestry.

AGRICULTURAL ACT OF 1982

Mr. COCHRAN. Mr. President, I am pleased that Senator HUDDLESTON is joining me in introducing this bill which I believe will help put agriculture on the road to recovery. I would at the outset like to acknowledge the contributions of the distinguished Senator from Kentucky (Mr. HUDDLESTON) in the formulation and drafting of the bill we are introducing today. The bill incorporates several important suggestions made by the distinguished ranking minority member of the Committee on Agriculture, Nutrition, and Forestry.

The farm economy is currently buried under a mound of surplus stocks which has depressed prices to a level where virtually no one farming a major crop can make a profit.

If this situation is allowed to persist we will see a major structural change in American agriculture, away from the traditional family farmer to farms owned by the Government or large corporations. Such a shift will tear at the very fabric upon which this country was built and destroy the system that has allowed our farmers to be the most productive in the world.

Through increased productivity and a wealth of rich farmland American farmers have made agriculture the Nation's largest industry. Its total assets equal about 80 percent of the combined capital assets of all manufacturing corporations in the United States.

Agriculture is also the Nation's largest employer. It is estimated that between 14 and 17 million people work in some phase of agriculture from production to selling at the supermarket. Farming alone uses 3.9 million workers—as many as the payrolls of the transportation, steel and automobile industries combined.

Low farm prices are having a rippling effect throughout our economy. When farm income drops, farmers simply tighten their belts to stay in business. They do not replace their old equipment, and they do not farm with their normal intensive use of resources.

In short, they make do with what they can afford.

This has a depressing effect on suppliers of farm inputs and services, and translates into reduced output in plants and factories and ultimately to higher unemployment.

Thus, a healthy agriculture will go a long way toward bringing about an overall economic recovery.

Before one can identify the road to recovery for agriculture, it is important to first review where we are and how we got here. After all, the wrong road could lead us to short-term relief that creates greater problems later on.

Farmers in this country are the most productive in the world. Through the adoption of new technology, improved plant and animal varieties, and better management, the output per acre has continued to rise.

In fact, the growth in productivity has nearly offset the growth in domestic demand. As a result, most of the increased acreage has been associated with export market development. Take for example the acres required to meet our needs of wheat, corn, soybeans, cotton and rice.

In the early 1970's 105 million acres were necessary to meet domestic consumption compared with 112 million this year. During the same period the acreage devoted to exports for these same commodities increased from 83 million acres to 124 million.

This means that over 85 percent of the growth during the last decade has come from foreign sales. As a result, exports now account for over half of the acreage devoted to these crops.

Farmers have benefitted from this expansion, and our total economy has benefited because of the over $40 billion annually in exports and new jobs resulting from them.

Since growth in productivity will likely keep pace with future increases in domestic demand we must continue

to expand exports to achieve real growth in the farm sector.

There is no doubt that foreign demand for food and fiber will increase in the years ahead. Ten years from now, there will be 700 million more people in the world to feed and clothe. This means that by the 1990's there will be an additional population in the world equivalent to three times the size of the United States.

Thus the prospects for a growing and profitable agriculture are bright. However, there will be times when weather conditions and other factors will cause production and consumption to become out of balance like the situation which exists today.

To get at the root of the problem it is necessary to look at both the supply and demand side of the equation.

Stocks for wheat, corn, soybeans, cotton and rice are in excess of normal carryover by the equivalent of production on 31 million acres or 12 percent of the level harvested this year based on average yields.

There is no way that the current production adjustment programs can encourage farmers to reduce acreage by this magnitude. For example, the acreage reduction programs put in place last winter only resulted in a cut of 2 million acres from the 1981 level.

The critical question is—are we planting too many acres to meet present demand?

Interestingly enough when normal yields are used to calculate the acreage of wheat, corn, soybeans, cotton, and rice necessary to meet current demand it comes out that we need production on 237 million acres. This year we will harvest about 236 million acres. Thus, we do not have a surplus of acres in production. We have surplus stocks caused by combined yields for these five crops which were 6 percent above average in 1981 and 11 percent above in 1982.

It is ironic that we have been blessed with two good crop years in a row and as a result must suffer under low prices.

These low prices will continue as long as excess supplies hang over the market.

Ordinarily one would expect that low prices would result in enough increased consumption to help draw down the excess stocks. However, our export markets, where most of the increase has come from, are suffering more under the current recession than we are. Further, efforts to increase exports are hampered by the strong value of the dollar relative to currencies in importing countries.

On a trade weighted basis the strength of the dollar has added 35 percent to the effective price of U.S. farm exports during the last year. This has more than offset the decline in U.S. prices for many farm products. Thus even with lower U.S. farm prices our foreign customers are paying as much or more of their own currency for a unit of product than they did last year.

Each commodity has a different trade weighted exchange rate, but the direction is the same. For example, soybean prices received by farmers dropped from $6.70 last fall to $5.39 in August. However, because of changes in the exchange rates during the year, soybean prices to foreign buyers in August were equivalent to a farm price of $6.50 per bushel. This in only slightly below year earlier levels even though the farm price dropped $1.31 per bushel.

With most of the world in a recession it is easy to see why exports are not growing as fast as in the past.

So where does this leave us. We have a problem with surplus stocks caused by high yields during the last 2 years combined with a sluggish demand.

Given the magnitude of surplus stocks, it is unlikely that growth in commercial demand will be sufficient to reduce them to a more acceptable level. It is also unlikely that the current acreage reduction programs will decrease production enough to draw stocks down to levels which will result in substantial price increases. Furthermore, I do not believe it is wise to use acreage reduction alone as a means of reducing the surplus since this is a retrenchment policy allowing our competitors to expand production and capture our markets. Therefore, I believe that the problem must be addressed through a combination of acreage controls and efforts to move the surpluses through alternative marketing strategies.

As program changes are implemented to reduce the surplus stocks it is important that the agricultural dilemma be taken into consideration and that is—the price support loans are too low for our farmers and they are too high for the market to clear.

The bill I am introducing today addresses both problems. Specifically, the bill can be summarized as follows:

SUMMARY

1. Supply adjustment:

A. Require an acreage reduction program for 1984.

(1) Minimum reduction for each crop—corn, wheat, cotton and rice of 15 percent, half of which must be in the form of a paid diversion;

(2) The payment rate on the paid diversion shall not be less than the payment rate for the 1983 program.

B. Authority for the Secretary to use stocks owned by the Commodity Credit Corporation as payment-in-kind to encourage farmers to reduce production.

In operating the acreage control programs, USDA shall take special precautions to assure that the economic base of local communities are not eroded, and that adequate measures be taken to protect the interest of tenants and sharecroppers.

2. Support price—Increase the floor loan rates for the 1983-85 crops as follows:

A. Corn from $2.65 to $2.75/bu.

B. Wheat from $3.65 to $3.80/bu.

C. Cotton from $.55 to $.60/lb.

D. Rice from $8.00 to $8.55/cwt.

E. The bill maintains the minimum soybean loan rate at $5.02 per bushel. However, it may be necessary after appropriate review of the program to consider a higher loan rate for soybeans.

Note: The cotton loan for the 1982 crop was 57.1 cents per pound. The formula contained in current law will result in a drop in the cotton loan to the 55 cents per pound floor for the 1983 crop.

The 1982 crop rice loan was $8.14 per hundredweight.

3. Demand expansion:

A. Commercial market bonus plan—Authority for the Secretary to make available to U.S. exporters, U.S. processors and foreign customers bonus stocks from the Commodity Credit Corporation to encourage sales of U.S. farm products. In carrying out this program the Secretary shall:

(1) Use the bonus stocks in areas where additional sales can be attained or where the bonus stocks can offset subsidies provided by competitors.

(2) Assure that the bonus sales do not displace anticipated purchases from the U.S. by the recipient country in future time periods.

(3) Assure that bonus sales are not transshipped into normal commercial markets.

(4) Provide an equivalent subsidy to the domestic industry in cases where imports of products made from commodities associated with the bonus program put the domestic industry in an unfair competitive position.

(5) Limited bonus sales program to countries in the most-favored-nations status.

B. Expansion of the P.L. 480 and donation programs.

(1) Authority for the Secretary to utilize CCC inventories to expand P.L. 480 Titles I and III concessional sales.

In carrying out this program the Secretary shall:

A. Limit the use of the in-kind concessional sales program to those countries that use up their allocation under the appropriated funds of the current program.

B. Make program available for raw products and value added products.

(2) Authority for Secretary to make donations directly from CCC owned stocks.

The combination of higher loan rates for farmers and bonuses on sales addresses the loan rate dilemma.

The loan rate increases provide the much needed higher floor for farm prices.

The bonus program has the effect of reducing the per unit cost to our customers.

For example, the proposed cotton loan under this plan would go from $0.57 to $0.60 per pound—an increase of $0.03. Assuming that the market price is at the loan level, a country purchasing nine units and getting a bonus of one will pay an average price of $0.54 per pound—$0.03 below the current loan rate.

Furthermore, combining this bonus program with a blended credit program already underway will allow us to meet the competition in international markets.

Mr. President, it is clear that changes need to be made on the farm program to reduce the current surpluses in an effort to strengthen farm prices.

The bill I am introducing is a step in that direction, addressing the problem from both the supply and demand side. I urge my colleagues to join me in this effort to get agriculture on the road to recovery.

Mr. HUDDLESTON. Mr. President, I am pleased to join Senator COCHRAN in introducing the Agricultural Act of 1982. I wish to compliment Senator COCHRAN on his initiative, as chairman of the Subcommittee on Agricultural Production, Marketing, and Stabilization of Prices, in developing this legislation to address the critical needs of U.S. farmers. It was a pleasure to work with him in drafting the bill. I am also pleased to note that Senator COCHRAN's subcommittee, on which I am the ranking Democrat will be holding hearings next week on this bill and other proposals to improve the farm situation.

Mr. President, agricultural producers continue to face low market prices caused by supplies far in excess of market demand. The bill will provide improved incentives for financially strapped farmers to participate in programs to limit production and establish programs to reduce burdensome existing stocks of grain.

The bill addresses critical areas that need immediate attention if the farm economy is to be turned around. The bill directs the Secretary of Agriculture to offer paid land diversion programs for the 1984 crops of wheat, feed grains, upland cotton, and rice, along with acreage limitation programs for such commodities.

The bill also establishes more effective minimum loan rates for the 1983 through 1985 crops of these commodities. Stronger loan rates will increase the likelihood of farmers enrolling in programs to limit production.

We seek adoption of these legislative proposals now because, during this period of depressed prices and low farm income, Congress should make every effort to provide farmers a clear statement of the Government's longer term agricultural policy. Hard-pressed American farmers face uncertainty from many quarters—the weather, the markets, and shifts in international conditions that affect export sales—without their Government adding more uncertainty. Enactment of the bill will allow farmers to evaluate upcoming loan and acreage limitation programs prior to the time they must make crucial decisions affecting the operation of their farm enterprises.

The bill will also give the Secretary of Agriculture the specific authority to carry out special payment-in-kind land conservation programs for each of the 1983 through 1985 crops. The programs will attack the problems stemming from excess supply in two ways: First, by encouraging farmers to reduce production, and, second, by using excess Commodity Credit Corporation stocks in compensating farmers for reducing their plantings.

Finally, the bill contains provisions for programs designed to develop export markets for U.S. agricultural commodities, again using Government-held stocks of farm commodities to operate such programs.

LOAN RATES

This bill increases minimum loan rates for the 1983, 1984, and 1985 crops of wheat, feed grains, upland cotton, and rice. These higher loan rates will bolster sagging farm prices and, hopefully, save the Government money in the operation of the farm programs. The more attractive loan rates should increase participation in acreage limitation programs. The acreage limitation programs will, in turn, result in reduced production, higher market prices, and lower Government deficiency and storage payments.

Wheat loans for each of the 1983 through 1985 crops will be not less than $3.80 per bushel. For corn, the minimum loan rate will be $2.75 per bushel for each of the 1983 through 1985 crops. The minimum cotton loan will be 60 cents per pound, and the minimum rice loan will be $8.55 per hundredweight, for these crops.

ACREAGE REDUCTION PROGRAMS FOR 1984 CROPS

The bill will require acreage limitation and paid land diversion programs for the 1984 crops of wheat, feed grains, upland cotton, and rice.

Farmers participating in the 1984 annual programs for any of these commodities will be required to reduce 1984 acreage planted to the commodity involved by at least 15 percent of the acreage base for the farm. The Secretary of Agriculture would have the authority to require additional reductions. Fifty percent of the acreage reduction will be achieved through the acreage limitation program and 50 percent through the paid land diversion program. The diversion payment rates will be not less than $3 per bushel of wheat, $1.50 per bushel of corn, 30 cents per pound of upland cotton, and $3 per hundredweight for rice.

SPECIAL PAYMENT-IN-KIND LAND CONSERVATION PROGRAM

The bill includes specific authority for the Secretary of Agriculture to carry out a special payment-in-kind land conservation program for each of the 1983 through 1985 crops. Wheat, feed grain, upland cotton, and rice producers will be eligible to participate in the program. In addition, the Secretary of Agriculture will be authorized to designate other commodities for inclusion in the program.

The program will enable the Secretary to use the existing excess stocks of agricultural products to encourage farmers to devote farm acreage not needed to meet domestic and foreign demand for agricultural products to conservation uses. Using existing stocks of farm products in this way will serve to limit cash outlays for the farm programs and draw down inventories of grain and cotton to more appropriate levels. By reducing carryover stocks that tend to overhang the market and depress prices, American farmers will receive better prices for their products.

Farmers who participate in the program will receive payments in kind equal to the number of acres diverted from production, multiplied by a percentage of the normal farm yield for the commodity involved that the Secretary of Agriculture determines appropriate to insure adequate participation. Payment will be made by physical delivery of the crop involved, by transfer of negotiable warehouse receipts, or by other methods the Secretary determines to be appropriate to enable the producer to efficiently and expeditiously receive posession of the commodity.

The bill provides that, if the stocks of the commodity involved owned by the Commodity Credit Corporation are not readily available to effect full payment, the Secretary may substitute, fully or partially, cash payments. Cash payments will be made at a rate equal to the basic county loan rate per unit of the commodity involved.

The bill provides that the Secretary must limit the total acreage diverted from production for a particular crop in any county or local community under the program so as not to affect adversely the economy of the county or local community.

EXPORT MARKET EXPANSION

The bill also contains provisions designed to expand international markets for U.S. agricultural products. The bill directs the Secretary to formulate and carry out a program that uses commodities acquired by the Commodity Credit Corporation through its price support activities to encourage additional export sales of U.S. agricultural products. Such products could be tendered at no cost to U.S. exporters to encourage sales in areas of the world where exports can be made in addition to the usual export marketings of the United States. Also, under the program, the agricultural products could be used to encourage sales in markets where the addition of the Commodity Credit Corporation stocks of agricultural products to the quantities already moving in commerce will enable U.S. exporters to be competitive in price with the subsidized exports of other nations. This provision will enable our exporters to meet unfair competition caused by such subsidies.

The bill provides safeguards to insure that normal export sales of U.S. agricultural products are not displaced. Further, the bill provides that U.S. processors of agricultural products could be compensated, using the stocks of commodities owned by the Commodity Credit Corporation, in any case where a U.S. processor is placed at an unfair competitive disadvantage by the use of the bonus CCC commodities by foreign processors who sell their processed products to the United States.

The bill will allow the efficient use of inventories of agricultural commodities that might otherwise prove to be burdensome in future years. The use of these stocks as a bonus for buying American agricultural products will expand export sales and improve the income of our farmers.

The bill also contains provisions designed to use excess stocks of agricultural commodities in the Public Law 480 sales programs. The bill provides that the commodities acquired by the Commodity Credit Corporation can be used to increase the level of agricultural exports shipped under titles I and III of Public Law 480. Using our abundant supplies for the food-for-peace program is far preferable to simply storing the commodities in Government warehouses.

The bill also expands the authority of the Secretary to donate commodities owned by the Commodity Credit Corporation to assist needy persons outside the United States. Such commodities or the products thereof could be donated through foreign governments and public and nonprofit private humanitarian organizations. Under existing law, the Secretary's authority to donate commodities abroad is limited to dairy products. This provision of the bill will eliminate the cost of storing Commodity Credit Corporation stocks and foster good will toward Americans in many foreign nations.

FURTHER NEEDS

The programs established by the bill will do much to improve farm income and provide stimulus to the farm economy ravaged by low prices and weak export markets. However, it may be necessary to do more.

In addition to programs that will enhance market sales of agricultural products, there are other ways in which we can make use of our abundant agricultural production. We could use excess stocks of grain and foodstuffs to aid in domestic food assistance programs and help build a multination food reserve to assist those countries in need of disaster assistance. Such use would improve nutrition at home and abroad without displacing existing markets for our agricultural commodities.

In conjunction with such efforts, we could establish a system for promoting the conversion of existing supplies of basic commodities into higher value processed commodities. Corn can be used for the production of high-protein products—with alcohol fuel for our strategic reserves as a byproduct. Wheat can be converted to flour.

Further, we should consider committing our stocks of Government-owned commodities, which might also include processed products, to begin building the multination food reserve.

Also, the President should explore with members of the European Community, Canada, Australia, and other major agricultural producing nations the feasibility of establishing an international system of food reserves to be used for humanitarian food relief needs.

The United States should not be holding all of the world's food reserves. We should be participating in an international effort to use the abundance from good crop years to see us through poor harvests.

To insure that use of such food reserves does not displace existing sales of agricultural products, we should work closely with appropriate international relief agencies and major exporting nations. By doing so, we will be able to target the use of stocks in excess of those needed for the Public Law 480 program and commercial sales. Too, if a multiyear commitment of reserve stocks can be made, developing nations will be better able to plan for purchases of agricultural products to improve the diets of their citizens.

American farmers are faced with other pressing problems that we may have to address. In particular, the cost and availability of farm credit are still pressing problems.

I recognize and welcome the fact that interest rates have come down in recent months. However, despite these lower interest rates, agricultural credit conditions are likely to be very bleak in 1983. Commercial lenders have indicated that almost 15 percent of present borrowers will not qualify for financing.

In addition, the eroding value of farmland has placed the security for $200 billion in farm debt in jeopardy. Federal credit programs need to be modified to prevent large-scale farm failures and foreclosures.

CONCLUSION

This bill is responsive to the critical needs of American farmers who today face a desperate financial outlook.

Current programs have not been effective in dealing with the severe slide downward in farm prices and income. I reaffirm the statement I made last year during debate on the 1981 farm bill: as ranking Democratic member of the Agriculture Committee, I will make every effort to insure that the Farm Commodity programs meet the objectives of providing stability to, and encouraging the development of, U.S. agriculture.

This bill is designed to meet those objectives, and I urge its enactment.

ADDITIONAL SPONSORS

S. 2859

At the request of Mr. DANFORTH, the names of the Senator from Rhode Island (Mr. CHAFEE), the Senator from North Carolina (Mr. HELMS), and the Senator from North Carolina (Mr. EAST) were added as cosponsors of S. 2859, A bill to amend the tariff schedules of the United States and to correct an anomaly in the rate of duty applicable to textile fabrics, articles and materials coated, filled or laminated with rubber or plastics.

S. 2942

At the request of Mr. COHEN, the name of the Senator from Missouri (Mr. EAGLETON) was added as a cosponsor of S. 2942, A bill to provide that disability benefits under title II of the Social Security Act shall continue to be paid through the end of the administrative appeals process, and that periodic reviews of disability cases shall be carried out only to the extent determined to be appropriate.

S. 3048

At the request of Mr. THURMOND, the names of the Senator from Montana (Mr. BAUCUS), the Senator from Florida (Mrs. HAWKINS), and the Senator from Montana (Mr. MELCHER) were added as cosponsors of S. 3048, A bill to amend Title 18, United States Code, to combat, deter, and punish individuals who adulterate or otherwise tamper with food, drug, cosmetic and other products with intent to cause personal injury, death, or other harm.

S. 3066

At the request of Mr. GLENN, the name of the Senator from Illinois (Mr. DIXON) was added as a cosponsor of S. 3066, A bill with regard to Presidential certifications on conditions in El Salvador.

SENATE JOINT RESOLUTION 240

At the request of Mr. BOREN, the name of the Senator from Louisiana (Mr. JOHNSTON) was added as a cosponsor of Senate Joint Resolution 240, A joint resolution to authorize and request the President to designate the week of January 16, 1983, through January 22, 1983, as "National Jaycee Week."

SENATE JOINT RESOLUTION 258

At the request of Mr. WEICKER, the name of the Senator from South Carolina (Mr. THURMOND) was added as a cosponsor of Senate Joint Resolution 258, A joint resolution to authorize and request the President to designate the month of December 1982 as "National Close-Captioned Television Month".

SENATE JOINT RESOLUTION 265

At the request of Mr. DENTON, the name of the Senator from Kentucky (Mr. HUDDLESTON) was withdrawn as a cosponsor of Senate Joint Resolution 265, A joint resolution to authorize and request the President to proclaim 1983 as the "National Year of Voluntarism".

CONCURRENT RESOLUTION CONCERNING AMERICANS MISSING AND UNACCOUNTED FOR IN SOUTHEAST ASIA—CONCURRENT RESOLUTION 131

Mr. HAYAKAWA (for himself, Mr. MELCHER, Mr. MCCLURE, Mr. THURMOND, Mr. SARBANES, Mr. PELL, Mr. LEAHY, Mr. MATTINGLY, Mr. FORD, Mr. BUMPERS, Mr. COHEN, Mr. LUGAR, Mr. CRANSTON, Mr. DECONCINI, Mr. HOLLINGS, Mr. DOMENICI, Mr. ZORINSKY, Mr. SASSER, Mr. GLENN, Mr. DURENBERGER, Mr. BRADLEY, Mr. PERCY, Mr. STENNIS, Mr. LONG, Mr. RUDMAN, Mr. KENNEDY, Mr. D'AMATO, Mr. RIEGLE, Mr. BRADY, Mr. LEVIN, Mr. INOUYE, Mr. BOSCHWITZ, Mr. LAXALT, Mr. TSONGAS, Mr. HUMPHREY, Mr. MURKOWSKI, Mr. WALLOP, Mr. BIDEN, and Mr. JEPSEN) submitted the following concurrent resolution; which was referred to the Committee on Foreign Relations:

S. CON. RES. 131

Whereas locating Americans missing and unaccounted for in Southeast Asia and their return to the United States is, and should be, of primary concern to the Government of the United States and all humane nations and peoples;

Whereas there are currently two thousand four hundred and ninety-three Americans missing and unaccounted for in Southeast Asia, five hundred and fifty-eight of whom are presumed to be located in Laos;

Whereas the Government of Laos has recently indicated, by its reception of a visiting delegation of Americans from the National League of Families of American Prisoners and Missing in Southeast Asia, that the Government of Laos would assist in the humanitarian effort to locate and return Americans missing and unaccounted for in Laos; and

Whereas the United States Government is encouraged by this recent indication of cooperation on the part of the Government of Laos: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That the Congress—

(1) reaffirms its commitment to locating Americans missing and unaccounted for in Southeast Asia and returning them to the United States;

(2) expresses its appreciation to the Government of Laos for its expressed willingness to cooperate in locating and returning those Americans;

(3) supports the President's actions to locate and return Americans missing and unaccounted for in Southeast Asia; and

(4) urges the President to respond, with all dispatch, to the indicated willingness of the Laos Government to cooperate in this humanitarian effort.

SEC. 2. The Secretary of the Senate shall transmit a copy of this concurrent resolution to the President.

Mr. HAYAKAWA. Mr. President, recently, there has been some indication that the Government of Laos has become more receptive to our efforts to reach a conclusive accounting of Americans missing and unaccounted for in their country. As you know, during my 1981 visit to the ASEAN countries, I was able to enter the Lao People's Democratic Republic, the first such visit by a U.S. Senator in over 5 years. I met with their acting foreign minister to discuss this question and some possible remedies. I handed him the dossiers of five American servicemen and civilians who were known to have been lost in Laos during the Southeast Asian war with the full expectation that these, most likely, would be given little consideration. He accepted the files with the promise that they would be sent to the provincial authorities. We departed Laos very encouraged by the warmth of the visit and the promise of cooperation to help resolve these five cases. Sadly, despite subsequent correspondence, the Laotians have made no real effort to participate in constructive negotiations to determine the fate of the estimated 600 Americans missing in Laos.

I am disappointed and I am saddened by their inaction on this matter. This tragic issue encompass so much more than estimated numbers, case files and crash sites. We want to know about Janet Townley's father, a civilian crew member whose resupply flight disappeared over Laos in 1971. No traces of either the crew or the aircraft were ever discovered, let alone acknowledged. And this is true for the families of Edward Weissenback, Barton Creed, and Charles Shelton, as well as hundreds of brothers, fathers, and husbands who remain open case histories in DOD files.

However, I, once again, am encouraged by recent events which seem to show that the Lao Government accepts the sincerity of our intention to reach an honorable resolution of this matter. In September, a delegation from the National League of Families returned from a trip to Laos with reassurances similar to those I received in 1981 and reported on a new and cooperative attitude demonstrated by Laotian government officials. Not only did the Laotians make travel arrangements and schedule meetings, but, for the first time, permitted a delegation from the United States to inspect several crash sites in the outlying provinces. This, indeed, is a very promising development.

Although we must require more than gestures of gracious hospitality and good faith, I believe this willingness on the part of the Lao government to cooperate, however tentative, should be pursued in the hope that it is a concrete step toward obtaining some real results.

Therefore, I am introducing a concurrent resolution which urges the President to seek cooperation from the Laotians in this humanitarian effort. We must reaffirm our commitment to locating those Americans missing and unaccounted for in Laos and, most importantly, give the Laotians a clear and strong expression of our hopes for this endeavor.

Mr. COHEN. Mr. President, I rise today in support of the resolution which reaffirms this country's commitment to work with the Government of Laos in locating, and returning to the United States, the 558 Americans who are missing or are unaccounted for in that country.

During last month's Veterans' Day services in Washington, the Nation dedicated the first national memorial to those individuals who fought and died in the Vietnam conflict during the years 1959 through 1975. Those ceremonies represented a healing of the tragic differences which divided our country for over a decade.

Mr. President, prior to the dedication of the Vietnam memorial, many Maine veterans described their fear to me that the ceremony would be a token gesture that would signify not only the end of an era but the end of this country's debt to them and to their deceased and missing friends. It is my sincerest hope that this fear is unfounded. We must make sure that the dedication of that memorial marks a renewed commitment on the part of this country and this Congress, not only to the returning veterans, but to the families and friends of those people whose names are not on the memorial and who did not return from Southeast Asia.

Since the end of the Vietnam war, there has been little cooperation from the Governments of Vietnam or Laos in locating those Americans who are missing in their countries and in Cambodia. Within the last year, a Defense Department delegation and a delegation of Vietnam veterans have traveled to Hanoi and have pressed the Vietnamese for the fullest accounting in good faith of the missing Americans. There is hope that increased cooperation will be forthcoming from the Vietnam Government.

During Senator HAYAKAWA's visit to Laos in August of 1981, he secured a meeting with officals of the Laotian Ministry of Foreign Affairs and discussed with them the question of our missing in that country. Regretably, his efforts did not move the Laotian Government toward any meaningful efforts to secure the return of those Americans.

In September, however, a delegation from the National League of Families visited Laos and returned praising the renewed spirit of cooperation exhibited by the Laos Government toward

satisfying the league's efforts in locating loved ones. I believe that this cooperative spirit should not be ignored and that this Government should renew its efforts to work with the Laotian Government in the humanitarian effort to locate and return Americans missing and unaccounted for in Laos.

Mr. President, I am pleased to join Senator HAYAKAWA in supporting this resolution and urge that it be given prompt approval.

Mr. BRADLEY. Mr. President, I am proud to cosponsor this resolution reaffirming our commitment to locating Americans missing and unaccounted for in Southeast Asia and returning them to the United States. Many American families sent sons, daughters, brothers, and sisters, and husbands and fathers to Southeast Asia. Many came back. Some 57,939 did not. Some of those who did not return are missing and unaccounted for. We owe a full accounting to the patriotic families of these men and women.

Last month the Nation dedicated a memorial to those who served in Vietnam. An impressive and moving monument on the Mall near the Lincoln Memorial now stands in tribute to the Vietnam veterans and to the 57,939 who did not return. Their names are carved in the smooth black granite of the monument. Carved beside several of the names there appears a small diamond; this indicates the serviceman is still missing or unaccounted for. In the event the individual is accounted for, the diamond will be carved into a cross. In the event the serviceman returns home alive, the diamond will be carved into a circle.

Mr. President, the resolution we are cosponsoring here today is a reaffirmation of our commitment to carve crosses, perhaps even circles of life into the black granite memorial at the far end of the Mall.

I urge my colleagues to join us in this reaffirmation.

Mr. BIDEN. Mr. President, I am pleased to join in cosponsoring this resolution by the distinguished Senator from California (Mr. HAYAKAWA), and I shall join with him and other colleagues to press for prompt action by the Senate Foreign Relations Committee.

There are still 2,493 Americans missing and unaccounted for in Southeast Asia. Determination of their fate remains an important item of unfinished business in that conflict which troubles our conscience and affects our diplomacy. We cannot rest, nor should we, until the families and loved ones know the truth, and the missing and unaccounted for have been located and returned.

In recent years, this effort has been agonizingly slow, leaving much more to be done and many more questions to be answered. There is a new glimmer of hope, however, in an expression by the Government of Laos of its willingness to assist in the humanitarian effort to locate and return Americans missing in that country.

Since 558 of the missing Americans are presumed to be in Laos, this development opens a new opportunity for cooperation. By this resolution, the Congress would urge the President to respond favorably to the Laos Government so that we can hasten the day when all Americans have been located and returned.

Mr. President, we serve the memory of all who served in Vietnam by continuing to work for a full accounting of those still missing.

RESOLUTION COMMENDING THE GOVERNMENT OF ZIMBABWE—SENATE RESOLUTION 500

Mr. HAYAKAWA (for himself, Mr. JACKSON, Mr. GORTON, and Mr. CRANSTON) submitted the following resolution, which was referred to the Committee on Foreign Relations:

S. RES. 500

Whereas two Americans, two Australians, and two British citizens were kidnapped in Zimbabwe on July 23, 1982;

Whereas the Governments of the United States, Great Britain, and Australia have indicated daily their willingness to provide appropriate assistance to the Government of Zimbabwe to secure the return of the captives;

Whereas the primary responsibility in this matter lies with the Government of Zimbabwe;

Whereas the Government of Zimbabwe, together with ZAPU leader Joshua Nkomo, has urged moderation on the part of the kidnappers and ought to win the assistance of local villagers in locating the kidnappers;

Whereas the Government of Zimbabwe has demonstrated its sincerity by offering a substantial reward for information; and

Whereas these actions are important for ensuring the continued safety and eventual release of all the hostages: Now, therefore, be it

Resolved, That it is the sense of the Senate that—

(1) the Government of Zimbabwe is to be commended for its ongoing efforts to protect the lives of the captives and to bring this incident to a positive conclusion; and

(2) the President of the United States should continue to be supportive of the efforts of the Government of Zimbabwe in this matter.

SEC. 2. The Secretary of the Senate shall transmit a copy of this resolution to the President with the request that he further transmit such copy to the Government of Zimbabwe.

Mr. HAYAKAWA. Mr. President, last July, six people including two Americans, Brett Baldwin of Walnut Creek, Calif., and Kevin Ellis of Bellevue, Wash., were kidnaped off a tourist bus in Zimbabwe. I am submitting today, with Senators CRANSTON, JACKSON, and GORTON, a resolution commending the efforts of the Zimbabwe Government and their continued pursuit for justice in this unfortunate incident.

I was recently in Zimbabwe and the occurrence of this kidnaping does not surprise me. The extent of dissident activity was upsetting especially when you consider its possible effect on Zimbabwe's future. Their Government is trying to bring this kidnaping to a safe conclusion. The country's citizens, and especially the local villagers, are being asked to report any information they have on sightings or the whereabouts of the kidnapers and their victims. Our State Department and local Embassy are keeping in constant communication with Zimbabwe officials to remain abreast of any newly learned information. In turn, the families of the two Americans are being informed of actions being taken to locate their loved ones.

We as a country, and the victims' families in particular, are very pleased with the efforts of the Zimbabwe Government. I am offering this resolution not only to let them know of our gratitude for their endeavors, but to reaffirm our support in this matter.

AMENDMENTS SUBMITTED FOR PRINTING

FEDERAL-AID HIGHWAY IMPROVEMENT ACT OF 1982

AMENDMENT NO. 4947

(Ordered to be printed and referred to the Committee on Finance.)

Mr. KASTEN submitted an amendment intended to be proposed by him to the bill (S. 3043) to authorize appropriations for the construction of certain highways in accordance with title 23 of the United States Code, and for other purposes.

Mr. KASTEN. Mr. President, today I am submitting an amendment to S. 3043, The Federal-Aid Highway Improvement Act of 1982, to insure that every State receives a fair share of these highway construction funds.

In the past, the Federal highway trust fund has consistently favored some States at the expense of others by giving them a larger share of the Federal highway allotment. In my home State of Wisconsin, for example, only about 70 cents is being returned to the State for every dollar the State contributes. Under the new highway bill, Wisconsin's share would drop even further.

Mr. President, Wisconsin and the other donor States have sacrificed to see that our Interstate Highway System was constructed as quickly and economically as possible. Now the Interstate System is nearly finished. We can no longer subsidize other States at our own expense.

Wisconsin and many of the other donor States have high levels of unemployment. We badly need the jobs more money for the upkeep of our

roads and bridges will provide. We cannot afford to continue receiving 70 cents, or less, for every dollar we contribute.

My amendment is simple and straightforward. It would guarantee that each State receives a minimum of 85 cents back for every dollar contributed to the highway fund. Such a guarantee would allow every State to keep a fair share of the money distributed and would still allow for flexibility in determining priorities for construction and rehabilitation of our Nation's transportation system.

Mr. President, I ask unanimous consent that the complete text of my amendment be printed in the RECORD at this point.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

At the appropriate place in the bill add the following new section:

SEC. . (a) Section 101 (a) of title 23, United States Code, is amended by adding at the end thereof the following new paragraph:

"The term 'Highway Trust Fund' means the fund established by section 209(a) of the Highway Revenue Act of 1956 (70 Stat. 397).".

(b) The first sentence of subsection (b) of section 104 of such title is amended by inserting "and subject to the limitation in section 158 of this title," after "in paragraphs (4) and (5) of this subsection,".

(c) The second sentence of section 144(e) of such title is amended by striking out "Funds" and inserting in lieu thereof "Subject to the limitation in section 158 of this title, funds".

(d) Chapter 1 of such title is amended by adding at the end thereof the following new section:

"§ 158. Minimum apportionment for States; use of portion specified

"(a)(1) The sum of all amounts apportioned with respect to any State in any fiscal year under sections 104(b) and 144(e) of this title shall not be less than an amount which is determined by multiplying 85 per centum of the amount described in paragraph (2)(B) of this subsection for that State by the ratio which the amount described in paragraph (2)(A) of this subsection bears to the sum described in paragraph (2)(C) of this subsection.

"(2) On the first day of each fiscal year, the Secretary after consulting with the Secretary of the Treasury, shall determine—

"(A) the amount which was appropriated during the preceding fiscal year to the Highway Trust Fund under section 209 (c) of the Highway Revenue Act of 1956 (70 Stat. 397);

"(B) the portion of the amount described in subparagraph (A) which is attributable to the taxes described in section 209 (c) of such Act which was received in the preceding fiscal year from each State; and

"(C) the sum of all amounts which were apportioned to all States during the preceding fiscal year under sections 104 (b) and 144 (e) of this title.

"(3) The Secretary of the Treasury is authorized to consult with the Secretary to carry out the provisions of this subsection.

"(b) The amount, if any, of the minimum amount apportioned with respect to any State in any fiscal year under subsection (a) of this section in excess of the amount which would be apportioned to such State in such fiscal year under sections 104 (b) and 144 (e) of this title without regard to subsection (a) of this section shall be expended for any Federal Aid Highway category.".

(e) The chapter analysis of chapter 1 of such title is amended by adding at the end thereof the following new item: "158. Minimum apportionment for States; use of portion specified.".

RADIO BROADCASTING TO CUBA ACT

AMENDMENTS NOS. 4948 THROUGH 4966

(Ordered to be printed and lie on the table.)

Mr. LEAHY submitted 19 amendments intended to be proposed by him to the bill (H.R. 5427) to authorize support to Radio Broadcasting to Cuba, Incorporated.

NOTICES OF HEARINGS

SELECT COMMITTEE ON INDIAN AFFAIRS

Mr. COHEN. Mr. President, I would like to announce for the information of the Senate and the public, the scheduling of a public hearing before the Select Committee on Indian Affairs.

The hearing is scheduled for December 7, 1982, beginning at 2 p.m. in room 4232, Dirksen Senate Office Building. Testimony is invited regarding S. 2998, a bill to declare that the United States holds certain lands in trust for the Las Vegas Paiute Tribe; S. 2893, a bill to settle certain Indian land claims within the State of Florida; and, S. 2931, a bill to provide for the disposition of funds appropriated to pay a judgment in favor of the Cowlitz Tribe of Indians in Indian Claims Commission Docket No. 218.

For further information regarding the hearing you may wish to contact Timothy Woodcock of the committee staff on 224-2251. Those wishing to testify or who wish to submit a written statement for the hearing record should write to the Select Committee on Indian Affairs, U.S. Senate, Washington, D.C.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. McCLURE. Mr. President, I wish to announce for the information of the Senate and the public the scheduling of a public hearing before the Committee on Energy and Natural Resources to review current conditions in the natural gas market, including related proposals for modifications to existing law.

The purpose of this hearing is to explore current market conditions under existing natural gas law and the related regulatory structure to determine the nature and extent of any problems that are occurring, and to begin review of possible solutions to these problems. To that end, this hearing will also review several pending legislative proposals to modify existing law.

During the course of the hearing, the committee expects to receive testimony from a broad spectrum of witnesses, including representatives of gas producers, transmission and distribution companies, and industrial, commercial and residential consumers of natural gas.

The hearing will be held on Monday, December 13, 1982, beginning at 10 a.m. in room 3110 of the Dirksen Senate Office Building. Those wishing to testify or wish to submit written statements for the hearing record should write to the Committee on Energy and Natural Resources, room 3104, Dirksen Senate Office Building. For further information regarding these hearings you may wish to contact Howard Useem or Dave Doane of the committee staff at 224-4971, 224-5205 or 224-7144.

ADDITIONAL STATEMENTS

NASA'S TIMETABLE FOR SPACE TRAVEL ENVISIONS A PRODUCTIVE ERA IN COMMUNICATIONS AND OTHER TECHNICAL ADVANCES

● Mr. RANDOLPH. Mr. President, last month—appropriately beginning on Veterans Day—the National Aeronautics and Space Administration successfully completed its fifth shuttle mission.

It was the first operational flight of the Shuttle and its main objective during the 5-day flight was to deploy two communications satellites. The first commerical payload consisted of the ANIK C-3, built, owned, and operated by Telesat Canada, and the SBS-C, the third of a series of satellites owned by Satellite Business Systems, a private U.S. company.

For the first time the Shuttle carried a crew of four, including two mission specialists. The flight started transforming the Shuttle from a test vehicle into an operational carrier for routinely transporting people, satellites, scientific instruments and even, beginning next year, a scientific laboratory into space.

Five days before the Shuttle Columbia launch, NASA Administrator James M. Beggs spoke at the National Press Club on the future of space flight. In a scholarly and highly interesting discourse, he traced the development of space travel and projected the possibilities of productive space efforts through the end of this century.

In Dr. Beggs' words, the latest mission marks the "beginning for a whole new ball game in space." I ask that excerpts of his remarks be placed in the RECORD. I feel that this timetable for space travel as outlined by NASA is a

valuable guide to the future which should be shared with my colleagues and a much broader public.

The excerpts follow:

ADDRESS BY JAMES M. BEGGS, NASA ADMINISTRATOR

The space arena is no longer a spectator sport we watch from the bleachers. It is a place where soon there will be few spectators, but plenty of players and competitors. And it is a realm offering unlimited opportunities for business and industrial expansion to the end of the century and beyond.

There is intense interest in this mission from people in all walks of life throughout the country. For example, hundreds of county and municipal officials from nearly every state will come to the Shuttle landing on November 16 at their own expense to learn about how the technology developed for the Shuttle and other space age technology is being used and could be used in a practical way to help solve urban problems. Examples are advances in remote sensing satellites which could be used to monitor toxic waste disposal, arson detection sensors, financial processing software and the like.

The commercial use of space is nothing new. Satellites have been revolutionizing world-wide communications since the mid-1960s. COMSAT, developed as a joint government-industry corporation, returned its first dividend to its stockholders in the fourth quarter of 1970, and hasn't stopped paying dividends since. It is now a major player in a multi-billion-dollar industry.

The Space Shuttle, however, should trigger phenomenal growth in satellite services. Because the Shuttle will allow us to assemble, repair, maintain and checkout satellites in low earth and, eventually, in geosychronous orbit, satellites can now be made much larger and more complex and capable of performing more functions than are possible now. Moreover, using the Shuttle, it will be practical to assemble much larger antennas and reflector structures than those now in orbit. For example, in about 10 years personal communications satellites with multibeam antennas could be in orbit, capable of handling up to 25 million users of a wrist radio communications system.

The growth of communications satellite activity has been truly amazing. In 1972 we launched two domestic communications satellites putting a total of 12 transponders into orbit. By the end of this year there will be 357 North American Domestic satellite transponders in geostationary orbit. And we expect that number to grow to 1,250 by 1990 and to 2,500 by the year 2000.

Conservative estimates indicate that as many as 350 commercial communications satellites may be launched to geostationary orbit between now and the year 2000. By then, NASA-sponsored studies project, about one-third of the U.S. launch business, both on the Shuttle and on expendable launch vehicles, will be commercial communications satellites.

Other areas of space industrialization and commercialization are mushrooming from concept to reality at a rapid rate. They will offer greater commercial opportunities in the future as the number of Shuttle flights grows to a projected 55 missions a year by the end of the century.

These areas include processing and manufacturing of selected materials and products in low earth orbit; high resolution of land monitoring for better natural resource management and detection of new resources and high resolution monitoring of oceans for optimizing shipping routes, increasing yields of fishing fleets, and so on.

Space manufacturing and materials processing, though still in its infancy, is the area that may hold the greatest promise of true commercialization of space activity. Studies done for NASA indicate that this activity may account for 20 to 30 per cent of total non-federal commercial space activity by the year 2000.

The basic attraction of space for making products and processing materials is the vacuum and gravity-free environment it offers. In such an environment, heat convection and other gravitational effects normally encountered on earth in processing materials can be avoided. This holds fascinating prospects for metallurgists; for those interested in producing pure crystals for electronics and other purposes; for manufacturers of certain pharmaceuticals and, potentially, for a host of others.

Since the Shuttle started flying 19 months ago NASA has seen industry interest develop in this field in three broad directions.

First we have aerospace companies, who understand space and space transportation. They want to manufacture hardware to supply a service in space, such as a materials processing facility or a free flyer to lease to other companies for experimentation.

Secondly, we have joint venture companies, which have been started to provide other kinds of services to commercial firms. They are interested in processing or integrating satellities or providing launch services themselves.

The third category is composed of non-aerospace companies who are interested in understanding the unique space environment so they can use it on earth to make their products better.

The Soviet Union, the Federal Republic of Germany and Japan have been most active in pursuing these possibilities. It has been reported, for example, that Japan envisions a multi-billion dollar annual market for itself in space products by the 1990s, and that space-processed materials would make up a substantial portion of that market. The Soviet Union has conducted repeated, extensive experiments in space manufacturing on its manned flights over the past decade or so. And two groups of West German companies will conduct materials processing studies beginning next year with the first flight of Spacelab, the European-built laboratory that fits into the Shuttle's cargo bay.

In the United States we have had a fascinating development and one most promising for its commercial possibilities.

Under an agreement with NASA, Johnson and Johnson and McDonnell Douglas have pioneered an ambitious series of experiments in a process that goes by the rather arcane name of continuous flow electrophoresis.

On earth, gravity limits the quantity and quality of material derived from the process. But in gravity-free space, as we discovered on the last Shuttle flight, the process produces purer material and in greater amounts.

As a cooperative venture, NASA flew, free of charge, a small electrophoresis device developed by the commercial team. It operated to perfection, separating albumin into its pure constituent parts—several times purer than those produced on earth—and with a throughput better than 450 times that of operation on earth. Indeed, this was a case where the equipment operated even more efficiently than technicians had predicted using computer modeling.

This holds great promise for such products as Interferon and other drugs that could be used to treat various types of anemia, diabetes, hemophilia, emphysema and other serious, sometimes fatal ailments. Under their agreement with NASA, the partners plan seven more test flights and then hope to go into commercial production. Their goal is to have a small factory in space, perhaps anchored to a platform in orbit. The Shuttle would pay periodic visits to deliver raw materials and retrieve the product.

These companies hope to begin marketing space-produced drugs before the decade is out. On the 11th Shuttle flight. They plan to use the system to separate a sufficient quantity of a candidate drug to cover its entire program of clinical testing. Because the space-based system performed so well, the companies have calculated it will take only five days to separate all the materials needed for testing. On earth, the process would take six months using considerably more equipment.

Under a similar agreement another company, GTI, is producing a furnace for Space Shuttle metallurgical uses. The furnace would allow them to produce metal alloy samples in space to be sold to researchers for experimental purposes. And at least two other American firms plan experimental processing work on upcoming flights.

In his July 4 space policy statement, President Reagan called for "a climate conducive to expanded private-sector investment and involvement in space activities."

NASA is doing several things to fulfill that goal:

We are cooperating with Space Services, Inc. of Houston, Texas, which successfully launched the first privately-funded rocket two months ago by making rocket stages available to them and easing the requirements for SSI's use of government facilities.

We are exploring investment in a Delta class expendable launch vehicle operation.

We are exploring a private sector initiative to develop Atlas/Centaur expendable launches.

We are working with an advisory panel of the National Academy of Public Administration to explore ways to further develop our efforts to commercialize space.

We are looking at a private sector proposal to purchase a fifth Shuttle orbiter, and also encouraging private investment in advanced communications satellite experimental work and other joint endeavors with industry.

We are stepping up our marketing efforts to sell Shuttle services. Ariane captured five customers from us last year, one of which has now been recaptured by us. And by pointing out the unique characteristics of the Shuttle, such as its capabilities to repair, service, and retrieve satellites in orbit, we are making progress in many parts of the world. Mexico, and Australia have just announced they have selected the Shuttle over Ariane for four communications satellite launches in 1985.

NASA is a research and development agency. That is what our Congressional charter tells us to do and that is what we have done superbly over the past 24 years in aeronautics and in space and in partnership with industry and the university community. Indeed, it is this partnership that has made the United States the world's leader in aeronautics and in space technology.

NASA is not an operational agency. That is why we are organizing our marketing efforts to sell Shuttle services and Shuttle operations so that in the future it may be possible for a commercial, or even a semi-public entity to take them over.

And if we could get the resources to build one, by 1990, we would be operating continuously on a permanent space station supplied and serviced by the Shuttle. We would be fast developing an orbiting transfer vehicle to operate from the space station to geosynchronous orbit. And in about 15 years, assuming we had the space station in orbit, we would probably be experimenting with building large structures in space, such as power generators for the station, and, possibly for transmission back to earth.

The challenges ahead are great. But so are the opportunities. Studies we have done with industry project upper limit annual revenues from space industrialization at $68 billion (in FY '83 dollars) by the year 2010. Information services will account for the bulk of those revenues. Some will come from materials processing and space manufacturing. And we even see a small segment coming frm space tourism.

Business will be slow the first 20 years or so, because returns on investment in high technology take a while. But as engineers and scientists, both in government and in industry begin to develop the space infrastructure, the revenue curve will begin to increase at a rapid rate.

Industry is now beginning to come around to making Shuttle-related investments, and to committing dedicated people to Shuttle exploitation. And it is starting to use the Shuttle's advantages in product marketing.

The players are beginning to enter the game. And as Martin Buber once wrote: "Play is the exultation of the possible."

I think the possible is limited only by our resolution and imagination.●

AMERICAN FOOTWEAR INDUSTRY'S TRADE PETITION

● Mr. COHEN. Mr. President, I recently joined many of my colleagues here in Congress in signing a letter to Ambassador Brock regarding a petition filed by the American footwear industry under section 301 of the Trade Act of 1974. I commend the direction taken by the shoe companies in requesting the removal of a variety of foreign trade barriers that prevent our domestic companies from competing in world markets on a fair and equitable basis.

Barriers faced by potential shoe exporters include a tariff of 170 percent on footwear in Brazil, while the markets in Japan, Taiwan, and Korea are virtually impenetrable. At the same time, the United States has the most open market for footwear in the world resulting in a flood of imports, now accounting for 60 percent of the domestic market. Recent figures released by Maine's Department of Labor indicate that employment in leather and leather products declined significantly by 2,500 jobs during the past year, largely due to the effect of competition from foreign imports.

Despite the barriers which exist, many shoe companies throughout the country and in my own State of Maine are still able to export shoes. I am proud of Maine's tradition of producing high-quality shoes, and I am certain that more of these products could be sold abroad if these barriers were removed.

The petition filed by the nonrubber footwear industry provides an opportunity for the administration to show its commitment to the principles of free trade. I urge Ambassador Brock to accept the 301 petition and begin immediate negotiations for the removal of these trade barriers.

I submit for the RECORD the text of a November 26 letter to President Reagan for George Q. Langstaff, president of Footwear Industries of America.

FOOTWEAR INDUSTRIES OF AMERICA,
Arlington, Va., November 26, 1982.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: You may be aware that fifty United States Senators and more than 100 Members of the House of Representatives have signed letters urging Ambassador William E. Brock, the United States Trade Representative, to act on the petition recently filed by the footwear industry against eight countries and the European Community.

The petition, brought under Section 301 of the Trade Act, asks Ambassador Brock to negotiate a free and open world market in nonrubber footwear in order to deal with the massive diversion of these products into the U.S. market caused by the virtually impenetrable trade barriers thrown up by foreign countries.

If ever there was a case ideally suited to prove your newly enunciated free trade policy, and to test the willingness of our trading partners to cooperate in reviving the world economy, the action brought by our industry-labor coalition is certainly that case. Footwear imports are effectively barred from many other countries, including Japan, Korea, Taiwan and Brazil. The trade barriers in Europe divert footwear exports from these and other countries into the United States, while at the same time, American exports are denied access to foreign markets by tariff and non-tarriff barriers.

We sincerely believe that only a free and open world market in nonrubber footwear can correct the situation before this vital American industry is forced to the wall by unfair practices that have made footwear trade a one-way street which funnels global production into our country.

In your radio address on Saturday, November 20, you said: "Either free world countries go forward and sustain the drive toward more open markets or they risk sliding back toward the mistakes of the 1930's and succumbing to the evils of more and more government intervention."

Other countries have already succumbed to government intervention in international trade. We have been experiencing the results of that intervention for many years in our industry. Foreign government subsidies of footwear exports, combined with their barriers to footwear imports, have decimated our American companies and deprived our people of thousands of jobs.

Unemployment in our industry is nearly double the national unemployment rate. But even this frightening statistic does not begin to reflect the overall employment decline in footwear production.

In 1968 there were nearly 240,000 jobs in the American footwear industry, plus 120,000 more in supplier industries, for a total of 360,000 jobs. Today there are 130,000 jobs left in footwear manufacturing and an additional 65,000 in supporting industries. That means we have lost 165,000 jobs in this industry at a time when the nonrubber footwear market in America has remained substantially constant. Almost 20,000 of those jobs were lost in the past year alone.

Moreover, some 400 shoe factories have shut down in the United States since the 1960's and imports have been a primary cause of these plant closings.

As you know, our country is faced with the largest trade deficit in its history. Imports of nonrubber footwear contributed $2.4 billion to the U.S. trade deficit in 1981, a year when import penetration reached 50%. This year the import penetration is soaring past 60%.

In spite of the accelerating invasion of diverted imports, the nonrubber footwear industry in this country remains a viable industry, an important industry, and one well worth preserving. At retail, ours is a $9.5 billion industry. It accounts for more than $1 billion annually in payroll dollars in direct manufacturing alone. And it has some 300 companies operating nearly 700 plants in 38 states.

In addition to making a major contribution to the health of the national economy, our industry is the recognized leader in new manufacturing techniques and in recent years many of our plants have been thoroughly modernized to make them models of state-of-the-art technology.

We are confident you will agree that this industry, and the nearly 200,000 jobs that still depend upon it, should not continue to be savaged by the increasing diversion of world footwear production into our market. The call of our industry-labor coalition for a free and open world market in nonrubber footwear can be used as the spearhead to batter down trade barriers around the world.

Your Administration has a golden opportunity following the recent GATT ministerial meetings to test the efficacy of your newly reinforced free trade policy and to determine whether other nations will or will not cooperate in reducing barriers to trade.

I am confident you will agree, after a careful study of the facts, that the case submitted to Ambassador Brock by our industry-labor coalition would be the strongest and best test of your policy that you could possibly make. We respectfully request that you ask Ambassador Brock to accept our Section 301 petition in its entirety on or before the December 9 deadline and to immediately begin negotiations with the European Community and the eight countries named in the petition so that a free world market in footwear may be achieved at the earliest possible date.

Respectfully,

GEORGE Q. LANGSTAFF,
President.●

FEDERAL ANTITAMPERING

● Mr. EAST. Mr. President, the bipartisan support being given the Federal antitampering bill reflects widespread public concern over the threat of un-

lawful tampering with consumer products in the marketplace.

It is clear that increased penalties are necessary to protect the health and safety of American consumers against such criminal acts.

Conceded, this is a complex problem and there can be no guarantees which would furnish absolute protection against the type of mindless criminal acts that recently occurred in Chicago, but strengthened criminal penalties are a needed step in the direction of deterring and punishing such acts.

At the same time, as was pointed out by Yale economics Professor Paul W. MacAvoy in the November 28, 1982 edition of the New York Times, a rush to FDA regulation of product packaging could raise more questions than it answers. Professor MacAvoy's article titled "FDA Regulation—At What Price?" offers a penetrating analysis of the impact that hasty FDA action has often had and why new regulations in the market place, however well intended, are not the solution to the threat posed by consumer product tampering.

I ask that Professor MacAvoy's article in the New York Times of November 28 be included in the RECORD.

The article follows:

[From the New York Times Nov. 21, 1982]

FDA REGULATION—AT WHAT PRICE?

(By Paul W. MacAvoy)

In response to the Tylenol poisonings, the Food and Drug Administration on Nov. 5 issued new regulations for tamper-resistant packaging for over-the-counter drugs. The regulations followed weeks of investigation by the F.D.A., which established that the greatest danger to consumers comes from tampering with products after they have been placed on the retail shelf. Thus, regulators specified that new packaging should first and foremost alert the consumer that the container has been opened. Now that the alert is on, it is time to alert the consumer to excessive regulation.

Born of haste, in reaction to marketplace panic, the F.D.A. regulations went into effect without the benefit-cost analysis required by the Vice President's Task Force on Regulatory Relief. If the analysis had been undertaken, it would have shown that the new regulations raised more questions than they answered. Therefore, the benefit-cost analysis will be done here, on the back of an envelope.

For the regulations on over-the-counter drugs to benefit consumers, they must provide insurance against tampering with a value greater than its cost. That value is equal to the amount that consumers are willing to pay for increased security, and the cost is equal to the additional capital and material expenses required in changing packaging to meet the new stringent regulations. This insurance value can be estimated, if only very roughly, as follows: Value is equal to the probability of saving a life multiplied by the worth of the consumer's life saved.

Assume that Mr. or Mrs. Consumer considers the remainder of his or her life to be worth $1 million. (This is my most reckless estimate given that almost all the attempts at valuation of lives saved indicate that both consumers and voters act as if they value risk reduction at rates equivalent to $500,000 or less.) Then, with recent experience showing that one in 100 million packages is poisoned the insurance value is $1 million times the probability of one in 100 million. Thus, the value from the regulations at the time of purchase is one cent per package.

But the new requirements on packaging by the F.D.A. will cost from two to 10 times that amount per package.

The F.D.A. expects that drug manufacturing companies responding to the regulations will provide plastic or air-tight foil bottle caps, glued boxes, or plastic bubble packages attached to cardboard backing in which bottles will be contained. There is no specific F.D.A. requirement for any one of these types of packages, except that the manufacturing company bears the burden of proving that they are tamper-resistant.

The regulatory agency estimates that Federal tax and plastic seals will cost several cents per package. In addition; there are going to be costs of removing existing inventories over the three-month transition period, and long-term capital costs of new packaging machinery. Industry sources indicate that all of these costs are likely to be greater than the F.D.A. estimates, and could increase to as much as 10 cents per package. If they are only as much as two cents per package, then the consumer gets one cent of insurance value but pays two cents. And if they are as high as 10 cents, then the consumer gets a penny's worth of regulatory value at the cost of a dime. A dime per package comes to $200 million per annum.

Why, then, the new regulations? The agency implies that they are forced to regulate because of consumer demand for the tamper-resistant packages. But if these demands were insistent to the point that the market would clearly absorb the cost increase, then the manufacturers for the most part would voluntarily provide the heavier packaging. Regulation is not needed to respond to changes in consumer demands.

The fact is that the F.D.A. was spurred on in establishing its regulatory initiative by the trade association of drug manufacturing companies subject to the new regulations. No dragging of the producer out of the field of free enterprise into repressive regulation in this case. The argument was that F.D.A. regulations were required because in their absence state and local regulations would have proliferated and led to even higher costs of meeting different requirements.

This is the "mad dogs" argument known so well to every agency head—if such-and-such regulations are not put into effect, then the mad dogs will be loosed in the state legislatures to require something a lot worse. That wonderful old argument is always true to some extent, but is more often used as an excuse than as a reason for action. In this case, the evidence that eccentric state or local laws were proliferating is limited to Chicago, California and Massachusetts—the second and third noted for their past legislative eccentricities—so that the assertion that exclusive Federal regulation would solve a widespread proliferation problem is unconvincing.

That the regulated companies wanted the regulation is certainly an important reason. They not only prefer to be free of contradictory state regulatory standards, but also free of competition among themselves in responding to new market uncertainties. But eliminating competition in these circumstances is not a very good idea, particularly in working out a response to increased consumer concern about the quality of products.

The more variation in company reaction there is, the more likely that the best long-run combination of protective seals, bubbles and warnings will be found, and the competitive market provides that likelihood where a set of regulations with the specific and uniform time constraint and labeling requirement does not. That the companies wanted to be regulated is a poor reason for undertaking another F.D.A. foray into protective requirements.

There is an explanation but not a reason for these new regulations. Too much, too expensive protection is the long tradition of F.D.A. responses to disasters. This agency, by licensing drugs or prescribing food content, has had a dreary history of identifying more harms than actually exist. The now infamous drug lag by which American markets lack important pharmaceuticals found elsewhere in the world is product of this regulation.

The F.D.A. excessively delays the introduction of new products, or excessively regulates those on the market. This does minimize the risk of a harmful drug, but thereby precluding the development of more new drugs that might do a great deal of good. It protects the agency itself from criticism. New packaging regulations provide F.D.A. Administrator Arthur H. Hayes Jr. with strong testimony before his Congressional Oversight Committee to the effect that the agency reached with vigor, haste and maximum use of its jurisdiction.

What should be done? Nothing. Alternatively, the F.D.A. should require a cheap paper seal over every bottle top that tells the consumer to return that bottle if the seal is broken. Alternatively, Mr. Hayes should stop and view his benefit-cost analysis before responding to each psychotic killer with a new national regulation.●

BRITISH DEFER COMMERCIAL-SCALE BREEDER UNTIL NEXT CENTURY

● Mr. HUMPHREY. Mr. President, yesterday I entered into the RECORD an article describing how various European breeder reactor projects have slowed due to a lack of any urgent need to proceed and because of the technical and financial problems these projects face. We are deceiving ourselves if we think there is a major race to build a commercial breeder and that Clinch River is the best way to keep the United States in contention.

I would like to share with you today a recent U.S. State Department cable to Washington concerning the British program. This cable confirms Great Britain's recent decision to defer plans to construct a full-scale breeder demonstration plant until sometime early in the 21st century. I ask that it be placed in the RECORD.

The cable follows:

[Telegram]

DEPARTMENT OF STATE.

Tags: TNUC, ENRG, SCSA, UK.

Subject: Construction of commercial-scale fast breeder reactor to be deferred.

1. HMG announced the results of its cabinet-level review of the future of the UK's fast breeder program by the device of

having the Secretary of State for Energy, Nigel Lawson, submit a written reply to a question in parliament on November 29.

2. Mr. Lawson announced that the government would continue its development of the FBR but would defer plans for construction of a full-scale plant until early in the 21st century. The decision was taken in light of reduced projections for electric power demand and the low price and relative abundance of uranium on the world market. (Heretofore, UK nuclear authorities had been planning for a public inquiry on the commercial-scale plant to begin as early as the mid-1980's, with construction to start late in the decade or in the early 1990's.)

3. The statement confirmed that the UK had been conducting exploratory discussions with other countries on the possibility of cooperative development of a large-scale reactor, and said that such talks would continue. It also announced that the current manpower level devoted to the FBR would not be reduced through forced redundancies. (This seems to leave open the possibility of manpower reductions through natural attrition.)

4. Lawson's statement was attacked from two diametrically opposite directions. Some MP's decried the decision, saying that it would lead to a brain drain of nuclear personnel who would go to other countries where more vigorous programs were being carried out. Friends of the Earth issued a statement saying, "Mr. Lawson is plunging Britain into a plutonium economy without any public mandate."

5. Comment: The decision puts the UK program plan more in line with that of the U.S. and takes the edge off of reaching an early conclusion on the nature of a cooperative effort with the U.S., France, FRG, and/or Japan. The French may be more disturbed than others by the decision, but this will not be completely clear until negotiations (which had been suspended pending the government decision) resume. Deputy Secretary of Energy Ivor Manley went to Washington on November 29 to brief Deputy Energy Secretary Davis on the decision and presumably to assure the USG that the UK intended to continue negotiations. We have not yet received any feedback from these talks.●

CHEMICAL AND TOXIC WEAPONS

● Mr. QUAYLE. Mr. President, the evidence of Soviet use of chemical and toxic weapons is once again in the headlines. At a news conference early this week, the State Department presented some of the clearest evidence yet produced of direct, continuing gross violations of international law. This new evidence includes a Soviet gas mask from Afghanistan which is contaminated with trichothecene mycotoxin—the same poison used in yellow rain. This can leave no doubt whatsoever of continued Soviet use of chemical and toxic weapons in Afghanistan. The photographs of the young Hmong boy showing clear evidence of the effects of yellow rain are further proof of continued Soviet use in Southeast Asia.

I applaud the State Department for their continuing efforts to ferret out the evidence of these horrid Soviet crimes. However, I continue to be concerned about the unwillingness of the world community to acknowledge the Soviet actions for what they are—crimes.

I want to call the attention of each of my colleagues to the most recent report by the State Department on "Chemical Warfare in Southeast Asia and Afghanistan: An Update." The preface to that report contains a letter from Secretary Shultz which summarizes the horrendous conduct of the Soviet Union in the direct manner so sadly lacking in most of the international community.

Mr. President, I ask that the letter of Secretary Shultz be printed in the RECORD, along with an article from the Wall Street Journal of November 22, 1982, "The U.N.'s Second Year With Yellow Rain"; an editorial from the Wall Street Journal on the same date, "Poisoned Confidence"; and an editorial from the Wall Street Journal of December 1, 1982, "Tiptoe Through the Toxins."

The material follows:

THE SECRETARY OF STATE,
Washington.

To the Congress of the United States and Member States of the United Nations:

Chemical and toxin weapons are of special concern to mankind. Used against civilian populations, or even against soldiers with protective equipment, they can cause protracted and indiscriminate physical and psychological suffering and, as we witnessed in World War I, widespread death as well. For such reasons, the international community has outlawed the use of these weapons. The 1925 Geneva Protocol, one of the oldest arms control agreements still in force, forbids the use of chemical and biological weapons in war. The 1972 Biological and Toxin Weapons Convention prohibits the mere possession of toxin weapons. In an effort to extend such legal constraints still further, the United States—together with other countries in the Committee on Disarmament at Geneva—is seeking an outright ban on the development, production and stockpiling of chemical weapons.

I regret, then, to report that chemical and toxin weapons are nevertheless being used today in Laos, Kampuchea and Afghanistan by the Soviet Union and its allies. In March of this year, we reported on this subject to the Congress, the United Nations, and to the members of the international community. Our report, which contained a comprehensive and detailed compilation of the evidence available to the United States Government, was designed to bring the issue to the attention of the world community. In presenting it, we invited others to join us in examining the evidence and in confirming the truth.

These efforts have not led the Soviets and their allies to halt their illegal use of chemical and toxin weapons. Instead, they continue to deny the truth about their illegal activities. The world cannot be silent in the face of such human suffering and such cynical disregard for international law and agreements. The use of chemical and toxin weapons must be stopped. Respect for existing agreements must be restored and the agreements themselves strengthened. Respect for the dignity of humanity must be restored. Failure to achieve these goals can only have serious implications for the security of the world community, particularly for the security of smaller nations, like those whose people are being attacked. If such basic elements of human rights can be so fundamentally ignored, how can we believe any pledges to respect human rights?

All who would seek to promote human rights, and all who would seek to maintain the credibility of international agreements, have a duty to call world attention to the continuing use of chemical and toxin weapons, and to seek a halt to their use. It is for this purpose that the United States provides the following report.

Sincerely,

GEORGE P. SHULTZ.

[From the Wall Street Journal, Nov. 22, 1982]

THE UNITED NATIONS' SECOND YEAR WITH YELLOW RAIN

(By Barry Wain)

BANGKOK—If you're a Hmong hill tribesman in Laos trying to convince the world that someone persistently is trying to wipe you out with lethal "yellow rain," you know by now you've got almost no hope.

Probably the only certain way to collect "convincing" evidence is to take a direct hit, being careful to sustain serious, distinctive wounds from a yellow-rain attack while retaining enough energy to trek rapidly over the rugged mountains to Thailand before the symptoms disappear. The attack should be timed so that you reach Thai territory to be examined by a United Nations team briefly visiting the country. As you run for it, there's little point in scooping up handfuls of yellow powder from the corpses of your family and friends who didn't survive the attack; it won't be accepted as evidence because outsiders can't tell where you really found it.

That assessment is harsh but realistic, as a U.N. team winds up its second year of inquiries into the alleged use of chemical and biological warfare.

Appointed by the U.N. secretary-general on the invitation of the General Assembly, the experts are investigating U.S. government claims that Soviet-backed regimes in Laos, Cambodia and Afghanistan are using biochemical weapons againt resistance forces. The U.S. says it has found mycotoxins of the trichothecene group, a deadly poison that can cause massive hemorrhaging and vomiting, in several samples from Laos and Cambodia. The mycotoxins can't be produced in Southeast Asia but can be manufactured in Soviet laboratories, the government says.

BUREAUCRATIC TIMIDITY

The report filed by the U.N. group late last year was "unable to reach a final conclusion as to whether or not chemical warfare agents had been used." The General Assembly in effect sent the group back to try again. If this year's report makes much progress, it will be by chance. To almost nobody's surprise, the international bureaucracy is proving too rigid, timid and toothless to come to grips with the matter.

Maj. Gen. Esmat A. Ezz, head of the scientific research branch of the Egyptian armed forces and chairman of the U.N. panel, is fond of saying, "I assure you the group has spared no effort" to fulfill its assignment. In its own way, that's probably true.

But consider the U.N.'s methods. Members interview only those who come to them. For instance, the interviewers arrive at a refu-

gee camp and rely on leaders to summon anyone who has something to say on the subject. Sometimes they ask to see alleged victims and witnesses who have been listed in other reports. Where these persons have been resettled abroad, or aren't in the camp at the time, no effort is made to locate them.

All the accused—the Soviet Union and its dependent states, Vietnam, Laos and Afghanistan—oppose the probe, and none will cooperate with it, and since Vietnamese troops occupy Cambodia, the experts are unable to visit any country where chemical and biological warfare atrocities are thought to be happening.

The possible exception is Cambodia, or at least those narrow strips of it along the Thai border controlled by the Khmer Rouge, who were driven out of the capital, Phnom Penh, by the Vietnamese almost four years ago. The U.N. still recognizes the administration of what is known as Democratic Kampuchea, which is the Khmer Rouge in coalition with two nationalist movements.

The Khmer Rouge claim that Vietnamese forces regularly use toxic chemicals against them in the border zones. U.S. investigators tend to support them; they've found mycotoxin tracts in the blood of Khmer Rouge victims and on leaves and twigs.

Last year, the U.N. specialists didn't have enough time to accept an invitation from Democratic Kampuchea to visit border sanctuaries. It was extended to them again this year, with the suggestion that they arrive in the dry season, starting in October.

"We accepted the invitation in principle," says the U.N.'s Gen. Ezz. "Actually, we scheduled our visit to Thailand during this season . . . to go to Democratic Kampuchea. As a matter of fact, since there are allegations of continuous use, we felt it would be fruitful if we were informed about such attacks as soon as possible so that we could go right away to the site and see for ourselves."

In the meantime, they asked the Khmer Rouge for assurances about security and logistists, among other things. The Khmer Rouge didn't reply. So when the team returned to Thailand late last month, it refused to cross the border.

Local Khmer Rouge officials at Nong Prue, south of the Thai district town of Aranyaprathet, said they knew nothing of the team's request for an itinerary, made through U.N. Secretary General Perez de Cuellar. They urged the U.N. members to cross the foot bridge that spans the stream serving as the boundary, anyway. But the visitors played by the rules and conducted their inquiries—most correctly, but no doubt less productively—on Thai soil.

Gen. Ezz says the group interviewed "dozens" of Hmong who claimed to be victims of chemical attack and "lots" of Cambodians as well as Thai villagers understood to have been exposed to an unidentified spray. Among the samples it collected are leaves thought to contain chemical material and powder said to come from Laos. Potentially most revealing is blood that team members drew from two Hmong alleged to have been attacked by chemicals in their homeland only two weeks earlier.

Some of the samples have been sent for analysis in what Gen. Ezz calls "a neutral country," which he defines as one that "isn't a member of any pact." Although he tries to sidestep the question, he implicitly confirms that only the blood samples can have any direct bearing on the investigation. "It is premature to pass judgment," he says of the others, "but actually we were handed them." That means, as last year's report put it, that "since the group cannot ascertain the actual source of these samples, it cannot base its final conclusions on the results of such analyses."

The group can be considered plain lucky to have encountered, during a mere 15 days in Thailand, Hmong hit so recently—assuming that the two are genuine victims. Investigations over the past couple of years have failed to obtain a single positive reading from the blood of Hmong, presumably because the tribesmen usually take many weeks, even months, to reach Thai sanctuary. [But Amos Townsend, an American doctor, has obtained positive blood samples from Khmer Rouge rebels in Cambodia.]

The U.N. couldn't collect anything in Thailand that might have been used to deliver biochemical agents. Part of the reason could be that government and Vietnamese forces in Laos seem to have stopped using rockets, mortars and artillery rounds for yellow rain raids since early last year. They now drop gas, powder and spray on Hmong opponents almost exclusively from aircraft in what some Western analysts believe could be a disdainful concession to the international community's efforts to expose them. Aircraft leave no trace of the delivery method, making detection difficult.

Contradicting this theory, however, Vietnamese troops in Cambodia continue to use a full array of delivery systems.

In Pakistan, the U.N. collected a gas mask, part of a parachute, a fuse from an alleged chemical bomb, and bullets and a flechette claimed to be toxic. That the group got to Pakistan at all this year and interviewed Afghan rebels and refugees is a step forward. Last year it didn't have time to go there.

Gen. Ezz says it is premature to talk about definitive results when all the material, including outstanding analyses, still has to be evaluated. The group, which left Thailand Nov. 10 to return to New York, again will be hard pressed to complete its inquiries on time. Its final report has to be finished this month and submitted to the General Assembly before the current session closes in December. However, it is clear at this stage that only the Hmong blood samples can possibly achieve a breakthrough.

FINDINGS IN PAKISTAN

The group hasn't said much publicly about its visit to Pakistan Feb. 8-22. But in an internal summary of its proceedings, a copy of which was obtained by The Asian Wall Street Journal, it indicates it uncovered nothing startling.

Regrettably, only two countries have joined the U.S. in making submissions to the U.N. panel. One is Canada, which this year added three reports to the one it filed last year. The other is Democratic Kampuchea (in Cambodia), whose credibility is zero after the atrocities committed by the Khmer Rouge when they were in office during 1975-79.

[From the Wall Street Journal, Nov. 22, 1982]

POISONED CONFIDENCE

In his televised arms control address tonight, President Reagan is expected to propose that the Russians agree to some new "confidence building measures," known around the State Department as "CBMs." We don't know how deeply the president plans to go into this issue but we hope it is far deeper than some of the things that have been suggested, like modernizing the White House-Kremlin "hot-line" and arranging prior notification of missile tests.

As we have said here before, the American experience with arms agreements has left a lot to be desired. The world might be a far safer place today had the United States simply pursued the best available policies for defense of the West and let the Soviets follow their own course as well, which probably wouldn't have been much different from the one followed within the "arms control" context. On the other hand, there are some CBMs that would stand on their own merits. The most important we can think of is for the Soviets to stop testing poison gas on the primitive peoples of Laos and Afghanistan. Aside from simple humanitarian considerations and aside from the fact that this is a gross violation of international treaties, it might ease our worries—at least slightly—that they're planning to try the stuff on us. On that score, we can use all the confidence building we can get.

The Soviets have not shown much interest in this form of confidence building. Not only have their denials been weak and vague but the attacks have continued, the most recent we know of having occurred in Cambodia near the Thai border just a few weeks ago. This was particularly brazen because a U.N. team investigating the attacks was in the area at the time, our sources say.

The U.N. team, which is under the supervision of a Russian member of the secretariat, has shown a distinct lack of enthusiasm for its work and even less enthusiasm for making its findings public (see Mr. Wain's article nearby). Its most substantive report, containing eyewitness testimony on attacks in Afghanistan using "yellow rain" and other deadly substances, was made public on this page last June, the result of a "leak." We now learn that the team has further evidence, also not yet made public, which substantiates such accounts. Some samples of suspected poisons collected in gas attack areas of Southeast Asia last year have tested positive, we understand.

The team has just recently returned from the Cambodian border area where several sources tell us it was in close proximity to a yellow rain attack conducted by Soviet surrogates, most probably Vietnamese. We understand the team brought back blood and urine samples from victims. The U.N. team is due to make an official report on its findings in both Southeast Asia and Afghanistan within the next few weeks. We will be awaiting it with great interest.

Fortunately, it isn't necessary to depend on the U.N. team. The State Department, we're told, has recently obtained a gas mask, Soviet make, that was smuggled out of Afghanistan, presumably by Afghan freedom fighters. It is said to be covered by a yellow substance that has been identified as the fungal poison trichothecene mycotoxin, known as yellow rain when it is dropped from aircraft or released from canisters on the ground. It is extremely unlikely that this material could be manufactured today by anyone other than the Soviet Union.

Moreover, we understand that the U.S. now has blood and urine samples from Afghan freedom fighters exposed to yellow rain which show the presence of toxins. Finally, some tests of human tissues have shown positive indications of trichothecene, although we are not aware of the source of those tissues.

In short, the evidence continues to build and it grows more and more impressive. The use of this weapon is a blatant and persist-

ent violation of two arms control accords, the Geneva Protocol of 1925 banning the use of poisonous gases and the Biological Weapons Convention of 1972. There is no other plausible explanation than that the Soviet military, which is itself well-equipped to withstand poison gas attacks, has insisted on testing poisons as a potential weapon in an East-West conflict. Indeed, the failure to pull back on the use of this weapon once the attacks had been discovered suggests something even more ominous, that the Kremlin doesn't really mind having its potential adversaries know that it is becoming proficient with a new horror weapon.

It should be clear from this that it will take a lot more than a few superficial CBMs to offer much assurance that arms control talks are anything other than a way to lull the West into a false sense of security. It would be nice to be able to come to some other conclusion, but we can't.

[From the Wall Street Journal Dec. 1, 1982]

TIPTOE THROUGH THE TOXINS

The State Department's Monday news conference to present further evidence of Soviet use of poison gas was a clear success. The material was convincing, the reporters were impressed, the story got heavy play in newspapers and on television. But the presentation also betrayed State's ambivalence about giving this issue the foreign policy priority it demands. There remains a struggle within State between those who want to face the implications for arms control of a gross Soviet abuse of solemn treaty and those who do not.

The most striking evidence presented Monday was a Soviet gas mask, obtained near Kabul in September 1981, which was contaminated by a yellowish powder. Testing of the substance, as we revealed last week, showed the presence of trichothecene mycotoxin—the same poison identified earlier in yellow rain samples from Southeast Asia. The toxin was also found in the hose connections of another Soviet gas mask removed from a dead Soviet soldier in December 1981. Trichothecenes were identified in a vegetation sample from a yellow rain attack in Afghanistan in February 1982. The test results of these samples are physical confirmation of eyewitness reports that yellow rain is being used by the Soviet Union in Afghanistan.

Other chemicals besides yellow rain are also being used in Afghanistan. The U.S. continues to get reports of chemical attacks that cause victims' skin to turn blue-black after death, with extremely rapid body decomposition. U.S. scientists still don't have a clue as to what chemical could cause such symptoms.

Evidence of the use of biochemical weapons in Southeast Asia also continues to build. For the first time, analysis of blood samples from Laotian victims has detected T-2 mycotoxin and its metabolite HT-2. Autopsy results of a chemical attack victim in Cambodia also showed traces of the toxins.

A report by a U.N. team that has investigated the attacks is due late this week. It will add further evidence but, if our guess is correct, skirt any conclusion that would demand U.N. action. Nonetheless, U.S. and Canadian diplomats have had some success at the U.N. The General Assembly voted last Friday to call an emergency meeting of the signatories to the 1972 Biological and Toxin Weapons Convention. Its aim is to "establish a flexible, objective and non-discriminating procedure" to ensure compliance with the treaty and to verify complaints of violations. Moreover, the U.N. voted Monday to require the secretary general to establish a permanent investigation procedure, including a list of experts and qualified laboratories, to handle any further complaints after the current ad hoc investigative team disbands later this month.

Secretary Shultz, in a preface to the report the State Department presented to the press Monday, said: "The world cannot be silent in the face of such human suffering and such cynical disregard for international law and agreements. The use of chemical and toxin weapons must be stopped. Respect for existing agreements must be restored and the agreements themselves strengthened."

On the other hand, the low-ranking officer who conducted the news conference refused to acknowledge that the Soviet violations held implications for future arms control agreements. He insisted that the U.S. cannot suspend such negotiations simply because the Soviets have been caught blatantly cheating on a past arms agreement. In the catechism of some at State, the next agreement we reach will have tighter provisions for verification than the ones the Soviets slipped through on poison gas. And presumably, if this undefined verification process caught the Soviets cheating again, State would really do something about it rather than waiting to be prodded into action by private citizens and the press, as has been the case with yellow rain.

We doubt it. State finally has made the case that the Soviet Union is using poison gas. Its interpretation of that evidence still refuses to recognize the obvious.●

CLINCH RIVER BREEDER REACTOR

(By request of Mr. ROBERT C. BYRD, the following statement was ordered printed in the RECORD.)

● Mr. HART. Mr. President, the Senate will likely vote on whether to terminate funding for the Clinch River breeder reactor (CRBR) in the lameduck session. It failed, by a single vote, to kill the project before the recent recess.

I cannot understand why the nuclear industry continues to fall on its sword in support of CRBR. The utilities that originally agreed to share with the Federal Government a portion of the costs are now reluctant to fulfill their $257 million commitment—because breeder reactors make no economic sense.

Moreover, breeder reactors, because they promote the use of plutonium as an alternative to uranium reactor fuel, could seriously harm another important segment of the nuclear industry—the uranium miners and millers. The uranium industry currently suffers from a severe depression. Over 11,000 uranium miners have been thrown out of work, many of them in my own State of Colorado. The price of uranium has plunged to $17 per pound. Yet, environmentally conscious uranium companies, such as Colorado's Rocky Mountain Energy Co., cannot sell uranium for less than $40 per pound if they hope to break even.

Why should the Federal Government subsidize breeder reactors while demand for uranium drops and uranium companies go bankrupt?

This administration has adopted an energy policy supposedly dedicated to free market principles. Nuclear power generally, and breeder reactors in particular, should also have to meet the test of the free market—without massive Federal subsidies. Consistency demands that this administration not support a $10 billion demonstration project for a technology that will not become economically viable until the middle of next century, if at all. If it really wanted to promote nuclear power, the administration would support efforts to improve the safety and uranium fuel efficiency of light-water reactors.

Mr. President, the Wall Street Journal Monday ran an editorial that persuasively argues against continued funding for CRBR. I ask that it be inserted in the RECORD.

The editorial follows:

[From the Wall Street Journal, Nov. 29, 1982]

THE COSTS OF CLINCH RIVER

Senate opponents of the Clinch River breeder reactor may get another chance to scuttle the $8 billion project this week. A vote is expected on whether to delete funds for the reactor from the energy and water development appropriations bill, which will probably come to the floor Thursday. On their last try in September, opponents of Clinch River failed by only one vote to eliminate funding for the project, being built near Oak Ridge, Tenn.

One of the most crucial aspects of the debate has been cost. Since the program was proposed 11 years ago, cost estimates for the reactor have been revised six times and the latest General Accounting Office study, published in September, puts the figure at $8 billion or more, twice the administration's current estimate. Some critics of the program say that the total could rise to more than $10 billion.

Proponents of the project, meanwhile, have been playing fast and loose with their own figures. Senate Majority Leader Howard Baker sent out a "Dear Colleague" letter which stated that "the completion costs . . . will be substantially recovered, even under the most conservative profit and loss assumptions, by the $8 billion revenues from the sale of electricity over the life of the project." The Department of Energy even suggests it might make money.

This is in sharp conflict with analyses by other agencies. In June, the Tennessee Valley Authority reported that even under advantageous conditions, the net value of electricity produced over the 30 years of the project will amount to only $542 million (in 1981 dollars). The Congressional Research Service estimates that net revenues from the project over 30 years will total between $380 million and $1.7 billion (in 1982 dollars). And the GAO figures that the net revenues will be nearer the $380 million total. None of these studies suggests that—after deducting operating costs—the project will ever come close to paying for the cost of its construction.

Industry realizes that breeder technology won't be economical before the year 2030 (or later) and doesn't want to waste its money. That's why the taxpayers are being asked to foot the bill.

Conventional nuclear power technology and the availability of inexpensive sources of uranium are more than enough to meet our energy needs for the foreseeable future (if new construction wasn't so bottlenecked by bureaucracy). Government generally has no business in the energy market. We see no reason to change that assessment in the case of Clinch River.●

50 YEARS OF SEED POTATOES

● Mr. COHEN. Mr. President, at a time when we seem to hear a lot of bad news about the agricultural industry, a story of success is sometimes hard to come by.

In Maine, where agriculture, and especially the growing of seed potatoes is a vital industry, many traditions which were begun long ago are still thriving. More than 50 years ago the first crop of seed potatoes was harvested under a contract program, and today descendants of those farmers are continuing to harvest seed potatoes under the same type of contract. The contract is with Agway, a major farmer cooperative in the United States, whose name is synonymous with the potato industry in Maine.

The following article, from the Agway Cooperator, speaks of this tradition involved in the harvesting of seed potatoes. I think that present generations have much to be gained from the knowledge and experience of our forefathers, and I am pleased to share this excellent example with my colleagues.

The article follows:

50 Years of Seed Potatoes

In September 1933, Eastern States Farmers Exchange issued its first price list for seed potatoes grown in the rolling fields of Aroostook County, Maine. This month, descendants of the handful of farmers who grew those first seed potatoes are harvesting the 50th crop under the same type of contract program, now operated by Agway.

Such names as Barnes, Beckwith, Findlen, Marshall, and Thibeau have been synonymous with the Agway seed potato program for most of those 50 years. Twelve commercial growers—eight of them Agway contract growers for more than 30 years—produce 2,000 acres of seed potatoes near Presque Isle.

The growers themselves have a big voice in how the program is run—although they leave most of the marketing details to Agway. New growers proposed for the group must be approved by the other farmers. "They're proud of their program and don't want it to go downhill," explains John Lagerstrom, seed potato department manager at the Agway operation in Presque Isle.

"You don't become a good seed grower overnight, you grow up in the business," says Gary Richards, seed potato sales manager, pointing out that many of the growers are second and third generation.

Joseph P. Findlen, whose father, George P., was one of the original contract growers for Eastern States, has always been in the seed potato business. Now two of his seven sons are potato growers, getting a start as equal partners in the family business. One of the sons, Joseph H., has gone on to his own acreage, while Michael remains in the family operation.

Findlen says he plans to stay in the business actively "a couple more years, but I don't intend to get too far away after that. I'll stay around to tell them how to raise seed potatoes," he chuckles.

Gerald Barnes also learned the basics of growing good seed potatoes from his father, W. Glen, one of the early Eastern States growers. He is helping his son get a start in the business on some acreage of his own this year.

ONLY COMMERCIAL CROP

Potatoes are the only commercial crop grown during the short growing season in Aroostook County, which is in the northeastern corner of Maine. Planting takes place in late May, the potato fields are in full bloom for the Annual Maine Potato Blossom Festival at Fort Fairfield in early July, and the first frost hits before the end of August in some years. The vines are killed about this time to hold the seed potatoes to the maximum 3¼-inch size.

Everyone works during potato harvest in September to get the potatoes out of the ground before a hard freeze. Schools close as hundreds of people head for the potato fields. Barnes, who has two fulltime helpers year-round, adds 24 to 29 workers to harvest his 200 acres.

Oats, used as a rotation crop, provide a small secondary grain crop. The straw and legume undercrop are plowed under to enrich the soil.

Some growers vary their rotation crops. Dana and Bruce Barnes, operators of Barnes Farmes since their father, Ronald, retired in 1981, grew millet this year.

Howard Giberson is looking for a crop that will give a better financial return than oats, and planted some trial acres of soybeans this year. He is another grower who learned the business from his father. His sons, Eric, 13, and Scott, 12, help in the family fields and may become the second generation of Giberson seed potato growers.

CLEAN AND DISINFECT

Growing disease-free seed potatoes is a highly specialized business that calls for the antiseptic precautions of a clinical laboratory.

Seed from the Porter Superfoundation Seed Farm in Masardis, operated by the Maine Seed Potato Board, is grown by foundation seed growers who must meet rigid requirements in regard to disease and quality control. Their harvests become Generation I Foundation seed that is propagated into Generation II Foundation seed, grown by Agway growers for sale to commercial growers of eating potatoes.

All along the way, there are constant checks and tests for disease. Rougeing or inspection crews screen the fields regularly, looking at each of the 25,000 plants in every acre for virus disease, which can be spotted only by the color and conformation of the plant. Detecting the diseased plants takes a trained eye, a knack taught to new personnel by veterans. Diseased plants and their tubers are removed from the field immediately.

Seed potatoes have no tolerance for insects, so workers check the fields throughout the summer for aphids and recommend spray programs. Fields are sprayed regularly every five to seven days for blight—or more often if necessary.

Evidence of ring rot in even one plant or tuber will disqualify all of the seed potatoes in that seed source for market, since there is zero tolerance for ring rot in Maine seed potatoes. Lagerstrom, who also is a seed potato grower, emphasized that a good farmer routinely takes the same precautions that he would if disease had been found—cleaning and disinfecting every piece of equipment.

"Taking precautions to prevent disease is second nature to seed potato growers," says Richards. "They do the cleaning job once and then a second time to be sure it's really clean."

Contract trucks hired by Agway to haul seed potatoes are thoroughly cleaned and disinfected and marked with a dated notice before loading.

Disease prevention measures apply not only to equipment, but to workers, who walk through a disinfectant solution before entering potato storage areas.

In the 10-week shipping period, from mid-February through May 1, up to 40 truckloads, carrying 50,000 pounds of seed potatoes each, leave Maine every day to deliver seed potatoes to Agway customers all over the eastern United States.

VARIETIES AND ACREAGE

Thirty-five varieties of certified seed potatoes were grown in Maine in 1981 and Agway growers are raising 18 of those this year. How do Agway growers decide what to grow?

People such as Lagerstrom and Richards keep close watch of the markets to see what varieties are in demand—and sometimes do a little crystal ball-gazing to guess what the market will be two and three years ahead. They set the acreage and varieties for the growers.

"I trust Agway to tell me what kind to grow—what kind they feel will be marketable," says Delbert Beckwith, who is growing seven different varieties this year. Beckwith, a second generation grower, started with his father, John, now retired, who is "still at work by 6 A.M. on our busy days, helping where he's needed," says his son. A third generation of Beckwiths is in the business too—Paul has his own acreage and "Chip" is in partnership with his father.

Good farming practices and family ties to growing seed potatoes are also found with the other Agway seed growers, John and Sidney Bradley, Beryl Kenney, A. W. Marshall and Son, and Wayne Thibeau and Sons.

The same attributes apply to Agway growers Marion Sewell and Son, Rodney Sleeper, and John York, who grow Generation I seed for distribution to Agway's commercial seed growers.

Monthly meetings for Agway growers keep them up to date on what's going on in the seed potato business and give them an important voice in a unique partnership that has endured for 50 years.●

OPPOSITION TO ELIMINATION OF TOURISM FUNDING

● Mr. PRESSLER. Mr. President, I have recently learned that OMB has proposed to discontinue funding the U.S. Travel and Tourism Administration for fiscal year 1984. This proposal is absolutely outrageous.

To discontinue funding for the USTTA would in fact increase, rather than reduce, our actual budget deficit.

The USTTA is currently funded at $7.6 million. This is our only Government expenditure in overseas promotion of tourism to the United States. That investment is returned many times over in the form of over $1 billion in tax revenues from foreign tourism trade. Over $12.2 billion was pumped into our economy by foreign tourism trade last year, and the tourism industry directly created over 289,000 jobs.

These figures could be boosted even further if the USTTA is allowed to adequately promote U.S. tourism in foreign countries. Canada spends almost 40 times more than the United States in promoting tourism abroad, on a per capita basis; and the tiny country of Malta spends over 224 times what the United States spends. On the average, the developed countries of the world spend 36 times the amount spent by the United States. Their increasing share of the world tourism market reflects those figures.

Since 1976, the U.S. share of the world tourism market has declined by 2 percent. This decline represents a loss of approximately $2 billion in tourism receipts, and a loss of about 57,000 jobs.

If we are going to regain and increase that market, we must follow the successful examples of other countries in promoting foreign tourism.

Mr. President, I have consistently opposed unnecessary Government spending. I know how harmful the huge deficits are to our economy. I know how devastating our high unemployment rates are. And I know how badly we need to reduce our trade deficit. It is for these very reasons that I strongly oppose this shortsighted proposal to eliminate USTTA funding in the fiscal year 1984 budget. The increase in foreign tourism business that results from USTTA promotions will help reduce our huge budget deficits, create many new jobs, and narrow our ever-widening trade deficit.

In these harsh economic times, we should be taking steps to increase promotion of the U.S. tourism industry rather than accepting the shortsighted proposal of the OMB. Toward this end, I have been working closely with the Travel and Tourism Governmental Affairs Policy Council which represents the unified industry voice on Government issues of common concern.

I urge my distinguished colleagues to join me in opposition to this outrageous proposal.

Tourism has been treated as a second-class industry for too long. It is about time we began to treat it with the kind of respect and support that is worthy of its major contribution to the U.S. economy.●

SOLZHENITSYN SPEAKS TO THE WEST

● Mr. MOYNIHAN. Mr. President, during the congressional recess just ended, while many of us were tending to cares close to home, that first citizen of the free world, Aleksandr Solzhenitsyn, traveled from his present home in Vermont half way around the world to China. There, on October 23, after a private week-long journey around the island of Taiwan, he delivered a major address to the people of the Republic of China. As his message was intended also to be heard by all the free people of the world, I would like to bring it to the attention of the Senate, and the many readers of the CONGRESSIONAL RECORD.

I will not presume to summarize the message of Aleksandr Solzhenitsyn, except to note that he reminds us in powerful and persuasive fashion that the gruesome stories of freedom lost in Poland, in Cambodia, in China, in Cuba, are all chapters of the same story. Standing in that small portion of China that has remained free while most of the Chinese nation has been conquered by the absolute tyranny of the Communist Party, Solzhenitsyn asserts that the fate of the 18 million people on Taiwan is not distinct from the fate of the West. We ought not ignore the warning of Aleksandr Solzhenitsyn. Awarded the Nobel Prize for Peace in 1970, expelled from his native Russia in 1974, Solzhenitsyn came to the United States for the first time in 1975.

I had the good fortune and great honor to be present at his first speech to an American audience, in Washington, D.C., on June 30, 1975. As well as Solzhenitsyn's own remarks, I recall the introduction of the speaker by the late George Meany, who said:

* * * today, in this grave hour in human history, when the forces arrayed against the free spirit of man are more powerful, more brutal and more lethal than ever before, the single figure who has raised highest the flame of liberty heads no state, commands no army, and leads no movement that our eyes can see.

But there is a movement—a hidden movement of human beings who have no offices and have no headquarters, who are not represented in the great halls where nations meet, who every day risk or suffer more for the right to speak, to think and to be themselves than any of us here are likely to risk in our entire lifetime * * *.

But if they remain invisible to us, we can hear them now, for there has come forth from under the rubble of oppression a voice that demands to be heard, a voice that will not be denied.

That voice, Mr. President, is that of Aleksandr Solzhenitsyn, and he has recently raised it again. We would do well to pay it heed.

I ask unanimous consent that the complete text of an address by Aleksandr Solzhenitsyn, as translated from the Russian for the Washington Times, be printed in full at this point in the RECORD.

The material follows:

[From the Washington Times, Oct. 25, 1982]

WEST'S 'FEAR' SEEN A THREAT TO TAIWAN

(Editor's note: Soviet dissident Alexander Solzhenitsyn in a weekend speech in Taipei warned Nationalist China not to rely on the United States for its future.

The Nobel prize winner said that Americans have "succumbed to the general world trend to leave the Republic of China to its perils, to abandon it to its fates."

Taiwan must rely on itself for survival, he said.

In a lecture that was frequently interrupted by applause by an audience made up of mostly academics and students, the 65-year-old author also attacked the United Nations for ousting the Nationalist Chinese government from the world agency.

Solzhenitsyn first challenged the conscience of Americans in a controversial speech at Harvard in 1978, and in his Taipei speech on Saturday he now challenges the conscience of the world to face up to the evils of the communist world.

This is the full text of the lecture, translated from the Russian with the approval of Solzhenitsyn.)

For 33 years, Taiwan, I believe, has attracted, by its specific fate, the attention of many people throughout the world. I myself felt that way long ago. Three score countries have already fallen under the yoke of communism. Scarcely one of them has been fortunate enough to retain even a tiny patch of its independent national territory, where its state authority could continue to develop despite the disruption, and through comparison show the world the difference between itself and communist disorganization. In Russia, such a patch of land could have been Wrangel's Crimea. But lacking any external support and abandoned by its unfaithful former allies, it was soon crushed by the communists. But in China, thanks to a wide strait, a fragment of the former state became the Republic of China on Taiwan, which, for a third of a century, has proved to the world what heights of development could have been reached if the whole of China had not fallen under the yoke of communism. Today, the Republic of China on Taiwan differs from others in its development, its industrial achievements and the well-being of its population, thereby proving how logically the forces of a nation can be guided, if they are not in inimical hands.

It would seem that the population of our planet should clearly perceive such an instructive comparison and should have its eyes opened to see how peoples who escape communism flourish and how those who fall victim to communist tenets perish by the millions. The history of communist destructions in the Soviet Union, Poland and Cambodia are now known to all. The history of the millions destroyed in China, Vietnam or North Korea is yet to be revealed in detail, but many signs allow us to judge this history even now.

But no. It is free China which has had to endure and suffer from the greatest injustices and ignoble attitudes of other countries. The United Nations, long degraded to an irresponsible side show, disgraced itself by expelling from membership the 17 millions of Free China. The majority of countries on our planet treacherously expelled your country from the U.N., whose dele-

gates, adding insult to injury, whistled, jeered and shouted. The majority of Third World countries behaved like madmen who don't know the price of freedom but are themselves waiting for the kick of the boot.

For centuries the Western world has known very well the price of freedom. But with years passing and well-being achieved, it is less and less prepared to pay for it. The western people value their state systems but are less and less inclined to defend them with their own bodies. From decade to decade, the West has become increasingly senile and unable to defend itself. The betrayal of one country after another had already begun before the second world war. Afterward, no scruples were felt in abrogating the whole of Eastern Europe just for the sake of the West's own well-being. How easy it was to betray the government of Mikolaychik, how easy it was to withdraw support from one's ally Chiang Kai-shek. And soon we shall witness how one country will betray another for the price of surviving just a little longer. Should it be surprising that the majority of the frightened western countries are even afraid to sell you weapons for fear of angering Peking. That's how much their drive and concern for freedom is worth. Meanwhile, threatened Europe should understand your position better but is so cowardly that it fails to recognize that the Republic of China and other countries of Asia are themselves endangered. Just recently, the former premier of Japan declared that the arming of Free China would destablize the Far East. What more can be said?

They are all obsessed with the search for self-protection and the quest for a stand-in. So there emerged an attractive myth—that there are "bad" and "good" communisms. And out of such a myth grew the image of Communist China as a good-natured peacemaker. But should that be surprising—when in South Korea, which herself survived a Communist assault, there exists a myth that actually the Soviet Union is not directly hostile to them, not so much an enemy, not like North Korea. The South Koreans have also been doing their utmost to curry favor with Peking. Now they are hesitating about whether to give a defecting Red Chinese aircraft to Free China.

No, it is not out of short sightedness, not out of stupidity, that such myths are believed, but out of despair, out of the loss of spirit.

In a particular relationship to you is the United States of America. Up to this day, the United States provides the only outside guaranty restraining the Communists from attacking your island. But how difficult it becomes for the United States to remain faithful to Taiwan, how much has already been lost on the way. The Americans have also succumbed to the general world trend to leave the Republic of China to its perils, to abandon it to its fate. America moved to abrogate its diplomatic relations with the R.O.C. for what? For what fault of hers? Only to follow the futile western dream of gaining an ally in Communist China. America has restricted its connections with you, curtailed its military support and is denying you much of what you need.

What pressures have been exerted upon American presidents, urging surrender of Taiwan. Not all of them could bear the strain. Here we have a former president, just back from a visit to China, where he flattered his hosts by saying that "A strong Communist China is a guarantee for peace" and that America seems to be interested in a strong Red China. Such people in former years have governed the United States and there is no guarantee that another such person might not succeed President Reagan.

The United States is highly heterogeneous. There are many currents, of which the capitulatory tides are quite powerful. Extremely powerful circles are leaning toward betrayal of a free country in favor of a friendship with a totalitarian one. They gladly picked up the hypocritical offer from Communist China on "peaceful unification." Many American journalists cry from the housetops that Peking is now "bound by promises" to effect unification peacefully. They wanted to forget, and therefore successfully forgot, how many times the communists have already cheated. The experience of "governments in concert with communists" in postwar Eastern Europe has taught no lesson. This helpless experiment now is being conducted in Cambodia. Similarly, according to Kissinger's agreement, North Vietnam was "bound by a ceasefire"—until it set the day for the seizure of South Vietnam. And leading American newsmen reached such heights of stupidity as to write that the United States doesn't make mistakes. If Red China "breaks its promise" and seizes Taiwan by force—then—only then—America would be freed from obligations and could again start to deliver arms . . . to whom, then? . . . Yes, such delirium appears on the pages of leading American newspapers, and they don't realize what they are doing.

And thus the influential circles in the United States want to force Taiwan to accept capitulatory negotiations, to relinquish voluntarily its freedom and power.

What, then, does Communist China want from you? Certainly, it is eager to grab your blossoming economy, to plunder and devour it. After all that has happened in the 20th century, only shortsighted simpletons can trust Peking's promises that it will totally preserve your economic and social system, and even your armed forces along with some elements of freedom. But the main issue is not to take away from wealth, to steal the fruits of your hard work. The main thing is that the communist system does not tolerate any deviation in anything or anywhere. Not even the wealth of your island is important, what matters is the deviation from their system. Communist China hates you for your economic and social superiority. For them it is not permissible that other Chinese should know that there can be a better life without communism. The communist ideology does not tolerate any islets of freedom. And so, with all their might, the communists want to cut off the sale to you even of defensive arms, to try to weaken your defense capability, to disturb your balance of power in the strait—and thus to bring closer the day of intrusion into your island.

In order to nurture the apathy of the United States, Red China plays speculatively on the negotiations between Peking and Moscow on matters of China-Soviet rapprochement. Such rapprochement is not make-believe. It is a very realistic perspective. Both governments have long had common roots, a fact which everybody seems to forget. As far back as 1923, a Soviet agent Grusemberg, alias "Borodin," prepared a communist coup, and it was he who promoted Mao Tse-Tung and Chou En-Lai to the highest positions in the party.

All that I am telling you—because of the deadly danger in which you find yourself—is understood well by many, if not yet by all. The threat is understood better here than in South Korea, where the young generation, the students, have quite forgotten the brief horrors of communist intrusion, so that the present freedom seems to them the present freedom seems to them not enough. But they will remember and revalue their present "nofreedom" when, after a command "hands back," they are driven under armed guards into concentration camps.

It seems to be fashionable in the West: to demand from all who stand in the forefront of defense, under machine-gun fire, to demand the widest democracy, and not just simple but absolute democracy, bordering on total dissoluteness, on state treason, on the right to destroy their own state and country—such freedom as western countries tolerate. Such is the price the West demands from each menaced country, including yours. But it seems that on your island the logical limits are known and will sustain your struggle.

There is another danger stalking you. Your economic successes, your living standards and well-being are of a two fold nature. These are the bright hope of all the Chinese people. But they also can become your weakness. All prosperous people tend to lose the awareness of danger, an addiction of the good living conditions of today, and consequently lose their will for resistance. I hope and I urge you to avoid such a weakening. Don't permit the youth of your country to become soft and placid, to become slaves to material goods, until finally they will prefer captivity and slavery to the struggle for freedom. That for 33 years you lived peacefully does not mean that you might not be attacked in the following three years. You are not a serene, care-free island, you are an army, constantly under the menace of war.

You are 18 millions, about as many as there are Jews in the world and your problem is of the same diminsions. But the Jewish problem attracts the attention of all states and has become one of the central problems of contemporary times. Comparing this with the uniqueness of your position, I don't perceive why the fate of Taiwan should not command the equal attention of the world.

But in today's world betrayal from weakness reigns supreme, and it is only your own strength upon which you can really rely. But there is also one more big and bigger hope: the peoples of the enslaved nations, who will not endure indefinitely but who will rise in one menacing hour—menacing to their communist rulers.

In your books you write that your island is "a bastion of national recovery." So be it. Not only defense, not only self-preservation should be your goal—but help, but the liberation of your compatriots suffering on the mainland, and first of all, free and courageous radio broadcasts.

It may seem, since no one comes to mind, that you have no firm, reliable allies, although they might appear in the hour of destruction. But you have the most formidable ally in the world: One billion Chinese people. Their sympathy is your moral and spiritual support. Just a few days ago, you had an encouraging signal from your compatriots through the act of defection of a Red Chinese air force pilot. Often I think of still anonymous prisoners of the Chinese gulags whose true story might not be told until the 21st century.

All the oppressed people, including the peoples of the Soviet Union, cannot rely on outside help, only on their own strength. At the best, the whole world would watch indif-

ferently, but possibly with a great deal of relief, if the mad rulers of China and the USSR should unleash war among them. I hope that won't happen. But in any case, let us testify here and now to the mutual amicability and trust between the Chinese and Russian peoples, to the absence of contraditions amongst them, even more, let us hope for a union of our long suffering compatriots against both communist governments. Whatever might happen between these two self-interested, anti-national governments, let us preserve mutual understanding, mutual compassion and friendship. Let's not allow them to blind our eyes and deaden our ears through fruitless national hatred.

We don't know how long the plague of communism will affect our world. One hundred and thirty-five years ago, who would have told the leaders of the then great empires that the tiny group of utopists—communists who organized themselves in Europe—would conquer them all with iron and blood and force to their knees their might and pride? They would not even have smiled at such a prophecy. Such forces could not then be seen anywhere. The strength of the communists was based on their drive and their cruelty, the weakness of the West was rooted in the absence of the will to fight.

We don't know what whimsical zigzags human history will follow. I have already expressed a supposition that would communism will outlive both Soviet and Chinese communist regimes and spread over other countries, many of which are still eager to experience communism. But in our two countries national common sense shall finally prevail.

Anyway, both our peoples have suffered too much, lost too much. They are already moving along the way of liberation and recovery.

RECORD OPEN UNTIL 5 P.M.

Mr. BAKER. Mr. President, I know of no other business to be transacted before the Senate. It is now a few minutes before 3 p.m. I believe it might be wise to keep the record open this afternoon for a little while. Therefore, I ask unanimous consent that Senators have until 5 p.m. today in which to introduce bills and resolutions, for the Senate to receive petitions and memorials, or for Senators to be authorized to enter statements in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL MONDAY, DECEMBER 6, 1982, AT 11 A.M.

Mr. BAKER. Mr. President, if no other Senator seeks recognition, and I see none, I move, in accordance with the order previously entered, that the Senate stand in recess until the hour of 11 a.m., on Monday next.

The motion was agreed to and, at 2:59 p.m., the Senate recessed until Monday, December 6, 1982, at 11 a.m.

EXTENSIONS OF REMARKS

THE POSSIBLE DREAM OF TAIWAN

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. McDONALD. Mr. Speaker, the former Governor of New Hampshire, Meldrim Thomson, Jr., addressed the council of the John Birch Society in San Francisco on Saturday, November 13, 1982. He addressed the council on the subject of Taiwan, a country he has visited on numerous occasions, and gave a very stimulating speech. In this speech, the traces the major accomplishments of the Republic of China and the history of the errors of U.S. policy in dealing with her. Governor Thomson's speech clarifies the muddy waters that typify our policy toward Taiwan, and is well worth the time it takes to read it. I commend it to the attention of my colleagues.

THE POSSIBLE DREAM OF TAIWAN

(By Meldrim Thomson, Jr.)

Today's leaders of the Republic of China in Taiwan are a hearty breed of freedom fighters, implacable in their distrust of communism, endowed with the wisdom born of bitter experience, and long-suffering in patience.

Seldom in the history of the world have free people worked with such foresight and industry. Certainly no others have wrought greater material miracles than the people of the Republic of China.

They fashioned impossible dreams for themselves in the late 60's and early 70's. These were called the Ten Major Construction Projects. To the astonishment of the world, they made these dreams come true.

Yet in the November 1st International Issue of Newsweek, the editors did an inaccurate feature derisively referring to the Republic of China as "Troubled Taiwan".

The editors also wrote sarcastically of "the impossible dream of the Republic of China's 'glorious return to the Mainland' ".

A vast majority of the nations of the world would love to have the economic troubles of Taiwan today.

While under the pressure of the worldwide recession, Taiwan's annual increase of 9.4 in its GNP during the past decade has been cut in half, still its economy is growing at almost four times that of the United States.

Unemployment on Taiwan is less than 2 percent compared to our record breaking unemployment of 10.4 percent.

Everywhere around the island, where 18 million people live in an area slightly larger than our state of Maryland, construction is booming. Roads, harbors and nuclear plants are being built and homes, factories, and hotels are springing up like the mushrooms cultivated in vast quantities on Taiwan.

The Republic of China has had a breathtaking vision, purpose and record of achievement during the past three decades.

In the 50's and early 60's this small Republic accomplished the greatest land reform in modern times to the benefit of all of the people.

In the years since then the nation has reduced the disparity in wealth from a ratio of 19 to 1 to 4 to 1, thus bringing the dream of self-sufficiency and personal well-being within the grasp of all of its people.

Many developing nations have had their three, five and ten year economic projects, but not one can point to the results achieved by the Republic of China in fulfilling during the decade of the 70's almost all of the Ten Major Construction Projects at a cost of $7 billion.

To emphasize the enormity of Taiwan's material successes, I would point out that in my state of New Hampshire we began the construction of a two unit nuclear plant of 2,200 megawatts in 1972. We will be lucky if the first unit is finished in 1984 and the second one by 1986.

One of Taiwan's Ten Major Construction Projects for the 70's was to build six nuclear plants. This was changed to four plants with the last two having two units each. Work on the first plant of 600 megawatts began in 1973. The plant was completed in 1976. Four units are now on line and producing 30 percent of the electricity used on Taiwan today. The remaining two are scheduled for completion by 1985.

Thus, the Republic of China will have built six nuclear units with a total capacity of over 5,000 megawatts in two years less time than it will take us in New Hampshire to build one unit of 2,200 megawatts.

In 1974 I visited Kaohsung, Taiwan's second largest city. There the government had just begun building a way for major ship construction and was clearing an adjacent swamp area for a steel mill.

Recently I visited the same site and saw a modern shipyard with 7,000 employees. In 1977 and 78 it delivered the third and fourth largest tankers in the world, each of 445,000 DWT's. In addition, the yard has turned out a number of bulk carriers and cargo vessels of all types. It is said that a number of frigates and other vessels are being produced there for the ROC navy.

The first blast furnace was operational in the nearby steel mill in 1976. Just February of this year a second blast furnace began spewing out molten iron. In the first ten months of 1982, more than a million tons of iron had been produced by this second blast furnace.

Compared to most nations, Taiwan's economy is on a dead run toward the twin goals of maximum productivity and profitability.

Yet none of these giant industrial strides takes into account a brand new program launched for the 80's of twelve new projects which it is estimated will cost when complete $10 billion.

Some scoffers say that the people of the Republic of China find themselves in a time of trouble. The marvel is that this government that dares to dream of a greater future for her people still finds the time to execute its dreams with such efficiency and dispatch.

Some critics suggest that despite her material achievements the Republic of China still feels very much alone—and very vulnerable. Here again, these malfactors of misfortune are wrong.

It is not so much vulnerability that the ROC feels as it is uncertainty about the future actions of those who claim to be her friends and allies.

It is known that the Republic of China now produces large quantities of small but highly efficient weapons. She has produced an excellent cannon capable of firing more than 30 miles, is building small naval vessels and has the capability of producing nuclear weapons.

What ever vulnerability the ROC suffers now is due entirely to the hesitancy of the reagan administration to authorize the coproduction by the ROC government and the Northrop Corporation of F-5G fighter planes recommended more than three years ago by our departments of defense and State to insure the ROC's air superiority over the Taiwan straits.

For four decades the Republic of China has had every right to be disappointed and even shocked over the official conduct of the United States toward her.

Considering the long list of defaults, derilictions and defections by the United States since the Cairo declaration in 1943, it would indeed be strange if today's leaders of the ROC were not deeply concerned as to what interpretation the United States will ultimately apply to the Taiwan relations Act which Congress passed on January 1, 1979.

At Cairo Roosevelt and Churchill pledged to support the return of Manchuria, Taiwan and Pescadores to China, then controlled by the Republic of China.

Roosevelt at that Conference said, "We and the Republic of China are closer than ever before, in deep friendship and unity of purpose". Time and events were to prove how inimical to the well-being of the Republic of China that friendship was.

By 1945, at Yalta, Roosevelt and Churchill offered to let Stalin take vast territorial and property interests in Manchuria in exchange for entering the war against Japan, thus pulling the rug from under the Republic of China.

This set the stage for Stalin's arming of the Chinese Communists with the weapons of war surrendered by an invasion force of more than two million Japanese.

There quickly followed the Hurley and Marshall fiascos in which both tried to force communists co-existence on Generalissimo Chiang. George C. Marshall with Truman's backing brought an effective end of U.S. aid to the Republic of China.

General George C. Marshall once referred to by Senator William Jenner as a man whose entire life had been a living lie, was the primary architect of the defeat of the forces of the Republic of China.

Later, the Republic of China which had been a founding sponsor of the United Nations, was driven from the world organization when America failed to take the same strong stand against ejection of the Republic of China that it did when Israel was similarly and more recently threatened.

The list of perfidies by the United States against the Republic of China is long. The ROC in response to our conduct through the years has been patient and forgiving.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

She deserved far better treatment from our government.

More humiliations and greater disloyalties at the hands of American pro-communist leaders were to beset the Republic of China.

In the midnight hour of history Jimmy Carter unilaterally abrogated our long-standing Mutual Defense Treaty with the Republic of China—an action which millions of Americans still believe was morally and legally wrong.

In its stead the congress quickly passed the Taiwan Relations Act which, among other things, guarantees to provide Taiwan with arms of a defensive character, meaning such defense articles and services as might be necessary for Taiwan to maintain a sufficient defense capability.

The big question now in the long-suffering experience of Taiwan in our mutual relationship is will President Reagan, despite the threats and harassments of Red China, act promptly and generously in fulfillment of the Taiwan Relations Act, the latest American commitment to the Republic of China!

We Americans should remember that if we pursue a course destructive to our allies we will eventually destroy ourselves.

Flimsy though the excuse may be, perhaps a naive America deserves some consideration for its failure to grasp the blunt fact of international life that communism in any form and wherever it exists is poison for the human race.

Long ago and after many patient efforts at co-existence with the Chinese Communists, Chiang Kai-shek learned that co-existence, negotiations and peaceful interludes with communists are the tools the communists cynically use to defeat their adversaries.

This prompted the Generalissimo to write in his book "Soviet Russia in China":

"If I could in any way enhance the vigilance and determination of those who are defending the cause of freedom and democracy, and bring home to them the single message that the 'peaceful co-existence' which the Russian and the Chinese Communists ask of any free nation or people is merely a one-sided proposition.

"They want you to accept their 'peace' that they alone can 'exist'."

In his great address before Congress after Truman had dismissed General Douglas MacArthur for his opposition to fighting a no-win war in Korea, MacArthur warned his fellow Americans—

"The Communist thrust is a global one. You cannot appease or otherwise surrender to communism in Asia without simultaneously undermining our efforts to halt its advance in Europe."

For too long our relations with the freedom loving people of the world have been blackened by the false prophesies of leaders like Nixon and their sycophanting lackies such as Kissinger.

We should never have followed their leadership into a treaty with Red China for the benefit of profit-hungry American businessmen.

How can we ever hope to find honesty and decency amongst the leaders of Red China who in the last generation clawed their way to power over the dead bodies of 70 million of their countrymen?

How can we so hypocritically recognize Red China which according to testimony before the Senate Foreign Relations Committee has today some 7 million souls in its gulags and at the same time sanctimoniously call on other nations to practice human rights?

Any patriotic American must wonder in horror at the truly treasonous acts of Nixon and Kissinger in promoting our recognition of Red China in view of the loss of American lives at the hands of Chinese Communist soldiers in both Korea and Vietnam.

It must be remembered that we are still technically at war with North Korea and presumably her allies in Red China. And Mainland China is reported to have spent $20 billion in support of our enemy, the North Vietnamese.

Again, a true patriot must ask why are we busy building up a communist nation like Red China while giving the back of the hand to our genuine friend and ally, the Republic of China.

For example, the Republic of China has built its tremendous new steel mill in Kaohsung without a cent from U.S. taxpayers, but for Red China, President Reagan found several months ago that it was to our national interest to loan $68 million to Red China for a new steel mill, with interest at below prime rate. Why?

I suggest that in the best interest of America, we—

1. Terminate our relations with Red China at once.

2. Call upon President Reagan to upgrade immediately our relations with the Republic of China as he promised to do in his 1980 campaign.

3. Encourage the establishment of Chinese American Birch Chapters here in the United States in the hope that through education we might encourage Chinese-American citizens to take a more active role in politics that support the Republic of China.

4. Step up our education of the American people to the evils of communism; and

5. Distribute bumper stickers calling on President Reagan to keep his Taiwan promises.

Let us remember that what a nation can dream, a nation can do.

The Republic of China has its great and possible dream of returning freedom to Mainland China. We Americans should enthusiastically help the ROC realize that inspiring dream. After all they have been one of our oldest and most faithful allies.●

CHILD NUTRITION

HON. ANTHONY TOBY MOFFETT

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. MOFFETT. Mr. Speaker, I am pleased to present to my colleagues here today the views of two concerned constituents on child nutrition. The first statement, submitted by the Connecticut School Food Service Association, is a thoughtful argument in support of maintaining the Federal leadership role in child nutrition initiatives. The second piece on the child care food program, though brief, is a concise view from a service provider on the importance of the program. I commend to the House of Representatives these insightful comments on child nutrition in my home State of Connecticut:

CONNECTICUT SCHOOL FOOD SERVICE ASSSOCIATION,

September 8, 1982.

I am Marge McMahon, Legislative Chairman for the Connecticut School Food Service Association, which represents 1100 schools responsible for feeding 265,000 students daily.

You are aware that President Reagan proposes, as part of his "New Federalism" to repeal all the federal child nutrition programs (except W.I.C.) as of fiscal year 1988, along with a phase out of the Federalism Trust Fund. States may elect to assume the responsibility for child nutrition as early as FY 1985.

My organization opposes the turnback of these programs for many reasons best expressed in the House Concurrent Resolution 384, expressing the sense of the Congress that the United States should maintain Federal involvement in and support for the Child Nutrition Programs. This resolution is a bi-partisan effort submitted by Rep. Perkins and Rep. Goodling. We urge you, Congressman Moffett and Congressman Miller to add your names to this resolution and to vote for it when it reaches the floor of the House.

The major arguments for keeping child nutrition at the federal level include:

1. The nutritional requirements of our children are uniform. They do not vary from state to state.

2. Over 80% of the federal funds spent on child nutrition go to support free and reduced priced meals to poor children.

3. Like food stamps, the cost of the program is tied to the cost of food.

4. Medical experts agree, the federal programs have worked well, substantially reducing malnutrition.

5. The USDA Commodity program is an important part of the child nutrition program.

6. Considering the cutbacks in Federal funds for various educational programs many states will be hard pressed and, we fear, unwilling to fund child nutrition programs.

At the point in time when Nutrition Education and Training Programs, a relatively recent federal program, were beginning to see results as part of the total educational endeavor, funding has been eliminated.

Last year, due to the Reconciliation Act of 1982, Connecticut saw participation in all three catagories, free, reduced and paid meals, decline by 16% to 18% and some schools dropped out of the program entirely.

Finally, Governor O'Neill has responded to the National Governors Association, his opposition to the turnback of child nutrition programs to the state. His remarks, as well as those of the governors of North Carolina and Colorado are attached.

I thank you for this opportunity to communicate our concerns. Our children are our future.

STATE OF CONNECTICUT

Hartford, Conn., May 26, 1982.

Hon. RICHARD SNELLING,

Chairman, National Governors' Association, State Capitol, Montpelier, Vt.

DEAR GOVERNOR SNELLING: As you know, for the past two years I have been opposed to block grants primarily due to the fact that the funding level is not adequate to carry on the services presently offered to the citizens of this state.

Recently, I have received several letters from individual citizens and organizations

expressing their concern. Please find attached examples of their concern, i.e. a request from the officers of the Connecticut School Food Service Association and a letter from a Connecticut citizen. Their concern is that President Reagan plans to block grant the School Breakfast Program and Child Care Food Program this year and National School Lunch Program next year.

You certainly are aware of the nutritional benefits that the Child Nutrition Programs have offered our children since 1946. The continuation of these programs also has had a tremendous effect on the agricultural consumption within the United States. The plan to drop the Special Milk Program altogether certainly will further reduce the consumption of fresh milk and add to the storage burden of dairy products, such as nonfat dry milk, cheese and butter, placed on the federal government and the individual taxpayer. These products are available and provide good nutrition for the youth of this nation.

I would greatly appreciate your incorporating these suggestions and concerns in your planning with the federal government. If I can be of any assistance to you on this subject, please feel free to contact me immediately.

Sincerely,

WILLIAM A. O'NEILL,
Governor.

STATEMENT OF CARLEEN ZEMBKO, COORDINATOR, NANCY BAXER CHAPTER, CONNECTICUT FAMILY DAY CARE ASSOCIATION

The quality child care food program, in conjunction with the USDA, pre-school nutritious food for children, is being realized here among area day care homes. Providers are attending "workshops" on nutrition, and enjoy the publications provided by quality child care. I feel this program is necessary for our youngsters. When the program first started, it was without limitations. Now, with austerity, it is being trimmed. I pray the program will continue.●

HON. JACK BRINKLEY

HON. DAN MICA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. MICA. Mr. Speaker, I want to join my colleagues in a tribute to the service in the House of Representatives of Congressman JACK BRINKLEY of Georgia. The senior representative in the Georgia delegation, JACK BRINKLEY will be leaving the Congress this year.

I have come to know JACK BRINKLEY in our capacities as members of the House Committee on Veterans' Affairs. As a member of that committee, he has distinguished himself as an untiring advocate of those who have served in our Nation's military and who have fought our Nation's wars.

JACK BRINKLEY is a senior Member of Congress of stature and accomplishment. I will certainly miss his presence in the House of Representatives in the coming years, and wish him the very best in all of his endeavors.●

SUPERFUND INACTION

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. FLORIO. Mr. Speaker, 2 years ago this month the $1.6 billion Superfund legislation, designed to begin immediate cleanup actions at the Nation's most dangerous hazardous waste sites, was signed into law.

At that time expectations ran high in the Congress, among environmental groups, and the general public that a serious and thoughtful solution had been advanced to come to grips with this significant public health and environmental problem.

However, rather than taking the action mandated by the Superfund law, the Reagan administration has taken a course characterized by inaction. The result is that our hazardous waste problems have been compounded instead of having been reduced.

The Philadelphia Inquirer published a thoughtful and forceful editorial this week summarizing the administration's failure to implement the Superfund law which I would like to recommend to the attention of my colleagues.

The editorial follows:

[From the Philadelphia Inquirer, Nov. 29, 1982]

EPA PLAYS A CRUEL GAME WITH SUPERFUND DOLLARS

There is $223 million in unobligated money currently sitting in the Superfund, the special account created by Congress to pay for cleaning up the worst hazardous-waste sites around the nation. By next year that amount is expected to grow to $400 million, according to an official of the Environmental Protection Agency, charged with administering the Superfund.

Until a flurry of activity just days before the fiscal year ended Sept. 30, the EPA had spent only $74 million of Superfund dollars for cleanup. Contracts amounting to an additional $51 million were signed as the fiscal year came to a close, but that work will not begin for some time.

Critics charge that the current administration at the EPA has not assigned hazardous-waste cleanup a high priority. Prompt, aggressive activity is vital.

No place is that surrender of public duty more apparent than in Missouri where as many as 25 sites have been heavily contaminated with dioxin—considered the deadliest chemical known to man. There is no "safe" level of dioxin. As little as one part per trillion is toxic, according to experts. Levels of dioxin in the Missouri soil have been measured as high as 0.9 parts per million.

The EPA's own studies show that adults exposed to levels far below those measured in Missouri face sharply increased risks of contracting cancer, as do children who ingest contaminated soil. If diluted in drinking water, for example, one ounce of dioxin could kill a million people, experts contend.

The dioxin was produced by two companies that went out of business in 1972. About 40 pounds have not been accounted for. Some of its was sprayed by a waste-disposal company on horse arenas and roads for dust control. It also was used for fill, in gardens and for road construction.

Federal and state officials have known about the presence of dioxin since 1974, but took no action until October 1979, when they re-examined the earlier data. EPA officials did not notify residents of the high dioxin levels until last month because, they said, they were unaware of the extent of the contamination.

That delay in acting prompted sharp criticism of the EPA by witnesses appearing before a House subcommittee examining the operation of Superfund. That criticism was directed at Rita Lavelle, assistant EPA administrator in charge of the Superfund.

Miss Lavelle thus far has declined to make any Superfund money available to help with the Missouri cleanup, which is estimated to cost $30 million. She has said that not enough information has been gathered to establish that dioxin levels pose a health threat to residents. More studies are needed, she said. Those studies will be completed in January, after which time she will decide whether to spend Superfund dollars on the cleanup.

Citing the EPA's own figures on the increased cancer rates to residents exposed to the dioxin, a toxicologist for the Environmental Defense Fund labeled the EPA's failure to act as "ignorance of almost unbelievable profundity. The question must arise: What does it require to convince this EPA that human health is in immediate danger?" asked Ellen K. Silbergeld of the fund.

In an interview last month, Miss Lavelle told Inquirer reporter Bob Drogin that "the name of the game is to get sites cleaned up." And in that regard, she boasted, "we've got a heck of a track record."

The facts do not bear out Miss Lavelle's assertion that the Superfund work is proceeding on schedule. Mr. Drogin, who carefully examined the EPA's own statistics, found that only four hazardous waste sites out of 400 had been cleaned up with Superfund money. Millions of unallocated Superfund dollars have been used temporarily to reduce the Federal deficit, giving the Federal Government little incentive to spend the money as it was designated.

In this year's budget, Congress cut the Superfund appropriation from $230 million to $210 million because of the huge surplus in the fund. (Most of the Superfund money comes from a surcharge on chemical manufacturers. The Federal Governemnt makes up about 12 percent of the total.)

In one regard, Miss Lavelle is correct. Her agency has compiled "a heck of a track record" on Superfund. That record, however, is so dismal it cannot go unchallenged. As written, the Superfund legislatin provides very little oversight by Congress. Critics of the program have called for a regular reporting requirement so that the EPA can be held accountable by Congress, and the public, for failing to live up to the intent of the law.

That would be a start. But, as Miss Lavelle noted, "the name of the game is to get sites cleaned up." Until that begins in earnest, the Reagan administration is playing a cruel game with the health and well-being of Americans unfortunate enough to be exposed to the deadly chemical wastes.●

SOCIAL RESPONSIBILITY OF DAYTON HUDSON CORPORATION

HON. MARTIN OLAV SABO
OF MINNESOTA
IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. SABO. Mr. Speaker, the American business community has a clear responsibility to contribute to the public good, not only through direct philanthropy, but also through good business practices. Private initiatives that benefit public needs also make good business sense.

The Dayton Hudson Corp., one of the largest and most successful retailing businesses in the country, has long been a leader in the area of corporate social responsibility. For 65 years Dayton Hudson has voluntarily contributed financially to the communities in which it is involved. I can assure you that the Twin Cities, the State of Minnesota, and, in recent years, communities throughout the Nation have benefited from Dayton Hudson's programs.

Dayton Hudson was recently honored as the first recipient of the Lawrence A. Wien Prize in Corporate Responsibility from Columbia University. The distinguished panel who selected Dayton Hudson from a host of candidates noted its strong tradition of 5 percent giving, innovative programs, and the quality of its efforts.

I am proud that Dayton Hudson is based in my district, in Minneapolis. I would like to share with my colleagues in the House the address made by William A. Andres, the chairman and chief executive officer of Dayton Hudson, when he accepted the prize at Columbia University on October 27 of this year.

The address follows:

CORPORATE RESPONSIBILITY: THE MARK OF PROFESSIONALISM

On behalf of Dayton Hudson, I am honored to accept this first Lawrence A. Wien Prize in Corporate Responsibility, and to be invited here to Columbia University to address this prestigious assembly.

On this important occasion, I am honored to represent our management and Board—past as well as present—for a number of reasons.

First, because of the important contribution Lawrence Wien has made to the business community's recognition of its responsibilities. Dayton Hudson and Lawrence Wien have both been involved in a long-standing effort to stimulate increased corporate philanthropy. And we're honored to be the first recipient of a prize bearing his name.

Secondly, we are honored because of the distinguished judges who selected Dayton Hudson from a nation-wide field of candidates. When you get the nod from such high-principled and hard-headed businessmen and women as Juanita Kreps, Irving Shapiro and Harold Williams—believe me, it's a bonus.

Thirdly, and most importantly, we are especially honored because Dayton Hudson was chosen not just because of our record of philanthropy, but because, in the opinion of the judges, our corporate responsibility efforts are well run. And because they are part of a well run and successful company.

Let me quote the judges' statement that was, for us, the frosting on the cake: They said, and I quote, "Dayton Hudson has done extremely well in managing its business . . . an indication that successful managements are sensitive to their social as well as economic constituents."

In saying that, the judges hit upon one of the key factors in our success: Corporate responsibility is more than a side-line at Dayton Hudson. It is an integral part of our business.

Indeed, I think it's impossible for a retailer to separate out where business interests end and where society's interests begin. And that, I submit, is just as true for other businesses, as well.

I know I speak for current management at Dayton Hudson when I say we are tremendously indebted to our management predecessors. They had the foresight to recognize that the health of our business is tied—for better or for worse—to the health of the communities where we operate. Our leadership position today, both in community circles and in business circles, owes a great debt of gratitude to their enlightened vision.

My purpose here today will be to share some of that vision with you, and to place it within the context of our business today, and our fast-changing world.

When I'm finished, I hope you'll conclude, as we have, that a well-integrated and comprehensive program of corporate responsibility is not only good for the "bottom line," it is the "bottom line."

Let's begin, however, with a clarification: When Dayton Hudson and corporate responsibility are mentioned in the same breath, most people think solely in terms of "philanthropy." Despite that fact, our definition of the term is much broader, and I will be talking about corporate responsibility in its broadest sense.

In saying that, I don't mean to downgrade philanthropy in any way. It has been, and will continue to be, an important cornerstone of our corporate public involvement program.

Although it is a legacy from past generations of management, the Five Percent Giving Policy is, I assure you, endorsed wholeheartedly by current management at Dayton Hudson.

It has survived the best of times, and the worst of times. During the economic downturn in 1974, the policy was given special scrutiny by both management and our Board of Directors, and it was re-affirmed as a sound business practice, one that's in the best interest of our shareholders. In fact, our officers, to a person, voted to cut other expenses, before cutting out or reducing our Five Percent Giving Policy.

Today, the policy continues to have management's blessing despite economic pressures, and despite the fact that our record growth puts our giving budget at a record level: Over $12 million dollars this year, including administrative costs.

You may be interested to know, as I was, that from 1966 to 1982 (the period we've been making our financial results public), we've contributed an estimated $72 million dollars to improve the communities where we do business.

And that doesn't count our first 20 years at five percent giving, when Dayton's was privately held, and didn't report its results. Nor does it reflect the first 29 years of the Dayton Foundation, which began in 1917. So our commitment to philanthropy has been at the very core of our existence for some 65 years.

But the point I want to make is this: We believe that even more important than what you give or how long you have given, is how you give, how you leverage those gifts with other resources and other activities, and how your giving program fits into your total business strategy.

Our giving program is part of a comprehensive program of corporate public involvement. And that program is part of a comprehensive effort to do business responsibly—and responsively. We think it's an essential element in a professionally managed operation, and that's certainly just as true of retailing as it is of any other business.

The fact that Dayton Hudson is in the retail business means we're in the business of serving the American consumer through fashion and value-oriented quality merchandise.

The key to success in retailing can best be summed up in one phrase: "Managing change."

As the customer's purchasing agent, the retailer must know, well in advance of the season, what the customer wants, and how those wants are changing. Then we've got to respond more quickly—and more efficiently—than the competition, when it comes to serving those needs.

At Dayton Hudson, we call this trend merchandising. It's a systematic process for testing customer reaction to new merchandise, and then identifying and tracking incoming and outgoing trends.

This isn't the time or the occasion to talk about trend merchandising. But what is relevant about the process is that our success in managing change in the merchandising areas has given Dayton Hudson a base for broadening the concept and applying trend management concepts to all aspects of our business—from trends in management styles, to trends in employee benefits, to trends in the overall strategic positioning of our corporation.

For trend management to work, there are two key ingredients: Awareness of change, and responsiveness to change. And that, ladies and gentlemen, is where a comprehensive program of corporate public involvement plays an important role.

When we're thoroughly involved in our communities—when we're investing not only philanthropic dollars, but the time and talent of our people, as well—it heightens our awareness, not only of what the needs of the communities are, but how those needs are changing.

That, in turn, helps us to meet those needs better, and it plays a significant role in broadening the vision of our professional management team. In short, it helps us manage change.

To illustrate how a comprehensive program in corporate responsibility fits in, strategically, let me describe two examples: B. Dalton's literacy campaign, and our recent Hispanic Symposium.

They are separate, unrelated illustrations. But together they will help describe the Dayton Hudson approach to corporate responsibility.

The first example is an effort that's turning into a full-fledged campaign on behalf

of literacy by B. Dalton, our national bookstore chain.

When B. Dalton management researched the needs of its markets, they found some shocking statistics.

More than 25 million adult Americans are functionally illiterate. In fact, some estimates go as high as 60 million.

Some 800,000 kids drop out of high school each year.

And tens of thousands more graduate without achieving basic skills.

What those figures mean for a bookseller is naturally of concern. But what they mean for society is of even greater concern.

Being functionally illiterate means that a person cannot read and write well enough to function in today's society. A person can't read well enough to complete a job application, or decipher signs, or take a driver's license exam, or shop intelligently.

During a 14-month assessment period, B. Dalton examined the issue of illiteracy and evaluated delivery services available to address the issue on the local, state and national level.

Internally, the people at B. Dalton asked themselves what they could do about this serious issue. They decided their response would be two-fold: To get more heavily involved in adult literacy training, with both volunteer time and money; and to get more heavily involved in programs to encourage young people to read.

In other words, B. Dalton decided to get active not only in trying to solve the problem, but in trying to prevent the problem.

As a result, literacy has become the primary focus of B. Dalton's giving programs. In 1982 alone, nearly a quarter of a million dollars will be invested in:

Literacy organizations in B. Dalton's key market communities around the country.

Model programs, long-range planning and management training . . .

And a national literacy network to stimulate awareness of the problem.

But the most important step B. Dalton has taken has been to identify the key component in delivering services to people who can't read, namely, volunteers.

The've begun an all-out campaign to mobilize B. Dalton employees, nationwide, to become individual tutors and community leaders for literacy in their local communities.

At its headquarters in Minneapolis, B. Dalton offers time off from work for training to be tutors, and they purchase the training materials for any employee who's willing to help those who can't read.

Even though the program is only a few months old, already the response of B. Dalton employees had been overwhelming. At headquarters, there's even a waiting list for the training program.

What's especially heartening, is that B. Dalton people at all levels have become actively involved in the tutoring program and other aspects of the literacy campain.

Everyone from sales clerks, to the maintenance man at corporate headquarters, to regional managers and vice presidents, all the way up to the C.E.O.

What this all adds up to is this: B. Dalton has put together a comprehensive effort that includes some important elements: First, a well-chosen and strategic issue (in a field where they have a special interest, concern and expertise); second, a commitment of financial resources; and third, a commitment of the time, talent and personal resources of their people.

We think it's an excellent example of an effective public involvement program, a program that makes sense for the business—and for society.

Incidentally, I might add that each of our businesses has selected its own areas of concentration—areas that make sense for their business.

Dayton's, our Minneapolis-based department store company, sees women as its major customer, so they focus their contributions and involvement in programs for women and girls.

Mervyn's (our California-based promotional department store chain), and Target (our "upscale" discount chain), both serve young families as their primary customer. So issues of concern to that group are the focus of their attention.

Likewise, each of our companies strives to focus its efforts, to maximize the impact of its giving and its community involvement. It's an approach that makes sense to us, and we think every business should choose its own field in which to invest its money, time and corporate expertise.

The second example I'd like to use today is a very recent one: The Dayton Hudson Hispanic Symposium held last month in San Antonio, Texas.

From the sound of it, you might think this was one of those nice image-building public service conferences—sponsored, perhaps, by an enlightened corporate foundation and attended by people who already know a lot about the subject.

Not so, in this case. This was an internal business conference, conceived for business reasons. It was planned by a corporate-wide task force and coordinated by the corporate development department at Dayton Hudson, which is the department that heads up our on-going strategic planning effort.

The symposium was attended by top executives from key areas in each of our eight operating companies, and corporate staff headquarters. Key people from marketing, advertising, personnel, strategic planning and community relations.

Plans for it grew out of our recognition of two facts: First, that the Hispanic population is growing in significance, especially in the strategic "Sunbelt" areas of the country. And, secondly, that Spanish-speaking citizens have some unique needs, not only as potential customers in our stores, but as potential employees and potential partners in the community at large.

Our awareness of Hispanic cultural differences had been heightened, first of all, because of our on-going commitment to be an affirmative action employer. And that commitment includes increasing the number of Hispanic employees beyond the 5,000 we already have.

But our sensitivities were really raised by the Dayton Hudson Foundation's funding of a Hispanic Leadership development program: a quarter-of-a-million-dollar commitment, over a 3-year period, to assist in developing some 500 Hispanic leaders in California, Texas, and Michigan.

Our involvement in that program heightened our awareness, but the numbers really drove home the significance of this population for our business.

If 1980 census trends continue throughout this decade, by 1990 Spanish-speaking people will represent 35 percent of the population in California, 32 percent in Texas, 22 percent in Arizona, and 50 percent in New Mexico.

Those areas are precisely where several of our operating companies are already doing business, and where almost 80 percent of Dayton Hudson's projected capital commitments for the next five years is targeted to go.

The result of the awareness and the planning was an intensive two-day experience in which some 40 Dayton Hudson executives were the "students," Hispanic leaders were the "teachers" and the San Antonio Hispanic community was the "classroom."

Our people not only listened to Hispanic elected officials and Hispanic community leaders, they toured schools and neighborhoods, as well. They saw for themselves the unique needs and unique traits of this special population.

The participants came away from the meeting with a new understanding of how those needs impact our business, and with a renewed commitment not only to market appropriately to the Hispanic community, but to recruit from there as well.

Apparently, the experience was mutually-beneficial. To illustrate, let me quote from a letter we received after the symposium from Andre Guerrero. He is the director of Ohio's Commission of Spanish Speaking Affairs, who served as a consultant in planning the conference. Even though it was a business conference, paid for as business expense, Mr. Guerrero called the symposium, "a unique gift to the Hispanic Community" because of the extensive involvement of Hispanics in the planning, and because of the openness and receptivity of our people.

"As with all good gifts," he said, "the giver also received from the experience. Dayton Hudson created a working environment with major sectors of the San Antonio community which is usually only developed over a much greater period of time. And the good will and trust established is something that could not have been purchased at any price, however intense a public relations campaign might have been."

My point is this: We gained far more than good will. We gained far more than an entree into the Hispanic community. Our biggest gain was that we broadened the perspective—we broadened the vision—of our management team.

And that, ladies and gentlemen, is absolutely crucial to effectiveness in business. To me, it is the mark of a professional executive, and the hallmark of a throughly professional organization.

Although I don't have any hard data to back me up, my personal observation is that the quality and effectiveness of a management team goes up as it becomes really involved in the community, as its members think more broadly about the world around them, and about the issues of the day; and as the corporation backs up that awareness and personal commitment with philanthropic dollars.

The talents we develop, the skills we develop, the special sensitivities we develop, all carry over to help us meet the business challenges that confront us every day. We think they certainly help us to manage better in this rapidly changing world.

At Dayton Hudson, we are throughly convinced that involved management is more enlightened, that enlightened management is more effective, and that enlightened management and enlightened giving are two sides of the same coin.

Our experiences in the community and in the business world confirm that view. Furthermore, we think it's a view that holds true for other businesses, besides retailing.

Granted, retailers must be espcially sensitive to the total community and to changes in that community. Thus, retailers have a

very real business reason for keeping their finger on the public pulse.

But, in closing, I would also have to ask: Is that not true for any business that depends on the public for its franchise to do business? Is that not true for any business that serves people? When it comes right down to it, is that not true for any industry?

Could it be that some of the problems currently besetting some of this country's major industries (industries now suffering decline)—could it be that some of these problems might have been lessened, had their managements been more involved in their communities, more sensitive to changes in society and more responsive to those changes?

Could some of the unsuccessful efforts to manage change be traced to lack of attention to broader issues, a lack of involvement in addressing the needs of society as a whole, rather than just the business?

Might not many of the changes have been more apparent to management, and management better able to respond, had there been more corporate involvement? More volunteerism, more philanthropy, more strategic planning with an eye toward the changing consumer, and more targeting of corporate resources into solving problems that affect the total society, and thus business?

Based on our experiences at Dayton Hudson, we think the answer to those questions is an unqualified "yes." Our business is healthier because of our efforts to be both responsible and responsive.

And we are extremely pleased that, in awarding us Columbia's first Lawrence Wien Prize in Corporate Responsibility, you have taken note of the connection between the two.

On behalf of the more than 70,000 employees of Dayton Hudson Corporation, on behalf of our management and our board of directors, thank you very much.●

EFFECTS OF INTEREST RATES AT THE GRASSROOTS

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. HUBBARD. Mr. Speaker, one of my constituents, Rev. Jerry Hopkins, the pastor or Reidland Baptist Church in Paducah, Ky., has written me an excellent letter in which he stresses the adverse effects of soaring interest rates upon persons at the grassroots. Indeed, too many individuals have lost everything due to escalating interest rates—including their businesses, homes, educational opportunities, and much more for which they have worked throughout their lives. I believe my colleagues will be interested in Reverend Hopkins' comments. His letter follows:

REIDLAND BAPTIST CHURCH,
Paducah, Ky., September 17, 1982.

Hon. CARROLL HUBBARD,
Congress of the United States, House of Representatives, Washington, D.C.

DEAR SIR: There is a matter which I would like to bring to your attention having noted that you serve on the Banking, Finance and Urban Affairs Committee. High interest rates are very disturbing to me. Having some knowledge as a result of my graduate work at Eastern and the University of Kentucky of the nature of our economic system I find it contradictory to growth and productivity. We live in a consumer oriented economy and when consumption declines you have a dangerous situation. If people do not have money, they cannot buy products. If people cannot buy products, manufacturers are not going to employ or continue to employ people. If people are unemployed they will not have money with which to buy. This is a simplistic view of our situation, but I believe an accurate one. The automobile and housing industries are examples of this very problem. My question—what is being done to bring down these unreasonable rates?

I do not believe those who are financially secure, even wealthy, understand the plight of those at the bottom of society or near the bottom. I find it hard to take President Reagan's words seriously when I see little "cutting" in the White House regarding extravagance. These are not bitter words, but what I have come to feel from observation and listening to folks at the grassroots. It might be more helpful to give the financially oppressed and neglected a forum at which to speak. There are many sad stories of folks who have lost everything through soaring interest rates—businesses, homes, educational opportunities for children and much more.

Perhaps we might be able to talk at some point in the future about some of these issues. The mood of our time seems to parallel that of the 1920's, let's hope and pray that the conclusion will not be another 1929 and decade like the 1930's.

Sincerely,

JERRY HOPKINS.●

IMPACT OF NEW FEDERALISM

HON. BARBARA B. KENNELLY

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mrs. KENNELLY. Mr. Speaker, I rise today, to call to the attention of my distinguished colleagues some thoughtful testimony presented last September at a forum in West Hartford, Conn., held to discuss the impact of the New Federalism on the children of our State. I was most pleased to join my good friends Representative GEORGE MILLER and Representative TOBY MOFFETT in soliciting a variety of views on this important issue.

State and local officials, service providers, and other interested observers testified at this hearing. Time and again they pointed out the vital importance of caring for this Nation's children. Several of them made another excellent point which is well worth repeating. As we search for ways to slow the growth of the Federal budget, they said, we must be careful to look not only at the bottom line cost of the programs we authorize, but at their structure as well. We must carefully review existing programs to make sure they are structured efficiently. We must review them to make sure they meet the goals we have set for them and the needs of the people we intend them to care for.

I am grateful to St. Joseph College, host of last September's forum, and to the many service providers who took time out to contribute their thoughtful comments.

I include at this point in the RECORD several statements presented at that forum.

STATEMENT OF MONA FRIEDLAND, DIRECTOR OF PROGRAM DEVELOPMENT, WINDHAM AREA COMMUNITY ACTION PROGRAM

The Windham Area Community Action Program, Inc. is a private, non-profit action agency which administers three of the State funded day care centers in Northeast Connecticut.

Day Care budgets have always been tight. Federal funding through Title XX reimbursements to the State have enabled the day care centers to maintain an adequate adult-child ratio. During hiring freezes, which we have experienced several times over the past few years, staff support has been critically low, invariably affecting the quality of care at the centers. Cutbacks to this supplemental funding will force the States to raise additional revenue or reduce the number of day care slots available. Either way the impact will be greatest on those who are on the lower end of the earning scale and therefore have fewer options available to them.

Similarly, cutbacks in the Child Care Food Program in 1982 have resulted in reducing the number of meals which can be claimed and in some cases resulted in an increase of fees to parents.

It has been shown that the CCFP helps to keep the cost of child care down. When providers are reimbursed for the meals they serve, they do not pass this cost on to parents, thereby keeping child care costs at a minimum. For working poor families, particularly single parent families, reasonably priced day care allows them to continue to work and to stay off welfare rolls.

Continued, adequate funding of Federal food programs and Title XX funding will help to maintain quality day care in Connecticut. Please help to keep this vital service working in our communities.

STATEMENT OF ANN HORNE, EXECUTIVE DIRECTOR, THE SAUGATUCK DAY CARE SERVICE, INC.

Thank you for inviting our agency to your forum on September 8, 1982. We learned a lot and appreciated the chance to become more familiar with other Connecticut agencies serving children.

We strongly support Congressman Miller's resolution to create a Select Committee on Children, Youth and Families (H. Res. 421) in the House of Representatives. Children must be defended against the increasing burden of enormous cutbacks in federal programs. The New Federalism appears to have been brought to us courtesy of the nation's children.

In support of your positions and to emphasize the need for the proposed Committee, here are some facts and figures demonstrating the impact of 1981-82 budget cuts on people served by our organization.

We are a private, nonprofit agency serving families in Fairfield and New Haven Counties, through three programs:

(1) Our Family Day Care Network involves fifteen local state-licensed Family Day Care Providers, who earn their living in

their own homes, caring for children. Providers are chosen, continuingly trained and supervised by our staff, which enrolls children in care and offers limited financial assistance, funded by donation, to parents in need. (Working couples and single parents should have Federal financial help toward Family Day Care costs.)

(2) A Child's Place is our professionally staffed, flexible-time center serving children eighteen months through six years of age. The program is designed to meet part-time day care, socialization and cognitive needs of young children in a setting that promotes social, emotional, intellectual and physical growth.

(3) Our Nutrition Program serves about one hundred licensed Family Day Care Providers in our Network and in outlying towns. The USDA Child Care Food Program, through the Connecticut Department of Education, reimburses Providers for healthful food served to children in their care. Our agency enrolls, trains, supervises and gets reimbursement for Providers. It is the Nutrition Program which has been hard hit by budget cutbacks. Here are the figures. Reimbursements are never overly generous. For example, the average payment in 1981–82 was: 48 cents for breakfast, 94 cents for lunch or dinner, and 28 cents for snack.

In 1981–82, two installments of cutbacks affected our program. The first, set in motion September 1, 1981, decreases cents amounts spent to reimburse for each meal or snack. Levels varied slightly through both fiscal years, but the average reimbursement drop from one year to next per child per feeding was: minus 5 cents for breakfast, minus 3 cents for midmorning snack, minus 6 cents for lunch, minus 3 cents for midafternoon snack, and minus 6 cents for supper.

At a time of galloping information in food prices, a Family Day Care Provider is expected to feed each child on 23 cents *less* for a full day's food.

The second cutback was even more devastating to our children's nutrition. Beginning January 1, 1982:

(a) Day Care Providers' own children are no longer paid for unless eligible under the School Lunch Income Guidelines. This cuts off payments for food for one hundred twenty-one children of Providers in our program, which serves about seven hundred children each year.

(b) Providers are reimbursed for only two meals and one snack they serve to day care children, instead of three meals and two snacks, the previous maximum. A child in family day care full-time is assured of nutritious food only three-fifths of the time. This arrangement clearly discriminates against full-time day care children in favor of part-time children. It is in fact the children of working parents who are in family day care full-time; part-time day care is more often used by parents with volunteer or part-time work commitments, who may be assumed to be somewhat less in need of financial assistance in feeding their children.

Thanks for your concern for our children and your efforts to help us help them.

STATEMENT OF FRANCES ROBERTS DIRECTOR, OFFICE OF CHILD DAY CARE, STATE OF CONNECTICUT

I want to commend Barbara Kennelly, George Miller, and Toby Moffett for the excellent forum on children's issues at St. Joseph College last week. Since you indicated that written testimony can be forwarded to you for inclusion in the record, I am sending these comments along for that purpose.

I am Frances T. Roberts, Director of the Office of Child Day Care for the State of Connecticut, and I wish to add to the testimony of witnesses who appeared at the Congressional Forum on "New Federalism: Its Impact on Connecticut Children" held in West Hartford on September 8, 1982. You have heard excellent testimony on the effects which have already been felt and those anticipated of reduced funding for the programs for children which are so vital to their optimum development. My concern is, that as we seek to regain lost ground, we not lose sight of the fact that what we had before needed improvement. Welfare Reform was a recognized need in the 1970's under both Republican and Democratic administrations, and some of the proposals made at that time should be given consideration along with restoring the funding levels.

Specifically, we need to look at the objectives of the AFDC program, and decide whether the program is really designed to support families or to keep women out of the job market. If it is the latter, then we need to increase the flat grant and stop talking about getting these parents back to work, stop trying to design job training programs for them, and accept the fact that children will be raised by mothers with low self esteem, poor job prospects and little hope for the future. If on the other hand, we truly want to help these families get off of welfare and encourage the mothers to get jobs, we need to provide real incentives in place of the disincentives in the present policies; for example, permit working AFDC mothers to keep 50 percent of what they earn rather than the "30 and a third" formula, for example, $30 plus one third of earnings each month.

Second, and this applies to programs other than AFDC as well: establish income eligibilities for support services and then separate eligibility from the source of that income; that is, work or welfare. I am thinking of such supports as day care, medicaid and food stamps which an AFDC mother stands to lose if she is taken off of welfare because she is earning too much; thus she might be motivated to work less or not at all and stay on welfare to keep her benefits.

It seems to me that we have two very serious maladies to combat today. One is the attitude of the current administration in Washington which appears insensitive to the fact that the "safety net" has holes so large that children are falling through it. The other is the despair of the more liberal or progressive sector when it recognizes that the massive social programs of the sixties and seventies did not solve all the problems of poverty, racism, decay of the cities and other societal ills, and has no alternative strategy to offer. This despair must be replaced by a real commitment to reform the system as well as restore it to a humane level. Such a commitment should go beyond the band-aids and prevent the disruption of families and the loss of human potential that are inevitable in the present climate.

A RESOLUTION COMMENDING ST. PAUL'S CHURCH IN MOUNT VERNON, N.Y., FOR ITS ROLE IN THE DEVELOPMENT OF THE BILL OF RIGHTS.

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. OTTINGER. Mr. Speaker, today I am introducing a resolution to commend St. Paul's Church in Mount Vernon, N.Y., for its significant role in the development of the Bill of Rights. I urge my colleagues to join me in recognizing St. Paul's, which is noted as the "National Shrine for the Bill of Rights," and is designated as a national historical site, and is part of the National Park System.

The history of St. Paul's parallels the development of our constitutional freedoms. Initially built in 1665, the church and its adjacent village green has been the setting for historical events which have greatly contributed to the development of our Constitution.

The event that made the church most famous, "The Great Election of 1733," led to the establishment of a free press in America.

The 1733 election for Governor of New York was announced by a notice posted on the door to the church. The election was corrupt and unfair, and prompted John Peter Zenger to publish the New York Weekly Journal which ran a full account of the local sheriff's corruption and the misdeeds of other colonial authorities. An attempt was made to suppress Zenger's publication, and the journalist was jailed for 9 months on charges of libel.

The ensuing trial acquitted Zenger and set a precedent in the courts for the establishment of a free press. Indeed, Zenger's trial is considered to be a major impetus for insuring freedom of the press in America.

St. Paul's Church has played other roles in our Nation's history. Ann Hutchinson took refuge in the church from those seeking to persecute her for her religious beliefs. The church served as a hospital for Hessian troops in 1776 and as a courthouse for some of our Nation's most brilliant legal practitioners.

Today St. Paul's Church stands as a living symbol of our freedoms and how they were shaped. I believe Congress should recognize the great contributions that St. Paul's Church has made to our Nation's history, and I urge my colleagues to support the resolution which I am introducing today.

I am including in the RECORD a text of the resolution:

H. RES. 618

Whereas Saint Paul's Church, in Mount Vernon, New York, has, since its founding in

1665, been the setting for historical events that have significantly contributed to the development of the Bill of Rights, including the first amendment guarantees of freedom of religion, separation of church and state, and freedom of the press;

Whereas the election held on the village green adjacent to Saint Paul's Church on October 29, 1733, and the subsequent attempt by the British Governor of New York to suppress the publication by John Peter Zenger of accounts of the corruption involved in such election, resulted in the trial and acquittal of John Peter Zenger and the establishment of a significant precedent for freedom of the press in the Nation:

Whereas Saint Paul's Church has been noted as the "The National Shrine for the Bill of Rights;

Whereas the importance of Saint Paul's Church to the Nation has been recognized by its designation as a National Historic Site in 1943, and its inclusion in the National Park System in 1980; and

Whereas December 15, 1982, the 191st anniversary of the incorporation of the Bill of Rights into the Constitution of the United States, is a particularly appropriate occasion on which to recognize the role of Saint Paul's Church in the development of the Bill of Rights: Now, therefore, be it

Resolved, that the House of Representatives hereby commends Saint Paul's Church, in Mount Vernon, New York, in recognition of its significant role in the development of the Bill of Rights.●

THE DISPOSSESSED

HON. NICHOLAS MAVROULES

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. MAVROULES. Mr. Speaker, in the weeks ahead as we strive to develop an answer to the country's economic crisis, I think it is appropriate that we be reminded of how our actions in this Chamber can affect the lives of millions of Americans.

This article was brought to my attention by a businesswoman from my district, Ann Sheinwald of Rockport, Mass. Ms. Sheinwald was moved by the poignancy of Mr. George Getschow's article in the Wall Street Journal and asked me to share it with my colleagues.

As we debate alternative solutions to the unemployment problem, each of us should consider the suffering of those who cannot find work.

The article follows:

THE DISPOSSESSED: HOMELESS NORTHERNERS UNABLE TO FIND WORK CROWD SUN BELT CITIES

(By George Getschow)

(*"They's movement now. People movin'. We know why and we know how. Movin' cause they got to. That's why folks always movin'. Movin' cause they want somepin better'n what they got. An' that's the on'y way they'll ever get it."*—JOHN STEINBECK, "The Grapes of Wrath." 1939)

HOUSTON.—Some 30 miles from the center of this sprawling Sun Belt city, on the banks of the San Jacinto River, is a community that came into existence some six months ago. It now has about 250 residents, most of whom came from other states, and is continuing to grow week by week.

Its name is found nowhere among real-estate ads, Indeed, it has no official name. Neighbors, however, call it Tramp City U.S.A. because its residents sleep in tents, cook on campfires and collect aluminum cans for a living.

Those who live here deeply resent being called tramps. Most are displaced families from depressed Northern states who have lost their jobs, exhausted their unemployment benefits and trekked south in search of work, only to find such work is no longer available. "We have no job, no money and no place else to go," says William Loveall, whose family drifted to the tent community from Detroit two months ago after their real-estate business collapsed and their savings evaporated.

DIRE STRAITS

Stirring a pot of beans simmering on his campfire, Mr. Loveall surveys the poor and tattered people around him and discusses reports that local merchants and homeowners regard the tenters as a collection of ne'er-do-wells. "A lot of locals think we love it out here," he says. "They don't realize just what a fix we're in."

Across the U.S., tens of thousands of families and individuals are in a similar fix. Not since the mass economic distress of the Great Depression, which drove the nation's destitute into tin-and-tent towns called Hoovervilles, have so many working-class people suddenly found themselves in such dire straits. President Regan has urged the 11.6 million Americans who are officially unemployed to "hang in there" until the economy recovers. But many of the nation's jobless have nothing left to hang onto.

A recent report by the U.S. Conference of Mayors says thousands of families have been evicted from their homes and are living in cars, campgrounds, tents and rescue missions. The report notes that federal welfare programs that would have once kept such families afloat have been sharply cut back and adds that many more of the nation's "new poor" will spill onto the streets after the 26 weeks of their unemployment benefits expire.

It is a situation that is affecting towns and cities across the country. In New York, officials say the city's five public shelters, now jammed with 3,700 people, won't be able to accommodate the 1,500 more expected this winter. In Detroit, a new 45-bed shelter was filled the first night it opened. In Cleveland, Depression-style soup kitchens that once catered to skid-row loners have been revived and expanded to serve whole families.

BITTER HARVEST

But nowhere is the ugly specter of the homeless poor more shocking than here in the Sun Belt, which is reaping the bitter harvest of unemployment from all over the country. "I swear it looks like 'The Grapes of Wrath' around here," says Virginia Cuvillier, director of Houston's Travelers Aid Society. In the last 12 months, the society has seen 22,000 transients, mostly from Indiana, Ohio and Michigan.

Lured by tales of unlimited employment opportunities and the refuge of warmer weather, the jobless are streaming into the "promised land" in groaning jalopies, packed with bedsprings and babies, in numbers that may exceed even the highest estimates of 50,000 a month. But in an ironic twist from the '30s, when tens of thousands of Okies fled their barren farmlands in the dust bowl for fruitless vineyards in the West, today's migrants are mostly Northerners headed for the now-sputtering oil fields of Oklahoma, Texas, Colorado and other states.

In Galesburg, Ill., for example, a city of about 35,000 hard hit by an epidemic of plant closings and layoffs, there are at least 900 vacant homes. "Hundreds of families packed up and headed for the oil fields." says Howard Martin, the director of Galesburg's Salvation Army. "They get there and find that the jobs have dried up, but they can't return because they have no homes or jobs to return to."

"DON'T COME HERE"

Some Sun Belt cities have been trying to put out the message that the area no longer is the land of opportunity they once boasted about. "We now say to the unemployed people from Michigan, Ohio and Indiana, 'Don't come here, we don't have jobs,' " says Clyde Cole, director, of the Tulsa (Okla.) Chamber of Commerce.

But for many, the message doesn't get through. Tulsa now has several thousand transients stranded in campgrounds or under bridges. Downtown Denver has filled up with so many homeless people that they have begun overflowing into the prosperous suburbs of Lakewood and Arvada. And even in a smaller oil town like Abilene, Texas, whose population is about 104,000, there may be 5,000 people living in tents, abandoned buildings and cardboard boxes, says June Benigno, executive director of the Abilene mental-health association.

Outside Houston, the community called Tramp City U.S.A. was organized with the help of the Rev. Ray Meyer, a local preacher, and is located on state property. With assistance form six volunteers, Mr. Meyer retrieves food that has been discarded by grocery stores and vegetable stands, cleans it up and delivers it to the tent people. Residents provide their own tents.

Newcomers to the community are welcomed by Barbara Tolbert, recently appointed "town greeter" by Mr. Meyer because she and her four children have been residents for four months and she knows everyone well. Mrs. Tolbert offers the new arrivals some food, finds them a space to set up housekeeping and even helps them enroll their children in school. She also give them a manual entitled "How to Survive in the Out of Doors," written by Mr. Meyer.

A typical newcomer is Dave Johnson, who lost his job and home in Gary, Ind., after the steel mill that employed nim shut down. He arrived in Texas with his pregnant wife, Donna, two children and high hopes of finding work. "At home, all you ever hear about are all the jobs down here," he tells Barbara Tolbert. She replies: "I hate to disillusion you, but"—she points to a parking area filled with out-of-state license plates—"that's what everybody else here heard, too."

The problems facing these homeless legions in the Sun Belt grow apace with their numbers. Not the least of those problems is the frontier philosophy pervading much of the region that "you take care of yourself and your own," says John Hansan, executive director of the Washingtron, D.C.-based National Conference on Social Welfare. Because of that attitude and because the Sun Belt hasn't faced widespread unemployment and poverty before, Mr. Hansan says, public and private philanthropic agencies to help the poor and needy are in desperately short supply in many Sun Belt cities.

And the supply is getting shorter; some cities in the region are closing down private shelters, hoping the homeless will go away.

Phoenix, Ariz., for example, in the past year has condemned three shelters and several soup kitchens and has passed a slew of ordinances that, among other things, make it a crime to sleep in the parks at night or lie down on the sidewalks during the day. The reason for those actions was to make room for downtown renewal projects and to insure that "panhandlers and derelicts," as many citizens call them, wouldn't spoil the success of those projects.

The Arizona Republic, Phoenix's morning daily, and many of its readers supported the city's actions. "We Didn't Tolerate Prostitutes, Why Tolerate Bums?" the newspaper asked in an editorial headline. A letter to the editor from a reader made this observation: "If a stray dog is found wandering the streets, it is picked up and put to sleep. Unfortunately, we cannot put these 'human animals' to sleep, but we surely should not support and encourage their way of life."

According to Louisa Stark, a Phoenix anthropologist, the city's cold shoulder has been to push many of the city's 3,300 homeless out of private shelters and public parks into jails or "cardboard camps" outside the city. Wallace Vegors, assistant park manager of Lake Pleasant Regional Park, a county facility about 30 miles from downtown Phoenix, says that "lots" of people "are permanently camping" in the park and in the surrounding desert.

Others have settled on federal land near the city of Mesa, 17 miles from Phoenix. James Forrest, assistant director of the Mesa Chamber of Commerce, says the city has asked the federal rangers to get the homeless campers to move out, "but they chase them out one day and they come back the next." He adds: "As long as they don't bother anybody, we don't do too much about them."

The problem will doubtless worsen as Phoenix pushes ahead with its downtown redevelopment, Louisa Stark says. As new offices and shops replace cheap hotels and apartments, she says, "more and more people are becoming homeless because they can't find anything else they can afford."

Ambitious urban-renewal projects in southern California are also shrinking the supply of cheap housing. "Lots of longtime indigents are landing on the streets, but so are a whole new class of people—families from Michigan and Ohio that are flooding into the area," says Michael Elias, who operates a family shelter in Orange County.

There is little public sympathy for the county's 15,000 homeless, Mr. Elias says. The city of Irvine, for example, recently voted to build a $3.5 million animal shelter for stray pets. "But the city won't donate a dime for the homeless," Mr. Elias says, "because they see them sleeping under bridges and assume they must be bums."

LITTLE COMPASSION

Even in Houston, a relatively prosperous city in the heart of the Bible Belt, there is little compassion for the growing horde of economic refugees pouring in from out of state. Kay White, a social worker who has been criticized within her own church for using church funds to aid destitute transients, says: "A lot of churches will help their own people, but as far as the Yankees go, they aren't welcome."

Joseph Williams, a laid-off landscaper from New York's Long Island, knows the feeling. Stranded on the steps of the Catholic Charities relief agency with his wife, Cornelia, and their four young children, Mr. Williams, a Catholic, says the family has no shelter for the night. "The agency," he says, "told us if we were foreign refugees they could help us; otherwise we'd have to go someplace else. But where can we go? We don't have a car or money to pay for a hotel room. There's no work, and there's no family shelter here." (There is one free shelter for men; but most nights, it's so crowded that it has to turn away as many people as it can take in. The other shelters charge as much as $5 a night, an impossible sum for many.)

So after dark, when the downtown has been deserted by those more fortunate than they, the homeless drift in, filling the parks and fighting for space in abandoned buildings. One dilapidated downtown building is so full, in fact, that its tenants have hung home-made doors with padlocks to protect their occupancy.

The increasing presence of these ragged vagrants panhandling on the streets and loitering in the library (where they go to clean up and read their hometown newspapers), has aroused fear and anger among downtown shoppers and office workers. But the police say there is very little they can do about the situation. "How can you control it?" asks Patrolman Thomas Joyner. "The city is overflowing with these people, and it's getting worse every day. Besides, it's kind of hard to crack down on them when all they're trying to do is survive."

Patrolman Joyner adds that "there's been an upswing in petty crime in the downtown area," such as stealing food from grocery stores and breaking into vending machines. "If someone doesn't have a job or any money, and they've got families to feed," he says, "they're going to steal if they have to to feed them."

The problem is particularly acute here and in other Texas cities because what welfare assistance there is in the state is limited to "unemployables"—and most homeless adults, regardless of their circumstances, are considered employable. Furthermore, the homeless can't even get food stamps because they don't have a local address. "It's a horrible Catch-22," says David Austin, a professor of social work at the University of Texas. "Many of these homeless people are half-starved, yet they aren't eligible for stamps."

One such "employable" is Ronald Larson, a 30-year-old plumber from Chicago who a few months ago lost his job, his car, his savings and, finally, his home. His family moved in with relatives, and he hopped freight trains looking for work. Now he finds himself standing in a church-sponsored soup line in Houston with 200 other homeless men, women and children, suffering from hunger and depression and starting into a future that he sees as hopeless. "If it weren't for my family," he says, "I probably would have pulled the trigger long ago."

Some of Houston's homeless survive by scavenging garbage bins in the back of fast-food chains. Others sell their blood at prices of about $7 to $10 a pint. Two such donors are Kenneth Harris, a 48-year-old laid-off hotel manager from Portland, Ore., and his wife, Mary. "We can't find work. We don't qualify for any assistance. So what else can we do?" asks Mr. Harris as he stands in a waiting room with at least 300 other donors. To survive, he says, he has sold his car and even his wife's wedding ring. He adds: "My blood is all I got left."

The plight of the homeless has caused some to turn their children over to county welfare agencies. "It really pulls at your heart to see these parents give up their kids in order to provide a better life for them," says Carl Boaz, who runs Harris County's Child Welfare Emergency Shelter.

VIOLENT BEHAVIOR

Others turn to alcohol, violent behavior and even suicide. "They see new skyscrapers and shopping centers going up, and they think there's plenty of work here," says the Rev. George Grant, a minister from nearby Humble who has dealt with five suicides in a local tent community. When the homeless don't find work, Mr. Grant says, they react like a little child who has planned a magnificent birthday party but no one shows up. "It just blows them away," the minister says.

Another source of anxiety for the homeless is the threat of local vigilante groups who chase them off with shotguns and sirens. With local unemployment rising, Mr. Grant says, the vigilantes fear that they too might come to share the fate of their tent neighbors.

In "Tramp City U.S.A.," residents constantly feel the disdain of the local population. Some children refuse to go to school, having been called "river rats" by their more prosperous peers. Many of the families have also refused to go to church after one family in the community was turned away at a local parish for wearing dirty clothes.

The Rev. Ray Meyer tries to bring the Gospel to the homeless. But it isn't easy, he says, explaining: "These tent people are mostly middle-class people who've suddenly lost everything they've worked for, and they're angry at God." So rather than preaching, he sings songs, accompanying himself on his guitar. "Trouble has tossed you here and there, so now you don't even care," he sings. "You look for help at every place, but now there isn't anywhere else to go. Ah . . . but it seems like you're living in so much hell."●

VOTE NO ON GARRISON

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. OBERSTAR. Mr. Speaker, the House will very shortly take up the fiscal year 1983 energy and water appropriations bill. At that time, we will have a clear-cut opportunity to demonstrate our willingness to cut unnecessary and wasteful spending. As we all know, there are many items and projects funded by the energy and water appropriations bill which are worthwhile and important expenditures. And, there are other items in that bill which are simply a waste of the taxpayer's dollar.

One of those unnecessary and wasteful items is the Garrison diversion project in North Dakota. Garrison, as you undoubtedly recall, is a Bureau of Reclamation project, designed primarily for irrigation purposes. Since we first authorized that project nearly 20 years ago, a number of serious, unanticipated problems have come to light.

We know now, for example, that the project will have a disastrous environmental impact on Canada. The Government of Canada and its citizens have been—and remain to this day—clearly opposed to construction of Garrison.

And since Garrison was authorized in 1965, we have learned that the environmental impacts—particularly the impacts on wildlife—will be profound and devastating. North Dakota, as we all know, has a rich and varied wildlife and waterfowl population. The State's special system of shallow lakes and wetlands provides critical breeding grounds for birds. I understand that North Dakota produces more ducks each year than any State except Alaska. And North Dakota provides a critical and ideal stopover for migratory birds. But much of the area the wildlife depends on could be destroyed or harmed if the Garrison project is built as authorized.

Mr. Speaker, we know that Garrison is a destructive project. We know it will cause great harm to the environment here and in Canada. We know it will cost the American taxpayer $1 billion—and probably a lot more than that—to build. Knowing what we know, there is absolutely no reason at all to proceed with construction. Garrison is only 15 percent complete. If we stop funding now, we can limit the amount of destruction and harm to the environment. Moreover, we can save the taxpayer a substantial sum of money.

I am not opposed to looking at alternatives to the authorized project. We may well find an alternative which is environmentally and internationally acceptable. I think we should look for one and while we do, we should not spend another dime on construction of any features of the Garrison project. We all know that these water projects sometimes gain a life of their own and that construction momentum precludes modifications or honest discussion of alternatives. This is not the case with Garrison—yet. Construction has begun again in North Dakota. This year we must act to alter the course of events for we may not have the same opportunity again.

I am going to vote to delete funding for fiscal year 1983 for Garrison. I urge my colleagues to do the same.●

CHALLENGES FACING POSTSECONDARY EDUCATION

HON. E. THOMAS COLEMAN

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. COLEMAN. Mr. Speaker, in order to meet the challenges facing higher education in the 1980's, the Congress needs a clear understanding of the demographic, social, and economic trends which will affect our colleges and universities. Last month, the distinguished gentleman from Illinois, Mr. ERLENBORN, delivered a speech addressing those factors.

Mr. ERLENBORN's speech reflects the deep understanding he has developed of the problems and challenges facing higher education. We are indeed fortunate to have Mr. ERLENBORN as a member of the Postsecondary Education Subcommittee and as the ranking Republican of the full committee.

Mr. ERLENBORN's speech to the Association of American Publishers follows:

I am happy to be here today to discuss the factors affecting postsecondary education policymaking in Congress. These factors have placed Federal postsecondary policymaking in a new context and have created new challenges for the postsecondary education community to address.

Let me outline briefly what I consider to be the major economic factors. Then, after discussing each of these factors, I will give an assessment of the direction I feel Congress' response should go.

The first economic factor is the continuing need to reduce the Federal budget deficit. As we meet here today the Congressional Budget Office projects a deficit of $155 billion for fiscal year 1983. The size of this deficit means that even assuming a sharp upturn in the economy and other deficit reducing actions on the part of the Congress, pressure to reduce or freeze the cost of Federal programs will continue. This pressure is particularly important to consider in that other economic factors suggest that there may be a need for an expansion of Federal support for postsecondary education to address certain other economy-related needs, such as science and technology education.

The second economic factor is the increase in the cost of education. For the 1982-832 academic year, the average cost of a college education has risen by 11 percent. For community colleges, the increase has been 10.4 percent.

It now costs an average of $7,475 to attend a 4-year private institution, $4,388 to attend a 4-year public institution and $3,562 to attend a typical 2-year public institution. As these increases have occurred, Federal student financial aid has either been frozen or reduced.

Preliminary indications for the 1982-83 academic year suggest that minority and low-income enrollment will be below projected levels. Similarly, a shift in enrollment from 4-year to 2-year institutions also seems to be occurring.

The American Association of Community and Junior Colleges is projecting a 4-percent enrollment increase for the academic year just begun. The commonly offered explanation for this increase is that tuition hikes and cuts in student financial aid are leading many students to pursue relatively inexpensive credit hours at community colleges before transferring to complete their degrees at 4-year institutions.

Such a response to tuition increases is often unfortunate because the actual availability of student aid continues to be high. Harvard University, for example, reported a sharp drop in minority applications last year despite the fact that it continues to be able to admit all students regardless of financial need.

One obvious response to this trend of declining minority enrollment would be to reopen the floodgates of Federal spending for student financial aid. In increasing the aid available to all students, aid to needy students would be assured. Unfortunately, we can no longer afford such a blanket approach. Instead, Congress must target aid to meet specific objectives.

The first objective of Federal student aid must be to assure basic access to low-income and minority students. For these students grant aid in the form of Pell grants, supplemental educational opportunity grants and State student incentive grants has been of prime importance. The college work study program, which provides a Federal subsidy to institutions providing campus jobs for students, has also assisted these students. In fact, Census Bureau statistics show that the percentage of black high school graduates enrolling in colleges increased by a full 5 percent between 1967 and 1980.

Much of this progress is directly attributable to the creation of Federal loan and grant programs to assist students. In recent years, however, Congress has either frozen or reduced spending for grant programs for low-income students despite the fact that educational costs were escalating rapidly.

Coinciding with this no-growth policy for grant programs, was a literal explosion in Federal appropriations for student loans. The guaranteed student loan program, for example, received $945 million in appropriations in fiscal year 1979. By fiscal year 1982, the bill had risen to $3.07 billion. The effect of this situation, which reflects the greater political popularity of student loans over grants, is that the Federal commitment to promote choice among middle-income students apparently became a higher priority than promoting basic access among low-income students.

These facts suggest a direct linkage between the guaranteed student loan program and appropriations for grant aid. Clearly, Congress must continue to seek savings in the GSL program in order to provide greater support to low-income students.

The 1981 amendments to the GSL program, which require all students with adjusted family incomes above $30,000 to undergo a need analysis to qualify for a loan, was a much needed step in the right direction. These relatively minor changes saved the government over $500 million in the fiscal year just ended. This fiscal year, approximately $900 million more will be saved. I believe that additional savings proposals should now be investigated to reduce the growing annual cost of the loan program.

In approaching amendments to the guaranteed student loan program, Congress must be cautious. Legislative changes must be structured so as not to discourage students needing assistance for applying for loans. Similarly, any changes made affecting the repayment burden students must bear should be sensitive to the problem of unintentionally encouraging defaults.

A third economic factor is the likelihood of a reduced ability on the part of States to provide direct assistance to public institutions. Across the Nation, State funding for higher ecucation as a percent of State budgets is decreasing. The Wisconsin State University system, for example, received about one-quarter of all State generated revenues a decade ago. Today, the system receives only 18 percent.

The trend of static or shrinking State budgets is nationwide. The National Association of State Budget Officers reports

that 16 States have already revised their initial 1982-83 budgets by enacting across-the-board cuts ranging from 4 to 10 percent. An additional five States may make similar reductions in the next few weeks.

It is obvious that postsecondary institutions are going to experience continuing strains on their budgets for the next few years. How severe the pressure of institutions will be will depend in large measure on increases in utilities and other physical plan costs, the need to purchase new laboratory and computer equipment, and rising faculty salaries.

In several States, schools have had to look to tuition increases to meet these expenses. In Pennsylvania, an 18-percent tuition increase was announced for the 1982-83 academic year after a State court ordered a salary increase for faculty. The University of Missouri system has enacted a 11.2 percent tuition and fee surcharge for each student next semester to offset State budget cuts. Other States are attempting to develop greater pools of institutional grant and loan funds to help low-income students meet tuition costs.

The significance of these trends is that tuition costs are likely to continue to rise at a rate at least equal to inflation. With State funding limited revenue sources such as alumni giving will become increasingly important. In fact, gifts to colleges reached an all time high of $4.2 billion in 1980-81. While this report is encouraging, this record level is less than 6 percent of the total cost of postsecondary education in the United States.

A fourth factor influencing the future of higher education is the changing nature of the student body. The projected decline in the number of youth aged 18 to 24 over the next decade has been well publicized. This demographic change means that there will be 4.3 million fewer potential students in this age category, a drop of 15 percent. The National Center for Education Statistics estimates that the result could be a drop in college enrollment of 1.1 million in 1990.

Partially offsetting this decrease in traditional students are the changing characteristics of students attending college. Institutions are reporting an increasing number of so-called nontraditional students. These students are likely to attend 2- and 4-year public institutions and average 30 to 40 years in age. A large number of these students are married and are supporting families of their own. A large percentage is enrolled in less than full-time courses of study.

Many of these nontraditional students are pursuing additional education in response to disappointments in the job market. The education pursued ranges from programs to establish basic literacy to advanced courses in data processing. This education is job oriented and is ultimately beneficial both to the individual and to society as a whole. The students involved, however, often have very low incomes and a resulting high dependence on student aid. A recent study by Dr. Jacob Stampen of the University of Wisconsin indicates that over two-thirds of self-supporting or independent students have incomes below $6,000 and 94 percent have annual incomes below $12,000.

From a Federal policy perspective, Congress must assess the likelihood of two possible developments resulting from these last two economic factors. First, as tuition costs increase and the total number of students decrease, will some institutions be unable to survive? That is, will many small, mostly private institutions be forced to close as the decreased pool of students seek out higher quality or less expensive educations? Second, will public institutions, faced with less State money and greater student resistance to tuition increases, be forced to reduce the quality of their programs?

I believe both of these developments will become increasing Federal concerns in the next few years. What responses Congress will be able to make will be determined in large part by the shape of the overall Federal budget.

A fifth economic factor relates not so much to the monetary effect of the economy on higher education but to how higher education can help spur economic growth.

The current high rates of unemployment in the economy are overshadowing a fact that will become readily apparent once the economy recovers. This fact is that the nature of job skills called for by employers in our economy is changing. Even today a severe shortage of engineers, scientists, and technicians exists. This shortage could impede economic growth in those industries where we are currently most able to compete, such as aerospace technology and computers.

Consider the following statistics:

The number of Ph D's awarded in 1980 in physics and astronomy was 985—almost identical to the number awarded in 1965 and only 57 percent of the 1,740 awarded in 1971.

The number of Ph D's employed in the United States who actually practice physics in 1977 was 18,000, down by 10 percent from the 1970 peak.

Of the 2,379 Ph D's awarded in engineering in 1980, a full 49 percent were awarded to foreign citizens. Similar statistics would also apply to the fields of chemistry, math, and physics.

In sum, these figures suggest that the educational system is failing to provide the human resources needed to maintain or enhance the ability of U.S. business to compete in the world of technology. A similar situation exists in what is fast becoming a fundamental skill in international business—foreign language skills.

In order to maintain our position in the world economy we must match the existing efforts of our competitors in product quality and innovation as well as marketing abilities. To achieve this goal, our educational institutions on all levels must begin addressing the task of improving science, math, and language education.

In accomplishing this task many States may benefit from a Federal leadership role in the form of a new Federal program. Such a program may include direct assistance to State and local educational agencies and increased assistance to postsecondary students pursuing degrees in selected fields.

Meeting the challenge of improving science, math, and language will cost money. When combined with the existing education budget of over $14.6 billion, the increased strain on the Federal budget that would be created by a new program is obvious. There is no doubt in my mind that we must reexamine some existing programs before we embark on any new program such as I have just described.

In summarizing the five major economic factors affecting higher education over the next 5 years, it is obvious that the debt over the proper Federal role in education is likely to continue. The economy is making higher education both more expensive and more necessary.

As a nation, we will have to determine how best to help our postsecondary educational institutions meet the challenges there factors have created. In our Congress, a wide range of legislative responses will no doubt be offered. In reviewing these possible options, I believe the following principles should be followed.

First, the Federal commitment to assist students and their families meet the cost of obtaining a college education should be continued.

Second, because of the unprecedented pressures on the Federal budget, existing student aid and other Federal higher education programs should be reviewed for possible amendment to increase their efficiency and effectiveness.

Third, any policy decisions taken should be sensitive to the need to maintain the existing diversity among postsecondary institutions. New national programs should not be prededicated on federally mandated curriculum or other similarly restrictive requirements.

Fourth, to the largest extent possible, the private sector should be encouraged both to support postsecondary institutions directly and to assist them in developing educational programs suitable to address the employment needs of the 1980's and 1990's.

Thank you. I would be happy to respond to any questions.●

DOMESTIC SPECIALTY STEEL INDUSTRY

HON. STAN LUNDINE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. LUNDINE. Mr. Speaker, today I am introducing legislation in the House, which has previously been introduced in the Senate by Senator JOHN HEINZ, to address the serious problems being encountered by specialty steel firms in our country as they try to deal with unfair trade practices being utilized by foreign specialty steel producers to capture larger and larger shares of our domestic market.

Our domestic specialty steel industry is fighting for its very survival. This is in spite of the fact that the Office of Technology Assessment has confirmed that our domestic specialty steel industry is modern, competitive, and efficient. This year, several major specialty steel producers in our country have been forced to stop producing specialty steel; others have been forced into bankruptcy. Unemployment in the specialty steel industry is as high as 50 percent in some areas.

The specialty steel industry has provided ample and convincing documentation that a good part of its current problem is being created by unfair trade practices on the part of its international competitors. The industry has diligently and in good faith sought redress through our international trade laws, but the bureaucratic red-tape and the political complexities of our troubled international trading system have thus far failed to give way

to any serious attempt to retaliate for the damage done to domestic specialty steel firms from unfair trading practices.

In recent weeks, however, we have seen an encouraging sign that some action from the administration may finally be forthcoming to address the needs and concerns of our specialty steel industry. On November 16, President Reagan announced that he has asked the Office of the U.S. Trade Representative to oversee an expedited investigation by the International Trade Commission under section 201 of the Trade Act of 1974 to determine the extent of injury caused to domestic specialty steel producers from unfair trade practices, to initate talks between the United States and Europeans aimed at eliminating unfair trade practices that are causing that injury, and to carefully monitor specialty steel imports. In taking these actions, the President also indicated that if specialty steel imports continued to undermine the health of our domestic specialty steel industry, he would use authority to restrict these imports.

This Presidential declaration is indeed welcome by specialty steel producers. At the same time, it is critically important that effective and timely actions be taken to implement these intentions. It is therefore important that everyone recognize that our specialty steel industry cannot tolerate additional delays or ineffective policy actions to address the concerns of our domestic producers. To delay effective action any longer is to insure the demise of this critical industry in the United States.

The legislation I am introducing today, which is already pending in the Senate, hopefully will not be needed by virtue of swift and effective action pursuant to the President's announcement of November 16. It establishes firm quotas on specialty steel products and requires that the Secretary of Commerce announce these quotas at the beginning of each fiscal year for 6 months and then again in January for the remaining 6 months of the fiscal year. These quotas would be based on strict market shares for categories of specialty steel. The act would remain effective until Congress acts to modify or revoke the import limitations.

In the past, I have not adhered to a protectionist trade philosophy. But, I believe we must acknowledge that while the United States has continued to practice what we preach in terms of free trade, we have lost many, many markets to our international trading competitors who are utilizing specific strategies to advance the interests of their own domestic industries in the world marketplace. Many times these strategies have involved unfair and protectionist trading practices.

The United States cannot sit idly by while industries such as specialty steel which are so important to a strong industrial base and an adequate defense capability are slowly destroyed by unfair competition and foreign industrial strategies. We must begin to develop our own strategies for counteracting efforts to undermine our competitive capability.

Because we currently lack the resolve and commitment to the development of an industrial strategy for our country, and because I am convinced that we must allow our specialty industry to disappear by virtue of an ineffective response to unfair trading practices, I will diligently pursue congressional action to assist specialty steel in the remainder of the 97th and throughout the 98th Congress. If an effective program is not forthcoming in the very near future from this administration to address the needs and very legitimate concerns of our specialty steel producers this Congress must act to approve legislation I am introducing today.●

UNEMPLOYMENT DEMANDS IMMEDIATE ACTION

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. BONKER. Mr. Speaker, the national unemployment figures released today represent a human tragedy of enormous proportions. Twelve million Americans are now out of work, and that does not even include the millions who have simply given up looking for work or have been forced to work only part time.

In the Pacific Northwest, we are particularly hard-hit, due to our traditional dependence upon the timber and wood products industries. Unemployment in the construction industry is well above 20 percent nationwide, with disastrous consequences for our local logging industry and lumber mills. Without immediate action, analysts predict Washington State's unemployment rate this winter may exceed even last February's record level.

It is a cruel joke for the administration to claim its economic policies are working when unemployment continues to worsen and there is no real recovery in sight.

Certainly inflation and unemployment have come down somewhat, but almost all of these so-called gains are attributable to the prolonged downturn in the economy. The severity of this recession has created enormous distortions in our economy, and we will feel the effects for years to come.

With the administration unwilling to address the problem, Congress must make unemployment and economic recovery its top priority. The Democratic House leadership has outlined a comprehensive and cost-effective program to stimulate the economy and get people back to work. The leadership's plan calls for building and repairing our Nation's vital infrastructure, a short-term public works program to get people on the job immediately, and a housing stimulus program that would be a real boost to the Northwest.

I think this sort of comprehensive program is long overdue.

In addition, we must take steps now to bring about a strong and lasting recovery. That means reducing the Federal deficit and holding interest rates down. Unless the White House is willing to compromise on its enormous Pentagon budget increases and modify last year's loaded-down tax package, there is no way we are going to sustain a strong recovery.●

A SAD ANNIVERSARY IN EL SALVADOR

HON. TONY P. HALL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. HALL of Ohio. Mr. Speaker, today marks the second anniversary of the murders of the four North American churchwomen who worked among the refugees in El Salvador. This sad occasion provides us with an opportunity to reflect upon the current situation in El Salvador.

Unfortunately, violence continues to be a way of life in El Salvador. It is estimated that there have been over 30,000 noncombatant deaths in El Salvador since 1979. Particularly alarming has been the pattern of violence directed against the church in that country. This violence has included repeated threats to church workers, the disappearance of others, and the murder of several priests and lay religious workers. These attacks have come at a time when the church has made repeated appeals for dialog among the warring factions in El Salvador in the search for a nonviolent solution to the conflict.

The case of the four murdered North American churchwomen whom we remember today is a reflection of the tragic, pervasive violence that engulfs the people of El Salvador. While five former National Guardsmen have been detained by Salvadoran authorities in connection with the murder of our citizens, the prospects for investigating the possible involvement of high level officials in the crime are not encouraging. The origins of the systematic terror in El Salvador remain impenetrable.

For the Government of El Salvador to receive U.S. military assistance the administration will have to certify in

January that the human rights situation is improving. At this time, the facts simply do not support such a certification. It is my hope that the administration will carefully and honestly appraise what is really going on in El Salvador when it considers certification.

For the benefit of my colleagues, two recent articles which appeared in the New York Times follow. The first is an opinion editorial by John B. Oakes and the second is a Timcs editorial concerning the present situation in El Salvador:

[From the New York Times, Nov. 26, 1982]

CENTRAL AMERICAN FOLLY

(By John B. Oakes)

"Pay no attention to the rhetoric; just pay attention to the deeds," pleaded a State Department official defending the Administration's Central American policy the other day. The remark was exquisitely if unintentionally ironic. In Central America, more than anywhere else, this Administration's confrontational actions are totally consistent with its militant rhetoric.

The policy did not, of course, begin with President Reagan. Its roots go back a half-century or more, when United States Marines fought the Nicaraguan nationalist hero Augusto César Sandino and paved the way for the Somoza regime. But President Reagan and his former Secretary of State, Alexander M. Haig Jr., raised it to new heights of doctrinal folly. There is reason to hope that Secretary George P. Shultz will modify both words and deeds when he gets around to it—but by then it may be too late.

The dangerous bankruptcy of Mr. Reagan's rhetoric and action in Central America is becoming clearer every day:

1. In El Salvador—a "no win" situation reminiscent of Vietnam—Washington is committed to a military-controlled Government attempting to suppress an indigenous revolution growing out of social, political and economic chaos.

2. In Nicaragua, the United States is endeavoring to subvert a radical Goverment with which we refuse to negotiate except on our terms. In the best Soviet style, we are now encouraging a potential armed invasion from Florida and Honduras in order to overthrow it.

3. In Guatemala, we are edging toward support of another right-wing military dictator, who is unable or unwilling to stop the endemic massacres of Indian peasants.

4. In Honduras, the United States is building a military machine as our surrogate in the effort to overthrow the left-wing Sandinists of neighboring Nicaragua. We thereby run the risk of embroiling these and other countries (if not ourselves) in an unwanted, unnecessary and unconscionable war.

In stubborn adherence to his Central American policy of sterile anti-Communism, Mr. Reagan spares no effort to hoodwink Congress and the public.

The recent rhetorical flap over El Salvador's system of "justice" is a case in point. It was good theater when Ambassador Deane R. Hinton suddenly denounced in public—for the first time—the right-wing death squads and the "rotten" judicial system under which they have been operating with impunity.

It was good theater when the White House immediately threw a damper over his harsh words without repudiating them.

It was good theater when five national guardsmen, arrested several months ago for the vicious murder of four churchwomen from the United States, were instantaneously dredged up for a speedy trial and, doubtless, a speedier conviction.

It will be even better theater when Mr. Reagan and Mr. Hinton are able to point to this trial in the nick of time to certify (in January) that the human rights record of the Salvadoran Government really is improving enough to qualify it for continued military aid.

Yet there is still no evidence that Salvadoran courts dare proceed against the political and military higher-ups allegedly involved in daily murders in the streets and alleys. How could they when, as one State Department official has noted, "the night before a decision, someone tells a judge that we know your children and they're dead at noon if you act against a defendant." Will a carefully timed show trial of five low-ranking national guardsmen in January, with no effort to follow leads to higher authority, demonstrate respect for human rights?

"There is currently no serious investigation of the possible involvement of Salvadoran officers in ordering the killings or covering them up," says the New York-based Lawyers Commitee for International Human Rights in a letter sent this month to the State Department. The committee, which has meticulously followed the case of the four murdered churchwomen from its beginning in December 1980, recently uncovered new evidence suggesting that "superiors" ordered the killing.

"We are unable to discover any lawyer in El Salvador willing to pursue a vigorous investigation of all leads in this case. This is, in part, because lawyers there do not believe that the United States Embassy is willig to support such an investigation," writes the committee. No answer as yet—not even a rhetorical one—from Washington.

Meanwhile, things go on much as before—though at a slower tempo (2,427 murdered so far this year compared to 5,331 in all of 1981). Late last month, it was reported that 15 more leaders of the political opposition had disappeared from Salvadoran streets. Eight have turned up in the hands of the military, charged with terrorism. The other seven—if there were seven—are unaccounted for.

[From the New York Times, Nov. 18, 1982]

PROGRESS, OF SORTS, IN EL SALVADOR

It says a lot about El Salvador that a decision to try anyone for murder is news. Nearly two years have passed since four American churchwomen were raped, murdered and buried in a makeshift grave; five accused killers—all former National Guardsmen—are soon to stand trial. The question is whether this constitutes enough progress on human rights to pass muster in January, when it again comes time for Congress to ratify El Salvador's eligibility for aid.

It is pretty meager progress. The guardsmen contend they were acting under orders, but inquiry into that proposition is being actively discouraged by their superiors. Indeed, the victims' relatives say they have been warned by Salvadoran lawyers that the only way to guarantee conviction of the accused is "to refute the claim that others were involved." To all appearances, the five are sacrificial offerings.

But even this semblance of progress required a vocal American threat, an overt charge by Deane Hinton, the United States Ambassador, that Salvadoran justice hardly exists. He called attention to the unpunished slaughter of 30,000 civilians. The Ambassador was rebuked by unnamed White House sources, but he was left at his post, a powerful witness when Congress next inquires into Salvadoran rights.

Real progress will come only when an immune officer caste is finally held accountable for its part in the killings. The Reagan Administration cannot plausibly certify Salvador's eligibility for aid under American law if its courts do nothing about the higher-ups who ordered the murder of two American land reform advisers and a peasant leader in 1981. It was the release of a key suspect, a crony of Assembly President Roberto D'Aubuisson, that broke Mr. Hinton's patience.

More than American moralism is at stake. In a bitter civil war, many crimes will go unpunished. But when a government proves incapable of curbing the worst excesses of its own forces it converts its own population to the guerrilla cause. For El Salvador's sake, no less than ours, progress on human rights is a valid touchstone for aid.●

HON. JACK BRINKLEY

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. ANDERSON. Mr. Speaker, I am honored to rise today to say a few words on behalf of one of the most distinguished Members in the House of Representatives, my friend and colleague, JACK BRINKLEY.

It has been my pleasure to serve the last 14 years with JACK. During that time he has proven to be a brilliant and dedicated legislator. His work on the Armed Services Committee, where he has chaired the Subcommittee on Military Installations and Facilities, and on the Veterans' Affairs Committee has been exceptional and he has driven himself to produce legislation of lasting benefit not only to his constituency but the entire Nation.

I know how much time and effort JACK devoted to the American people through his untiring efforts in fulfilling his committee responsibilities. He has been forthright and forceful when stating his positions. All those who understand the workings of Congress will agree the JACK is one who truly represented his constituents and got things done.

Through my position as chairman of the Subcommittee on Surface Transportation, I have a personal knowledge of the good job JACK has done for the people of Georgia. Of particular notoriety has been JACK'S continued involvment in the development of Corridor-Z in Georgia. This highway, which was designated as a priority primary road and thus became eligible for Federal aid in 1981, stretches approximately 250 miles from the city of Columbus to the city of Brunswick—which is situated on the Atlantic Ocean. It has been

JACK who has kept a close eye on Corridor-Z all these years and has shepherded its development. The project has become a great asset to the State of Georgia and its residents—thanks to JACK BRINKLEY.

When the 98th Congress convenes in January, you can be sure that JACK's presence and friendly disposition will be greatly missed by all of us who have had the pleasure of serving with him. JACK has been a good friend of ours through the years and he has shown enormous wisdom in understanding the needs which face the people in the State of Georgia as well as the other 49 States.

My wife, Lee, joins me in saying farewell to JACK, and we wish him and his wife, Alma, and their two children, Jack, Jr., and Fred, all the best in their future endeavors.●

RUSSIANS ARE READY, AMERICANS ARE NOT

HON. LARRY McDONALD
OF GEORGIA
IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. McDONALD. Mr. Speaker, the new national newspaper, USA Today, conducted an interview with Dr. Edward Teller, the father of the H-bomb, which appeared in its November 3, 1982, issue. In response to questions, Dr. Teller discussed the need for more defensive weapons for the United States, such as a better civil defense, and weapons to defend against attack by nuclear missiles. These are life and death matters for the United States. We need to stop throwing up our hands and saying nothing can be done. As he points out, we avoid war by deterring it, not by disarming.

The interview from USA Today follows:

[From USA Today, Nov. 3, 1982]

RUSSIANS ARE READY, AMERICANS ARE NOT

(Edward Teller, 74, is known as the principal architect of the hydrogen bomb. Teller, who studied with Neils Bohr, worked on the Manhattan Project in 1949 at the Los Alamos Laboratory, which developed the atomic bomb. He coauthored The Constructive Uses of Nuclear Explosives. Teller was interviewed by USA Today's Wallace Terry)

USA TODAY. Do you really think mankind is stupid enough to start a nuclear war?

TELLER. There is nothing in the world that is as clever or as stupid as people.

USA TODAY. Why do you believe the Russians would win a nuclear war if one occurred today?

TELLER. Because they are prepared, and we are not.

USA TODAY. How do we stop other nations from developing nuclear weapons? Isn't the world becoming more dangerous with that kind of proliferation?

TELLER. I have tried to emphasize that the best way to avoid war and create peace is not by control of the instruments of war, but by the control of the cause of war.

USA TODAY. What is your basic objection to the bilateral freeze approach to arms control?

TELLER. It makes no sense. It talks about a purely imaginary situation. It makes just as much sense as praying for rain.

USA TODAY. Do you think the public can and should effectively participate in the nuclear arms debate?

TELLER. The public should participate in every important debate. But the public should also be informed. As long as the information is not available under the rules of secrecy, participation by the public will do much more harm than good.

USA TODAY. With enough nuclear weapons in the U.S. arsenal alone to destoy the world, why do you advocate a stronger arsenal to protect us against the Russians?

TELLER. You say there are enough weapons in our arsenal to destroy the world? That is a myth. I am advocating more defensive nuclear weapons. And defensive nuclear weapons so far, practically, do not even exist in our arsenal. The distinction between weapons of destruction and weapons for defense, between weapons of crude power and weapons that are sophisticated—this is an exceedingly important distinction we should make.

USA TODAY. If we have more nuclear weapons and greater accuracy in delivering them than the Russians do, then why aren't we in better shape than they are?

TELLER. I don't know that we are better able to deliver.

USA TODAY. You have spoken of a new secret weapon in early stages of development which can prevent a successful Soviet attack. Doesn't that kind of development simply encourage the Russians to scramble for more weapons?

TELLER. I have spoken of several new defensive weapons, which can prevent a Soviet attack. It might encourage more Russians development. And they may even succeed in countering ours, provided they spend 10 times as much on offensive weapons as we are spending on defensive weapons. But they won't be able to afford to do that.

USA TODAY. You have urged the CIA to release information about Soviet civil defense systems. If it did, what would we learn, what would we do as a result?

TELLER. We would understand why the Soviets have spent more than $1 billion every year on civil defense, and why the Soviet people are safer than the American people. We should be able to evacuate our cities when we see that the Soviets have started to evacuate theirs. I don't believe the Soviets will dare attack us without evacuating part of their population. But we have a strong economy. We certainly have many more cars. If we are organized, then we can start the evacuation later and finish it earlier than the Soviets. If we don't have this system of counter evacuation, then the Soviets may evacuate and attack. If we do have it, the Soviets will not try.

USA TODAY. If, as you say, the cobalt bomb is a figment of the imagination, can there be a weapon more powerful than the H-bomb?

TELLER. The cobalt bomb is not supposed to be more powerful. It is designed to increase the radiation hazard—not for a military purpose, but for the specific purpose of maximum, lasting death. In its very conception, the cobalt bomb is an absurdity. Only people who are trying to make nuclear weapons appear absurd even talk about the cobalt bomb.

USA TODAY. How do you make a nuclear war safe?

TELLER. By avoiding it. And I avoid it partly by agreement with the pastoral letter not to start it, and partly by urging the kind of defenses which will dissuade the Soviets from starting it.

USA TODAY. The anti-nuclear lobby always dwells on the enormous destruction that nuclear war would mean, beyond the impact of the explosions.

TELLER. That is an exaggeration of a terrible damage. They paint pictures of the end of the human race, or even the end of life on Earth. Now there is something in most grownups that makes us listen to horror stories. Many of the old fairy tales bear witness to that. The horror movies do. It is to these instincts that the anti-nuclear crowd caters. I don't think it is realistic to frighten Americans away from war.

USA TODAY. But they say that life would be unbearable after a nuclear war. Could you live in such a world?

TELLER. One of the basic laws of life is that it wants to continue. You and I have the choice of ending our lives, and we don't. Everybody has gone through periods of despair and survived. If the Soviets were to win, I may not want to live. But I prefer to think that even under those circumstances, I would like to find a way to stay alive and work for the future.

USA TODAY. What is your idea of a safe world?

TELLER. I know how an unsafe world looks, because I am from a part of Europe caught between the Nazis and the Communists. For me a safe world, relatively speaking, is the United States. But anything like absolute safety does not exist. I cannot imagine it.

USA TODAY. When the first bomb was tested, Robert Oppenheimer recalled that a few people laughed, a few cried, most were silent. How did you react?

TELLER. I was impressed.

USA TODAY. In Oppenheimer's mind there floated these words from the Bhagavad-Gita in which Krishna says, "I am become death, the shatterer of worlds." Do you consider yourself one of the creators of our destroyer?

TELLER. Robert Oppenheimer and I were certainly very different kinds of people.

USA TODAY. In 1954, you opposed granting Oppenheimer security clearance during a hearing before the Atomic Energy Commission. That caused him great damage and you great hurt because many of your colleagues shunned you. Later you supported his nomination for the Fermi Award, but he didn't recover his full reputation before his death. Should more be done to restore it?

TELLER. Oppenheimer did a wonderful job as director of Los Alamos, a job which I have never seen equaled. What he did after the war, I disagreed with. It is far beyond my understanding why he would have done such things. He was so complicated as a person that I did not understand him. And where I cannot understand, I have to stop talking.

USA Today. Have you fully recovered from the controversy, physically and mentally?

TELLER. Whether I have recovered, I don't know. And it doesn't matter. I believe the United States has not recovered. The Oppenheimer case introduced a deep division among scientists: the majority which will not work on military problems, and the minority—to which I belong—who do.

USA Today. Why do you object to being called the father of the H-bomb?

TELLER. I don't care what I am called. But the H-bomb has never sent me a Father's

Day card. To mix biological metaphors with the serious questions of war and peace is not only inappropriate, but in horribly bad taste.

USA Today. Dr. Teller, here are two last questions.

TELLER. I am objecting to two last questions. There seems to be a problem there in mathematics and logic.

USA Today. Agreed. What would you like to be remembered for?

TELLER. I am not interested in being remembered.

USA Today. This is the last, last question. What would you insert into a capsule to be sent into space so that life elsewhere could understand our civilization? A book? A work of art? A piece of music? An invention?

TELLER. I will give you an answer I haven't given you yet: I don't know. You are asking me how to talk to some entity, which might possibly exist, which probably exists, but of which I don't have the slightest conception. You are talking of things of which science fiction is made. As a very young man I played with the idea of writing science fiction. I found that science is so much more interesting than fiction. Rather than thinking about your space capsule, I'd rather think about the real problems of science and other fields. And that doesn't leave me any free time at all.●

MY COLLEAGUE—ED DERWINSKI

HON. ROBERT McCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. McCLORY. Mr. Speaker, I would be less than candid if I did not acknowledge the outstanding talents which my colleague from Illinois, Congressman ED DERWINSKI, has brought to this great legislative body. As the ranking member on the Post Office and Civil Service Committee and as a prominent minority member of the House Foreign Affairs Committee, Congressman DERWINSKI has made major contributions to the legislative product and the policy decisions of our Nation during his 24 years of exemplary service. ED DERWINSKI's colorful debate on the floor of the House of Representatives has always commanded the attention of his colleagues as he exploited his special talent for interspersing good humor and inoffensive sarcasm in the arguments which he advanced. The results were generally consistent with the position which he held and I was normally one of those who followed ED DERWINSKI's lead.

The partisan and unjust congressional redistricting which is the principal reason for ED DERWINSKI's and my demise from futher congressional service involved some unfortunate disagreements. While there is some chance that the Illinois General Assembly might adopt a congressional redistricting plan which would supersede the map developed individually by the Democratic leader of the Illinois House, it appears that ED DERWINSKI and I have come to the end of our long service in this body.

Mr. Speaker, I wish my colleague ED DERWINSKI every success in his new and important role as Counselor of the Department of State. His services, particularly on the Foreign Affairs Committee and as the leading Member of our Congress in the affairs of the Interparliamentary Union where he and I have served for many years, combine to provide ED DERWINSKI with exceptional experience, wisdom, international contacts and other qualities which can enable him to continue his public service in behalf of our Nation.

Mr. Speaker, I wish also to take note that ED DERWINSKI and his wife, Pat, as well as my wife, Doris, and I have had cordial social relations during our years together in the Congress and particularly as we have participated in the numerous Interparliamentary Union conferences in various national capitals around the world. Congressman ED DERWINSKI's service is deserving of high commendation and appreciation as he transfers his talents and energies from this House to the Department of State.●

A NEW ROLE FOR COMMUNITY COLLEGES

HON. CARL D. PURSELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. PURSELL. Mr. Speaker, I would like to take this opportunity to read into the CONGRESSIONAL RECORD an editorial by C. Nelson Grote, district president of Washington Community College District 17 in Spokane, Washington. In his editorial, published in the Community and Junior College Journal this month, Dr. Grote points out that this Nation's community colleges could play a significant role in developing a Federal policy for disseminating Federal technological research and development. I have known Dr. Grote for numerous years, and know that when he was president of Schoolcraft College in Livonia, Mich., his opinions were highly regarded. I proudly present the following editorial to the CONGRESSIONAL RECORD in hopes that my colleagues will give serious consideration to Dr. Grote's ideas.

The article follows:

TECHNOLOGY TRANSFER EXTENSION SERVICE

Billions of dollars are being spent annually in federally sponsored research and development. Just as in higher education, dissemination of research results is often ineffective. Technology transfer (the transfer of the technology resulting from research) has the potential of increasing our productivity as a nation, yet it is difficult to disseminate the technology to local users, especially small business. While federal R&D can and should affect the business and industrial community at the grass-roots level, the R&D community is not responsive to local needs. It is focused in Washington, D.C., because of funding sources. What is needed is a delivery system that interfaces the R&D community with people and problems at the local level. Such an interaction has the potential of making a substantial contribution to our sagging economy, putting America back to work, and repositioning the United States in the field of technology.

Most of us are familiar with the Morrill Act of 1862 that established land-grant colleges in America—the beginning of the agricultural and mechanical arts in higher education. The need for agricultural research in the new country where agriculture was dominant became increasingly apparent in the nineteenth century. The pressure grew until Congress again responded in 1887 with passage of the Hatch Act. This act authorized the establishment of an agriculture experiment station in connection with one of the colleges in each state established under the Morrill Act of 1862. Many programs were developed involving the federal government, state government, and local groups and agencies. Out of this period of 1887 into the early 1900's grew a concept the was formalized with passage of the Smith-Lever Act of 1914, which authorized cooperative extension work. The purpose of the act states, in part: ". . . provide educational and technical assistance to 1) farmers, producers and marketing firms on *how to apply new technical developments emanating from agricultural research;* . . ." (italics added for emphasis). The name "Cooperative Extension Service" was derived from a tripartite arrangement of cost-sharing by federal, state, and local units of government. The term "Cooperative" is used to describe the special relationship between the Department of Agriculture and land-grant universities that was further enhanced by the passage of the Smith-Lever Act of 1914. The term "Extension" denotes the process of extending educational resources of the United States Department of Agriculture and the land-grant universities to all citizens in the United States. The term "Service" has come to connote the educational role. It is interesting to note, even in the enabling legislation of 1887 (Hatch Act), the term "diffusing" was used in the following manner: ". . . in order to aid in acquiring and *diffusing* among the people of the United States *useful and practical information on subjects connected with agriculture. . .*" (italics added for emphasis).

There is a lack of societal balance in the federally sponsored R&D enterprise and a concomitant imbalance in the redistribution of the "knowledge of technology"—the application of technology in local business and industry. The same situation was true of agricultural research prior to the passage of the Smith-Lever Act. Therefore, the act talked in terms of ". . . successfully communicating relevant research findings to the people in all walks of life." While the land-grant university was both the source of research and the "broker" of research through the experiment station and the extension services, the transfer of technology also required a broker.

COMMUNITY COLLEGE DELIVERY SYSTEM

A potential "broker" for a national delivery system of technology transfer is already in place, with some variations among the states. There is no need to create a new system—another potential bureaucracy. Instead of the Cooperative Extension Service

based at a land-grant college with counties as its substructure, a cooperative technology extension service based at community colleges, using college districts as its governmental units, has already been created. Just as the Cooperative Extension Service is a grass-roots operation, the community colleges are community-based. We are already providing programs and services to meet the unique needs of local business, industry, and government. Community college resources, both material and human, are already made available and accessible to local business and industry. It would be only natural for the community colleges to become more involved in technology transfer.

It is important to point out that the delivery system should not just serve as an "agent" but as a "catalyst." In other words, not only is it essential that federally funded technology be "looped" back into the free enterprise system but that problems of business and industry, especially small business, be identified as a target area for future research. One of the great strengths of the Cooperative Extension Service was not only to establish the relationship between services and research, which provided channels for the new knowledge, but also to allow human needs and problems to be transmitted to the scientists.

CONGRESSIONAL ACTION NEEDED

It is appropriate and timely that the leadership within the community college movement enter into meaningful dialogue with representatives from Congress and representives from the many federal agencies to share in the development of a cooperative technology extension service. It is hoped that an agreement can be reached that it is in the best interests of this nation that federally funded research and development be brought to bear on the problems of business and industry on an equitable basis and at a minimal cost. Just as the Hatch Act was the way Congress responded to an agricultural economy, Congress needs to recognize the need for industrial research in a technological society by passing a new act, almost 100 years later.

Because states differ, a national system of technology transfer will need to recognize those unique characteristics of the states. While some states have community colleges, others have senior colleges and universities with branch campuses. Highly structured state systems of higher education exist side by side with "non-systems." Some states have a system of area vocational-technical schools while others combine state-operated postsecondary institutions—local and regional colleges within a single state. However, all states have postsecondary institutions, both public and private, which serve major population centers if not the majority of an entire state. Therefore, the common denominator is the availability of postsecondary educational institutions.

It is clear that a cooperative techology extension service must be educationally based. It is also clear that States that have comprehensive community colleges already have a potential delivery system—a structure into the grass roots of their respective service areas and communities that could be used immediately. Just as the National Association of State Universities and Land-Grant Colleges has provided the vehicle for State land-grant institutions to work with one another and with the Department of Agriculture, the American Association of Community and Junior Colleges not only has the ability to bring together the more than 1,200 community colleges throughout the nation, but could also serve as the liaison with appropriate Federal agencies in Washington, D.C.

The responsibility for technology transfer could not only serve as our challenge in the eighties, but could enhance our relationships with the business and industrial community and contribute to the economic development of our respective States as well as the Nation. In addition, this could be another way for community colleges to play an important role in high technology.●

NUCLEAR ARMS RACE—A THREAT TO HUMANITY

HON. HAROLD WASHINGTON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. WASHINGTON. Mr. Speaker, I call to the attention of my colleagues a petition signed by 3,300 college and university faculty in the Chicago area, protesting the continuation of the nuclear arms race.

These thoughtful men and women were quick to understand the dangers inherent in an unrestrained arms race. They have recognized the threat posed to densely populated areas such as Chicago, which are likely to be among the first targets in any nuclear exchange. And they are equally mindful of the drain that unrestrained military spending places on the civilian economy.

I was very pleased to accept their petition, which reads as follows:

We, members of the higher education and research community, believe this is the time to take action.

Our work of teaching and research is directed to the future, but the mounting risk of nuclear holocaust puts the future in doubt.

Nuclear weapons offer no solution to the political, economic, and ideological conflicts between the United States and the Soviet Union.

Spearheaded by the nuclear arms race, world military expenditures now total $550 billion per year, while global economic, social and environmental problems go unremedied.

Therefore, we call on all members of the higher education and research community in the United States and other nations to press all governments for an immediate and complete freeze on all further testing, development, production and deployment of nuclear weapons:

And, as Americans, we call on our Congress and President to propose to the Soviet Union and all other governments an immediate and complete freeze on the nuclear arms race.

Following are excerpts from my remarks to the Council of the Chicago Area Faculty for a freeze on the nuclear arms race (CAFF) made after receiving the petition from Dr. Ronald Williams, president of Northeastern Illinois University:

President Williams, I am happy to receive from you these petitions to the Congress, signed by 3,300 faculty members of the Chicago area higher education community, that call for a mutual freeze on the U.S.-Soviet nuclear arms race. I also want to thank Professor Truman Morrison of the McCormick Theological Seminary and chairperson of C.A.F.F., for inviting me to speak before this concerned and responsible group of educators.

What you have done is most impressive as well as reassuring for our common future. Starting in January, you have already gained more than 700 faculty members and brought the nuclear freeze campaign to 40 college and university campuses in the Chicago area. During my years in Congress, I have been a wholehearted supporter of efforts to slow down and completely halt the further building of nuclear weapons by the nations of the earth. I can report to you that the movement which has caught fire this spring throughout the country has also caught fire in Congress—we are no longer a small and lonely band.

But the forces that propel the nuclear race are still very formidable, and the pioneer work you have started in higher education must continue and grow if we are to overcome these forces. I know that you are as fully aware as I am that a mutual halt to nuclear weapons building will not only enhance our chances for survival but will also free up billions of dollars to meet such vital needs as education, health, housing, mass transportation, and environmental protection, among others.

I urge you to continue your efforts; the vigorous and expressed support for the freeze proposal by the American academic community can have a marked influence on many Members of Congress.●

HON. ROBERT H. MOLLOHAN

HON. DAN DANIEL

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. DAN DANIEL. Mr. Speaker, most of us, had the choice been ours, would not be here on this particular day. Given a say in the matter, we would not have returned to Washington until the beginning of the 98th Congress.

But we are here. And in one respect, at least, it is a good thing, for it provides us an opportunity to recognize publicly those of our number who will not return.

Today we are saying publicly what most of us have said privately for years now regarding our valued colleague, the Honorable ROBERT MOLLOHAN.

BOB MOLLOHAN is a man for whom the adjectives of virtue were invented. He is a wise man, never pushing his views on you, but always willing to share his good judgment. He is a conscientious man, as reflected by his able service in the Congress, on the Armed Services Committee, and in a number of public capacities over a lifetime.

Congressman MOLLOHAN's advice and counsel has been invaluable to me, and I, like all who have known him these

past 14 and more years, will miss him when we convene again.●

TRIBUTE TO MEMBERS OF THE PENNSYLVANIA CONGRESSIONAL DELEGATION WHO ARE CONCLUDING THEIR SERVICE IN THE HOUSE OF REPRESENTATIVES

HON. WILLIAM J. COYNE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. WILLIAM J. COYNE. Mr. Speaker, when the 98th Congress convenes in January, three able Representatives from the Commonwealth of Pennsylvania will not be among its number. Their contribution to this Congress, and others before it, was such that we most surely will feel their absence.

Representative ALLEN ERTEL made his mark as district attorney in Lycoming County before he came to Congress in 1977. Elected as a Democrat, against great odds, in Pennsylvania's 17th Congressional District, he courageously took up his party's standard in an uphill race for Governor in 1982. Again, against great odds, he did extremely well. ALLEN was always willing to assist new Members of Congress, including myself, in learning the ways of the House of Representatives. His public service, I know, is not yet at an end.

Representative DON BAILEY of the 21st District is typical of western Pennsylvania residents. An excellent football player at the University of Michigan, DON is also a veteran of the Vietnam war. He has made the needs of veterans of that conflict among his top priorities since coming to Congress in 1979. Well-liked by his colleagues, he has made a major contribution to this body.

Congressional redistricting contributed to Congressman BAILEY's leaving the House. It also eliminated a congressional seat on the eastern side of our State, depriving us of the service of Representative JOE SMITH. JOE's past elected positions in Pennsylvania government made him very effective during the all too short period of time he served in the Congress. A real gentleman who knows well the governmental and political process, and acts accordingly, JOE will be missed.

Each of these men added to the dignity and knowledge of this body. They will contribute in like manner in whatever endeavor each chooses. Their colleagues in that work will be, as we have been, the better for their association with Representatives ALLEN ERTEL, DON BAILEY, and JOE SMITH of Pennsylvania.●

TRIBUTE TO HON. EDWARD J. DERWINSKI, HON. PAUL FINDLEY, HON. ROBERT McCLORY, AND HON. TOM RAILSBACK

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. CONTE. Mr. Speaker, I would like to take this time to acknowledge the achievements of four of my fellow Republican Congressmen who will be leaving us at the end of the 97th Congress. On small consolation we other Republicans can take in our loss of these four fine Members from Illinois is that the two sponsors of this special order, Mr. MICHEL and Mr. ERLENBORN, will be contining their fine work in the 98th Congress.

ED DERWINSKI and I entered the Congress together in 1958. Since that time, ED has done a fine job representing the people of Illinois' Fourth Congressional District and, unfortunately, the redistricting of Illinois have cost us one of our most compassionate and knowledgeable Members. A high-ranking member of the Foreign Affairs Committee, ED has been the most outspoken advocate for human rights for those behind the Iron Curtain. The people of this Nation whose families were able to flee Soviet oppression owe ED great debt of gratitude for having served as a watchdog of russification efforts by the Soviet Union in Eastern Europe. As the ranking minority member of the Committee on Post Office and Civil Service, ED has worked diligently to insure the existence of an efficient, competent Federal work force, and a national mail service second to none in the world. ED's many talents, as well as his affable nature, will be sorely missed in the next Congress.

Fellow Congressman PAUL FINDLEY has been a man of strong convictions who has faithfully served the 20th District of Illinois and the Nation since 1960. His work on the Agriculture and Foreign Affairs Committees has been diligent and sensitive, and the expertise he has developed over the past 22 years will not be easily replaced. I wish him all good fortune in whatever endeavors he chooses to pursue.

Retiring after 20 years of service to Illinois' Third District, is my colleague BOB MCCLORY. During his tenure in the House, BOB rose to the position of ranking minority member of the House Judiciary Committee, and played an important role in that committee's Presidential impeachment hearings in 1974. He has also served with distinction on the Select Committee on Intelligence, where his integrity and fairmindedness have been exemplary.

At this time, I would also like to laud the accomplishments of the Congressman from the 19th Illinois District, TOM RAILSBACK. TOM joined our ranks in the election of 1966, and for many years was a stalwart of my Republican baseball team. His concern for maintaining the integrity of this body manifested itself in the formulation of the Obey-Railsback bill, which would have gone far to reduce the influence of special interest groups in the Congress. His expertise in this field will be greatly missed, as the cost of campaigns climbs ever higher. I hope that TOM knows he is welcome back on my bench at any time.●

H.R. 6514

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mrs. SCHROEDER. Mr. Speaker, H.R. 6514, the Immigration Reform and Control Act of 1982, has been called a balanced and fair approach to immigration reform. I do not believe that H.R. 6514 is either balanced or fair. I appreciate the hard work that the authors have dedicated to this bill. However, the bill is not balanced and can not be fair until it includes provisions considering foreign policy aspects of immigration reform. It would be potentially disastrous for the United States to restrict itself blindly to the domestic results of immigration. U.S. domestic and foreign policies have become intertwined.

The newly installed president of Mexico, Miguel de la Madrid Hurato, has called the economic state in Mexico an "intolerable * * * emergency situation." There exists a delicate economic relationship between the United States and our Latin American and Caribbean neighbors. We must be responsible and not ignore the basic causes that drive people to leave their families and homes and emigrate to America.

Editorial boards across the Nation have inferred that H.R. 6514 is a legislative compromise that enjoys universal support. This is not true. H.R. 6514 barely survivied a vote in the House Judiciary Committee to recommit the bill for further consideration. And groups across the country have urgently called for revisions to the Simpson-Mazzoli bill.

I submit below a paper by the National Council of the Churches of Christ in the United States. The council represents churches and religious leaders from all parts of the United States. H.R. 6514 does not have the support of the Council of the Churches of Christ. H.R. 6514 does not hold the support of many of the American people. I hope my colleagues read the

points made in the paper. And then, together, we can act responsibly and refine H.R. 6514 to acknowledge the great importance that foreign policy holds in immigration reform.

NATIONAL COUNCIL
OF THE CHURCHES OF CHRIST,
Washington, D.C.

DEAR REPRESENTATIVE: Since Congress began debating H.R. 6514, we in the religious community have maintained certain reservations:

(1) The bill will not accomplish its stated objectives of protecting the rights of American workers;

(2) It does not adequately solve the problem of illegal immigration;

(3) The bill does not protect the rights of minority communities in the United States.

While much in the Simpson/Mazzoli revision is to be commended—implementing a legalization program, improving the asylum procedures by creating an independent Immigration Board—we strongly feel that our reservations have not been well considered and that should this bill become law the result will damage the interests of the American worker and of American foreign policy.

We appeal for a more generous legalization. While we are pleased that the bill provides a legalization program for some undocumented aliens already in this country, this bill falls significantly short of addressing the situation comprehensively and fairly. We encourage consideration of the following:

(1) The 1980 cutoff date leaves exploitable a group of hundreds of thousands of undocumented workers who arrived after 1980;

(2) Elimination of the "Temporary Residence" status, giving all aliens the status of "Permanent Resident". A two-tiered approach complicates an already difficult program and at the same time creates a subculture of "second-class" residents;

(3) Full rights and privileges as granted by current law to Permanent Residents should be retained for all those legalized. H.R. 6514 limits significantly the eligibility for federal benefits to those legalized as both permanent and temporary residents. It is important to note, as did Representative Rodino, that undocumented aliens have been contributing to the federal benefit programs through their taxes for years.

(4) Persons eligible must be granted one year from the actual start of the program to apply for legalization.

In sum, the legalization program in its present form will not accomplish the desired results. Both illegal immigration and the wider community of citizens will be harmed by maintaining a large number of illegal aliens who are easily victims of exploitation.

Our organizations oppose the employer sanctions provisions in H.R. 6514 and we urge adoption of the Schroeder amendment as a complete substitute for the current provisions. The sanctions as drafted in H.R. 6514 will result in discriminatory hiring and recruiting practices. The Schroeder substitute targets only those employers with a pattern and practice of hiring undocumented workers, thereby:

(1) Eliminating an unnecessary burden for the vast majority of innocent employers;

(2) Reducing the incentive for ethnic discrimination among employers;

(3) Permitting closer supervision of employment practices by the Attorney General since a smaller number of employers are covered.

We oppose the proposed changes in the H-2 Temporary Foreign Worker Program. A temporary worker program must respect the rights of U.S. citizens and permanent residents. The H-2 program does not show that fairness. Enlargement of the H-2 program permitting up to 300,000 foreign workers to take jobs in the U.S. at a time when unemployment is at a post-war high of 10.4 percent is clearly unfair to the 11 million unemployed workers in this country. The temporary worker program is equally unfair to migrant workers who have struggled for many years to achieve more humane living quarters and better wages.

We strongly support the House Judiciary Committee's proposal for the creation of an independent and Presidentially-appointed U.S. immigration Board to serve as the appellate administrative body and to be responsible for the appointment of the newly authorized "administrative law judges" and their specialized training to hear asylum cases. We further agree with the Committee that "exceptional protections are in order in asylum cases since they quite literally involve matters of life and death." For that reason, we believe that other measures of the bill, intended to speed the hearing process, must be reviewed against this consideration.

Specifically we fear that:

(1) The non-adversarial, summary exclusion provisions (Sec. 121) do not adequately take into consideration the fact that bona fide refugees are usually unable or unwilling to articulate the specific fears of persecution necessary to trigger the asylum process and its accompanying due process protections. It is imperative that they be uniformly informed of both the rights to counsel and of the rights to request asylum prior to exclusion proceedings. Frivolous claims would fail at a hearing on lack of evidence.

(2) By precluding the possibility of bringing class actions before the district courts to challenge widespread errors, the asylum process will result in unnecessary delay and expense as hundreds or even thousands of cases are first processed individually through all administrative remedies, after which, circuit courts could require a complete re-hearing.

CONCLUSION

The religious community is fully aware of the need to revise the current immigration laws and we support efforts to do that. We are concerned, however, that the Simpson/Mazzoli bill ignores international and U.S. foreign policy considerations. Immigration cannot be viewed in isolation. Rather it must be analyzed in a global context, with appreciation given to the conditions of poverty, political repression, and economic deprivation which force people to leave their homes. Long-term immigration policy planning should have as its goal not only the immediate U.S. domestic response, but also U.S. international interests in an increasingly unstable world. Failure to do just this will lead us into crisis situations for which we have no response.

On behalf of:

Mary Anderson Cooper, Associate Director, National Council of Churches.

Dale de Haan, Director, Church World Service.

William L. Weiler, Director, Episcopal Church.

James Schultz, Associate Director, Jesuit Social Ministries.

Ingrid Walter, Director, Lutheran Immigration and Refugee Service.

Robert Tiller, Director, America Baptist Church.

Edward R. Killackey, Director, Maryknoll Fathers and Brothers.

Ralph Watkins, Legislative Associate, Church of the Brethren.

Robert Z. Alpern, Director, Unitarian Universalist Association.

Ms. Joyce V. Hamlin, Executive Secretary for Public Policy, Women's Division, United Methodist Church.

Alfonso Roman, Chairperson, United Church of Christ Immigration Working Group.

Harold Penner, Director, U.S. Program for the Mennonite Central Committee.

Mary Jane Patterson, Director, United Presbyterian Church in the U.S.A.●

MONTGOMERY COUNTY HISPANIC SENIOR CITIZENS

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. BARNES. Mr. Speaker, the Montgomery County government has honored 12 Hispanics for their outstanding service on behalf of Hispanic senior citizens. They are: Roberto Anson, Maria Theresa Arias, Irene Bailey, Mary Berkey, Vicente Guerra, Rafael Hakim, Emilio Perche Rivas, Elsa Pimental, Pedro A. Porro, Miryam Posada, Rogelio Quincoses, and Inez Williams. I want to share with my colleagues the following article from the Montgomery Journal newspaper on this event:

[From the Montgomery Journal, Sept. 22, 1982]

HISPANIC SENIOR CITIZENS HAVE THEIR OWN SPECIAL PROBLEMS

(By Roberto Anson)

The popular picture of the Hispanic family is: mother, father, children and grandparents, all living under the same roof. Therefore, why should public and private agencies serve the Spanish speaking elderly since most of them are cared for by relatives?

This is a myth, and it is the most pervasive barrier to serving the special needs of this underserved segment of the county. The Census Bureau reports that only 9.7 percent of Hispanic elders live in an extended family situation and fully 60 percent live in husband-wife arrangements and another 30 percent live alone.

Hispanic and minority elders are widely recognized as exposed to multiple jeopardy due to age, race, ethnic origin, cultural and language differences, discrimination and widespread stereotyping. Hispanic elders are characterized by diversity, rapid growth, Spanish language dominance, low income and poorer health.

Older Hispanics are more than twice as likey to live in poverty as other aged members of our population. The average life expectancy for Americans in 1900 was also 47. The life span of Hispanic elders is between 55 and 59, contrasting with that of 73 years for the average person today.

In contrast to most Hispanics nationwide who are Mexican-American, those living in Montgomery County and in the surrounding region are primarily Central and South

American with large concentrations of Cubans and Puerto Ricans.

Data on Hispanic elders is scarcer than water in a desert, which perhaps mirrors the attitude of the rest of society toward this group. The precise number of Hispanic elders living here is unknown, but their size can be estimated by recognizing the fact that elderly Hispanics 55 and over nationwide more than doubled from 4 percent in 1970 to 9.8 percent following the 1980 census. During this same period the Hispanic community swelled by 60 percent nationwide and 37 percent in the northeast. Maryland's Hispanic elders 65 and over number over 3,000. About 60 percent of Maryland's Hispanic community lives in Montgomery and Prince George's Counties with Montgomery having the largest Hispanic concentration with almost 23,000 by government sources or 30,000 by other estimates.

The demographic growth of the Hispanic presence is beginning to evoke a response. For example, an awards ceremony honoring the outstanding contributions of Hispanic elders to the community was scheduled to take place today at the Holiday Park Multiservice Senior Center in Wheaton (3950 Ferrara Dr.) from 1-2:30 p.m. This appears to be the first government organized recognition of Hispanic elders and as such seems to represent a new awareness by local officials.

The increase in the Hispanic community and in the senior population must be matched by an equally vigorous approach to addressing their needs and problems. Some solutions to serving our Hispanic elders include funding Hispanic agencies to serve the minority elderly, public and private groups engaging in aggressive outreach services using bilingual-bicultural staff, establishing linkages with Catholic and religious institutions as well as maintaining contact with stores and events frequented by the Spanish elderly. The only Spanish radio station in the metro area is Radio Mundo (AM) in Wheaton, which is another effective method for reaching the Hispanic community.

Rogelio Quincoses, a tireless worker who helps the Hispanic elderly by volunteering his time with the Spanish Speaking Community of Maryland based in Silver Spring and who serves on the County Commission on Aging, believes that one way to improve the quality of life for the Hispanic elderly is for service providers to seek out and inform the elderly of available services. Elsa Pimental, a respected civic activist and a worker at the TESS Center in Takoma Park, states that "the most urgent need is to supplement the meager income of Hispanic elders and to better meet their health, housing and transportation needs."

Hispanic elders struggle to survive under triple jeopardy: they are old, poor and they are members of a minority group. The elderly symbolize our future selves. Hispanic elders, like all of us, desire to become managers of their own destiny.

The central question remains whether we Hispanics, young and old alike, will continue to grow in number but not in prosperity. The answer depends on the humane and ongoing response of the community.●

WHEN WILL JUSTICE BE SERVED FOR FOUR AMERICANS MURDERED IN EL SALVADOR

HON. WILLIAM R. RATCHFORD

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. RATCHFORD. Mr. Speaker, it was 2 years ago today that four American religious workers were abducted and murdered after leaving the airport near San Salvador to return to their work in the countryside. In the 2 years that have followed this tragedy, the families of the four murdered women have kept alive the hope that those involved in this crime would be brought to justice. Regrettably, their hopes have been dashed, and their sorrow has been compounded with bitterness toward the treatment they have received not only from Salvadoran authorities, but from officials of our Government as well.

Two years later, the families have little more than a promise that five underlings who may have taken part in the executions may be brought to trial early next year. Two years later, their pleas for an investigation into upper level involvement in the murders have fallen on deaf ears. Two years later, instead of getting answers to the questions they have asked our Government, they have been shunned, lied to, and threatened.

The fact that there have been no answers—that justice has not been served for these crimes—should give us pause when considering whether to send El Salvador further military assistance. The picture becomes even worse, however, when the story behind the delays in the investigation is brought to light.

Mr. Speaker, I have the privilege of representing Michael Donovan of my hometown of Danbury, Conn. Michael Donovan's sister, Jean, was one of the religious workers slain 2 years ago. The Donovan family's story—and it's a story shared by the kin of the three other murdered women—since the murder of their loved one makes her death even more tragic.

After the deaths of the four women, the families asked the U.S. State Department to launch a full investigation into the murders. The Salvadoran Ambassador at the time expressed concern that more was involved in the slayings than met the eye. Tragically, the question of involvement of higher officials was at best ignored by Salvadoran and American officials when new faces took over here in early 1981. The questions raised by the families put large holes in the contention that only the five accused Salvadoran national guardsmen were involved. Those questions, however, have largely been ignored or answered with distortions by our own Government officials.

Mr. Speaker, it is a tragedy that 2 years after the deaths of Jean Donovan, Ita Ford, Maura Clarke, and Dorothy Kazel, we can stand in this Chamber and say that justice has not been served in this case, and that the murder of four Americans in El Salvador has been ignored for the sake of political considerations. There is no way we can ever restore for the families the loss they have all experienced over the last 2 years. There is a time, however, to say "enough is enough." I think we are well past that point. It is high time to rethink our support for a government that has no concern for our own people.●

NUCLEAR POWER IS NOT SCARY, THESE REACTORS ARE

HON. STEPHEN L. NEAL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. NEAL. Mr. Speaker. I would like to bring to the attention of my colleagues a refreshingly candid article about the U.S. nuclear energy industry which appeared in the Washington Post last Sunday. The author, Mr. S. David Freeman, Managing Director of the Tennessee Valley Authority, is singularly qualified to speak on the subject. TVA is the single largest user of nuclear power in the United States.

Mr. Freeman contends that nuclear energy critics should not be blamed if the nuclear industry collapses. Rather, its demise would be the fault of the industry itself, which has stubbornly clung to a fundamentally flawed technology. Lightwater reactors, which provide almost all nuclear power in this country, according to Freeman, are unreliable, inefficient, and dangerous. The American public's fears about nuclear energy, says Freeman, are well-founded.

Although severely critical of the nuclear industry, Mr. Freeman still believes we should not "throw out the baby with the bathwater." Rather than simply scrapping nuclear power, safer and more efficient nuclear technologies should be pursued. The Swiss PIUS concept and the high temperature gas-cooled reactor are but two examples of promising technologies. Mr. Freeman argues they should be given more serious consideration by the U.S. nuclear industry and the Federal Government.

Mr. Speaker, for too long we have depended on the "experts" in the nuclear industry to guide our national nuclear energy policy. It is time that we admitted we got bad advice and took a fresh look at this source of energy and the Federal role in promoting it. There are many who believe nuclear energy should be abandoned and

many who would have us forge ahead on our present course. Mr. Freeman offers a balanced alternative. I urge my colleagues to seriously consider his proposal.

The article follows:

WE IN THE INDUSTRY AND OUR CRITICS HAVE BOTH BEEN WRONG

(By S. David Freeman)

As the last militant neutral on the subject of nuclear power, and as a managing director of the nuclear industry's best customer—the Tennessee Valley Authority—I want to tell the industry's advocates that their basic argument these days is wrong.

Both the industry and its critics agree that the nuclear option is in serious trouble. Where the industry goes awry is in the cause of its demise. What's killing it is not the Nuclear Regulatory Commission or the media or Ralph Nader or Jane Fonda. It is their product itself. The nuclear industry is stonewalling the hard evidence that they need to change the design of their reactors.

The litany of nuclear reactor cancellations throughout the United States is a long one. Between October 1980 and June 1982, plans for 21 were abandoned—more than one a month. When I joined the TVA in 1977, 14 large ones were under construction, the nation's most ambitious nuclear power program. Over the past four years, we completed two reactors, but halted work on eight others because the cost of making them safe was simply going to be too much.

The nuclear industry will lose credibility altogether if it persists in trying to blame its problems on an emotional public and a regulatory process overracting to ill-founded fears.

It's time to confess that we went too far too fast in deploying large-scale designs of a reactor type we knew too little about. Right now, we are in the midst of a de facto moratorium on new reactor orders induced by energy conservation, a stagnant economy and the skyrocketing and unpredictable cost of nuclear power.

This period should not be used simply to apply more Band-Aids to existing designs that seem incapable of meeting safety concerns at a price electric consumers are willing to pay.

The last three nuclear units TVA halted were going to produce electricity estimated to cost about 13 cents per kilowatt-hour, more than triple our present average cost of about 4 cents per kilowatt-hour. Furthermore, the number of changes required appears open-ended, since many safety issues are still not really solved. Indeed, in a sense TVA has not really "completed" any of its nuclear plants. At our Browns Ferry nuclear plant in northern Alabama, which has been commercial for years, we still have more than 600 people at work making backfitting changes.

In short, the cost of a new nuclear plant isn't just high, it's unpredictable. No sane capitalist is going to build something for which he can't derive a cost/benefit ratio because the cost in unknowable. That's why the nuclear industry is in the doldrums.

Therefore, what we should be doing is fundamentally reexamining the nuclear option. The central question is: Is there an inherently better technical option than the apparently "unforgiving" reactor design we have today? I believe the answer may very well be yes.

A lot of people, of course, would say why bother? Conservation can substitute for nuclear power and solar can be expanded in the future.

We at the TVA are second to none in our commitment to conservation and alternative energy sources. Since I joined the TVA in 1977, we have conducted energy conservation surveys of more than 600,000 living units. We've issued low-interest loans for insulation, weatherization, heat pumps, solar, and wood heaters for more than 300,000 living units. We estimate that we've recently passed the 1 billion-kilowatt mark in energy saved each year as a result.

But despite—or maybe because of—our extensive experience with these technologies, I am convinced that they are not the whole answer to our energy problems.

For the next few decades, I don't see any realistic way that less nuclear power will mean anything other than more oil and coal. And the marginal dangers of more nuclear plants of a safer design seem to me less of a threat than the added risk and economic ruin from greater reliance on imported oil, not to mention the problems of acid rain and the global threat of carbon monoxide build-up in the atmosphere associated with coal.

So let's acknowledge a few things about our present nuclear reactor designs and move on.

No matter how much we rebuild and retrofit these light-water reactors, the Three Mile Island accident has revealed that the then-existing nuclear technology was capable of self-destructing. The problems that NRC regulations are attempting to correct were real. The doubling and tripling of construction lead-times only reflect the chaotic state of nuclear plant design as the industry scrambles to retrofit safeguards that experience has shown to be necessary.

An improved standardized version of these current light-water reactors would still be overly dependent on the skill of operators. The exposed piping would still be subject to leaks and, consequently, to loss-of-coolant accidents.

While risks to the public can be and are being reduced as a result of all these retrofits and design changes, we cannot be sure that accidents wouldn't result in a meltdown and a destructive release of radioactivity.

Of course, the reactor itself could be crippled, causing the kind of disaster that has, in fact, already cost over $1 billion in immobilized equipment and necessary cleanup. Obviously, that kind of risk is just unacceptably high—not only for the public, but for the utilities and the financial institutions that provide the capital to build the things.

A recent Swedish modification of the basic light-water reactor design addresses this problem in an imaginative way. The Swedes, paying homage to the American penchant for acronyms, call the concept PIUS (Process Inherent Ultimate Safety). This design puts all of the major components, along with the piping that connects them, inside a single, large, pre-stressed concrete vessel. The long-term cooling for the nuclear fuel is provided in a fashion that is not dependent on switches and pumps. Instead, the cooling comes from natural circulation of a large pool of water contained inside the concrete vessel itself.

This "passive" approach eliminates the need for conventional electrical and mechanical "active" safety systems and the reliance on operators to prevent an accident. It can provide cooling for about one week without external emergency cooling systems, without the use of electricity, and without operator action.

Based on its design concept, the plant should be able to tolerate operator error and multiple failures of almost all the active systems. The American experts who have examined this concept can find no basis for challenging the designers' claim that it is incapable of having a melt-down.

No technology can be absolutely safe. But clearly a design that has the potential of being melt-down-proof deserves the necessary funding to be pursued in a thorough research and development effort.

However, neither the nuclear industry nor its critics seem interested. The industry has too much invested in the current technology, and the nuclear critics don't want to face up to the risks of expanded use of coal and imported oil in the pre-solar era.

Another alternate reactor concept is called the High Temperature Gas-cooled Reactor (HTGR). It also holds promise of greater safety and efficiency. It is far less likely to melt down because it has far greater ability to withstand and hold heat. This is made possible by the use of helium as the coolant. Unlike water, helium is already a gas. Therefore, it cannot turn into explosive steam.

This reactor is also aided by the use of graphite in the manufacturing of the reactor itself. Graphite has excellent characteristics for withstanding high heat, even if an accident were to cause the heat to head way above normal.

Helium also has fewer impurities than water, which means it doesn't corrode the pipes. And it has a lower tendency to become radioactive. As a result, an HTGR would have lower in-plant radiation levels, making maintenance easier, less hazardous and less expensive.

Finally, this reactor design uses uranium more efficiently than our present reactors do, and it could be designed to use thorium, a very abundant fuel.

The problem with HGTRs is that 10 years ago, when everybody thought light-water reactors would be commercially successful, HGTR development was halted. The Ft. St. Vrain plant in Colorado is the only operating, high-temperature, gas-cooled reactor in the country. Granted, like all other pioneering efforts, it encountered problems.

But the biggest problem is that while a number of improved designs exist on paper, there is no program, either from the federal government or from industry, for research, development, and a demonstration plant that could determine the real worth of this obviously promising approach.

The issue is whether we need a much better nuclear product or whether the current designs are adequate.

Is the problem with nuclear power an hysterical public and a weak-kneed Nuclear Regulatory Commission? Or is the problem that we should be looking for alternatives to the very product itself, when we are not?

My own opinion is that the fears of the public—now that we have seen a nuclear reactor self-destruct—are very real. They are not going to go away. We have a stalement. The industry is trying in vain to prove that the fears of the public are unfounded. As we say in East Tennessee, "That dog won't hunt."

We ought to realize that with nuclear power, we are still experimenting. We are still developing a very complex technology. We stopped the research and development effort much too soon.

But we can't allow ourselves to be locked into the errors of the past. The nuclear critics—who say that no nuclear plants can work—and vested business interest—who refuse to consider changing a fundamental-

ly flawed product—may both be wrong. Obviously, therefore, we should not and cannot let either of them totally control our future nuclear policy for us.

The existing technology is just not good enough. But the national interest will be harmed if, in the pre-solar era, we become inextricably tied to imported oil or polluting coal.

Therefore, the nuclear option must not be allowed to die. If the administration is indeed as pro-nuclear as it claims to be, it must make the necessary investments in exploring different systems and new technical advances.

And if the nuclear industry does not support such an effort, then it—and not the nuclear critics—must bear the ultimate responsibility for the death of nuclear power.●

FIRST LADY BESS TRUMAN

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. SKELTON. Mr. Speaker, our Nation has been bequeathed a special gift by our former First Lady Bess Truman who passed away on Monday, October 18, 1982 at the age of 97. Mrs. Truman was one of the most loved and respected First Ladies in our Nation's history, and she left as her legacy to the American people the home and grounds of former President Harry S. Truman.

Today, I am introducing legislation to facilitate the transfer of the Truman home from the estate to the administration of the United States Park Service. Once this is accomplished, the American people will be able to explore the character of Missouri's most distinguished citizen, Harry S. Truman, in the very personal setting of his own home.

This historic site is most certainly a valuable and treasured national asset, and I urge my colleagues to join me in seeking expedient passage of this legislation.●

STRIKING A BALANCE: THE ECONOMY AND DEFENSE

HON. MARGE ROUKEMA

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mrs. ROUKEMA. Mr. Speaker, next week, the House is scheduled to take under consideration the fiscal year 1982 DOD appropriations bill. In this bill, we will have before us incalculable sets of numbers, but during our consideration we must not lose sight of another number—a triple-digit deficit in fiscal year 1983 that will probably exceed $150 billion. It is with that number in mind that we must then consider another pair of numbers: 7 percent real growth over 5 years in defense spending, totaling $1.6 trillion.

This 7-percent real growth target was actually agreed upon (without much dissent) 2 years ago, at a time when we thought we would achieve a balance budget in a few short years. We now realize that goal will take much longer to reach and, if we do not reconsider that $1.6 trillion commitment, we may never bring the deficit down to economically manageable proportions.

This 7 percent represents a target in defense growth that was arrived at without first determining, on a line-by-line basis, what exactly we should be spending our money on. The net effect is that, like the failed great society programs of a previous era, we are throwing money at the problem, without considering the economic ramifications or applying sound military doctrine consistent with our economic interests and stringent management policies. This has the effect of not only increasing the deficit, but actually encouraging waste on the part of the Defense Department.

In addition to the damage to the economy, the American people have become increasingly wary of huge defense increases combined with out-of-control deficits. If quick action is not taken, the resulting backlash could bring in dangerously sharp reductions in defense spending at the expense of manpower, training, ammunition and other essential components of our readiness capability.

Murray Weidenbaum has recently made the point as follows:

> There seems to be little justification offered of the economic feasibility of this sharply upward movement . . . intensive analysis should be given to the military budget, comparable to the tough-minded attitude quite properly taken toward many civilian spending activities of the Federal Government.

The fact is our present economy simply cannot sustain this projected growth in the defense budget. We cannot lose sight of the fact that a strong defense demands a healthy economy. Meanwhile, most would agree that neglect of basic conventional defense capabilities and the requirements of modernization of weapons systems will not allow us to return to the 3 percent real growth rate that was utilized by previous Congresses.

Consequently, we must strictly order priorities to allow for growth within fiscally responsible limits. I believe the necessary balance can be achieved by establishing a limit of 5 percent real growth and this should be done immediately, with the bill before us next week. Therefore, I plan to offer an amendment which will bring total spending in the committee bill—which allows for about 6.7 percent real growth—down to 5 percent by reducing spending in the fastest growing account in the bill—procurement.

An examination of the data is persuasive: In fiscal year 1980, procurement constituted 25 percent of all defense spending. In fiscal year 1981, it was increased by 35 percent—24.4 percent in real terms—and was 26 percent of all defense spending. In fiscal year 1982, procurement was increased by another 36 percent—27.3 percent in real terms—and it became 29 percent of the defense budget. The committee bill allows a further 24 percent increase in procurement—15.6 percent in real terms, bringing it to about 33 percent of overall defense spending. It bears noting that 61 percent of the overall growth in defense spending under the bill is dedicated to increases in procurement.

This is particularly disturbing when you consider that operations and maintenance—which makes up the very center of our deterrence capability: Our daily readiness effort—is only increasing by 7 percent—a real growth of a mere 1.8 percent, absorbing only 16 percent of the overall increase. Funding for personnel is only increasing by 5 percent, representing 9 percent of the overall increase.

The growth which has already occurred in the procurement account must also be viewed in light of the staggering increases in procurement spending which have been projected for future years. This is primarily because, once new weapons systems are initiated, they take on a life of their own by forcing expenditures in future years which cannot be controlled, becoming similar in form to the entitlement programs appearing elsewhere in the Federal budget. The Congressional Budget Office has recently estimated that, as a result of these commitments, the procurement account will have grown from 26 percent of the Pentagon budget in 1981 to 38 percent in 1987.

There is a compelling case that we can and should protect the readiness components of our conventional deterrent capability while slowing the growth in procurement. We can bring overall defense spending down to 5 percent this year and still achieve significant growth. First of all, the real growth of 12 percent that has thus far been achieved in defense spending over the past 2 years cannot be ignored. Furthermore, the 25 percent real growth that has already occurred in procurement over the same time frame must be recognized. My amendment would still allow 10.3 percent real growth in procurement. This is a clear indication to our adversaries that we remain committed to a strong defense.

I urge my colleagues to support my amendment so that we can achieve the necessary balance between a strong defense and the needs of our economy.●

NATIONAL PTA OPPOSES CHILD LABOR PLAN

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. MILLER of California. Mr. Speaker, when the Secretary of Labor proposed in July of this year to revise the regulations dealing with child labor, to permit employment of 14- and 15-year-old children in occupations previously determined to be hazardous, and to extend the number of hours in which these children could be employed, there was an immediate outcry from a broad spectrum of individuals and organizations concerned with the education, the health and the welfare of children. Among the most articulate and forceful of the statements received by my Subcommittee on Labor Standards at our hearings on the proposal was that of Ms. Manya Ungar, vice president for legislative activities of the National Parent-Teachers' Association (PTA).

The PTA was founded, nearly 90 years ago, to fight the abuse of child labor, and has, through its history, been aggressive and tireless in promoting the education, the sound development, and the welfare of children. At our hearings, the PTA questioned the wisdom of stimulating the employment of young children. It was concerned about their educational progress, their health, their ability to concentrate on their studies while engaged in long hours of employment, and the effect of such working hours on family life and adolescent development.

The National PTA Board of Directors has very recently reviewed its longstanding position on the question of child labor and has rearticulated its views. The PTA encourages meaningful work/study programs and vocational education which help young people to develop skills and prepare themselves for working life. But the PTA understands that such programs are different from simply expanding unsupervised employment of schoolchildren in a manner which encourages them to reduce their attention to their studies, which interferes with their growth and development, and which permits their exploitation. It is clear that the PTA remains as committed as ever to the health, well-being, and education of our youth, who are, of course, our future.

I ask would like that the position statement of the National PTA on child labor be reprinted, at this point, in the RECORD.

POSITION STATEMENT OF THE NATIONAL PTA ON CHILD LABOR PROTECTIONS

(Adopted, August 6, 1982)

As early as 1900, the National PTA was in the forefront of those seeking to protect the health, welfare and safety of children through strong child labor laws. This commitment was based on three fundmental standards:

1. A basic minimum age of 16 for employment;
2. A higher minimum age in identified hazardous occupations; and
3. A provision that the minimum wage for minors be the same as that established as the federal minimum wage standard.

The opportunity to work, to relate work to learning experience and to instill good work habits in vitally important to the development of young people and the economic future of our country. Meaningful life employment, however, is dependent on quality education, effective study habits, and positive school experience. The national PTA has forcefully supported supervised work/study programs, fostered career education, and defended vocational education. In addition, the National PTA has encouraged schools and businesses to work cooperatively in establishing productive work, training and career opportunities for children.

The National PTA has also a legitimate concern that children, especially those below the age of 16, not be tempted to spend more time in the work place and less in school and on homework, that adequate protections for children related to minimum hours, minimum wages, appropriate work supervision and identified hazardous occupations be maintained, and that the National PTA continue to monitor child labor practices which would endanger the safety, health or welfare of children.

Children should have a sufficient time for their schooling, their healthful development and their recreation. To the extent that the workplace can enhance and supplement the healthful development of children, it should be supported. To the extent that the workplace would affect the healthful development of children, exploit an unprotected and more vulnerable segment of our society, or interfere with the educational process, it must be resisted. The ever-changing labor market and newly developing occupations require that the National PTA continue to monitor new laws or regulations that reflect those changes and be continually diligent in recommending only those which will protect children in the work force and work place.●

FARMINGDALE HIGH FOOTBALL TEAM TAKES CONFERENCE TITLE

HON. GREGORY W. CARMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. CARMAN. Mr. Speaker, it is always a pleasure to note an accomplishment by one's very own high school. On November 13, Farmingdale High School's varsity football team of Farmingdale, N.Y., took the American League Conference title (division A of conference 1 of Nassau County) with an 8-0 record. Under the direction of Mr. Don Snyder, head varsity coach, and Assistant Coaches Mr. Bob Mulligan and Mr. Irv Apgar, the "Dalers" hold an undefeated record this season in league competition. Perhaps, even more important than the remarkable skills of the Farmingdale football team is the outstanding demonstration of sportsmanship displayed by the players and coaching staff.

Varsity team players include: Mike Ihm, Jim Carman, Rick Van Wickler, Bob Schellhorn, Joe Rzempoluch, Ed McMahon, Vin Parella, Mike Wildes, Drew DeTroia, Mike Freshour, Andy Donovan, Phil Bellia, Glenn Keith, Joe Panariella, Ron Pimental, Greg Gorddard, Mike Erickson, Bob Heuskin, Mike Travis, Andre Gomez, Paul Zarodkiewicz, Chet Levitt, Carl Curriera, Jim DeTommaso, Brian Contarino, Bob Burgan, Tom Sacco, Tom Kirk, Billy Recce, Frank Soldano, Mauro DeBenedetto, Ed Theal, Jim Valenti, Jerry Romanelli, Mike Ross, Jerry O'Sullivan, Mike Carbonaro, Neal O'Sullivan, Rich Raymond, Mike Hill, John Campbell.

And, without the support of managers Chris Masone, Sheri Barlow, Patti Pasquariello, and Russ Gulotta; Statisticians Lynda Heller, Terry Volberg, Ann Volberg, and Len Moore; Cheerleaders Ellen Berkowitz, Janet Cast, Elise Gannon, Paula Guidice, Debbie Lang, Pan Perratto, Jeanne Pucciarlli, Maureen Rooney, Margaret Studdert, Maureen O'Connor, Karen Scheel, Corinne Barret, Debbie Klenozich, Patti Rooney, Linda Cardito, Stephanie Emde, and Liz Flynn under the squad's director, Ms. Rosalie Lebinich, this victory would not have been possible. And special recognition is in order for the Farmingdale Hawk program and for Junior Varsity Coaches Mr. John Corio and Mr. Pete Cerrone and Junior High Coaches Mr. Ed Balboni and Mr. Bob Guarino who have all played a role in training the "Dalers." My heartiest congratulations to all of you for a fine job and a well deserved conference title.●

DAD OF SLAIN MARINE WRITES LETTER TO PRESIDENT REAGAN

HON. BRIAN J. DONNELLY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. DONNELLY. Mr. Speaker, last month Frank and Rosina Staniszewski came to Washington to attend the dedication of the Vietnam Veterans Memorial. The monument bears the name of their eldest son, Wladyslaw, who was killed in action in Vietnam while serving with the U.S. Marine Corps.

Wladyslaw Staniszewski emigrated to the United States just 18 months before he was inducted into the service. He died before he could fulfill the residency requirement for naturalization as a citizen of this country. Yet certainly by his service in the Marine Corps and by his death on the battle-

field, he demonstrated his full devotion to this country. His family asks only one thing in return for such a great sacrifice, that he be recognized by our Government posthumously as a citizen of the United States.

I strongly urge my colleagues to read the following article published in the Enterprise of Brockton, Mass., and to join me in working to see that their modest and reasonable request is granted.

DAD OF SLAIN MARINE WRITES LETTER TO REAGAN, CONGRESS

(By Kent S. Jones)

BROCKTON.—Frank Staniszewski struggled for nearly eight hours last week in his Drew Avenue home to put his feelings into words. The letter he composed to President Ronald Reagan and the Congress of the United States expresses his simple wish that his son be granted citizenship—nearly 16 years after he was killed in Vietnam.

His son, Wlasyslaw, born in Scotland, was a British subject when he enlisted in the U.S. Marine Corps in 1966. He turned 20 on June 22, 1967, two weeks before he died in action in Vietnam.

Because Scotty, as he was known to his family and friends, had been in the United States for only 18 months when he enlisted, he was not eligible for citizenship.

Now, U.S. Rep. Brian Donnelly has filed legislation in Congress to grant posthumous citizenship to Scotty, but the bill has been stalled in a subcommittee. Frank and his wife, Rosina, would not receive any money or benefits if the legislation were passed.

"We only want our son to become a citizen of the country he died for. We do not want anything for ourselves," said Mrs. Staniszewski.

Frank Staniszewski, a native of Poland and a naturalized American citizen, sat in the living room of their modest single-family home and read the letter he has written to President Reagan and Congress:

"The flag raising, marching and unveiling of the memorial to Vietnam veterans in Washington, D.C., was emotionally inspiring and satisfying for many Americans including us.

"Mothers, fathers, relatives forgot for a moment their sorrow until they returned home and discovered that really nothing has changed. Memories of sons, brothers, fathers still linger on now as ever. But for my family, there is double the sorrow.

"My wife, my daughter and my youngest son became American citizens in 1970. My oldest son, Wladyslaw could not achieve his goal because he was drafted into the service in 1966 and was killed in 1967 at the age of 20. He was in the United States for only 18 months and, according to law, you must be a resident of the United States for five years to become a citizen.

"Our son, Corporal Wladyslaw Staniszewski, U.S.M.C., who fought and died for America is still a British subject and a foreigner. We, as his family, cannot understand why.

"We have had many inquiries and letters from people asking what they can do to help us obtain posthumous citizenship for my son. I thank all of them with all my heart. Cong. Donnelly had introduced the bill in Congress, H.R. 4086, more than a year ago, but as usual some Congressmen are for it and some are against it and my son's citizenship has become a political yo-yo.

"When our son was killed in Vietnam, we received many letters from the White House, the Senate and Congress and from the military. To them it was their duty but for all those families and us it is a deep sorrow and pain we will feel until we die.

"We believe the country must be strong and must be defended at all times. But those men, who fulfilled their duty to their country, should not be forgotten and forced to crawl on their knees and beg for scraps.

"A country which prides itself for humanitarian rights and laws should recognize this misunderstanding and correct it. We believe strongly, as Americans, that our son, Corporal Wladyslaw Staniszewski, U.S.M.C., is entitled to his posthumous American citizenship because he was killed in the line of duty for his country on the highest executive order. Only the highest executive order can resolve all the complications.

"Mr. President. You hold the highest elected office in our country. All my family pleads with you to be gracious and grant our son his last wish. We, as parents, do not want, and are declining all money and benefits. We do not want anything except the recognition for our son and nothing else.

"President Teddy Roosevelt, said, 'Any man who is good enough to shed his blood for his country is good enough to be given a square deal afterwards. Less than that, no man shall have.' "

In his letter to the president and the Congress, Mr. Staniszewski expressed his appreciation to Brockton Veterans Agent James I. Malone, Congressman Donnelly and The Enterprise for helping his family seek citizenship for their son.

Frank and Rosina Staniszewski were among the thousands of parents from around the nation who journeyed to Washington Nov. 20 to attend the dedication ceremonies of the Vietnam-era Veterans Memorial for the veterans killed in Vietnam.

They were able to share their grief and painful memories with other families, but the couple felt an added burden because their son was the only member of the American armed forces killed in Vietnam who was not a United States citizen.

Scotty joined the Marines in 1966 after he learned he was eligible for the draft although he was still a British subject. He could have left the country and returned to Scotland, but he decided instead to enlist.

When he left for service, Scotty told his mother, "Mum, a country worth living in is a country worth fighting for."

"For us to see the Memorial was just stunning. For a minute or so you just couldn't talk," said Mrs. Staniszewski, "It took my breath away. You know there are close to 60,000 men who died in Vietnam but when you see their names all in rows . . ." Her voice trailed off for a moment.

"It was so hushed. Everyone was looking for a name," she continued. "We could get up close and touch the memorial. Everyone was just crying and looking for their own. When you look at the memorial, it is just unbelievable.

"It was almost like it was his grave, even though I knew it wasn't actually. But near him were the names of the men he knew and died with in Vietnam.

"On the ride back, everyone was quiet for awhile. As we got closer to home, the tension began to ease and we started up singing. We sang through all the old songs. We sang a few Christmas songs, too. It is like when you come home from a funeral and everyone goes home. It really hits you again.

"It was the realization there were all these young men with their lives cut off. They did not know the thrill of being married and having children and all the problems of life which go along with it," said Mrs. Staniszewski.●

EXPORT TRADING COMPANY ACT OF 1982

HON. SILVIO CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. CONTE. Mr. Speaker, as a cosponsor of the "Export Trading Company Act of 1982," I am pleased that on October 8, 1982, the President signed this important job-creating legislation. During this period of high unemployment—when the jobless rate has reached an all time postwar high at 10.4 percent annually—legislation such as the Export Trading Company Act is a concrete step toward economic recovery.

The Commerce Department estimated that over 30,000 jobs are created for every $1 billion of export sales. In addition, one out of every eight jobs in the manufacturing sector is related to export sales while in the agriculture sector one in every three jobs is connected with American exporting. At the same time, Mr. Speaker, a U.S. Commerce Department survey concluded that about 20,000 U.S. manufacturers and agriculture producers offer goods and services which could be highly competitive abroad—even though only 10 percent of U.S. manufacturing entities, slightly over 30,000 firms, participate in exporting products. It is also generally accepted that the great untapped export resource is small- and medium-sized businesses. The Export Trading Company legislation will promote this unused potential.

Mr. Speaker, the new law addresses two areas that have previously discouraged U.S. firms from exporting: financing and antitrust regulations. Title I allows bank holding companies to invest directly in export trading companies. Local banking resources can now be used to finance exports, thereby increasing American competiveness with our foreign trading partners. Title III and title IV of the new law addresses the antitrust issue associated with small firm exporting. This provision will allow, in certain regulated cases as supervised by the Department of Commerce, several firms to pool their resources for the purposes of exporting. This feature is crucial to encourage the participation of small and medium sized businesses.

Mr. Speaker, the impact of the Export Trading Company Act is not completely measurable at this early date, but the initial estimates look promising. In 1980, the value of New England exports was $11.5 billion an-

nually. Massachusetts produced 39 percent of New England's exporting business. This translates into 52,000 jobs in Massachusetts—people directly employed as a result of exports, not including the "ripple" effect associated with exporting.

Given the tradition of Massachusetts exporting—and exporting potential, the New England Congressional Institute estimated that the recently enacted Export Trading Company Act will result in the creation of almost 4,000 jobs. For a bill that expends no additional funds—just easing regulations—4,000 in a period of 10.4 percent unemployment is a good deal. The export Trading Company Act is not a panecea for the problems faced as a result of the current recession. but this export promotion law will help ease this distressing situation. It's surely a step in the right direction.●

ADDITION TO HOPKINS FAMILY

HON. JAMES A. COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. COURTER. Mr. Speaker, just before the recent election, I dropped by the Sixth Congressional District of Kentucky to visit my good friend and colleague, LARRY J. HOPKINS. At the airport, I happened to glance through one of the local Lexington papers when a bold headline caught my eye. It said: "Vote for Grandpa, He's Too Old To Work." I knew immediately this referred to our own Mr. HOPKINS.

But, there was greater significance in the headline for, just days before, LARRY HOPKINS had become the very, very proud grandfather of Haley Hopkins Martin. This second granddaughter was born to Shae and Jim Martin on October 3, at 4:14 p.m., at Central Baptist Hospital in Lexington.

At this time, though a little belatedly, I would like to, in particular, congratulate Congressman HOPKINS, his charming daughter and her husband on the arrival of this beautiful addition to their family. I would also like to put in a good word for the physician, Dr. Randall S. Jones, who not only safely delivered Haley, but who also made certain the grandfather survived the waiting room.●

NUCLEAR FREEZE AND DETERRENCE

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. HYDE. Mr. Speaker, no issue is more important than preserving the peace and currently a furious debate is underway on how best this can be accomplished.

A significant contribution to this debate has been made by John Gofman and Egan O'Connor in the November 29 issue of the Washington Times, and I herewith share it with my colleagues:

[From the Washington Times, Nov. 29, 1982]

NUCLEAR FREEZE AS "MORAL BLACKMAIL"

(By John Gofman and Egan O'Connor)

Americans are experiencing "moral blackmail," as the Catholic bishops and other advocates of the nuclear freeze say in essence:

1. All good people want to prevent nuclear war.

2. The only way to do so is to halt and then reverse the nuclear arms race.

3. Therefore, if you are a good person, you must support the nuclear freeze.

Statement No. 2 is false and dangerous. The only way to prevent both nuclear holocaust and nuclear blackmail is the way we have done it successfully for 20 years already: by keeping the Soviet rulers convinced they will pay an unacceptable price for either attack or blackmail against us. The nuclear-freeze campaigns encourage both nuclear holocaust and nuclear blackmail by undermining all four essentials of America's deterrent against them.

1. An emphatic "fight-back" policy is essential to deterrence at any level of weapons (reduced or increased, nuclear or non-nuclear). Weapons have no power to deter war or to preserve freedom if aggressors think their intended victims would never use them. Does the freeze movement call for fighting back? No. It claims that fighting back would be immoral, or sure suicide. This makes it a movement for unilateral nuclear disarmament, for a nation is unilaterally disarmed, no matter how many nuclear weapons it still possesses, if it is unwilling to use them.

2. Successful deterrence requires the Soviet rulers to know that the United States would have enough *surviving* retaliatory weapons under any conceivable circumstances to inflict unacceptable damage. The freeze movement is deceiving the public by pretending that our 30,000 nuclear warheads represent "overkill," instead of explaining that what matters in the number *after* the United States has suffered an attack. Today that number is about 3,000; they are concentrated on about 20 survivable submarines. Just 20 objects stand between us and holocaust or enslavement. This is as close to "underkill" as we can imagine, since the Soviets are working on anti-submarine warfare techniques (not banned by a freeze).

The first principle of military prudence is never to put all your eggs in one basket." We need a *variety*, of survivable retaliatory systems so even if the Soviets invent ways to cripple some systems, we will still have a fearsome retaliatory capability. Variety prevents the dreaded launch-on-warning and "hair-trigger" situations. Variety creates stability. Instead of explaining this simple principle, freeze leaders and the bishops support measures which would prohibit the United States from restoring the survivability of its retaliatory traid.

3. Successful deterrence could be vastly stabilized by *defensive* weapons, including anti-ballistic missile systems. Freeze leaders deceive the public by calling ABM "destabilizing" when, in fact, the ability to stop 50 percent (or perhaps 95 percent), of Soviet intercontinental missiles "on route" would virtually guarantee that no Soviet rulers would ever dare launch them in the first place. And ABM would fortify deterrence (the true goal) in another way: by making it clear that it would *not* be sure suicide for Americans to resist enslavement.

It seems both cruel and hypocritical for freeze leaders to terrify American children by saying that nuclear missiles are likely to vaporize them before they reach adulthood, while consistently opposing any defenses against those missiles.

4. Successful deterrence requires constant upgrading of our weapons with new systems, as old ones become useless. For instance, our retaliatory bombers were rendered nearly useless as a deterrent when the Soviets built an in-depth anti-aircraft defense, but our invention of Cruise Missiles and Stealth Bombers can restore our bombers as fearsome retaliatory weapons. The freeze would *deprive* us of these valuable deterrents, and also destroy one of America's most precious resources: its teams of dedicated and experienced weaponeers.

No top talent would stay in, or seek, a dead-end career in weapons research and development (R&D) *in the United States* after a freeze. Yet after a freeze, Soviet weaponeers might be given greater incentives than ever to succeed with their antisubmarine, anti-missile, and anti-satellite research. By crippling our weapons R&D but not Soviet R&D, a freeze almost guarantees our eventual enslavement.

Since the campaign against America's nuclear weapons leads straight to holocaust, surrender, or both, "all good people" will *reject* the freeze and its underlying moral bankruptcy. The price of freedom is neither immoral nor too high, for deterrence has worked and there is every reason for confidence that it will continue working *provided* Americans start campaigning in favor of the four defense essentials.

In the eternal choice between yielding to oppression or resisting it, the moral high-ground still belongs, as it always has, to those who take realistic actions to resist oppression *successfully*.●

IMMIGRATION REFORM NEEDS FURTHER CONSIDERATION

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. GARCIA. Mr. Speaker, in yesterday's Wall Street Journal, there was an article on potential labor opposition to H.R. 6514, the Immigration Reform and Control Act of 1982. The thrust of the opposition centers around bringing temporary workers into the United States.

The AFL-CIO is seeking restrictions on the H-2 program, as the temporary workers program is called, that requires certification by employers that they could not find U.S. workers for jobs to be filled by the H-2 laborers. The union also supports guarantees that H-2 workers would have adequate wages and working conditions while in the States.

I applaud the AFL-CIO's position on this issue. As I have said before, how can we complain about immigrants taking jobs from U.S. citizens, and at the same time try to expand our pool of temporary workers? This is an obvious paradox.

The article also mentions the opposition of church groups to the elimination of the legalization program for undocumented persons already residing in the United States. I also applaud this action by these organizations. The legalization program is crucial to the Hispanic community.

What seems to be unraveling is that H.R. 6514 is not ready to be considered by the House. Establishing a new, realistic, and effective immigration policy is one of the most important issues to be considered by this Congress.

It is certainly too important an issue to be taken up during a "lameduck" session. We need a new immigration policy. H.R. 6514 is a start, but let us consider the issue further, ironing out all real and potential problems, before deciding on what our new immigration policy should be.

I submit the Wall Street Journal article for the RECORD.

[From the Wall Street Journal, Dec. 2, 1982]

BILL TO TIGHTEN IMMIGRATION LAW SET BACK BY LABOR PUSH FOR CURB ON FOREIGN HIRES

WASHINGTON.—Organized labor struck a blow at the prospects of a major immigration bill only two days after support from a House leader appeared to give the measure a good chance of becoming law this year.

Ray Denison, chief lobbyist for the AFL-CIO, disclosed that the labor federation will oppose the bill unless it's assured that the Reagan administration and a majority of the House endorse proposed restrictions on U.S. hiring of foreigners as temporary workers.

On Monday, House Speaker Thomas P. O'Neill (D., Mass.) told backers of the bill that he intends to bring it to the House floor for a vote. Several supporters and opponents of the bill contended that the move made passage of some version of the bill probable during the current lame-duck session of Congress.

But the AFL-CIO long has been the prime backer of the bill's main element, which would make the hiring of illegal aliens by U.S. employers a federal offense.

The restrictions sought by the AFL-CIO on temporary workers were approved yesterday by the House Education and Labor Committee on a series of close, party-line votes won by Democrats. But opponents of those limits said they thought they could easily defeat them on the floor.

Peter Allstrom, an AFL-CIO lobbyist, said the labor group will oppose even bringing the bill to the House floor unless the Reagan administration guarantees that the restrictions will win approval there. This would put the AFL-CIO against Speaker O'Neill, usually one of its strongest allies.

Backers of the bill say that it would provide jobs for unemployed Americans by denying them to illegal immigrants. But the AFL-CIO fears that the Labor Department's "H-2" program, designed to import workers might be expanded under the pending legislation to as many as 300,000 jobs from about 15,000, according to Mr. Allstrom. "It's the one section (of the bill) where jobs are most seriously jeopardized," Mr. Allstrom said.

If the AFL-CIO sticks by this position, it could kill the legislation for this year. David Hiller, the Reagan administration's chief lobbyist in its drive for passage of the bill, was surprised to hear of organized labor's switch. "That's a real stunt," he said. "We can never speak of a majority of the House members; we can't even have a majority of the House," he said. "It seems like an extraordinary request."

Rep. Romano Mazzoli (D., Tenn.), chief House sponsor of the bill, said the legislation must at least be scheduled for House consideration by the end of next week to have a good chance to pass before the session expires. "Asking for all this when the time is ebbing away makes it very difficult to get a bill," he said. But he added: "I don't know if it is a fatal thing."

Other groups also have been splitting from the coalition that has supported the bill. Growers of fruits and vegetables in he southwestern U.S. bitterly oppose the AFL-CIO's restrictions on the H-2 program, and are working against the bill.

Several church groups also have defected into opposition, largely because the House is expected to limit, or eliminate, the pending bill's amnesty for millions of illegal aliens who have lived in the U.S. for years. The AFL-CIO also is opposed to any narrowing of the bill's amnesty provision, in part because legal workers are much easier to organize then illegal ones.

The AFL-CIO seeks restrictions on the H-2 program that would make it more difficult and time-consuming for employers to receive certification that they couldn't find qualified U.S. workers. Such certification is a precondition for hiring foreigners.

The labor federation also wants administration of the program kept in the Labor Department, eliminating a role given the more pro-employer Agriculture Department in versions approved by the full Senate and the House Judiciary Committee.

And the AFL-CIO would add new wage and working-condition protections for the imported workers, and would bar any expansion of the program unless the administration certified that it could be fully enforced.●

TRIBUTE TO AMBASSADOR RICHARD LOUIS WALKER

HON. GREGORY W. CARMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. CARMAN. Mr. Speaker, I wish to give special commendation to Ambassador Richard Louis Walker, an exceptional member of the U.S. Foreign Service. Ambassador Walker acted as my host during a special fact-finding mission on behalf of the U.S. House of Representatives Banking Committee to promote international trade.

I was very impressed by the organization of the American Embassy in the Republic of Korea. Through Ambassador Walker's efforts, my meetings with trade officials in the public and private sector in the Republic of Korea were very successful.

Sharing with you a little of the Ambassador's history is my pleasure. Mr. Walker was born on April 13, 1922, in Bellefonte, Pa. He holds degrees from Drew University, the University of Pennsylvania, and Yale University. Mr. Walker has served as an adviser and consultant for many educational and professional organizations. He presently serves as a member of the academic advisory council of the Center for Strategic Studies and on the board of directors of Research Consultants for the Institute for Foreign Policy Analysis. Mr. Walker presently serves as the U.S. Ambassador to the Republic of Korea.

Mr. Walker's exceptional efforts bring credit to himself, the American Embassy in the Republic of Korea, and to the United States. We are truly fortunate to have Ambassador Richard Louis Walker as a member of the U.S. Foreign Service.●

THE IMMIGRATION REFORM AND CONTROL ACT OF 1982

HON. HAMILTON FISH, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. FISH. Mr. Speaker, the Immigration Reform and Control Act of 1982 is based upon the work product of the Select Committee on Immigration and Refugee Policy, the findings of three successive administrations, and extensive hearings by both the House and Senate Judiciary Committees.

The bill represents the most comprehensive reform of U.S. immigration laws in three decades. It seeks to curb illegal immigration, improve the immigration adjudication process, and legalize the status of some illegal aliens with ties to the United States. I believe this bill represents a realistic and just approach to controlling immigration.

I would like to share a New York Times editorial of December 3, 1982. The editorial recognizes the essential balance between enforcement and legalization in the Immigration Reform and Control Act of 1982.

WHY BREAK THE IMMIGRATION CLOCK?

There's a bargain built into the immigration reform bill inching through the House. On the one hand, the bill would make it much harder for illegal workers to enter the country. On the other, it would provide limited amnesty for those already here, living with a fear of discovery that subjects them to exploitation. It's a humane bargain—and also a practical one. The Simpson-Mazzoli reform bill, as delicately balanced as a clock, could never have gotten so far without it.

But now, within sight of triumph, the bargain and thus the bill are suddenly in jeopardy. Speaker O'Neill, to his credit, has promised to bring up the bill during this lame-duck session. Meanwhile, some House

members, by wanting things both ways, threaten to break the clock. Though happy to have tougher enforcement, they want to strip amnesty out of the bill. The effort dishonors the implicit immigration bargain and misunderstands what amnesty would accomplish.

Hundreds of thousands of illegal workers would probably seek amnesty. To some nervous members, amnesty sounds like blanket legalization for a flood of "crooks, Commies and welfare cheats," as one House staff member says ironically. But the reform bill would provide no blanket legalization; it requires case-by-case treatment. Aliens have to have been here for three years to win temporary status, six for permanent status. Undersirables are excluded. Eligibility for welfare is denied or delayed.

More important than exaggerated fears are the benefits, which is why the Reagan Administration vigorously supports the entire package. Amnesty for old aliens would enable the Immigration Service to focus its threadbare enforcement efforts on keeping out new ones. And it would eliminate a fearful, servile underclass.

How can it be good for a democratic society when employers or landlords or merchants prey on illegal aliens' fear of deportation? How can it be good for illegal aliens to shrink from ever going to the police, or to be taxed unfairly? Tolerating such an underclass is cruel to them and unhealthy for the rest of us. The immigration reform bargain—tough enforcement coupled with sensible amnesty—deserves to be honored.●

THE JUDICIAL REFORM ACT OF 1982

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. HYDE. Mr. Speaker, one of the most thoughtful and effective Members of Congress is the junior Senator from North Carolina, JOHN EAST.

He has just introduced the Judicial Reform Act of 1982 which is well described in the following editorial from the November 2, 1982 edition of the Washington Times. Because this bill is of such great importance I urge its close study by my colleagues:

RESTORING THE CONSTITUTION

Sen. John East has fired the first resounding shot in what promises to be one of the most important congressional battles of the century. A few days before the election recess he introduced the Judicial Reform Act of 1982. This is no half-hearted attempt to redress this or that example of overreaching by the federal courts. The bill's 12 parts propose nothing less than to return the U.S. Constitution to its original "uninterpreted" state.

The several provisions would strip the federal judiciary of the legislative and executive authority it has usurped from Congress and the executive branch. It addresses every issue raised by the irrepressible judicial activism of the last several decades. The fight will be a glorious one.

The proper role of the federal judiciary has been one of the most intensely debated issues in this nation's history. Where, out of political cowardice, Congress has defaulted on its responsibility to resolve difficult and controversial disputes, federal judges have stepped into the vacuum. The result has been that too much of the most important "legislation" of the 20th century has been written, not by elected representatives, but by appointed judges.

Although some parts of the bill overshoot the mark, the Judicial Reform Act gives Congress the opportunity to reassert its unquestioned, if little-used, powers to shape and control the jurisdiction of the federal courts, Led by the Supreme Court, federal judges have redrawn political boundaries, taken over school boards, directly interfered in prison administration, punished police by excluding completely reliable evidence, taken religion out of the schools, and even told doctors when they may—and may not—perform abortions. It is the premise of the East bill that Congress could—and should—accept its legislative responsibility to debate and decide these issues itself.

But it is not only Congress that will benefit from once again having the constitutional power the bill would retrieve. State governments will find themselves freed of the large and onerous burden of federal judical second-guessing which has been grafted into the Constitution by every-broader interpretations of the 26 amendments. The powers reserved by the Founding Fathters to the states and to the people will be theirs once more.

Sen. East legislation also includes provisions which would greatly improve congressional oversight of the federal judiciary, which would make the Supreme Court's membership geographically representative—as it was at the beginning, and which would in other ways reduce the tremendous power of the federal courts.

The State Judiciary Subcommittee on Separation of Powers, chaired by Sen. East, will schedule hearings after the 98th Congress convenes in January. We'll have more to say before then.●

WATCH JAMAICA

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. LAGOMARSINO. Mr. Speaker, on June 22, 1982, I submitted an extension of remarks into the RECORD title "High Hopes for the Caribbean" and complimented the Jamaican private sector group for their fine work in presenting the Caribbean Basin Initiative to the Congress. Now I am pleased to note that the American Friends of Jamaica, at their annual ball in New York City this coming Saturday, will not only honor Prime Minister Edward Seaga but also the Jamaican delegation who so effectively worked with the Congress on this critical issue.

Hopefully, Mr. Speaker, we will have a chance to vote on the trade provisions of the CBI in this special session. The importance of this legislation to the entire Caribbean and Central American region cannot be underestimated.

Prime Minister Seaga recently chaired the Caricom Conference which was held in Ocho Rios, Jamaica, November 14-19. Caricom is actually a Caribbean common market group interested in promoting trade to improve the economies and stabilize the governments of this region. Fortunately, we have a distinguished and able leader in the Prime Minister of Jamaica, Edward P. G. Seaga.

At this point, I include an article, "Watch Jamaica," from the November issue of Reader's Digest.

"WATCH JAMAICA!"

(By Smith Hempstone)

After a disastrous decade of socialism, Jamaica is betting everything—including a hefty stack of U.S. chips—on free enterprise.

"Jamaica—a native word meaning "land of wool and water"—conjures up images of reggae and limbo, of sunburned tourists and Rastafarian cultists with braided hair, of gilded resorts and backwoods settlements where Maroons, descendants of runaway or freed slaves, still follow many tribal customs of their African ancestors.

But the sun-drenched island—the Caribbean's most populous English-speaking nation—is much more than this: Jamaica is the proving ground for democracy and free enterprise in the Caribbean. If the country can solve its pressing economic and political problems, it will show other nations in the region that there is a middle way between the reactionary authoritarianism of a Guatemala and the drab totalitarianism of Castro's Cuba.

Discovered by Columbus in 1494, Jamaica was ruled by Spain until an English fleet sailed into Kingston harbor in 1655 and took over. English planters dabbled in cocoa, indigo, coffee, bananas and spices, but sugar was the economy's mainstay before the island's vast reserves of bauxite, the source of aluminum, were first tapped in the 1950's. Today, Jamaica is the world's third-largest producer of bauxite and the United States largest supplier.

Jamaica's first decade after achieving independence in 1962 was relatively uneventful. But in 1972 socialist Michael Manley was elected prime minister, and Jamaica's economy was soon a shambles. Manley slapped a 700-percent tax increase on bauxite exports. The levy contributed to a drop in Jamaica's share of the world market from 21 percent to 15 percent.

Then the Manley government acquired eight of the country's sugar factories, and in three years production dropped 34 percent. Bad weather, blight and mismanagement led to a stunning 60-percent fall in banana production. Of 24,000 private trading outlets in rural areas, 11,000 went out of business under the Manley reign.

To make matters worse, in 1975 Manley initiated a costly friendship with Cuba's Fidel Castro. Cuban doctors, engineers and security experts poured into Jamaica, while some 1400 Jamaican youths were sent to Cuba for political indoctrination and paramilitary training. On their return, the *brigadistas* became Manley loyalists, employing strong-arm tactics for him and his party. The Cuban embassy, under Ambassador Ulises Estrada, the former deputy chief of Castro's American Department and a key figure in the Marxist takeover of Nicaragua, quickly became Kingston's major center of communist intelligence operations.

Investor confidence collapsed, and economic conditions worsened. Unable to

obtain hard currency to buy raw materials, Jamaican factories closed. Unemployment shot up to 33 percent, prices climbed 78 percent between 1977 and 1980, and the standard of living dropped precipitously. Crime and violence caused the once-lucrative tourist trade to fall by more than a third in two years. A $1.6 billion foreign debt drained the treasury, and state-owned enterprises ran up huge deficits.

With the approach of the 1980 election race between the pro-Cuban Manley and pro-American Edward Seaga, political violence flared. More than 850 Jamaicans were murdered that year alone. Even as Jamaica went to the polls, the bipartisan electoral-commission staff was pinned down by gunfire in its offices.

Despite the violence, an astounding 86 percent of the electorate voted—and when the ballots were counted, Edward Seaga had won 59 percent of the popular vote, and his Jamaica Labor Party had captured 51 of 60 house seats, the most lopsided political victory in Jamaica's history. Commenting on Manley's defeat, Radio Moscow mourned the loss of "a valuable ally."

Before President Reagan's inauguration, Seaga made two visits to the United States to confer with Secretary of State-designate Alexander Haig and Reagan aides Edwin Meese and James Baker. Seaga's message: Jamaica understands it must work, not just borrow, its way out of its economic difficulties. But Jamaica will need help, particularly from the American private sector, in getting back on its feet.

Reagan was well aware that Seaga's victory represented a significant reversal of the pro-Castro, anti-American tide that had been flowing throughout the Caribbean since the Marxist takeover of Nicaragua in 1979. And it did not go unnoticed in the region that Seaga was the first national leader invited to the White House after the new President took office.

The aloof, intellectual Seaga seems an unlikely political leader for a country noted for its mellow attitudes. The prime minister, who is of mixed Lebanese, Scottish, French and African descent, is Boston-born and Harvard-educated. He is married—to a former Miss Jamaica—and has three children. In 1962 he was elected to the Jamaican House of Representatives from West Kingston, a poor and tough district that had never reelected anyone; Seaga has now represented it for 20 years.

When Seaga took office, Jamaica was in trouble. "The country was without funds." recall Arnold Foote, chairman of Kingston's *Daily News*, and without hope." Hours before Seaga's election the Jamaican government literally spent its last dollar, and Seaga—who serves as his own finance minister—faced a foreign-exchange gap of $96 million.

Seaga's first priority was to float emergency loans totaling $86 million from commerecia banks and the American and British governments. The new prime minister also held discussions with the North American bauxite companies, dissolved the sugar cooperatives, restructured the debt-ridden banana marketing corporation and announced his intention of selling or leasing many enterprises (including eight luxury hotels) taken over by the Manley government. In addition, he created incentives for domestic and foreign investors, removed some restrictions on imports and encouraged exports to earn desperately needed foreign exchange.

Problems persist. Bureaucratic bottlenecks, exacerbated by the departure of many technicians during the Manley years, still frustrate local and foreign investors. Shortages of raw materials, uncertain power supplies and labor disputes still are distressingly frequent. Unemployment, which stood at 27.9 percent when Seaga took office, has dropped only one percent, and 290,000 workers still lack jobs.

But Seaga's first two years in office have included some notable successes. He has improved Jamaica's credit rating. The rate of inflation, 23.2 percent for the first nine months of 1980, was down to 4.9 percent last year. Violent crime has decreased dramatically. In 1981 Jamaica's economy registered a 2-percent advance—the first in eight years. Tourism has also rebounded. "People have hope now," observes journalist Hector Wynter. "So their attitude toward each other and toward foreigners is much more positive."

Jamaica's efforts to attract new investment have enjoyed a degree of success as well. Among the American corporation betting on Seaga to succeed are Control Data, which has established a joint venture with a Jamaican company for training services for small and medium-sized Jamaican businesses, and United Brands, which is investing in new agricultural projects.

What Seaga is trying to do—by deregulating economic activity, reducing government ownership, increasing competition, emphasizing exports—is give free enterprise a chance. If he succeeds, the Caribbean will have an alternative role model to Fidel Castro.

In a December 1981 survey of 30 key American business leaders, 16 rated Jamaica the most promising area for investment in the Caribbean Basin. And when President Reagan met last year with Prime Minister Trudeau of Canada and President López Portillo of Mexico, he summed up a vital aspect of his Latin American policy in two words: "Watch Jamaica!" Now the nations of the Caribbean are doing just that.●

BON VOYAGE, JACK BRINKLEY

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. McDONALD. Mr. Speaker, JACK BRINKLEY of Columbus, Ga. will depart our ranks with the ending of this Congress. He will be especially missed by those of us in the Georgia delegation, and in particular, by myself, since he and I have served together on the House Armed Services Committee where JACK has been chairman of the Subcommittee on Military Installations and Facilities so successfully. On the full committee, JACK has been a very senior member and a tower of strength for national defense. I have greatly appreciated his wise and patient counsel in that regard. JACK was certainly a key mover and shaker in successfully beating back the recent attack on the C-5 aircraft procurement, and in that respect, he will be sorely missed.

One thing should be particularly noted, and that is the fact that JACK was an Air Force pilot during the Korean war. There was a time when nearly every Member of Congress had performed some military service and could bring this background to bear on defense matters. This is no longer true and the number of Members who have so served, is getting smaller with each Congress. Therefore, the benefit of JACK's advice will be even more sorely missed in House Armed Services Committee work during the next Congress.

JACK has had a full career as a lawyer, State representative, Air Force Pilot, teacher, and Member of Congress. These careers need not be redescribed now, but what needs to be restated is how much we will all miss his wisdom and quiet smile. A friendlier and more patient person cannot be found in these Halls, and I will miss him. Goodbye, and good luck to you in the future, JACK, and come back often.●

TRIBUTE TO THE CINDY SMALLWOOD FOUNDATION AND DR. CARLTON GOODLET

HON. RONALD V. DELLUMS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. DELLUMS. Mr. Speaker, I am pleased to call to the attention of my colleagues the work of the Cindy Smallwood Foundation, an important institution devoted to improving the quality of life of residents in the bay area community of California. The foundation was founded in 1973 upon the untimely death of a young black teenage woman, Cindy Smallwood. Cindy's short life was committed to the alleviation of human suffering and inequalities. It was upon this humanitarian basis that the Cindy Smallwood Foundation was founded.

The Cindy Smallwood Foundation promotes community and individual health care through medical education and counseling. It is particularly interested in the problems of trauma resulting from aging, terminal illness and death, and has a unique program which provides grief counseling to those in need. In addition, the foundation provides direct financial aid to low income and minority students seeking a medical education, with its priority being assistance to minority women.

It is fitting that an organization of this stature is presenting its special award at its fundraising dinner December 3, 1982, to Dr. Carlton Goodlet, champion of human rights, justice and world peace. Dr. Goodlet was born in Chipley, Fla., July 23, 1914. He attended Howard University, the Meharry Medical School and the University of California where he received a Ph. D. in psychology. Currently, Dr. Goodlet is president of the National Black United Fund, a member of the

board of trustees of Talladega College, a trustee of the historic Third Baptist Church in San Francisco, and a member of numerous prestigious boards of directors. He has been the editor and publisher of the Sun Reporter newspaper since 1948. Dr. Goodlet has been a practicing physician since 1945, resides in San Francisco and is the father of one child, Dr. Gary Goodlet, Jr.

Dr. Goodlet is a man of national and international reputation in the area of publishing, education, quality health care and world peace. He has been a front runner in civil rights and international affairs. I commend the Cindy Smallwood Foundation for having the vision to present this year's award to a human being of such significant involvement and commitment.

Mr. Speaker, the Cindy Smallwood Foundation continues to reflect in its philosophy and programs the humanitarian efforts of the young person for whom it was named. I am honored to have had the opportunity to bring the work of this institution to the attention of my colleagues in the House of Representatives, and will continue to support it in its noble efforts.●

JOBS PROGRAM NEEDED IN THIS SESSION

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. OBERSTAR. Mr. Speaker, Thanksgiving is not end for all turkeys. In fact, this Thanksgiving gave birth to a great turkey of an idea—the proposal once, and apparently briefly, under consideration by the Reagan administration that we increase the tax burden on unemployment compensation in order to reduce unemployment. Perhaps we should fight crime by punishing its victims; they are easier to locate.

The proposal to fight joblessness by increasing the tax burden on those who experience unemployment was absurd.

Unemployment stands at a 42-year record. I ask the President to identify the jobs by which 11 million unemployed Americans may cast off the joys and carefree existence of unemployment. I urge my colleagues to join with me in the serious business of enacting a program to create jobs, and not engage in schemes to punish the jobless.●

SOCIAL SECURITY IS FACING SURE CHANGE

HON. DOUGLAS K. BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. BEREUTER. Mr. Speaker, I wish to bring to the attention of the House an editorial which appeared in the November 6 edition of the Lincoln Star. The commentary reveals a good understanding of the problems facing the social security system and of the politicizing of this issue.

I commend its wisdom to my colleagues.

[From the Lincoln Star, Nov. 6, 1982]

SOCIAL SECURITY IS FACING SURE CHANGE

We have no faith at all in Democratic congressional claims that the Reagan administration is planning some kind of clandestine attack upon the nation's Social Security system. But we do believe that the system will very possibly be changed in the 1983 session of Congress.

In saying this, we anticipate little basis for fear on the part of the elderly or for pessimism on the part of younger peole. What we think will happen is much along the lines discussed in Lincoln this week by Robert A. Beck, chairman and chief executive officer of Prudential Insurance Co. of America, who delievered the fourth annual E. J. Faulkner lecture at the University of Nebraska-Lincoln.

We saw nothing in Beck's reported remarks about benefit reductions for anyone currently receiving Social Security. We saw nothing in his remarks about drastic changes for those who will be receiving Social Security in the coming five to 10 years.

He did make the point, however, that the rate of improvement in Social Security benefits needs to be modified, and we agree. It is absolutely essential that the integrity of the system be established, once and for all, regardless of the level of benefits.

This is what we urge Congress to do and what we hope will be the position of this state's congressional delegation. The Social Security system absolutely must become a bird in the hand, not in the bush.

We cannot go on with a system as vital as this one is with the skepticism of the young and the terror of the elderly as talked about by Beck. Today's young working people are entitled to have a firm idea of about what the level of their benefits will be when they become eligible and the elderly desperately need to know, for sure, that their benefits are not going to be reduced.

Beck talked about simply changing the criteria for increasing benefits to a more realistic basis such as increases in wage levels rather than the faulty cost-of-living index. He talked about the entire work force, including the federal government, being brought under Social Security and advancing the age for retirement at full benefit from 65 to 68.

The latter change would, perhaps, need careful thought given to surviving spouse benefits and, for the sake of equity, would need a graduated implementation, but it is certainly a practical notion in view of constantly improving longevity figures. None of these things would have to be done to affect current recipients or those soon to be eligible for benefits.

But a new benefit schedule could be devised to apply on a graduated basis back from some arbitrary current age level to a much younger age. In other words, the benefit schedule could be very little changed for those now 60 years of age, curtailed a little for those around 55, a little more for those down to 40 and so on to an age of around 35 or so.

This would not destroy the planned financial security of those now at an age where they could not make up for the reversal and would give younger members of the work force a clear and dependable picture of what their benefits would be and what else they might need to do for the sake of their security in later life.

We simply cannot conceive of this system in total collapse, as some skeptics like to believe, but we do think it needs intelligent and bipartisan analysis and refinement. Further, we believe it can be done and the system put on a permanently reliable basis with relative ease if Congress and the administration forego their posturing on the subject.●

HEALTH PROGRAM CLARIFICATION

HON. DON YOUNG

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. YOUNG of Alaska. Mr. Speaker, I rise to bring to the attention of my colleagues a matter crucial to health care in the Native villages of Alaska. In requesting funding for the Indian Health Service, the Appropriations Committee has wrongly assumed that the community health aid program is the same as the community health representative program and has cut out money for our community health representatives in Alaska.

The language reads:

Because the community health aide program is still in operation and adequate funding is provided for it under the clinics and hospitals line item, none of the community health representative funding should be allocated to Alaska.

This is not the case—they are not provided for in this way. To eliminate the field or community based health efforts and leave the resources entirely to the direct provision of medical services I am sure is not the intent of the committee. However, a misunderstanding of these separate programs has caused this situation to occur. I expect the matter to be remedied in the Senate but wished to make this known for the record.●

HELPING STUDENTS HELP THEMSELVES

HON. JOHN F. SEIBERLING

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. SEIBERLING. Mr. Speaker, today I am introducing legislation which would help those remaining students who continue to receive social security student benefits to earn the money they need to continue their education.

As you know, last year in the Omnibus Reconciliation Act, the Congress heeded the administration request to eliminate the social security student benefit. Prior to that action, students enrolled in colleges or universities, whose families were eligible for social security because of retirement, death, or disability of the primary wage earner, received a student benefit until they reached the age of 22. The Omnibus Reconciliation Act included a provision to phase out this benefit. The last class of eligible students enrolled in a college or university in September 1981. Summer benefits were eliminated, and this year, beginning in September, all students receiving social security student benefit experienced a 25-percent reduction of the benefit they receive.

In addition, new regulations of the Pell grant program require school financial aid officers to consider social security student benefits for the purposes of determining eligibility for this form of financial aid. The natural result is that students who formerly relied on the social security student benefits to help finance their educations have had to earn more money through work.

However, students are subject to the same earnings limitation which is applied to retirees under social security. For every dollar over $4,400 which a student earns toward his or her tuition, he or she experiences a 50-cent reduction in social security student benefits. Since the accounting of earnings takes place at the end of the year, many hundreds of students around the country will have to repay social security for any benefits they received in excess of the earnings limitation provision. If the student has to borrow from the next semester's tuition savings to refund overpayments to social security, that student may be forced to defer education plans.

I think this is a serious problem. For that reason, I am introducing legislation which will raise the earnings limitation for students to $10,000, to be effective this year. This new earnings limitation, which would apply only to students, would help working students to earn the money they need to continue their schooling.

Mr. Speaker, eliminating the earnings limitation entirely would cost the social security trust funds $30 million over 4 years. This provision would not have the same price tag, but it would really get at the problem these students are experiencing in financing their education. I think it is the least we can do to further the educational opportunities of the remaining students who are receiving social security student benefits, and I hope the Congress will give this bill prompt attention.●

TRIBUTE TO THOMAS R. REYNDERS

HON. GREGORY W. CARMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, December 3, 1982

● Mr. CARMAN. Mr. Speaker, I wish to give special commendation to Mr. Thomas R. Reynders, an exceptional member of the U.S. Embassy in Paris. Mr. Reynders recently assisted me during a special factfinding mission on behalf of the U.S. House of Representatives Banking Committee to promote international trade.

I was very impressed by the organization of the U.S. Embassy in Paris. Through Mr. Reynder's efforts, my meetings with trade officials in the public and private sectors in Paris were successful.

Sharing with you a little of Mr. Thomas R. Reynders' history is my pleasure. He was born on April 27, 1937, in Worcester, Mass. Mr. Reynders holds degrees from Princeton University and Harvard Law School. He has served as a member of the NATO Defense College in Rome, as a senior watch officer for the U.S. Department of State, and as a lieutenant of the U.S. Army. Mr. Reynders presently holds the post of Chief General for Economic Policy at the American Embassy in Paris, France.

Mr. Reynders' exceptional efforts bring credit to himself, the American Embassy in Paris, and to the United States. We are truly fortunate to have Mr. Thomas R. Reynders as a member of the U.S. Foreign Service.●

SENATE—*Monday, December 6, 1982*

(Legislative day of Tuesday, November 30, 1982)

The Senate met at 11 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

The Lord is my shepherd; I shall not want.

He maketh me to lie down in green pastures: he leadeth me beside the still waters.

He restoreth my soul: he leadeth me in the paths of righteousness for his name's sake.

Yea, though I walk through the valley of the shadow of death, I will fear no evil: for thou art with me; thy rod and thy staff they comfort me.

Thou preparest a table before me in the presence of mine enemies: thou anointest my head with oil; my cup runneth over.

Surely goodness and mercy shall follow me all the days of my life: and I will dwell in the house of the Lord for ever.—Psalm 23.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. I thank the Chair.

SENATE SCHEDULE

Mr. BAKER. Mr. President, I shall now attempt to outline the schedule of the Senate as I see it for this week and next week. I have discussed this schedule with the distinguished minority leader, who is necessarily absent from the floor attending a committee meeting.

I see the acting minority leader is present, and I can assure him that I have attempted to apprise the minority leader of the details of this plan.

Mr. President, we are now in the process of trying to wind up the second session of the 97th Congress. The Speaker and I have previously announced that it is our hope that we can adjourn this session of the Congress on December 15, or no later than December 17. That leaves us very little time to do what should be done in the remainder of this session.

So, Mr. President, Senators should be on notice, from this day forward, that there is the distinct possibility of sessions beyond the usual adjournment or recess hour of 6 p.m. Indeed, late sessions should be anticipated for any evening between now and sine die adjournment.

SATURDAY SESSION

Mr. President, after I go over the list of items that I hope we can do in this session, most Senators will agree that my announcement in respect to a Saturday session is essential, and I do wish to announce now, with reluctance, that Members should anticipate that the Senate will be in session on this coming Saturday.

Generally speaking, this week will be devoted to legislative and executive calendar work exclusive of the continuing resolution. It is possible that we will be able to do many things other than those which I am about to list, but let me outline a plan and a proposal for this week.

MONDAY, DECEMBER 6

Today, Mr. President, I hope that the Senate might agree to proceed to the consideration of Radio Marti, H.R. 5427, which is Calendar Order No. 797. I understand there are serious problems with that measure by some Senators perhaps on both sides of the aisle. However, it is an important measure, and it is my intention to try to move to that matter today, if possible. I will cooperate with Senators to try to work out their difficulties. I especially understand that the Senators from Iowa have problems with a matter of frequency allocation for Radio Marti, and I urge that that be resolved by the administration so that we can dispose of that problem.

In that connection, Mr. President, I should have said at the outset that in these final 2 weeks, or what I hope is the final 2 weeks of this session, holds will be honored only sparingly and under the most urgent circumstances. Senators are aware, of course, that holds on both calendars, the calendar of general orders and the calendar of executive business, are matters of courtesy by the leadership on both sides of the aisle and are not part of the standing rules of the Senate. Therefore, Members should be on notice that in these closing hours of this session, as indeed was the case last year and I believe the year before, holds will become distinctly perishable.

Mr. President, in addition to Radio Marti, it is my hope that we might today do the neighborhood development bill, S. 2607, and the energy OCS bill, S. 2305.

There may be other matters that can be brought up today. Of course, I would be pleased to move any worthwhile legislation that can be brought to the attention of the joint leadership.

TUESDAY, DECEMBER 7

Tomorrow, Mr. President, the first order of business, after a time for the transaction of routine morning business, should be the D.C. appropriations bill, which I understand is available. It is not practical to try to deal with it today, but it is my intention to ask the Senate to consider it on tomorrow as the first order of business, that is, H.R. 7144, Calendar Order No. 951.

In addition to the D.C. appropriations bill, I hope that the Senate will turn to the consideration of S. 2000, the bankruptcy bill, Calendar Order No. 632. In addition to the bankruptcy bill, it is my hope that we can consider the California utility bill, H.R. 1524, Calendar Order No. 933.

WEDNESDAY, DECEMBER 8

As I announced earlier, Wednesday will be executive calendar day, and it is the intention of the leadership on this side to try to move as many nominations on the executive calendar as possible during the day on Wednesday. I fully recognize and understand that many Members, once again perhaps on both sides of the aisle but surely on this side of the aisle, have objections to certain nominees on that calendar and have placed holds on the calendar, but they should be aware that many of those nominees will be presented if the Senate agrees to proceed to the consideration of their items.

So if Senators have objections to particular nominations on the calendar, I urge that they be present during the day on Wednesday or else we are going to work through that list as best we can.

THURSDAY, DECEMBER 9

Mr. President, Thursday I hope that we can go to the highway/jobs bill. That is a good place for it. I am not sure what shape we will have it in, that is to say, whether we will have a House-passed bill or whether we will have a bill from one or more of the committees of the Senate. But in any event, Senators should be on notice that Thursday is the day on which I hope we will proceed to the consideration of a highway/jobs/gas tax bill.

I hope it is not unduly optimistic, Mr. President, to say that on Thursday is my hope that we might also do the energy water appropriations bill,

H.R. 7145, if it is available and if time permits.

FRIDAY, DECEMBER 10

On Friday, Mr. President, it is anticipated that we should try to do H.R. 3809, the nuclear waste bill, if it is received from the House, as I anticipate, and the shipping bill, perhaps an Alaska railroad bill, and Senate Resolution 436, which is the resolution carrying the rules and regulations for televising the proceedings in the Senate.

SATURDAY, DECEMBER 11

On Saturday, I anticipate that we would continue debating the TV resolution in the Senate, if that is necessary, and other matters as they may be necessary or desirable on either of the two calendars.

Mr. President, as I said earlier, other matters may come up. I have assured the minority leader that I will consult with him as often and as throughly as the circumstances will permit me, meaning that as soon as I have information in addition to this list or to be deleted from this list I intend to convey that information to the other side so that no one is taken by surprise.

WEEK OF DECEMBER 13

Mr. President, it is possible that next week would not be consumed entirely with debate and action on the continuing resolution, but I would not bet on it. Some of these matters have a habit of taking on a life of their own. So the leadership on this side has suggested that we commit the entire time next week and prior to adjournment sine die to the consideration of the continuing resolution. That does not rule out other matters. It certainly does not rule out conference reports and other priviledged matters that may come before the Senate.

Members should also be on notice that they should expect late night sessions next week on any day and that we will stay as long as necessary to pass the needful and urgent legislation before the Senate. I believe we can do that before the 15th of December. It will require extensive cooperation by Members on both sides and, no doubt, difficult negotiations in some cases. But we have done it before, and we can do it again. We owe it to ourselves, to Congress, and to the country to transact this business before we adjourn sine die.

(Mr. HUMPHREY assumed the chair.)

BIRTHDAY GREETINGS TO SENATOR STROM THURMOND

Mr. BAKER. Mr. President, I am afraid I may have overstayed my welcome in terms of the standing order, but I cannot pass the opportunity to observe the presence of my friend and colleague, the President pro tempore of the Senate, STROM THURMOND, in the Chamber, following his duties which he performs with great diligence in opening the Senate each morning.

I wish to extend—with all my colleagues, I am sure—a very special message to our colleague Senator THURMOND. On behalf of the entire Senate, STROM, happy birthday to you.

I must say, in all candor, that I am of course delighted by this event, but also somewhat alarmed. I keep finding myself astonished less by Senator THURMOND'S energy at that young age than by the disparity in energy and enthusiasm between Senator THURMOND and some of us who serve with him in the Senate who have not yet attained 80 years.

He is a tough act to follow and an even tougher one to keep up with. He is and always will be a Senate legend.

In honor of his birthday, Mr. President, this week's poem is written by a young and talented Southern poet, Joanie Whitebird. The poem is entitled "Star," and I ask unanimous consent that it be printed in the RECORD in tribute to Senator THURMOND on his 80th birthday.

There being no objection, the poem was ordered to be printed in the RECORD, as follows:

STAR

Out of Chaos
came a man walking,
unsteadily at first
but walking all the same

a woman
looked out
saw him walking
and loved him for it
(because
from where she was
Inside
he looked like
a star
shining alone
at sun rise)

and she too
came out of Chaos,
timid and unsure
but walking all the same

when the man
looked back at her,
he knew
but he kept walking

they walked a long way
in the clean and precise
New World
gaining strength
and certitude
in their new selves
before he spoke to her

"as children
we dreamed
lovers to be inseparable—
as stars, we learn
only the limitless
can support
our polarity"
he kissed her once
and began to move away
turning and spinning
into the distance
where he touched her
one tear fell
then

came a great rushing
of wind and lights;
the known universe fell away
completely

and time and space
became a frozen blue
in the distance
shone one star
that kept her immobile
hypnotized

and she began to sing
the song of his light,
and she sang
until it became
her light also

slowly,
after cycles
and more cycles
had passed,
a third light came
then a fourth
a fifth

after eons
there appeared
walking and holding hands,
two children,
bathed in stars

Mr. THURMOND. Mr. President, will the majority leader yield?

Mr. BAKER. I yield.

Mr. THURMOND. Mr. President, I am very grateful to have the opportunity to serve in the Senate. This is my 28th year in the Senate, and I am very grateful to the people of South Carolina who have kept me here that long.

I also am grateful that we have such an able majority leader, who is thoughtful of others and who does an outstanding job. I wish to express my deep appreciation to him and the entire Senate for their courtesy and unfailing kindness to me. I assure them that it is always a pleasure to cooperate in every way I can, for the good of my State and for the Nation.

Mr. BAKER. Mr. President, I thank the Senator. He indeed stands as an example for all of us on both sides of the aisle.

STROM, we are proud of you.

Mr. THURMOND. I thank the Senator.

Mr. BAKER. Mr. President, I apologize to the acting minority leader for extending beyond my time, but I offer him a corresponding amount of time if the Senate will agree by unanimous consent.

Mr. PROXMIRE. I thank the majority leader.

Speaking for the minority leader, I think there will be no necessity to take more than the time allotted to the minority leader, and I will not take all of it.

Mr. President, I do join my good friend from Tennessee in congratulating our President pro tempore on his birthday.

Did the Senator say it was his 50th birthday? That is about how old he looks.

Mr. BAKER. About 40.

Mr. PROXMIRE. About 40, that is right. I know he is in magnificent con-

dition, as a weight lifter and jogger, and he is a great example to our country.

If more people were to do what Senator THURMOND does, we would have far less costly medicaid and medicare programs.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, is there an order for the transaction of routine morning business?

The PRESIDING OFFICER. There is.

Mr. BAKER. And it would occur automatically, I believe, under the order entered, at the conclusion of the time allocated now to the minority leader. Is that correct?

The PRESIDING OFFICER. That is correct.

Mr. BAKER. I thank the Chair.

DUBIOUS BENEFITS OF THE GASOLINE TAX AND ROAD BILL

Mr. PROXMIRE. Mr. President, as the distinguished majority leader has pointed out, we are going to take up the so-called gasoline tax and road bill on Thursday.

Frankly, I approach that with far less enthusiasm than other Members of the Senate. All indications are that this will not provide many jobs, if at all.

The Chairman of the Council of Economic Advisers, Mr. Feldstein, has given that as an opinion.

Just the other day, an article by Robert Pear in the New York Times states the following, and I will read the first paragraph:

> The road repair and construction bill being considered by Congress would provide hardly any special assistance to those industries and regions with the worst unemployment, economists said today.
>
> In addition, they said that the legislation, designed to create 320,000 jobs, would do nothing to help most of the nation's nearly 12 million unemployed workers.

A number of eminent economists are quoted. Donald Straszheim, vice president of Wharton Econometric Forecasting Associates, is one. Sar Levitan is another.

Mr. Straszheim said that after incorporating the gasoline tax increase and the highway program into this economic model, the Wharton team found only a trivial effect on the unemployment rate.

Mr. President, the article goes on to say that the Wharton forecasters see unemployment averaging 10.3 percent next year.

Similarly, Sar Levitan, a very capable economist—he has appeared many times before the Joint Economic Committee and is recognized as one of the outstanding economists in our Government, a man of solid reputation—says that the effect on the jobless rate would be "extremely little or nil."

He says:

> The gasoline tax is basically a regressive tax. Whether you make $100,000 or $10,000, you pay the same nickle on a gallon of gas. As a result, people have less money to spend on consumer goods.

Mr. President, I bring all this up particularly because, as the distinguished Senator from Michigan and I pointed out on Friday, our States are suffering much more severe unemployment than the rest of the country. We would be loser States under this legislation.

In other words, we would contribute far more in gas taxes than we would get back in spending on highways. We would get back only 70 cents on the dollar in Wisconsin and 60 cents in Michigan.

Ohio, Indiana, Michigan, and Wisconsin are States where unemployment is far higher than elsewhere, and there is no question that we would have fewer jobs if this is put into effect than if it is not put into effect, under present circumstances.

The bill may be modified and changed, and I hope so. No State will get back less than 85 or 90 cents on a dollar, but it will still be a marginal program. It will not do the job adequately.

Mr. President, I ask unanimous consent that the article by Mr. Robert Pear in the New York Times of Saturday be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Dec. 4, 1982]

ROAD BILL BENEFITS VIEWED AS NARROW

ECONOMISTS ASSERT IT WILL GIVE LITTLE HELP TO AREAS HAVING HIGHEST UNEMPLOYMENT

(by Robert Pear)

WASHINGTON, Dec. 3.—The road repair and construction bill being considered by Congress would provide hardly any special assistance to those industries and regions with the worst unemployment, economists said today.

In addition, they said that the legislation, designed to create 320,000 jobs, would do nothing to help most of the nation's nearly 12 million unemployed workers.

The monthly employment report from the Bureau of Labor Statistics today documented much deeper, more pervasive problems than could be solved by the "highway jobs" bill, the economists said.

Donald H. Straszheim, vice president of Wharton Econometric Forecasting Associates in Philadelphia, observed that employment levels were still declining in most industries.

AN AID TO CONSTRUCTION

A major question being asked in Congess is whether the highway bill would funnel money into those industries and regions with the worst unemployment. It would help construction workers, who have a very high rate of unemployment because of a severe slump in housing. But, aside from that, there seems to be no reason to think the bill would specially help the most afflicted regions or industries, the economists said.

The unemployment rate for construction workers dropped slightly, from 23 percent in October to 21.9 percent in November. This probably reflects the recent decline in mortgage rates and an increase in home construction, economists said.

Sar A. Levitan, labor economist at George Washington University, said that the highway bill would assist some of the nation's better-paid hourly workers. Construction workers earned an average of $11.69 an hour in November, as against an average of $7.80 an hour for all production workers in private industry, the bureau reported.

On Thursday the House Ways and Means Committee approved a bill to increase the gasoline tax by 5 cents a gallon, raising it to 9 cents. The new revenue would provide $5.5 billion a year to finance President Reagan's proposal for a nationwide program to improve highways and mass transit systems.

Transportation Department officials said that the money would be distributed according to standard formulas established by statutes over the last 65 years. The formulas take account of such factors as a state's population, land area, postal route mileage and traffic load, the cost of completing its interstate highway system and the number of square feet of deficient bridges within the state.

The highway money will not be concentrated in any region, the officials said. A state's unemployment rate is not a factor in any of the formulas. But since population is a factor, the distribution of money will help states with large population and large urban areas, where unemployment is often a serious problem.

Reagan Administration officials have estimated that the highway program would create 320,000 jobs, directly and indirectly. There are now 111 million people in the civilian labor force. So for every 111,000 people who gain jobs, the unemployment rate declines by one-tenth of 1 percentage point. If the Administration estimate is correct, the highway program would reduce the unemployment rate, now 10.8 percent by a maximum of three-tenths of one percentage point.

Mr. Straszheim said that after incorporating the gasoline tax increase and the highway program into its economic model, the Wharton team found only a "trivial" effect on the unemployment rate. The Wharton forecasters see unemployment averaging 10.3 percent next year.

CALLS IT A REGRESSIVE TAX

Similarly, Mr. Levitan said that the effect of the legislation on the jobless rate would be "extremely little or nil."

"The gasoline tax," he said, "is basically a regressive tax. Whether you make $100,000 or $10,000, you pay the same nickel on a gallon of gas. As a result people have less money to spend on consumer goods."

At a news conference this afternoon, Lane Kirkland, president of the American Federation of Labor and Congress of Industrial Organizations, was asked whether he thought the highway program would reduce the unemployment rate. "It will be helpful to a degree," he said. "There is a case for it irrespective of the jobs issue. But we don't think it's adequate in terms of the dimensions of the problem that we have, the urgent necessity of attacking the economic distress this country is facing at its roots."

At a caucus next Tuesday, Senate Democrats plan to discuss proposals for a larger package of public works and road repair projects. These proposals, explicitly designed to reduce unemployment and stimulate the economy, could increase the cost of

the total program to $10 billion next year from $5.5 billion.

Unemployment rates were already high and rose further last month for several large occupational groups. The jobless rate for blue-collar workers rose to 16.5 percent from 15.9 percent. For workers in durable goods manufacturing, the rate rose to 17.1 percent from 16 percent. For automobile workers, the rate rose to 24.1 percent from 22 percent. For metal workers, primarily steelworkers, the rate rose to 26 percent from 23 percent.

Labor Department officials said that the hardship was cushioned for some households by the fact that there were two wage earners present. Among families with one person unemployed, 71 percent had at least one member who was still employed.

THE WAR OVER PENTAGON SPENDING

Mr. PROXMIRE. Mr. President, yesterday's New York Times carried an analysis of military spending by Rudolph Penner, one of the four eminent economists who write regularly in the Sunday Times about national economic policy. Mr. Penner is particularly recognized as a man with a strong sense of responsibility, as well as great economic judgment and training.

I think all of us appreciate—the present occupant of the chair (Mr. HUMPHREY) appreciates it perhaps more than many others—how important it is for us to get our fiscal policy back in order and how devastating for any kind of stable economy is a situation in which the deficits are expected to be $150 billion next year—I should say in the present fiscal year that began October 1—and perhaps as much as $200 billion, certainly very high, in 1984.

This is just a prescription for inflation with high interest rates for an economy that reels into unemployment and serious recession with heartbreaking bankruptcies.

We simply have to do this. It is going to be hard to do.

What Mr. Penner does is, without debating the wisdom of increased military spending he points out we have to have the courage if we are going to go ahead with military spending to match any increases in military spending with increases in taxes, that if we do not do that we are certainly going to have deficits which will be unacceptable, that we are going to have inflation that is going to be too high and in periods of recovery interest rates that will choke off that recovery, and we are going to have periods of very painful unemployment that are going to be very similar to what we have gone through over the last year or so.

Mr. President, the mammoth deficits facing this country over the next few years constitute an absolutely unacceptable prescription for inflation, high interest rates and an economy that reels from the deep unemployment that now plagues us to the devastating inflation that hit us so hard a couple of years ago and will certainly return unless we summon the will to take the tough medicine of bringing our Federal budget under control.

In this article, Dr. Penner rightly contends what most of us in the Senate must recognize to wit, that military spending is specially hard to control because of two elements. In the first place, the procurement constitutes a kind of public works program for the States where weapons systems are researched, developed, and produced. The programs bring jobs that push Congressmen and Senators into a full court press for congressional approval, regardless of the merit of the military program or its value to the taxpayer. Second, as Penner points out, the procurement takes a long time to show up in the budget. So the reward for cutting the budget and eliminating the expensive weapons system does not show up for some time, long after the commitment has been firmly locked up. We cannot improve the 1983 or 1984 oncoming budget significantly by knocking out the $7 billion we will have to spend for the two new aircraft carriers. They will not show up big in the budget for a couple of years and then they will plague us until the 1990's. Finally, Mr. Penner argues that we must spend what we have to spend for our military security and that will undoubtedly impose a heavier cost than we now sustain from the military. As Penner says, if there is no other responsible decision but to commit ourselves to a higher tax burden in the longer run unless nondefense programs are cut more than seems likely, then we must increase taxes. In the words of Penner: "The debate over weapons procurement in the 1983 and 1984 budget is really a debate over appropriate tax policy in the 1985-90 period."

Mr. President, I ask unanimous consent that the article to which I have referred in the Sunday New York Times be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE WAR OVER PENTAGON SPENDING
(Rudolph G. Penner)

As a nation, we are waging a war among ourselves over our ability to wage war.

On Nov. 22, the President fired off a salvo with one of his typically effective television speeches. He spoke of the need to spend more on defense so we can cajole the Russians into mutual reductions in defense spending in the future. In opposition, others argue that the Russians will not be impressed with increases in United States defense spending if they are inefficient and that there is no way that the huge increases sought by the President can be implemented efficiently. Still others—though a notable minority—do not see the Russians as much of a threat at all.

The higher levels of defense spending desired by the President are impressive. Between the fiscal years 1981 and 1987, outlays would grow almost 15 percent a year. The increase in the fiscal year 1983 alone will be almost $34 billion. For perspective, this far exceeds the entire amount of the President's originally recommended 1983 spending levels for housing assistance ($8.9 billion), food stamps ($10.3 billion), and Aid to Families with Dependent Children ($6.9 billion).

It is next to impossible for the layman—or the experts, for that matter—to judge the value of our defense effort. The effectiveness of any new weapons system depends on how potential adversaries respond by changing their policies. We, therefore have to forecast their response, judge its importance and then go on to design our response to their response, and so on.

Because the key issues are so difficult to analyze, we tend to ignore them and public discussions focus on peculiar rules of thumb and tangential issues. For example, there is much argument over the appropriate rate of growth of real defense spending and whether it should be 8 percent, 5 percent or 3 percent a year. But there is little discussion of what degree of protection is bought by different rates of growth.

There is also concern that the high growth rates of spending will distort economic efficiency, causing bottlenecks and perhaps an acceleration of inflation. I think this concern under-estimates the ability of our market system to respond to shocks and the Pentagon's flexibility to change the timing and composition of its purchases. But even if the distortion of our economy were a threat, the real issue is whether such distortions are worth it to gain greater security. In World War II, we completely rearranged our economy and few asked whether it was worth it.

Another argument raging within the Administration is whether the surprising decline in inflation should permit a reduction in the dollar amount for defense. Over all, prices may be as much as 5 percent lower in the fiscal year 1986 than projected as recently as last July, and that change alone would seem to warrant a $17 billion reduction in currently scheduled 1986 defense outlays.

But the Pentagon argues that the prices it has to pay have not been affected significantly by the drop in inflation. And it is not an easy argument to analyze. The pentagon's prices will be largely determined by the demands imposed on the economy by the growth in spending. Faster growth will almost inevitably be reflected in higher prices for defense-related goods and services.

Moreover, the Pentagon exerts considerable direct control over the prices it pays. Officials spend time negotiating over prices, and in the case of contracts with a clause that permits added costs, they even negotiate over key items such as the pay of workers in defense industries. While it seems reasonable to believe that lower inflation should result in lower defense prices, it is difficult for an outsider to get the relevant information to make the case since so much of the evidence is generated within the Pentagon.

My own conclusion is that such tangential arguments are not worth pursuing very far and that we cannot avoid the hard question: Are all of those expenditures worthwhile?

Military experts have convinced me that we have been deficient in defense spending relating to readiness—personnel, operations, maintenance and training—primarily be-

cause those expenditures are the easier to cut politically.

The more controversial expenditures involve weapons procurement. And there the military has given us considerable cause to be dubious about the efficiency of the decisions. We have an MX missile that cannot find an uncontroversial home; an F-18 plane that cannot fly very far; an Aegis cruiser that may be top-heavy, and a multitude of other questionable weapons systems.

There are two difficult political problems with cutting procurements. First, the production of a weapons system has a pork-barrel element. It is an effective jobs program in certain Congressional districts. Second, it takes a long time for a procurement cut to show up in budget outlays. Consequently, the reward for cutting the budget does not appear for a long time, while the complaints from affected districts show up immediately. For example, a Congressional Budget Office option to modify naval strategy and to dispense with two very expensive nuclear carriers—that had not been scheduled to be deployed until the early 1990's—saves $7 billion in budget appropriations immediately, but has its main impact on budget outlays in the second half of the 1980's. While the two nuclear carriers represent an extreme case, the same principle applies to almost all major weapons systems. A commitment to buy a system now commits us to a stream of outlays lasting years.

Somehow we must change the terms of the defense debate. If we focus on 1984 outlays, we are almost certain to make inefficient decisions—probably cutting the things that we need the most. Thus, it is essential to take a longer-term view of both defense outlays and the overall budget deficit.

While the high deficits projected for 1984 and 1985 represent a severe problem, I believe that the financial markets would take a more saguine view of them if the long-term growth of defense spending and the major domestic entitlement programs were slowed so that the deficit is put on a sharp downward path in the late 1980's.

And if after a reasonable debate, it appears that it would not be wise to slow defense spending growth significantly, then there is no other responsible decision but to commit ourselves to a higher tax burden in the longer run unless nondefense programs are cut more than seems likely.

Put another way, the debate over weapons procurement in the 1983 and 1984 budgets is really a debate over appropriate tax policy in the 1985-90 period. That point should be emhasized again and again until it is seared into our consciousness.

PLIGHT OF KURDS REMINDS US OF POTENTIAL FOR GENOCIDE

Mr. PROXMIRE. Mr. President, on October 24, 1982, the New York Times published a letter to the editor describing the terrible plight of the Kurdish people. The letter was written in response to Vincent Canby's October 6, 1982, review of "Yol," a movie which tells the story of a young Kurd who goes home on leave from prison to discover that his village is being terrorized by Turkish anti-Kurdish forces. The author of the letter, Vera Beaudin Saeedpour, commends the director, Yilmaz Guney, both for sharing a glimpse of Kurdish culture with the West, and for portraying the tools of oppression in Turkey today.

In her letter, the author also describes the efforts of the Turkish Government to eradicate the identity of the Kurdish people. She says that the Turks do not acknowledge the 8 to 10 million Kurdish people living in their country. The author includes a report from Amnesty International saying that a Turkish sociologist was imprisoned for 10 years for calling the Kurds a separate ethnic group.

In addition, the writer points out that Turkey is not the only country which oppresses Kurdish people living within its borders. She says: "Turkey is a terrible place to be Kurdish, but so is Iran, and so is Iraq, and so is Syria." Even abroad, many Kurds live in silence because they fear retaliation against their families at home.

Mr. President, this letter reminds us that terrible ethnic persecution takes place all around the globe. Sadly, it also reminds us that the potential for genocide still exists in the world today. And, although Americans detest such oppression, our Nation has not done all that it could to end this heinous practice.

Mr. President, since 1967 I have daily urged the Senate to ratify the convention for the Prevention and Punishment of Genocide. While it has remained in legislative limbo in our Senate, over 80 other nations have ratified it.

By neglecting to ratify the treaty, the United States falls short of its duty as a leader in the area of international human rights. No human right is more fundamental to all racial, religious, and ethnic groups than the right to exist. While the United States abstains from ratifying the treaty, thousands fear ethnic obliteration. We cannot afford to wait any longer—I urge the Senate to act now.

TRENDS IN CONVENTIONAL ARMS TRANSFERS TO THE THIRD WORLD BY MAJOR SUPPLIERS 1974-81

Mr. PROXMIRE. Mr. President, there have been some very interesting trends in conventional arms transfers to the Third World by major suppliers.

Mr. President, while it is important to pay attention to arms sales agreements, as was emphasized in the analysis by the Congressional Research Service I commented on earlier, in many ways the more timely statistics relate to actual deliveries, the culmination of prior sales agreements.

When looking at the statistics on actual deliveries, several distinct trends stand out. The first is that deliveries by all the major suppliers, the United States, U.S.S.R., Britain, France, and West Germany, have increased in real terms from 1974 to 1981.

I think many Members of the Senate have not been aware of the terrific increase of arms deliveries in real terms from this country, West Germany, France, Britain, and especially the Soviet Union.

Second, the most startling growth pattern has been that of the Soviet Union. They have almost doubled their deliveries in the 1977-81 time period compared to the 1974-77 years.

In terms of specific weapons delivered, the Soviets specialize in tanks, self-propelled guns, artillery, supersonic combat aircraft, and surface-to-air missiles. In fact during the 1978-81 period, the Soviet Union had significantly more deliveries than the United States in just about every major category.

Other trends worth noting are the emphasis by the United States are deliveries to East Asia and Pacific region Third World countries while the U.S.S.R. has concentrated heavily in the Near East/South Asia region.

In the meantime, the Western European suppliers have been busy lining up contracts and supplying hardware to Latin America. In some cases they have displaced the United States as the major supplier of weaponry there.

That did not use to be the case. We used to be the arms pusher. We still are selling arms and giving arms abroad at an enormously rapid rate and more rapidly than ever before, but the Soviet Union has surpassed even that.

Mr. President, this whole process of arming the world, particularly the underdeveloped nations, is completely counterproductive. It promotes war in these countries. It impoverishes these countries as they have to spend so much of their energy, efforts, manpower, and painfully limited resources in sterile military activity when they should be helping their economies recover so that people could live decent lives.

I do hope that we not only recognize this but begin to exercise the kind of positive efforts that Secretary of State Shultz has suggested in which we designate certain areas of the world as arms free, including South America and Central America, and do all we possibly can in every way constantly to remind our other nations that they should stay out with their arms sales and if they do we will.

Some kind of specific and constructive activity like that is essential if we are going to live in a better world and if we are going to have the kind of progress that we need for these underdeveloped countries to have any kind of an economic future.

Mr. President, I ask unanimous consent that part III of the CRS study be

printed in the RECORD along with the accompanying tables.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CRS STUDY

The data in table 2, 2A and 2B reflect the fact that values of deliveries by the United States, the USSR and the major Western suppliers have increased in both nominal and real terms from 1974–1981. The most notable increase in the delivery values has been that of the Soviet Union, which more than doubled the average value of its deliveries during 1977–1981 compared to 1974–1977. The data for the other major suppliers reflects a more steady growth in nominal terms and a more modest growth in real terms, when adjustments for inflation are made.

Table 3 shows the number of specific classes of weapons delivered to the Third World by the major suppliers from 1974–1977, 1978–1981 and 1974–1981. This table (and its regional counterparts) adds a qualitative dimension to this presentation by indicating the types and amounts of weapons the major suppliers transferred during these time periods, and which suppliers were most responsible for deliveries of the classes of weapons listed to Third World recipients.

The data in table 3 shows that the United States during the period from 1974–1977 led in four of the twelve categories of weapons deliveries, while the Soviets led in five. The four major West European suppliers led in three categories. During the period from 1978–1981, the United States led in no categories, the Soviets led in nine, while the major West Europeans again led in three. For the entire period from 1974–1981, the United States led in four categories, the Soviets in five and the major West Europeans in three. Overall these data indicate that in the most recent four years, the West Europeans are maintaining notable shares of the Third World markets in helicopters, other aircraft and naval craft—both in minor surface combatants and submarines. The Europeans are also gaining a greater share of the guided missile boat market, otherwise dominated by the Soviet Union. The United States does not manufacture and export a naval craft in this category. The Soviets lead over the eight year period has been consistently in four categories—tanks and self-propelled guns, artillery, supersonic combat aircraft and surface-to-air missiles.

When the Third World weapons delivery data is broken down into the major regions of the Third World, it becomes evident who are the major suppliers and who has and is now dominating the given region in deliveries of specific classes of weapons. Table 4 clearly indicates the dominance of the United States in weapons deliveries to the East Asia and the Pacific region from 1974–1977. The U.S. led in ten out of eleven categories of items actually delivered. The area became more competitive from 1978–1981, with the United States still leading in seven categories to four for the Soviet Union and one for the major Western European suppliers.

Table 5 shows that in the Near East South Asia region the Soviet Union dominated deliveries, ranking first in six categories from 1974–1977 compared to three each for the United States and the major Western European suppliers. In the period from 1978–1981 the Soviet Union led in deliveries of 10 weapons categories compared to two for the major Western Europeans and none for the United States.

Table 6 shows the increasing importance of the major Western European suppliers in arms transfers to Latin America. In the period from 1974–1977 the United States led in deliveries of six weapons categories and was tied in one with the major Western European suppliers. The Soviets led in three categories, the major Western Europeans in two. However, for the period from 1978–1981, the major Western European suppliers led deliveries in five categories compared to four for the Soviet Union and three for the United States.

The United States has not been the leading supplier of any category of major weapons to Sub-Saharan Africa during either the 1974–1977 or 1978–1981 periods as Table 7 indicates. The major arms supplier to this region in both the 1974–1977 and 1978–1981 periods has been the Soviet Union. In 1974–1977 the Soviets led deliveries in 7 categories to 3 for the major Western European suppliers, with a tie in one category. From 1978–1981, the Soviet Union led in 9 delivery categories to two for the major Western European suppliers.

In summary, these regional weapons delivery data collectively show that the Soviet Union has become the leading arms supplier to the Third World of several major classes of conventional weaponary from 1977–1981. The United States has also transferred substantial quantities of these same categories of weapons, but has not matched the Soviets in terms of sheer numbers delivered in the recent four year period. It is also clear that the major Western European suppliers have become, in the recent period, serious competitors for arms markets in every region of the Third World, especially in Latin America.

Despite these trends a note of caution is warranted. These aggregate data on weapons categories delivered by the major suppliers do not provide indicies of the quality, or level of sophistication of the weapons actually delivered by a given supplier to a particular region. As the history of conventional conflicts in the 1970s suggests, quality and/or sophistication of weaponry can offset a quantitative disadvantage. The fact that the United States may not "lead" in quantities of weapons delivered to a region does not necessarily mean that the weapons it has transferred cannot compensate, to an important degree, for larger quantities of less capable weapons systems delivered by the Soviet Union or others.

In addition, these data do not provide any indication of the capabilities of the recipient nations to use effectively the weapons actually delivered to them. Superior training—coupled with quality equipment—may, in the end, prove to be a more important factor in a nation's ability to successfully wage conventional war than the sheer magnitude of conventional weapons it may have in its inventory.

[1] U.S. data are for fiscal year given (and cover the period from July 1, 1973 through Sept. 30, 1981). Foreign data are for the calendar year given. Statistics shown for foreign countries are based upon estimated selling prices. All prices given include the values of weapons, spare parts, construction, all associated services, military assistance and training programs. U.S. commercial sales contract values are excluded, as are values of the Military Assistance Service Funded account (MASF) which provided grant funding for South Vietnam, Laos, Philippines, Thailand, and South Korea. MASF deliveries values for fiscal year 1974 were $1,159,000,000; for fiscal year 1975 $1,125,000,000. Related grant transfers to South Korea and Thailand, also excluded, were $11,000,000 in fiscal year 1979; $10,000,000 in fiscal year 1980 and $100,000,000 in fiscal year 1981. All data are current as of Jan. 1, 1982. Third World category excludes Warsaw Pact nations, NATO nations, Europe, Japan, Australia, New Zealand.

[2] United States data for fiscal year 1976 include the transitional quarter (fiscal year 197T).

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business not to extend beyond the hour of 12 noon with statements limited to 5 minutes each.

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BUMPERS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BUMPERS. Mr. President, what is the parliamentary situation?

The PRESIDING OFFICER. The Senate is in morning business.

TORNADOES AND FLASH FLOODS DEVASTATE ARKANSAS

Mr. BUMPERS. Mr. President, I want to speak for just a few moments about a relatively unknown—that is nationwide—tragedy that has just stricken my State. I had a remarkable experience Thursday afternoon as I flew into the Little Rock Airport headed south: I looked to the west and saw two tornadoes. I had not been there so I did not know there were tornado warnings out. But I knew that the humidity and the temperature and all of those things that those of us who have grown up with tornadoes watch so carefully were all ripe for a tornado. Yet, it is very unusual for it to happen in December. We consider the tornado season to begin about March and end in May. But there they were, two tornadoes about 8 miles off to the right of the airplane.

When I got inside of the terminal I realized that, in fact, tornadoes were hitting all over the State at that very moment.

Fifteen lives were lost in my State on Thursday and Friday and maybe one on Saturday. Those are terrible human tragedies. Some of those deaths were caused by tornadoes and some were caused by flooding. There were literally dozens of injuries that occurred as a result of the tornadoes. But the rainfall—all of which fell very heavily in a short period of time—caused flash flooding in a whole host of areas across the State.

In short, when the damage toll is taken in dollars, those tornadoes and that flash flooding, some of which still continues—if you watched the "Today Show" this morning you saw them still evacuating people, 5,000 people homeless—when it is all said and done, in economic terms, Thursday and Friday and Saturday will be the most devastating natural act ever to hit the State of Arkansas.

I have written to the President asking him to honor the request of our Governor that the entire State be declared a disaster area. I know that he just returned from South America and perhaps this is not on the front burner with him. But I wanted to do two things: I wanted to publicly urge the President to promptly declare all of those areas—Arkansas, Illinois, and Missouri—disaster areas and to simply make the point for the record that in our State, like every State where unemployment is very high and people are already having a tough time, we have had this terrible, terrible burden put on us.

In the little town of Clinton, about 1,250 people—one of the most beautiful little communities anybody could ever want to see—the water was up to the awnings on the businesses. One lawyer being evacuated from his office had water up to his chin when they finally got him out. It happened so quickly and so unbelievably. And this has just been repeated in Portia and East Camden and several other areas in the State.

And while we sit here in the dryness and the comfort of the Senate Chamber, or as we go out and get the morning paper and take it to the kitchen while we drink coffee and see what happened the day before, it is impossible to understand the human misery—people who have lost every single thing they own; businessmen whose businesses were absolutely, utterly, totally destroyed—it is hard for us to understand what a grave responsibility we who are in official positions in this country have for those people, to try to help them get back on their feet, relocate, if necessary, and give them all the assistance that a magnanimous government ought to give people at times like that.

So, Mr. President, I just wanted to put those few comments into the RECORD to alert everybody to the fact that there has been a terrible, terrible disaster which has received not a great deal of notoriety.

Mr. President, I suggest the absenbce of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered. The majority leader is recognized.

EXTENSION OF TIME FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, it would appear that the clearance process as a matter of courtesy to all Senators has not yet run its course on some of the

items that I identified this morning as possible measures to be disposed of or to be dealt with by the Senate today.

Therefore, in order to provide Senators with an opportunity to speak and transact other matters that are appropriate at this time, and to gain additional time to attempt to work out certain difficulties, I ask unanimous consent that the time for the transaction of routine morning business be extended until not later than 1 p.m. under the same terms and conditions.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. GORTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. HAYAKAWA). Without objection, it is so ordered.

A DAY OF SORROW

Mr. GORTON. Mr. President, the Washington State Chapter of the Congress of Russian-Americans, through its president, John Kovtunovich, has provided the following statement titled, "A Day of Sorrow," for me to include in the CONGRESSIONAL RECORD. The bulk of this statement details some of the many misfortunes to befall the Russian people since the Bolshevik Revolution some 65 years ago; and it is particularly important to consider as we come upon the first anniversary of the imposition of martial law by Moscow's puppet regime in Poland.

"A Day of Sorrow" ends by appealing to Americans to join "in prayers for those who perished at the hands of Communism and for the deliverance of those presently living under the yoke of Communism." This is an appeal Americans should heed.

I ask unanimous consent that the statement of the Congress of Russian-Americans be printed in the RECORD.

There being no objetion, the Statement was ordered to be printed in the RECORD, as follows:

A DAY OF SORROW

On the 65th anniversary of the "October Revolution", we, as Russian-Americans, wish to remind the Free World that on November 7, 1917 the Bolshevik Communist Party deprived the peoples of Russia of their liberty.

Since that day the Soviet government under the leadership of its Communist Party has continually perpetrated crimes that are an affront to humanity. Among them:

The creation of an Orwellian state founded on a basis of human fear and ignorance and maintained by a ruthless military police;

The "reedification" of the Russian peoples, a policy inaugurated by the heinous murder of the royal family and pursued in the hopes of stripping the Russian peoples of their heritage and thereby creating the ideal human cipher, Homo Sovieticus;

The desecration and destruction of over 50,000 churches and monasteries;

The forcible collectivization of peasants, an act which resulted in the death by starvation of seven million people;

The exploitation of workers and the reduction of peasants to the status of government serfs;

The abandonment of Soviet P.O.W.'s (branded "traitors" by the Soviet regime) in Nazi war camps, resulting in the death of 4,650,000 native sons by starvation and disease;

The forceable repatriation of Soviet citizens remaining in Western European countries after the war and the subsequent imprisonment of these citizens in concentration camps;

The extermination of tens of millions of people in concentration camps and prisons;

The mental and physical torture of countless millions without regard to human rights or dignities;

The military suppression of any popular uprisings within the Soviet Union or any of its satellite nations, particularly Hungary, Czechoslvakia, and Poland;

The creation, through the wanton exploitation of natural resources and environment, of an aggressive military machine which continues to grow at the expense of the people's needs and aspirations;

The suppression of the freedoms of religion, thought, speech and the press and the persecution of individuals for their religious convictions and their beliefs in basic human rights.

No document can enumerate the countless crimes perpetrated by the Soviet government against its peoples. Only the tears of an anguished and suffering people can serve to measure these atrocities. To these tears we direct our hopes, our prayers, and our actions.

The 7th of November, the day of pompous Soviet celebrations, parades and deceitful proclamations about the "struggle for peace" and about the "joyous life" of Soviet citizens, we designate as a Day of Sorrow and Irreconcilability.

This Day of Sorrow and Irreconcilability has been faithfully observed by Russian-Americans and by all Free Russians for the past six decades. Throughout all these years Russians free in mind and spirit have continually attempted to warn the Free World of the threatening Communist danger, but to no avail.

Once again, we appeal to the government of the United States of America to proclaim this day as a Day of Sorrow and Irreconcilability and we invite the citizens of this country to join us in prayers for those who perished at the hands of Communism and for the deliverance of those presently living under the yoke of Communism.

Mr. GORTON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HARRY F. BYRD, JR. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RADIO MARTI

Mr. HARRY F. BYRD, JR. Mr. President, I understand that there is an order that the legislation in regard to Radio Marti will be called up sometime today.

The PRESIDING OFFICER. There is no order to that effect. It was stated in an announcement.

Mr. HARRY F. BYRD, JR. I will change that to state that it is my understanding that the majority leader intends to call up that legislation today. My only purpose in rising at this point is that I have a very important engagement in Richmond, Va., this evening and it may not be possible for me to be present if this legislation is called up late this afternoon.

I rise to support the legislation. The Cuban people are wonderful people. Cuba is a wonderful island. I spent much time there in 1959, the year that Fidel Castro took over; thus, it will be 24 years on the first day of next month—January 1 of 1983—that Castro took over that island. That was a tragic day in the history of Cuba. Castro has turned Cuba into a Marxist dictatorship, yet Cuba is only 90 miles from the shores of the United States of America.

The purpose of the legislation, which presumably will be called up later today, is to attempt to bring to the Cuban people information which it is impossible for them to get through the state-controlled, Government-controlled, Castro-controlled news media in Cuba.

The Cuban-American community is one with which I have close ties and kept in close touch with for nearly 24 years now. The Cuban-American community is very much interested in this legislation.

As I mentioned earlier, I spent much time in Cuba in 1959. I want to go to Cuba again. I want to go to Cuba at the first opportunity, but I shall not go to Cuba so long as Fidel Castro maintains his Marxist dictatorship there.

I hope that before too many months pass, there will be some change in Cuba. I hope that at the earliest possible date those Cuban immigrants, most of whom live in the State of Florida, will have the opportunity to go back to their homeland and find their homeland free of dictatorship by Fidel Castro.

If a vote is taken in this session on Radio Marti, I ask that the record show that if this Senator from Virginia were present, this Senator would vote in the affirmative.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ARMSTRONG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. COCHRAN). Without objection, it is so ordered.

HOW WORLD WAR III WAS LOST

Mr. ARMSTRONG. Mr. President, as Congress considers various proposals to further reduce President Reagan's defense budget, I urge my colleagues to also consider Herb Stein's recent article in the Wall Street Journal, "How World War III Was Lost." It is a sobering message.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, Dec. 3, 1982]

HOW WORLD WAR III WAS LOST

(By Herbert Stein)

There were people who never accepted the term World War III. George Will, a respected columnist of the Carter-Reagan period called it "The War Against the Totalitarians, 1939- ." The implication, of course, was that it was all one war, first against the Nazis and then against the communists. Today, if he were still writing, Mr. Will would be able to complete the dates, making it 1939-1987. For, whatever the war was called, by 1987 the democracies had lost it.

Not a shot had been fired, and no articles of surrender had been signed. But the defeat was clear to all when the U.S. agreed to a United Nations resolution establishing a committee to monitor the world press, television and radio to prevent the dissemination of anti-peace-anti-people statements, the committee to be composed of delegates from Bulgaria, Cuba, Nicaragua, Angola and Cambodia. The Wall Street Journal and Commentary magazine were closed.

There had been other signs of course. In 1983 the OECD had agreed to an economic arrangement with the Soviet bloc under which the West would extent credit to the bloc at a fixed interest rate of 5%. In 1984 the convention of the Democratic Party had ruled the candidacy of Senator SAM NUNN for the presidential nomination out of order after the Stockholm International Peace Research Institute denounced him as a militarist.

In the same year the Republicans refused to renominate Ronald Reagan, choosing instead Senator CHAMBERLAIN, who had just returned from Moscow with a letter from Comrade Andropov offering to buy one million American automobiles a year on long-term, low interest credit. The leaders of an effort to establish a Freedom Party disappeared.

But the beginnings of this defeat came earlier, when the U.S. decided that it wouldn't pay the cost of defending the Free World or itself. For a time it had looked as if the U.S. had made the contrary decision, and would turn to rearming itself adequately after a decade of somnolence. America's humiliation in Iran and the invasion of Afghanistan had awakened even President Carter to the need for strengthening the armed forces.

Ronald Reagan ran for the presidency, and was overwhelming elected, on a platform of rebuilding military strength. He proposed a substantial increase in the defense budget. This would have raised real defense expenditures by 9% per annum, raising them as a share of GNP from about 5.5% to 7%, which was still less than the 10% spent in the Eisenhower-Kennedy years. There were some experts, such as the Committee on the Present Danger, who thought the Reagan defense budget was inadequate. Still, the Reagan program was a significant movement toward a stronger military posture. And it was adopted without much dissent by the Congress, Democrats as well as Republicans.

CUTS IN DEFENSE SPENDING

But in the winter of 1981-82 and the spring of 1982 things began to change. The president had to agree to some cuts in his defense budget. On June 10, 1982, the Republicans and conservative Democrats in the House adopted a budget which cut the president's proposed 9% annual increase in defense spending to 7%—a cut of more than 20%. That was regarded as a triumph. Even people devoted to defense agreed that it was the best the president could get. But it clear then that the rebuilding of America's military strength was bogged down in a morass of special interests and that the U.S. would not pay the costs.

This became even clearer after the 1982 election, when Congress returned with a determination to cut the defense budget. This attitude was a reflex to the high rate of unemployment, though no one had shown that cutting defense was a way to increase jobs. So in a special session of Congress in December 1982 the defense budget was cut a further 10%.

In a cliche expression of those days, this action "sent a signal." As the Committee on the Present Danger had said: "Any budgetary revision by the Congress cutting the projected levels of defense funding or deferring or stretching out the proposed five-year program, against the will of the president, would give a dangerous signal to the Soviet Union and to our Allies."

The Soviets got the signal that they did not have to worry about America's rearmament. The U.S. strategy of confronting the Soviet Union with a choice between arms limitation and an arms race was defeated because the threat of an arms race was seen not to be credible.

The Western Europeans also got the signal. They saw that they could no longer count on defense by the U.S. and therefore felt it necessary to cozy up to the Soviet Union. That accounted for the European drive, to which the U.S. acceded, for larger economic relations with the Soviet Union, even if on concessionary terms from the West.

And that gave the U.S. a signal back. With the Soviet Union increasingly adamant and Western Europe decreasingly cooperative with us, the value of what remained of the U.S. military buildup was increasingly in doubt. More and more it appeared that the choices for the U.S. were conciliation or suicide. And this led to a whittling down of the military program to a point at which the Soviets could simply instruct the U.S. not to seek military parity or survivability.

Those months between October 1981 when the Reagan defense program seemed invincible and December 1982 when it was clearly impossible are crucial for the history of the loss of World War III. What happened then?

Of course, there had always been people who opposed the program, either because they thought the Soviets were weak, or because they thought they were peace-loving or because they didn't mind adapting to the Soviet way of life. These people were quiet during the year following Mr. Reagan's election, which was the period of his maximum popularity and power. The country was all conservatives, nationalists and hawks then, and the few doves had no desire to expose themselves to ridicule.

But as the year wore on Mr. Reagan began to suffer the fate of other presidents. Overexposure, trivial mistakes, and inevitably controversial policies cut him down to a size that made attack at least feasible. When that happened the anti-defense "propeace" chorus in the country rose. This was undoubtedly reinforced by the worldwide "peace" movement which was, in part, a Soviet reaction to the fear of Western rearmament after the invasion of Afghanistan. (See "The Peace Movement and the Soviet Union," Vladimir Bukovsky, Commentary, May 1982.)

But the rising resistance of the peaceniks wouldn't by itself have been sufficient to turn the tide. What ended the Reagan rearmament effort was the disaffection or weakening of people who considered themselves, and were, supporters of a strong defense program. They had registered their support in 1980 by electing Mr. Reagan and again in 1981 by backing his defense budget. But they had done that when they thought that the defense program was free—that they wouldn't have to give anything up for it. The magic wand of economic growth would provide for everything.

As 1982 progressed it became clear to many of those people that defense was not free. And when that happened they discovered that while defense was important it wasn't the most important thing.

SACRIFICING NATIONAL SECURITY

For some, a defense expansion of the Reagan magnitude was less important than maintaining the growth of nondefense programs, mainly social programs. For others defense expansion was less important than preventing the budget deficit from exceeding a certain magnitude, which for some unclear reason turned out to be $150 billion. For others, defense expansion was less important than holding down taxes.

None of these people thought or said that they were prepared to sacrifice national security for some other objective. They all maintained that their combination of less defense and more of something else was the best strategy for national security. Those who preferred larger social programs held they were essential for the social solidarity which was a prior requirement for national security. Those who preferred to hold the deficit down said that was necessary to prevent an economic crisis which would make a continued defense buildup insupportable. Those who put lower taxes first said they were indispensable for the economic growth that was essential to national survival.

It happened that many in each group that placed the military buildup second to some other objective had a special interest in the other objective. Those who were most protective of the nondefense social programs in the budget tended to have constituencies which thought themselves the direct beneficiaries of those programs. Those who put restraining the deficit first tended to have an interest in financial markets which was not equally shared by the rest of the country. Many of those who put low taxes first were large taxpayers.

This didn't mean that they were insincere. They all honestly saw matters from their

own perspective. Of course, they were all wrong. As the country learned later—to late—the danger to the free world was not the inadequancy of American social programs, or the size of American budget deficits, or the height of American taxes. It was the inadequacy of the actual and prospective American military establishment.

In any case, the upshot was that, even though a large majority of the people thought that defense was important, they couldn't agree on how to pay for it. They couldn't agree on what to give up in order to have a larger defense program and could, therefore, agree only on a smaller one.

The tragic irony is that in the end, after World War III, the American people paid more than it would have cost to defend the country. They paid more even in the common coinage of taxes and deficits, because they had to raise the fund assessed by the U.N. upon America as its contribution to WEEP—the World Economic Equalization Plan. But far beyond that, they paid more in the rare coinage of freedom and the lives of those who would fight for it.

Mr. PERCY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. The time for morning business has expired.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The majority leader.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, in a moment I believe the distinguished chairman of the Committee on Foreign Relations (Mr. PERCY) will ask unanimous consent to call up a resolution in respect to Poland.

Mr. President, I ask unanimous consent, if that measure is made pending today and if there is a rollcall vote ordered today, that rollcall vote occur at 2 p.m. tomorrow.

Before the Chair rules, I may say I do not plan to ask for a rollcall. I believe the Senator from Illinois does not plan to either, but in the event someone should ask for the yeas and nays and they were granted, this would provide a time certain for the disposition of this measure.

I put the request.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, there will be no objection from this side on the conditions that have just been set forth by the distinguished majority leader.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PERCY addressed the Chair.

The PRESIDING OFFICER. The Senator from Illinois.

POLISH SOLIDARITY DAY

Mr. PERCY. Mr. President, on behalf of myself and Senator MURKOWSKI, and also Senators HELMS, GLENN, ABDNOR, HAYAKAWA, MATTINGLY, CHAFEE, LUGAR, ZORINSKY, RANDOLPH, KENNEDY, BIDEN, KASTEN, PRESSLER, HOLLINGS, PELL, SASSER, GORTON, LEVIN, BUMPERS, DIXON, INOUYE, D'AMATO, SARBANES, JACKSON, ROTH, HEINZ, GARN, QUAYLE, MOYNIHAN, NICKLES, and THURMOND, I send to the desk a resolution.

Mr. ROBERT C. BYRD. Mr. President, will the Senator add my name?

Mr. PERCY. Yes; I am happy to.

Mr. METZENBAUM. As well as mine.

Mr. PERCY. Mr. President, I ask unanimous consent to add the names of the distinguished minority leader as a cosponsor as well as the distinguished Senator from Ohio.

I send to the desk a resolution and ask for its immediate consideration under the terms and conditions specified by the majority leader.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

A resolution (S. Res. 501) expressing the sense of the Senate that the American people continue to protest martial law repression in Poland and wish to see it ended, remaining detainees released, and full and free dialog resumed with the Church and Solidarity; and urging the President to proclaim a national day of solidarity and prayer with the Polish people on the first anniversary of the imposition of martial law.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. PERCY. Mr. President, December 13 will mark the first anniversary of martial law repression in Poland. We scarcely need to be reminded of that, but we all feel a need to commemorate this sad occasion in some public and prominent way. We want to tell the Polish people that Americans have not forgotten them.

I am pleased that Lech Walesa is now back with his family, but I am concerned that he will not be free to speak out, or to participate in the shaping of Poland's future.

I hope that recent reports that martial law will soon be lifted are true, but I think we all can agree that Poles need real, not cosmetic, change and significant movement toward restoration of their freedoms.

It seems fitting that the Congress and Executive join in giving focus to our Nation's tribute to the courage and free heritage of the Polish nation by proclaiming December 12, the eve of this first anniversary of the repression of Poland's freedoms, a national day of solidarity and prayer for the people of Poland.

Senator MURKOWSKI has joined me and provided invaluable assistance in drafting a resolution calling for this day of prayer and solidarity, which I now introduce and ask for its immediate consideration.

Mr. President, earlier this year I was in Chicago at a Solidarity meeting with then Secretary of State Haig and heard the emotion and feeling expressed by many people of different national heritages. I presume that a very high proportion in that huge meeting in the city of Chicago were of Polish heritage. Chicago Polish Americans are almost a million strong. The feelings expressed there I think are shared by all American people, feelings of deep sadness for a nation that has been in the suppressive orbit of the Soviet Union. Poland professes to represent the workers, yet when these workers speak out in what is presumably a worker's state, simply asking for the right for workers to organize and to have something to say about the conditions under which they work, they were suppressed and their voices stilled, and martial law was imposed in Poland.

It is for this reason that those of us who have joined together in this resolution feel so strongly. We are not only saying to Polish Americans that we are not forgetting the dedication and feelings of deep sorrow and regret that you have as to what is going on in your native country, but also that we want, through Radio Liberty and Radio Free Europe, all the people of Eastern Europe to know that we have not forgotten. We want progress resumed in Poland toward our goal of workers being able to speak out on issues of importance to them, toward church and state being able to work together, not in opposite directions. We want those who are still jailed released, not punished so harshly for simply expressing a point of view that is shared by millions of people throughout the world.

I thank my distinguished colleagues for their consideration and for the support that they give to this resolution.

Mr. President, I ask unanimous consent that Senator GRASSLEY be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MURKOWSKI addressed the Chair.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. MURKOWSKI. Mr. President, it gives me great pleasure to join with my esteemed colleague (Mr. PERCY) in bringing before the Senate this resolution pertaining to Poland.

Senators may recall that some time ago I introduced a similar resolution, S. 497. Since that time, Senator PERCY and I have conferred and our staffs have prepared the resolution which we bring before the Senate today. As an American of Polish descent and as the junior Senator from the State of Alaska—the only State, I might add, with which the Soviet Union shares a common border, just as Poland—I urge the adoption of this resolution calling for the show of solidarity with the Polish people by all Americans.

Most Americans are aware that martial law was imposed in Poland late in the evening of December 13, 1981. The 21-member Polish military junta led by General Jaruzelski has, since that date, engaged in a systematic eradication of the precious few civil liberties which the Polish citizens and their chosen trade representative, Solidarity, had previously negotiated. The brief period of democratization which Poland experienced during the months before last December 13 has ended, but must not be forgotten.

The Polish people stand today deprived of basic human rights and freedoms by General Jaruzelski's regime. The swiftness with which the military moved and the severity of the military's response to opposition in Poland were startling. The brutality and oppression which the Polish people have suffered at the hands of their own Communist government should be recognized and remembered by the citizens of all free nations as evidence of the need for unfailing vigilance in defense of democracy.

The purpose of this resolution is to establish December 12, 1982 as a day of national prayer and reflection on which all Americans pause to consider the plight of the Polish people and to reaffirm their commitment to the ideals of freedom and democracy. I hope that through this expression of support and unity all Americans can symbolically demonstrate to the people of Poland and to the world our commitment to the goal of freedom.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MURKOWSKI. Mr. President, Senator Percy has asked for the roll-call vote tomorrow, and I concur in that request.

The PRESIDING OFFICER. Is the Senator asking for the yeas and nays?

Mr. PERCY. Mr. President, in accordance with the request of the majority leader, the request for the yeas and nays would then result in a roll-call vote at 2 p.m. tomorrow.

I ask for the yeas and nays.

Mr. MURKOWSKI. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. PERCY. Mr. President, I ask unanimous consent that the name of the distinguished Senator from New Jersey (Mr. BRADLEY) be added as a co-sponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

(By request of Mr. PERCY, the following statement was ordered to be printed in the RECORD:)

● Mr. BIDEN. Mr. President, it has been 1 year since the iron doors of martial law slammed shut on the people of Poland. This is, therefore, a somber anniversary, but one we must not fail to observe.

We cannot, of course, celebrate what has happened in Poland over the past year. Repression strikes at the liberty of free people everywhere. And, however sadly, we must face the fact that the Jaruzelski regime has largely succeeded in its effort to suppress the Solidarity movement and apply totalitarian solutions to the social and economic problems that continue to plague Polish life. Even the welcome release of Lech Walesa appears to symbolize nothing more than the confidence of a successful dictatorship.

But if the events of the past year offer us no cause for celebration, we would do a tragic disservice to the Polish people to mark this anniversary only as a milestone of a journey into bondage. The hopes and aspirations of a free-spirited people cannot be eradicated by the edicts of an authoritarian government. To believe otherwise would be to abandon a people who have given the world, throughout a long and difficult history, an inspiring and enduring example of courage and determination.

By the resolution we are introducing today, we recognize their national agony—but we also affirm their independent spirit with our own dedication to freedom and self-determination and we assure them of the continuing friendship and good will of the United States.

Mr. President, this resolution would not only declare the view of the Congress on the events in Poland but would also call upon the President to proclaim a national day of solidarity and prayer for the people and nation of Poland. It is time for us, as a nation, to join together again with hope and prayer and renewed spirit.●

Mr. PELL. Mr. President, I am co-sponsor of the resolution calling for an end to martial law in Poland and I strongly support its adoption by the Senate.

When the Polish people formed the Solidarity Labor Union in 1980 their message was clear. The Polish people told their government, the Soviet Union and the world that they valued the principles of individual liberty and freedom from governmental repression. Their courage, strength of conviction, and solidarity won international respect. I have often reflected on the appropriateness of their chosen banner, "Solidarity." It so aptly expresses a nation of 36 million people standing firmly, solidly together in defense of their culture, church and national pride. Under this banner all Poles, including clergymen, laborers, farmers, and intellectuals are unified in the resistance against oppression. Polish supporters of Solidarity have demonstrated undaunted courage in the face of threats and hardships.

December 13 marks the anniversary of the brutal crackdown on the spontaneous expression of the Polish people for freedom. It was 1 year ago on that date that the Polish Government imposed martial law. Official repression in Poland has been at times violent and often brutal. Through the past year thousands of patriotic Poles have suffered physical hardships in prison because of their support for Solidarity. These brave patriots have demonstrated that they cannot be intimidated or deflected from their commitment to freedom. Yet, it is clear that their human rights and civil liberties are being denied in blatant violation of the U.N. Charter, the Helsinki final act, and the universal declaration of human rights.

As a member of the Helsinki Commission. I am grieved by this breach of international agreements. In their actions the Communist officials flaunt their lack of respect for the rights of the individual, international law and their own people. The imprisonment for many months and the clumsy attempts to discredit labor union Lech Walesa with blackmail underscore this lack of concern for human rights and the gap between the Polish authorities and the Polish people. The gap widened when authorities thwarted the will of the Polish people by outlawing the free lawful trade union Solidarity in October 1982.

I support this resolution urging the President to proclaim a national day of Solidarity and prayer with the Polish people on the first anniversary of the imposition of martial law. In so doing, the American people express support for the many brave Poles, their protest of martial law and their desire to see the repressive measures lifted. The American people also wish to see the remaining detainees released and a full free dialog resumed among the church, Solidarity and Polish authorities.

Mr. BAKER. Mr. President, earlier, the Senate gave unanimous consent that the rollcall vote previously ordered on the Poland resolution occur tomorrow at 2 p.m. Implicit in that arrangement was that we complete action on that measure today and have the final vote tomorrow.

I should have included, and I now ask unanimous consent, that no further action on this measure be in order, except for a vote on final passage.

The PRESIDING OFFICER. Without objection, it is so ordered.

BUDGET WAIVER

Mr. BAKER. Mr. President, it is my understanding that the distinguished chairman of the Foreign Relations Committee is prepared to proceed to consideration of the so-called Radio Marti measure. There is a budget waiver on the calendar relating to that, which is calendar No. 923.

Mr. President, I ask unanimous consent that the Senate now proceed to the consideration of calendar No. 923, Senate Resolution 480, waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of H.R. 5427.

Mr. ZORINSKY. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. BAKER. Mr. President, I move that the Senate proceed to the consideration of that measure.

The PRESIDING OFFICER. The motion is not debatable.

Mr. BAKER. Mr. President, I think a point of order will be made.

Mr. ZORINSKY. Mr. President, I rise to a question of order.

It is not in order to consider the budget waiver resolution for H.R. 5427, since that waiver resolution was originally reported by the Committee on Foreign Relations in contravention of rule XXVI 5(a) of the Senate.

Though it lacked special leave, the committee met beyond the first 2 hours of the Senate session on September 21, 1982, and ordered the resolution to be reported at that time.

Mr. BAKER. Mr. President, it is my understanding that the factual situation alleged by the Senator is correct, and no dispute is made on that point. I assume, therefore, that the Chair will uphold the point of order of the distinguished Senator.

The PRESIDING OFFICER. The point of order is well taken, and the resolution is before the Foreign Relations Committee.

Mr. BAKER. I thank the Chair.

Mr. President, I make a parliamentary inquiry. Is it not in order at this time, under the provision of section 904(b) of the Budget Act to move to waive section 402(a) of the Budget Act itself with respect to this measure?

The PRESIDING OFFICER. That is in order.

Mr. BAKER. And that motion is debatable, is it not?

The PRESIDING OFFICER. It is debatable.

Mr. BAKER. In accordance with the provision of section 904(b) of the Budget Act, I move to waive section 402(a) of the Budget Act with respect to the consideration of H.R. 5427, a bill to authorize appropriations to provide for broadcasting of accurate information to the people of Cuba.

The PRESIDING OFFICER. The question is on agreeing to the motion.

Mr. ZORINSKY addressed the Chair.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. BAKER. Mr. President, will the Senator from Nebraska permit me, before he begins his presentation, to make one statement at the request of the chairman of the Budget Committee?

Mr. ZORINSKY. I yield for that purpose.

Mr. BAKER. Mr. President, the purpose of this motion relates to the timeliness of this legislation and is not meant to have any effect on the fiscal considerations of this bill. Both the Foreign Relations Committee and the Budget Committee met with live quorums present. The point of order involves the timing of when these committees met under Senate rule XXVI 5(a) and does not involve the substance of the budget waiver resolution.

By waiving the section 402 budget waiver resolution request, the Senate will expedite the consideration of this bill.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. ZORINSKY. Mr. President, I do not believe that titles III and IV should be waived, because there is a serious entitlement question involving the waiver of titles III and IV.

Section 6 of H.R. 5427 addreses the potential problem of Cuban interference with U.S. broadcasting.

I believe that this section also creates an entitlement because it provides sufficiently broad authority to obligate the United States to make reparations payments to broadcasters damaged by potential transmission interference by the Cubans.

Although section 6 does not authorize specific funds for this purpose, it does authorize the Federal Communications Commission to make payments to U.S. radio and television licensees and provides for criteria to evaluate financial claims submitted by these licensees.

This provision creates a new set of rights which meet the definition of entitlement under section 401c(2)(c) of the Budget Act, and that section defines an entitlement as spending authority to make payments the budget authority for which is not provided for in advance by appropriation acts to any person or government if under the provisions of the law containing such authority the United States is obligated to make such payments to persons or governments who meet the requirements established by such law.

Under the Budget Act if any committee reports out a bill containing such entitlement authority, the bill must be referred to the Committee on Appropriations for at least 15 calendar days following the date of reference. Even though it has been estimated that reparation payments could cost the U.S. Government as much as $40 million in the coming fiscal year, there has been no appropriate reference of this question to the Appropriations Committee. Thus, it is not in order in my estimation to proceed to the consideration of H.R. 5427 at this time.

Mr. President, I ask for the yeas and nays on the motion to waive the Budget Act provisions.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. GRASSLEY. Mr. President, I wish to speak at this particular time to alert my colleagues in this body to some of the history of this Budget Committee's involvement with this bill and also to express some of the concerns that I have.

First, there was a Budget Committee meeting back in the last of September on the question of the cost of this legislation and whether or not it was open ended, as has been suggested by the Senator from Nebraska, and also on the integrity of the budget process itself.

I commend the Senator from New Mexico (Mr. DOMENICI) for his cooperation in arranging that meeting, for it was very difficult to arrange in light of the heavy legislative agenda that we faced before our October recess. But I felt it was important that each member of the Budget Committee fully understand the problems related to H.R. 5427.

I wish to say that I voted for the motion before the committee because it was without recommendation and so that this issue could come before the Senate as it is now before this body. My major concerns at that time as well as now with granting the budget waiver are that we would be approving a waiver for untold millions of dollars and thus jeopardizing the integrity of the Budget Committee's process. Section 6 of H.R. 5427 authorizes the Federal Communications Commission to instruct the Board of International Broadcasters to compensate U.S. radio and television broadcasters for "expenses that they incur in mitigating the effects of the activities by the Government of Cuba which interfere with the transmissions of reception of the broadcasts of those licensees." The

problem is that we have no reliable estimate of what this cost might be.

I have absolutely no objection to compensating our broadcasters for the damage that might result if we get into a what is termed a "radio war" with Cuba. Moreover, the U.S. Government should bear the responsibility for its foreign policy initiatives and not unduly jeopardize the private interests of our country. Compensation, however, must serve only as a partial remedy and not a solution. The U.S. Government should be willing to take other actions to minimize and prevent Cuban interference.

It seems to me with the process we have now gone through and the time that has elapsed that we should have more answers to these questions now than we did in October. But I think that the issue is more than one of dollars and cents. In times of severe budget crunches, massive budget deficits, we have to give careful considerable time to the costs that are involved here.

At this point, about the only estimates that we have for the cost of this legislation are the actual appropriation request for the administrative, programing, and facility costs for fiscal year 1983 and an estimate by the Congressional Budget Office of over $40 million for compensation. The Congressional Budget Office used the National Association of Broadcasters' estimate that over 200 AM radio stations in 32 States are threatened by Cuban interference and multiplied the number of stations by $100,000 to $200,000. Unfortunately, this cost estimate covered only the costs of adjusting the facilities of our broadcasters in order to minimize interference. It ignores completely the costs incurred for lost advertising revenues, an expense that this legislation could well cover.

I do not have estimates of lost advertiser revenues from all stations, but I do have them for WHO Radio in Des Moines, Iowa, and I might say for the benefit of my colleagues, that my interest in this legislation goes to the property interests and rights of all broadcasters in America. It happens that of all the radio stations in Iowa, even though there may be more than one potentially affected by this legislation, at least the one most talked about and one that is most affected is WHO Radio and the reason for the concern about WHO Radio is that earlier in this process of the administration consideration of Radio Marti, there was a preliminary decision based upon very limited criteria that 1040 kilohertz would be the ideal frequency for Radio Marti. It happens that WHO Radio, Des Moines, Iowa, is a major radio station in my State, for both daytime and nighttime broadcasting and it has FCC licensed and protected service radius of 800 miles. It does reach a large area of the country. Unfortunately, broadcasting to these areas could be destroyed as a result of a jamming or counterbroadcasts to Radio Marti by Castro.

In the process, the loss for this one radio station has been calculated as high as $1,150,000 to $1,350,000 in net losses.

Although it might be difficult to claim that every American broadcaster would suffer to the same extent, it is easy to see that the Government could be paying out hundreds of millions of dollars per year. It was even suggested during the Senate Foreign Relations Committee markup of H.R. 5427 that we might be talking about the loss of revenues of many times that amount.

In light of the above it is extremely difficult for me to agree to the wisdom of rushing this piece of legislation. In light of the fact that we are in the final days of this session and that we only have 10 out of 13 appropriations bills that have not been passed yet, I would raise the question of whether in the lameduck session, as we are trying to close down the 97th Congress, that this is a time to be bringing this up.

But I think if we are then, of course, we are going to have to bring adequate understanding to my colleagues of the issues that are involved, particularly the costs.

As the Budget Committee staff pointed out in a memo it sent out on Senate Resolution 480, establishing a new Federal program such as Radio Marti is inconsistent with an overall freeze in discretionary appropriations unless compensating reductions are made in other programs under the jurisdiction of the Appropriations Committee.

I surely, as a member of the Budget Committee, would never put myself in a position, short of offering an amendment myself, to tell the Appropriations Committee what they ought to do, and I have great respect for their consideration of all these costs. But I do not think there has been any suggestion that the funds will come from some other part of the budget, that there has been any shifting, and I think that is something we need to take into consideration as well.

Although the staff found there is sufficient funding remaining under the Senate Appropriations Subcommittee on Commerce, Justice, State, and the Judiciary section 302 allocations to cover the $7.5 million of H.R. 5427, no suggestion is made in that document of a tradeoff that may be necessary to cover the additional millions of dollars that might be involved.

We are talking about the rights of individual business people in America, individual businesses, and it seems to me, as my senior colleague from Iowa said at the Senate Foreign Relations Committee, we must retain respect for individual property rights. That here we are in our Government trying to decrease regulation, the readjustment of taxes to encourage investments to revitalize our economy, and we are always concerned about the impact of Government on business. It seems to me that we need to recognize, through the consideration of Radio Marti, the potential costs to businesses, the potential damage that Radio Marti might cause to those businesses. We ought to give the same weight to the rights of the businesses as we usually do in this body in light of our concern about the Government's impact through regulation, taxes, and paperwork on businesses.

It would be wrong, it would be a dual standard, if somehow we in a very general vein address the problems that Government is causing business in America generally and in the abstract, but then at the same time not be equally concerned when there is a specific impact we could be making upon a large segment of American business, the broadcasters of America.

I am sure there has been no attempt to justify why this needs to be done right now. I assume the distinguished chairman of the Senate Foreign Relations Committee, Senator PERCY, in his discussion of this issue will state his views, and maybe even those of the administration, as to why this should be passed at this point.

I will have to admit that about 8 weeks have passed since it was considered by the Budget Committee to address my concerns at that particular time. But I think on these general issues of costs these general concerns about the impact it is having on business, they have not been answered yet and, of course, in this debate they can be answered. I hope in the process of considering this legislation that there is not going to be any insinuation that this is something that ought to be rushed through and not given the consideration that is its due, particularly for those of us who are concerned about budget costs.

I guess when I say those of us concerned about budget costs, it is a reflection of the rhetoric of the last election. Whether they be Members of the minority party of this body or Members of the majority party of this body, it seems to me that there was more concern in every region of the country, in almost every race, about the huge budget deficit and what ought to be done about that. And I am sure that concern is impacting greater in this lameduck session than it was in the period of time before the October 2 recess to go home to the grassroots and find out what people's views are.

I am not implying that the people of this country have any specific views on the issue of Radio Marti. But I do say that my constituents and those of every other Member, are more con-

cerned about budget deficits now. That is going to be a major influence on the debate in both this body and in the other body as we deal with those last 10 appropriations bills.

I thank the Members of this body for their kind attention.

Mr. EXON addressed the Chair.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. EXON. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. EXON. Are we working on a so-called privileged matter with regard to the budget waiver that has been advanced by the majority leader?

The PRESIDING OFFICER. It is a privileged motion. It is a debatable motion to waive section 402 of the Budget Act.

Mr. EXON. A further parliamentary inquiry, Mr. President: Is it an unlimited debate that is now taking place on this bill or is it controlled time?

The PRESIDING OFFICER. There has been no time agreement.

Mr. EXON. I thank the Chair.

Mr. President, let me echo the sentiments of my colleague from Nebraska and my colleague from Iowa and add to them, that I think the message should go forth very loud and very clear from this body right now that we are indeed wasting our time.

I think the leadership should understand, I think the chairman of the Foreign Relations Committee, my good friend and colleague from Illinois, and all in the Senate should understand, that starting now we are filibustering this Radio Marti measure. There are those of us who will stand on this floor as long as is necessary to see that this matter does not pass the Senate in this special session.

Mr. President, it seemed very clear, as the Senator from Iowa has just spent considerable time on in debating, that there is no reason whatsoever for us taking up this kind of a bill, even if it had merit which, in my opinion, it does not have, in this special session.

Everyone here who understands the procedures here knows full well that in a special session or any kind of a session where time is limited because of the calendar, it is not very difficult for anyone to oppose almost any kind of an action that one or more Senators would hope to take.

Therefore, I call very early in this debate for the managers of the bill and indeed the majority who brought this up to recognize and realize now that there will be those of us who will take advantage of every parliamentary procedure that we can to kill this bill, at least in this special session.

I say, Mr. President, that this bill is a dead duck and the quicker we recognize it as a dead duck then the better off we are going to be, as far as addressing the supposedly key matters that we were called back here after the election to address.

I only wish that the backers of Radio Marti had the wisdom and the foresight of other people that have other types of legislation that they think is necessary. I just wish that the backers of this bill would see the wisdom of those who were proposing a coal slurry pipeline that they wanted to rush through this session. I would hope that the backers of this bill would have the wisdom to recognize that there are a whole series of what is generally referred to as special legislation that was perceived to be appropriate to bring up during this special lameduck session. Such is not the case.

I simply say that I just wish that the advocates of Radio Marti were as wise and considerate of the devastating perils of our time, of which Radio Marti is not one that should be addressed by the U.S. Senate.

If we could get on with the critical business of this Nation that confronts us, then I suggest that we would not be perceived as so hapless and, at times, hopeless in the minds of many of the people of this country. I simply say, again, Mr. President, that we indeed are wasting our time as we debate the motion presently before us, which is the budget waiver.

But since that is before us, let me address myself to that for at least a period of time. I also am a member of the Budget Committee. I voted against this waiver.

Yes, I know that it is commonplace for people to say that whatever the Budget Committee does cannot be that important because it can be waived. Just come to the floor and make a motion, have debate and override the Budget Committee.

Now while I agree that at first blush the amount of money proposed under President Reagan's Radio Marti is not a staggering sum. It is certainly not staggering when you recognize the size of the Federal deficit today, which is staggering indeed. Certainly it is a relatively small amount when you recognize the size of our national debt today which is somewhere between $1.2 and $1.3 trillion and going up each and every hour.

But I think that regardless of the amount that Radio Marti proposes to add to the deficit—and that is what it will do, for what, in this Senator's mind, is not a good reason—then I think that if you are even for Radio Marti, which I suppose some people may be in the end, you should not be automatically voting for a budget waiver.

Mr. President, I am not familiar with the technical violations that may have occurred inside the committee headed by my friend from Illinois, our Foreign Relations Committee, the point that was brought up by my friend and colleague from Nebraska. I simply say, Mr. President, let us not at this particular juncture be willy-nilly in waiving the budget restraints of the Budget Committee. I think, to a considerable extent, not paying attention to the Budget Committee has been one of the main reasons that we find ourselves in this Nation today, in serious financial difficulties. Yes, it has been too easy, indeed, to waive budget considerations by the Budget Committee.

In fact, I have been critical, Mr. President, that the Budget Committee itself is too prone and too quick to endorse budget waivers on matters that it had previously either considered and not acted upon or, as is more often the case, with such budget waivers that is something that we did not consider and therefore as a second thought, as an afterthought, or upon further consideration we should proceed.

(MR. ABDNOR assumed the chair.)

Mr. EXON. Mr. President, I think it should be made clear once again that the only reason that this matter is being brought up on the floor of the U.S. Senate is that the President of the United States wants it. Somehow, Mr. President, the President of the United States seems to feel that it would be wise to continue his macho approach with regard to Cuba.

I would simply say that I share the concerns of the President of the United States with regard to the insurgence of Cuba into the affairs of many other countries. I certainly realize and recognize and, indeed, am most concerned about the increasing role that the Cubans are playing with regard to the havoc being caused in certain places in Central and South America today, a concern that the President of the United States himself is fully conversant with and one of the main reasons for his trip to Central and South America just a few days ago.

But, Mr. President, Radio Marti is one of those macho approaches that is going to be another step, I say, in shooting ourselves in the foot while we attempt to take macho actions against some country that we do not consider friendly. I intend to go into this in more detail in remarks that I will make during the ongoing portion of this debate, which I emphasize once again will be an ongoing debate.

But it seems to me that if we are going to try to broadcast the truth as we see it to the Cuban people, the leadership of Cuba are not going to sit idly by and let this happen. It seems to me that we should begin at least to consider what action the leadership of Cuba are likely to take against us if and when we see fit to go ahead with the proposal by the President of the United States. This is something else,

Mr. President, that I will be talking about in future and prolonged debate.

The facts of the matter are, as many of our friends in the broadcast industry have pointed out, that indeed, with the threat that the Cuban leadership have made, they would be able to carry on extensive jamming of some radio frequencies in the United States. And, as my friend from Iowa has just pointed out, who can tell what damages the U.S. Government would incur from lawsuits that likely would be filed against our action which provoked the initiation of jamming devices from Cuba?

You see, Mr. President, it is one thing to take action—ill-advised or otherwise—against those whom we consider unfriendly a long, long ways off. It is quite another, Mr. President, for us to be taking the action, which I term a macho action on the part of the President of the United States, that would boomerang not to our betterment but make Fidel Castro a new hero in certain parts of the globe for the relatively inexpensive action that he could take in response to this later plan by the President.

I would hope that at some appropriate time we could hear in some detail from the chairman of the Foreign Relations Committee not only what the cost would be now but what the majority of the Foreign Relations Committee feel the cost would be in the long term, or the possible cost that would be incurred by the American taxpayer for Radio Marti, which I would dub as President Reagan's folly.

Mr. President, the key matter before us is simply to recognize and realize that the leadership has called up before the Senate a time-consuming matter that is not going to be resolved. I would simply hope, Mr. President, that the leadership of the Senate would realize that there are many more important matters, of critical importance, which should be addressed at this time.

Therefore, Mr. President, I would hope that we would not even have to take a vote on whether or not to bring up the budget resolution, but if that vote is taken, if the budget waiver is approved by the Senate, then I can simply say that there will be more endless debate because I see no way that this measure has the votes to pass because of the time constraints of this special session.

I oppose the waiver, and I certainly will oppose every step of the process, as I have said, to obligate this country for Radio Marti because it is not in the best interests of the farmers of this Nation who depend on some of the radio stations that have been referred to, but even beyond and above that it is my conviction that this is not in the best interests of the United States in either the short or the long run.

I thank the Chair.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. PERCY. Mr. President, my comments will be very brief at this point. I will not make any comments on the substance of the bill itself at this point, but merely to the point of order which has been raised and the pending motion of the majority leader.

Mr. President, on September 21, 1982, the committee met and ordered reported by a vote of 12 to 4 a budget waiver resolution in accordance with section 402 of the Congressional Budget Act of 1974. That meeting took place 2 hours after the Senate convened and was thus technically in violation of the Senate 2-hour rule.

However, at the time of the vote, I was confident that I had the agreement of the full committee to proceed. I support, therefore, Senator BAKER's motion to waive the Budget Act.

The compensation provisions of this bill are subject to the authorized amounts contained in this legislation, that is, $7.5 million, or to any further authorized and appropriated funds. This bill does not provide for open-ended entitlements.

The Budget Committee has studied the cost of this bill. It is not recommending any amendments to restrict any possible entitlements.

This vote, therefore, is not at all on the merits of Radio Marti. It is also not on the Radio Marti budget. It is simply on a technical point that should not be allowed to hold up the consideration by the Senate of this bill.

Mr. CHILES. Will the Senator yield?

Mr. PERCY. I am happy to yield.

Mr. CHILES. I just want to say to the distinguished chairman of the Foreign Relations Committee that I sat on the Budget Committee. This matter did come before the Budget Committee. One time it came through in a way that we often waive the Budget Act, sort of by passing a slip and receiving the consent of the membership. There was some objection to that in regard to this even though the amount of money in this was relatively small. But some of the members felt that we should look at it and actually hold a meeting on it.

Because of those objections, the Budget Committee did hold a formal meeting. At that time, we did waive the matter, formally, at the Budget Committee meeting. Normally, sitting on the Budget Committee, I would be kind of constrained to be against a waiver of the act itself, as the majority leader has made, but I think in no way does this jeopardize the Budget Act or the Budget Committee's action because we actually met on this provision. We did formally waive the act. That was taken. Now the problem appears to be this technical one as to whether the Foreign Relations Committee in fact was meeting while the Senate was in session. But I think that in no way—and I want to concur with what the chairman has said—does that raise a budget question because the Budget Committee did carry out its duty and its responsibility in every manner and means.

So the majority leader's motion to waive the act is to simply get around this technical requirement that has now been raised in regard to the meeting time of the Foreign Relations Committee.

I certainly concur with what the chairman has said.

Mr. PERCY. I thank my distinguished colleague. I would like to make it clear that at the appropriate time, after debate has concluded on this particular point, there will be a request for the yeas and nays on the majority leader's motion.

Inasmuch as the Senate lameduck session is a very limited session, and the majority leader has already announced that there is a certain amount of business that has to be taken care of, and he has announced the schedule that he intends to adhere to, I would hope that everyone would recognize that though we have a technical point here, from a practical standpoint, if we are to really give serious consideration to Radio Marti—and I hope that we will—the committee favorably reported it out by 2 to 1, and I know my distinguished colleague from Florida favors this bill—to really be practical about it the majority leader's motion should prevail. I intend to support it and vote for it. We should debate this issue. We should proceed with it and hopefully adopt the bill.

Mr. CHILES. I certainly concur. I think because it is purely a technical motion now, and that the Budget Committee did actually hold a meeting on this bill, did actually give the waiver after due consideration of it, simply the waiving of the act is to just take us around the dilemma of the technicality of the Foreign Relations Committee meeting a couple of hours after the Senate went into session. If we stopped every bill on which that has been done, there probably would never be any legislation that would pass this body, or very little.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. ZORINSKY. Mr. President, as a matter of clarity I ask unanimous consent that the following remarks be considered an extension of my initial remarks on the motion for purposes of the two-speech rule.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ZORINSKY. Mr. President, I understand that the Budget Committee was sufficiently disturbed by the creation of an entitlement by H.R. 5427 to the extent that it reported the

budget waiver without a recommendation. Generally, in the time that I have been in the Senate, if a committee felt in reporting out a bill that they had sufficient support, they generally reported it out with a recommendation.

I think it should be pointed out that this bill came out without recommendations. One of the main reasons for that nonrecommendation was the fact that they were concerned about the creation of an entitlement by H.R. 5427.

Mr. President, we ought to be clear about what we are doing here. I wish to bring to my colleague's attention an article I received from a Miami newspaper within the past week. The headline says, "Latin radio solicits tips from Cuba." It is by the Herald staff writer, Ana Veciana-Suarez. It goes on to say:

Emboldened by an increase, in transmitting power, Spanish-language radio station WQBA—which I assume is in Miami, Florida—is extending its tip line from Little Havana across the Florida Straits and into the heart of Cuba.

Monday,—

this is two Mondays ago—

the station asked its listeners on the island to phone or write the studios at SW Eighth Street and 27th Avenue with information about news and social events in their hometowns.

"We are interested in anything, including traffic accidents," news director Tomas Garcia Fuste said. "We obtain very little information from the island, so whatever material we can get is important for our listeners, both in Florida and in Cuba."

WQBA, 1140 on the AM dial, is trying to live up to its name of *La Cubanisima* (the most Cuban) by relaying all the news that can be leaked out of the island, Garcia Fuste said. Last week, WQBA inaugurated a new 50,000-watt transmitter that makes it one of the most powerful stations in South Florida.

I ask my colleagues to bear in mind that we are today debating something so important that the rest of the Nation wonders and sits in amazement as we continue to have over 10 percent unemployment, as we continue to have a huge deficiency in our foreign policy, and as we continue to go along our merry way with trying to pass a continuing resolution while not having the time for important things like passing appropriations bills on the floor of the Senate.

It is no wonder no one wants us to get a raise in salary. We do not deserve a raise in salary when we debate Radio Marti to the detriment of unemployment in the United States of America. It is even more ludicrous when you get an article from a friend in Florida which says there is a radio station right now doing the same thing we are spending all this time trying to get another radio station to do for them.

There is a big difference, I must point out. That is, the Radio Marti that we are debating is paid for by the taxpayers, whereas the radio station WQBA is meaningless to the taxpayers because it is only private enterprise and certainly would not be qualified to pay off any patronage that may have been promised by politicians of either party by its creation.

The increased power also helps the station overcome the high-pitched tone that the Cuban Government uses to interfere with nightly broadcasts.

During the morning news show Monday, the broadcasters invited their Cuban listeners to join the station's "award-winning corps of correspondents" by writing or phoning news items to the studio. Garcia Fuste said employes of the station will continue to recruit "correspondents" during the station's regular programming.

"This is something we decided unofficially," Garcia Fuste said. "It is not a management decision. Our duty, first and foremost, is to the listeners in South Florida and then to the people of Cuba who do not receive any news from the outside or from within their own country."

I point out to my colleagues that, as a member of the Committee on Foreign Relations, during our hearings, I asked, "What is Radio Marti going to do after they broadcast the news to the so-called Cuban people in Cuba who are not aware of what is happening in their country?"

The reply was the main thrust of our broadcasting, besides the news, will be baseball games and Spanish music

Mr. President, I know the American people will love to hear that their tax dollars will be used to pay for broadcasting baseball games and Spanish music to the Cuban mainland. Those poor people must have no other way of getting that type of transmission without spending American tax dollars to do that.

It is not known how many people listen to WQBA in Cuba, but Garcia Fuste said the station receives about 10 letters a week from listeners there. Most of the letters are addressed to hosts of religious and musical shows.

Before the increase in transmitting power, WQBA's listeners in Cuba were scattered in the provinces. Now, WQBA management believes the station will be heard throughout the island, including Havana.

"We expect the response from Cuba to increase." Garcia Fuste said. "Just a couple of days ago, we received a call from a man in Camaguey who had heard about his brother's death during our news show."

Though WQBA intends to continue its pitch for Cuba-based listeners, Garcia Fuste said he is worried the Fidel Castro government will try to find a way to jam the Little Havana station.

"We are trying to keep this as much a secret as we can." he said.

I apologize for not helping keep it a secret, although I felt it was important, when talking about spending millions in taxpayers' money, that we do point out the fact that there is a radio station contributing to that news and obviously, Radio Marti would not be secret in its essence, either, if by some quirk of the imagination, it were allowed to pass in this Congress.

Mr. President, we ought to be clear about what we are doing here. The bottom line of the Radio Marti proposal is that we are prepared to spend millions of dollars on a fancy foreign aid program in a time of economic hardship and cuts in domestic areas from assistance to farmers to aid to the poor. We are willing to spend those millions with the full knowledge that not the first minute of Radio Marti broadcasting will ever be heard in Cuba. Not any individual in this assembly can assure or guarantee the American public and the American taxpayers that Radio Marti, upon its completion, will ever have one broadcast received in Cuba, due to the jamming ability of the Cuban radio industry. Not 1 minute of guarantee.

In all probability, it will be jammed and the jamming will wreak havoc on the American broadcasting industry and its listening audience. So we shall be sacrificing our taxpayers' right to listen to the truth in an effort known in advance to be futile to offer the same to the Cubans and we shall do it with our taxpayers' money and at the risk of a possible dangerous confrontation and an entirely avoidable radio war.

Let us be clear about it, Mr. President, so that when the chickens come home to roost, no one can claim ignorance about who laid the egg. Mr. President, to speak plainly, this is a stupid idea. We are spending millions of dollars in construction, operation, and compensation costs for a radio station whose broadcasts in all probability will never be heard.

This particular concept of Radio Marti is a bomb that will not explode, a plane that will not fly, a ship that will not float. How can such a silly notion ever be justified to the American taxpayer? When our constituents awake to Radio Havana instead of the morning news and weather reports, which of us will feel comfortable in saying, "Yes, I voted to spend millions of our tax dollars to bring the American public this kind of service"? Will the taxpayers be outraged that Castro denies Cubans the truth or will they be outraged that their own Government has done the same to them? How that outrage will flow when they learn that the Cubans have never heard the first minute of a Radio Marti broadcast, despite the millions of dollars, while their local stations have been replaced by Radio Havana by the courtesy of the U.S. Senate. Even if Radio Marti could be heard, the only likely result would be to increase the flood of refugees to our shores.

I heard one of our people during the course of debate in committee indicate that if truly the Cuban population finds out how great our country really

is, imagine the refugees that would want to come to our country in addition to those who have already made a beeline and created an almost intolerable condition in the State of Florida.

Last year we debated emergency aid during the refugee influx in Florida. That cost a few hundred million of the Federal tax dollars that we do not have. Inasmuch as we are currently spending in deficit, here is more money we are going to spend that we do not have.

As I said before, with the hundreds of millions that we—and I supported it—sent to Florida to help in the current refugee problem, this will exacerbate the situation because the philosophy is to enhance awareness in Cuba of how great our country is, in the hopes that more refugees will seek shelter and haven in Miami and other places in Florida.

Our taxpayers will be very happy to also fund that adventure with dollars we do not have.

We already have 1 million Cubans in this country, and that is 10 percent of the Cuban population. What percentage are the proponents of this amendment aiming for—20, 30 percent, or higher? And how much is another wave of Cuban immigration likely to cost the taxpayers of America?

Mr. President, this is a vote to spend millions of dollars. The Congressional Budget Office estimates that compensation costs will be at the level of at least $40 million. Broadcasters estimate the potential damage to them in the hundreds of millions of dollars. There are construction costs already borne by the Department of Defense. There is another $2 million for an additional transmitter in the future if the station is ever to reach the more populous eastern part of Cuba. The costs to the American radio audience deprived of their ability to listen to local radio stations cannot be expressed solely in terms of dollars and cents. All of this on top of the costs for operation of the station requested by this amendment.

Yes, Mr. President, this is a vote to spend, a vote for foreign aid, and a vote to enshrine nonsense in law by funding a radio station that will broadcast but never be heard.

Mr. President, I did not oppose the Soviet grain embargo because I favored the invasion of Afghanistan, nor did I oppose the European gas pipeline embargo because I agreed with the suppression of freedom in Poland. In the same way, I do not oppose Radio Marti because I support Fidel Castro or Cuban communism, I have opposed all three because they harm us far more than they do the Communists.

Mr. President, I think that we should make ourselves aware of some of the background concerning Radio Marti, and Senators who are not members of the Senate Foreign Relations Committee I think will be very interested to hear the Radio Marti final report, which is a few hundred pages, but I think in the essence of intelligently voting on this type of legislation they should be made aware of it. I will begin to read the Radio Marti final report which was prepared by the Presidential Commission on Broadcasting to Cuba dated August 17, 1982:

The members of the Presidential Commission on Broadcasting to Cuba were appointed in January 1982 with a mandate to develop a recommended plan for radio broadcasting to Cuba. Based on research conducted by the Commission's staff, information provided by the State Department and other Government agencies, testimony and materials received in open meetings and its own deliberations, the commission has concluded the following:

The concept of Government-sponsored broadcasting to Cuba by a surrogate home service along the lines of Radio Free Europe and Radio Liberty, delivering impartial news and information and designed to provide the Cuban people with the accurate information needed to make informed judgments on their Government's policies and actions, is both sound and important.

Mr. President, I should like to digress from reading the Commission's report to a piece of literature which was published by Harper & Row, by Hugh Thomas, and it is entitled "Cuba in Pursuit of Freedom." I would like all of those who support Radio Marti to listen to what Jose Marti wrote himself. It is in chapter 26 of this document by Hugh Thomas. Radio Marti, our proud transmission system, is being proposed to help this bastion of freedom of ours, the United States of America, this wonderful land of ours and our great democracy impart the truth to the Cuban people.

I read, and I hope JESSE HELMS is listening also:

Jose Marti had acted fast for more than one reason. In May Jose was to write:—

And this is who we have named this freedom radio station after—

It is my duty . . . to prevent, through the independence of Cuba, the United States of America from spreading over the West Indies and falling with added weight upon other lands of Our America. All I have done up to now and shall do hereafter is to that end—

To prevent the United States of America from spreading over the West Indies.

He goes on to say:

I know the Monster, because I have lived in its lair—and my weapon is only the slingshot of David.

Now, this is a fellow whose name is being chosen to head the radio station which our taxpayers will pay for; that we will all proudly say is representative and symbolic of freedon in our country, an individual who recognizes the United States of America as a monster and who will dedicate his life to making sure the United States does not spread its dominance over the area.

I think that is a rather curious way of using Federal tax dollars, even when you put it up against priorities such as the MX missile, which some people have even talked about as of late. In the other body, I think they are currently debating that on the floor, and it is of current concern in our country.

The concept of government-sponsored broadcasting to Cuba by a surrogate "home service" along the lines of Radio Free Europe/Radio Liberty (RFE/RL), delivering impartial news and information and designed to provide the Cuban people with the accurate information needed to make informed judgments on their government's policies and actions, is both sound and important.

The already incorporated but non-operational Radio Broadcasting to Cuba, Inc., patterned after RFE/RL, Inc., is the most appropriate vehicle to conduct such broadcasting, using the name "Radio Marti."

Oversight and supervision of federal grants to RBC, Inc. might best be lodged in the Department of State during the initial start-up phase; thereafter, an informed choice for oversight could be made from among several options, including the International Communication Agency (ICA), the Board for International Broadcasting (BIB), or a separate, new agency. The Commission recommends that its term be extended for a period not to exceed one year from the effective date of legislation authorizing and funding RBC, Inc., so that it can make further specific recommendation on permanent oversight authority based on Radio Marti's first year of operation.

Credibility is crucial and to be credible, the programming of Radio Marti must be accurate and impartial.

I would imagine that the baseball portion and the music portion would have no difficulty being impartial, and I cannot see the credibility being very crucial, inasmuch as it would be the voice of truth.

In order to reach the majority of Cubans effectively, broadcasting should be conducted on the AM band. The Commission recommends that Radio Marti operate on one basic, well-established frequency on the AM band. Although 1040 kHz has already been identified and assigned as the frequency for Radio Marti, the selection of a frequency may have to be repeated if proposed legislation passed by the House of Representatives is adopted and passed by the Senate. This process would ensure that the most appropriate frequency for Radio Marti is chosen, while taking into account the interests of U.S. broadcasters.

Cuban interference with U.S. AM broadcasting has been a growing problem for many years. While Radio Marti may be made the scapegoat for Cuban interference, the Commission believes that abandonment of Radio Marti would certainly not eliminate nor probably even reduce such interference now or in the future.

Just recently, I might add, due to Radio Marti's advent in the committee, the Cuban Government was able

to demonstrate their jamming ability when, one morning not too long ago, we woke up to Spanish music on WHO in Des Moines, Iowa, and several other radio stations throughout the Midwest. So they do have that capability and have demonstrated that.

The Commission recommends that the Department of State keep the door open to opportunities to address the interference problem through diplomatic channels.

The Commission considers the Administration's request of $10 million for first-year funding to be reasonable. Effective coverage of Cuba will require two transmitters, one located at a Caribbean site. Effective programming will require a sizable, well-trained professional staff because of Radio Marti's unique research and development requirements, including the need for extensive information gathering.

INTRODUCTION

A. Commission's authority

The White House announced on September 22, 1981 its intention to begin radio broadcasting to Cuba, establishing a radio service to be called "Radio Marti." The text of the White House statement is at Appendix A.

The Presidential Commission on Broadcasting to Cuba was established by Executive Order 12323 of September 22, 1981 (see Appendix B). The functions of the Commission are to "develop a recommended plan for radio broadcasting intended for transmission to Cuba" and to "examine issues related to effectively carrying out such a plan for radio broadcasting to Cuba. These shall include, but not be limited to, possible program content, information gathering, writing and editing needs, staffing requirements, legal structure for a broadcasting organization, proposed legislation, sample budgets, and the location, structure and function of possible broadcasting stations."

The President appointed ten members of the Commission on January 19, 1982, with F. Clifton White as Chairman. An eleventh member was named in June. A list of Commission members is at Appendix D.

The Commission held closed meetings on February 5, March 2, March 30 and May 3. Open meetings were held on March 2, March 30, and May 3. The open and closed meetings scheduled for April 16 were postponed to May. Summary minutes of these meetings, together with testimony received, may be found in Appendix E.

Chairman White testified before the House Committee on Foreign Affairs on March 3 and the House Subcommittee on Telecommunications, Consumer Protection and Finance on May 10. He also testified before the Senate Committee on Foreign Relations on July 1, as did Senator Stone. Copies of these statements are in Appendix F.

B. The concept behind Radio Marti

The Commission believes that radio broadcasting to Cuba is the logical extension of an important concept begun with the establishment of Radio Free Europe and Radio Liberty more than thirty years ago. Radio Marti would fill an important informational void created by more than twenty years of censorship and control of the Cuban media by the Castro government. Because of that control, the Cuban people are not only denied the fundamental human right of free access to information and ideas but are largely unaware of their government's mismanagement at home and adventurism abroad.

The Administration has proposed the creation of Radio Marti as part of a general foreign policy effort to increase the domestic cost of Cuban adventurism and to moderate Cuba's foreign policy. The purpose is to provide the Cuban people with the information needed to make informed judgments on their government's policies and actions so that they may be better able to hold their government accountable.

That should mean we are going to create the radio station to make sure that the Cuban people are made aware of their government's policies and actions so that the Cuban people may be better able to hold their Government accountable.

I think that is a rather unique task to set out for them to do in a Communist nation such as Cuba.

The Commission strongly endorsed this concept at the outset.

The Commission believes that the proposed name of the broadcasting entity, Radio Marti, is entirely appropriate to the concept outlined here. Jose Marti, the Cuban liberator, was indeed sometimes a critic of the United States. But he was always passionately dedicated to democracy and freedom, to the truth, and to the independence of Cuba from foreign dominance from whatever quarter. This credo should be mirrored by Radio Marti. Marti is a symbol of a free Cuba to Cubans of all political views, and Radio Marti should emulate those values.

C. PREVIOUS BROADCASTING TO CUBA

The Commission reviewed the history of U.S. broadcasting to Cuba in an effort to draw lessons for Radio Marti. The U.S. once maintained a clandestine radio station, Radio Swan and later Radio Americas, which broadcast extremely partisan views, information and material designed for short-term psychological effect. Those broadcasts ended in the 1960's. From the early 1960's until 1974, the Voice of America broadcast a Cuba-oriented daily program called Cita con Cuba ("A Date with Cuba"). It was taken off the air in 1974 because the United States Information Agency considered that its general Spanish language broadcasts sufficiently covered that agency's specific information objectives in Cuba.

The Commission's review served to reinforce the conviction that Radio Marti should be an overt activity with full Congressional approval and that it be, from the beginning, a long-range, non-confrontational effort clearly identified as a U.S. Government-sponsored activity. Radio Marti must not be, nor appear to be, identifiable as an emigre undertaking nor as reflective of any partisan view or perspective. Rather it must be objective, non-partisan and thoroughly reliable so as to earn for itself a reputation as fully credible.

D. INTERIM REPORT AND RECOMMENDATIONS

This Final Report affirms the Commission's earlier Interim Report of May 23, 1982, adds to it additional information received and casts most of its preliminary conclusions and recommendations in final form. It does not make a recommendation concerning legislation because the Administration submitted proposed legislation to authorize radio broadcasting to Cuba to the Congress before the Commission's members were appointed. If its mandate is extended, the Commission intends to make additional recommendations based on one year after Congress authorizes and funds Radio Marti.

FINDINGS

Based on statements submitted at its open meetings, information it requested, and its own deliberations, the Commission has made the following findings.

A. THE NEED FOR RADIO BROADCASTING TO CUBA

For decades the United States has found radio the most effective means at its disposal to provide the truth to the peoples of the Soviet Union and Eastern Europe. Radio Free Europe and Radio Liberty have proven their worth in this effort. Yet in Cuba itself, Communist propaganda has no similar competition and there is no alternative view of the Castro government and its actions. Radio broadcasting aimed specifically at Cuba would provide such alternative views.

I wonder what the administration would say if one of our amendments that we include to this piece of legislation were to offer a separate radio broadcasting facility to broadcast into the People's Republic of China because obviously their people have no alternative view of their government also.

Communism well understands the power of ideas and devotes enormous resources to propagating its ideology and view of events with considerable emphasis on radio broadcasting aimed at specific countries. The Soviet Union outspends the U.S. by 7 to 1 in the area of international broadcasting and information. The Soviet Union and its Caribbean client, Cuba, outbroadcast the U.S. in Latin America by a ratio of 5 to 1 in terms of hours on the air. Radio Moscow is retransmitted to Latin America from Cuba, and Cuban radio propaganda echoes Radio Moscow themes. Cuba alone broadcasts 280 hours a week to Latin America and the Caribbean. The U.S. even lags behind some of its Western allies in broadcast hours around the world, but especially in the Caribbean, an area of strategic concern to the U.S.

Some critics have questioned whether Radio Marti would find an audience among the Cuban people, claiming that the Cuban population is largely antagonistic toward the United States. Statements by Cuban officials, including several by President Castro, indicate that the Castro government is very concerned about the effect Radio Marti could have on the Cuban people. This suggests that the Cuban people, and especially the young (44% are under 20, 66% are under 35), may be a more receptive audience than those critics are willing to admit. Other critics argue that any news from a U.S. Government source is suspect in Cuba. Yet, Cuban officials themselves readily admit to listening to the VOA because it is comprehensive and accurate.

Other critics have suggested that Cuba is a more open society than generally believed, that the range of information available in Cuba may be greater than recognized, and that there is wider political participation and greater freedom of expression than assumed. But, according to several Cuban analysts, the recent increase in mass organizations, the Mariel exodus, the ascendency of hardliners among top-level decisionmakers, and the implementation of a new, tougher penal code in November 1979 are all evidence of a decreased liberalization of Cuban society since early 1980. The "Country Reports on Human Rights Practices" submitted to Congress under this Administration and the last document show little free ex-

pression and political freedom exists in Cuba.

According to the 1979 Human Rights Report, "all political, economic, social, and cultural activities are under close control of the Communist Party. No political opposition is allowed. The press is owned and controlled by the Party apparatus. Freedom of speech is severely circumscribed." The 1979 Inter-American Human Rights Commission Report on Cuba noted that "the legal system in Cuba prevents free expression and any expression of disagreement with the socialist system. There are individuals who are in prison for the mere fact of having expressed their opposition to the system." According to the 1981 Human Rights Report, "All group activities in Cuba are controlled and monitored by the Communist Party and political block committees." While Radio Marti can do little about the limited outlets for expression in Cuba, it can significantly increase the availability of information to the Cuban people. Like RFE and RL at the beginning, Radio Marti will need to carefully establish its credibility and earn its audience. Whether people live in Gdansk or Havana, those in a closed society thirst for more information.

Artistic autonomy does not exist in Cuba. Infringement of intellectual freedom is accomplished through a Cuban form of "social realism" which punishes by law any "ideological deviation." Writers, filmmakers, educators and artists face the choice of conforming, departing or facing imprisonment.

Mr. President, at this time I ask unanimous consent to yield the floor to the distinguished Senator from Rhode Island (Mr. PELL) for the purpose of a statement without losing my right to the floor and without this being considered the end of the speech for the purpose of the two-speech rule, and I ask that I be recognized at the conclusion of the Senator's remarks.

The PRESIDING OFFICER (Mr. GORTON). Is there objection? The Chair hears none, and it is so ordered. The Senator from Rhode Island.

Mr. PELL. I thank the Senator from Nebraska very much indeed, Mr. President.

I congratulate him and felicitate him, on his remarks and on the thrust of his argument, and I support him to the hilt.

I join him in rising in opposition to the motion to waive the Budget Act with respect to the Radio Marti measure.

Certainly in this brief session of Congress, with its first week already beyond us and with only 2 weeks left, there are many more urgent issues with which we might well be dealing. But with the issue at hand, one which I have strongly opposed in the past, one that I think the national interests would be best served by omitting at this time or in fact any time, I rise to take the floor.

Amid the accolades for President Reagan's bold initiative to bring peace to the Middle East, the Senate Foreign Relations Committee—in a little-noted action—and without the vote of this particular Senator—approved this administration's proposal to beam anti-Castro broadcasts into Cuba. This could be the first step in a process that threatens to undermine the prospects for peace at our back door, that threatens to destabilize even further the relations between our two nations.

According to the administration, Radio Marti's purpose is to help the Cubans know more about their country, and thus hold their government accountable in ways it is not now. This sounds harmless, although to my mind it evokes memories of Radio Swan, a CIA-sponsored station run by Cuban exiles who broadcast inflammatory propaganda to Cuba in the early 1960's. I remember I was concerned and opposed to the action of Radio Swan almost 20 years ago, and I still remain opposed to actions of this sort which seek to exacerbate and to destabilize relations. I think at this point the national interests of the United States would best be served by achieving some small degree of normalization and not go in the opposite direction and on an opposite course.

In any case, there are indications that putting Radio Marti on the air will set off a chain reaction of retaliation and counterretaliation. This could create such a heated confrontation with Cuba that it would destroy whatever chance there is of persuading Fidel Castro, through quiet diplomacy, that it is in his interest to abandon his interventionist policies.

The administration is apparently willing to take that chance in the belief that a policy of bluster and confrontation will succeed in the 1980's, even though it has failed miserably in the 1960's and 1970's. I imagine that if there is no change we will have the continuation of this policy right through the century, and I see no possible good achieved from it.

I think we can look at our relationship with Cuba now or 20 years ago and find not only no improvement but even greater worsening. Cuba is today, Castro's Cuba today, what it is, in part, because of earlier American policies. Only different policies can alter the behavior of the Frankenstein monster that we have helped create.

We mounted one major invasion against Cuba, the Bay of Pigs, and only the CIA knows how many minor ones, as well. We sought to strangle and isolate her economically, sponsored several attempts to assassinate its chief of government and wonder why Cuba supports the most virulent strain of anti-American communism in the world today and why it is so closely bound to the Soviet Union. We have helped give it cause in this direction.

But the Reagan administration still seeks victories over communism, which makes it difficult for the lessons of history to be applied. Cuba was targeted for tougher treatment by an administration eager to discredit President Jimmy Carter's efforts to engage Castro in a peaceful dialog. According to Wayne Smith, who was until recently the head of the U.S. Interests Section in Havana, the administration has ignored several Cuban overtures to resolve differences through diplomacy.

The proposal would be more palatable if it had been accompanied by formal diplomatic relations with Cuba. Radio Free Europe, which I support, broadcasts to countries with which we have diplomatic relations. But Radio Marti appears destined to prevent rather than coexist with normal diplomatic relations.

Administration witnesses have testified that it would be wrong to rule out trying again to negotiate with Cuba. Yet those same spokesmen rejected less provocative proposals. Now there is the very likely prospect that Cuba will interfere with American broadcasts in response.

One of these proposals, which I offered in the committee, would have assigned Radio Marti's mission to the Voice of America, which Castro has tolerated and whose integrity would insure that no propaganda or incitements to riot would be broadcast. Moreover, the Voice could do the job at half the cost of Radio Marti, an important consideration when domestic programs are being slashed to the bone.

The attitude of the Reagan administration, however, can only lead me to suspect that it welcomes a confrontation with Cuba over Radio Marti.

I am convinced that Cuba will react in kind and the administration will escalate and react in turn. But how? That is what worries me. Representative TOM HARKIN recently told Congress that, according to administration officials, Cuban retaliation through broadcast interference would constitute an act of war justifying American military strikes against Cuban transmitters.

If such actions are seriously contemplated, which I trust they are not, the consequences would be to boost Castro's prestige and aggressiveness—and, more important, to create the same kind of rift in United States-Latin American relations that the sanctions against participation in the trans-Siberian pipeline have created in Europe.

The administration was justifiably praised for its Middle East peace initiative, and the reason for that praise was that its objective was to advance the cause of peace. A similar objective should be pursued closer to home. The Senate should reject Radio Marti—not because broadcasts to Cuba are wrong, but because the policy of which Radio Marti is an integral part is wrong.

If we want to broadcast the truth to Cuba, hurrah, but let us do it under the umbrella of the Voice of America with a proven record which will not es-

calate or destabilize the situation more.

For all these reasons, I congratulate the Senator from Nebraska for the viewpoints he expressed and I am glad to support him.

I yield the floor back to the Senator from Nebraska.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. ZORINSKY. I continue:

The large number of Cuban intellectuals resident abroad testifies to this fact. No dissent is tolerated. Likewise, while the press in Cuba may not always cover events in the same manner, story lines are predetermined and criticism of the Revolution or national issues is not permitted. American newsmen and others who have visited Cuba report that there is no non-communist printed material available to the public.

The Communist Party is the only legal party. "Citizens have some limited participation in discussion of local issues such as transportation, sanitation, and crime prevention, but only at the local level." (1980 Human Rights Report) But there is no serious debate of national issues. These are precisely the issues which Radio Marti will try to cover.

The Inter-American Press Association (IAPA) at its 37th General Assemby in Rio de Janeiro in October 1981 resolved "to encourage free journalists of the continent, especially IAPA members, to make every effort to bring about the end of the news blackout for the people of Cuba, and support any means that would help achieve that objective."

For these reasons, the Commission believes there is a need for Radio Marti.

Mr. President, I would like to interject a personal view at this point and at this juncture. I do not take issue with the need for an expression of the truth in Cuba to its inhabitants and to its citizens. But I have a quirk in my background that is on my reumebut not often cited. And that is, I, for 23 years, was a businessman, and I ran a business and attempted to use commonsense and logic in how I ran that business. Having been thrust into this awesome body where I see a $10 million expenditure for an issue such as Radio Marti being validated by an austere commission such as this, I do not take issue for the need of people in Cuba to realize the truth that goes on within their country.

However, as a former businessman, my concern is this—and I must relate to you a conversation I had with members of the State Department. I said, "Just suppose, for example, although Cuba has demonstrated their ability to jam a so-called Radio Marti, just suppose, for instance, if they really have that capability,"—which again I will reiterate they do have and have already demonstrated they have—"I know of several taxpayers that would think that commonsense and logic would dictate an alternative to spending $10 million to test the waters in that area."

That is the recommendation I made to the State Department, that we package a format for an existing Spanish-speaking radio station in Miami, Fla., put it out for bids for 6 months.

It would accomplish everything that spending $10 million of the American public's tax dollars would, and, in this day and age, with hard-earned tax dollars, I might add, for testing those waters. At the end of 6 months, we would have a very obvious demonstration of what would happen in beaming messages into Cuba. But there would be a difference: It would not be reinventing the wheel. We would not be recreating another broadcasting station using tax dollars.

We would merely pay for the service of broadcasting a news period. Obviously, the other broadcasts that Radio Marti had intended, such as baseball game broadcasting and Spanish music broadcasting, are being done free of charge to the American public at this very moment.

Also, I might add, in creating Radio Marti you create additional Federal employees who are ultimately entitled to Federal pensions, to sick leave, to days off for holiday, and to all the numerous benefits that any other Federal employees would be entitled to. And that is forever, as long as that radio station is in existence.

So as we are speaking about $10 million today, that, in the term of many of us in past administrations, is called peanuts. That is a small sum of money compared to the money over the period of years for people retiring from Radio Marti who will be eligible for Federal pensions and other fringe benefits accrued as a result of their Federal employment.

As a former businessman, I am looking at this this way: Let us agree with the conclusions of the Radio Marti Presidential Commission on Broadcasting to Cuba that there is a need. Let us also agree with the credibility of the Cuban broadcasting industry to be able to jam radio stations. That is even more than an assumption. When you wake up to Spanish-speaking music from Havana in the morning in Des Moines, Iowa, that is more than an assumption. That is a reality. So I think we can assume that as being true.

Then putting those both on the scales, we have an option to use people's hard-earned tax dollars versus established Spanish-speaking radio broadcasting stations given a format trial period for 6 months for the American public to see is this a good thing or a bad thing.

That is almost so logical it is frightening, and yet the State Department refused to even consider it. I know why that is. I have been contacted by every supporter of this genesis of Radio Marti who has an interest in any form or shape whatsoever with it, asking me to lay off, asking me to stop the filibuster, asking me not to oppose it, for one reason: Generally, each and every one of those people, directly or indirectly, has an economic vested interest in the creation of Radio Marti.

I might point out to my fellow colleagues whom I hold in very high esteem, whom I respect immensely, that unemployment to those who have no jobs in America is even more important than to those people who are pushing Radio Marti with a vested economic interest.

I have had numerous people call me from Florida, people who are known in Florida in the broadcasting industry, and even federally elected officials and local State and municipal elected officials in Florida. They have called my office within the last week. Some of them have even visited my office. I asked if I could use their names, and they said, "Heavens no, my constituency is Cuban." If it is somebody affiliated with radio broadcasting, it is, "Do you not realize that the Cuban business people pay me to advertise on my radio stations? I cannot say anything publicly about this." It would be political or economic suicide for them to say anything.

What they do say is, "Senator Zorinsky, we know in Nebraska you are not faced with the same situation and you are doing the right thing."

I have had calls from Cubans in the broadcasting business who tell me I am on the right track.

I would like to read a letter from the National Radio Broadcasters' Association dated November 23. This is not too long ago, about 2½ or 3 weeks ago.

It says:

Dear Senator:

The National Radio Broadcasters' Association, representing nearly 2,000 radio stations in the United States, has previously expressed its misgivings about the proposed Radio Marti authorization bill, which is now being considered by the Senate.

We do not presume to be experts in the area of foreign relations, and we accept the decision of our Government that the establishment of Radio Marti would be in the best interests of the United States.

We do believe, however, that the many millions of dollars could be saved by making use of the present, underutilized Voice of America facility on Marathon Key, or by buying air time on South Florida commercial radio stations.

Politicians during election time have to buy air time on radio stations. I do not think it was such a bad idea for them to make a recommendation for the Government to possibly buy air time, for a very short period of time, to find out what jamming capability would be used if, in effect, it is used.

With these excellent AM transmission facilities in place and available, it seems to us to be inappropriate in times like these to spend millions of dollars for unnecessary duplication of steel, brick, and electronics. Furthermore, we urge that if Radio Marti must be built, that it operate on frequencies beyond those used by commercial radio stations in the United States. The effect of ex-

pected Cuban jamming on United States radio stations is now well known to you and the financial damage to these stations will be catastrophic.

Mr. HEINZ. Will the Senator yield?

Mr. ZORINSKY. Mr. President, I ask unanimous consent to yield the floor to the distinguished Senator from Pennsylvania for the purpose of making a statement or a unanimous-consent request without losing my right to the floor and without this being considered the end of a speech for the purpose of the two-speech rule, and I ask that I be recognized at the conclusion of the remarks of the Senator from Pennsylvania.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HEINZ. I thank the Senator from Nebraska for yielding.

(The remarks of Senator HEINZ which were presented at this point in the proceedings appear later in the RECORD.)

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. ZORINSKY. Mr. President, in connection with the letter previously read from the National Radio Broadcasters' Association, I should like to conclude with the last two paragraphs:

We strongly urge that any Radio Marti transmission bill include and full compensation for expenses and losses incurred as a result of Cuban interference with the signals of American commercial radio stations.

So when you bring this facet into the Radio Marti discussion, you are not talking about $10 million in expenditures; because, as they have already illustrated by jamming, if any monetary economic negative effect results and accrues to the private sector in the broadcasting industry, then the Federal Government must recompose and compensate these stations for that interference, loss of billing incurred by a lesser amount of advertising on those radio stations, possibly refunds they would have to make on advertising.

In committee, we discussed how much money that would be. How much money it would be was voiced by some in terms of billions of dollars rather than the $10 million we are being told Radio Marti would cost.

So, obviously, the other end of the spectrum, the cost that could be incurred as a result of this bill to indemnify the broadcasters, could be astronomical and, again, would be money we do not have, inasmuch as we are in deficit spending at the current time.

The last paragraph reads:

Negotiation is the only true solution to the Cuban interference problem. But American broadcasters should not be expected to bear the brunt of a government policy and action which results from the failure of such international negotiations.

It is signed by the President of the National Radio Broadcasters Association.

I point out that we are putting our private sector of the broadcasting industry in a position of bearing the brunt of any political retaliation as an act of Congress, specifically of the Senate, in its action on the Radio Marti issue.

I know how I would feel, as a former businessman, and so do my colleagues, I am sure. When you have an investment in anything and have worked hard to attain that investment and you have paid off with hard endeavors and hard work a business or the purchase of something tangible, you hate to see it destroyed by others, through no control of your own. That is exactly what we are doing to the broadcasting industry, and that is the exact position we place them in by the actions we take on this floor with respect to Radio Marti.

B. BROADCASTING ENTITY

The commission believes that the Voice of America would not be the appropriate entity for Radio Marti. The Charter granted to the VOA by the Congress in 1976 mandates the Voice to serve as a window on America, projecting American society and institutions and explaining U.S. policies. The VOA charter does not contemplate a surrogate "home service" like Radio Marti. The Commission, therefore, believes that Radio Marti should follow Radio Free Europe and Radio Liberty in maintaining a separate identity and operation from those of the VOA.

In other words, what the Commission is inferring is that we should have a special radio station for each nation that we fear is not getting the truth of the matter or factual realities from their government.

Similarly, there is a plan currently before the Congress for a new radio station (Radio Marti) to broadcast to Cuba news and events that affect the Cuban people. The plan calls for the new station to construct transmitter facilities in Florida and the Caribbean. This is being done at a time when VOA is planning to rebuild its Marathon Relay Station, which has been broadcasting to Cuba for 20 years, and to construct several new transmitter facilities in the Caribbean. VOA transmission schedules indicate that Marathon is used only about 6 hours a day.

That means, according to my calculation, that there are approximately 16 hours or 18 hours available which are being unused.

There are no indications that VOA or Radio Marti will share existing or planned facilities.

Again, instead of reinventing the wheel, this particular piece of legislation is reinventing the airwaves, with its own personal facility paid for by the taxpayers of America.

We believe that efforts should be made to consolidate similar transmitter requirements of U.S. Government radio operations.

We, being the U.S. General Accounting Office, the GAO, in having made a report to the Director of the U.S. International Communication Agency regarding the fact that the Voice of America should address existing problems to insure high performance.

So the General Accounting Office believes that efforts should be made to consolidate similar transmitter requirements of U.S. Government radio operations.

Joint use of facilities should, at a minimum, be explored in new construction projects and in negotiations with host governments before being precluded from consideration.

* * * * *

The absence of an appropriate existing broadcasting entity suggests that a separate corporate entity patterned after RFE/RL, Inc. is required, particularly if it would enhance the credibility and efficiency of Radio Marti. Such an entity, called Radio Broadcasting to Cuba, Inc. (RBC, Inc.), already exists. RBC, Inc. was incorporated as a private non-profit corporation in the District of Columbia in September 1981, and was recognized as a tax exempt organization by the Internal Revenue Service in January 1982. Pending the enactment of Federal legislation, RBC, Inc. has remained essentially a non-operational corporate shell.

C. OVERSIGHT

The Commission recognizes that if broadcasting is to be conducted by a separate, non-profit corporate entity, formal governmental supervision and guidance will be necessary. While federal oversight need not extend to the minute details of daily management and operations, the Commission believes that close guidance on content (to ensure a balanced, credible broadcast) and careful supervision of expenditures of federal grant money are essential.

Exactly what the Senate or Congress needs is more oversight. We do not know what is going on in half of the grants and pieces of legislation we perform thus far and here we are going to say we are going to give careful supervision to the expenditures of this Federal money. It is pretty hard to make the taxpayers who are paying for this realize that we do not have enough to do yet and we are looking for more to do and we need more oversight.

I might even go a step further. I have had taxpayers tell me they feel the oversight that we currently give would be better done if we did it diligently and in a responsible manner rather than in the slipshod manner that we are currently doing that.

For RFE/RL, Inc., the Board for International Broadcasting now performs this oversight role. For RBC, Inc., the Commission believes that the four logical entities to which oversight responsibility could be assigned are: (1) an independent agency, (2) the Department of State, (3) the International Communication Agency (ICA), or (4) the Board for International Broadcasting (BIB).

1. Independent Agency: The scale of operations contemplated may be insufficient to warrant creation of a separate agency.

I would take issue with that because every time we create something new here not only eventually will they need a separate agency, they will need several separate buildings that can be

constructed at the cost of the very generous U.S. taxpayer.

The establishment of an independent board could be excessively complex and costly.

To make that recognition is a wonderment when we probably have so many independent boards and organizations that we have created that have caused the very nature of our deficit spending complex that we have back here in Washington.

2. State Department: Since State provides RFE/RL with continuous policy guidance, it should perform a similar role for Radio Marti. However, State is not now structured to provide the permanent day-by-day supervision of Radio Marti required.

I wonder how much instruction and structuring would have to take place for that to happen. There is no indication of that made by the Commission on broadcasting to Cuba.

3. ICA: ICA has a global view and considerable regional Latin American expertise and experience both directly and through the Voice of America. But Radio Marti should be kept separate from the VOA, as its mission and structure are sharply distinct.

4. BIB. The BIB would seem to be a logical supervisory agency given its experience with managing RFE/RL. But, because the BIB is regionally oriented at all levels, grafting a much smaller Latin American activity to its Europe-oriented board and management could cause serious problems.

I am sure the farmers of America would like to hear about all of those serious problems it would cause a regional organization to absorb a smaller Latin America activity.

As indicated in recent BIB Annual Reports, the BIB has been experiencing board/management problems in recent years, so that an added responsibility like Radio Marti might be unwise, particularly if the BIB must adjust to the changes introduced by the Pell Amendment at the same time.

I wonder how they would like to experience banks coming and foreclosing on all of their problems and all the years endeavors as the farmers of America currently are having done to them.

Legislation proposed by the Administration to the Congress specifies the State Department as the temporary grantor of federal funds and supervisory authority for Radio Marti, pending the statutory designation of an appropriate federal granting and oversight agency. The Commission considers this a sensible arrangement until Radio Marti is fully operational. The Commission would prefer to defer recommendation on a permanent oversight agency until one year after Radio Marti has been authorized and funded by Congress.

By one stretch of the imagination they say that we should have oversight over them but, on the other hand, they would like to defer recommendation on a permanent oversight agency until a year after Radio Marti has been authorized and funded by Congress.

Mr. President, I ask unanimous consent to yield the floor to my distinguished colleague, the Senator from Nebraska (JIM EXON) for the purpose of debate without losing my right to the floor and without this being considered the end of the speech for the purpose of the two-speech rule, and I ask that I be rerecognized at the conclusion of Senator EXON's remarks.

The PRESIDING OFFICER (Mr. CHAFEE). Without objection, it is so ordered.

Mr. EXON. I thank the Senator.

The PRESIDING OFFICER. The Senator from Nebraska is recognized.

Mr. EXON. Mr. President, I thank the Chair, and I thank my colleague from Nebraska.

Mr. President, H.R. 5427 sent over to the Senate from the House of Representatives is a bad bill in many respects.

While it could be argued that the budget waiver request as advanced by the majority leader should go forward, I think it is entirely proper that those of us who are fundamentally concerned about and are opposed to H.R. 5427 take every opportunity to raise our voices as long as is necessary to bring the Senate leadership to the place where they realize and recognize that the macho approach to international policy embodied in H.R. 5427 authorizing Radio Marti is not good for a whole series of reasons.

Let us discuss some of those.

Mr. President, this is an ill-conceived measure which is just another example of the macho foreign policy approach which in the end will hurt no one but the American farmer on the domestic scene and some independent free enterprise businessmen known as broadcasters but probably even more important it could do great harm to the radio broadcasting industry of this Nation.

But the foreign policy implications of this action are even more far reaching than the possibilities that I have just cited.

Mr. President, the State Department says that H.R. 5427, Radio Marti, must go forward so that the Cuban people will know the truth about Cuban adventurism in Africa and Central America, and this can only be done through Radio Marti.

Mr. President, I for one do not undervalue the adventurism and expansionism of the Cuban Government which by and large is a satellite nation or a surrogate nation of the Soviet Union.

But when we contemplate actions we are contemplating in H.R. 5427, I think it is critically important that we recognize and appreciate very fully the international complications this could set off. In the first place, I do not believe most Cubans are naive enough to believe or are particularly concerned about what their Nation is doing around the world.

The reason why Castro came to power in Cuba in the initial instance was because the people there were searching for a better life. I do not believe they have it under Castro's communism, but I cannot be convinced because of the risk that we take or contemplate with Radio Marti that it might not blow up in our faces as far as any significant accomplishment that would be rendered therefrom if we put it in place.

The fact of the matter is, Mr. President, that almost any inhabitant of Cuba today can tune in his AM radio to a whole host of radio stations in the United States, certainly those presently located in Florida, southern Florida.

I have not seen the piece, Mr. President, but I understand there was a recent article in a Florida newspaper which said there was a free enterprise radio station providing essentially the same information that the State Department and the Reagan administration propose to pump into Cuba at taxpayer expense.

If they can turn on their radios now and listen to the news, the editorials in either English or almost any other language they might be interested in, what makes us think they are going to be sufficiently entertained or sufficiently interested to listen to our expensive broadcasts that would blanket that nation?

The State Department says that Radio Marti is a nonconfrontational and peaceful means of making the Cuban Government accountable to its population. That sounds a little weak to me. It sounds like very poor salesmanship.

It seems to me that we know and Fidel Castro has demonstrated that if we go ahead with Radio Marti at millions and millions of dollars of expense to the American taxpayer, and the additional millions and millions of dollars that will be added to the present Reagan deficit, we are going to get nothing from our investment, and we are going to get nothing from the increase in the deficit and the increase in the national debt that, of course, is driven by the deficit because, as I said a moment ago, the Cuban leadership has demonstrated their ability to jam significant radio signals in the United States.

Mr. President, I ask that there be order in the Senate.

The PRESIDING OFFICER. The Senate will be in order.

Mr. EXON. I thank the Chair.

The PRESIDING OFFICER. I ask the aides to cease speaking while the distinguished Senator from Nebraska is making his statement.

The Senator from Nebraska may continue.

Mr. EXON. I thank the Chair.

Mr. President, it seems to me that if we go ahead with Radio Marti we are not only inviting but we can expect renewed jamming techniques to be brought upon the broadcasting industry of this Nation, far more than what the Cuban leadership has evidenced they can do up until this time, which is considerable.

Let us consider for a moment what position the United States would be in a few weeks or a few months from now if we proceed with the ill-conceived H.R. 5427 in relation to the prospects of our international posture. I think we should consider that there is a distinct possibility—in fact, Mr. President, I would predict it as a near certain outcome—that we will make Fidel Castro, if we proceed, bigger in life and a bigger threat to us than he is right now from the standpoint of being a man who can stand up to what he calls the big bully up north.

Let us assume, Mr. President, that H.R. 5427 eventually becomes law or something akin to it becomes law, and let us assume that the Reagan administration continues with its macho approach to international policy by showing up or attempting to show up the island off the southern shores of our Nation. It seems to me we are running the risk through Radio Marti of making Fidel Castro even bigger in life than his activities now, which certainly remain to be of great concern to the democracies of this hemisphere.

Radio Marti will not have a major moderating effect on Cuban foreign policy even if it is successful, as the State Department and the Reagan administration claim it will be. All it will do is to raise the noise level appreciably and very likely to our detriment and not to the Cuban Government's detriment.

While Radio Marti will have a questionable effect on Cuban foreign policy at best, and I underline at best, it could, and very likely will, have a definite adverse effect on AM broadcasting in the United States, especially affecting our farmers. Cuba has already demonstrated its ability to jam U.S. AM radio broadcasting.

Mr. President, let us put ourselves in Castro's place if we proceed as outlined in H.R. 5427. Castro would and could jam the Marti broadcasts, thereby eliminating their effectiveness to carry out what the supporters of H.R. 5427 claim. Of course, you would have Castro there with an easy victory when he was able to jam the signals which would cost millions of dollars broadcasting into Cuba. There you would have another victory for Castro over the United States, and there is little if anything we can do about it.

But as long as I have said that, let us explore that possibility for a moment. Let us assume that H.R. 5427 passes and let us assume that we begin broadcasting, and we do not have to assume, we know what Castro will do, he has already said it, and he has demonstrated his ability to carry out that threat. He would not only jam the frequency of Radio Marti, but he would also jam other AM radio stations in the United States. Then what would we do, Mr. President? The State Department has not very well addressed that. They have made some grand general statements about what they would or could do.

In that regard, we would have to say, "Well, we quit, we give up the broadcasting, or we might take some other action." What other action would we take?

I am sure if that happens there would be some suggestions, and I do not think they would be acceptable at the White House or anyplace, that we just in some way eliminate the jamming devices in Cuba. I recognize that that might be a suggestion that some would make.

I say that, Mr. President, simply to understand that this action of propaganda that we are taking, however well-intentioned, against the leadership of the Cuban Government will not work and it invites even worsening relationships with the Cuban Nation than we have today. And I for one cannot imagine how H.R. 5427, embodying the principles of Radio Marti, could be of any real benefit to us or to the furtherance of freedom-loving ideals around the world.

Mr. President, I ask unanimous consent that the remarks I have just made not be considered the end of my speech for the purpose of the two-speech rule.

The PRESIDING OFFICER. Is there objection? Hearing none, it is so ordered.

Mr. EXON. I yield back to my colleague from Nebraska.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. ZORINSKY. Mr. President, I ask unanimous consent that I may yield the floor to the distinguished Senator from Massachusetts for the purpose of debate without losing my right to the floor and without this being considered the end of a speech for the purpose of the two-speech rule and that I be rerecognized at the conclusion of the remarks of Senator TSONGAS.

The PRESIDING OFFICER. Is there objection? Hearing none, it is so ordered.

The Senator from Massachusetts.

Mr. TSONGAS. Mr. President, let me begin by dispensing with the preliminary formalities.

My view of Fidel Castro is very simple, and that is I consider Castro to be a product of what Batista left behind, not unlike the kind of legacy that Somoza has bequeathed to Nicaragua. One could well argue that Castro was motivated by a sense of injustice at one time in his career. My own view about Castro is that, for one reason or another, he has submitted to being a prostitute of the Soviet Union and that his interest in his country, although I am sure they exist very strong, have become secondary to his dependence upon the Soviet Union, not only in terms of economics but also ideology.

As someone who has spent part of his life in the Third World and is very committed to the Third World and has a respect for the issue of nonalinement, I think the role Castro has played has done serious damage to the Third World and to those who profess and are committed to sincerely true nonalinement.

I think that issue was best revealed, or at least Castro's position, when the U.N. voted on the issue of Afghanistan. Here you have Castro, who tends to be nonalined and concerned about injustice, concerned about national independence, who turns around and leads the battle for the Soviet Union in trying to put the stamp of approval on the Soviet invasion of Afghanistan. And whatever else Castro may do, that one act, I think, lays bare any claim that he would have to true nonalinement.

There are reasons why people become captive to various interests. This Senate body is no different. But at least, in Castro's case, I would hope that he would dispense with some of the piousness that has marked his career.

All of that notwithstanding, the issue before us today is Radio Marti. Radio Marti would fit under the category of what is referred to by some as "feel good" legislation. Not many people think it will do any good, but they feel good if it somehow is in place and beaming our message to the Cuban people.

I will not repeat what has been said by my predecessors and I will be brief. But I would like to have printed in the RECORD the statement of Wayne Smith, who was the former head of the U.S. interests section in Havana and the comments he made to the committee on August 19, of this year in response to Radio Marti. I will just read a brief portion of it.

Mr. Chairman, as Americans, we are all committed to the free flow of ideas across borders, and the argument against Radio Marti, at least my argument does not flow from some objection to providing more information to the Cuban people. There are, however, serious doubts that Radio Marti is the best way to go about it.

The consideration of U.S. interests must come first. What is the United States going to get out of this? What are the costs and risks? Do the possible gains outweigh the possible losses? I have seen no evidence of such calculations. Indeed, it seems to me that the administration's most glaring failure is to explain exactly what the United

States hopes to achieve by spending $17 million to establish Radio Marti, a new station.

And it goes on and on about his view that the effort, in fact, will be counterproductive.

It seems to me, the United States would be well served by the end of the Castro regime that has done virtually very little, in my mind, to bring his people into the modern world. Granted the progress made in things like health care and education, but what he has done in doing that is simply impose an ideological view that has made that country an economic basket case dependent upon the infusion of outside money.

I think, in trying to be as nonideological as possible, that the people of Cuba would be served by a transition away from Fidel Castro to someone that is more pragmatic, less ideological, and more committed to a mixed economy.

Radio Marti, in my mind, will probably do Castro more good than ill, for the reasons raised by the junior Senator from Nebraska, giving Castro something he can point to to evoke empathy among his own people.

But even if that is not the case, the obvious question is: Who is going to listen to Radio Marti, given the access they have already to existing American radio and television programs?

If you try to postulate a situation whereas the average Cuban family has a choice between listening to Radio Marti, with its obvious governmental sponsorship and, by definition, at least, in their view, a lack of objectivity, or tuning in to a Miami radio station or a Miami television station that provides them a window into the American culture—or, put another way, if you had the choice of listening to propaganda or watching Monday night football, despite Howard Cosell—I would suspect that most people would probably pass up the chance to listen to Radio Marti. That is probably true all the way down to the "Little House on the Prairie" and even "Dallas."

Once you get beyond those examples of American culture and try to figure out who is left in Cuba to listen to Radio Marti, you have a very narrow constituency, most of whom probably have serious problems anyway, if they have nothing better to do than to listen to American propaganda.

I doubt if the leadership of opposition to Castro would be well founded in that kind of constituency.

Let us say we are wrong. Let us say that everybody in Cuba is going to be tuned to Radio Marti and consider it the best thing since life's breath. Indeed, that we are incorrect, that Radio Marti will be the major factor in knocking Fidel Castro off his governmental perch. Let us grant all that.

I think it is an absurd assumption, but let us say it happens.

In that case, Radio Marti will have served a national interest, and all Americans will be better off for that process. If Fidel Castro has any brains at all, and there is no reason to suggest that he does not, he will fight back, and the way that he will fight back is to try to get everybody in the United States to be as committed to Radio Havana as everybody in Cuba will be to Radio Marti.

Given the technology available, it may well be the case if you live in Nebraska and many other parts of this country and you want to listen to Monday night football, the only way you will listen to it is by tuning in Radio Havana.

So let us say Castro has nothing to do in this situation, and is certainly willing to introduce Soviet nuclear weaponry on his island and would certainly not blanch at the notion to sending over signals on the airwaves. Let us say he uses the technology available to him potentially and floods the U.S. broadcasting bands with Radio Havana. What do we do?

We have a number of options. One is to go into Spanish and have a crash course of Spanish lessons around the country so everyone understands what they are talking about.

Assuming there is no money in the budget to do that, the other alternative is to engage in either the destruction of the transmitter physically, which, as you know, would qualify as an aggressive act, or changing the technical equipment used by American radio stations.

Put another way, if we go ahead and do this, and I acknowledge why some would want to—I may not agree with it but I can acknowledge it—the fact is the most likely people to endure response and recriminations are those in the American broadcasting industry.

When the Foreign Relations Committee, on which I serve, took up this issue, I introduced an amendment that reads as follows:

Any United States radio and television broadcasting station licensee which suffers a loss of advertising or other revenues as a result of Cuban interference with its broadcasts which is greater than the average daily interference over the 12 months immediately preceding the enactment of the Radio Broadcasting to Cuba Act shall receive compensation from the Board equal to the economic loss incurred.

Getting past the gobbledegook what this says is, in essence, If the Cubans retaliate and in the course of that retaliation and interference do damage to an American broadcaster, he shall be compensated for that loss; that Radio Marti is in pursuit of a national interest and the cost of that national interest should be borne by all of us, not simply a narrow segment of our constituency.

That amendment lost in committee by a 9-to-7 vote. It was very close. It is my intent, should this matter be deliberated, to raise the issue and give my colleagues an opportunity to vote on it.

I think it would be very difficult for a Member of the Senate to argue to a broadcaster why, in our desire to see this thing passed, we could not, at a minimum, guarantee that clear economic interest would not be harmed. If the Cubans react as everyone suggests they are going to, then it seems to me that innocent broadcasters in this country who have no say over these kinds of matters should be made whole, and if we are doing this as a national matter, then the losses incurred should also be incurred nationally, not by just a small constituency.

There are two associations of broadcasters. One is the National Association of Broadcasters and the other is the National Radio Broadcasters Association. They have both taken positions on the issue of compensation.

Before I read those letters, let me say at the outset there is a distinction between my point which talks about economic loss and their point which refers to managerial compensation for expenses in changing signals. I wanted to get that distinction on the record before I read the letters.

The first is November 23, 1982, by Sis Kaplan, president of the National Radio Broadcasters Association.

Dear Senator: The National Radio Broadcasters Association, representing nearly 2,000 radio stations in the United States has previously expressed its misgivings about the proposed Radio Marti authorization bill which is now being considered by the Senate. We do not presume to be experts in the area of foreign relations. We accept the decision of our Government that the establishment of Radio Marti would be in the best interests of the United States.

We do believe, however, that many millions of dollars could be saved by making use of the present underutilized Voice of America facility on Marathon Key or by buying air time on south Florida commercial radio stations. With these excellent AM transmission facilities in place and available, it seems to us to be inappropriate in times like these to spend millions of dollars for unnecessary duplication of steel, brick, and electronics.

Furthermore, we urge that if Radio Marti must be built, that it operate on frequencies beyond those used by commercial radio stations in the United States. The effects of expected Cuban jamming of U.S. radio stations is now well known to you and the financial damage to these stations will be catastrophic.

We strongly urge that any Radio Marti authorization bill include full compensation for expenses and losses incurred as a result of Cuban interference with the signals of American commercial radio stations. Negotiation is the only true solution to the Cuban interference problem, but American broadcasters should not be expected to bear the brunt of Government policy and action which results from the failure of such international negotiations.

I think that letter is rather straightforward.

The second comes from the National Association of Broadcasters. This is a statement that was sent in a letter which was distributed to every Member of the Senate.

Cuban interference to U.S. AM radio stations is a grave problem which is likely to become worse. Already, numerous stations in Florida and facilities spread from Texas to Utah to Connecticut are experiencing interference from Cuban broadcasts. If Cuba implements its stated plan to drastically increase the number and power levels of its AM operations, over 200 U.S. radio stations in 34 states will suffer, and millions of Americans will lose service to which they've become accustomed.

In the Radio Marti authorization bill now pending before the U.S. Senate, there is a provision intended to provide financial help to U.S. broadcasters for expenses incurred in mitigating the effects of Cuban interference. The bill gives discretionary authortiy to the FCC to direct government reimbursement to affected broadcasters. As a trade association which represents 4430 radio stations and all the major commercial radio networks, the NAB asks you to support a change in the current provision to make such compensation mandatory.

The NAB has repeatedly stated that there is no adequate unilateral solution to Cuban interference and jamming. A program of compensation cannot substitute for a diplomatically negotiated agreement between the U.S. and Cuban governments on standards for AM broadcasting. The latter is the only sensible course of actior and one that our government must vigorously pursue. NAB's All Industry Cuban Interference Task Force is working with the State Department and other involved parties to encourage and facilitate negotiations, and we would welcome your participation in that effort.

Though a compensation program does not provide a truly adequate answer to Cuban interference, NAB nevertheless believes that at least some measure of financial relief should be guaranteed to broadcasters attempting to maintain service to their listeners. It is certainly appropriate to include such a guarantee in the Radio Marti bill since the relationship between Cuban interference and the establishment of the station is becoming increasingly clear. On August 30, at least twenty-two U.S. stations on five frequencies were the victims of jamming generated by Voice of Cuba broadcasts on U.S. AM frequencies. Cuba stated that its actions were in retaliation to the Radio Marti proposal.

NAB has not taken a position on the establishment of Radio Marti because it is essentially a foreign policy issue. We believe, however, that if the station is indeed authorized, there are proposals for its operation that could minimize its potential to exacerbate an already intolerable situation. In addition to supporting mandatory reimbursement, we ask that you give serious consideration to those proposals. They include: (1) put Radio Marti at either end of the AM band outside of commercial radio frequencies; (2) operate Radio Marti on shortwave; (3) permit government leasing or airtime on existing commercial AM stations for Radio Marti; (4) allow Radio Marti to share the frequency now used by the Voice of America at its Marathon station; or (5) expand the operating hours and mandate of the Voice of America to include the kind of programming envisioned for Radio Marti.

NAB and radio broadcasters across the nation will appreciate your attention to these important concerns.

Sincerely,

EDWARD O. FRITTS,
President.

Mr. President, I simply conclude by reiterating that if this matter is taken up, I shall be introducing this amendment and shall give my colleagues a chance to vote on it. To those who may be reluctant to do so, I simply suggest that when those 200 stations in 34 States get overwhelmed with Radio Havana and come knocking on your door, it may be in everybody's interest to have been able to say you voted for the amendment.

I think the case is going to be compelling in terms of the justice and equity that they not be thrown into economic chaos because of this situation. If we are intent on pursuing the Radio Marti alternative, and there are good people on both sides of that issue, at a minimum, those in this country who are going to be hurt by the venture should be protected. I shall give all of my colleagues a chance, if this bill is to be discussed now or in the next session, to show that that is not the intent and that there is a sensitivity on the part of the U.S. Senate to those who would be damaged by the process.

I thank my colleague, the Senator from Nebraska.

Mr. ZORINSKY. I thank the Senator from Massachusetts.

Mr. President, I continue reading from the Radio Marti final report of the Presidential Commission on Broadcasting to Cuba dated August 17, 1982.

Examination shows that neither FM nor television broadcasts would be feasible from the United States side to Cuba with adequate reception there, since each requires line-of-sight transmission. Furthermore, FM and television listenership is not as broad as it is in the United States. While a shortwave signal could readily reach Cuba, few would hear it. In Europe or the Soviet Union, availability of shortwave receivers is almost universal. In some countries—for instance, the U.S.S.R.—shortwave is sometimes used for domestic broadcasting.

In Cuba, on the other hand, shortwave is not used for domestic broadcasting. There are no reliable estimates on the number of shortwave receivers in Cuba. The Commission has consulted a variety of sources, including the VOA, the FCC, and the intelligence community. Logic and all available information indicate that shortwave receivers are not widely held in Cuba.

Cubans who arrived in the United States in 1980 also reported this.

One American expert on Cuban broadcasting, who visited Cuba in 1981, has recently reported in comments submitted to the FCC that since the revoloution, shortwave sets have become very difficult to acquire in Cuba. Authorities even disable shortwave receivers whenever they can. Shortwave could thus be expected to reach only the government and Communist Party officials and a few others with old or informally acquired sets.

The AM radio band, the medium wave, is what the Cuban Government uses to reach its own populace. Cuba maintains an interlocking system of five national AM networks, each with local transmitters registered with the International Communications Union.

The Cuban Government even rebroadcasts on the AM band those Soviet shortwave broadcasts which it wants to be widely heard in Cuba. The 1981 edition of the World Radio And TV Handbook reports 2.12 million radios in Cuba. Virtually all are likely to be AM receivers, most being inexpensive transistor models.

If Radio Marti is intended to reach the general Cuban populace, the man and woman on the street, or in the fields, it would appear that only AM can reach them effectively.

That is why I think it is even more meaningful to evaluate the comments made by radio station WQBA in Miami, Fla., that they are currently already doing that. This is indicative by the letters they are receiving from Cuba in addition to interviewing people that come from Cuba.

While the international radio regulations state that in principle the AM band is for domestic national service, in practice the AM band is used extensively by international broadcasters throughout the world. Some of the principal users are the BBC, Deustchwail in West Germany, Radio Moscow, Radio Havana, and the Voice Of America. RFE also operates an AM transmitter in Germany to broadcast to Eastern Europe.

When planning for Radio Marti began, the Federal Communications Commission was asked in September 1981 to recommend a frequency for its future use. In conducting the frequency search, the FCC considered three criteria:

1. Minimization of interference from Radio Marti to United States domestic stations;

2. Maximization of service from Radio Marti over Cuba, and

3. Minimization of interference of Radio Marti to other stations in the Western Hemisphere.

All 107 commericial channels in the AM band were reviewed to assess the usability. It was determined that approximately three United States class 1-A clear channel frequencies, one of which was 1040 kilohertz, showed greatest promise. Through computer analysis it was determined that 1040 kilohertz met the criteria noted above to the greatest extent. These studies did not take into account Cuba's plans to use 1040 kilohertz, since Cuba had not notified the International Frequency Registration Board of this intent at the time the FCC made its recommendation. The FCC formally identified 1040 kilohertz as the recommended frequency for Radio Marti in a letter dated October 29, 1981.

The MTIA formally assigned it for use by the United States Government in January of 1982. Therefore, Radio Marti's use of 1040 kilohertz would be entirely legal. In fact, United States use of 1040 has already been accepted by the ITU on the list B of its frequency assignments plan.

H.R. 5427 passed by the House on August 10 establishes a specific procedure and specific criteria to be followed in making a final selection for frequency for Radio Marti. Taking into the account the interests of the United States broadcasters, if this proce-

dure becomes law, a new determination of frequency for Radio Marti would be required.

The Commission has received and considered proposals that Radio Marti use a frequency off the regular AM commercial broadcast band. The Commission believes that this would be unwise for several reasons. Some inexpensive transistor radios have limited tuning capability and cannot pick up transmissions outside the normal range of 535 to 1605 kilohertz. In addition, the fringes of the AM band, 525 to 535 kilohertz and 1605 to 1705 kilohertz, are largely validated to other uses by international regulations to which the United States is a party. Finally, since the offband frequencies are not covered by international aggreements, the United States would have weaker ground for complaint under international law against possible Cuban jamming.

CUBAN INTERFERENCE IN JAMMING

The administration's proposal to establish Radio Marti has generated concern that Cuba may retaliate by jamming Radio Marti and by increasing interference with the United States broadcasters.

JAMMING

The Cuban Government could try to jam the reception of Radio Marti broadcasts in Cuba by locating a number of low-powered transmitters at appropriate points, probably along the north coast. This could be done at moderate cost with partial effectiveness. In the past 23 years, however, Cuba has seldom jammed the Voice Of America. Jamming is rarely fully effective, and the Commission would expect it to enhance the credibility of Radio Marti for the Cuban people. Jamming would probably have little effect on broadcasters in the United States including stations using the same frequency as Radio Marti.

INTERFERENCE

During the course of its public hearings, the Commission was made acutely aware of the problems for United States broadcasters caused by interference from Cuban broadcasts. This Cuban interference is in violation of both the letter and the spirit of international treaties or agreements to which it is or has been a party.

It is a serious problem which should be addressed jointly by the Federal Government and the broadcasters. Cuban radio interference with American broadcasts on the AM band, caused by transmitting radio signals, frequently at high power, on the same frequencies used by U.S. radio stations, is not new. It has been going on for at least 15 years, affecting primarily stations in the southeastern United States, especially Florida, as indicated by the Florida broadcasting associations in their statements to the Commission.

In the mid-1960's, the Castro government embarked on a program to redesign its domestic AM broadcasting system and to initiate broadcasting directed toward the United States and other neighboring countries. New Cuban plans to increase significantly the number and power of its AM radio stations to meet both internal and external requirements were announced in 1979 as part of a five-year plan and were submitted to the International Frequency Registration Board of the ITU in May 1980. Were Cuba's plans to be implemented, its stations would cause greatly increased interference to U.S. broadcasters.

Cuba's current inventory of operating and proposed radio stations includes two high-powered stations using 500 KW transmitters, announced in 1979. One 500 KW station began broadcasting in the fall of 1981 (but not at full power) on 1160 kHz, the same frequency used by KSL of Salt Lake City, which has experienced serious interference as a result. This interference ceased in July 1982.

The Cubans told U.S. officials in August 1981 that the other 500 KW station would utilize 1040 kHz, the same frequency used by WHO in Des Moines. However, Cuba has never broadcast and is not now broadcasting at high power on 1040 kHz. Cuba's plans to use 1040 kHz, as well as a number of other frequencies which would cause interference to U.S. stations, have not been accepted by the ITU, which instead accepted use of 1040 kHz by the U.S. in November 1981.

Cuba's broadcasting plans were made known well before the U.S. announcement in September 1981 that it intended to establish Radio Marti. They cannot be considered, therefore, as retaliation against Radio Marti. The problem of increasing Cuban interference is a separate and distinct issue which will remain whether Radio Marti goes on the air or not.

While recognizing that there is some degree of risk from Cuban interference on any frequency selected for Radio Marti, the Commission believes this contingency should not deter the United States from implementing its plan to put Radio Marti on the air.

Again, I personally cannot help wonder why, instead of putting Radio Marti on the air, there is not a format which a current Spanish-speaking radio station could utilize on behalf of Radio Marti for a trial period, to further confirm or deny the hypothesis which this Commission believes would be a degree of risk. The big difference, of course, is that with the building and construction of Radio Marti, it puts the taxpayers' dollar at stake; whereas, a radio station in existence is a functioning entity, with a profit motive structure, which, in the event of the format being unsuccessful, can revert to its current use of transmission facilities.

HOW WILL CUBA REACT TO RADIO MARTI

Cuba may do nothing: The VOA has been broadcasting to Cuba for 23 years and Cuba has rarely tried to jam these broadcasts.

Cuba could jam: Low-powered transmitters could be used to block reception of Radio Marti's signal in Cuba, if the Castro government wants to prevent the Cuban people from hearing Radio Marti. Such jamming would not fully prevent reception of Radio Marti in Cuba.

Cuba might try counterbroadcasting: President Castro in an April 1982 speech suggested Cuba might counterbroadcast. This could consist of a so-called "Radio Lincoln" appealing to minorities in the U.S. Cuba used this approach in the early and mid-1960's. Whether such broadcasts might cause interference in the U.S. would depend on the frequency used and the power of the signal.

Interference: Blocking reception of Radio Marti by creating radio interference through counter-broadcasting makes no sense. Were Cuba to use high power and an omni-directional antenna on 1040 kHz, it would cause interference not only with Radio Marti and WHO but also with radios on that frequency in several neighboring countries including Mexico, Venezuela, Nicaragua and Grenada, with which Cuba wants good relations. If Cuba were to use a highly directional antenna on 1040 kHz, Radio Marti might still be heard in Cuba depending on where the Cuban antenna is targeted.

National Association of Broadcasters Study: A study by the National Association of Broadcasters released in March 1982 indicates that over 200 U.S. radio stations in 32 States would experience interference and reduced listening areas should Cuba fully implement its proposed inventory of broadcast facilities. The U.S. stations listed in the NAB study would not be affected by Cuban interference in the manner projected unless Cuba operated its full inventory of stations at maximum power and under ideal conditions. Some of the stations listed exist now but many others are proposed and may not be built. Further, many of the existing Cuban stations do not broadcast at the power shown in the Cuban plan. Bearing in mind the limitations of Cuba's electric power generating system, which is dependent on increasingly scarce imported Soviet oil, it is doubtful that Cuba will put all the stations listed in its plan on the air or at the power indicated. Thus, although theoretically possible at some time in the future, such "maximum" intereference may not occur.

And I am sure that the broadcasters would love to see that word changed to "shall not occur" because I think it is very simple for any commission in the report to be able to say "may not occur" and not be held to the liability of their commitment. Obviously, the people who wrote this must adhere to that old adage that if you live by the crystal ball, you may have to end up eating glass and certainly glass may cause some of them indigestion and therefore the use of the word "may not occur" must have seemed much safer for them to use.

How to Address the Interference Problem: The 15 year old problem of Cuban interference, now assuming national proportions, needs to be addressed as an issue separate from Radio Marti, as suggested in H.R. 5427. That Act includes the following provision: "It is the sense of the Congress that the President should establish a task force to analyze the level of interference from the operation of Cuban radio stations experienced by broadcasters in the United States and to seek a practical political and technical solution to this problems."

The Commission notes that Section 6 (a) of H.R. 5427 authorizes the Board for International Broadcasting to compensate U.S. broadcasters for expenses incurred in mitigating the effects of Cuban Radio interference. The estimate that compensation payments could exceed $40 million, submitted by the Congressional Budget Office, appears to be exaggerated and highly speculative. This estimate is based on compensation costs of $100-200 thousand projected for each of the 200 AM radio stations identified by the National Association of Broadcasters study as affected by Cuban radio interference if Cuba should implement fully its ambitious plan to build a variety of new, high-powered radio stations.

And God forbid if they build it during an election time and start using them for the indemnification that

would be required to these radio stations for the politicians not being able to spend all those wild hours that we spend at election time expounding our ego and our views to the general public as to why we should be returned to this den of inequity.

Since many of these stations may not operate at the power indicated, or may not even be built, the $40 million figure is clearly high.

I do see the Commission did not go on to say that they would use that as a minimum figure being that confident that it would never exceed that figure.

Some of these people back home in the broadcasting business seem to think they have very expensive equipment and I can vouch personally from having paid the rate structures as a politician they have very high schedule fees for advertising for politicians which I am sure this Commission could not indemnify.

While the Commission is well aware of the problem of Cuban interference and the need to deal effectively with it, it believes that any plan to compensate U.S. broadcasters should be the result of careful analysis of the problem and its impact, in view of the technical complexity and question of precedent involved. The task force called for by H.R. 5427 to deal with the interference problem, as provided for in Section 6(b), may be the logical body to address the question of compensation as well.

Some members of the broadcasting industry told the Commission that the U.S. should seek to resolve the interference problem through negotiations. Unfortunately, the record of past attempts to negotiate this issue with Cuba indicates that Cuba may not be ready for meaningful negotiations. State Department officials and industry representatives reported to the Commission that the Cubans showed no flexibility or real interest in accommodation during several bilateral talks in 1981.

I feel it is very curious they showed some accommodation and interest in returning hijacked airplanes to our country and sat down and negotiated and talked with us; whereas, the Commission reports that the Cubans showed no flexibility or accommodation or interest in these types of talks.

The State Department has indicated it would continue to explore all possible means to address the problem.

I would think that one of those means would, experimentally, for a 6-month period, develop a format, a trial period to see what happens, without building or committing the Federal Government to the expenditure of these sums of tax dollars.

It is working, that is the State Department, with the National Association of Broadcasters and others in the industry to develop a provision acceptable to U.S. broadcasters should the opportunity for talking seriously to Cuba about this present itself.

The State Department has indicated it would continue to explore all possible means to address the problem. It is working with the NAB and others in the industry to develop a position acceptable to U.S. broadcasters should the opportunity for talking seriously to Cuba about this present itself. While endorsing these efforts the Commission feels strongly that Cuban interference and Radio Marti are separate and distinct issues, and should be addressed as such.

4. TRANSMITTERS

Two medium wave transmitters would be required for full coverage of Cuba with a strong signal, one for western Cuba, including Havana, the other for the eastern half of the island. The best location for the first transmitter would be in south Florida as close to Cuba as possible. Eastern Cuba, the most heavily populated part of the island, cannot be reached effectively by AM broadcasts from Florida, except for some scattered night-time service. Consideration would therefore have to be given to establishing a second transmitter site in the Caribbean.

The Commission considered proposals that Radio Marti use VOA's AM transmitter at Marathon Key in south Florida. The Commission found, however, that prime time would not be available for broadcasting Radio Marti programs on this facility. The Commission has heard from Cubans themselves that if Radio Marti is to succeed, it must broadcast on prime time, i.e. in the early morning before the Cubans go to work and in the evening after they return. According to the VOA, the Marathon transmitter and its other transmitters planned for the Caribbean will be fully utilized during prime morning and evening hours, precisely when Radio Marti programs should be broadcast. Nor would there be significant financial advantage to co-locating VOA and Radio Marti transmitters in the Caribbean since each would require its separate directional antenna arrays, the most costly element of these systems.

The Commission also considered proposals that Radio Marti use commercial stations in the U.S. and in Caribbean countries to broadcast Radio Marti's programs, and found such an approach not feasible either. Because of their distance from Cuba, insufficient power, and antennas which are not designed for broadcasting to Cuba, U.S. stations can be heard in only limited areas of Cuba and cannot provide blanket coverage, as envisaged for Radio Marti. Moreover, commercial stations are often identified with positions that are too partisan either to serve U.S. interests or to be credible in Cuba, whereas Radio Marti would be nonpartisan. Finally commercial stations might also be reluctant to give up prime time for Radio Marti, since this might affect their own commercial viability. The cost to Radio Marti, therefore, for leasing this prime time might be quite high.

Well, you can see that no effort was really made to find out because again using that bureaucratic word "might" in the phrase "might be quite high" is indicative to me that they do not know, because had they found out it would have been either quite high or quite low, but the word "might" need not have been used.

Again I cannot help going back to my former position as a businessman in the equation of commonsense and logic, where we always took bids and we had them down in black and white and we had them on paper, and we knew what we were getting into before we went that far.

It is quite obvious that this Commission at that time was not aware of the capabilities of station WQBA which is reported to have the ability to reach the great portion of, the majority of, people of the listening audience in Cuba.

As with VOA facilities, the use of commercial stations would not result in substantial savings, particulary if Radio Marti can use other government facilities which may be available. Separate office space, studios and regional bureaus will still be needed for Radio Marti. The costs of programming, operations and administration, which would amount to about 90 percent of the overall operating budget, would be the same regardless of transmission facilities used.

Clearly, U.S. comercial stations do not offer a real alternative. The Commission agrees with the South Florida Radio Broadcasters Asssociation, which in a statement submitted to the Commission stated that "commercial operations are a poor substitute for the proposed Radio Marti."

Information is not available on which radio stations in Caribbean countries can be heard in Cuba. There is no reason to believe that any such stations would be willing to broadcast to Cuba on our behalf.

5. OFFICES

Because close policy and operating guidance is essential, consideration was given to locating RBC's headquarters and main studio near the oversight agency in Washington. Radio Marti's non-partisan image would be enhanced by locating its primary programming operations outside areas identified in the American and Cuban public minds with partisan ethnic groups.

The Commission believes it would be desirable for Radio Marti to have two small regional bureaus in New York and Miami. New York is a major news center, including such news sources as the United Nations, where Cuba conducts much of its diplomatic business, and in Miami, recognized as a major center of news for and from Latin America.

I wonder if the poverty that currently exists in Cuba would just give a bare clue as to the mismangement of the economy without even the broadcast being heard?

Some people even in this Nation are talking about mismanagement of our own economy, especially over 11 million unemployed Americans who are beginning to look at where, how, and when the management of this economy will once again return in our country.

The Revolution's record of broken promises in improvements in standard of living and, the availability of housing, foodstuffs, consumer goods, etc.

Now, obviously the revolution's record of broken promises have to be self-evident in that country. I assume people just do not walk in and purchase a filet mignon or whatever luxury items they so desire in Cuba, as we do here in our country. And if they do not and cannot and are not able to, I imagine the God-given brain given to them will deduce and deduct the same logic that we would if it happended to us, and that is that our Government

and its revolution may not be well managing commodities and housing and consumer goods, and so forth, as we are going to tell them and alert them to through the creation of Radio Marti.

Examples of how economic mismanagement and the allocation of scarce resources to foreign adventurism exacerbate the daily hardships and shortcomings experienced by the Cuban people.

Comprehensive news focusing on developments such as the repression of workers in Poland, the Soviet subjugation of Afghanistan, the Cuban military role in Angola, Ethiopia and South Yemen.

Cuba's increasing economic dependence on the U.S.S.R.

The privileged status of a ruling elite despite a commitment to egalitarianism.

The primary target audience should be the general public, with particular emphasis on youth. Special segments should also be designed for select sub-groups such as government employees, the military, blue collar workers and farmers. "News and views" should be the core of programming, but care should be taken to assure an objective, sophisticated approach tailored to the existing Cuban milieu, and to avoid harsh, strident or obviously ideological presentations or concepts to which the average Cuban cannot relate.

To attract and keep the audience for the news and views segments, Radio Marti should also be entertaining, while seeking to fill voids left by Communist censorship. For example, radio dramas are extremely popular throughout the Caribbean, yet the most popular ones (often Colombian or Venezuelan) are not broadcast to Cuba. Properly selected series might be aired, with the advertising "spots" used for commentary. Popular American and Latin "Top 40" hits are not aired in Cuba, yet Cuban youth are as enamored of their generation's rhythms and songs as are their counterparts elsewhere.

I am sure the American taxpayers will be ecstatic to find out that we are going to beam the top 40 hits of the week to Cuba with their money and their hard-earned tax dollars. I know there will be dancing in the streets of Omaha, Nebr., when I tell the people back there when I go back to explain Radio Marti to them.

Music should play a major role. Baseball is a national passion, but the World Series is not heard well. Much of the very best classic and modern Spanish and Latin American literature, drama or poetry is not now available to the Cuban people.

Well, we are cutting the budget on American drama, poetry, and literature in our own budget and, at the same time, I am going to have to go back and tell the people of Nebraska that we are going to cut our budget on the classics and drama but we are going to take that budget and shift it over to providing that for the people that currently do not pay taxes in our country. They will be ecstatic to hear that, also.

But before final decisions are made on programming, those responsible should carefully consider the results of a survey of Cuban radio listening habits and preferences, financed by private funds and expected to be completed by the end of August. This survey, drawn from a random sample of the 125,000 Cubans who came here in 1980, is intended to determine radio listening tastes, not political views.

I once had Senator PRYOR tell me about the tastes of a few of the people in Arkansas that we might ask about what to put in that program.

Once Radio Marti is on the air, future programming will need to be adjusted to respond to feedback of listener reactions in Cuba.

F. INFORMATION GATHERING

A wide variety of sources of information on Cuba which are not available to the Cuban people would be available to Radio Marti. To take advantage of these sources Radio Marti should have: (1) monitoring and selective transcribing of Cuban radio and television, as well as monitoring of Prensa Latina and other Cuban publications; (2) speedy access to coverage of Cuba by leading Latin American newspapers, magazines and radio-TV networks, and by the Western wire services represented in Cuba such as Reuters, AFP and EFE and (3) an expert corps full-time correspondents to provide concise reporting and analyses on major international developments of interest to Cubans, as well as to fill in gaps and to track down inconsistencies in wire-service and other coverage of Cuban-related developments.

It should be noted that while reporting by the Western wire services of developments in Cuba is distributed world wide, it is not available to the Cuban public. Nor does most news related to Cuba's involvement in Central America and Africa reported by these wire services reach the Cuban people.

As in the case of RFE and RL, travellers returning from Cuba would be another source of valuable information on developments there. Radio Marti's bureaus in Miami and New York could help collect this.

6. BUDGET AND PERSONNEL

To launch Radio Marti, a budget of $10 million in FY 82 and $7.7 million in FY 83 has been submitted to Congress by the Department of State. Of the $10 million for the first year, $4.2 million has been proposed for engineering, $3 million for programming, and $2.8 million for administration. Included under engineering expenditures are $1.2 million for one-time acquisition costs for an antenna, transmitter and related equipment at the South Florida transmitter site, and approximately $1 million for headquarters and studio facilities. Virtually all of the $7.7 million recommended for the second year is for programming and administration, with full-year personnel costs making up nearly $5 million. Of the 168 positions recommended to be filled in FY 82, 148 would be related to programming requirements.

I would even have more respect for this if it was called a jobs bill because it creates 168 new positions for people to be employed. It will be a jobs bill that will be under the auspices of a broadcasting bill and nobody will ask questions about the pensions that eventually will come about in the creation of those jobs in order to broadcast the numerous baseball games, music, and some of the other cultural aspects.

The Commission does not consider the budget request of $10 million for first year funding as unreasonable. The cost of establishing Radio Marti cannot be compared to that of a commercial station for domestic broadcasting. Radio Marti's costs would include not only expensive four-tower directional antennas but also high personnel and administrative costs related to its heavy research and program development requirements.

Obviously, they do not intend to take much advantage of those costs we have already incurred on developmental requirements in programing with regard to other agencies who serve a like purpose in other areas of our world.

Reduction of the funding level from $10 million to the $7.5 million authorized by the House for first-year funding would require corresponding reductions in either construction and start-up costs or operations. This may mean postponement of the second transmitter site in the Caribbean ($1.9 million), which is needed to reach eastern Cuba, or cuts in research and program staffs, reductions in broadcast time.

With the need for specialized programming tailored specifically for the Cuban people, Radio Marti will be required to establish a specialized news service and to research and write much of its own material. Programming-related positions include editors, commentators. analysts, writers, correspondents, researchers, translators, technicians, etc. Personnel should be drawn from the ranks of professional broadcasters and newspersons, with special emphasis on hispanic, including Cuban, experience. While it will be essential to include staff with knowledge of Cuba, and to use Cuban voice talent, Radio Marti should be perceived not as a Cuban exile activity but rather as an objective, non-partisan effort.

IV. RECOMMENDATIONS

A. GOALS

The Commission supports the Administration's intent in establishing Radio Marti as explained in Section 1 of the proposed legislation, namely that:

(a) it is the policy of the United States to support the right of the people of Cuba "to seek, receive, and impart information and ideas through any media and regardless of frontiers," in accordance with article 19 of the Universal Declaration of Human Rights;

(b) consonant with this policy, Radio Marti in its planned broadcasting to Cuba should be effective in furthering the open communication of information and ideas to the people of Cuba and in particular accurate information about Cuba; and

(c) such broadcasting by Radio Marti, operating in a manner not inconsistent with the broad foreign policy objectives of the United States and in accordance with high professional standards, would be in the national interest.

The specific goals of Radio Marti should be to: Provide a reliable source of information concerning Cuba's domestic and international policies and actions now lacking to the Cuban people; provide the information necessary for the Cuban people to make informed judgments on these policies and actions and to try to hold their government more accountable; provide news and analysis that is not manipulated by the state but is objective, accurate, credible, relevant and timely, as well as a full range of radio programming, including sports, music and entertainment.

Radio Marti should not: broadcast propaganda or provocations; be designed to tell the Cuban people about the United States, a service performed by the VOA.

Radio Marti should espouse no single specific political, economic or religious point of view. It should have no relationship to any political party or exile organization; nor should it identify with any opposition group or groups, political party or organization. Radio Marti should be committed to respect for human rights and to the principles of democracy, including freedom of opinion, the rule of law, and nondiscrimination on the basis of race, religion, sex, class, or nationality. It should be nonsectarian, defending freedom of religious faith and observance for all creeds. It should be committed to the free movement of people and ideas among nations and to the peaceful negotiation of international conflicts. Radio Marti should subscribe to the principle of equal rights and self-determination of peoples as expressed in the United Nations Charter. The purpose of Radio Marti should not be to incite a desire within the Cuban people to leave their country. Nor is Radio Marti intended to incite Cubans to revolt against their own society.

Recognizing that it will take a long time for Radio Marti to develop a wide audience which looks to it for credible news, it is conceived as a long term strategic effort intended to help the Cuban people hold their government accountable for its actions. As such, Radio Marti must, whenever possible, maintain a steady course essentially unaltered by short term tactical considerations. It should not be considered a "bargaining chip" nor should its policies and perspectives be subject to abrupt shifts. It should have a perspective insulated from partisan viewpoints and reflective of the long range, U.S. national interest.

Recommended program policy guidelines for Radio Marti, modeled on those of RFE, are set forth in Appendix I.

B. BROADCASTING ENTITY

Adopting the view that a separate corporate entity patterned after RFE/RL would enhance the credibility and efficiency of the broadcasting organization, the Commission endorses the establishment and use of Radio Broadcasting to Cuba, Inc.

Once the Senate passes authorizing legislation, the Commission also recommends that RBC, Inc. be activated to perform certain planning functions, using private funds until appropriations are available. To do this Radio Marti should hire key personnel to begin planning for programming and future recruitment.

Mr. President, I cannot help but notice that it does not mention any passage in Congress. It takes passage in Congress as a prerequisite action to instruct Radio Marti to hire key personnel and begin planning for programing and future recruitment. At the current time, we are merely debating whether we should take this issue up on the floor of the Senate.

C. OVERSIGHT

The Commission recommends that the State Department be the temporary grantor of federal funds and oversight authority for RBC, Inc., pending the statutory designation of a permanent federal granting and oversight agency, as provided for in the legislation proposed by the Department of State. The oversight agency should exercise effective control over Radio Marti's operations to ensure that the Executive Branch's instructions and limitations are met. The Commission considers this a sensible arrangement until Radio Marti is fully operational.

The Commission would like to review the question of a permanent oversight agency for no more than one year after Congress authorizes and funds Radio Marti. Accordingly, the Commission also recommends that its term be extended for a period not to exceed one year from the effective date of Congressional legislation authorizing and funding RBC, Inc. During this period, the Commission should continue in its advisory role assisting the State Department with its responsibility for oversight over Radio Marti. The Commission as a body, and its expert members individually, could serve as consultant advisors to Radio Marti during that period. The Commission would further undertake to produce specific recommendations on permanent oversight authority and on program design and content before its mandate expires.

D. BROADCAST BAND

The Commission recommends that Radio Marti broadcast on the AM (medium frequency) radio band. This is the only band which will enable Radio Marti to fulfill its goal of reaching the Cuban people effectively. The other broadcast bands, such as short wave and FM, would reach only a limited part of the Cuban population.

E. FREQUENCY

The Commission recommend that Radio Marti begin operating on one basic, well established frequency on the AM band. Even though 1040 kHz has already been assigned to the government for this purpose, the Commission notes that the process of selecting a frequency for Radio Marti is to be repeated in conformance with the procedure and criteria specified in H.R. 5427, Section 3, if this provision is approved by the Senate. This would ensure that the most appropriate frequency for Radio Marti is chosen, while taking into account the interests of U.S. broadcasters.

Mr. President, as we get further involved in this, we shall see that the interests of U.S. broadcasters are very numerous. As a matter of fact, the human nature involved with this issue is such that all broadcasters would like to be indemnified from the use and selection of their frequency, of their broadcasting facility being used in the event Radio Marti becomes a reality.

The Commission also recommends that consideration be given to the possibility of using additional frequencies, if this is found to be feasible by the FCC and NTIA, in order to make more difficult possible Cuban jamming of Radio Marti broadcasts. Consideration should also be given to the possibility of complementary technical facilities for contingency use.

F. CUBAN INTERFERENCE

The Commission believes that suspension of plans for Radio Marti would certainly not eliminate nor probably even reduce Cuban radio interference now or in the future.

The Commission recommends that the Department of State keep the door open to opportunities to address this problem through negotiations, particularly involving international organizations and efforts by other nations, as well as our own. The State Department should continue to work with the NAB to develop a position acceptable to U.S. broadcasters should the opportunity for talking seriously to Cuba about this present itself.

The question of compensation for costs incurred in mitigating the harmful effects of Cuban interference should be postponed until the task force authorized by H.R. 5427, or other appropriate body, makes recommendations. Compensation could then be considered in separate legislation at a later time, because adequate funds for this are not included in legislation now before the Congress.

● Mr. PACKWOOD. Mr. President, I rise in strong support of the Radio Marti bill. The purpose of Radio Marti is to provide the people of Cuba with information about what is going on in Cuba. For more than 20 years, the Cuban people have received, from Cuban Government and Soviet radio, a steady flow of heavily censored and strongly anti-American news. They are not being told what is happening to their economy or what is happening to their agriculture and that information is vitally important to them.

Castro's totalitarian regime controls the dissemination of information in Cuba. Radio Moscow is the only international broadcasting targeted specifically to Cuba. Cuba, on the other hand, operates an extensive broadcasting effort abroad in more than a half dozen languages and Indian dialects.

U.S. commercial broadcasts which can be received in Cuba are sporadic, most are not in Spanish, and not one is directed specifically to the Cubans on the island. Moreover, Voice of America services are limited in both time and scope.

Radio Marti would allow the United States to provide accurate, up-to-date and uncensored news and information to the people of Cuba regarding Cuban activities both at home and abroad. The need for such a service is clear. Cuba is located just 90 miles off the coast of the United States, and yet it is truly an island both in terms of physical isolation and the isolation of its people from free access to information.

Radio Marti would serve the same vital role that Radio Free Europe and Radio Liberty serve in broadcasting to the Soviet bloc in Europe. The operation of these radio networks is an integral part of U.S. foreign policy serving, in particular, our interest in promoting the free flow of information and ideas. For tens of millions of East Europeans, the most reliable information about their country comes from the outside world. There is no comparable source of news for those living in Cuba.

Even with the establishment of Radio Marti, the United States will still remain far behind the Soviet Union and Cuba in the amount of resources and time devoted to international radio broadcasts. I think it is essential that we meet this challenge

and provide for the creation of this new voice of truth for the Cuban people.

The proposed new radio broadcasts to Cuba will reach the audience most likely to influence the Cuban Government—the Cuban people. They have the right to know what the Castro regime is doing in their name and what they must endure at home and abroad to support those polices. The Cuban people deserve the truth. Radio Marti will give it to them.●

ORDER OF PROCEDURE

Mr. ZORINSKY. Mr. President, I shall be happy to yield to the majority leader (Mr. BAKER), provided that I am accorded unanimous consent to be recognized first to resume when this question is before the Senate, tonight or tomorrow or any other date, and that the continuation of my remarks at that time be viewed as an extension of my remarks today and not as a second speech under the two-speech rule.

I further inquire of the majority leader whether the motion to waive the Budget Act, which remains the pending business, is likely to recur before recess tonight or whether it can be put over until tomorrow.

Mr. BAKER. Mr. President, let me answer the question put, and before I do so let me say that I have no objection to the request if the Senator wishes to put the earlier part of the request.

It is my intention, if the request is granted, to go to the royalty management bill, which is S. 2305, and to complete that this evening. I am advised it will not take very long to complete.

At this point I would ask, after it is completed, that the Senate recess over until 11 a.m. tomorrow. I intend after that to provide for a period for the transaction of routine morning business tomorrow, a time for a recess of the Senate for caucuses on both sides of the aisle, I believe, and then to take up the Poland resolution tomorrow at 2 p.m., to be followed then with the resumption of my motion to proceed to the consideration of Radio Marti.

So the answer to the Senator's question is technically, I suppose, the motion would not recur as the pending business under the request I am about to put until after the Poland vote tomorrow.

Mr. ZORINSKY. Mr. President, I make the aforementioned unanimous-consent request, that I be accorded unanimous consent first to resume when this question is again before the Senate tomorrow or any other day, and that continuation of my remarks at that time will be viewed as an extension of my remarks today and not as a second speech under the two-speech rule.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I thank the Chair, and I thank the Senator for permitting me to interrupt at this point.

UNANIMOUS-CONSENT AGREEMENT

Mr. BAKER. Mr. President, I now ask unanimous consent that the Senate temporarily lay aside the pending motion to waive section 402(a) of the Budget Act with respect to the consideration of H.R. 5427, the Radio Marti bill, and I ask that the Senate turn to the consideration of Calendar Order No. 760, which is the budget waiver to accompany Calendar Order No. 731, which is S. 2305, the Outer Continental Shelf bill, and to consider S. 2305; that following the disposition of the items just mentioned, the Senate resume consideration of the pending motion subject to prior orders for rollcall votes which may have been entered and which indeed has been entered in respect to the Polish resolution.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

ORDERS FOR TUESDAY

ORDER FOR RECESS UNTIL TOMORROW AT 11 A.M.

Mr. BAKER. Mr. President, if Senators will permit me, before we begin consideration of the budget waiver, I ask unanimous consent that when the Senate completes its business today it stand in recess until 11 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER DESIGNATING PERIOD FOR TRANSACTION OF ROUTINE MORNING BUSINESS ON TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that tomorrow after the recognition of the two leaders under the standing order, there be a period for the transaction of routine morning business to extend not past the hour of 12 noon, in which Senators may speak for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS TOMORROW FROM 12 NOON TO 2 P.M.

Mr. BAKER. Mr. President, I indicated earlier that on Tuesdays ordinarily there are caucuses on both sides of the aisle, at least on one side of the aisle, which are held off the floor but which are of an official nature. In order to accommodate that, once more I ask unanimous consent that the Senate then stand in recess from 12 noon until 2 p.m. tomorrow.

The PRESIDING OFFICER (Mrs. KASSEBAUM). Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Madam President, on tomorrow, at 11 a.m., when the Senate reconvenes, and after the recognition of the two leaders under the standing order, there will be a period for the transaction of routine morning business not to extend past 12 noon in which Senators may speak for not more than 5 minutes each. At 12 noon, the Senate will recess until 2 p.m., at which time the Senate will reconvene and, pursuant to the order previously entered, a rollcall vote will occur on the resolution in respect to Poland.

After the disposition of that resolution, Madam President, on which no further action can be taken by unanimous consent, the Senate will resume consideration of the motion to waive section 402(a) of the Budget Act with respect to the consideration of H.R. 5427, the Radio Marti bill.

Madam President, it is anticipated that in addition to these actions tomorrow the Senate will be asked at some point to turn to the consideration of the D.C. appropriations bill which will not be prior to 2 p.m. under the arrangements that have just been provided for.

There are other matters that may be dealt with on tomorrow and announcements on them will be given from time to time in the course of this day or tomorrow.

Madam President, earlier today I indicated a number of matters I hoped we could deal with this week. Included among them were appropriation bills as they may become available.

I am now advised of the high likelihood that the House of Representatives will send us a defense appropriations bill later this week. I would like to specifically identify that as one appropriations bill which we would like to deal with this week, if it is possible to do so, among the other appropriation bills which have been previously referred to.

Madam President, I thank the Senator from Nebraska for yielding. I am prepared now to yield the floor.

I believe the Senator from Idaho may seek recognition for the purpose of proceeding with the matter now before the Senate.

Mr. McCLURE addressed the Chair.

The PRESIDING OFFICER. The Senator from Idaho.

WAIVER OF SECTION 402(a) OF THE CONGRESSIONAL BUDGET ACT OF 1974 WITH RESPECT TO THE CONSIDERATION OF S. 2305

Mr. McCLURE. Madam President, the pending business, I believe, is Calendar Order 760, Senate Resolution 439, the budget waiver to accompany Calendar Order No. 731, am I correct?

The PRESIDING OFFICER. The Senator is correct. The bill will be stated by title.

The bill clerk read as follows:

A resolution (S. Res. 439) waiving section 402(a) of the Congressional Budget Act of

1974 with respect to the consideration of S. 2305.

There being no objection, the Senate proceeded to consider the resolution.

The resolution was considered and agreed to as follows:

S. RES. 439

Resolved, That, pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 2305. Such waiver is necessary because S. 2305, as reported, authorized the enactment of new budget authority which would first become available in fiscal year 1983, and such bill was not reported on or before May 15, 1982, as required by section 402(a) of the Congressional Budget Act of 1974 for such authorizations.

The waiver of section 402(a) is necessary to permit Congressional consideration of the initiatives authorized in S. 2305, which are expected to result in no net increase in costs to the Federal Government and are expected to result in increased Federal revenues.

Such initiatives are anticipated in the fiscal year 1983 budget request by the President which reflects the program activities necessary to support implementation of S. 2305. The Appropriations Committees of the Senate and the House of Representatives have therefore had adequate notice of this authorization; enactment is not expected to interfere with or delay the appropriations process.

UNANIMOUS-CONSENT AGREEMENT—S. 2305

Mr. McCLURE. Madam President, I ask unanimous consent, upon the consideration of Calendar Order No. 731, S. 2305, the royalty management bill, that no amendments be in order save the committee substitute and the amendment to the title.

The PRESIDING OFFICER. Is there any objection?

Mr. ROBERT C. BYRD. Madam President, reserving the right to object, I am advised that there is no objection on this side.

The PRESIDING OFFICER. The Chair hears no objection, and it is so ordered.

FEDERAL OIL AND GAS ROYALTY MANAGEMENT ACT OF 1982

The PRESIDING OFFICER. The bill will be stated by title.

The bill clerk read as follows:

A bill (S. 2305) to insure that all energy and mineral resources originating on the public lands and on the Outer Continental Shelf are properly accounted for under the direction of the Secretary of the Interior, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consideration of the bill, which had been reported from the Committee on Energy and Natural Resources with an amendment to strike out all after the enacting clause, and insert the following:

SHORT TITLE

SECTION 1. This Act may be cited as the "Federal Royalty Management Act of 1982".

FINDINGS AND PURPOSES

SEC. 2. (a) Congress finds that—

(1) the Secretary of the Interior should enforce effectively and uniformly existing regulations under the mineral leasing laws providing for the inspection of production activities on lease sites on Federal and Indian lands;

(2) the system of accounting with respect to royalties and other payments due and owing on oil and gas resources produced from such lease sites is archaic and inadequate;

(3) it is essential that the Secretary initiate procedures to improve methods of accounting for such royalties and payments and to provide for routine inspection of activities related to the production of oil and gas resources on such lease sites, and

(4) the Secretary should aggressively carry out his trust responsibility in administration of Indian oil and gas resources.

(b) It is the purpose of this Act—

(1) to improve provisions of the mineral leasing laws related to obligations of lesses in the production of oil and gas resources from the Federal and Indian lands and the Outer Continental Shelf;

(2) to clarify and reaffirm the authorities of the Secretary of the Interior to maintain properly a system of information regarding Federal and Indian oil and gas resources in order for him to carry out effectively his duties under the mineral leasing laws;

(3) to permit and encourage the development of enforcement practices to ensure prompt and proper collection of oil and gas revenues owed to the United States and Indian lessors and those due to States in view of the significant Federal interest in assuring prompt and full collections of such royalties; and

(4) to fulfill the trust responsibility in the administration of Indian oil and gas resources.

DEFINITIONS

SEC. 3. For the purposes of this Act, the term—

(1) "Federal land" means all land and interests in land owned by the United States which are subject to the mineral leasing laws, including mineral resources or mineral estates reserved to the United States in the conveyance of a surface or nonmineral estate;

(2) "Indian allottee" means any Indian for whom land or an interest in land is held in trust by the United States or who holds title subject to Federal restriction against alienation;

(3) "Indian lands" means any lands or interest in lands of an Indian tribe or an Indian allottee held in trust by the United States or which is subject to Federal restriction against alienation, including mineral resources and mineral estates reserved to an Indian tribe or an Indian allottee in the conveyance of a surface or nonmineral estate, but does not include any lands subject to the provisions of section 3 of the Act of June 28, 1906 (34 Stat. 539);

(4) "Indian tribe" means any Indian tribe, band, nation, pueblo, community, rancheria, colony, or other group of Indians, including the Metlakatla Indian Community of Annette Island Reserve, for which land or interest in land is held by the United States in trust or which is subject to Federal restriction against alienation;

(5) "lease" means any contract, profit-share arrangement, joint venture, or other agreement issued or approved by the United States under a mineral leasing law that authorizes exploration for and extraction and removal of an oil or gas resource;

(6) "lease site" means any lands or submerged lands on which exploration for and extraction and removal of an oil or gas resource are authorized pursuant to a lease;

(7) "lessee" means any person to whom the United States, an Indian tribe, or an Indian allottee, issues a lease, or any person who has been assigned an obligation to make royalty or other payments required by the lease;

(8) "mineral leasing law" means any Federal law or provision of Federal law authorizing the disposition under lease of oil or gas resources;

(9) "oil or gas resource" means any oil or gas originating from a deposit of oil or gas in or on the Outer Continental Shelf, Federal, or Indian lands subject to disposition under lease under any mineral leasing law;

(10) "Outer Continental Shelf" means all submerged lands lying seaward and outside of the area of lands beneath navigable waters as defined in section 2 of the Submerged Lands Act (Public Law 83-31) and of which the subsoil and seabed appertain to the United States and are subject to its jurisdiction and control;

(11) "operator" means any person, including a lessee, who is responsible for the operations conducted on a lease;

(12) "production" means those activities which take place for the removal of an oil or gas resource, including such removal, field operations, transfer of an oil or gas resource off the lease, operation monitoring, maintenance, and workover drilling;

(13) "royalty" means any payment based on the value or volume of production which is due to the United States or an Indian tribe or an Indian allottee on production of an oil or gas resource from the Outer Continental Shelf, Federal, or Indian lands, or any payment owed to the United States or an Indian tribe or an Indian allottee under any provision of a lease;

(14) "Secretary" means Secretary of the Interior or his designee; and

(15) "State" means the several States of the Union, the District of Columbia, Puerto Rico, the territories and possessions of the United States, and the Trust Territory of the Pacific Islands.

SECRETARIAL AUTHORITIES

SEC. 4. (a) The Secretary shall prescribe such rules and regulations as may be reasonably necessary for the determination and collection of royalties on the production of oil or gas resources, the preparation and retention of records, the filing of reports, the conduct and frequency of audits, the enforcement of security at lease sites and during the process of transporting oil or gas resources from such sites, and the imposition of penalties for failure to conduct properly such activities.

(b) Rules and regulations issued to implement this Act shall be issued in conformity with section 553 of title 5 of the United States Code, notwithstanding section 553(a)(2) of that title.

(c) In carrying out his functions under subsection (a) of this section, the Secretary may also—

(1) apply to any existing leases, permits, or applications for leases or permits issued under the mineral leasing laws such rules and regulations as may be promulgated under the authorities granted by this Act; and

(2) contract with such non-Federal inspectors, auditors, enforcement officials, and other persons as he deems necessary to aid in the implementation of this Act in addition to entering into cooperative agreements as authorized under section 14 or a delegation under section 15 of this Act.

(d) Whenever the Secretary receives any royalty funds derived from the production of oil or gas resources on Indian lands the Secretary shall deposit the funds in the appropriate Indian account at the earliest practicable date.

DUTIES OF THE SECRETARY

SEC. 5. The Secretary shall—

(a) establish procedures to ensure that authorized representatives of the Secretary will inspect each lease site producing or expected to produce significant quantities of oil or gas resources in any year at least once during such year;

(b) establish and maintain adequate programs providing for the training of all such authorized representatives in methods and techniques of inspection and accounting that will be used with respect to such lease sites; and

(c) select lease accounts for audit either on his own initiative or upon written request by a State, Indian tribe or Indian allottee alleging good cause for selection of an account. The Secretary may also conduct company-wide audits of selected oil and gas companies to determine whether there are any royalty payments owed on Federal or Indian leases.

DUTIES OF LESSEES, OPERATORS, AND MOTOR VEHICLE TRANSPORTERS

SEC. 6. (a) Any lessee—

(1) who is required to make any royalty or other payment under a lease or the mineral leasing laws, shall make such payments in the time and manner as may be specified by the Secretary;

(2) shall notify the Secretary, in the time and manner as may be specified by the Secretary, of any assignment the lessee may have made of the obligation to make any royalty or other payment under a lease or the mineral leasing laws.

(b) Any operator shall—

(1) develop and comply with a site security plan designed to protect the oil or gas resources produced or stored on the lease site from theft, which plan shall conform with such minimum standards as the Secretary may prescribe by rule, taking into account the variety of circumstances at lease sites;

(2) notify the Secretary not later than the fifth business day after any new well begins production, or after any old well begins new production, of the date of commencement of production; and

(3) prepare and maintain all records and, upon request by the Secretary, submit any such records to the Secretary on the quantities of any oil or gas resource that is produced, stored, used, removed, or sold from the lease site and the method by which such resource is removed.

(c) Any person engaged in transporting by motor vehicle any oil resource from any lease site, or allocated to any such lease site, shall carry, on his person or in his vehicle, documentation showing, at a minimum, the amount, origin and intended destination of the resource.

HEARINGS AND INVESTIGATIONS

SEC. 7. (a) The Secretary may conduct after notice any hearings, investigation, audit, or other inquiry necessary or appropriate to carrying out his duties under this Act. In connection with such hearings, investigation, audit, or inquiry, the Secretary shall also have the power where reasonably necessary—

(1) to require by special or general order, any person to submit in writing such affidavits and answers to questions as the Secretary may reasonably prescribe, which submission shall be made within such reasonable period and under oath or otherwise, as may be necessary;

(2) to administer oaths;

(3) to require by subpena the attendance and testimony of witnesses and the production of all books, papers, production and financial records, documents, matter, and materials, as the Secretary my request;

(4) to order testimony to be taken by deposition before any person who is designated by the Secretary and who has the power to administer oaths, and to compel testimony and the production of evidence in the same manner as authorized under paragraph (3) of this subsection; and

(5) to pay witnesses the same fees and mileage as are paid in like circumstances in the courts of the United States.

(b) In case of refusal to obey a subpena served upon any person under this section, the district court of the United States for any district in which such person is found, resides, or transacts business, upon application by the Attorney General at the request of the Secretary and after notice to such person, shall have jurisdiction to issue an order requiring such person to appear and give testimony before the Secretary or to appear and produce documents before the Secretary. Any failure to obey such order of the court may be punished by such court as a contempt thereof and subject to a penalty of up to $10,000 a day.

(c) Any authorized representative of the Secretary may stop or inspect any motor vehicle that he has probable cause to believe to be carrying an oil resource from any lease site, or allocated to any such lease site, for the purpose of determining whether the driver of such vehicle has the documentation required under section 6(c).

(d) No advance notice of any inspection under this Act need be provided to any person: *Provided,* That the Secretary shall develop guidelines setting forth the coverage and the frequency of such inspections.

(e) For the purpose of making any inspection or investigation under this Act, the Secretary shall have the same right to enter upon or travel across any lease site as the lessee or operator has acquired by purchase, condemnation, or otherwise.

INJUNCTION AND SPECIFIC ENFORCEMENT AUTHORITY

SEC. 8. In addition to any other remedy under this Act or any mineral leasing law, the Attorney General or his designee may bring a civil action in the district courts of the United States, which shall have jurisdiction over such actions—

(a) to restrain any violation of this Act; or

(b) to compel the taking of any action required by or under this Act or any mineral leasing law of the United States.

REQUIRED RECORDKEEPING

SEC. 9. In addition to the provisions of existing law and section 6(b)(3) of this Act, any lessee, operator, or person engaged in the transport of an oil or gas resource prior to the first sale of such resource, or any person involved in the first sale of an oil or gas resource subject to this Act, shall establish and maintain any records, make any reports, and provide any information as the Secretary may, by rule, reasonably require for the purposes of implementing this Act or determining compliance with rules or orders prescribed under this Act. Upon the request of any officer or employee duly designated by the Secretary the appropriate records, reports, or information which may be required by this section shall be made available for inspection and duplication by such officer or employee.

ROYALTY INTEREST, PENALTIES AND PAYMENTS

SEC. 10. (a) The first sentence of section 35 of the Act of February 25, 1920, as amended (30 U.S.C. 191), is amended by inserting "including interest charges, and any other moneys, except civil and criminal penalty moneys, collected under the Federal Royalty Management Act of 1982 because of nonpayment, late payment or underpayment of royalties" between "royalties" and "and" and by deleting wherever it appears "as soon as practicable" and inserting in lieu thereof "as often as administratively convenient but at least".

(b) An amount equal to fifty per centum of any civil penalty collected under this Act resulting from activities conducted by a State or Indian tribe pursuant to a cooperative agreement under section 14 or a State under a delegation under section 15, shall be payable to such State or tribe: *Provided,* That such amount shall be deducted from any compensation due such State or Indian tribe under section 14 or such State under section 15.

(c) The Secretary shall charge interest on late royalty payments at a rate determined by the Secretary of the Treasury to provide adequate incentive for timely royalty payment.

(d) All interest charges collected under this Act or other applicable laws because of nonpayment, late payment or underpayment of royalties due and owing an Indian tribe or an Indian allottee shall be paid to the Indian tribe or Indian allottee whose royalty payments are affected by such nonpayment, late payment or underpayment.

(e) Notwithstanding any other provision of law, no State will be assessed for any interest or penalties found to be due against the Department of the Interior for failure to comply with the Emergency Petroleum Allocation Act of 1973 or regulation of the Department of Energy thereunder concerning crude oil certification or pricing with respect to crude oil taken by the Department of the Interior in kind as royalty. Any State share of an overcharge, resulting from such failure to comply, shall be assessed against moneys found to be due and owing to such State as a result of audits of royalty accounts for transactions which took place prior to the date of the enactment of this Act: *Provided,* That if after the completion of such audits, sufficient moneys have not been found due and owning to any State, the State shall be assessed the balance of that State's share of the overcharge.

EXPANDED ROYALTY OBLIGATIONS

SEC. 11. Any lessee is liable for royalty payments on oil or gas resources lost or wasted from a lease site when such loss or waste is due to negligence on the part of the operator of the lease, or due to the failure to comply with any rule or regulation, order or citation issued under this Act or any mineral leasing law.

CIVIL PENALTIES

SEC. 12. (a) Any person who—

(1) after due notice of violation fails or refuses to comply with any requirements of

this Act or any mineral leasing law, or any rule or regulation thereunder;

(2) fails to permit inspection authorized in section 7(c) or fails to notify the Secretary of any assignment under section 6(a)(2); or

(3) after due notice of violation fails or refuses to comply with the terms of any lease;

shall be liable for a penalty of up to $500 per violation for each day such violation continues. A penalty under this subsection may not be applied to any person who is otherwise liable for a violation of paragraphs (1) or (3) if:

(A) the violation was discovered and reported to the Secretary or his authorized representative by the liable person and corrected within thirty days; or

(B) after due notice of violation has been given to such person by the Secretary or his authorized representative, such person has corrected the violation within thirty days of such notification.

(b) Any person who—

(1) knowingly or willfully fails to make any royalty or other payment required under a lease, as specified by statute, regulation, order or terms of the lease, by the date specified in same;

(2) fails or refuses to permit lawful entry, inspection, or audit; or

(3) fails or refuses to comply with section 6(b)(2) of this Act;

shall be liable for a penalty of up to $10,000 per violation for each day such violation continues.

(c) Any person who—

(1) knowingly or willfully prepares, maintains, or submits false, inaccurate, or misleading reports, notices, affidavits, records, data, or other written information;

(2) knowingly or willfully takes or removes, transports, or diverts any oil or gas resource from any lease site without having valid legal authority to do so; or

(3) purchases, accepts, sells, transports, or conveys to another, any oil or gas resource knowing or having reason to know that such resource was stolen or unlawfully removed or diverted,

shall be liable for a penalty of up to $25,000 per violation for each day such violation continues.

(d) No penalty under this section shall be collected until the person charged with a violation has been given the opportunity for a hearing on the record.

(e) The amount of any penalty under this section, as finally determined may be deducted from any sums owing by the United States to the person charged.

(f) On a case-by-case basis the Secretary may compromise civil penalties under this section and may, in his discretion, decline to assess any penalty under this section.

CRIMINAL PENALTIES

SEC. 13. Civil penalties imposed under section 12 of this Act shall be in addition to any criminal penalties available under the laws of the United States.

COOPERATIVE AGREEMENTS

SEC. 14. (a) The Secretary is authorized to enter into a cooperative agreement with any State or Indian tribe to share oil or gas royalty management information, in a timely manner and on a regular basis, to secure information for the cross checking of company submitted data, to carry out inspection auditing and enforcement activities under this Act in cooperation with, and under delegated authorities from, the Secretary, and to carry out any other activity described in subsections (c), (d), and (e) of section 7 of this Act. The Secretary shall not enter into any such cooperative agreement with a State with respect to any such activities on Indian lands, except with the permission of the Indian tribe involved.

(b) Any cooperative agreement entered into pursuant to this section shall be in accordance with the provisions of the Federal Grant and Cooperative Agreement Act of 1977, and shall contain such terms and conditions as the Secretary deems appropriate and consistent with the purposes of this Act, including, but not limited to, a limitation on the use of Federal assistance to those costs which are directly required to carry out the agreed upon activities.

(c) The United States shall not be liable for the wrongful disclosure by any individual, State, or Indian tribe of any information provided to such individual, State, or Indian tribe pursuant to any cooperative agreement authorized by this section or a delegation under section 15.

(d) Whenever any individual, State, or Indian tribe has obtained possession of information pursuant to a cooperative agreement authorized by this section, or any individual or State has obtained possession of information pursuant to a delegation under section 15, the individual shall be subject to the same provisions of law with respect to the disclosure of such information as would apply to an officer or employee of the United States or of any department or agency thereof and the State or Indian tribe shall be subject to the same provisions of law with respect to the disclosure of such information as would apply to the United States or any department or agency thereof.

DELEGATION TO STATES

SEC. 15. (a) Upon written request of any State, the Secretary is authorized to delegate, in accordance with the provisions of this section, all or part of the authorities and responsibilities of the Secretary under this Act to conduct inspections, audits, and investigations, and to collect royalties, interest, and civil penalties to any State with respect to all the Federal lands or Indian lands within the State: *Provided, however,* That the Secretary may not undertake such a delegation with respect to any Indian lands, except with the permission of the Indian tribe involved.

(b) After notice and opportunity for a hearing, the Secretary is authorized to delegate such authorities and responsibilities granted under this Act as the State has requested, if the Secretary finds that—

(1) it is likely that the State will provide adequate resources to achieve the purposes of this Act;

(2) the State has demonstrated that it will effectively and faithfully administer the rules and regulations of the Secretary under this Act in accordance with the requirements of subsections (c) and (d) of this section; and

(3) such delegation will not create an unreasonable burden on any lessee,

with respect to the Federal lands and Indian lands within the State.

(c) The Secretary shall promulgate regulations which define those functions, if any, which must be carried out jointly in order to avoid duplication of effort, and any delegation to any State must be made in accordance with those requirements.

(d) The Secretary shall by rule promulgate standards and regulations, in conformance with section 4(a) of this Act, pertaining to the authorities and responsibilities under subsection (a), including standards and regulations pertaining to:

(1) audits performed;

(2) records and accounts to be maintained; and

(3) reporting and collection procedures to be required by States under this section.

Such standards and regulations shall be designed to provide reasonable assurance that a uniform and effective system of accounting and payment of royalties and other payments required under Federal leases will prevail among the States. The records and accounts under paragraph (2) shall be sufficient to allow the Secretary to monitor the performance of any State under this section.

(e) If, after notice and opportunity for a hearing, the Secretary finds that any State to which any authority or responsibility of the Secretary has been delegated under this section is in violation of any requirement of this section or any rule thereunder, or that an affirmative finding by the Secretary under subsection (b) can no longer be made, the Secretary may revoke such delegation.

(f) The Secretary shall compensate any State for those costs which may be necessary to carry out the delegated activities under this section. Payment shall be made no less than every quarter during the fiscal year.

(g) In the event the State is delegated authority to collect moneys under Federal leases under this Act, such State shall deposit any such royalties, interest, penalties, or other moneys into the general fund of the United States Treasury as miscellaneous receipts, as often as administratively convenient, but at least every quarter during the fiscal year, in a form and manner to be prescribed by regulation promulgated by the Secretary, and such funds shall be dispersed by the United States in accordance with the provisions of section 35 of the Act of February 25, 1920, as amended (30 U.S.C. 191).

RELATION TO OTHER LAWS

SEC. 16. (a) No provision of this Act limits the authority of the Inspector General of the Department of the Interior under provisions of the Inspector General Act of 1978 (P.L. 95-452) as amended.

(b) No provision of this Act impairs or affects lands and interests in land entrusted to the Tennessee Valley Authority.

(c) The penalties or authorities provided in this act are supplemental to, and not in derogation of, any penalties or authorities contained in any other law.

FUNDING

SEC. 17. Effective October 1, 1982, there are hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act, including such sums as may be necessary for the cooperative agreements authorized by section 14, and delegations authorized by section 15.

STATUTE OF LIMITATIONS

SEC. 18. Except in the case of fraud, any action to recover penalties under this Act shall be barred unless the action is commenced within six years after the date of the act or omission which is the basis for action.

STUDY OF OTHER MATERIALS

SEC. 19. (a) The Secretary shall study the question of the adequacy of royalty management for coal, uranium and other energy and nonenergy minerals on Federal and Indian lands. The study shall include proposed legislation if the Secretary determines that such legislation is necessary to ensure prompt and proper collection of rev-

enues owed to the United States, the States and Indian tribes or Indian allottees from the sale, lease or other disposal of such minerals.

(b) The study required by subsection (a) of this section shall be submitted to Congress not later than one year from the date of the enactment of this Act.

(c) Nothing in this Act shall be construed to reduce the responsibilities of the Secretary to ensure prompt and proper collection of revenues from coal, uranium and other energy and nonenergy minerals on Federal and Indian lands, or to restrain the Secretary from entering into cooperative agreements or other appropriate arrangements with States and Indian tribes to share royalty management responsibilities and activities for such minerals under existing authorities.

SEVERABILITY

SEC. 20. If any provision of this Act or the applicability thereof to any person or circumstances is held invalid, the remainder of this Act and the application of such provision to other persons or circumstances shall not be affected thereby.

Amend the title so as to read: "A bill to ensure that all oil and gas resources originating on the public lands and on the Outer Continental Shelf are properly accounted for under the direction of the Secretary of the Interior, and for other purposes.".

UP AMENDMENT NO. 1414

Mr. McCLURE. Madam President, I send an amendment to the desk in the nature of a substitute and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Idaho (Mr. McCLURE) proposes an unprinted amendment numbered 1414.

Mr. McCLURE. Madam President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In lieu of the language proposed to be inserted by the committee amendment, insert the following:

SECTION 1. This Act may be cited as the "Federal Oil and Gas Royalty Management Act of 1982".

TITLE IV—REINSTATEMENT OF LEASES AND CONVERSION OF UNPATENTED OIL PLACER CLAIMS
Sec. 401. Amendment of Mineral Lands Leasing Act of 1920.

FINDINGS AND PURPOSES

SEC. 2. (a) Congress finds that—

(1) the Secretary of the Interior should enforce effectively and uniformly existing regulations under the mineral leasing laws providing for the inspection of production activities on lease sites on Federal and Indian lands;

(2) the system of accounting with respect to royalties and other payments due and owing on oil and gas produced from such lease sites is archaic and inadequate;

(3) it is essential that the Secretary initiate procedures to improve methods of accounting for such royalties and payments and to provide for routine inspection of activities related to the production of oil and gas on such lease sites, and

(4) the Secretary should aggressively carry out his trust responsibility in administration of Indian oil and gas.

(b) It is the purpose of this Act—

(1) to clarify, reaffirm, expand, and define responsibilities and obligations of lessees operator, and other persons involved in transportation or sale of oil and gas from the Federal and Indian lands and the Outer Continental Shelf;

(2) to clarify, reaffirm, expand and define the authorities and responsibilities of the Secretary of the Interior to implement and maintain a royalty management system for oil and gas leases on Federal lands, Indian lands, and the Outer Continental Shelf;

(3) to require the development of enforcement practices that ensure the prompt and proper collection and disbursement of oil and gas revenues owed to the United States and Indian lessors and those inuring to the benefit of States;

(4) to fulfill the trust responsibility of the United States for the administration of Indian oil and gas resources; and

(5) to effectively utilize the capabilities of the States and Indian tribes in developing and maintaining and efficient and effective Federal royalty management system.

DEFINITIONS

SEC. 3. For the purposes of this Act, the term—

(1) "Federal land" means all land and interests in land owned by the United States which are subject to the mineral leasing laws, including mineral resources or mineral estates reserved to the United States in the conveyance of a surface or nonmineral estate;

(2) "Indian allottee" means any Indian for whom land or in interest in land is held in trust by the United States or who holds title subject to Federal restriction against alienation;

(3) "Indian lands" means any lands or interest in lands of an Indian tribe or an Indian allottee held in trust by the United States or which is subject to Federal restriction against alienation, including mineral resources and mineral estates reserved to an Indian tribe or an Indian allottee in the conveyance of a surface or nonmineral estate, but does not include any lands subject to the provisions of section 3 of the Act of June 28, 1906 (34 Stat. 539);

(4) "Indian tribe" means any Indian tribe, band, nation, pueblo, community, rancheria, colony, or other group of Indians, including the Metlakatla Indian Community of Annette Island Reserve, for which land or interest in land is held by the United States in trust or which is subject to Federal restriction against alienation;

(5) "lease" means any contract, profit-share arrangement, joint venture, or other agreement issued or approved by the United States under a mineral leasing law that authorizes exploration for, extraction, or removal of oil or gas;

(6) "lease site" means any lands or submerged lands, including the surface of a severed mineral estate, on which exploration for, extraction or removal of oil or gas is authorized pursuant to a lease;

(7) "lessee" means any person to whom the United States, an Indian tribe, or an Indian allottee, issues a lease, or any person who has been assigned an obligation to make royalty or other payments required by the lease;

(8) "mineral leasing law" means any Federal law administered by the Secretary authorizing the disposition under lease of oil or gas;

(9) "oil or gas" means any oil or gas originating from or allocated to the Outer Continental Shelf, Federal, or Indian lands;

(10) "Outer Continental Shelf" has the same meaning as provided in the Outer Continental Shelf Lands Act (as amended) (Public Law 95-372);

(11) "person" means any individual, firm, corporation, association, partnership, consortium, or joint venture;

(12) "operator" means any person, including a lessee, who has control of, or who manages operations on, an oil and gas lease site on Federal or Indian lands or on the Outer Continental Shelf;

(13) "production" means those activities which take place for the removal of an oil or gas, including such removal, field operations, transfer of oil or gas off the lease site, operation monitoring, maintenance, and workover drilling;

(14) "royalty" means any payment based on the value or volume of production which is due to the United States or an Indian tribe or an Indian allottee on production of oil or gas from the Outer Continental Shelf, Federal, or Indian lands, or any minimum royalty owed to the United States or an Indian tribe or an Indian allottee under any provision of a lease;

(15) "Secretary" means the Secretary of the Interior or his designee; and

(16) "State" means the several States of the Union, the District of Columbia, Puerto Rico, the territories and possessions of the United States, and the Trust Territory of the Pacific Islands.

TITLE I—FEDERAL ROYALTY MANAGEMENT AND ENFORCEMENT

DUTIES OF THE SECRETARY

SEC. 101. (a) The Secretary shall establish a comprehensive inspection, collection and fiscal and production accounting and audit-

ing system to provide the capability to accurately determine oil and gas royalties, interests, fines, penalties, fees, deposits, and other payments owed, and to collect and account for such amounts in a timely manner.

(b) The Secretary shall—

(1) establish procedures to ensure that authorized and properly identified representatives of the Secretary will inspect at least once each year each lease site producing or expected to produce significant quantities of oil or gas in any year or which has a history of noncompliance with applicable provisions of law or regulations; and

(2) establish and maintain adequate programs providing for the training of all such authorized representatives in methods and techniques of inspection and accounting that will be used in the implementation of this Act.

(c)(1) The Secretary shall audit and reconcile, to the extent practicable, all current and past lease accounts for leases of oil or gas and take appropriate actions to make additional collections or refunds as warranted. The Secretary shall conduct audits and reconciliations of lease accounts in conformity with the business practices and recordkeeping systems which were required of the lessee by the Secreatry for the period covered by the audit. The Secretary shall give priority to auditing those lease accounts identified by a State or Indian tribe as having significant potential for underpayment. The Secretary may also audit accounts and records of selected lessees and operators.

(2) The Secretary may enter into contracts or other appropriate arrangements with independent certified public accountants to undertake audits of accounts and records of any lessee or operator relating to the lease of oil or gas. Selection of such independent certified public accountants shall be by competitive bidding in accordance with the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 252), except that the Secretary may not enter into a contract or other arrangement with any independent certified public accountant to audit any lessee or operator where such lessee or operator is a primary audit client of such certified public accountant.

(3) All books, accounts, financial records, reports, files, and other papers of the Secretary, or used by the Secretary, which are reasonably necessary to facilitate the audits required under this section shall be made available to any person or governmental entity conducting audits under this Act.

DUTIES OF LESSEES, OPERATORS, AND MOTOR VEHICLE TRANSPORTERS

SEC. 102. (a) A lessee—

(1) who is required to make any royalty or other payment under a lease or the mineral leasing laws, shall make such payments in the time and manner as may be specified by the Secretary; and

(2) shall notify the Secretary, in the time and manner as may be specified by the Secretary, of any assignment the lessee may have made of the obligation to make any royalty or other payment under a lease or the mineral leasing laws.

(b) An operator shall—

(1) develop and comply with a site security plan designed to protect the oil or gas produced or stored on an onshore lease site from theft, which plan shall conform with such minimum standards as the Secretary may prescribe by rule, taking into account the variety of circumstances at lease sites;

(2) develop and comply with such minimum site security measures as the Secretary deems appropriate to protect oil or gas produced or stored on a lease site on the Outer Continental Shelf from theft; and

(3) not later than the 5th business day after any well begins production anywhere on a lease site or allocated to a lease site, or resumes production in the case of a well which has been off of production for more than 90 days, notify the Secretary, in the manner prescribed by the Secretary, of the date on which such production has begun or resumed.

(c)(1) Any person engaged in transporting by motor vehicle any oil from any lease site, or allocated to any such lease site, shall carry, on his person, in his vehicle, or in his immediate control, documentation showing, at a minimum, the amount, origin, and intended first destination of the oil.

(2) Any person engaged in transporting any oil or gas by pipeline from any lease site, or allocated to any lease site, on Federal or Indian lands shall maintain documentation showing, at a minimum, amount, origin, and intended first destination of such oil or gas.

REQUIRED RECORDKEEPING

SEC. 103. (a) A lessee, operator, or other person directly involved in developing, producing, transporting, purchasing, or selling oil or gas subject to this Act through the point of first sale or the point of royalty computation, whichever is later, shall establish and maintain any records, make any reports, and provide any information that the Secretary may, by rule, reasonably require for the purposes of implementing this Act or determining compliance with rules or orders under this Act. Upon the request of any officer or employee duly designated by the Secretary or any State or Indian tribe conducting an audit or investigation pursuant to this Act, the appropriate records, reports, or information which may be required by this section shall be made available for inspection and duplication by such officer or employee, State, or Indian tribe.

(b) Records required by the Secretary with respect to oil and gas leases from Federal or Indian lands or the Other Continental Shelf shall be maintained for 6 years after the records are generated unless the Secretary notifies the record holder that he has initiated an audit or investigation involving such records and that such records must be maintained for a longer period. In any case when an audit or investigation is underway, records shall be maintained until the Secretary releases the record holder of the obligation to maintain such records.

PROMPT DISBURSEMENT OF ROYALTIES

SEC. 104. (a) Section 35 of the Mineral Lands Leasing Act of 1920 (approved February 25, 1920; 41 Stat. 437; 30 U.S.C. 191) is amended by deleting "as soon as practicable after March 31 and September 30 of each year" and by adding at the end thereof "Payments to States under this section with respect to any moneys received by the United States, shall be made not later than the last business day of the month in which such moneys are warranted by the United States Treasury to the Secretary as having been received, except for any portion of such moneys which is under challenge and placed in a suspense account pending resolution of a dispute. Such warrants shall be issued by the United States Treasury not later than 10 days after receipt of such moneys by the Treasury. Moneys placed in a suspense account which are determined to be payable to a State shall be made not later than the last business day of the month in which such dispute is resolved. Any such amount placed in a suspense account pending resolution shall bear interest until the dispute is resolved."

(b) Deposits of any royalty funds derived from the production of oil or gas from Indian lands shall be made by the Secretary to the appropriate Indian account at the earliest practicable date after such funds are received by the Secretary but in no case later than the last business day of the month in which such funds are received.

(c) The provisions of this section shall apply with respect to payments received by the Secretary after October 1, 1983, unless the Secretary, by rule, prescribes an earlier effective date.

EXPLANATION OF PAYMENTS

SEC. 105 (a) When any payment (including amounts due from receipt of any royalty, bonus, interest charge, fine, or rental) is made by the United States to a State with respect to any oil or gas lease on Federal lands or is deposited in the appropriate Indian account on behalf of an Indian tribe or Indian allottee with respect to any oil and gas lease on Indian lands, there shall be provided, together with such payment, a description including the type of payment being made, the period covered by such payment, the source of such payment, production amounts, the royalty rate value and such other information as may be agreed upon by the Secretary and the recipient State, Indian tribe, or Indian allottee.

(b) This section shall take effect with respect to payments made after October 1, 1983, unless the Secretary, by rule, prescribes an earlier effective date.

LIABILITIES AND BONDING

SEC. 106. A person (including any agent or employee of the United States and any independent contractor) authorized to collect, recieve, account for, or otherwise handle any moneys payable to or receive by the Department of the Interior which are derived from the sale, lease, or other disposal of any oil or gas shall be—

(1) liable to the United States for any losses caused by any intentional or reckless action or inaction of such individual with respect to such moneys; and

(2) in the case of an independent contractor, required as the Secretary deems necessary to maintain a bond commensurate with the amount of money for which such individual could be liable to the United States.

HEARINGS AND INVESTIGATIONS

SEC. 107. (a) In carrying out his duties under this Act the Secretary may conduct any investigation or other inquiry necessary and appropriate and may conduct, after notice, any hearing, or audit, necessary and appropriate to carrying out his duties under this Act. In connection with such hearings, investigation, audit, or inquiry, the Secretary is also authorized where reasonably necessary—

(1) to require by special or general order, any person to submit in writing such affidavits and answers to questions as the Secretary may reasonably prescribe, which submission shall be made within such reasonable period and under oath or otherwise, as may be necessary;

(2) to administer oaths;

(3) to require by subpena the attendance and testimony of witnesses and the production of all books, papers, production and financial records, documents, matter, and materials, as the Secretary may request;

(4) to order testimony to be taken by deposition before any person who is designated by the Secretary and who has the power to administer oaths, and to compel testimony and the production of evidence in the same manner as authorized under paragraph (3) of this subsection; and

(5) to pay witnesses the same fees and mileage as are paid in like circumstances in the courts of the United States.

(b) In case of refusal to obey a subpena served upon any person under this section, the district court of the United States for any district in which such person is found, resides, or transacts business, upon application by the Attorney General at the request of the Secretary and after notice to such person, shall have jurisdiction to issue an order requiring such person to appear and give testimony before the Secretary or to appear and produce documents before the Secretary. Any failure to obey such order of the court may be punished by such court as contempt thereof and subject to a penalty of up to $10,000 a day.

INSPECTIONS

SEC. 108. (a)(1) On any lease site on Federal or Indian lands, any authorized and properly identified representative of the Secretary may stop and inspect any motor vehicle that he has probable cause to believe is carrying oil from a lease site on Federal or Indian lands or allocated to such a lease site, for the purpose of determining whether the driver of such vehicle has documentation related to such oil as required by law.

(2) Any authorized and properly identified representative of the Secretary, accompanied by any appropriate law enforcement officer, or an appropriate law enforcement officer alone, may stop and inspect any motor vehicle which is not on a lease site if he has probable cause to believe the vehicle is carrying oil from a lease site on Federal or Indian lands or allocated to such a lease site. Such inspection shall be for the purpose of determining whether the driver of such vehicle has the documentation required by law.

(b) Authorized and properly identified representatives of the Secretary may without advance notice, enter upon, travel across and inspect lease sites on Federal or Indian lands and may obtain from the operator immediate access to secured facilities on such lease sites, for the purpose of making any inspection or investigation for determining whether there is compliance with the requirements of the mineral leasing laws and this Act: *Provided*, That the Secretary shall develop guidelines setting forth the coverage and the frequency of such inspections.

(c) For the purpose of making any inspection or investigation under this Act, the Secretary shall have the same right to enter upon or travel across any lease site as the lessee or operator has acquired by purchase, condemnation, or otherwise.

CIVIL PENALTIES

SEC. 109. (a) Any person who—

(1) after due notice of violation or after such violation has been reported under subsection (a)(2)(A) fails or refuses to comply with any requirements of this Act or any mineral leasing law, any rule or regulation thereunder, or the terms of any lease or permit issued thereunder; or

(2) fails to permit inspection authorized in section 108 or fails to notify the Secretary of any assignment under section 102(a)(2)

shall be liable for a penalty of up to $500 per violation for each day such violation continues, dating from the date of such notice or report. A penalty under this subsection may not be applied to any person who is otherwise liable for a violation of paragraph (1) if:

(A) the violation was discovered and reported to the Secretary or his authorized representative by the liable person and corrected within twenty days after such report or such longer time as the Secretary may agree to; or

(B) after the due notice of violation required in subsection (a)(1) has been given to such person by the Secretary or his authorized representative, such person has corrected the violation within twenty days of such notification or such longer time as the Secretary may agree to.

(b) If corrective action is not taken within 40 days or a longer period as the Secretary may agree to, after due notice on the report referred to in subsection (a)(1), such person shall be liable for a civil penalty of not more than $5,000 per violation for each day such violation continues, dating from the date of such notice or report.

(c) Any person who—

(1) knowingly or willfully fails to make any royalty payment by the date as specified by statute, regulation, order or terms of the lease;

(2) fails or refuses to permit lawful entry, inspection, or audit; or

(3) knowingly or willfully fails or refuses to comply with subsection 102(b)(3),

shall be liable for a penalty of up to $10,000 per violation for each day such violation continues.

(d) Any person who—

(1) knowingly or willfully prepares, maintains, or submits false, inaccurate, or misleading reports, notices, affidavits, records, data, or other written information;

(2) knowingly or willfully takes or removes, transports, uses or diverts any oil or gas resource from any lease site without having valid legal authority to do so; or

(3) purchases, accepts, sells, transports, or conveys to another, any oil or gas knowing or having reason to know that such oil or gas was stolen or unlawfully removed or diverted,

shall be liable for a penalty of up to $25,000 per violation for each day such violation continues.

(e) No penalty under this section shall be assessed until the person charged with a violation has been given the opportunity for a hearing on the record.

(f) The amount of any penalty under this section, as finally determined may be deducted from any sums owing by the United States to the person charged.

(g) On a case-by-case basis the Secretary may compromise or reduce civil penalties under this section.

(h) Notice under this subsection (a) shall be by personal service by an authorized representative of the Secretary or by registered mail. Any person may, in the manner prescribed by the Secretary, designate a representative to receive any notice under this subsection.

(i) In determining the amount of such penalty, or whether it should be remitted or reduced, and in what amount, the Secretary shall state on the record the reasons for his determinations.

(j) Any person who has requested a hearing in accordance with subsection (e) within the time the Secretary has prescribed for such a hearing and who is aggrieved by a final order of the Secretary under this section may seek review of such order in the United States district court for the judicial district in which the violation allegedly took place. Review by the district court shall be only on the administrative record and not de novo. Such an action shall be barred unless filed within 90 days after the Secretary's final order.

(k) If any person fails to pay an assessment of a civil penalty under this Act—

(1) after the order making the assessment has become a final order and if such person does not file a petition for judicial review of the order in accordance with subsection (j), or

(2) after a court in an action brought under subsection (j) has entered a final judgment in favor of the Secretary,

the court shall have jurisdiction to award the amount assessed plus interest from the date of the expiration of the 90-day period referred to in subsection (j). Judgment by the court shall include an order to pay.

(l) No person shall be liable for a civil penalty under subsection (a) or (b) for failure to pay any rental for any lease automatically terminated pursuant to section 31 of the Mineral Leasing Act of 1920.

CRIMINAL PENALTIES

SEC. 110. Any person who commits an act for which a civil penalty is provided in section 109(d) shall, upon conviction, be punished by a fine of not more than $50,000, or by imprisonment for not more than 2 years, or both.

ROYALTY INTEREST, PENALTIES AND PAYMENTS

SEC. 11. (a) In the case of oil and gas leases where royalty payments are not received by the Secretary on the date that such payments are due or are less than the amount due, the Secretary shall charge interest on such late payments or underpayments at the rate applicable under section 6621 of the Internal Revenue Code of 1954. In the case of an underpayment or partial payment, interest shall be computed and charged only on the amount of the deficiency and not on the total amount due.

(b) Any payment made by the Secretary to a State under section 35 of the Mineral Lands Leasing Act of 1920 (30 U.S.C. 191) and any other payment made by the Secretary to a State from any oil or gas royalty received by the Secretary which is not paid on the date required under section 35 shall include an interest charge computed at the rate applicable under section 6621 of the Internal Revenue Code of 1954.

(c) All interest charges collected under this Act or other applicable laws because of nonpayment, late payment or underpayment of royalties due and owing an Indian tribe or an Indian allottee shall be paid to the Indian tribe or Indian allottee whose royalty payments are affected by such nonpayment, late payment or underpayment.

(d) Any deposit of royalty funds made by the Secretary to an Indian account which is not made by the date required under subsection 104(b) shall include an interest charge computed at the rate applicable under section 6621 of the Internal Revenue Code of 1954.

(e) Notwithstanding any other provision of law, no State will be assessed for any interest or penalties found to be due against the Department of the Interior for failure to comply with the Emergency Petroleum Allocation Act of 1973 or regulation of the Department of Energy thereunder concerning crude oil certification or pricing with respect to crude oil taken by the Department of the Interior in kind as royalty. Any State share of an overcharge, resulting from such

failure to comply, shall be assessed against moneys found to be due and owing to such State as a result of audits of royalty accounts for transactions which took place prior to the date of the enactment of this Act: *Provided*, That if after the completion of such audits, sufficient moneys have not been found due and owing to any State, the State shall be assessed the balance of that State's share of the overcharge.

(f) Interest shall be charged under this section only for the number of days a payment is late.

(g) The first sentence of section 35 of the Act of February 25, 1920, as amended (30 U.S.C. 191), is amended by inserting "including interest charges collected under the Federal Oil and Gas Royalty Management Act of 1982 between "royalties" and "and".

INJUNCTION AND SPECIFIC ENFORCEMENT AUTHORITY

SEC. 112. (a) In addition to any other remedy under this Act or any mineral leasing law, the Attorney General of the United States or his designee may bring a civil action in a district courts of the United States, which shall have jurisdiction over such actions—

(1) to restrain any violation of this Act; or

(2) to compel the taking of any action required by or under this Act or any mineral leasing law of the United States.

(b) A civil action described in subsection (a) may be brought only in the United States district court for the judicial district wherein the act, omission, or transaction constituting a violation under this Act or any other mineral leasing law occurred, or wherein the defendant is found or transacts business.

REWARDS

SEC. 113. Where amounts representing royalty or other payments owed to the United States with respect to any oil and gas lease on Federal lands or the Outer Continental Shelf are recovered pursuant to any action taken by the Secretary under this act as a result of information provided to the Secretary by any person, the Secretary is authorized to pay to such person an amount equal to not more than 10 percent of such recovered amounts. The preceding sentence shall not apply to information provided by an officer or employee of the United States, an officer or employee of a State or Indian tribe acting pursuant to a cooperative agreement or delegation under this Act, or any person acting pursuant to a contract authorized by this Act.

TITLE II—STATES AND INDIAN TRIBES

APPLICATION OF TITLE

SEC. 201. This title shall apply only with respect to oil and gas leases on Federal lands or Indian lands. Nothing in this title shall be construed to apply to any lease on the Outer Continental Shelf.

COOPERATIVE AGREEMENTS

SEC. 202. (a) The Secretary is authorized to enter into a cooperative agreement or agreements with any State or Indian tribe to share oil or gas royalty management information, to carry out inspection, auditing investigation or enforcement (not including the collection of royalties, civil or criminal penalties or other payments) activities under this Act in cooperation with the Secretary, and to carry out any other activity described in section 108 of this Act. The Secretary shall not enter into any such cooperative agreement with a State with respect to any such activities on Indian lands, except with the permission of the Indian tribe involved.

(b) Except as provided in section 203, and pursuant to a cooperative agreement—

(1) each State shall, upon request, have access to all royalty accounting information in the possession of the Secretary respecting the production, removal, or sale of oil or gas from leases on Federal lands within the State; and

(2) each Indian tribe shall, upon request, have access to all royalty accounting information in the possession of the Secretary respecting the production, removal, or sale of oil or gas from leases on Indian lands under the jurisdiction of such tribe.

Information shall be made available under paragraphs (1) and (2) as soon as practicable after it comes into the possession of the Secretary. Effective October 1, 1983, such information shall be made available under paragraphs (1) and (2) not later than 30 days after such information comes into the possession of the Secretary.

(c) Any cooperative agreement entered into pursuant to this section shall be in accordance with the provisions of the Federal Grant and Cooperative Agreement Act of 1977, and shall contain such terms and conditions as the Secretary deems appropriate and consistent with the purposes of this Act, including, but not limited to, a limitation on the use of Federal assistance to those costs which are directly required to carry out the agreed upon activities.

INFORMATION

SEC. 203. (a) Trade secrets, proprietary and other confidential information shall be made available by the Secretary, pursuant to a cooperative agreement, to a State or Indian tribe upon request only if—

(1) such State or Indian tribe consents in writing to restrict the dissemination of the information to those who are directly involved in an audit or investigation under this Act and who have a need to know;

(2) such State or tribe accepts liability for wrongful disclosure;

(3) such State demonstrates that such information is essential to the conduct of an audit or investigation or to litigation under section 204; and

(4) in the case of an Indian tribe, such tribe demonstrates that such information is essential to the conduct of an audit or investigation and waives sovereign immunity by express consent for wrongful disclosure by such tribe.

(b) The United States shall not be liable for the wrongful disclosure by any individual, State, or Indian tribe of any information provided to such individual, State, or Indian tribe pursuant to any cooperative agreement or a delegation, authorized by this Act.

(c) Whenever any individual, State, or Indian tribe has obtained possession of information pursuant to a cooperative agreement authorized by this section, or any individual or State has obtained possession of information pursuant to a delegation under section 205, the individual shall be subject to the same provisions of law with respect to the disclosure of such information as would apply to an officer or employee of the United States or of any department or agency thereof and the State or Indian tribe shall be subject to the same provisions of law with respect to the disclosure of such information as would apply to the United States or any department or agency thereof. No State or State officer or employee who receives trade secrets, proprietary information, or other confidential information under this Act may be required to disclose such information under State law.

STATE SUITS UNDER FEDERAL LAW

SEC. 204. (a)(1) A State may commence a civil action under this section against any person to recover any royalty, interest, or civil penalty which the State believes is due, based upon credible evidence, with respect to any oil and gas lease on Federal lands located within the State.

(2)(A) No action may be commenced under paragraph (1) prior to 90 days after the State has given notice in writing to the Secretary of the payment required. Such 90-day limitation may be waived by the Secretary on a case-by-case basis.

(B) If, within the 90-day period specified in subparagraph (A), the Secretary issues a demand for the payment concerned, no action may be commenced under paragraph (1) with respect to such payment during a 45-day period after issuance of such demand. If, during such 45-day period, the Secretary receives payment in full, no action may be commenced under paragraph (1).

(C) If the Secretary refers the case to the Attorney General of the United States within the 45-day period referred to in subparagraph (B) or within 10 business days after the expiration of such 45-day period, no action may be commenced under paragraph (1) if the Attorney General, within 45 days after the date of such referral, commences, and thereafter diligently prosecutes, a civil action in a court of the United States with respect to the payment concerned.

(3) The State shall notify the Secretary and the Attorney General of the United States of any suit filed by the State under this section.

(4) A court in issuing any final order in any action brought under paragraph (1) may award costs of litigation including reasonable attorney and expert witness fees, to any party in such action if the court determines such an award is appropriate.

(b) An action brought under subsection (a) of this section may be brought only in a United States district court for the judicial district in which the lease site or the leasing activity complained of is located. Such district court shall have jurisdiction, without regard to the amount in controversy or the citizenship of the parties, to require compliance or order payment in any such action.

(c)(1) Notwithstanding any other provision of law, any civil penalty recovered by a State under subsection (a) shall be retained by the State and may be expended in such manner and for such purposes as the State deems appropriate.

(2) Any rent, royalty, or interest recovered by a State under subsection (a) shall be deposited in the Treasury of the United States in the same manner, and subject to the same requirements, are as applicable in the case of any rent, royalty, or interest collected by an officer or employee of the United States, except that such amounts shall be deposited in the Treasury not later than 10 days after receipt by the State.

DELEGATION TO STATES

SEC. 205. (a) Upon written request of any State, the Secretary is authorized to delegate, in accordance with the provisions of this section, all or part of the authorities and responsibilities of the Secretary under this Act to conduct inspections, audits, and investigations to any State with respect to all Federal lands or Indian lands within the State: *Provided*, That the Secretary may not undertake such a delegation with respect to any Indian lands, except with the

permission of the Indian tribe allottee involved.

(b) After notice and opportunity for a hearing, the Secretary is authorized to delegate such authorities and responsibilities granted under this section as the State has requested, if the Secretary finds that—

(1) it is likely that the State will provide adequate resources to achieve the purposes of this Act;

(2) the State has demonstrated that it will effectively and faithfully administer the rules and regulations of the Secretary under this Act in accordance with the requirements of subsections (c) and (d) of this section; and

(3) such delegation will not create an unreasonable burden on any lessee,

with respect to the Federal lands and Indian lands within the State.

(c) The Secretary shall promulgate regulations which define those functions, if any, which must be carried out jointly in order to avoid duplication of effort, and any delegation to any State must be made in accordance with those requirements.

(d) The Secretary shall by rule promulgate standards and regulations, 301(a) pertaining to the authorities and responsibilities under subsection (a), including standards and regulations pertaining to:

(1) audits performed;

(2) records and accounts to be maintained; and

(3) reporting procedures to be required by States under this section.

Such standards and regulations shall be designed to provide reasonable assurance that a uniform and effective royalty management system will prevail among the States. The records and accounts under paragraph (2) shall be sufficient to allow the Secretary to monitor the performance of any State under this section.

(e) If, after notice and opportunity for a hearing, the Secretary finds that any State to which any authority or responsibility of the Secretary has been delegated under this section is in violation of any requirement of this section or any rule thereunder, or that an affirmative finding by the Secretary under subsection (b) can no longer be made, the Secretary may revoke such delegation.

(f) The Secretary shall compensate any State for those costs which may be necessary to carry out the delegated activities under this section. Payment shall be made no less than every quarter during the fiscal year.

SHARED CIVIL PENALTIES

SEC. 206. An amount equal to fifty per centum of any civil penalty collected by the Federal Government under this Act resulting from activities conducted by a State or Indian tribe pursuant to a cooperative agreement under section 202 or a State under a delegation under section 205, shall be payable to such State or tribe: *Provided,* That such amount shall be deducted from any compensation due such State or Indian tribe under section 202 or such State under section 205.

TITLE III—GENERAL PROVISIONS

SECRETARIAL AUTHORITY

SEC. 301. (a) The Secretary shall prescribe such rules and regulations as he deems reasonably necessary to carry out this Act.

(b) Rules and regulations issued to implement this Act shall be issued in conformity with section 553 of title 5 of the United States Code, notwithstanding section 553(a)(2) of that title.

(c) In addition to entering into cooperative agreements or delegation of authority authorized under this Act, the Secretary may contract with such non-Federal Government inspectors, auditors, and other persons as he deems necessary to aid in carrying out his functions under this Act and its implementation. With respect to his auditing and enforcement functions under this Act, the Secretary shall coordinate such functions so as to avoid to the maximum extent practicable, subjecting lessees, operators, or other persons to audits or investigations of the same subject matter by more than one auditing or investigating entity at the same time.

REPORTS

SEC. 302. (a) The Secretary shall submit to the Congress an annual report on the implementation of this Act. The information to be included in the report and the format of the report shall be developed by the Secretary after consulting with the Committees on Interior and Insular Affairs of the House of Representatives and on Energy and Natural Resources of the Senate. The Secretary shall also report on the progress of the Department in reconciling account balances.

(b) Commencing with fiscal year 1984, the Inspector General of the Department of the Interior shall conduct a biennial audit of the Federal royalty management system. The Inspector General shall submit the results of such audit to the Secretary and to the Congress.

STUDY OF OTHER MINERALS

SEC. 303. (a) The Secretary shall study the question of the adequacy of royalty management for coal, uranium and other energy and nonenergy minerals on Federal and Indian lands. The study shall include proposed legislation if the Secretary determines that such legislation is necessary to ensure prompt and proper collection of revenues owed to the United States, the States and Indian tribes or Indian allottees from the sale, lease or other disposal of such minerals.

(b) The study required by subsection (a) of this section shall be submitted to Congress not later than one year from the date of the enactment of this Act.

RELATION TO OTHER LAWS

SEC. 304. (a) The penalties and authorities provided in this Act are supplemental to, and not in derogation of, any penalties or authorities contained in any other provision of law.

(b) Nothing in this Act shall be construed to reduce the responsibilities of the Secretary to ensure prompt and proper collection of revenues from coal, uranium and other energy and nonenergy minerals on Federal and Indian lands, or to restrain the Secretary from entering into cooperative agreements or other appropriate arrangements with States and Indian tribes to share royalty management responsibilities and activities for such minerals under existing authorities.

(c) Except as expressly provided in subsection 302(b), nothing in this Act shall be construed to enlarge, diminish, or otherwise affect the authority or responsibility of the Inspector General of the Department of the Interior or of the Comptroller General of the United States.

(d) No provision of this Act impairs or affects lands and interests in land entrusted to the Tennessee Valley Authority.

EFFECTIVE DATE

SEC. 305. The provisions of this Act shall apply to oil and gas leases issued before, on, or after the date of the enactment of this Act, except that in the case of a lease issued before such date, no provision of this Act or any rule or regulation prescribed under this Act shall alter the express and specific provisions of such a lease.

FUNDING

SEC. 306. Effective October 1, 1983, there are hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act, including such sums as may be necessary for the cooperative agreements, contracts, and delegations authorized by this Act: *Provided,* That nothing in this Act shall be construed to affect or impair any authority to enter into contracts or make payments under any other provision of law.

STATUTE OF LIMITATIONS

SEC. 307. Except in the case of fraud, any action to recover penalties under this Act shall be barred unless the action is commenced within six years after the date of the Act or omission which is the basis for the action.

EXPANDED ROYALTY OBLIGATIONS

SEC. 308. Any lessee is liable for royalty payments on oil or gas lost or wasted from a lease site when such loss or waste is due to negligence on the part of the operator of the lease, or due to the failure to comply with any rule or regulation, order or citation issued under this Act or any mineral leasing law.

SEVERABILITY

SEC. 309. If any provision of this Act or the applicability thereof to any person or circumstances is held invalid, the remainder of this Act and the application of such provision to other persons or circumstances shall not be affected thereby.

TITLE IV—REINSTATEMENT OF LEASES AND CONVERSION OF UNPATENTED OIL PLACER CLAIMS

AMENDMENT OF MINERAL LANDS LEASING ACT OF 1920

SEC. 401. Section 31 of the Mineral Lands Leasing Act of 1920 (30 U.S.C. 188) is amended by redesignating subsection (d) as subsection (j) and by inserting after subsection (c) the following new subsections:

"(d)(1) Where any oil and gas lease issued pursuant to section 17(b) or section 17(c) of this Act or the Mineral Leasing Act for Acquired Lands (30 U.S.C. 351 et. seq.) has been, or is hereafter, terminated automatically by operation of law under this section for failure to pay on or before the anniversary date the full amount of the rental due, and such rental is not paid or tendered within twenty days thereafter, and it is shown to the satisfaction of the Secretary of the Interior that such failure was justifiable or not due to lack of reasonable diligence on the part of the lessee, or, no matter when the rental is paid after termination, it is shown to the satisfaction of the Secretary that such failure was inadvertent, the Secretary may reinstate the lease as of the date of termination for the unexpired portion of the primary term of the original lease or any extension thereof remaining at the date of termination, and so long thereafter as oil or gas is produced in paying quantities. In any case where a lease is reinstated under this subsection and the Secretary finds that the reinstatement of such lease (A) occurs after the expiration of the primary term or any extension thereof, or (B) will not afford the lessee a reasonable opportunity to continue operations under the lease, the Secretary may, at his discre-

tion, extend the term of such lease for such period as he deems reasonable, but in no event for more than two years from the date the Secretary authorizes the reinstatement and so long thereafter as oil or gas is produced in paying quantities.

"(2) No lease shall be reinstated under paragraph (1) of this subsection unless—

"(A) with respect to any lease that terminated under subsection (b) of this section prior to enactment of the Federal Oil and Gas Royalty Management Act of 1982.

"(i) the lessee tendered rental prior to enactment of such Act and the final determination that the lease terminated was made by the Secretary or a court less than three years before enactment of such Act, and

"(ii) a petition for reinstatement together with the required back rental and royalty accruing from the date of termination, is filed with the Secretary on or before the one hundred and twentieth day after enactment of such Act, or

"(B) with respect to any lease that terminated under subsection (b) of this section on or after enactment of the Federal Oil and Gas Royalty Management Act of 1982, a petition for reinstatment together with the required back rental and royalty accruing from the date of termination is filed on or before the earlier of—

"(i) sixty days after the lessee receives from the Secretary notice of termination, whether by return of check or by any other form of actual notice, or

"(ii) fifteen months after termination of the lease.

"(e) Any reinstatement under subsection (d) of this section shall be made only if these conditions are met:

"(1) no valid lease, whether still in existence or not, shall have been issued affecting any of the lands covered by the terminated lease prior to the filing of such petition: *Provided however,* That after receipt of a petition for reinstatment, the Secretary shall not issue any new lease affecting any of the lands covered by such terminated lease for a reasonable period, as determined in accordance with regulations issued by him;

"(2) payment of back rentals and either the inclusion in a reinstated lease issued pursuant to the provisions of section 17(b) of this Act of a requirement for future rentals at a rate of not less than $10 per acre per year, or the inclusion in a reinstated lease issued pursuant to the provisions of section 17(c) of this Act of a requirement that future rentals shall be at a rate not less than $5 per acre per year, all as determined by the Secretary;

"(3)(A) payment of back royalties and the inclusion in a reinstated lease issued pursuant to the provisions of section 17(b) of this Act of a requirement for future royalties at a rate of not less than 16⅔ percent computed on a sliding scale based upon the average production per well per day, at a rate which shall be not less than 4 percentage points greater than the competitive royalty schedule then in force and used for royalty determination for competitive leases issued pursuant to such section as determined by the Secretary: *Provided,* That royalty on such reinstated lease shall be paid on all production removed or sold from such lease subsequent to the termination of the original lease;

"(B) payment of back royalties and inclusion in an reinstated lease issued pursuant to the provision of section 17(c) of this Act of a requirement for future royalties at a rate not less than 16⅔ percent: *Provided,* That royalty on such reinstated lease shall be paid on all production removed or sold from such lease subsequent to the cancellation or termination of the original lease; and

"(4) notice of the proposed reinstatement of a terminated lease, including the terms and conditions of reinstatement, shall be published in the Federal Register at least thirty days in advance of the reinstatement.

A copy of said notice, together with information concerning rental, royalty, volume of production, if any, and any other matter which the Secretary deemed significant in making this determination to reinstate, shall be furnished to the Committee on Interior and Insular Affairs of the House of Representatives and the Committee on Energy and Natural Resources of the Senate at least thirty days in advance of the reinstatement. The lessee of a reinstated lease shall reimburse the Secretary for the administrative costs of reinstating the lease, but not exceed $500. In addition the lessee shall reimburse the Secretary for the cost of publication in the Federal Register of the notice of proposed reinstatement.

"(f) Where an unpatented oil placer mining claim validity located prior to February 25, 1920, which has been or is currently producing or is capable of producing oil or gas, has been or is hereafter deemed conclusively abandoned for failure to file timely the required instruments or copies of instruments required by section 314 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1744), and it is shown to the satisfaction of the Secretary that such failure was inadvertent, justifiable, or not due to lack of reasonable diligence on the part of the owner, the Secretary may issue, for the lands covered by the abandoned unpatented oil placer mining claim, a noncompetitive oil and gas lease, consistent with the provisions of section 17(e) of this Act, to be effective from the statutory date the claim was deemed conclusively abandoned. Issuance of such a lease shall be conditioned upon:

"(1) a petition for issuance of a noncompetitive oil and gas lease, together with the required rental and royalty, including back rental and royalty accruing from the statutory date of abandonment of the oil placer mining claim, being filed with the Secretary—

"(A) with respect to any claim deemed conclusively abandoned on or before the date of enactment of the Federal Oil and Gas Royalty Management Act of 1982, on or before the one hundred and twentieth day after such date of enactement or

"(B) with respect to any claim deemed conclusively abandoned after such date of enactment, on or before the one hundred and twentieth day after final notification by the Secretary or a court of competent jurisdiction of the determination of the abandonment of the oil placer mining claim;

"(2) a valid lease not having been issued affecting any of the lands covered by the abandoned oil placer mining claim prior to the filing of such petition: *Provided however,* That after the filing of a petition for issuance of a lease under this subsection, the Secretary shall not issue any new lease affecting any of the lands covered by such abandoned oil placer mining claim for a reasonable period, as determined in accordance with regulations issued by him;

"(3) a requirement in the lease for payment of rental, including back rentals accruing from the statutory date of abandonment of the oil placer mining claim, of not less than $5 per acre per year;

"(4) a requirement in the lease for payment of royalty on production removed or sold from the oil placer mining claim, including all royalty on production made subsequent to the statutory date the claim was deemed conclusively abandoned, of not less than 12½ percent; and

"(5) compliance with the notice and reimbursement of costs provisions of paragraph (4) of subsection (e) but addressed to the petition covering the conversion of an abandoned unpatented oil placer mining claim to a noncompetitive oil and gas lease.

"(g)(1) Except as otherwise provided in this section, a reinstated lease shall be treated as a competitive or noncompetitive oil and gas lease in the same manner as the original lease issued pursuant to section 17(b) or 17(c) of this Act.

"(2) Except as otherwise provided in this section, the issuance of a lease in lieu of an abandoned patented oil placer mining claim shall be treated as a noncompetitive oil and gas lease issued pursuant to section 17(c) of this Act.

"(h) The minimum royalty provisions of section 17(d) and the provisions of section 39 of this Act shall be applicable to leases issued pursuant to subsections (d) and (f) of this section.

"(i)(1) In acting on a petition to issue a noncompetitive oil and gas lease, under subsection (f) of this section or in response to a request filed after issuance of such a lease, or both, the Secretary is authorized to reduce the royalty on such lease if in his judgement it is equitable to do so or the circumstances warrant such relief due to uneconomic or other circumstances which could cause undue hardship or premature termination of production.

"(2) In acting on a petition for reinstatement pursuant to subsection (d) of this section or in response to a request filed after reinstatement, or both, the Secretary is authorized to reduce the royalty in that reinstated lease on the entire leasehold or any tract or portion thereof segregated for royalty purposes if, in his judgement, there are uneconomic or other circumstances which could cause undue hardship or premature termination of production; or because of any written action of the Untied States, its agents or employees, which preceded, and was a major consideration in, the lessee's expenditure fo funds to develop the property under the lease after the rent had become due and had not been paid; or if in the judgment of the Secretary it is equitable to do so for any reason.".

Mr. McCLURE. Madam President, I am pleased to bring before the Senate for its consideration today the Federal Royalty Management Act of 1982, S. 2305. This bill is the product of extensive efforts by the Energy and Natural Resources Committee to draft a legislative vehicle designed to better insure that royalties due to the Federal Government from Federal and Indian oil and gas leases are, in fact, collected.

As reported by the Energy and Natural Resources Committee, S. 2305 clarifies, reaffirms, and expands the authorities and responsibilities of the Secretary of the Interior for the management of the Federal oil and gas royalty accounting system. It also vests in the Secretary new enforcement powers and subjects persons vio-

lating Federal royalty laws to new civil and criminal penalties.

This legislation is necessary because our present royalty management and collection system is both archaic and ineffective. This is true despite the fact that oil and gas leases are the most valuable property on Federal and Indian lands. With the rapid escalation of energy prices and increased leasing, oil and gas royalties have risen from less than $500 million in 1971 to more than an estimated $5 billion in 1982. Federal royalties from 17,866 onshore and 1,260 offshore oil and gas leases in 1981 alone produced $4 billion in revenues for the Federal Government. In 1980, the States, which share in these revenues under the terms of the Mineral Leasing Act of 1920, received $315 million in royalty revenues. In that same year, 33 Indian tribes received $164 million for their oil and gas leases.

Yet, despite the obvious financial importance of oil and gas royalty revenues to all concerned, the Federal royalty management and collection system is in disarray. Hundreds of millions of dollars due the U.S. Treasury, the States, Indian tribes, and individual Indian allottees are going uncollected every year due to inadequacies in the system.

Evidence of mismanagement in the royalty collection system first came to light in the mid-seventies when a General Accounting Office report cited evidence of vast underpayment of royalties by industry, due to mismanagement of the royalty collection system. To investigate these charges, Secretary of the Interior Watt, on July 8, 1981, established the Commission on Fiscal Accountability of the Nation's Energy Resources. The Commission, known as the Linowes Commission after its chairman, David Linowes, was charged with examining allegations of royalty underpayments, system mismanagement, and oil and gas theft on Federal and Indian lands. The Commission was to make recommendations for changes to correct any problems they discovered.

What the Commission found was that the royalty management collection system for the Nation's energy resources had been deficient for more than 20 years. This was primarily as a result of the Government's inability to adequately manage this multibillion-dollar enterprise. According to the Linowes Commission report, outmoded royalty accounting and collection procedures, slack enforcement, inadequate penalties, and an insufficient information and reporting system all contributed to the breakdown of the system. Lax site security was also an open invitation to theft on Federal and Indian leases.

In short, the Linowes Commission found that lessees were not paying all the royalties due on Federal and Indian oil and gas leases due to outmoded practices and inadequate royalty management laws. Royalty management was so bad that, according to the Linowes Commission, the industry was essentially on an "honor system."

As a result of these findings, the Linowes Commission concluded that the Federal royalty management system was in need of a thorough overhaul. To correct the many problems they found, the Commission made 60 recommendations for change, some of which required legislation to enact.

Responding to the Commission's recommendations, Secretary Watt, on January 19, 1982, removed the Conservation Division from the U.S. Geological Survey. It was reestablished as a separate Minerals Management Service in the Department of the Interior. The object of this transfer was to give the royalty collection function a special focus within the Department. In addition, a completely revamped fiscal and production accounting system was approved. Contracts were let for the development of a new, sophisticated accounting system to replace the one which had been in place for the past 20 years. The administration then moved to incorporate the recommendations for legislative change made by the Linowes Commission into proposed legislation.

This legislation was introduced on behalf of the administration as S. 2305. It was subsequently reported, with amendments, by the Senate Energy and Natural Resources Committee on July 30 of this year. On September 23, 1982, the House Interior and Insular Affairs Committee also reported a similar royalty management bill, H.R. 5121, the Federal Oil and Gas Royalty Management Act of 1982. On September 29, 1982, H.R. 5121 was passed by the House.

Due to the several similarities between S. 2305 as reported and H.R. 5121 as passed by the House, the respective Senate and House committee chairmen directed their staffs to conduct information negotiations in order to produce one royalty management text combining the best elements of both the Senate committee version and the House-passed version. Their intent was to obtain a bill that would be acceptable to both the Senate and the House and avoid the necessity of a conference. The amendment offered today is, I believe, acceptable to the Senate. It is my hope that the other body will find it acceptable as well, without amendment.

As a result of many meetings, an amended bill was produced. I am pleased today to offer this amendment in the nature of a substitute to S. 2305 to the Senate.

Madam President, this substitute amendment is the product of a great deal of hard work. House and Senate committee members, their staffs, and the administration labored long hours to produce needed changes to a bill which would remedy the failings in our present royalty accounting system.

Our national energy resources are finite and must be prudently and properly managed, particularly in these difficult economic times. We must be good managers of the Nation's resources. This substitute amendment, if enacted, would help us to do a better job. Its provisions help insure a substantial gain in revenues to the U.S. Treasury which are presently being lost through mismanagement. I urge its passage.

At this point, Madam President, I ask unanimous consent to have printed in the RECORD a summary of the major provisions of this amendment in the nature of a substitute and an explanation of certain of its sections.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2305 SUBSTITUTE.—SECTION-BY-SECTION ANALYSIS

Sec. 1. Title.
Sec. 2. Findings and Purposes.
Sec. 3. Definitions.

TITLE I

Federal royalty management and enforcement

Sec. 101. (a) Directs the Secretary to establish a comprehensive royalty management system.

(b)(1) Directs the Secretary to conduct annual inspections of most leases.

(b)(2) Directs the Secretary to establish adequate training programs for inspectors.

(c) Directs the Secretary to audit and reconcile lease accounts. Audits may be undertaken by independent CPA's under contract.

Sec. 102. (a) Requires lessees to make royalty payments due and to notify the Secretary of assignments of obligations to make payments.

(b) Requires operators to develop and comply with a site security plan for onshore leases, site security measures for offshore leases, and to notify the Secretary when a well begins production by the 5th business day. Wells off of production for more than 90 days are subject to the production notice requirement.

Sec. 102. (c) Requires documentation for motor vehicles carrying oil and pipelines carrying oil or gas.

Sec. 103. Requires records of activities through the first sale or royalty computation point for oil or gas. Such records must be retained for 6 years.

Sec. 104. Provides for monthly deposits of the State and Indian tribes' share of royalty payments.

Sec. 105. Provides for an explanation of payments to the States and Indian tribes.

Sec. 106. Makes persons liable for losses of royalty payments and requires bonding

Sec. 107. Provides the Secretary with hearing and investigation authority.

Sec. 108. Provides authority to stop and inspect motor vehicles for documentation, with probable cause, on or off a lease site. Inspections onsite may be conducted without notice pursuant to regulations.

Sec. 109 (a). Provides for a civil penalty of up to $500 per day for violations of the Act or regulations which are not corrected

within 20 days of receipt of notice. The penalty increases to $5,000 per day if the violation is not corrected after 40 days.

(b) Provides for a civil penalty of $10,000 per day for a person who knowingly fails to make a royalty payment; fails to permit entry, inspection or audit; or fails to notify of new production.

(c) Provides for a civil penalty of $25,000 per day for a person who knowingly prepares inaccurate reports; steals oil or gas; or purchases stolen oil or gas.

(d-k) Provide procedural safeguards. (House/Senate blend.)

Sec. 110. Provides a criminal penalty of $50,000 and up to 2 years in jail for the most serious violations of the Act (Sec. 110(c)).

Sec. 111(a-d). Provides that late payments for royalities shall be charged interest at the IRS rate. Such interest shall be paid in the appropriate share to State and Indian tribes.

(e) Provides for the methodology of assessing overcharges to the States. This provision is designed solely to avoid any significant hardship for the States. It is not intended to be a waiver of the Federal government's immunity against suits for overcharges or other alleged violations of the mandatory price and allocation regulations issued pursuant to the Emergency Petroleum Allocation Act of 1973, as amended.

(f-g) Technical.

Sec. 112. Provides for injunctive and specific enforcement authority.

Sec. 113. Provides rewards for persons providing information leading to recovery of money owed under this Act.

TITLE II

States and Indian tribes

Sec. 201. Make the title applicable to onshore leases only.

Sec. 202. Gives the Secretary authority to enter into cooperative agreements with States and Indian tribes to share royalty management information, or to carry out inspection, audit, or enforcement activities.

Sec. 203. Provides for the condition upon which States or Indian tribes may obtain confidential information.

Sec. 204. Provides a multi-stage mechanism through which States may bring enforcement actions in Court if the Federal Government fails to diligently pursue its enforcement obligations.

Sec. 205. Provides authority for the Secretary to delegate to the States his responsibilities for inspections, audits, and investigations. Such a delegation may not occur until certain findings have been made and standards promulgated.

Sec. 206. Provides for sharing of civil penalties with States or Indian tribes.

TITLE III

General provision

Sec. 301. Authority for rules, regulations, and contracts.

Sec. 302. Provides for reports on implementation of the Act by the Secretary and the Inspector General.

Sec. 303. Provides for a study of the adequacy of royalty management for other minerals.

Sec. 304-308. Technical provisions.

Sec. 309. Expands the royalty obligation of lessees to oil and gas lost or wasted due to negligence.

Sec. 310. Severability.

TITLE IV

Lease reinstatements

Sec. 401. Provides reinstatement of automatically terminated leases under certain terms and conditions.

Mr. MELCHER. Madam President, I have come to the floor today to participate in the debate on this bill with more than a small amount of foreboding.

Anyone who has followed the course of this legislation should be aware of my concerns with the approach that previous Secretaries of the Interior and Secretary Watt have taken with regard to the obvious problems with our system of royalty management. It has been in bad shape for more than two decades. It has taken us more than 2 years to get a corrective bill before us.

In December 1980, I and the staff of the Senate Select Committee on Indian Affairs started an investigation of allegations of theft and nonreporting of oil production from the Wind River Indian Reservation in Wyoming. This started a series of investigations and public hearings concerning other tribes, to see whether or not the royalty accounting procedures were being followed correctly.

The original legislation that was submitted by the administration to make corrections was simply inadequate. With the help of Chairman McCLURE and several other members of the Committee on Energy and Natural Resources, a very bad bill has become an acceptable bill.

The bill is far from perfect now, but it is a vehicle for Congress to establish an effective policy for royalty management on Federal and Indian lands. The substitute being offered today is a further improvement over the committee-reported version. We have some hope that the House will find this substitute acceptable.

To see where we have to go it is helpful to look at where we have been.

The Secretary of the Interior has broad authority in existing law to establish and maintain an effective system of accounting, inspection, and enforcement for the Federal interest in the oil and natural gas produced on Federal and Indian lands. The problem has been that the Secretary has not used that authority, has not hired the necessary trained staff, and has not enforced the terms of the leases to which he is a party. As a result, the accounting system we are using is archaic and totally inadequate, and the inspection program is so anemic that the Department has no idea how much oil and gas is being produced, who owes royalty on that oil and gas, or where the oil and gas is going after it is produced.

Now, we ought to understand that passing a bill is not, by itself, going to cure these very fundamental problems with the system. The trouble starts in the field, where far too little monitoring of wells, production, and the movement of oil and gas is taking place. We can all meet in the Rose Garden, sign a bill, and congratulate each other, and not one more inspection will actually occur in the field if this Secretary of the Interior acts like the others we have had previously. To improve things, forceful administrative action will be required, especially including the hiring of more inspectors who either have previous experience in oil and gas field operations or who have had extensive training and apprenticeship under experienced inspectors. These actions must also include the adoption of a uniform policy of regular inspections with a clear understanding between Federal inspectors and operators in the field as to what is required by the regulations. One of the amendments I offered during the committee's consideration of the bill—and the amendment was accepted—would require the Secretary to establish procedures to insure that each lease site producing significant quantities of oil or gas is inspected at least annually. This provision is very important, since it is one of the few in the bill actually requiring the Secretary to do something.

I should add here that Secretary Watt and his staff have asked for a good strong bill and have given us some indication that they have no objection to the provisions in this act, and that is to the credit of Secretary Watt.

Royalty accounting is another area where the Secretary has adequate authority under existing law, but has not exercised that authority effectively.

As I make this statement, it must be recalled that we are speaking of not just this Secretary, who has asked for some direction from Congress, but previous Secretaries of the Interior.

The existing royalty accounting system was scarcely adequate during the period when the Federal revenues from royalties were measured in tens of millions of dollars. It is a disgrace in an era when these revenues are measured in the billions. In fact, most of the "lost revenue" which has recieved so much publicity is not the result of theft. Rather it is the result of a totally archaic accounting system which literally cannot account for the revenues it is supposed to monitor and assist in collecting.

Over a year ago, the Department began to develop a computer model and contracted for a computer system to bring production reports and royalty accounting up to date. Of course, the vast majority of operators in the field long ago modernized their systems. At the rate the Department is currently moving, the Federal system will not be operational until late 1984 or sometime in 1985. I think this schedule is unacceptable.

There are real problems associated with designing and getting this new system into place, and new accounting regulations could cause enormous con-

fusion in the field. I have been deeply concerned about the provisions of the bill which suggest that States might "take over" the royalty collection function from the Department of the Interior on the basis of some vague delegation of Federal authority to the Governor. Nothing could do more to compound the confusion which is inevitable under the new system than the imposition on top of it all of multiple, possibly contradictory systems of regulation, reporting, and accounting involving State authorities.

I am gratified that the substitute bill before the Senate today would not authorize the Secretary to delegate to States the authority he exercises on behalf of the Nation as a whole to collect royalties on oil and gas production on Federal and Indian lands.

Finally, I think it essential to emphasize my fear that this bill, in the hands of the managers who are with us under both Republican and Democratic administrations, could end up significantly reducing the net revenue to the Federal Government, the States, and the tribes below what everyone might receive without the bill.

It is in everyone's interest to produce the oil and gas on Federal and Indian lands. The Nation needs more oil and gas. The Federal Government, the States, and the tribes need the revenue from oil and gas royalties. Discouraging exploration, development, and production of oil and gas on Federal and Indian lands just reduces Federal, State, and Indian revenues. There is nothing good about that.

This bill is still topheavy in redtape potential that will create substantial disincentives to oil and gas production from these lands. The only question is, How much of a disincentive will the bill prove to be? If the persons who invest in and are engaged in oil and gas drilling decide that the new layers of redtape and regulation and the potential liability for huge fines resulting from this bill overshadow the potential rewards of the enterprise, everyone will be a loser. There is a good chance that this will be the result in the end. Whether it is or not depends all too critically for my taste on the actions of managers in the Department of the Interior—persons over whom we in Congress have far too little control.

Madame President, I have supported this bill as an exercise of the art of the possible. The substitute bill before us is not perfect, but it is the best we can get in this Congress. I think we should take advantage of this opportunity to pass it now.

● Mr. JACKSON. Madam President, I rise in support of the Federal Oil and Gas Royalty Management Act of 1982. For over 20 years, the General Accounting Office has been reporting on the need for major improvements in the Federal Government's oil and gas royalty accounting system. More recently, hearings before the Energy and Natural Resources Committee and the Select Committee on Indian Affairs have forcefully reminded us of the archaic nature of the Interior Department's royalty accounting system and of the lack of adequate security measures at Federal and Indian lease sites.

To determine the nature and extent of these problems, Secretary of the Interior Watt appointed the Linowes Commission on Fiscal Accountability of the Nation's Energy Resources. On January 21, 1982, after hearing from dozens of witnesses from the administration, affected States and Indian tribes, and the oil and gas industry, the Commission submitted its findings and recommendations to the Secretary.

The Linowes Commission's findings basically confirm the reports of the General Accounting Office and the testimony received at congressional hearings. The Federal royalty management system lacks effective accounting procedures and is understaffed. The system does not provide for the verification of data reported by oil and gas lessees, and lease account records are so unreliable that Federal royalty managers often do not know which lessees have paid royalties and which lessees have not. Penalties for late payment or underpayment are rarely imposed. Because of these shortcomings, the Commission concluded that "the industry is essentially on an honor system." In addressing the problem of theft, the Commission could not determine the amount of oil and gas stolen but did find that lax security at onshore Federal and Indian lease sites is well documented and is an open invitation to theft.

Based on these findings, the Commission made 60 recommendations. Several of these recommendations are addressed in the provisions contained in the bill before the Senate. The others, according to Secretary Watt, will be dealt with administratively.

The committee bill is the result of a long, hard look at the problems involved in royalty management. I believe that the bill gives the Secretary the authority he needs to implement an effective royalty accounting system and to prevent the theft of oil and gas from Federal and Indian leases. I also believe that we need to pass this bill this session. Therefore, I urge my colleagues to join me in supporting prompt action by the Senate on this legislation.●

● Mr. DOMENICI. Madam President, I want to compliment Chairman McCLURE and the committee staff for the work they have done on S. 2305, the Federal Oil and Gas Royalty Management Act of 1982.

There is no doubt in my mind that if the Government has mismanaged programs over the years, the mineral management effort may have been the absolute worst example. In many cases, States, including my State of New Mexico, have performed not only better than that of the Federal Government but a whole lot better. In fact, in many cases not only did they do a better job but through memorandums of understanding and other arrangements they were able to assist the Federal Government in recovering millions of dollars in revenue. A recovery, I might add, that would not have occurred without the assistance from State government.

Be that as it may, I have been deeply concerned about this bill since its introduction and have worked with the chairman to reserve those concerns. Three major areas dominate and these include the penalty section, insuring that the rights and revenue of the States and finally and probably the most important issue, insuring that the system is one that works and one that works for all involved, not just the Federal Government.

In protecting State rights, Senator WALLOP and Senator MURKOWSKI and I had proposed a State option plan for the collection of royalties. However, I am informed and my State is satisfied that the substitute contains language that insures that State's will receive their proper share of royalties collected and that there is a mechanism to insure that the proper royalties are being collected.

In regard to the penalty section of this bill, I was concerned that the bill did not differentiate between knowing and willful acts to evade the law and just bookkeeping errors. Senator MELCHER shared my concern. Provisions were added to the bill which made the distinction and provided the chance to correct unintentional technical violations of the law.

I think it should be pointed out that there has been some misinformation about the amount of money that was being lost to the Treasury through royalty management and why the money was being lost. I think this lack of clear information did a disservice to many in our oil and gas industry.

Most of the large dollar amounts involved in the royalty management issue have to do with natural gas pricing regulations and have absolutely nothing to do with the royalty collection system. I would further point out, for the record, that in many cases under existing laws companies are forced to pay royalties on natural gas produced on Federal lands before they have even sold that natural gas or even know at what price that natural gas will be sold.

This means that the public record could very well indicate adequate royalties may not have been collected, but in fact, is not out of any wrongdoing

but rather to the laws regulating the price of natural gas and the overall system.

Finally, I think we have in this bill a system that protects the interest of all those involved. It is a much better system than we had before and hopefully it will be a system that will work well and will serve the best interests of the Federal Government, the State government, the oil and gas industry, and most important, the best interests of the citizens of the United States.

While the bill is in the nature of a substitute, many of the issues addressed in the bill as reported out of committee and that the report on that bill in many cases, especially in reference to natural gas pricing difficulties, and collection problems that stem from those difficulties still pertain to the substitute.●

● Mr. WALLOP. Madam President, today the Senate begins consideration of long awaited and critically needed legislation which will insure that the oil and gas resources of the public lands and Outer Continental Shelf are properly accounted for under the direction of the Secretary of the Interior. This legislation, S. 2305, titled the "Federal Oil and Gas Royalty Management Act of 1982," was introduced on March 30, 1982, at the request of the administration. As amended by the Committee on Energy and Natural Resources, the bill is the product of thorough study and extensive debate both in Senate and House committees.

Credit for the legislation's existence goes to Secretary of the Interior, Jim Watt, who unlike his predecessors, had the fortitude and courage to unveil the many, longstanding, defects in the Federal Government's management of the Federal oil and gas royalty accounting system. On July 8, 1981, Secretary Watt established a blue ribbon commission under the able leadership of David F. Linowes to carry out a detailed study of the allegations of theft and of substantial underpayment of oil and gas royalties owed the Federal Government, Indian tribes, and States from Federal oil and gas leases. While the Commission was carrying out this directive, the Senate Energy and Natural Resources Committee conducted a parallel investigation, and I had the honor of chairing the first committee hearing in Casper, Wyo.

Six months after its creation, the Linowes Commission presented its extremely uncomplimentary, 267 page report to Secretary Watt, and I quote from the report's summary:

The Federal Government currently collects several billion dollars each year in royalties from leased Federal and Indian lands. They expect to collect in the neighborhood of $4 billion dollars this year, and the figure is projected to climb to $20 billion by 1990. Wyoming's share of mineral royalties last year, including those paid on coal and sodium in addition to oil, amounted to $95 million. By 1985, Wyoming is expected to receive $250 million due to the rising price and production of oil. There is no question that with rising oil prices, royalty funds are becoming extremely important to the producing States, particularly those who will suffer the impact of development of new sources of oil and gas.

Consequently, it is nothing short of apalling to find that a State like Wyoming and Indian tribes are being and have been short-changed by the Federal Government due primarily to accounting problems in addition to isolated incidents of outright theft. The figures for Wyoming are particularly shocking since this State is the largest producer of Federal onshore oil in the Nation. Figures differ, but it has been calculated by some that Wyoming alone may have been short-changed by as much as $80 to $200 million in oil and gas royalties over the last 6 years. It is a situation which we obviously cannot—pardon the pun—afford much less tolerate.

The report continues, explaining that:

The problem . . . is dual in nature. It is one of accounting as well as one of security. The latter, lack of adequate security resulting in theft, is in part tied to the former.

It was the theft situation which really focused national attention on the accounting mess. The idea of people stealing oil is reprehensible, and those guilty of theft are quite rightly being prosecuted as a result of a Federal grand jury investigation. The theft situation is very serious and certainly the security problem must be cured. . . .

The accounting system has had problems that go back in time as far as the fifties. The old system managed to limp along for as long as it did presumably because with oil priced at less than $2 per barrel, it was felt that the cost to update it was not outweighed by the royalties to be gained. That has drastically changed. It is claimed that 10 percent of all mineral royalties aren't being collected due to obsolete and inefficient accounting procedures. Ten percent adds up to an anormous amount of money at today's oil prices.

The Linowes' Commission followed with 60 specific recommendations for revising and rebuilding the system. Secretary Watt immediately reorganized the U.S. Geological Survey, establishing a new Minerals Management Service to focus on the problems. At the same time, Secretary Watt created an internal legislative task force to draft the omnibus royalty management legislation which was introduced in March. The Committee on Energy and Natural Resources held hearings on that proposal May 3 and 17, consumed nine committee business meetings marking up the bill, and unanimously reported out substitute legislation.

Melded with essential provisions of H.R. 5121, passed by the House September 29, 1982, the compromise bill being discussed here today represents a thorough overhaul of the Federal oil and gas royalty management system, and I might emphasize, an overhaul needed nowhere more than in my State of Wyoming. Further, I am pleased to note that all my amendments to the bill adopted in committee markup have been retained in substance and, for purposes of legislative history, they are explained in detail in the Senate Energy Committee Report 97-512.

To repeat a statement of Mr. Linowes from his report to Secretary Watt:

There has been too much time spent in tinkering with quick fixes that don't work. It is time to get down to business and see that a good system is put into place. If we don't we are in effect only going to cure symptoms when what we need to do is wipe out the disease.

I believe that the compromise bill being considered today does just that.

Thank you.●

Mr. McCLURE. Madam President, I move the adoption of the substitute to the committee substitute.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Idaho.

The motion to agree to the substitute (UP No. 1414) was agreed to.

Mr. McCLURE. Madam President, I move the adoption of the substitute, as amended.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Idaho.

The motion was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

Mr. McCLURE. Madam President, I move to discharge the Energy Committee from further consideration of H.R. 5121, the House companion bill, and ask for its immediate consideration.

The PRESIDING OFFICER. The bill will be stated by title.

The bill clerk read as follows:

A bill (H.R. 5121) to improve the collection of Federal royalties and lease payments derived from certain natural resources under the jurisdiction of the Secretary of the Interior, and for other purposes.

There being no objection, the Senate proceeded to consider the bill.

Mr. McCLURE. I move to strike all after the enacting clause and substitute the text of S. 2305, as amended.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Idaho.

The motion was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill (H.R. 5121), as amended, was read the third time and passed.

Mr. McCLURE. Madam President, I move to reconsider the vote by which the bill was passed.

Mr. MELCHER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The title was amended so as to read as follows:

An Act to ensure that all oil and gas originating on the public lands and on the Outer Continental Shelf are properly accounted for under the direction of the Secretary of the Interior, and for other purposes.

Mr. McCLURE. Madam President, I thank the Chair and I thank the Senator from Montana for his constructive contribution in the discussion of this bill as well as here on the floor today. I thank all members of the staff again who worked so very hard to get us to this point.

Mr. MELCHER. Madam President, I likewise join in the thanks to the staff on both sides. I want to congratulate the chairman of the committee for the work he has done in pursuing this bill to final passage.

Mr. McCLURE. I thank the Senator from Montana.

It would not do at all to complete consideration of this bill without also thanking the Senator from Maine (Mr. COHEN), who is chairman of the Select Committee on Indian Affairs, and other members of that committee for the constructive help they have given us and the suggestions they made with respect to certain provisions of this legislation.

I think they have helped to improve the work product. Again I thank the Chair and I thank the majority leader for making it possible to consider this today.

Mr. BAKER. Madam President, I thank the Senator from Idaho and I thank the distinguished minority manager of this bill for making it possible for us to transact this piece of business in an efficient way.

CONGRATULATIONS TO HERSCHEL WALKER

Mr. MATTINGLY. Madam President, I would like to take this opportunity to congratulate Herschel Walker, who was recently awarded the Heisman Trophy, an award for the Nation's outstanding college football player.

This season, Herschel Walker gained 1,752 yards in 335 carries. He did this despite a broken thumb that hampered him in the season's first three games. Moreover, he accomplished this despite the fact that week after week, every Georgia opponent lined up defensively with one goal in mind—to stop Herschel Walker.

Herschel Walker, in three seasons at the University of Georgia, has gained 5,259 yards; 1,616 yards in 1980, 1,891 yards in 1981, and, as I earlier pointed out, 1,752 yards in 1982. He only lacks 823 yards from becoming the alltime leading college rusher, a title currently held by Tony Dorsett. During his stay at the University of Georgia, Herschel has lead the Bulldogs to a 32 and 2 record over the past three seasons. Georgia won its first national championship in 1980, Herschel's freshman year, and is currently ranked No. 1 in both major college polls.

Despite the fact that Herschel Walker has virtually rewritten the Southeastern Conference and National College Athletic Association football college record books, he remains an unselfish and humble individual, a team player. Those who know Herschel will attest to his humble attitude and his refusal to boast of his own successes. When presented the Heisman Trophy, Herschel gave credit to his teammates for his winning the award. He stated, "People have to make people. I have been surrounded by fine athletes and people who have helped me. Life is teams, and if it was not for them, I would not be here."

While the demands on college athletes are enormous, Herschel has nevertheless maintained an excellent academic record at the University of Georgia. He is a criminology major and has over a B average.

Again I congratulate Herschel Walker on winning the Heisman Trophy. I look forward to returning to Athens, Ga., next year and participating in what has become a favorite pastime for all Georgians—to watch Herschel Walker do his thing. Additionally, I look forward to next year when I can rise again to congratulate Herschel Walker for being the NCAA alltime rusher and the recipient of his second Heisman Trophy award.

Congratulations, Herschel.

NATIONAL COMMISSION ON SOCIAL SECURITY REFORM

Mr. HEINZ. Madam President, on Friday, the National Commission on Social Security Reform will meet for the last time to complete its consideration of recommendations on social security financing. Whether the final report provides Congress with a blueprint for solvency or merely supplies a list of available options depends upon the willingness of the President and the Speaker of the House of Representatives, Mr. O'NEILL, to get involved this week.

Though the Commission has made considerable progress toward a solution to social security's financing problems, it has had to stop short of proposing a specific package of solutions. The remaining decisions are a matter of simple arithmetic, admittedly, but they involve perilous politics.

Today I would like to remind my colleagues that the perils of making that decision, though great, do not compare to the perils of postponing it, which are greater.

In my view, what is urgently needed now, in the next few days, is a summit meeting between President Reagan, Speaker O'NEILL and other key Members of Congress to lead the way toward a bipartisan solution.

The National Commission, on which I have been privileged to serve these many months, has laid the groundwork for a pragmatic bipartisan agreement between the Congress and the White House. They have achieved consensus on the size of the short-term and the long-term problem and on the necessity of enacting legislation to resolve both. They have reaffirmed that the basic structure of the existing system is appropriate and they have ruled out solutions which would alter or dismantle this basic structure. They have agreed that social security coverage should be extended to new Federal and all nonprofit employees, and they have indicated that the remaining solution will require a combination of options affecting taxpayers and beneficiaries alike.

But the remaining solvency options, while clear, are impossible to select without bipartisan agreement. For the short term, what are our options? We can accelerate the scheduled payroll tax increases, restrain cost-of-living increases, or pump general revenues into the system. There really are no other options. But none of these options is, by itself, sufficient to meet the problem. It is evident, at least to this Senator, that a combination will be necessary for both financial and political reasons. Pragmatic compromise, not partisan rhetoric, must be the basis for a proper balance or mix of these options.

Compromise is essential, for neither party can gain satisfaction or profit from staring each other down as the July 1983 expiration date for the social security trust funds draws near. Continued inaction on social security will inevitably trigger an exercise in brinksmanship. A deadlock on the issue this winter will only bring on another bloody budget battle over social security's role in the overall budget deficit.

Madam President, as we think back to what happened last spring during the deliberations of the "Gang of Seventeen" and then of the Budget Committee, we should recognize from that history that this can only further endanger the congressional budget process and erode public confidence in the future of the social security system still more. Continuing this standoff until June will leave only the option of extending borrowing from the hospital insurance, or medicare, fund for another 8 months, an option that involves a terrible cost, the depletion of

that fund 6 years earlier than otherwise is projected.

We must all, in this body and in the other body, recognize that any reasonable agreement will extract concessions from all sides. Our elected leaders must signal their recognition of this fact as well, for failure to reach an immediate agreement not only risks serious political consequences, it also threatens the ability of social security to meet one of the basic tenets of any responsible proposal; that is, that no one now receiving benefits shall have their benefits reduced.

Everybody says we are certainly not going to cut benefits of existing beneficiaries. The President has said it, the Democrats have said it, the Republicans have said it. That pretty well covers the waterfront. But the fact is that delay for even another year will put so much financial pressure on the retirement fund that it would be absolutely impossible to have a rescue without cutting current benefits. If we act now, it is still possible to come up with the necessary revenues or other savings to honor that pledge. But if we wait until next year, we can never do what we need to do with sufficient time to have those actions go into effect and provide revenues and provide savings to the social security funds before they are depleted.

I am, therefore, Madam President, deeply concerned that many of my colleagues feel that an acceptable timetable for developing the necessary legislative solutions is somehow now magically going to emerge and lift the obligation from the National Commission's shoulders to arrive at conclusive recommendations for Congress prior to December 31. That sentiment is dangerous.

The leadership in the House have announced their intention to begin hearings in the Ways and Means Committee in February and to bring a bill to the floor in March. Some of my colleagues feel that if the Senate can wait until late March, we will then have a bill from the House to work with; then we shall be able to work our legislative will and, presumably, by June, have a legislative initiative that can move right along and go to the President for his signature.

Madam President, I do not want to be unduly pessimistic, but the normal legislative process on social security has not worked since 1977. It did not work last year, did not work the year before, and we have every reason to believe that histroy will repeat itself and the normal legislative process as regards social security will produce what it has produced in each of the last 6 years—namely, nothing. I do not say that it is what I hope for; I just say that that is what a careful reading of history suggests; so simply waiting for the House to act, with everybody else going about their business as they see fit, is at best, a long-odds gamble.

I am not convinced, frankly, that the House of Representatives is going to be any more able in the 98th Congress than it was in the 97th to report out of committee and pass a reasonable social security financing bill without, in advance, the blessings of the Speaker and the President. I think it would be, therefore, a mistake for the Senate to sit on its hands and let the clock run down on social security in the expectation that it will somehow all come together in the end.

Madam President, I think the National Commission on Social Security Reform is potentially the shield that is needed to get social security financing legislation moving. It is the ideal vehicle for working out a truly bipartisan agreement before December 31 of this year.

For all practical purposes, though, since the last scheduled meeting is this Friday, that means right now. Were we able to bring that kind of progress about this week, a strong consensus report from the Commission would enable all Members in the next Congress—new and old—to support a compromise financing package. Without this shield, many members of both parties will be obligated to oppose many of the financing options which must of necessity appear in any reasonable legislation. Without a bipartisan agreement in advance, I fear that the debate on social security, which we necessarily will have early next year, will once again become hopelessly partisan, and with that partisanship we will once again see a deadlock.

I think the Commission is within reach of finding a viable solution to the financing problems which have faced the Congress over these 2 years. With a sign from the President, the Speaker, and key congressional leadership, substantial recommendations could be sent to the Congress before Christmas, and the Congress could be well on its way to enacting the necessary legislation next spring.

But if we are left to our own devices to let the so-called normal legislative process work its will, we will run the risk of waiting and waiting and waiting on the House of Representatives to send us a bill that never materializes.

Let me take a moment to elaborate upon that risk, because it may not be self-evident to most of my colleagues.

A few moments ago I indicated that there were three basic options, none of them mutually exclusive, to finding the money for the social security system. One is raising taxes, another is finding savings in benefits, and the third is general revenues.

There is absolutely no possibility that this Congress or this President would enact a solution involving only increases in taxes to save the social security system.

There are some people who think that that might take place, but there are two proposals I have seen advanced. One of them is just simply accelerate most or all of the 1990 payroll tax increases to as soon as possible, which would be presumably January 1, 1984. Now I have met very few people who think that simply moving up the increases in payroll taxes on employees and employers would be something they would vote for.

From the employer point of view, there are a lot of statistics that suggest that is a good way to wipe out a lot of jobs; a consequence we could ill afford in the midst of this recession.

It is also to a lot of people politically unattractive to increase the employee portion of payroll taxes because that comes out of the paycheck, and that is not only noticeable, it is rather questionable economics at a time when you would like people to be spending more money to revive the economy. So I frankly do not see very many votes, not just in this body but in the other body, to impose substantial additional employee social security payroll taxes.

That leads me to the second proposal—to offset those payroll tax contributions in whole or in part with a tax credit. Now, that has some wonderful superficial appeal because that does not increase the taxes on any of the taxpayers. What it really does is to transfer via the tax credit the cost of those tax increases to the general fund, increasing the deficit there beyond the $175 billion or $185 billion already anticipated.

Maybe some Members might vote for the payroll tax or the tax credit solution if it were part of a balanced and fair package. But if we were to try and solve this problem all with general revenues, I do not think you could even get a majority of the Democratic Party in the House to support that. There are an awful lot of people in both parties who recognize that trying to finance the social security system out of general revenues, in spite of the fact that it seems to be without much political pain, goes against all those votes they have been having on balancing the budget, on being fiscally responsible, and on trying to get this country out from under these big deficits.

I really do not believe, Madam President, that there is a majority in either party in the House to come up with either of those two financing options.

So what does that leave you with? That leaves putting it all on benefits. If you were to get all the savings that you seek from benefits, the $150 billion to $200 billion between now and the end of 1989, you would have to reduce current benefit levels. Nobody is willing to do that. If you looked to the benefit side for only a portion of

the savings, you would not have to actually cut benefits.

It is apparent to me that it is just not going to be all that easy for Congressman ROSTENKOWSKI, the chairman of the Ways and Means Committee, and his committee to find a solution in the House that is going to meet with a sufficient amount of approval to get it out of committee and, if it can be gotten out of committee, to pass muster on the floor. I think any objective analysis of the problem shows that it is not only such a big problem but such a politically perilous problem to deal with that, absent some genuine leadership at the very top, we cannot expect the congressional process to produce what we would like to see it produce.

So that nobody misunderstands my sentiments, I do not happen to believe that Congress cannot deal with big issues. I believe we can. I believe we have. But this issue is not a big bipartisan or nonpartisan issue. It is the most partisan issue I have seen in the 11 years that I have served in Congress.

Madam President, I want to take this opportunity to urge the President, the Speaker, the other key leaders of Congress, and my colleagues to join in this sentiment and agree to move, this week, to negotiate, to get a solution, and to stop postponing dealing with something that we must deal with effectively if we are to avert a continued standoff in social security in the next Congress and avert disaster either for our country or the 35 million beneficiaries who depend on social security.

ROUTINE MORNING BUSINESS

(During the day, routine morning business was transacted and additional statements were submitted, as follows:)

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

DEFERRALS OF CERTAIN BUDGET AUTHORITY—MESSAGE FROM THE PRESIDENT—PM 199

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with accompanying papers; which, pursuant to the order of January 30, 1975, was referred jointly to the Committee on Appropriations, the Committee on the Budget, the Committee on Foreign Relations, the Committee on Armed Services, the Committee on Energy and Natural Resoures, the Committee on Finance, the Committee on Commerce, Science, and Transportation, and the Committee on Veterans' Affairs:

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report 5 new deferrals of fiscal year 1983 funds totaling $624,650,000.

The deferrals are for programs in International Security Assistance and the Department of Housing and Urban Development.

The details of each deferral are contained in the attached reports.

RONALD REAGAN.

THE WHITE HOUSE, *December 6, 1982.*

MESSAGE FROM THE HOUSE

At 4:22 p.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its reading clerks, announced that the House recedes from its disagreement to the amendment of the Senate to the bill (H.R. 2330) to authorize appropriations to the Nuclear Regulatory Commission in accordance with section 261 of the Atomic Energy Act of 1954, as amended, and section 305 of the Energy Reorganization Act of 1974, as amended, and for other purposes; and agrees thereto, with an amendment, in which it requests the concurrence of the Senate.

The message also announced that the house has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 3809. An act to provide for the development of repositories for the disposal of high-level radioactive waste and spent nuclear fuel, to establish a program of research, development, and demonstration regarding the disposal of high-level radioactive waste and spent nuclear fuel, and for other purposes;

H.R. 6329. An act to authorize appropriations for the Department of Energy for national security programs for fiscal year 1983, and for other purposes;

H.R. 6395. An act to amend the Federal Trade Commission Act to extend the authorization of appropriations contained in such Act, and for other purposes;

H.R. 7205. An act making appropriations for the Departments of Labor, Health and Human Services, and Education, and related agencies for the fiscal year ending September 30, 1983, and for other purposes; and

H.R. 7356. An act making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1983, and for other purposes.

At 6:32 p.m., a message from the House of Representatives, delivered by Mr. Gregory, announced that the House disagrees to the amendments of the Senate to the bill (H.R. 7019) making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1983, and for other purposes; agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon; and appoints Mr. LEHMAN, Mr. SABO, Mr. AUCOIN, Mr. GRAY, Mr. RATCHFORD, Mr. WHITTEN, Mr. COUGHLIN, Mr. CONTE, Mr. EDWARDS of Alabama, and Mr. PURSELL as managers of the conference on the part of the House.

HOUSE BILLS REFERRED

The following bills were read the first and second times by unanimous consent, and referred as indicated:

H.R. 7205. An act making appropriations for the Departments of Labor, Health and Human Services, and Education, and related agencies for the fiscal year ending September 30, 1983, and for other purposes; to the Committee on Appropriations.

H.R. 7356. An act making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1983, and for other purposes; to the Committee on Appropriations.

HOUSE MEASURES PLACED ON THE CALENDAR

The following bills were read the first and second times and placed on the calendar:

H.R. 3809. An act to provide for the development of repositories for the disposal of high-level radioactive waste and spent nuclear fuel, to estabish a program of research, development, and demonstration regarding the disposal of high-level radioactive waste and spent nuclear fuel, and for other purposes;

H.R. 6329. An act to authorize appropriations for the Department of Energy for national security programs for fiscal year 1983, and for other purposes; and

H.R. 6995. An act to amend the Federal Trade Commission Act to extent the authorization of appropriations contained in such Act, and for other purposes;

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. HATFIELD, from the Committee on Appropriations, without amendment:

S. 3079. An original bill making appropriations for energy and water development for the fiscal year ending September 30, 1983, and for other purposes (Rept. No. 97-673).

FOREIGN CURRENCY REPORTS

In accordance with the appropriate provisions of law, the Secretary of the

Senate herewith submits the following report(s) of standing committees of the Senate, certain joint committees of the Congress, delegations and groups, and select and special committees of the Senate, relating to expenses incurred in the performance of authorized foreign travel:

CONSOLIDATED REPORT OF EXPENDITURE OF FOREIGN CURRENCIES AND APPROPRIATED FUNDS FOR FOREIGN TRAVEL BY MEMBERS AND EMPLOYEES OF THE U.S. SENATE, UNDER AUTHORITY OF SEC. 22, P.L. 95–384—22 U.S.C. 1754(b), COMMITTEE ON APPROPRIATIONS, EXPENDED BETWEEN JULY 1 AND SEPT. 30, 1982

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-4559. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Federal Involvement In The Mount St. Helens Disaster: Past Expenditures and Future Needs"; to the Committee on Appropriations.

EC-4560. A communication from the Principal Deputy Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting, pursuant to law, a report on the conversion of the messenger service, at the Norfolk Naval Shipyard, Portsmouth, Va., to contractor performance; to the Committee on Armed Services.

EC-4561. A communication from the Principal Deputy Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting, pursuant to law, a report on the conversion of the material turned into store function at the Naval Supply Center, Norfolk, Va., to contractor performance; to the Committee on Armed Services.

EC-4562. A communication from the Principal Deputy Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting, pursuant to law, a report on the conversion of the cold storage function at the Cheatham Annex, Naval Supply Center, Norfolk, Va., to performance by contract; to the Committee on Armed Services.

EC-4563. A communication from the Principal Deputy Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting, pursuant to law, a report on the conversion of the motor vehicle operations and maintenance function at the Naval Training Center, Orlando, Fla., to performance by contract; to the Committee on Armed Services.

EC-4564. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Problems Hamper Foreign Commercial Service's Program"; to the Committee on Banking, Housing, and Urban Affairs.

EC-4565. A communication from the Secretary of the Interstate Commerce Commission, transmitting, pursuant to law, some corrected pages to a previously submitted executive summary of the Commission; to the Committee on Commerce, Science, and Transportation.

EC-4566. A communication from the Chairman of the Federal Trade Commission, transmitting, pursuant to law, a report of the Commission on the Residential Energy Conservation Service; to the Committee on Commerce, Science, and Transportation.

EC-4567. A communication from the Assistant Attorney General (Land and Natural Resources Divisions), transmitting, pursuant to law, a report on the victim compensation program; to the Committee on Environment and Public Works.

EC-4568. A communication from the Secretary of the Interior and the Secretary of Commerce, jointly transmitting, pursuant to law, the second report on the activities of their various Departments with respect to the emergency stripped bass research study; to the Committee on Environment and Public Works.

EC-4569. A communication from the Assistant Secretary of the Army (Civil Works), transmitting a draft of proposed legislation to modify the authority of the Richard B. Russell Dam and Lake project, and for other purposes; to the Committee on Environment and Public Works.

EC-4570. A communication from the Deputy Secretary of the Treasury, transmitting a draft of proposed legislation to amend sections 5315 and 5316 of title 5 United State Code, to change the position of Chief Counsel for the Internal Revenue Service, Department of the Treasury, from Level V to Level IV of the Executive Schedule; to the Committee on Finance.

EC-4571. A communication from the Deputy Secretary of the Treasury, transmitting, a draft of proposed legislation to authorize the Secretary of the Treasury to accept gifts and bequests for the purposes of the Department of the Treasury, and for

other purposes; to the Committee on Finance.

EC-4572. A communication from the Chairman of the Board for International Broadcasting, transmitting a draft of proposed legislation to amend the Board for International Broadcasting Act of 1973 to authorize an amended appropriation for fiscal year 1983; to the Committee on Foreign Relations.

EC-4573. A communication from the Acting Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting, pursuant to law, copies of international agreements, other than treaties, entered into by the United States within the previous 60 days; to the Committee on Foreign Relations.

EC-4574. A communication from the Secretary of State transmitting, pursuant to law, a report on payments made during the previous month to individuals and corporations in satisfaction of assurance agreements or payment of loan guarantees to the Polish People's Republic; to the Committee on Foreign Relations.

EC-4575. A communication from the Acting Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting, pursuant to law, copies of the international agreements, other than treaties, entered into by the United States within the previous 60 days; to the Committee on Foreign Relations.

EC-4576. A communication from the Secretary of the Department of Agriculture transmitting, pursuant to law, the semiannual report of the Inspector General for April 1 to September 30, 1982; to the Committee on Governmental Affairs.

EC-4577. A communication from the Secretary of Labor transmitting, pursuant to law, the semiannual report of the Inspector General for the period April 1 through September 30, 1982; to the Committee on Governmental Affairs.

EC-4578. A communication from the Secretary of Education transmitting, pursuant to law, the semiannual report of the Inspector General for the period April 1 through September 30, 1982; to the Committee on Governmental Affairs.

EC-4579. A communication from the Deputy Assistant Secretary of Defense for Administration transmitting, pursuant to law, a report on a new Privacy Act system of records; to the Committee on Governmental Affairs.

EC-45780. A communication from the Comptroller General of the United States transmitting an errata page for his report of September 1, 1982, entitled "Progress in Improving Program and Budget Information for Congressional Use"; to the Committee on Governmental Affairs.

EC-4581. A communication from the District of Columbia Auditor transmitting, pursuant to law, an audit report entitled "Lease of Public Space Under DuPont Circle"; to the Committee on Governmental Affairs.

EC-4582. A communication from the Secretary of Health and Human Services transmitting, pursuant to law, a report relative to certain foreign medical graduates in the United States; to the Committee on the Judiciary.

EC-4583. A communication from the Assistant Secretary of Education for Educational Research and Improvement transmitting, pursuant to law, a report relative to certain studies and a final report to be transmitted to Congress on December 31, 1982; to the Committee on Labor and Human Resources.

EC-4584. A communication from the Acting Assistant Secretary of Defense for Manpower, Reserve Affairs, and Logistics transmitting, pursuant to law, the audit of the American Red Cross for the year ended June 30, 1982; to the Committee on Labor and Human Resources.

EC-4585. A communication from the Architect of the Capitol, transmitting, pursuant to law, a report of all expenditures during the period April 1, 1982 through September 30, 1982, from moneys appropriated to the Architect of the Capitol; ordered to be printed and to lie on the table.

EC-4586. A communication from the Secretary of Defense transmitting, pursuant to law, a report on six violations of law involving overobligation of appropriated funds; to the Committee on Appropriations.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-1227. A joint resolution adopted by the Legislature of the State of California; to the Committee Agriculture, Nutrition, and Forestry:

"ASSEMBLY JOINT RESOLUTION No. 128

"Whereas the Western Regional Research Center of the Science and Education Administration, an agency of the United States Department of Agriculture, located at Albany, California, has operated at that location since 1948; and

"Whereas, the center has made substantial contributions to the wool and mohair industry through its research, educational, and consultative activities; and

"Whereas, the wool industry is a major agricultural activity of the 17 western states where 80 percent of domestic wool is produced; and

"Whereas, the center's research activities have led to significant improvements in the production, processing, and marketing of these natural fibers, and to the development of well over 100 public service patents related to all phases of the wool industry and the textile industry in general; and

"Whereas, these research activities have resulted in improved textile qualities that have been utilized in such products as protective socks for amputees using artificial limbs and that have reduced energy and chemical needs for textile production and consumer maintenance, including low-temperature machine washability, greater acceptability of wool qualities by processes which reduce shrinkability, and in international recognition of the center's capability in both basic and applied research; and

"Whereas the center's scientific, technical, and support staffs located in the Albany area provide a substantial economic benefit to a generally low-income community; and

"Whereas the United States Department of Agriculture is presently planning to close the center at its current location; now therefore, be it

Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President and Congress of the United States to maintain the effective wool and mohair research conducted by the Western Regional Research Center of the Science and Education Administration at the center's present location in Albany, California, until a more appropriate location in nothern California is selected; and be it further

Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-1228. A joint resolution adopted by the Legislature of the State of California; to the Committee on Energy and Natural Resources:

"ASSEMBLY JOINT RESOLUTION No. 80

"Whereas, the California coastal management program is essential for the wise management of the coastal resources of this state, including fisheries, beaches, wetlands, and wildlife; and

"Whereas, there is a national interest in the continuation of ocean and coastal resources management programs such as the Coastal Zone Management Program, the Coastal Energy Impact Program, the Sea Grant Program, and the Living Marine Resources Program; and

"Whereas, State coastal management programs provide the primary vehicle for the wise management and protection of our valuable coastal and marine resources and for state participation in the Outer Continental Shelf leasing programs; and

"Whereas, coastal states have a legitimate role in the Outer Continental Shelf activities and other coastal energy programs and must be prepared to fully participate in the leasing process and in the siting of energy facilities; and

"Whereas, the Department of the Interior intends to accelerate the leasing of tracts in the Outer Continental Shelf for the exploration of oil and gas; and

"Whereas, Revenues from a nonrenewable offshore natural resource which belongs to the people of the United States should be reinvested in ocean and coastal programs which provide management for renewable coastal resources; and

"Whereas, Federal financial support for state coastal zone management and related marine programs is being withdrawn and an inequity exists because inland states receive royalties from mineral leases on federal lands, and coastal states affected by the federal Outer Continental Shelf oil and gas leasing and development now receive no direct compensation; and

"Whereas, the total federal revenues from the development of oil and gas on California's Outer Continental Shelf amounted to $2.38 billion in federal Fiscal Year 1981; now, therefore, be it

Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President and Congress of the United States to support the establishment of an ocean and coastal resources management and development fund, supported by Outer Continental Shelf oil and gas revenues, and to provide that the money from the fund be distributed to coastal and Great Lake states and territories in block grants for coastal management, research, energy impact planning and mitigation, and fisheries management programs; and be it further

Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and

Representative from California in the Congress of the United States."

POM-1229. A joint resolution adopted by the Legislature of the State of California; to the Committee on Energy and Natural Resources:

"ASSEMBLY JOINT RESOLUTION No. 117

"Whereas, the United States Department of the Interior has decided to lease certain areas of the Outer Continental Shelf off the southern California coast on June 11, 1982; and

"Whereas, the areas covered by the lawsuit filed by the State of California are the 12 tracts adjacent to Santa Monica Bay, the precautionary area off of the Ports of Los Angeles and Long Beach, and nine tracts within the three and one-half nautical mile buffer zone offshore of Orange County; and

"Whereas, the exploration, development, and production of oil in these areas would threaten ecological preserves and other ecologically sensitive areas; increase the risk of oil spills; increase onshore air pollution; increase hazards to vessel traffic safety; and seriously threaten the economy and quality of life of southern California coastal communities; and

"Whereas, the proposed leases are in direct conflict with the provision of the federal Coastal Zone Management Act of 1972, which required federal action directly affecting the state to be conducted in a manner consistent with the state's approved coastal management program; and

"Whereas the Secretary of the Interior violated the provisions of the Outer Continental Shelf Lands Act amendments by offering the above-described tracts for lease sale in spite of reasonable recommendations by the Governor of California that the tracts be deleted from the lease sale; and

"Whereas, there is no likelihood of obtaining oil from these areas in amounts which would meaningfully assist America's national energy supply needs in comparison to the potential economic and ecological damage which could result; and

"Whereas, the State of California has brought an action in federal court seeking declaratory and injunctive relief in order to stop the proposed lease sale in these areas; now, therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California strongly supports the actions taken by the state to prevent the June 11, 1982, proposed lease sale of the above-described tracts by the United States Department of the Interior; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and the Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM—1230. A joint resolution adopted by the Legislature of the State of California; to the Committee on Environment and Public Works:

"ASSEMBLY JOINT RESOLUTION No. 120

"Whereas, Louisiana-Pacific Corporation and Crown Simpson Pulp Company, owners and operators of two nearly identical pulp mills located on the Samoa peninsula near Eureka, California, applied for and received from the State Water Resources Control Board in 1977 variances from federal ocean discharge limitations on biochemical oxygen demand (BOD) and alkalinity or acidity (pH); and

"Whereas, Municipalities are already eligible for exemption from those requirements under the Clean Water Act of 1977; and

"Whereas, The Environmental Protection Agency has refused to approve the variances granted to the two pulp mills by the State Water Resources Control Board; and

"Whereas, The State Water Resources Control Board has concluded that compliance with the federal requirements will result in negligible benefits to the ocean environment; and

"Whereas, the effluents currently being discharged with primary treatment are nontoxic and have never been shown to cause significant degradation of the ocean environment; and

"Whereas, compliance with the federal requirements will require construction of secondary treatment facilities at each mill, with the cost to each company estimated at ten million dollars ($10,000,000) to fifteen million dollars ($15,000,000) in capital costs, and one million dollars ($1,000,000) to two million dollars ($2,000,000) is annual operation and maintenance costs; and

"Whereas, Operation of the secondary treatment systems will have a net negative impact on energy, air pollution, visibility, sludge disposal, and chemical usage without any measurable improvement in receiving water quality; and

"Whereas, Construction and operation of the required secondary treatment plants will add substantially to the two mills' costs of production, with no corresponding benefits to the environment; and

"Whereas, Both mills have already been forced to curtail production periodically and lay off employees because of relatively high production costs and the companies' inability to compete in a weakened pulp market; and

"Whereas, Compliance with the federal requirements will reduce still further the two companies' ability to compete successfully on the world pulp market and provide continued employment for the mills' workers; and

"Whereas, Unemployment in Humboldt County is currently more than 17 percent, and further layoffs would exacerbate the county's depressed economic position, now therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California requests the Environmental Protection Agency to reopen it proceedings in this case and approve the variances granted the two pulp mills by the State Water Resources Control Board; and be it further

"Resolved, That if it is not feasible to reopen the proceedings, the Legislature of the State of California respectfully memorializes the President and the Congress of the United States to amend the Clean Water Act of 1977, after careful evaluation of the potential water quality impacts of such action, to provide appropriate relief and to incorporate in the legislation the following provisions:

(a) All existing conditions and requirements of Section 301(h) of the Clean Water Act of 1977 applying to municipal dischargers shall be applicable to industrial dischargers.

(b) In order to demonstrate eligibility for a waiver, the applicant shall demonstrate there is no reasonable relationship between the economic and social costs and the benefits to be obtained, including the objectives of the Clean Water Act of 1977.

(c) The effluent limitations established under any such waiver shall be at such a level necessary to implement the applicable state water quality standards, sufficient to assure the protection and propagation of shellfish, fish, fauna, wildlife, and other aquatic organisms. In setting such standards, the administrator shall take into account any seasonal variations, an adequate margin of safety, and any lack of knowledge concerning the relationship between effluent limitations and water quality and any lack of knowledge of the effects of the discharge on receiving water beneficial uses.

"(d) Any such waiver shall not exceed a period of time greater than five years, with provisions for renewal upon application by the discharger.

"(e) A decline in ambient water quality during the course of the permit may constitute grounds for the termination of the waiver even if a direct cause and effect relationship cannot be shown.

"(f) Any waiver of effluent standards will be limited to the standards for biochemical oxygen demand (BOD) and acidity or alkalinity (pH).

"(g) No such waiver shall be allowed in estuarine areas or designated areas of special biological significance.

"(h) A state properly certified to administer NPDES permits shall have the right to have the Environmental Protection Agency be the responsible agency for hearing variances or an individual variance without otherwise endangering any other portion of a certified state's program. The state may, however, choose to hear all such variances.

"(i) The review process shall consider overall economic factors to ensure that the applicant is not granted an undue competitive advantage over other producers in that industry as a result of the modification in discharge limitations; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Administrator of the Environmental Protection Agency, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-1231. A joint resolution adopted by the Legislature of the State of California; to the Committee on Finance:

"ASSEMBLY JOINT RESOLUTION No. 76

"Whereas, The crimes of parricide and other forms of familial homicide are regarded as particularly heinous forms of murder; and

"Whereas, Under existing federal law cases have recently occurred in California in which the perpetrators of these crimes, who are dependents of the victims, have been held eligible for the payment of Social Security survivor's benefits available because of the deaths resulting from the commission of the crimes; and

"Whereas, The people of this state and other states are unjustly burdened by the payment of these benefits resulting directly from such crimes; now, therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President and the Congress of the United States to review and remedy by reform legislation the federal rules and regulations pertaining to Social Security survivor's benefits so that persons found sane and committed or sentenced to

incarceration for the murder of a parent, spouse, or other family member will not benefit from federal funds paid as a result of the death of the murder victim; and be it further

"Resolved, That the Legislature urges the President and Congress of the United States to act swiftly to enact legislation remedying this injustice whereby a murderer may benefit from the government of the United States for his heinous act; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-1232. A joint resolution adopted by the Legislature of the State of California; to the Committee on Finance:

"ASSEMBLY JOINT RESOLUTION No. 127

"Whereas, The needs of the terminally ill, the bereaved, and their families in California and the nation have not been adequately met by the health care delivery system; and

"Whereas, The hospice concept of care for the terminally ill, the bereaved, and their families first received worldwide acclaim because of the efforts of Dr. Cicely Saunders to deliver hospice care in England; and

"Whereas, In the United States, the needs of the terminally ill of all ages was first brought to the attention of the health professions and the general public by Dr. Elisabeth Kubler-Ross; and

"Whereas, Through the efforts of many volunteers and health professionals, the hospice program of care has become an accepted part of the health care delivery system; and

"Whereas, The hospice program of care has received the official endorsement of numerous national organizations including the American Medical Association and the AFL-CIO; and

"Whereas, Numerous national corporations including General Electric, Westinghouse, Warner-Lambert Foundation, RCA, and the National Cancer Institute, have provided the hospice benefit to its employees, dependents, and, in some cases, its retirees; and

"Whereas, A large number of terminally ill patients and their families qualify for financial assistance under Medicare coverage; and

"Whereas, Hospices in California have provided national leadership in education, training, and program development, and in the setting of standards for the quality of care; and

"Whereas, Legislation currently before the Congress of the United States, House Bill 5180 (Panetta, D-CA) and Senate Bill 1958 (Dole, R-KS), proposes the modification of Medicare benefits to provide assistance for terminally ill citizens seeking the comfort and services of hospice care, and these proposed revisions in federal law are in the best interest of California residents; now, therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President and the Congress of the United States to enact the provisions of House Bill 5180 (Panetta, D-CA) and Senate Bill 1958 (Dole, R-KS) to extend Medicare coverage to hospice services for terminally ill persons in the United States; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, to the Chairman of the Senate Finance Committee, to the Chairman of the House Committee on Ways and Means, and to each Senator and Representative from California in the Congress of the United States."

POM-1233. A joint resolution adopted by the Legislature of the State of California; to the Committee on Finance:

ASSEMBLY JOINT RESOLUTION No. 129

"Whereas, Ontario Airport, a part of the Los Angeles International Airport complex, has become the transportation hub of the Inland Empire region of southern California and the focal point for major airline traffic; and

"Whereas, In addition to its own traffic, Ontario Airport has become the major traffic overflow facility for Los Angeles International Airport, thus handling traffic originating from all over the world; and

"Whereas, Airline traffic at Ontario Airport has increased every year since being designated as part of the LAX complex and has been the point of arrival for many international travelers to southern California; and

"Whereas, It is time that Ontario airport be fully recognized for its international importance and strategic position in the southern California international transportation network; now, therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of California respectfully memorializes the President and Congress of the United States to direct the Civil Aeronautics Board to take the necessary action to designate Ontario Airport as an international airport, including United States customs clearance as part of its services and facilities as a port of entry to the United States; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit a copy of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, to each Senator and Representative from California in the Congress of the United States, and to the Civil Aeronautics Board."

POM-1234. A joint resolution adopted by the Legislature of the State of California; to the Committee on Finance:

"ASSEMBLY JOINT RESOLUTION No. 116

"Whereas, We live in an increasingly computerized society; and

"Whereas, Education must keep pace with technological developments; and

"Whereas, Our schoolchildren are not receiving adequate training in the use and application of computers and other sophisticated equipment; and

"Whereas, It has been said that nothing more effectively contributes to the cultivation of a country than the education of the youth; and

"Whereas, Legislation exists in the House of Representatives of the Congress of the United States to allow greater tax credits and deductions for corporations which make charitable contributions of computers or other sophisticated technological equipment to schools; now, therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes each Senator and Representative from California in the Congress of the United States to support efforts to encourage corporations to make charitable contributions of computers or other sophisticated technological equipment to schools by allowing the corporations to claim greater tax credits and deductions for these contributions; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-1235. A joint resolution adopted by the Legislature of the State of California; to the Committee on Foreign Relations.

"ASSEMBLY JOINT RESOLUTION No. 93

"Whereas, Mexico has established an offshore extended economic zone for the regulation of commercial fishing; and

"Whereas, In the past Mexico issued permits to American commercial fishermen to take fisheries products within the offshore economic zone, but will no longer issue these permits; and

"Whereas, Past activities of the Mexican government to discourage the taking of fisheries products within the zone by American commercial fishermen included heavy fines and the confiscation of fish and nets; and

"Whereas, In response to these activities the United States has embargoed all tuna and tuna products from Mexico; and

"Whereas, Negotiations between Mexico and the United States on the issue of commercial fishing within the zone are currently at a standstill with neither side gaining anything positive as a result thereof; now, therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California respectively memorializes the President, the Congress of the United States, and the United States Secretary of State to reopen negotiations with Mexico on the issue of commercial fishing within the zone and to negotiate in total good faith avoiding approaches which could lead to the animosities that existed in the past; and be it further

"Resolved, That the Legislature of the State of California firmly believes that two countries with similar economic interests and a common border should be able to coexist in harmony and negotiate in good faith, and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, to each Senator and Representative from California in the Congress of the United States, and to the United States Secretary of State"

POM-1236. A joint resolution adopted by the Legislature of the State of California; to the Committee on Labor and Human Resources.

"ASSEMBLY JOINT RESOLUTION No. 119

"Whereas, A foreign company, "HEEREMA," has set an oil platform and is using foreign labor from Holland and Spain on the Outer Continental Shelf of California; and

"Whereas, We have many Americans in the State of California unemployed; now, therefore, be it

"Resolved, by the Assembly and Senate of the State of California, jointly, That the Legislature respectfully memorializes the President and the Congress of the United States to take such action as is necessary to ensure the use of American labor on the Outer Continental Shelf, with all applicable affirmative action guidelines; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-1237. A joint resolution adopted by the Legislature of the State of California; to the Committee on Labor and Human Resources.

ASSEMBLY JOINT RESOLUTION No. 107

"Whereas, Under the federal Employee Retirement Income Security Act of 1974 (ERISA), multiple-employer trusts are minimally regulated while state regulation, except that relating to insurance, is preempted; and

"Whereas, Multiple-employer trusts offer to provide health benefit plans and the benefits of comprehensive group health and other insurance to the vast and particularly vulnerable market group composed of small businesses and small employers at reduced costs and operate in the junctures of federal and state jurisdictions; and

"Whereas, Highly questionable business practices have occurred among the multiple-employer trusts, including the taking of immense fees, failures to provide comprehensive insurance benefits at reasonable costs, preparing brochures referring to health care providers without notice to or approval by those health care providers, failure to establish sound reserves, including a possible maximum unfunded group health insurance liability in California alone of $50,000,000, and business failures resulting in bankruptcy with policyholders being transferred to newly formed multiple-employer trusts; now, therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That the current federal statutes regulating the multiple-employer trust industry are ineffective and that the California Insurance Commissioner and the California Department of Corporations are well-equipped to regulate that industry; and be it further

"Resolved, That the Legislature of the State of California respectfully memorializes the President and Congress of the United States to enact legislation permitting the states to regulate all multiple-employer trusts which do not meet the ERISA definition of "employee benefit plan;" and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-1238. A joint resolution adopted by the Legislature of the State of California; to the Committee on Labor and Human Resources.

"ASSEMBLY JOINT RESOLUTION No. 89

"Whereas, A strong national economy and defense relies upon a well-trained pool of human resources; and

"Whereas, It is within the national interest to assist all citizens in their efforts to avoid prolonged dependence on federal assistance programs; and

"Whereas, Postsecondary educational opportunities have proven beneficial in aiding citizens in obtaining long-term, unsubsidized employment; and

"Whereas, The attainment of this employment contributes to the national economy and enables these individuals to repay the national investment in each person so employed; and

"Whereas, The State of California has demonstrated its longstanding commitment to maintaining accessibility to quality postsecondary education; and

"Whereas, The approval of recent and ongoing efforts to cut student financial aid programs will operate to reduce current funding for federal financial aid assistance to students in California by approximately $132.6 million and will result in the loss of over 198,000 student financial aid awards in the fiscal year 1982-1983; and

"Whereas, Federal outreach programs such as Special Programs for Disadvantaged Students (TRIO) and student financial assistance programs such as the State Student Incentive Grants, Pell Grants, Supplemental Education Opportunity Grants, Work-Study, and Guaranteed Student Loans have expanded the opportunities for postsecondary education; and

"Whereas, Federally proposed reductions in these programs will eliminate the opportunities which are available to a significant number of this nation's citizens to successfully enter into and complete a program of postsecondary education; now, therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes each Senator and Representative from California in the Congress of the United States to work for the support of a federal appropriation level equivalent to that appropriated for the 1981 fiscal year for the support of these federally assisted student financial aid programs, and for the enactment of federal legislation to accelerate loan collection efforts on delinquent student loans so as to establish a revolving student loan funding mechanism; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and the Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-1239. A joint resolution adopted by the Legislature of the State of California; to the Committee on Labor and Human Resources.

"ASSEMBLY JOINT RESOLUTION No. 111

"Whereas, Elderly persons are an important natural resource which can be utilized to improve the general welfare of our nation; and

"Whereas, Unemployment among persons 55 years of age and older is skyrocketing; and

"Whereas, Many elderly persons find that it is absolutely necessary to supplement their meager incomes through the social security system or other pension systems, by engaging in employment; and

"Whereas, The difficult task of finding employment is complicated for elderly persons due to age discrimination, as well as the fact that many elders have been out of the work force for a number of years; and

"Whereas, Tremendous strides in employment of elderly persons have been made through the federally funded Community Service Employment for Older Americans programs, provided for pursuant to Title V of the Older Americans Act, as amended; and

"Whereas, This program has been extremely effective in promoting useful part-time opportunities in community service activities for unemployed low-income workers, as well as placement into unsubsidized employment; and

"Whereas, In December of 1981, subsequent to Congressional action, President Reagan signed into law a three-year extension for this program; and

"Whereas, Recommendations have been made to eliminate this program through federal budget action; and

"Whereas, The demise of this program would add to the difficulties which currently exist in securing employment for the elderly; now, therefore be it

"Resolved by the Assembly and the Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President and Congress of the United States to refrain from taking any action which could lead to the elimination or dismantling of the Community Service Employment for Older Americans program, and to extend full funding to the program, as budgeted in fiscal year 1981-82; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representatives from California in the Congress of the United States."

POM-1240. A joint resolution adopted by the Legislature of the State of California; to the Committee on Labor and Human Resources.

"ASSEMBLY JOINT RESOLUTION No. 69

"Whereas, The Federal Library Services and Construction Act (20 U.S.C. Sec. 351 et seq.) since its passage has provided valuable support to the extension and improvement of public library services in California and throughout the nation; and

"Whereas, Under the Library Services and Construction Act, $6,500,000 has been provided annually to the State of California to be distributed within the state by the State Librarian for library services to low-income physically handicapped, and elderly persons, to the limited- and non-English speaking, and for the general improvement of the quality of library services and interlibrary cooperation in the state; and

"Whereas, Many California public libraries and their underserved and limited- or non-English-speaking patrons have benefited and continue to benefit from the improved library services and access to free public library resources made possible by funds awarded by the State Librarian from the LSCA; and

"Whereas, Funding for California's public libraries has been cut back as a result of the budgetary reductions following the passage of Proposition 13; and

"Whereas, A 25 percent reduction in LSCA funding, which was $62,500,000 in 1981, has been proposed for the fiscal year 1982; and

"Whereas, This reduction in funding would have an extremely detrimental effect upon the ability of California public libraries to continue to provide to their users even the present level of services, which has already been cut back to the basic level, and would limit the ability of the information-poor, particularly the Hispanic, blind, and disabled, to have equal access to the information resources enjoyed by California citizens; and

"Whereas, Many current library services which assist the underserved and disadvantaged, including the California Spanish Language Data Base, reference networks, and the school-public library cooperation program, receive full or partial funding from LSCA; now, therefore, be it

"Resolved by the Assembly and Senate of the State of California jointly, That the Legislature of the State of California commends the State Librarian and the library community for their continued support of free access to library information services and resources for the disadvantaged, the limited- and non-English speaking, the blind, and the disabled; and be it further

"Resolved, That the Legislature of the State of California respectfully memorializes the President and the Congress of the United States to maintain at $62,500,000 the amount of funding given to the Library Services and Construction Act in 1982 and to provide adequate funding in subsequent years in order to provide vital federal funds to the State of California for library services to the disadvantaged; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-1241. A joint resolution adopted by the Legislature of the State of California; to the Committee on Veterans' Affairs.

ASSEMBLY JOINT RESOLUTION 72

"Whereas, As a result of an amendment to the Omnibus Budget Reconciliation Act of 1981 (P.L. 97-35) sponsored by the Reagan Administration, veterans of the United States armed forces separated after July 31, 1981, are no longer able to avail themselves of unemployment benefits except in rare circumstances; and

"Whereas, This loss of benefits to veterans constitutes a severe disincentive to those contemplating enlistment in the United States military, and thus will make recruitment of qualified individuals to serve in the armed forces much more difficult; and

"Whereas, This loss of benefits amounts to real economic injustice against active duty servicemen and women who, in many cases, must already rely on food stamps and other forms of public assistance to make ends meet; and

"Whereas, It has been shown that less than 20 percent of veterans are able to secure employment upon their release from active duty or discharge in which they can use skills learned while in the military; and

"Whereas, These newly enacted restrictions stand in stark contrast to the 52 weeks of unemployment benefits afforded to veterans after World War II; now, therefore, be it

"Resolved by the Assembly and the Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President and Congress of the United States to support and enact necessary changes to the Omnibus Budget Reconciliation Act of 1981 (P.L. 97-35) so that ex-military persons who served their country honorably are not deprived of their rightful benefits in assisting them in their transition from military to civilian life; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-1242. A joint resolution adopted by the Legislature of the State of California; to the Committee on Veterans' Affairs.

"ASSEMBLY JOINT RESOLUTION No. 71

"Whereas, A burial allowance of $300 has been a time-honored benefit available from the federal government for service in the United States Armed Forces; and

"Whereas, The Reagan Administration, with the approval of Congress, has eliminated this benefit for all veterans except those with a compensable service-connected disability or receiving a pension; and

"Whereas, This action has resulted in the loss of this benefit for 3.3 million California veterans; and

"Whereas, The cost of burial of indigent veterans will now fall upon the counties in this state because of prohibitions in the California Military and Veterans Code against paupers' burials for veterans; and

"Whereas, The estimated cost due to the loss of this benefit is estimated to be $250,000 to $300,000 in Los Angeles County alone; now, therefore, be it

Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California hereby respectfully memorializes the President and Congress of the United States to reverse the recent federal action which eliminated the $300 burial benefit for veterans of the United States Armed Forces; and be it further

Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States"

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. SPECTER (for himself, Mr. GRASSLEY, and Mr. BOSCHWITZ, and Mr. DIXON):

S. 3076. A bill to provide a temporary means to correct imbalances in the natural gas market in order to restrain prices charged to natural gas users; to the Committee on Energy and Natural Resources.

By Mr. EAGLETON:

S. 3077. A bill to establish the Harry S. Truman National Historic Site in the State of Missouri, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. BAKER (for Mr. LAXALT (for himself and Mr. CANNON)):

S. 3078. A bill to amend the Internal Revenue Code of 1954 to exempt from the windfall profit tax certain charitable organizations which provide assistance to patients; to the Committee on Finance.

By Mr. HATFIELD:

S. 3079. An original bill making appropriations for energy and water development for the fiscal year ending September 30, 1983, and for other purposes; from the Committee on Appropriations; placed on the calendar.

By Mr. PELL (for himself and Mr. CHAFEE):

S. 3080. A bill to require the Administrator of General Services to convey at no cost certain surplus real property for public park or public recreational use to State and local governments; to the Committee on Governmental Affairs.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. PERCY (for himself, Mr. MURKOWSKI, Mr. HELMS, Mr. GLENN, Mr. ABDNOR, Mr. HAYAKAWA, Mr. MATTINGLY, Mr. CHAFEE, Mr. LUGAR, Mr. ZORINSKY, Mr. RANDOLPH, Mr. KENNEDY, Mr. BIDEN, Mr. KASTEN, Mr. PRESSLER, Mr. HOLLINGS, Mr. PELL, Mr. SASSER, Mr. GORTON, Mr. LEVIN, Mr. BUMPERS, Mr. DIXON, Mr. INOUYE, Mr. D'AMATO, Mr. SARBANES, Mr. JACKSON, Mr. ROTH, Mr. HEINZ, Mr. GARN, Mr. QUAYLE, Mr. MOYNIHAN, Mr. NICKLES, Mr. THURMOND, Mr. ROBERT C. BYRD, Mr. METZENBAUM, Mr. GRASSLEY, Mr. BRADLEY, and Mr. MATSUNAGA):

S. Res. 501. Resolution expressing the sense of the Senate that the American people continue to protest martial law repression in Poland and wish to see it ended, remaining detainees released, and full and free dialogue resumed with the Church and Solidarity; and urging the President to proclaim a national day of solidarity and prayer with the Polish people on the first anniversary of the imposition of martial law; submitted and read.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. SPECTER (for himself, Mr. BOSCHWITZ, Mr. GRASSLEY, and Mr. DIXON):

S. 3076. A bill to provide a temporary means to correct imbalances in the natural gas market in order to restrain prices charged to natural gas users; to the Committee on Energy and Natural Resources.

TEMPORARY NATURAL GAS MARKET CORRECTION ACT OF 1982

Mr. SPECTER. Mr. President, In my capacity as cochairman of the Northeast-Midwest Coalition in the U.S. Senate, I am introducing this legislation drafted by the Northeast-Midwest Institute because I am convinced that some action must be taken on the urgent national problem of natural gas.

On my travels through Pennsylvania and from thousands of letters from constituents, I believe that some relief must be given from the sharp increases in the price of natural gas. The Citizen Labor Energy Coalition report-

ed in September that natural gas customers in 26 States, including Pennsylvania, will see their bills rise by $2.3 billion over the next 6 months despite the fact that gas supplies are currently plentiful. In Pennsylvania, most of the 1.8 million households which heat their homes with natural gas had their gas rates increased substantially at the beginning of September. Preliminary estimates show that a minimum of 50,000 jobs will be lost in Pennsylvania if proposed increases in natural gas rates go into effect. That 50,000 job-loss figure could easily rise to a significantly higher number.

While I have substantial reservations about this bill, I am introducing it because it is indispensable that we proceed with a national debate on this complex issue in an effort to find answers. The answers must include both livable prices for the consumers and a policy which will encourage exploration of natural gas to help to relieve our dependence on OPEC oil.

My reservations on this bill include its effect on existing contracts since it makes fundamental changes from prior legislation on which explorers and producers have relied. The impact on exploration and production is a factor which must be addressed in hearings.

While it is highly unlikely that any such legislation can be enacted this year, the introduction of this bill, along with other pending proposals, will provide a framework for national debate on this subject. I am pleased that Senator McCLURE, Chairman of the Energy Natural Resources Committee last week scheduled hearings on December 13, 1982, and I am confident that Senator McCLURE will schedule whatever additional hearings may be required to complete consideration of this issue. The introduction of this bill will enable the committee to focus specifically on the contents of the proposal by the Northeast-Midwest Coalition.

In evaluating the propriety of suspending existing contracts, it is important to know what the effects will be on gas producers in terms of financial hardship or even possible bankruptcies. From the consumers point of view there should be an evaluation of the financial hardship on homeowners and the possibility of bankruptcies of businesses—either large or small businesses.

In my judgment, the Congress should proceed with extreme caution in abrogating or suspending contracts. That should be done only on a strong showing that the national health and welfare mandate elevating the interests of the consumers over the existing contractual rights of the producers. A final judgment on the issue of such short-term suspension of contracts may depend on the balancing of bankruptcies as to gas producers versus the business gas consumers, and whether residential consumers can both heat and eat.

Hearings can shed the determinative light on these critical factual questions. It may be that this bill should be amended to permit exceptions to suspension of contracts where producers can show extreme financial hardship or the imminence of bankruptcies. I believe the introduction of this bill will aid the hearing process and assist in finding both short- and long-term answers to the complex issues involved in our national natural gas policy.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3076

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Temporary Natural Gas Market Correction Act of 1982".

FINDINGS AND PURPOSE

SEC. 2. (a) The Congress finds that—

(1) problems of market imbalance threaten the natural gas industry;

(2) such problems are likely to result in natural gas users being burdened by excessively high prices;

(3) interstate commerce is significantly affected by such problems;

(4) an urgent need exists to provide, on a temporary basis, immediate relief from natural gas contract provisions which cause those problems; and

(5) adequate information regarding the operation of the natural gas market is not available to the Congress and the public.

(b) It is the purpose of this Act to reduce the cost of natural gas supplies to end users which would otherwise occur during the forthcoming year under "take-or-pay" and other minimum charge contract provisions—

(1) by permitting natural gas pipeline companies to adjust volumes of high-price natural gas they would otherwise be required to take from producers and other suppliers, thereby facilitating new contracts (and renegotiation of existing contracts) for lower-price natural gas; and

(2) by treating any failure by such pipeline companies to provide to their customers the least-cost natural gas available under contract as if such failure were "fraud, abuse, or similar grounds" for purposes of the Natural Gas Policy Act of 1978.

NATURAL GAS PURCHASE CONTRACTS DEEMED TO INCLUDE VOLUME ADJUSTMENT OPTION

SEC. 3. (a)(1) Any contract for the first sale of natural gas shall be deemed to include a volume adjustment option (as defined in subsection (b)) with respect to any natural gas the first sale delivery of which could occur pursuant to such contract at any time after the effective date of this section and before November 1, 1983.

(2) Such option shall be in addition to, and not in lieu of, any other provision of such contract; except that such option shall supersede any other provision of such contract to the extent such other provision would prohibit or restrict the operation of such option.

(b) For purposes of this section, the term "volume adjustment option" means a contract provision under which the purchaser may elect to refuse to take delivery under such contract of any volume of natural gas (or portion thereof) without incurring an obligation to pay any fee or charge with respect to the natural gas not delivered pursuant to such election.

(c) Subsection (a) shall only apply to natural gas produced in the United States (including the Outer Continental Shelf).

(d) This section shall take effect beginning on the 15th day after the date of the enactment of this Act.

FAILURE BY A PIPELINE TO ACQUIRE THE LEAST-COST NATURAL GAS UNDER CONTRACT CONSIDERED AS FRAUD, ABUSE, OR SIMILAR GROUNDS FOR PURPOSES OF F.E.R.C. REVIEWING PASS-THROUGH OF COSTS

SEC. 4. (a) Except as provided under subsection (c), the purchase by any natural gas pipeline company of any natural gas which is delivered on any day on or after the effective date of this section and before November 1, 1983, at an excessive price shall be considered as fraud, abuse, or similar grounds for purposes of section 601(c)(2) of the Natural Gas Policy Act of 1978 (15 U.S.C. 3431(c)(2)).

(b) For purposes of subsection (a), the price of natural gas delivered to any natural gas pipeline company on any day shall be considered excessive if that price exceeds the price of any other natural gas not delivered to such pipeline company on that day but which could have been acquired by such pipeline company for delivery on that day under any contract to which the pipeline company is a party. Any modification of such contract after December 6, 1982, shall not be taken into account for purposes of the preceding sentence to the extent such modification results in a higher price, lower delivered volume, or earlier termination of such contract than would otherwise occur under the terms of such contract as they were in effect December 6, 1982.

(c) Subsection (a) shall not apply to the acquisition of any natural gas if—

(1) such acquisition is determined by the Federal Energy Regulatory Commission to be justified because of field drainage requirements, because of peak-shaving demands of any pipeline, local distribution company, or end-user, or because of similar reasons; and

(2) a filing for such exception is included with the first filing made by such company under section 5(a) of this Act.

(d) This section shall take effect beginning on the 15th day after the date of the enactment of this Act.

MODIFICATION OF COSTS UNDER PURCHASED GAS ADJUSTMENT CLAUSE

SEC. 5. (a) Within 15 days after the date of the enactment of this Act, and monthly thereafter, each natural gas pipeline company shall file with the Federal Energy Regulatory Commission—

(1) a statement explaining how such pipeline company has used and will use the contract rights available under section 3, as well as other steps it has taken and proposes to take, to achieve the lowest possible weighted average acquisition cost of natural gas; and

(2) a modification of the costs to be recovered by such pipeline under a purchased gas adjustment clause, if the weighted average acquisition cost of natural gas by such pipe-

line company is lower by reason of the exercise of the contract rights available under section 3 or other steps taken by such pipeline company.

(b) Any modification made under subsection (a)(2) shall take effect on and after the date it is filed.

(c) The filings made under this section shall specify, with respect to each contract under which the pipeline company can acquire natural gas during the period covered by section 3—

(1) the parties to such contract;

(2) the volumes subject to such contract;

(3) the price or prices for the natural gas subject to such contract; and

(4) the point of delivery under such contract.

DEFINITIONS

SEC. 6. For the purposes of this Act—

(1) the term "natural gas pipeline company" means a natural-gas company, as defined in section 2(6) of the Natural Gas Act;

(2) the terms "first sale", "deliver", and "Outer Continental Shelf" have the meanings given such terms by the Natural Gas Policy Act of 1978; and

(3) the term "purchased gas adjustment clause" has the meaning given such term under regulations issued under the Natural Gas Act.

● Mr. BOSCHWITZ. I rise today in joining my friends on the Northeast-Midwest Coalition in introducing legislation to revolve the emerging crisis in the natural gas market.

The crisis is partly one of price. Rapidly escalating natural gas prices as we approach winter stand to severely hurt residential consumers already hard pressed by the recession, not to mention industrial and consumer users.

My home State of Minnesota has been hit particularly hard by these price increases. According to Minnesota's State energy agency, residential natural gas prices increased from an average of $4.02 Mcf in 1981 to $5.03 Mcf so far in 1982. The agency projects an increase of nearly 20 percent in 1983 to $5.75 Mcf.

That means that Minnesotans will be paying an average of $110 more in natural gas bills this winter. That is an unnecessary and onerous burden for lower- and middle-income families.

This is most tragic in northeastern Minnnesota's iron range, one of the coldest areas of the State, and also an area where unemployment has overstepped 20 percent.

The crisis we face is not concerned solely with price. It is one of public confidence in the natural gas industry and in the price system established by the Government in 1978. The problem is that, according to the logic of the marketplace, prices should not be rising rapidly when demand for gas is declining.

But that is exactly what is happening.

For example, natural gas consumption in the United States for the first 8 months of 1982 was 4.6 percent less than in the comparable 1981 period, according to the Department of Energy.

At the same time, the cost to heat your home increased. Average residential heating prices for natural gas in the United States increased from $3.95 per thousand cubic feet (Mcf) in 1980 to $4.56 in 1981. Prices increased from $4.86 Mcf in January 1982 to $5.61 Mcf in June 1982 despite the fact that consumption always declines as winter turns into spring.

Knowledgeable observers cite two reasons for this contradiction of the laws of supply and demand in the gas market:

The first is that under the NGPA, prices of "new" gas—gas discovered after 1977—are to be gradually decontrolled until 1985, when controls will be removed entirely.

The whole purpose of the NGPA was to eradicate the gas shortage of 1976–77 through a phased program of price decontrol, which would, in turn, encourage procedures to increase supply. The NGPA has given us higher prices, which continue to rise today, but it has achieved its objective of bringing forth greater supplies. There is now a gas surplus of around a trillion cubic feet.

Mr. President, the NGPA's decontrol program makes sense as a partial explanation for rising natural gas prices, but there is more to the story. I am convinced that another major factor in the price increases is the behavior of the pipeline companies.

The pipeline company which supplies over 90 percent of Minnesota's natural gas is Northern Natural Gas Co. This year, Northern Natural Gas applied to the Federal Energy Regulatory Commission for a staggering rate increase of $348 million. This amounts to a 22-percent increase over last year. Included in this proposal was a recommended rate-of-return on investment of 18 percent.

As a businessman who has fully felt the ravages of our economy, Mr. President, I would dearly love to earn that kind of rate of return on investment, especially in the midst of a recession, when earnings at most firms are being squeezed. I find it difficult to justify such a high return on investment in the face of rising gas prices.

Curiously, Northern Natural also claimed it needed this large rate increase because high gas prices have led to declining demand, thus reducing the volume of gas carried in their pipelines and raising unit costs. Here again, the consumer gets gouged for conserving. What's more, the more he conserves, the more the price goes up.

Also, I am told by FERC that they feel Northern Natural overestimated its loss of volume, which means that they asked for a larger rate increase than they should have.

A final reason for Northern's rate increase was its contention that it needed to offset purchases of high-cost ($4.94 Mcf) Canadian gas, which they ordered during the gas shortages of 1976–77. But is it really fair to ask the consumer to bail Northern out of this predicament? Is it fair to charge customers for this high-cost gas that is no longer needed? I don't think so.

Mr. President, I have related this account about a gas pipeline in Minnesota to make one important point: Consumer all over the country are at the mercy of pipeline companies who do not necessarily have the consumer's best interests at heart.

Take, for example, the issue of so-called take or pay contracts, which is the principal concern of the legislation my colleagues and I are introducing today. During the gas shortage of 1976–77, contracts were written between pipelines and producers which have now locked pipelines into paying for expensive gas whether they use it or not. The pipelines were eager to get gas during the shortage and did not foresee that these contracts would eventually prevent them from acquiring gas cheaper than that which they contracted for.

Mr. President, these take or pay contracts are certainly a factor in the rising gas prices we now face. The bill being introduced today tackles this problem in two ways.

First, it allows pipelines to refuse to take gas under take or pay contracts without having to pay for it for a period lasting from 15 days after the date of the bill's enactment to November 1, 1983.

Second, it allow FERC to charge a pipeline which does not use this right to acquire the lowest cost gas available with fraud. This would then allow FERC to deny or scale back a rate increase based on a pipeline's claim of higher costs for gas purchases.

I do not think this bill will completely solve the problem of rising gas prices. There will continue to be some escalation due to the NGPA. But it will place needed pressure on pipelines to serve the interests of consumers by acquiring the lowest cost of gas possible. I also favor a tough stand by FERC in reviewing pipeline rate increases.

Mr. President, if we are to retain the confidence of consumers as another tough winter approaches, we must do everything in our power to hold gas price increases to a minimum. This bill, together with close scrutiny by FERC of all proposed rate increases will help us meet that objective.●

● Mr. GRASSLEY. Mr. President, earlier today, members of the Northeast-Midwest Coalition held a press conference announcing the introduction of legislation to provide some relief to individuals hit hard by increases in natural gas prices. I regret that I was unable to join my distinguished colleagues at that press conference, but I would like to take this opportunity to

voice my strong support for the Temporary Natural Gas Market Correction Act of 1982.

This issue of natural gas pricing is of tremendous concern to all Iowans who have been hit with a 100-percent increase in their natural gas prices over the past 3 years. Despite their commendable conservation efforts, Iowans can expect to see their natural gas bills rise an additional 25 percent during the upcoming winter months. As an energy-dependent State, Iowa has sought to combat the hardships brought on by spiraling heating costs by successful utilizations of Federal energy block grants. Yet Iowans must face another winter of higher gas costs unless the Congress takes some action to address the problem.

Our current natural gas paradox stems from a combination of current contracts negotiated between pipelines and producers and the pricing structure mandated by the Natural Gas Policy Act of 1978, legislation I voted against. In order to remedy some of the distortions created by current market conditions and those producer-pipeline contracts, the Temporary Natural Gas Market Correction Act will require pipeline companies to adjust the volume and mix of their gas in order to provide the least cost mix of gas available under their current contracts. Thus, a pipeline could refuse to take higher priced gas if lower priced gas is available.

Although this bill does not provide a comprehensive solution to soaring gas prices, it is nonetheless a serious and positive attempt to address the severe problem of high prices this winter. We cannot sit idly by and watch as Americans pay an increasing percentage of their take-home pay to heat their homes. It is now to the point where some unfortunate individuals must choose between heating their homes and putting food on the table.

I beleive we must take this opportunity during these last few weeks of the 97th Congress to act on the regulatory maelstrom we unleashed with passage of the Natural Gas Policy Act. Furthermore, we must stand ready to adopt more long-term and comprehensive solutions once Congress convenes next year. In the interim, I remain hopeful that contracts between pipelines and producers can be renegotiated to dramatically improve the current pricing anomolies. Such initiatives would substantially improve the energy environment for consumers and signal a good faith effort by the natural gas industry to work for remedial action.●

By Mr. EAGLETON:

S. 3077. A bill to establish the Harry S. Truman National Historic Site in the State of Missouri, and for other purposes; to the Committee on Energy and Natural Resources.

HARRY S. TRUMAN NATIONAL HISTORIC SITE

● Mr. EAGLETON. Mr. President, today I am introducing a bill to facilitate the transfer of the Truman home from the General Services Administration to the National Park Service.

It is a simple matter of transfer between two of our Federal agencies, both willing participants in the transfer.

Our country has been given a special gift by our former First Lady, Bess Truman, who passed away on Monday, October 18, 1982, at the age of 97. Words cannot express the loss I feel for this special First Lady. The Trumans left as their legacy to the American people their home and grounds in Independence. This is the house the Trumans happily returned to after leaving the White House. It was the house Bess Truman always called home.

The Victorian-style white frame house at 219 North Delaware, Independence, Mo., which had been in Mrs. Truman's family since the middle 1880's, was bequeathed to the U.S. Government to be administered under the direction "of the Archivist of the United States in conjunction with the Harry S. Truman Library."

Both the Archivist and the National Park Service are in agreement that the management of the Truman home should be handled by the National Park Service, as most Presidential homes are currently managed by the Park Service or private organizations. This is acceptable to the Truman family, as well.

I ask that the Senate give my bill expedited attention. Currently, the Truman estate is paying for security guards at the home, until the appropriate authorization can be passed. Today, the Senate Interior Appropriations Subcommittee agreed to report language appropriating the needed $160,000 for 24-hour security guards at the Truman home for the coming fiscal year.

This historic site is most certainly a valued and treasured national asset, and I feel it is important that out of the proper respect to the generosity of the Trumans that this Congress move quickly in transferring the property, so that the funding for immediate protection of the home can be forthcoming.●

By Mr. BAKER (for Mr. LAXALT for himself and Mr. CANNON):

S. 3078. A bill to amend the Internal Revenue Code of 1954 to exempt from the windfall profit tax certain charitable organizations which provide assistance to patients; to the Committee on Finance.

EXEMPTION OF CERTAIN CHARITABLE ORGANIZATIONS FROM WINDFALL PROFIT TAX

● Mr. LAXALT. Mr. President, I am introducing legislation exempting from the windfall profit tax certain charitable organizations that provide research, physician education and/or assistance to patients and which will be forced to close their doors as a result of this tax.

There are a small number of vitally important medical service organizations who aid in payment of hospital bills, out-patient care, and living expenses for patients who are terminally ill or physically impaired for a continuous period of a year or longer. They have been put in great financial straits and will be forced to terminate their services to patients upon payment of the windfall profit tax.

Presently, only schools, hospitals, orphanages, and certain churches are exempt. This amendment would allow these specific service organizations which are originated and operated substantially to provide physical training, medical or hospital care, medical research, or financial assistance to medical research, or to individuals who have a medically determinable physical impairment that can be expected to last for a continuous period of not less than 1 year or resulting in death.

I do not believe Congress intended to discriminate against usually tax-exempt, nonprofit service organizations which receive their money from oil revenues. These few institutions obviously slipped through the cracks when Congress originally composed the windfall profit tax. During these times of reduced Government spending, and increased emphasis for private charitable works, we should be doing all we can to help these small but extremely vital establishments whose sole purpose is to give aid to physically impaired and terminally ill patients who are struggling financially.

Specifically, there are two such organizations in Nevada which will be forced to close their doors as a result of the windfall profit tax. The Reno Cancer Center and the Nevada Division of the American Lung Association are two nonprofit, patient service organizations which will be devastated by this tax.

The Reno Cancer Center has been in existence for 24 years in the Washoe County Hospital in Reno. Its purpose is to help pay for hospital care, chemotherapy, and other drugs and radiation for cancer patients and on occasion, a portion of surgery fees; though the bulk of the patient assistance program is to help pay for cancer patients' living expenses.

In the past, the Reno Cancer Center has also given money to the University of Nevada Medical School for cancer research; however, this year it has been forced to keep this money to pay the windfall profit tax.

The Nevada Lung Association primarily aids with living expenses, medi-

cal research, physical training, and hospital care for patients with unpayable medical expenses. It, too will be forced to close its doors as it financially cannot exist when forced to pay such a large percentage of funds as taxes.

I believe Congress will agree that it is vital that both the Reno Cancer Center and the Nevada Lung Association become exempt from the windfall profit tax as they are both patient service, nonprofit, usually tax-exempt organizations that will be devastated and ultimately terminated by this tax.●

By Mr. PELL (for himself and Mr. CHAFEE):

S. 3080. A bill to require the Administrator of General Services to convey at no cost certain surplus real property for public park or public recreational use to State and local governments; to the Committee on Governmental Affairs.

ACQUISITION OF SURPLUS FEDERAL PROPERTY BY STATE AND LOCAL GOVERNMENTS

● Mr. PELL. Mr. President, today I am introducing legislation to allow State and local governments to continue to acquire surplus Federal lands for park and recreational purposes. Over the years, the American people have enjoyed the benefits of State parks across the Nation that were developed through the acquisition of surplus Federal lands. Earlier this year the longstanding Federal practice of promoting State and local park development was frozen in its tracks by an Executive order stating that the new policy of the Government would be to auction surplus property at fair market value to the highest bidder. My legislation would insure that notwithstanding this Executive order, the General Services Administration will continue to convey surplus property at no cost where the conveyance is for the purpose of park and recreational development by State and local governments.

The President's Executive order was intended to reduce the inventory of surplus Federal property, and in the process contribute to the reduction of the Federal debt. I do not quarrel with the administration's broad objectives, and no doubt there are many properties which the Federal Government has held for years which are ideally suited for commercial or residential development, and would produce a substantial amount of revenue if appraised and sold at fair market value. The identification and sale of these properties will spur needed economic activity, and eliminate the cost to the Federal Government of maintaining a large inventory of unproductive surplus property. At the same time, however, I believe it would be shortsighted and foolish for the Government to conduct a "fire sale" of surplus properties, and in so doing give up valuable natural resources which have a value to the taxpayers far beyond the fair market price these land could produce on the auction block.

Belonging to this category are dozens of properties in the Federal inventory which are ideally suited for park and recreational use by the American public. By longstanding practice under Federal law, the General Services Administration—as custodian of Government property—has offered surplus land to State and local governments at no cost, if the acquisition is for park and recreational development. Surplus properties not designated by the National Park Service for transfer in this category could then be offered for public sale. This procedure has worked well in making thousands of acres of surplus lands available for the park and recreational enjoyment of the American people. An example of property obtained in this manner is the beautiful Narragansett Bay Islands Park in my own State of Rhode Island, which consists of a number of formerly excess Federal properties preserved for public benefit under the management of the Rhode Island Department of Environmental Management.

Executive Order 12348, signed by the President on February 25, 1982, directed the General Services Administration to complete appraisals on surplus properties, and begin the process of auctioning them at fair market value. The order applies even to properties that have previously won designation for recreational use by the Park Service. I believe this practice is shortsighted, and will result in many properties being sold for a "quick fix" for the Federal debt that should be preserved as valuable natural resources for all the taxpayers. In many cases, the public sale of these lands will actually diminish the value of existing park and recreational areas. Such a case exists in Rhode Island, where GSA is proceeding toward the sale of a 6.6-acre parcel at Beavertail Park in Jamestown. This property is a former Naval Reserve station which is entirely surrounded by State parkland. Its value for private development is, of course, enhanced by its proximity to the beautiful Narragansett Bay Islands Park. At the same time, commercial development of the Beavertail site will diminish the surrounding parklands—just as a condominium development in the middle of Yellowstone Park would devalue the beauty and uniqueness of that national treasure.

The legislation I am introducing today, with the cosponsorship of my colleague Senator CHAFEE, will allow the conveyance at no cost of surplus properties which have been identified by State or local planning agencies as appropriate for potential park and recreational use. Any property conveyed to State and local governments in this manner must be retained for park use in perpetuity.

This legislation will insure that there is ample opportunity to decide the most appropriate use for surplus Federal lands before the property is put on the auction block for private development. Most significantly, it will preserve for future generations valuable public resources which are in danger of being permanently lost to immediate sale at fair market value. Congressional attention to this problem is urgently needed, if we are to prevent irreparable losses of valuable public assets in many States, and I urge my colleagues to join me in urging the prompt enactment of this legislation.

I ask that the text of the bill be printed in the RECORD following my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3090

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (k) of section 203 of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 484(k)) is amended—

(1) by redesignating paragraphs (3), (4), and (5) as paragraphs (4), (5), and (6), respectively, and

(2) by inserting after paragraph (2) the following new paragraph:

"(3) Notwithstanding any other provision of law, the Administrator shall convey to any State, political subdivision, instrumentality, or municipality, without monetary consideration to the United States, all of the right, title, and interest of the United States in and to any surplus real property, including buildings, fixtures, and equipment situated thereon, which the Secretary of the Interior shall designate as suitable for public park or public recreational use after receiving a plan for such use submitted by any such State, political subdivision, instrumentality, or municipality. Such plan shall include assurances that such use shall be perpetual.".●

ADDITIONAL COSPONSORS

S. 1256

At the request of Mr. EXON, the name of the Senator from Arkansas (Mr. BUMPERS) was added as a cosponsor of S. 1256, a bill to regulate interstate commerce by protecting the rights of consumers, dealers, and end-users.

S. 2424

At the request of Mr. HEINZ, the name of the Senator from Vermont (Mr. STAFFORD) was added as a cosponsor of S. 2424, a bill to amend the Internal Revenue Code of 1954 to allow a credit against tax for expenses incurred in the care of elderly family members.

S. 2731

At the request of Mr. HEINZ, the name of the Senator from New York

(Mr. D'AMATO) was added as a cosponsor of S. 2731, a bill to amend title II of the Social Security Act to provide for continued payment of disability benefits during appeal, to provide adjustment benefits and vocational training for individuals terminated from the disability program, to strengthen the reconsideration process, to provide for more uniformity in decisionmaking at all levels of adjudications, and for other purposes.

S. 2800

At the request of Mr. MCCLURE, the names of the Senator from Nevada (Mr. LAXALT), and the Senator from Idaho (Mr. SYMMS) were added as cosponsors of S. 2800, a bill to provide for the disposal of silver from the national defense stockpile through the issuance of a special series of bonds which may be redeemed for silver, and for other purposes.

S. 2948

At the request of Mr. DOLE, the name of the Senator from Washington (Mr. GORTON) was added as cosponsor of S. 2948, a bill to promote the development of nonanimal methods of research experimentation, and testing, and to insure humane care of animals used in scientific research, experimentation, and testing.

S. 2953

At the request of Mr. PELL, the names of the Senator from West Virginia (Mr. RANDOLPH) and the Senator from North Dakota (Mr. BURDICK) were added as cosponsors of S. 2953, a bill to provide for a program of financial assistance to States in order to strengthen instruction in mathematics, science, computer education, foreign languages, and vocational education, and for other purposes.

S. 2954

At the request of Mr. PELL, the name of the Senator from Connecticut (Mr. WEICKER) was added as cosponsor of S. 2954, a bill to amend part E of the Higher Education Act of 1965 to provide cancellation of loans for certain teachers who enter the teaching profession in the field of mathematics, science, or computer education.

S. 3040

At the request of Mr. ARMSTRONG, the names of the Senator from Minnesota (Mr. BOSCHWITZ), and the Senator from Minnesota (Mr. DURENBERGER) were added as cosponsors of S. 3040, a bill establishing a new GI education program.

S. 3047

At the request of Mr. KASTEN, the names of the Senator from Alabama (Mr. HEFLIN), the Senator from Wisconsin (Mr. PROXMIRE), the Senator from Nebraska (Mr. EXON), and the Senator from Kentucky (Mr. FORD) were added as cosponsors of S. 3047, a bill to repeal the withholding of tax from interest and dividends and to require statements to be filed by the taxpayer with respect to interest, dividends, and patronage dividends.

S. 3068

At the request of Mr. BOSCHWITZ, the name of the Senator from Georgia (Mr. MATTINGLY) was added as a cosponsor of S. 3068, a bill to establish a cap on the pay of certain Federal officers and employees for the fiscal year 1983.

SENATE JOINT RESOLUTION 215

At the request of Mr. HATCH, the names of the Senator from Minnesota (Mr. BOSCHWITZ) and the Senator from Wisconsin (Mr. PROXMIRE) were added as cosponsors of Senate Joint Resolution 215, a joint resolution to provide that the week beginning March 6, 1983 shall be designated as "Women's History Week."

SENATE JOINT RESOLUTION 244

At the request of Mr. WARNER, the name of the Senator from Tennessee (Mr. SASSER) was added as a cosponsor of Senate Joint Resolution 244, a joint resolution designating January 17, 1983, as "Public Employees' Appreciation Day."

SENATE JOINT RESOLUTION 254

At the request of Mr. JEPSEN, the names of the Senator from Illinois (Mr. DIXON), the Senator from Minnesota (Mr. BOSCHWITZ), the Senator from Vermont (Mr. LEAHY), the Senator from West Virginia (Mr. RANDOLPH), the Senator from New Jersey (Mr. BRADLEY), the Senator from Idaho (Mr. SYMMS), the Senator from North Carolina (Mr. HELMS), the Senator from Utah (Mr. HATCH), and the Senator from Kansas (Mrs. KASSEBAUM) were added as cosponsors of Senate Joint Resolution 254, a joint resolution designating September 22, 1983, as "American Business Women's Day."

SENATE JOINT RESOLUTION 263

At the request of Mr. THURMOND, the names of the Senator from Arizona (Mr. DECONCINI), the Senator from New Mexico (Mr. DOMENICI), the Senator from Oregon (Mr. HATFIELD), the Senator from South Dakota (Mr. ABDNOR), the Senator from Minnesota (Mr. DURENBERGER), the Senator from North Dakota (Mr. BURDICK), and the Senator from Louisiana (Mr. JOHNSTON), were added as cosponsors of Senate Joint Resolution 263, a joint resolution to authorize the President to issue a proclamation designating the week beginning on March 13, 1983, as "National Surveyors Week."

SENATE JOINT RESOLUTION 265

At the request of Mr. DENTON, the names of the Senator from Kansas (Mr. DOLE), the Senator from Nevada (Mr. LAXALT), the Senator from California (Mr. HAYAKAWA), the Senator from Texas (Mr. TOWER), and the Senator from Idaho (Mr. SYMMS) were added as cosponsors of Senate Joint Resolution 265, a joint resolution to authorize and request the President to proclaim 1983 as the "National Year of Voluntarism."

SENATE CONCURRENT RESOLUTION 121

At the request of Mr. DOLE, the names of the Senator from Colorado (Mr. HART), and the Senator from South Dakota (Mr. PRESSLER) were added as cosponsors of Senate Concurrent Resolution 121, a concurrent resolution expressing the sense of the Congress that the United States should maintain Federal involvement in, and support for, the child nutrition programs, and for other purposes.

SENATE CONCURRENT RESOLUTION 124

At the request of Mr. SASSER, the name of the Senator from Iowa (Mr. GRASSLEY) was added as a cosponsor of Senate Concurrent Resolution 124, a concurrent resolution concerning the administration's study of hydroelectric power.

AMENDMENTS SUBMITTED FOR PRINTING

HOUSING AND COMMUNITY DEVELOPMENT AMENDMENTS OF 1982

AMENDMENT NO. 4967

(Ordered to be printed and to lie on the table.)

Mr. GORTON submitted an amendment intended to be proposed by him to the bill (S. 2607) to amend and extend certain Federal laws relating to housing, community, and neighborhood development, and related programs, and for other purposes.

IMPROVEMENT OF OCEAN COMMERCE

AMENDMENT NO. 4968

(Ordered to be printed and to lie on the table.)

Mr. GORTON submitted an amendment intended to be proposed by him to the bill (H.R. 4374) to improve the international ocean commerce transportation system of the United States.

SENATE RESOLUTION 501—RESOLUTION RELATING TO MARTIAL LAW IN POLAND

Mr. PERCY (for himself, Mr. MURKOWSKI, Mr. HELMS, Mr. GLENN, Mr. ABDNOR, Mr. HAYAKAWA, Mr. MATTINGLY, Mr. CHAFEE, Mr. LUGAR, Mr. ZORINSKY, Mr. RANDOLPH, Mr. KENNEDY, Mr. BIDEN, Mr. KASTEN, Mr. PRESSLER, Mr. HOLLINGS, Mr. PELL, Mr. SASSER, Mr. GORTON, Mr. LEVIN, Mr. BUMPERS, Mr. DIXON, Mr. INOUYE, Mr. D'AMATO, Mr. SARBANES, Mr. JACKSON, Mr. ROTH, Mr. HEINZ, Mr. GARN, Mr. QUAYLE, Mr. MOYNIHAN, Mr. NICKLES, Mr. THURMOND, Mr. ROBERT C. BYRD, Mr. METZENBAUM, Mr. GRASSLEY, Mr. BRADLEY, and Mr. MATSUNAGA) submitted the

following resolution; which was considered:

S. RES. 501

Whereas, the American people have since the early days of our revolution and nation had a deep and lasting friendship with the Polish people and nation, founded upon an unfaltering respect for freedom;

Whereas, the American people expressed widespread admiration and support for the creativity, combined with restraint and discipline, with which the Polish people in 1980 and 1981 attempted to evolve a mutually more responsive relationship between workers and government;

Whereas, the imposition of martial law on December 13, 1981, and actions taken by the martial law government, including the imprisonment for many months of the people's chosen trade union representative, Lech Walesa, have constituted grave abridgements of the human rights and civil liberties of the Polish people, and violated the UN Charter, the Helsinki Final Act, the Universal Declaration of Human Rights, and other international human rights agreements which Poland signed and ratified as a participating state;

Whereas, the martial law regime continues in Poland to engage in acts of violence and repression against its own citizens in contravention of the indomitable right of the Polish people to determine their own future;

Whereas, the outlawing of the free and lawful trade union Solidarity by the Polish government in October 1982 is a further suppression of the clearly expressed will of the Polish people; Now, therefore, be it

Resolved, That it is the sense of the Senate—

(1) that the Senate condemns and abhors the suppression of civil liberties and human rights by the martial law government in Poland;

(2) that the American people respect and admire the commitment to the ideals of freedom and independence manifested by the Polish people and Mr. Lech Walesa in particular; that the American people welcome the release to his family of Lech Walesa, and hope that he will be permitted to express himself freely and contribute to a full and free dialogue on Poland's future and the resolution of her problems by Poles themselves, free from external influence or coercion;

(3) that the American people hope that Polish authorities will take early, concrete, and significant steps to return their human rights and civil liberties to the people of Poland, beginning with the full lifting of martial law and release of remaining detainees, and will resume a full, sincere, and dree dialogue with Solidarity and the Church to commonly resolve Poland's problems;

(4) that the President of the United States is urged to proclaim December 12, 1982, the eve of the first anniversary of the imposition of martial law repression in Poland, officially as a national day of solidarity and prayer for the people and nation of Poland.

NOTICES OF HEARINGS

SUBCOMMITTEE ON PRODUCTIVITY AND COMPETITION

Mr. WEICKER. Mr. President, I would like to announce that the Senate Small Business Committee's Subcommittee on Productivity and Competition will hold an oversight hearing on the Economic Problems Facing Small and Independent Businesses in the Forest Products Industry, on December 8, 1982, at 2 p.m., in room 6226 of the Dirksen Senate Office Building. Senator GORTON will chair the hearing.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON FOREIGN RELATIONS

Mr. PERCY. Mr. President, on behalf of the leadership—and Senator BAKER will be here any moment—I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Monday, December 6, at 11 a.m., to hold a hearing to consider S. 3052, fiscal year 1983, Budget Amendment for the Board for International Broadcasting; and to consider the nomination of Kenneth L. Tomlinson to be an Associate Director for Broadcasting of U.S. Information Agency.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. PERCY. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Monday, December 6, at 2:30 p.m., to consider the nomination of Lev E. Dobriansky, to be an Ambassador to the Commonwealth of the Bahamas.

The PRESIDING OFFICER. Is there objection?

Mr. ZORINSKY. Objection.

The PRESIDING OFFICER. Objection is heard.

Mr. PERCY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PERCY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PERCY. Mr. President, after consultation with my distinguished colleague, I rephrase the unanimous-consent request that was just made.

Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Monday, December 6, at 2:30 p.m., for the sole purpose of considering the nomination of Lev E. Dobriansky to be an Ambassador to the Commonwealth of the Bahamas.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. PERCY. Finally, Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Monday, December 6, a 3:30 p.m., to consider the nomination of John Herbert Holdridge to be an Ambassaor to the Republic of Indonesia, and this request is that it be the sole purpose of the committee to meet for that purpose.

The PRESIDING OFFICER. Without objection, it is so ordered.

(Later the following occurred:)

Mr. PERCY. Mr. President, I ask unanimous consent to revise the unanimous-consent request granted earlier to allow the Foreign Relations Committee to meet solely for the purpose of considering the nomination of Mr. Dobriansky to also include consideration of the nominations of Samuel Hart, to be Ambassador to Ecuador, and Victor Blanco, to be a member of the Board of Inter-American Foundation.

Therefore, the purpose of that meeting would be solely for the purpose of considering those three named nominations rather than just the single nomination that was mentioned before.

The PRESIDING OFFICER. Without objection, it is so ordered.

(Conclusion of later proceedings.)

COMMITTEE ON THE JUDICIARY

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Monday, December 6, 1982, in order to receive testimony concerning the following nominations:

U.S. DISTRICT COURT JUDGES

Judge Frank X. Altimari, of New York, to be U.S. District Judge for the eastern district of New York.

Mr. Frank W. Bullock, Jr., of North Carolina, to be U.S. District Judge for the middle district of North Carolina.

Mr. Paul E. Plunkett, of Illinois, to be U.S. District Judge for the northern district of Illinois.

U.S. CLAIMS COURT JUDGES

Judge Joseph V. Colaianni, of Maryland, to be a judge of the U.S. Claims Court.

Judge Robert J. Yock, of Virginia, to be a judge of the U.S. Claims Court.

Mrs. Christine C. Nettesheim, of the District of Columbia, to be a judge of the U.S. Claims Court.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

THE DOMINICAN REPUBLIC: AN EXAMPLE FOR THE CARIBBEAN BASIN

● Mr. DOLE. Mr. President, as our president visits some of our sister republics to promote greater cooperation and mutual growth, a few recent remarks by Robert Anderson, our Ambassador to the Dominican Republic, are of particular interest and importance.

In an address delivered Thanksgiving Day before the American Chamber

of Commerce in Santo Domingo, Ambassador Anderson outlined with clarity the policies and views of the U.S. Government with respect to the vital interests we have in common with our democratic neighbors in the Caribbean Basin. He stressed, too, the importance we attach to the leadership provided in this respect by the Government of the Dominican Republic.

I believe excerpts from his remarks would make a valuable contribution to congressional and public understanding of the matter, and I am pleased to place them in the RECORD for that purpose at this time.

The excerpts follow:

THE DOMINICAN REPUBLIC: A CORNERSTONE FOR CARIBBEAN STABILITY

I would now like to comment on the fundamentals of our relationship. One may ask if or why the Dominican Republic is of great importance to the United States. The answer is clear. The very location of your country on one of the most important strategic and commercial arteries for the United States speaks for itself. Nearly half of our trade, two thirds of our imported energy and more than half of the strategic minerals necessary for our industrial production pass through the Caribbean. Further, and this is not generally recognized, 70 percent of the reinforcement and resupply of Europe by the United States in the event of a NATO conflict will have to be transported from our ports in the Gulf of Mexico through the Caribbean and on to Europe.

As President Reagan noted in addressing this subject at the Organization of American States in February of this year: "Make no mistake. The well-being and security of our neighbors in this region are in our own vital interest."

Aside from your geographic location, your country is, in my view, important to the United States for reasons which have to do with ideas and ideals, not numbers. They deal basically with what your nation stands for: democracy and freedom. No matter what those opposed to these tenets may proclaim, democracy can and will flourish. Indeed, it is flourishing in many places around the world: not just in Northern Europe and North America, but in Asia and in Africa, and here in the Caribbean as well.

Your nation and your leaders should rightly be proud of what has been accomplished in building democratic institutions in your country. Your constitution provides a valuable framework for elections, for the adoption of laws, for the administration of government, for a system of justice, and for the protection of human rights. That structure has been tested this year, and has been proven strong. We in the United States rejoice in this further success in consolidating a vibrant democratic system emerging from the will of the people and responsive to it. It is precisely because of this favorable evolution that the Dominican Republic is a cornerstone for stability in the Caribbean.

As the largest democracy in this critical area, your country stand as a model toward which the aspirations of all who love freedom can turn. I am thinking in particular of the many new or emerging nations in the Caribbean who are or will be deciding on their own systems of government. From my own travels during the past three years visiting many of these island states I can tell you that each passing year they look more and more toward your country in weighing what political and economic system best suits their needs. I think we would all agree, however, that the Dominican Republic's contribution to regional stability will be in direct proportion to the role it chooses to play in the area. For this reason, my Government welcomes the intention of the new Administration of President Salvador Jorge Blanco to reactivate or establish diplomatic relations with its democratic neighbors in the Caribbean. I see this as another sign of your Government's recognition that stability in this area is in its national interest, and of a readiness to assume greater responsibilities to contribute to it in a meaningful way. For this we are grateful.

The pursuance of a successful foreign policy rests first and foremost on political and economic stability at home. As we all know, the state of an economy is more often than not crucial to preserving political stability. That this is recognized by the new Administration is clear. Your President has already taken a series of difficult and courageous steps to surmount the pressing financial problems facing your nation. These, coupled with the reports of positive discussions with the International Monetary Fund and the World Bank, make it difficult for me to share the views of the school of doom and gloom about this country's economic future. Rather, I am confident that with perseverance in the effort to obtain the badly needed infusion of additional foreign exchange, the short term difficulties will be overcome. I am not alone here. In his remarks in Santo Domingo on October 28, 1982, Henry Wallich, a distingished Governor of our Federal Reserve Board, noted: "Temporary difficulties are likely to remain just that—temporary. They will scarcely be visible on the upward-sweeping graph of long-term trends."

One may rightly ask why I am optimistic about the long-term economic future of the Dominican Republic. A nation dependent on imported energy at prices set abroad. A nation dependent for its foreign exchange in large measure on the export of five or six primary products whose prices are also set in the world market place. My optimism stems from the fact that I have served in or worked with nations where there was little hope, no matter what effort and imagination their leaders could apply. Resources above the subsistence level were just not there. By comparison, I am now in a garden of Eden. The Dominican Republic has ample resources, human and material, for future development. Let us examine briefly this potential.

First, because of its political stability in recent years, because of its nearness to the United States market, and because of its long friendship with our country, the Dominican Republic is becoming more and more attractive to American investors. Your nation is truly a rare asset in this world. Where else, for example, would an American visitor ask me where he could invest in the Dominican Republic simply because, as he put it, "I love this country"? He really had no clear idea of where to invest. He just wanted to help a very special country which he felt deserved his support. Needless to say, our American Chamber will do its best to assist this friend of the Dominican Republic.

Secondly, the areas for potential growth in this country are clear and, as your Government has indicated, seem best fostered by private enterprise drawing on documents and foreign investments. Agrobusiness and tourism are of particular interest and should prosper. . . . From conversations I have had with American firms, I can attest that there is an active interest here.

A third factor which could benefit your country's agricultural and industrial development is the existence of a market which has not yet been exploited to its full extent. I refer to the English, French and Dutch-speaking islands of the Caribbean, which are so dependent on food imports. The aggregate population is over 11 million people. One may conservatively add another 11 million representing the annual influx of tourists. These 22 million potential customers then could be an interesting market for reasonably priced household items, shoes and clothing, and for non-traditional agricultural exports from the Dominican Republic. There may be good and sufficient reasons, but I am not clear, for example, why so many fruits and vegetables come from Central America via the United States for eventual consumption in the Eastern Caribbean. This may also merit examination, perhaps leading to positive and profitable action. Then again, I was perplexed to learn that no Dominican fruits and vegetables go to the Turks and Caicos, only 125 miles away. This currently represents $15 million annually in cash for some enterprising supplier.

With this brief overview of your country's potential, it is clear that there are no quick and easy answers. But it is equally clear that with realistic priorities, hard work, determination and persistence success may be achieved. Towards this end you may be assured that the United States will always be ready to play its part.

For the past twenty years, as you know, we have provided bilateral economic assistance in addition to our contributions to such multilateral aid efforts as the World Bank and Inter-American Development Bank. From 1975 through 1978 our direct bilateral assistance averaged $16.9 million per annum. During the following four years the average was $57.7 million. We fully expect our help to continue at about this level for the foreseeable future, even though the level of our assistance worldwide may drop slightly.

While our government-to-government aid programs can be helpful, particularly technical assistance, they should be considered a supplement to meeting the overall needs of a developing country. Experience in other areas has taught me one basic fact. It is the participation of private enterprise and the infusion of its capital that are the major determinants for economic development. It is in this spirit that our assistance can be most accurately viewed.

This spirit has been most recently expressed by the Caribbean Basin Initiative of President Reagan. The economic assistance part of this Initiative has been enacted into law. The two other parts are even more important than the first. These cover areas of great potential importance to your Government in its efforts to increase employment and export-oriented industries. . . . President Reagan has made it clear that he considers this a top priority for consideration by our legislators, and plans to do everything possible to encourage its passage. . . .

After listening to these few thoughts, I hope you may now understand my enthusiasm for this assignment, my optimism about the future of the Dominican Republic, and the importance of your nation's role in the Caribbean for our mutual security. Remarkable strides have been made in the past twenty years. From a nation then, with one agronomist, two industrial engineers, and

three economists, one has only to observe your country today. From a nation then, with virtually no middle class, observe it today. From a nation then, with most of its industrial production concentrated in the hands of one man, observe it today. From a nation then, with freedom of expression and freedom of assembly excluded, observe it today. From a nation then, with democratic institutions little more than symbols, observe it today. From a nation then, unconcerned with human rights, observe it today. And finally, from a nation then, oblivious to the needs and aspirations of the individual, observe it today: a vibrant democracy, a cornerstone for Caribbean stability.

Thank you very much.●

MX

● Mr. TOWER. Mr. President, on Sunday, December 5, 1982, George F. Will wrote a thoughtful article concerning the upcoming congressional deliberation on MX entitled "Serious Business," which appeared in the Washington Post.

In his usual eloquent and sensible way, Mr. Will has articulated a number of key issues and points of contention with which we, in Congress, must grapple before arriving at a final decision on this controversial and important program.

Senators HENRY JACKSON, JOHN WARNER, and TED STEVENS have joined me in writing to our colleagues in the Senate to encourage them to maintain open minds on President Reagan's MX basing proposal and related subjects until planned congressional reviews of these matters can be completed.

I hope that while Members of the Senate are formulating their positions over the coming weeks with respect to the MX, they will ponder Mr. Will's thought-provoking comments.

I submit for the RECORD the article and letter to which I have made reference.

The material follows:

SERIOUS BUSINESS

(By George F. Will)

The symptoms are unmistakable that Washington is entering one of its relatively lucid intervals for the MX missile debate. Seriousness has not become general, but serious people will dominate both sides of the controversy.

The leading critic of MX—Sen. Fritz Hollings (D-S.C.)—was a leading opponent of SALT II.

The crucial question is not whether the Minuteman force—land-based ICBMs—is vulnerable. Hollings and the administration agree that it is, because a Soviet first strike could substantially destroy it. Neither is the crucial question whether a land-based component of the deterrent is valuable. Most persons agree that a strategic triad is desirable because it complicates the task of Kremlin planners, preventing them from concentrating their resources on means of degrading the effectiveness of the sea-based and airborne deterrent. And land-based forces still have (although they soon may not have) inherent advantages of control and accuracy (which make them useful against "hardened" Soviet targets).

The crucial question is not whether we can "afford" MX. The nation can afford the price of peace, period. Anyway, even if you budget for something not yet planned—a protective overlay of ABMs (antiballistic missiles)—the total MX cost of perhaps $60 billion a year over a decade. If MX makes deterrence significantly more stable for such a span it is a bargain.

The question is not in any simple sense whether the "Dense Pack" basing will "work." To work means to enable a significant number of the 100 missiles to survive a Soviet strike. Each side in the MX debate will have scientists to testify about "fratricide" of incoming Soviet warheads. The "fratricide" theory is this;

MX silos will be so "hardened" that a disarming attack would require saturation by Soviet warheads; but blast effects (heat, shock, debris, etc.) would be such that Soviet attackers will need to plan an incredibly—indeed, prohibitively—complex attack sequence, with certain warheads arriving precisely as the blast effects of other warheads are just sufficiently dissipating.

Some critics of MX will say the Soviets can stage such an attack. However, many anti-defense senators and congressmen are precluded (by logic, if nothing else) from making that argument because they have long argued against new strategic programs on the ground that a Soviet first strike on existing strategic forces is prohibitively difficult.

Critics of MX will say "fratricide" cannot be tested. That is true, but the existing U.S. deterrent is woven, in large measure, from untestable hypotheses about how strategic systems will work and how Soviet decisionmakers will calculate in certain situations.

The more telling criticisms of MX are more specific. They are that MX's deterrent value is subject to rapid (in perhaps five years) deterioration as a result of Soviet developments (such as ground-penetrating warheads), and that even without such developments the U.S. capacity to "harden" silos sufficiently with steel and concrete is hypothetical and dubious.

The pro-MX side has an inherent advantage because deterrence is less a piling up of certainties than it is the multiplication of useful uncertainties. We cannot know beyond peradventure that "hardening" or "fratricide" would work; but neither can Soviet planners enter a crisis certain that it would not.

The least crucial question is whether MX would violate what critics call "existing arms" control agreements." The critics are referring to SALT I, which has expired, and SALT II, which never came close to ratification. Still, the administration argues that MX does not violate the SALT II ban on new fixed-ICBM launchers because MX travels with its launcher. All that is new is the silo into which the launcher—a cannister—slips. This interpretation of SALT II is no more legalistic than various Soviet interpretations.

The crucial question about MX or any other strategic program is: how much enhancement of deterrence would be bought for how many years, and for how many dollars per year? Before birds sing their anthems to spring, the debate may have produced a dusty answer: more money for the missile, none for deployment.

But deployment is everything. So a few billion dollars from now, MX may be nothing. Responsible persons who ask, "Can't we do better than MX in Dense Pack?" must also ask, "Can we afford to do nothing?"

The Trident submarine D5 missile, with an accuracy comparable to that of MX, is due in 1989. The U.S. ballistic missile force (as distinct from cruise missiles) may be destined to go to sea. Then America might have a somewhat less vulnerable but also less versatile deterrent. There would be no respite from spending billions to counter Soviet measures, which would be concentrated against submarines. Come what may, there will be no escape from the dialectic of weaponry.

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, D.C., December 1, 1982.

DEAR COLLEAGUE: As you know, on Monday, November 22, 1982, President Reagan announced his selection of a system for deploying the MX missile. Under the President's plan, one hundred of these missiles would be deployed in closely spaced, superhardened shelters in a so-called "Dense Pack" configuration.

The theories and principles upon which the feasibility and survivability of the Dense Pack system rely are complex and highly technical. The Reagan Administration arrived at its decision to propose this basing plan only after an arduous internal review of these considerations was conducted at the express direction of the Senate. In the course of this review, the judgment and counsel of a number of distinguished experts outside the government were received. The Congress, no less than the Executive Branch, needs to give the questions raised by the closely spaced basing proposal full and fair deliberation.

Since the President's announcement, few, if any, of our colleagues have had the opportunity to receive the Administration's classified briefings or the counter-arguments thereto in the detail required to make an informed assessment of this technically complex proposal. Consequently, for the vast majority of our colleagues, a decision during the post-election session—be it an outright endorsement or a rejection of either the totality or any part of the funding for the MX—would have to be made on the basis of scant information and assertions of questionable validity.

The Armed Services Committee and its Subcommittee on Strategic and Theater Nuclear Forces will strive in their upcoming hearings to develop a record which fairly and systematically addresses the questions many of us have about the efficacy, cost-effectiveness, and strategic importance of a closely spaced basing of the MX missile.

Since whatever action we take will affect our strategic deterrent posture, U.S. foreign policy, and the sensitive START and Theater Nuclear Force discussions, we must avoid making a hasty, ill-informed decision. Let us permit more of our colleagues and the appropriate Senate Committee to explore the full range of views on the need for the MX and on the proposed basing mode unencumbered by the distractions and legislative time pressures inherent in the post-election session.

We believe that the passage of any proposal in the post-election session to delete MX production funds for the current fiscal year would be premature and incompatible with an objective and systematic Congressional review of the President's plan. Until that review is completed, all options—including that of initiating production of MX missiles and associated hardware in Fiscal

Year 1983 as requested by President Reagan—should be preserved.

Sincerely,

JOHN W. WARNER.
HENRY M. JACKSON.
JOHN TOWER.
TED STEVENS.●

DISSENTING VIEWS ON THE IMMIGRATION BILL

● Mr. EAST. Mr. President, in our attempts to solve difficult problems, we must never forget the admonition of Hippocrates "to help, or at least to do no harm." Most Members of Congress will agree that this Nation has lost control of its borders and that legislation to reduce illegal immigration is long overdue. I fervently hope that we can promptly enact an immigration control bill providing for increased enforcement efforts.

However, if the political price for passage of greater law enforcement measures is a mass amnesty for millions of illegal aliens, I am convinced that we would do more harm than good. A distinguished member of the House Committee on the Judiciary, Mr. F. JAMES SENSENBRENNER, JR., came to the same conclusion and reluctantly voted against H.R. 6514, the Immigration Reform and Control Act of 1982. I find his dissenting views on the bill convincing. I also believe they reflect the thinking of most Americans.

I ask that his views be printed in the RECORD for the edification of my colleagues.

The views follow:

DISSENTING VIEWS OF CONGRESSMAN F. JAMES SENSENBRENNER, JR., ON H.R. 6514

It is difficult for me to understand how H.R. 6514, the Immigration Reform and Control Act of 1982, can be characterized as immigration reform. This legislation does not even represent the lowest common denominator needed to accomplish immigration reform. H.R. 6514 should not be enacted into law for two reasons: it fails to deal effectively with the problem of legal immigration, and it provides amnesty provisions for illegal aliens residing in our country.

H.R. 6514 fails to deal with the problem of legal immigration in several ways. First, there is the failure to set a cap on the number of immigrants, asylees, parolees, entrants, etc., who enter our country each year. One of the major criticisms the American people have with the present immigration law is that we have "different strokes for different folks," or different quotas for different people, resulting in no real hard or fast limitation on how many foreigners are legally admitted into the United States on an annual basis. If a cap on legal immigration is not enacted then the current number of legal immigrants entering our country will continue to mushroom. In 1977, legal immigration was 399,000. In 1980, it was 808,000. In 1981, it was 697,000, with an increase expected in 1982.

Legal immigration mushroomed at a time of rising unemployment, at a time when we have been unable to provide enough jobs for our own American citizens. This has soured the American people on the entire issue of immigration and substantially reduced the compassion the American people have historically felt toward refugees from oppression and political and religious persecution around the world. Americans are having a difficult time understanding why our government continues to allow more people in this country who compete for jobs and place a drain on the treasuries of our state, local, and federal governments. Public opinion polls show that 80 percent of the American people want reductions in legal admissions. "Compassion fatigue" has, indeed, set in.

While some have argued that those are unsubstantiated fears, there are hard facts to support these concerns. For instance, a Presidential Report in 1980 revealed that taxpayers have spent over $2 billion a year in refugee admissions. Billions of dollars more have been spent since this report was issued. These figures are put into greater perspective by a GAO report which showed that over 70 percent of the Indochinese refugees of employable age had requested public assistance. Most requests were made within 30 days of arrival. In my own state of Wisconsin, which held more than 15,000 Cuban-Haitian refugees at Fort McCoy, I heard many complaints from both the state and local government officials strongly objecting to the open ended refugee policies.

Placing refugees under the legal immigration cap is essential for our country to be able to withstand increasing pressure in the future for more refugee admission. The current refugee explosion is only a preview of things to come. For instance, our world populations will increase another two billion by the end of the century. This means the labor force will grow by 900,000,000 people, who will join some 50 million currently unemployed. At the same time, economic and political tensions will add millions more. In other words, our country will be able to absorb only a small fraction of a percent of this number.

When H.R. 6514 comes before the U.S. House of Representatives, I will be offering an amendment to place a cap on legal immigrants entering this country. My amendment will place refugees under a ceiling of 425,000. This figure is generous when it is compared with the period from 1921-1980, when our average total legal immigration was under 300,000 per annum. This figure in my amendment is slightly above a 1980 Roper Poll figure of 400,000 which 80 percent of the American people wanted. Until refugees are included within this cap, there is no reform of legal immigration. There might be reform of legal immigration as we call it under the present law, but it is not what the American public wants. My amendment maintians flexibility. If an international crisis requires the admission of more refugees in one year, then the number of legal immigrants in other categories would be reduced. Conversely, if there is no need to admit a large number of refugees, then the other legal immigrant ceiling would be increased.

A second problem affecting legal immigration concerns the method of allocating immigrants other than refugees into this country. H.R. 6514 does nothing to limit the 5th preference. The problem of "chain immigration," whereby alien brothers and sisters of U.S. citizens are given a preference for permanent residence, remains unchanged. Currently there is a 5th preference backlog of 700,000, which is continually growing. Less than one-half of this backlog are brothers and sisters of U.S. citizens themselves. The rest are spouses and children of those brothers and sisters. If the 5th preference is not modified, then closer family members, i.e., spouses, sons, and daughters will continue to have problems being united. If family reunification is to be a preferred public policy, it should be for the closest relatives—not a loophole to bring "every" relative into the country.

Because of the way in which the preference system is allocated, family reunification is becoming the principal way for immigrants, other than refugees, to enter this country. This will be felt even more a few years down the road when all the legal immigrants, which include refugees, become citizens; and, if amnesty is granted, the millions of now illegal aliens will be eligible for citizenship, and naturally will want to bring their relatives into this country.

There are, however, other public policy reasons for allowing immigrants into the United States. In certain industries there is a shortage of U.S. skilled labor. In some of these areas, i.e., high technology, these shortages will continue for some years in the future. As reported out of Subcommittee, H.R. 6514 has some provisions that were a step in the right direction because it created a category of "independent immigrants," which allows for greater numbers of skilled aliens and aliens of exceptional quality, to enter our country. These immigrants would not compete with American labor, because in order to be admitted, there must be an existing labor shortage.

The most objectionable features of H.R. 6514, however, are the provisions which grant amnesty to millions of illegal aliens. The amnesty provisions give permanent resident status to those illegal aliens who have continuously resided within the U.S. prior to January 1, 1977. It also gives temporary resident status to illegal aliens who have entered and resided in the United States continuously prior to January 1, 1980. Temporary residents would be able to receive limited benefits, such as emergency medical care, etc. However, after a three year period, illegal aliens granted permament resident status would be eligible for a whole plethora of welfare benefits, which would cost the taxpayers billions and billions of dollars each year.

The costs of the amnesty bill are unclear because it is not known how many illegal aliens will take advantage of this program. Any estimate is truly a shot in the dark. The CBO estimates the number of illegal aliens to be 4½ million; the Justice Department estimates the number to be 6 million; and other estimates vary from 8 to 10 to 12 million illegal aliens. Obviously, the costs will be astronomical. All these costs will be absorbed by either the federal, state, or local governments, some of which are already subject to enormous pressure to cut their budgets and reduce their spending. These additional costs could bankrupt some of these jurisdictions in the next few years.

Aside from the billions of dollars of increased costs to the federal, state, and local governments, there are numerous other reasons for opposing this legalization program.

The legalization program has no safeguards. It does not provide protection against aliens purchasing false documents, e.g., leases, affidavits, etc. to prove they have been in this country the required number of years. In addition, the amnesty program will be an incentive for more illegal aliens to enter our country. The limitations as to who will be eligible for amnesty will not filter down to the citizens residing in economically depressed countries. They will

only hear that amnesty is being granted and the influx will start.

Amnesty is a bad precedent for our country to set. It shows our country is not serious about enforcing its immigration laws. It truly makes our borders in the southwest borderless. Aliens will continue to come to the United States hoping in the future they, too, will be granted amnesty.

I fear that the U.S. Supreme Court decision rendered in *Plyler, Superintendent, Tyler Independent School District et al.* v. *Doe, Guardian,* which forced the state of Texas to provide free education benefits to children of illegal aliens, will be extended to include other benefits. This is yet another incentive for a family to move illegally to the United States.

The employer sanctions in the bill are equally ineffective. Illegal aliens drawn by the "economic magnet" to the U.S. will not be hindered. Supporters of the bill will argue the employer sanctions will turn off the "economic magnet." However, this is not true. The employer sanctions were considerably weakened in the full Judiciary Committee. The burden of proof in enforcement of immigration laws has now been shifted from the government to the employer. Employer sanctions must be stronger for the magnet to be turned off. Illegal aliens must not have an incentive to come or to stay in this country. The amnesty provisions in the bill are an admission that employer sanctions will not work, because they are weak and ineffective.

Blanket amnesty is unfair to the hundreds of thousands of immigrant applicants, some of whom have been waiting as long as 10 years to come to this country legally. We are saying to these people they were stupid for obeying the law. If they had come here illegally, they would be rewarded. However, because they decided to abide by our law, they are penalized. We are keeping law abiding applicants out of the country while giving resident status to lawbreakers.

There also will be a negative impact in the years to come on these prospective applicants if illegal aliens are granted amnesty. When the amnestied aliens are granted citizenship, they will bring into this country millions of relatives who are not subject to any numerical limitation. According to a Washington Post editorial of September 13, 1982, a single citizen filed petitions for 69 relatives. In certain areas, the current waiting period for relatives to enter this country is as long as 12 years. What will happen to family reunification when you add millions of newly eligible petitioners? What will the waiting periods be then?

Finally, it seems ludicrous to be granting amnesty to millions of illegal aliens at a time when our country is suffering from such high unemployment. The Congressional Budget Office shows that each unemployed American receives $7,000 annually in unemployment benefits and from public assistance programs. With 10 million unemployed, the American taxpayers are spending a minimum of $70 billion annually. Our country should be considering ways to remove the illegal drain on the work force. Former Secretary of Labor Ray Marshall stated that removing illegal aliens from the work force could cut the unemployment rate in half. This would amount to a savings of at least $35 billion per year. It has been said that illegal aliens are not a drain on the labor force because they work at jobs "no Americans want to take." After legalization, there will be incentive for them to move away from their traditional employment fields and put them in direct competition with American labor, thus causing further imbalances in the labor market.

I would hope the U.S. could continue as much as possible its "open door" tradition and policy toward the displaced, the persecuted, and the ambitious of the world. However, the reality of our economic and resource situation is that we simply cannot continue to be a nation without borders. We must limit the influx of aliens and immigrants and have an orderly and fair system for admitting those we are able to absorb. The Simpson-Mazzoli measure as reported by the House Judiciary Committee provides neither, so it cannot be regarded either as a true "reform' of our messed up immigration laws or as the first step toward restoring order to our immigration system. If it cannot be amended on the floor of the House to remedy these deficiencies, it should be defeated.

For all of the above cited reasons, I must respectfully decline in supporting H.R. 6514.

F. JAMES SENSENBRENNER, JR.●

VICTIM OF ALIEN GLUT

● Mr. EAST. Mr. President, no economy can produce an unlimited number of jobs. By allowing illegal aliens to take jobs at a time when millions of American citizens are unemployed, we are playing with social and political dynamite. Should Congress affirmatively act to grant amnesty to millions of illegal aliens, in other words to permanently give millions of jobs to these foreigners, I fear we will see a terrible backlash that will divide our country for years to come.

No Member of this body will lose his job to an illegal alien. Mike Royko, writing in the Chicago Sun-Times of October 1, 1982, tells the story of one unemployed American. I hope we will remember the plight of our unemployed fellow citizens as we consider legislation to deal with illegal immigration. I ask that Mr. Royko's column be printed in the RECORD.

Supporters of amnesty contend that we have no choice but to give amnesty to illegal aliens, that the expense of enforcing our immigration laws is too great. Yet we could triple the number of border patrol officers and INS criminal investigators for a fraction of the increased welfare costs that will eventually result from amnesty. Could it be that amnesty—opposed by the American people—is popular here because it allows us to placate the pressure groups that favor immigration.

The column follows:

[From the Chicago Sun-Times, Oct. 1, 1982]

VICTIM OF ALIEN GLUT—HE WAS JOBBED

(By Mike Royko)

Those kindly souls who oppose tougher immigration laws still insist that illegal aliens don't take jobs that otherwise would be filled by unemployed citizens of this country.

They say the illegals only do the grubby jobs that finicky U.S. citizens reject.

I can't buy that argument. It might be true if this country had more good jobs to fill than people to do them.

But in hard times like these—with hundreds of desperate job seekers showing up whenever some factory advertises a few jobs in a paper—I don't think there are many paying chores that jobless people of this country will turn down.

And I know that Charlie, 24, with a pregnant wife and no job, doesn't want his full name used, or the name of the company, because he still hopes to be rehired and doesn't want to burn that bridge behind him.

But Charlie is real, and he's bitter because he says many illegal aliens were kept on their jobs while he was let go.

"I'm an American citizen," he said, "and I've been working real hard. But I'm being kicked out of a company that's keeping illegals, and I don't think that's fair."

Charlie had been working for a suburban food-processing company. They mass-produce various kinds of salads and supply fast-food chains.

He was being paid $5 an hour. Not a princely sum, but it was enough for him and his wife to scrape by on in their tiny apartment. They had been doing better before she became pregnant and had to quit her job.

A few days ago, Charlie's supervisor called him into his office and told him he was being laid off. With summer ending, there was less demand for the salads, so the company was cutting back on its work force.

"It wasn't just me," he said. "At least seven others that I know of—three women and four men—were laid off at the same time. They were boxmakers, food trimmers and hand packers.

"Now, I can understand people being laid off by a seasonal company. And I wouldn't be complaining, except for this:

"I'd say the company employs about 150 workers, and about half are illegal aliens. None of the illegals were asked to leave.

"They told me that I was one of the ones being laid off because I don't have much seniority. But nobody there has much seniority because they lay us off when things slow up. But they don't lay off the illegals. So they've got us coming and going. We can never build up seniority, so that gives them an excuse to lay us off."

Charlie was in the plant a few months ago when it was raided by immigration agents.

"You never saw anything like it," he said. "All the illegals went flying out the back door. That was about half the work force. But with all the hullaballoo, only a couple of them were caught.

"The ones who weren't caught stayed away for about three days. Then they came back like nothing had happened and went back to work.

"Then, after a few weeks, one of the illegals who had been caught and shipped back to Mexico showed up again.

"She was back, and there she was, filling out new employment papers, and she had a new Social Security card.

"And she's still there, while I'm out of work. Can you believe that—somebody who was already deported once? And now she's back in this country illegally again, and she's working there, and I'm out on the street without a paycheck.

"I don't know what the illegals get paid, but I think maybe it's a little less than the rest of us get, but I can't be sure. It's not the kind of thing that people there talk about.

"There's a union at the company, and the illegals are members just like us. But I think

there must be some kind of collusion between the company and the union.

"The illegals are probably easier for both the union and the company to deal with. What the heck—they're not going to ask for anything extra or rock the boat. So the union gets their dues and the company doesn't get any grief from the union, and they've all got a good deal.

"Yeah, everybody's got a good deal except me and the others who were laid off.

"So don't buy that stuff about how native Americans won't do the jobs that the illegals take. That's a lie. I was happy to have that job, especially the way things are right now.

"And I can guarantee you that if all the illegals were taken out of those jobs and they advertised, they'd have a thousand people lined up in the morning. Maybe $5 an hour isn't much, but with the health and medical benefits, it sure as heck is better than I've got now, which is nothing."

Every time I've written about the illegal alien problem, and the impact it has on U.S. citizens like Charlie, I hear from people who tell me I have no compassion for the downtrodden.

That's not true. It's just that I have more compassion for a U.S. citizen who is currently downtrodden than for somebody downtrodden from another country who is in this country in violation of our laws.

And one thing I've noticed about those do-gooders who argue that we should do almost nothing about stopping the flow of millions of illegal aliens:

Unlike Charlie, the do-gooders have jobs.●

REAGAN'S AVOIDING SOCIAL ISSUES COSTLY

● Mr. EAST. Mr. President, the Washington Times of November 5, 1982, carried a thought-provoking column by John Lofton discussing the recent election. I ask that it be printed in the RECORD.

The column follows:

[From The Washington Times, Nov. 5, 1982]

REAGAN'S AVOIDING SOCIAL ISSUES COSTLY

(By John Lofton)

The fascinating thing about the New Right's criticism that the Republican Party would have probably done better in the midterm elections had the president been more strongly identified with the so-called social issues, is that this is a criticism with which Ronald Reagan would seem to be in agreement.

In his new biography, "Reagan," reporter Lou Cannon says that in 1977 Reagan knew that the GOP would never become a majority unless it shed what he called the party's "country club-big business image." The conventional wisdom among Republicans at that time, Cannon writes, was that the way to attract working men and their families was on the basis of what Reagan termed the "so-called social issues—law and order, abortion, busing, quota systems."

In their book, "The Reagan Revolution," Reagan—speaking about the 1980 elections—told columnists Rowland Evans and Robert Noak that he was sure the Moral Majority was helpful in his campaign, that the MM "is a reflection of another hunger on the part of the people, a hunger for a return to more spiritual things . . . a rebellion against the humanistic philosophy, materialism and so forth."

But, by 1982 the social issues had, for all practical purposes, been forgotten. They were given only lip service by the president and his men. And even this lip service came very late in the game. As Cannon notes: "It was (Ed) Meese—with enthusiastic support from (Jim) Baker and (Mike) Deaver—who kept the White House out of the morass of 'social issues' like abortion while the administration concentrated on its economic program."

But is Cannon's characterization correct? Are the social issues a "morass" to be avoided? I think not and believe there is persuasive evidence to indicate otherwise:

First, there is the electoral clout alluded to by Reagan. An ABC-Lou Harris survey released Nov. 11, 1980, credited the "moral majority TV preachers" with being largely responsible for turning around the white Baptist vote in the South for Reagan and thus providing him a sizable portion of his margin of victory.

An October 4, 1980 New York Times analysis on the impact of the social issues declared that they have the power to affect voter choices in all parts of the nation . . ." The Times said Reagan was helped as much as he was hurt by these issues because "social conservatives seem more likely to cast ballots solely on these issues than do many of those who take a liberal stance on these same issues." Reagan's support for a constitutional ban on abortion, said the Times, won sympathy for him "from voters whose fingers have long been allergic to the Republican lever."

A national AP/NBC poll taken in mid-September of 1981 showed that 18 percent of the American people thought the president's "most important duty"—above either the economy or foreign affairs—was dealing with the social issues.

A 1981 national survey on U.S. values, taken for the Connecticut Mutual Life Insurance Co. showed that 40 million to 45 million religious Americans rate the social-moral issues on a par with the economy and foreign policy

Finally, and ironically, the president's pollster, Richard Wirthlin, is quoted in the August/September issue of Public Opinion magazine as saying "The social issues that tap the Moral Majority support could be decisive in bringing many Republicans into the Congress who might otherwise not get there." And in the Wall Street Journal of Sept. 29, 1982, an anonymous presidential adviser said the social issues are "good, strong issues and we've been setting them up well."

But, herein lies the problem: The administration did *not* set the social issues up well, not at all. In fact, until just a few weeks ago these issues were avoided like the plague. And, when addressed, they were, for the most part, given only rhetorical support. Instead of embracing simultaneously during the past 21 months the social issues *and* the economic issue, the president put all his eggs in the economy basket. This was the morass in which the administration became mired. And this was a huge mistake. As the brilliant professor of jurisprudence Hadley Arkes has observed:

"Few people identify Lincoln today as the man who presided over the Legal Tender Act . . . "The record of his administration was marked by an achievement far more unequivocal than that. In the same way, the final judgment on the Reagan administration should not be left to the arts of accountants and econometricians debating the prosaic question of whether Ronald Reagan really did succeed in cutting back the size of the government to the level that was indeed the 'right' one for the economy. Mindless reckonings of that kind could be displaced in the public judgment. Far better for Mr. Reagan to attempt to ensure that he is judged in the light of achievements far more precise and memorable."

Indeed. And this means significant achievements in the social-issue arena, which, alas, Reagan has not yet really entered in any meaningful way.●

U.S. POPULATION

● Mr. PACKWOOD. Mr. President, I wish to report that according to the latest U.S. Census Bureau approximations, the total population of the United States on November 1, 1982, was 232,306,018. The total for December 1, 1982, was 232,458,074. This represents an increase of 152,056 in 1 short month. Since this time last year, our population has grown by an additional 2,131,427.

Between November 1 and December 1, 1982, we added enough people to our population to more than fill the city of Little Rock, Ark. Over the past year, our population has increased enough to fill the city of Nashville, Tenn. more than five times.●

ACTION ON NATURAL GAS PRICES

● Mr. EAGLETON, Mr. President, I applaud the leadership of the Energy and Natural Resources Committee for scheduling a hearing Monday next to air concerns about the natural gas market. This is certainly an issue that is foremost in the minds of millions of Americans and one which the Senate must address immediately.

Mr. President, in response to gas consumers' cry for rate relief, last Thursday I introduced legislation to place a 2-year freeze on runaway natural gas prices. This measure will give consumers some price protection while Congress struggles to solve the many and complex gas market problems that plague both consumers and producers.

Today, I wish to briefly discuss the second provision in my bill. This profits provision directs the Comptroller General to conduct a study of the profitability of natural gas production and report to Congress by June of 1983. The bill also gives the Comptroller General the authority to gain access to such books and records that are necessary for the study.

Mr. President, although data on the profits made by gas producers would seem to be an essential element to any discussion of the state of the gas market, such data have been notably absent in congressional hearings and public forums on the subject.

A study performed for me by the Congressional Research Service (CRS) offers an explanation for the painful gas profits silence; gas profits information simply does not exist in material published by oil companies, by Gov-

ernment agencies, or by private financial services. However, it concludes that this type of data does exist in internal company records and that Congress will need to access this data in order to estimate profit margin and investment return.

Mr. President, I urge my colleagues to review the CRS study, (which I submit for the RECORD) and contemplate the many benefits that Congress would gain from an unbiased and thorough examination of gas company profits.

Mr. President, if, as my bill presumes, Congress is to take a good hard look at gas pricing and the gas market, it must be armed with good hard information on the producing end of the gas flow.

The study follows:

CONGRESSIONAL RESEARCH SERVICE,
THE LIBRARY OF CONGRESS,
Washington, D.C., December 1, 1982.

To: Honorable Thomas Eagleton, Attention: Kirk Robertson.

From: Sylvia Morrison, Analyst in Industry Economics, Economics Division.

Subject: Information about oil company profit margins and return on investment in natural gas production.

This responds to your inquiry about profit margins and return on investment in the production of natural gas.

As you may know, three methods of assessing profitability are generally used by financial analysts. The first is net profit which is profit remaining after taxes, expenses, and depreciation are deducted from revenues. The second is return on assets, which is the ratio of net profit to total assets. The third is return on investment, which is the ratio of net profit to average investment.

A search for information which would allow us to calculate these items for natural gas sales by major oil companies failed to turn up any body of data published by oil companies, by government agencies, or by private financial services which separates investments or expenses in gas exploration and production from investments or expenses in oil exploration and production. For example, a review of the 10K Forms for a half-dozen major companies turned up no data on expenses for gas production,[1] although some of the company reports do include data on how much gas was produced and how much revenue gas sales generated. Standard and Poor's Industry Analysis for Oil and Gas also lacked data for gas alone.

In reply to a request for this information, the American Petroleum Institute (API) sent its most recent update of its annual report, "Market Shares Individual Company Data for the U.S. Energy Markets: 1950-1980." This report contains data on volume of gas production by company as well as data on proved reserves of natural gas by company. However, the report does not contain data which would answer your questions about profit margins in gas production or return on investment.

In addition to carrying out a document search, CRS also made telephone calls to the Federal Energy Regulatory Commission, The American Gas Association and the Department of Energy's Economics and Statistics Division. A spokesman for the Producer Rates Office of FERC said that the oil companies (the primary source of information for all Federal agencies about the companies) never submit gas and oil expense figures separately. The American Gas Association confirmed this statement as did Dr. Arthur Andersen, Director of the Economics and Statistics Division of the DOE and manager of the DOE's Financial Reporting System confirmed the FERC statement. Dr. Andersen added that the companies say that since gas and oil deposits occur together, and since the companies do not know until they have drilled a field which, or how much of each product they will find, they cannot disaggregate the expenses of retrieving the separate products. However, once drilling has begun, the companies are able to estimate the nature and size of the deposits at a given site. These estimates form the data for the tables published by the American Petroleum Institute titled "Proven U.S. Natural Gas Reserves."

HOW NATURAL GAS PRICES ARE SET

Under the terms of the Natural Gas Policy Act (NGPA), effective November 9, 1978, ceiling prices for various categories of gas were set at rates prevailing in April, 1977. Companies are permitted under the act to increase this ceiling rate monthly by an inflation factor and, in some cases, an additional growth factor. The growth factor was created both to establish parity between projected oil and gas prices and to cover the additional expense as companies drilled for gas in more difficult locations, using more complex systems than they have previously used to get at the gas which has been easiest to recover.[2]

Since the companies are presumably aware in advance how much their gas will likely be worth in a given month (under the NGPA regulations), it would seem probable that they set a ceiling on the amount of expense they can economically undertake to retrieve gas. Therefore, it is likely that some form of these data exist in internal company records; the Congress would have to obtain these data in order to estimate profit margin and investment return.●

[1] Since calculation of all three measures of profitability require expense information, the lack of expense information for natural gas production prevents any calculation of net profit, return on assets or return on investment from gas sales.

[2] Subsequently, categories of "high cost" gas were totally deregulated.

INFRASTRUCTURE REPAIR SHOULD INCLUDE DAMS

Mr. GOLDWATER. Mr. President, I am pleased to submit for the RECORD the following editorial and accompanying letter to the editor which appeared last week in the Phoenix Gazette. The editorial addresses itself to a critical matter now pending in the Senate—the Reclamation Safety of Dams Act of 1982, S. 956. The related letter, authored by two of my colleagues in Congress who represent Arizona in the House of Representatives, further illustrates the need for immediate passage of this bill.

As Representative RHODES and Representative UDALL point out, infrastructure preservation is needed on a national basis, but should be undertaken with a sensitivity toward regional differences. While bridges, for instance, may be crumbling in the East, both bridges and dams are decaying in the West. Both are equally deserving of Federal aid and attention.

Congress is now focusing on legislative remedies to restore the Nation's physical assets. In so doing, I believe we should give serious consideration to the unique needs of the West. Enacting the reclamation dam safety bill during this lameduck session would be a step in that direction.

The material follows:

[From the Phoenix Gazette, Dec. 1, 1982]

A MOST WORTHY MEASURE

In a joint statement in the adjoining columns, the senior members of Arizona's congressional delegation make a persuasive case for immediate action to ensure the safety of federally constructed dams.

Reps. Udall, chairman of the Interior Committee, and Rhodes, winding up a distinguished career in the House, represent opposing parties. But just as there is bipartisan support for a program to rebuild the nation's roads and bridges, Democrat Udall and Republican Rhodes demonstrate that dam safety rises above partisanship.

Actually, the disagreement, if there is any, is between the two legislative bodies. The House of Representatives passed the legislation last spring. To avoid a costly delay, it will be necessary for the Senate to act during the lame duck session now in progress.

The federal government has a clear legal and moral obligation to finance modifications to Roosevelt and Stewart Mountain dams, as well as other Reclamation dams, that it is requiring for safety's sake. There is a question of cost-sharing for modifications beyond the federal obligation. But that should not be allowed to drown the whole legislation, so important to the lives and fortunes of millions of Americans.

Moreover, dam construction/rehabilitation is important in economic terms. The $119 million presently estimated for work at Roosevelt translates into nearly 4,000 jobs. The $550 million authorized in the Senate bill could mean more than 17,000 jobs.

Any way you look at it, the Dam Safety Bill is a measure worthy of quick adoption.

DAM SAFETY IS A NATIONAL CONCERN

Editor:

As we approach the last weeks of the 97th Congress, Eastern and Midwestern senators are asking their Western colleagues to support federal legislation that provides funds to repair and rebuild roads and bridges in their home states.

They cite alarming safety statistics and point out the potential disasters that may result from unsafe bridges. They also stress that the federal repair program would provide a significant number of jobs and would help put America back to work.

At the same time, many of those same senators from east of the Mississippi seem to be unconcerned about moving legislation that would repair 35 unsafe dams located in Western states.

S. 956, a bill authorizing federal funds to repair dams constructed by the federal government, has been stalled in the Senate for months. The dams, which have been identified by the United States as needing safety repairs, are located upstream from some five million people in the West.

It is true that we in the West receive most of the direct benefits of those dams. Most of the direct benefits of the bridges across the Ohio and Hudson rivers, to name just two, accrue to residents of those areas. It is important to remember, however, that Western dams and Eastern roads are both important parts of the national infrastructure. The indirect benefits to secure urban areas, improved transportation, and navigation flow far beyond the locality to the region and to the nation as a whole.

Similarly, if a dam upstream from a city like Phoenix were to fail, the damage inflicted would extend much further than the city and the state of Arizona. The impact of such a disaster would be felt in commercial centers all across the country. And the federal government, as owner of the dam, would be subject to potentially astronomical claims.

We should encourage our Western senators to support a road and bridge repair bill. In turn, senators from the East and Midwest should recognize the national interest in making existing dams safe again.

Passage of S. 956, the Reclamation Safety of Dams Act, in the current session of Congress can save months, even years of valuable time. We should act now to repair dams that have been determined to be unsafe. The country needs to avoid another tragedy like the collapse of the Teton Dam.

Rep. JOHN J. RHODES,
Rep. MORRIS K. UDALL.●

SIXTH ANNIVERSARY OF THE FOUNDING OF THE LITHUANIAN HELSINKI GROUP

● Mr. DOLE. Mr. President, the announcement of June 9, 1982, that the Moscow Helsinki Group had been forced to disband under pressure by the Soviet Government once more turned the world's attention to the fate of those brave Soviet citizens who dared challenge the Kremlin to live up to the Helsinki accords, signed by representatives of the Soviet Government in 1975. Few in number, but significant beyond measure, these courageous individuals have been treated like criminals for having the temerity, by KGB standards, to collect and publicize Soviet violations of the human rights provisions of the Helsinki accords.

November 25, 1982, marked the sixth anniversary of the founding of one of these Soviet Helsinki monitoring groups, "The Lithuanian Public Group To Promote Observance of the Helsinki Accords." In its founding statement, five Lithuanian human rights activists declared that:

> The aim of the group is to promote the observation and fulfillment of the humanitarian articles of the final act of the conference on security and cooperation in Europe.

The Lithuanian Helsinki Group also noted that the status of Lithuania as a Soviet Socialist Republic was a result of the Soviet occupation of that formerly free nation on June 15, 1940.

The Soviet Government was swift to respond to this independent initiative in the same way that it responded, for instance, to the recent independent peace movement in Moscow * * * with prison sentences, psychiatric abuse, and exile. Five members of the Lithuanian Helsinki Group are presently being held in labor camps or prison, one is incarcerated in a special psychiatric hospital run by the MVD, one was forced to emigrate, and two are at liberty, having been harassed by the KGB to a state of virtual inactivity. I might also add that two of these imprisoned Helsinki monitors from Lithuania also hold American citizenship.

WHO WILL RID ME OF THIS TROUBLESOME PRIEST?

Father Bronius Laurinavicius, a human rights activist and Helsinki Group member, was struck and killed by a truck in Vilnius, capital of Lithuania, in November 1981. At least one witness stated that Father Laurinavicius had been thrown into the path of the vehicle by four men who accosted him on the street. Perhaps it is only a coincidence, but Father Laurinavicius had been the subject of an accusatory article in the official government newspaper a few days prior to his death.

I would like to briefly quote from a letter written by Dr. Algirdas Statkevicius, a Lithuanian Helsinki Group member who was arrested in February 1981 and is currently being held in the special psychiatric hospital in Chernykhovsk. Told that his Helsinki Group activities were criminal acts according to Soviet law, Dr. Statkevicius wrote:

> I belong to a criminal organization that was created to support the Helsinki agreement . . . this seems unbelievable! Can the defense of human rights ever be a criminal matter anywhere? But they wanted to do away with a defender of human rights, and so they had to find some justification for doing it.

Mr. President, at a recent session of the Madrid Review Conference on the Helsinki accords, I reminded the Soviet Union that Americans find it difficult to reconcile the harsh realities of Soviet repression with the noble ideals of the Helsinki agreements. The treatment accorded the members of the Lithuanian Helsinki Monitors is just one example of these harsh realities. I call upon the Soviet Union to honor both the letter and the spirit of the Helsinki accords, as a matter of justice for the Lithuanian people, and as a matter of vital importance to maintaining the dialog on security and cooperation in Europe. Security is of the utmost concern to the signatory nations of the Helsinki accords, particularly in these dangerous times in which we live. But I would remind the Soviet Union that there can be no real security without the balance of cooperation pledged in the Helsinki Final Act.●

CLINCH RIVER: DOE'S LATEST $3.3 BILLION ERROR

● Mr. HUMPHREY. Mr. President, last Tuesday I entered material into the RECORD detailing how misleading the Department of Energy's recent estimates were of how much money the Clinch River breeder reactor would make once it was built. The Department of Energy claims that at least $8 to $20 billion in net operating revenues will be made from Clinch River electricity sales.

Last Wednesday, though, the General Accounting Office held a special briefing on its latest cost estimate findings and explained that once Clinch River is completed its operation may cost the taxpayers an additional $3.3 billion.

This information soon made its way to the press and the press, in turn, started to ask questions. Why were DOE's estimates so far off from those of the GAO? What was the basis for DOE's estimates? Did they have the calculations to back their estimates up?

The answers from DOE were not encouraging. There were no documents backing the estimates. Nor should this be surprising, according to DOE—a lot of administration breeder calculations are, "a back of an envelope type of thing." If this is so, how can DOE argue there is $8 billion to be made? Answer: "It was just to give people a perspective on the issue."

This makes for sad reading. Indeed, if this is the way DOE does business, we all have reason to worry.

National Public Radio has done us all a public service in supplying us with a transcript of its report on Clinch River aired last Thursday. Also we have firm information on the GAO briefing courtsey of a Dear Colleague letter produced on the House side. I ask that the complete text of both documents be entered into the RECORD.

The material follows:

NATIONAL PUBLIC RADIO BROADCAST "ALL THINGS CONSIDERED" DECEMBER 2, 1982

(By Dan Zwerdling)

The controversial Clinch River Breeder Reactor could be in trouble again. President Reagan says the proposed experimental reactor is crucial for the future of nuclear power. Opponents call the breeder a technological turkey and a waste of money. Just before the election, the Senate saved the breeder from defeat, but by only one vote. Now a new showdown is coming up and PR's Daniel Zwerdling has more.

The Administration has been persuading many legislators to back the breeder by insisting that the reactor will make money. Energy Department officials have told the Congress that the breeder would earn between 8 and 20 billion dollars profit during the life of the reactor. And during the recent Senate debate on the breeder, that statement that the breeder will pay its own way was crucial, and the Administration has been making the same argument in recent

weeks as the Congress gets ready for a new showdown on the breeder. But a confidential draft study by the GAO staff concludes the opposite. Far from making money the GAO report says the Clinch River Breeder would lose money. It would lose more than 3 billion dollars over the life of the plant. The way GAO researchers see it the Energy Department's basic assumptions about the breeder are wrong. So the Administration says the breeder will cost 5 billion dollars to operate, but the GAO says try 50% more. The Administration says that income from the breeder will top at least 16 billion dollars maybe twice that, but the GAO staff says try 30% less. The result according to GAO researchers, the Clinch River Breeder could cost billions of dollars and the taxpayers would have to make up the losses. Energy Department officials say they haven't seen the draft report and they stress that it's not yet final.

John Longenecker manages the Breeder program; "We have made what we consider to be realistic and very well founded assumptions on the cost."

In order to figure out why the estimates are so different, GAO investigators asked the Energy Department to give them all the documents the Administration used to justify its figures. But according to GAO's staff, the Energy Department has not turned over all the documents. Sources close to the investigation say that some of them were accidently thrown out. Gordon Chipman, Deputy Assistant Secretary told me in a phone call that there is nothing surprising about that. He said a lot of the Administration's breeder calculations have been, in his words, "a back of an envelope type of thing". In that case I asked how can the Department really claim that the breeder will make 8 billion dollars? That figure Chipman answered is just a rough figure, designed "just to give people a perspective on the issue". The House and Senate will vote on appropriations for the breeder before Christmas. I am Daniel Zwerdling in Washington.

HOUSE OF REPRESENTATIVES,
Washington, D.C., December 3, 1982.

CLINCH RIVER BREEDER REACTOR PRICE TAG JUMPS TO $11 BILLION

DEAR COLLEAGUE: Recently, the supporters of the Clinch River Breeder Reactor Project (CRBR) have asserted that revenues from the operation of the CRBR will provide a net return of $8.2 to $20.7 billion from the project. This has led some CRBR supporters to claim that the project will return many times its original investment.

The General Accounting Office (GAO) requested the Department of Energy's (DOE) documents that justified these curious estimates. After a period which the GAO describes as a "contemptuous delay" of 4 to 5 weeks—DOE officials alleged they had inadvertently destroyed the requested documents.

However, the GAO has just performed its own analysis of projected CRBR revenues and expenses. It shows, convincingly, that the claim is not only complete nonsense, but also that if the CRBR project is completed, its operation may cost the taxpayers as much as an additional $3.3 billion. These operational costs are in addition to CRBR's already massive construction cost, which GAO estimated earlier this year could exceed $8 billion.

Construction and operation of the CRBR now threaten to cost more than $11 billion, and this figure could grow even more.

The basis for the GAO's estimate is as follows:

The Department of Energy has overestimated by 8.5 million megawatt hours the amount of electricity the CRBR will generate. To achieve the DOE's claim, the CRBR must maintain a capacity factor of 80 percent for more than 10 years—something neither the French Phenix breeder nor conventional nuclear reactors have done.

The GAO used a more realistic average 63 percent capacity factor, a figure which is based on the operating experience of the Tennessee Valley Authority plants and is consistent with overall experience in the United States. However, it must be remembered that the CRBR is an experimental design and cannot be expected to operate as efficiently as a conventional nuclear powerplant.

The DOE estimates that it will be able to sell the reactor's power for much more than TVA estimates it will pay. Moreover, the DOE estimate is based on a method of electricity pricing which is at variance with the DOE-TVA contract.

The result is that the GAO believes the net 30 year revenues from CRBR power sales will be at least $3.8 billion, or 23 percent less than DOE claims.

The DOE has also seriously underestimated the 30 year cost of operating the reactor. The GAO estimates that operation and maintenance costs will exceed the DOE estimate by $2.4 billion. The GAO estimates an additional $5.4 billion in reprocessing and fuel related costs (even considering credits from plutonium produced) will be incurred—costs for which the DOE has not accounted.

Apart from these serious miscalculations of revenues and expenses, the DOE has seriously underestimated the project cost. The GAO now estimates the project's construction cost will exceed $8 billion—far more than the DOE estimate of $3.6 billion. The GAO also believes the CRBR will experience significant cost growth similar to that of other nuclear projects in recent years. Based on GAO's findings, we have concluded that the Congress will need to appropriate more than $1 billion in FY 1984—four times this year's proposed appropriation of $227 million—if the project is to remain on schedule and even greater costs are to be avoided.

In the face of Federal deficits which may reach $200 billion, then Congress simply must not continue to authorize a project for which there is no foreseeable need and the total cost of which could exceed $11 billion.

We urge you to vote for the Coughlin/Wolpe amendment to delete funds for the Clinch River Breeder Reactor when the Energy and Water Development Appropriations bill is voted on in the House of Representatives.

Sincerely,

John D. Dingell, Morris K. Udall, Fernand J. St Germain, Lawrence Coughlin, Vin Weber, John E. Porter, Hamilton Fish, Ed Bethune, Richard L. Ottinger, Jonathan B. Bingham, Silvio O. Conte, Howard Wolpe, Claudine Schneider, Judd Gregg, Bill Green, and George E. Brown, Jr.●

MEDICAL PROGRESS: MORE TECHNOLOGY OR LESS?

● Mr. QUAYLE. Mr. President, anyone reading the front page of last Friday's Washington Post, Indianapolis Star, or any other major newspaper, confronted the report of a tremendous medical advance: The installation of an artificial heart. The Washington Post readers also read about a second major advance: The Group Health Association's decision to begin using nurse midwives in routine obstetrical deliveries.

As the heart implant patient's day-to-day progress continues to capture worldwide attention, interest in this new procedure is already turning to long-range issues. The patient, a dentist from the State of Washington, was literally snatched from death as he lay dying at the University of Utah, so critically ill that his heart transplant had to be done days before it was originally scheduled. Dr. Barney Clark would not be alive today unless his heart had been replaced.

It is estimated that there could be up to 50,000 people annually who, like Dr. Clark, will die unless they can have an artificial heart. As Dr. Clark's metal and plastic heart continues to beat and he regains his strength, we should begin to address the difficult economic and ethical issues that are raised when we consider the implications of the widespread use of the artificial heart.

While producing no less than a miracle, the installation of an artificial heart is very costly. At the present time, the machinery alone costs $20,000, the hospitalization and surgery $15,000, a total of $50,000 per procedure. With 50,000 patients waiting in the wings, it is appropriate that we begin to ask how these costs will be met.

Kidney dialysis, a procedure covered by medicare and medicaid, was initially intended for a select few. The number of cases was seriously underestimated and the Government now pays $2 billion to dialyze 63,000 Americans a year.

The Health Care Financing Administration (HCFA) has also decided this year that it will no longer reimburse all human heart transplant procedures because of the tremendous cost potential for an operation that was chancy at best. To be done now, a patient must raise the funds from a non-Government source.

This raises the second set of questions regarding the artificial heart: those of an ethical nature. If the procedure is costly, will it be available only to the wealthy? The other dilemma is the quality-of-life debate and the problems that arise regarding a recipient's right to disconnect themselves from the machinery should they want to die.

All these future-oriented questions need to be raised and discussed when the 98th Congress convenes. The advances of medical technology—however beneficial to society—need to be viewed in many ways and from many

angles. The introduction of an artificial heart is welcome, not only for the genius it represents, but for the debate that is sure to result.

Turning from the story of the artificial heart to the report that GHA will be expanding their use of nurse midwives, one can not help but be struck by the contrast of moving from a highly technical health delivery world into a less mechanized one.

Nurse midwives have demonstrated, without a doubt, their ability to perform high-quality obstetrical care at a tremendous cost savings. GAO recommended earlier this year that the Department of Health and Human Services encourage greater use of nurse midwives, and assist them in eliminating the barriers that exist toward their practice. Births attended by nurse midwives use much less technology with the same favorable results.

The Omnibus Reconciliation Act of 1980 provides for mandatory medicaid payments for nurse midwife services to catagorically needy patients. The Department of Health and Human Services has estimated that when the regulations take effect later this year. The result in savings in Federal dollars will range from $2.2 to $2.8 billion in fiscal year 1983.

Not only does the expanded use of nurse midwives result in substantial savings, but more importantly, they are well received by patients, who actually seem to prefer delivering their babies in the least mechanized setting possible.

Two new moves in the health care field, both wondrous in their own right, both worth a second look and our continued attention next year.●

HEROIC ATF SPECIAL AGENTS

● Mr. ABDNOR. Mr. President, I was shocked and saddened to learn of the tragic death of special agent Ariel Rios, and of the wounding of special agent Alexander D'Atri during their participation in an undercover operation in Miami, Fla.

Their heroism and selfless dedication to duty are the strongest kind of evidence of the committment and professionalism of the ATF special agents.

Mr. President, being a law enforcement officer is a lonely and dangerous job. Far too often the work of our police forces go unnoticed and unappreciated. As chairman of the Treasury Appropriations Subcommittee, which funds and oversees the Bureau of Alcohol, Tobacco, and Firearms, I want every Treasury law enforcement agent to know of my complete support and gratitude for the hazardous services they perform in the war on crime.

The families, friends, and colleagues of agents Rios and D'Atri have my deepest and most profound sympathy.●

CATHY BURKE—IRISH AMERICAN WOMAN OF THE YEAR

● Mr. BRADLEY. Mr. President, with great pride and pleasure I now take this opportunity to congratulate Ms. Cathy Burke, a resident of New Jersey, who was recently chosen the Irish American Woman of the Year by the Independent American Irish Society of America. Ms. Burke was chosen for this honor because of her numerous humanitarian services to her community in church, cultural and social areas. She has served for two terms as president of the local parent-teachers' association and she has been a major fundraiser for the American Heart Fund, the Cancer Fund, the Community Drive, and the March of Dimes. In addition, she has been active in her local church, the St. Nicholas of Tolentine Church in Atlantic City, N.J.

I can think of no better recipient of the Irish American Woman of the Year honor than Ms. Burke who exemplifies the best of American voluntarism. The French critic and journalist, Alexis de Toqueville, in his book "Democracy in America," observed this same spirit of voluntarism in our Founding Fathers. De Toqueville wrote:

> Everything is in motion around you; here the people of one quarter of a town are met to decide upon the building of a church; there the election of a representative is going on; a little farther, the delegates of a district are hastening to the town in order to consult upon some local improvements; in another place, the laborers of a village quit their plows to deliberate upon the project of a road or a public school.

As long as this Nation has citizens like Cathy Burke who give themselves for their community, I am sure that the dream of our Founding Fathers will continue and thrive.●

BUDGET CUTS FOR PUBLIC HEALTH SERVICE

● Mr. BRADLEY. Mr. President, on December 1, 1982, the Washington Post published a most disturbing set of budget cuts projected for the U.S. Public Health Service. Mr. Stockman has proposed a $500 million reduction in the fiscal 1984 budget, a 7-percent decrease from fiscal 1983. Coupled with a 5- to 6-percent inflation rate, the overall reduction in the budget amounts to a 12- or 13-percent shortfall. Having already been subjected to 2 years of belt tightening the human service programs of the Public Health Service are once again being pared back, this time with a more selective scalpel which will perhaps mortally wound some of the most successful and cost-effective Federal programs in health. Although all programs will be affected by the cuts, the Center for Disease Control and the National Health Service Corps have been singled out for the most severe fiscal maltreatment.

Let me comment on what these cuts will mean for the health of our Nation.

The Center for Disease Control is charged with protecting the health of the Nation by providing leadership and direction in the prevention and control of diseases and other preventable conditions. It will experience, if these cuts are implemented, a budget reduction of more than a third—from $318 to $215 million for fiscal 1984. Personnel will be reduced by 20 percent. This agency serves as the major link to all State health departments and implements the major elements of our national public health policy. Besides providing basic laboratory support in evaluating communicable disease outbreaks and reference laboratory services for State health departments, the center through its epidemiology program assists States, the military, and foreign governments in investigating and controlling disease outbreaks. Its Center for Environmental Health and National Institute for Occupational Health evaluate and protect our workplace environments. Its research facility determines toxicity levels of hazardous chemicals and, in conjunction with the Environmental Protection Agency, helps in setting safe working standards. No other government agency has this responsibility.

At a time when disease prevention and health promotion measures have begun to bear fruit in terms of enhanced quality and length of life, the CDC's centers of Health Promotion and Prevention Services will have to be curtailed. Programs to promote improved nutrition, exercise, hypertension detection and smoking cessation cannot be maintained without funding.

Through its international health program the CDC provides assistance to underdeveloped nations particularly in the Southern Hemisphere. When our less fortunate Latin and South American neighbors look to us for guidance and assistance in eradicating major communicable and infectious diseases, what will we tell them?

The budget cuts proposed by OMB for the Center for Disease Control would jeopardize that agency's basic mission and impair its ability to protect our Nation's health.

The National Health Service Corps has been slated for a one-third reduction in personnel and a budget reduction for $93 to $75 million. This physician resource specifically provides medical professionals in medically underserviced areas throughout our Nation. Although there are some preliminary indications that this program

has improved care in underserved efforts in previous budget cuts have already taken their toll. And the new budget cuts are justified by assuming that fewer unserved areas will exist next year, an unlikely occurence. What remains are hard core, economically destitute, and remote areas. Cuts for the National Health Services Corps will directly reduce our ability to provide minimal and basic primary care to our Nation's most underserviced populations.

Mr. Stockman proposes to cap the budgets of other Public Health Service agencies at present dollar amounts. This includes the Food and Drug Administration and the National Institutes of Health. Inflation alone will effect a 6-percent reduction in operations and personnel. These cuts though modest came on the heels of previous budget reductions and strike at the heart of medical progress, our ability to understand disease processes and to treat those diseases more effectively. Our medical advances have increased life expectancy to 70 years for men and 77 for women. Heart disease as a cause of death has plummented 32 percent since 1950. Infant mortality rates have continued to decline to less than 14.4 per 1,000 live births. Vaccine discoveries and technological improvements have almost banished measles and rubella from the American scene. A recently introduced hepatitis vaccine promises to do the same for that disorder. A good deal of this progress can be directly linked to our Federal research enterprise, the National Institute of Health. Our continued progress is directly linked to ability to attract, train, and to retain outstanding young scientists. Declining budgets make it ever more difficult to maintain our basic research enterprise. Once interrupted these human skills and advance technology can be restored at only great expense and over a long period of time.

The Food and Drug Administration in its approval and monitoring of new drugs, food additive, cosmetics, and devices has provided us that ever important seal of safety and effectiveness for pharmaceutical products. Witness the rapid and decisive action taken during the most recent Tylenol tradegy. The cuts proposed by OMB will surely reduce our ability to protect our Nation's citizens from similar tragedies.

Mr. President, I categorically oppose the Public Health Service cuts proposed by OMB. We are flirting with disaster by dismantling the research, human services, and public health initiatives for the sole purpose of providing antitank missiles, another cruiser or a B-1 bomber. The good health of our society ought to be at least as important as its destruction.●

THE PROPOSED GAS TAX

● Mr. PRESSLER. Mr. President, while I support the intent of the proposals to revitalize our Nation's highway systems, I have become increasingly concerned over the haste at which the Congress is being asked to consider this wide-reaching legislation.

Most Americans, and indeed many Members of Congress, preceive this issue as a simple bill which will raise the gasoline tax. In reality, this legislation contains extremely complicated reauthorization legislation for the Federal-aid highway program, the urban mass transit program and changes in Federal standards governing permissible vehicle weights and lengths for use on our Nation's roads.

I have met in the last few days with many of the truckers from my home State of South Dakota and have heard from scores more. There is increasing alarm that in the hurry to pass this legislation, revenue and other provisions relating to the trucking industry are not being adequately consedered.

Our Nation's truckers, particularly in my home State, provide valuable services on which all Americans depend for receiving food and other goods. The passage of legislation which will harm the trucking industry will not only put already hard-pressed truckers out of work, but will also adversely affect American consumers.

There are several areas of the bill which I fear will have this negative effect. I intend to fight on the Senate floor to insure that a death blow is not dealt to the trucking industry. I will not support a bill which will raise revenues in adddition to fuel taxes by placing an inordinate burden on American truckers.

In addition, I plan to introduce an amendment which will address this problem. The amendment would provide flexibility for States, enhance interstate commerce, keep consumer prices down, and in the long run will be beneficial to employment.●

IN RECOGNITION OF PUBLIC EMPLOYEES

● Mr. BRADLEY. Mr. President, I am pleased to join my colleagues as a cosponsor of Senate Joint Resolution 244, a joint resolution designating January 17, 1983, as "Public Employees Appreciation Day."

The designation of such a day in recognition of the contributions of public employees is long overdue. Too often in our attempts to control government spending we lose sight of the tremendously important services performed by public employees—work performed at the local, State, and National level.

In 5 years this Nation will commemorate the 200th anniversary of the writing of the Constitution of the United States. While the Founding Fathers provided the genius behind that document, it is the public employees of this country who have had the actual responsibility to carry out the provisions of that Federal charter. Public employees work to "establish justice"—from the local policeman who places his life on the line for our security to the Federal officials who fight organized crime. Public employees work to "insure domestic tranquility"—by promoting decent housing, sufficient food, proper medical care, and a clean environment for all Americans. Public employees "provide for the common defense" by serving their country in the Army, the Navy, the Air Force, and the Marines. Public employees "promote the general welfare" by educating our children and maintaining the many public goods which are necessary for a growing economy.

On Public Employees Appreciation Day we must not forget these important contributions made by government employees which keep our Federal constitution a living document and keep this "American experiment in democracy" a thriving institution.●

ORDER OF BUSINESS

Mr. BAKER. Madam President, I conferred with the minority leader before and I advised him that I did not plan to transact any further business today. He indicated to me there was no requirement then for him to return to the floor prior to my making the motion which I will now make.

RECESS UNTIL 11 A.M. TOMORROW

Mr. BAKER. I see no Senator arising and seeking recognition. I, therefore, move, in accordance with the order previously entered, that the Senate stand in recess until the hour of 11 a.m. tomorrow.

The motion was agreed to; and at 6:32 p.m. the Senate recessed until Tuesday, December 7, 1982 at 11 a.m.

NOMINATIONS

Executive nominations received by the Senate December 6, 1982:

DEPARTMENT OF STATE

Paul D. Wolfowitz, of the District of Columbia, to be an Assistant Secretary of State, vice John H. Holdridge.

THE JUDICIARY

James F. Merow, of Virginia, to be a judge of the U.S. Claims Court for a term of 15 years (reappointment).

CIVIL AERONAUTICS BOARD

Diane Kay Morales, of Texas, to be a Member of the Civil Aeronautics Board for the term of 6 years expiring December 31, 1988, vice George A. Dalley, term expiring.

IN THE AIR FORCE

The following-named officers for appointment in the U.S. Air Force under the provisions of chapter 36, title 10 of the United States Code:

To be regular major general

Lt. Gen. James E. Dalton, [redacted] FR, Regular Air Force.

Lt. Gen. Robert T. Herres, [redacted] FR, Regular Air Force.

Lt. Gen. John S. Pustay [redacted] FR, Regular Air Force.

IN THE ARMY

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be general

Lt. Gen. William R. Richardson, [redacted] U.S. Army.

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Fred K. Mahaffey, [redacted], U.S. Army.

The following-named officer for appointment to the position indicated under the provisions of title 10, United States Code, section 711:

To be senior Army member of the Military Staff Committee of the United Nations

Maj. Gen. Fred K. Mahaffey, [redacted], U.S. Army.

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President in grade as follows:

To be lieutenant general

Maj. Gen. Bennett L. Lewis, [redacted], U.S. Army.

The following-named Army Medical Department officers for appointment in the U.S. Army to the grade indicated under the provisions of title 10, United States Code, sections 611(a) and 624:

To be permanent brigadier general

Col. John E. Major, [redacted], Medical Corps, U.S. Army.

Col. Billy Johnson, [redacted] Dental Corps, U.S. Army.

HOUSE OF REPRESENTATIVES—*Monday, December 6, 1982*

The House met at 2 p.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Oh God, make us aware of the needs of others that we will have grateful hearts and be of a generous spirit. In times of want and uncertainty may we be specially aware of how we have been blessed and may that awareness cause us to use our gifts in ways that ease human suffering and give hope for tomorrow. Make us cheerful givers and wise stewards of our resources that all people will share in the bounty of Your creation and know Your peace that passes all human understanding. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H.R. 4364. An act to declare that the United States holds in trust for the Pascua Yaqui Tribe of Arizona certain land in Pima County, Ariz.; and

H.R. 7093. An act to amend the Internal Revenue Code of 1954 to reduce the rate of certain taxes paid to the Virgin Islands on Virgin Islands source income.

The message also announced that the Senate had passed bills, joint resolutions, and a concurrent resolution of the following titles, in which the concurrence of the House is requested:

S. 1340. An act to provide for the use and distribution of Clallam judgment funds in docket numbered 134 before the Indian Claims Commission, and for other purposes;

S. 1735. An act to provide for the use and distribution of funds awarded the Pembina Chippewa Indians in dockets numbered 113, 191, 221, and 246 of the Court of Claims;

S.J. Res. 258. Joint resolution to authorize and request the President to designate the month of December 1982 as "National Closed-Captioned Television Month";

S.J. Res. 264. Joint resolution to designate the week of March 13, 1983, through March 19, 1983, as "National Children and Television Week"; and

S. Con. Res. 130. Concurrent resolution expressing the sense of the Congress that the advancement of science and technology in the communications and electronics industry is vital to the needs of the United States.

CONSENT CALENDAR

The SPEAKER. This is the day for the call of the Consent Calendar. The Clerk will call the first bill on the Consent Calendar.

DIRECTING SECRETARY OF INTERIOR TO CONVEY CERTAIN REAL PROPERTY TO PERSHING COUNTY WATER CONSERVATION DISTRICT

The Clerk called the bill (H.R. 5652) to authorize and direct the Secretary of the Interior to convey certain real property to the Pershing County Water Conservation District.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. WALKER. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

COW CREEK BAND OF UMPQUA TRIBE OF INDIANS RECOGNITION ACT

The Clerk called the bill (H.R. 6588) to provide for Federal recognition of the Cow Creek Band of Umpqua Tribe of Indians, to institute for such tribe those Federal services provided to Indians who are recognized by the Federal Government and who receive such services because of the Federal trust responsibility, and for other purposes.

There being no objection, the Clerk read the bill, as follows:

H.R. 6588

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Cow Creek Band of Umpqua Tribe of Indians Recognition Act".

DEFINITIONS

SEC. 2. For the purposes of this Act—

(1) the term "tribe" means the Cow Creek Band of Umpqua Tribe of Oregon; and

(2) the term "member", when used with respect to the tribe, means a person enrolled on the membership roll of the tribe in accordance with section 5 of this Act.

EXTENSION OF FEDERAL RECOGNITION, RIGHTS, AND PRIVILEGES

SEC. 3. (a) FEDERAL RECOGNITION.—Notwithstanding any provision of the Act approved August 13, 1954 (25 U.S.C. 691 et seq.), or any other law, Federal recognition is extended to the Cow Creek Band of Umpqua Tribe of Oregon. Except as otherwise provided in this Act, all laws and regulations of the United States of general application to Indians or nations, tribes, or bands of Indians which are not inconsistent with any specific provision of this Act shall be applicable to the tribe.

(b) RESTORATION OF RIGHTS AND PRIVILEGES.—All rights and privileges of the tribe and members of the tribe under any Federal treaty, Executive order, agreement, or statute, or under any other Federal authority, which may have diminished or lost under the Act approved August 13, 1954 (25 U.S.C. 691 et seq.), are restored, and the provisions of such Act shall be inapplicable to the tribe and to members of the tribe after the date of enactment of this Act.

(c) FEDERAL SERVICES AND BENEFITS.—Notwithstanding any other provision of law, the tribe and members of the tribe shall be eligible for all Federal services and benefits furnished to federally recognized Indian tribes upon the date of enactment of this Act without regard to the existence of a reservation for the tribe or the residence of members of the tribe on a reservation.

(d) EFFECT ON PROPERTY RIGHTS AND OTHER OBLIGATIONS.—Except as otherwise specifically provided in this Act, no provision contained in this Act shall alter any property right or obligation, any contractual right or obligation, or any obligation for taxes already levied.

ORGANIZATION OF TRIBE; CONSTITUTION AND BYLAWS

SEC. 4. The tribe may organize for its common welfare and adopt an appropriate instrument, in writing, to govern the affairs of the tribe when acting in its governmental capacity. The tribe shall file with the Secretary of the Interior a copy of its organic governing document and any amendments thereto.

MEMBERSHIP ROLLS

SEC. 5. (a) IN GENERAL.—Membership in the tribe shall consist of every individual—

(1) whose name appears on the tribal roll in effect on the date of enactment of this Act; or

(2) who is a descendant of any individual described in paragraph (1).

(b) LIMITATION.—Membership in the tribe pursuant to subsection (a) shall not entitle an individual, who is not otherwise entitled, to participate in any distribution of funds pursuant to a judgment under the Act approved May 26, 1980 (94 Stat. 372).

RULES

SEC. 6. The Secretary of the Interior may make such rules as are necessary to carry out the provisions of this Act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PROVIDING PURCHASE AND SALE OF LAND BY DEVILS LAKE SIOUX INDIAN TRIBE

The Clerk called the Senate bill (S. 503) to authorize the purchase, sale, and exchange of lands by the Devils Lake Sioux Tribe of the Devils Lake Sioux Reservation, N. Dak., and for other purposes.

There being no objection, the Clerk read the Senate bill, as follows:

S. 503

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. The Congress finds that—

(1) the Devils Lake Sioux Tribe, of the Devils Lake Sioux Reservation, North Dakota, is vigorously pursuing its goal of self-determination through development of manufacturing and farming enterprises; and

(2) the continued existence of the Devils Lake Sioux Reservation, North Dakota, as a permanent homeland of the Devils Lake Sioux Tribe and as a necessary foundation for continued self-determination requires that the Secretary of the Interior have authority to—

(A) consolidate and increase the trust land base in the reservation for the tribe and individual tribal members; and

(B) prevent further loss of trust land.

SEC. 2. (a) The Secretary of the Interior (hereinafter in this Act referred to as the "Secretary") is authorized to—

(1) purchase with any funds held by the Secretary in trust for the benefit of the Devils Lake Sioux Tribe or appropriated for the purpose, or acquire by gift, exchange, or relinquishment, any interest in land (or any improvements thereon) located within the boundaries of the Devils Lake Sioux Reservation for the benefit of the Devils Lake Sioux Tribe or individual members of such tribe;

(2) sell or approve sales of any interest in tribal trust or tribal restricted land (or any improvements thereon) located within the boundaries of the Devils Lake Sioux Reservation but only if additional tribal trust or tribal restricted land which is approximately equal in acreage or value to the interest sold is acquired by the Secretary at the time of such sale; and

(3) exchange any interest in tribal or individual trust land or tribal or individual restricted land (or any improvements thereon) for any land located within the Devils Lake Sioux Reservation but only if the values of the interests in land involved in such an exchange are equal or are equalized by the payment of money.

(b) Any purchase of Federal lands under subsection (a)(1) shall be made in accordance with the provisions of the Federal Land Policy and Management Act of 1976 (90 Stat. 2744).

SEC. 3. The Secretary shall accept any transfer of title from the Devils Lake Sioux Tribe, or from any individual member of such tribe, for any interest in land (or any improvements thereon) located within the boundaries of the Devils Lake Sioux Reservation, and shall take title to such property in the name of the United States in trust for the benefit of the Devils Lake Sioux Tribe, or for such individual member.

SEC. 4. Any acquisition, sale, or exchange of lands for the Devils Lake Sioux Tribe which is made under this Act shall be made only upon the request of the authorized governing body of the Devils Lake Sioux Tribe, subject to the limitations and procedures of the tribal constitution.

SEC. 5. Notwithstanding any other provision of applicable law, the title to any interest in land, or any improvements thereon, acquired by the Secretary under this Act shall be acquired in the name of the United States in trust for the benefit of the Devils Lake Sioux Tribe or an individual member of such tribe, as the case may be, and such property shall be held and treated in the same manner as other trust or restricted Indian lands are held and treated under Federal law.

SEC. 6. Money or amounts credited to the Devils Lake Sioux Tribe from the sale or exchange under this Act or any interest in trust or restricted land (or any improvements thereon) may be used only for the purpose of purchasing or acquiring property under this Act and shall be deposited in a special account under the control of the Secretary or his duly authorized representative.

SEC. 7. Subsection (a) of the first section of the Act of August 9, 1955 (69 Stat. 539; 25 U.S.C. 415), as amended, is further amended—

(1) by striking out "and leases of land on the Agua Caliente" in the second sentence and inserting in lieu thereof "leases of land on the Agua Caliente", and

(2) by striking out "and the lands comprising the Moses Allotment Numbered 10, Chelan County, Washington," in the second sentence and inserting in lieu thereof the following: "leases of the lands comprising the Moses Allotment Numbered 10, Chelan County, Washington, and leases to the Devils Lake Sioux Tribe, or any organization of such tribe, of land on the Devils Lake Sioux Reservation,".

SEC. 8. (a)(1) The devise or descent of any interest in trust or restricted land located within the Devils Lake Sioux Reservation to any person who is not a member of the Devils Lake Sioux Tribe shall be subject to the right of such tribe to purchase such interest within two years of the date of death of the decedent by paying to the Secretary for the benefit of such person an amount equal to the fair market value of such interest on the date of such purchase (as determined by the Secretary after appraisal).

(2) Within ninety days after the date on which the Secretary receives payment of an amount for the benefit of a person under paragraph (1), the Secretary shall pay such amount to such person.

(3) The Devils Lake Sioux Tribe may exercise its right under paragraph (1) to purchase the interest of a person only if the governing body of such tribe notifies such person and the Secretary of the intent of such tribe to purchase such interest at least ninety days prior to the date of such purchase.

(b)(1) Subsection (a) shall not apply to any interest in land acquired by the spouse of a decedent if—

(A) the spouse elects the application of this subsection prior to the date which is ninety days after the date on which the governing body of the Devils Lake Sioux Tribe notifies the spouses of its intent to acquire such interest, and

(B) prior to such date, the spouse retains a life estate in such interest and conveys the remainder of such interest to any heir of the decedent who is a member of such tribe.

If the spouse of a decedent elects the application of this subsection with respect to any interest in land which was trust or restricted land immediately prior to the death of the decedent, the life estate and the remainder of such interest created by the conveyance described in paragraph (1)(B) shall acquire such trust or restricted status.

(c) This section shall only apply to interests included in the estates of decedents dying on or after the date of enactment of this Act.

SEC. 9. The Devils Lake Sioux Reservation, North Dakota, is hereby declared the permanent homeland of the Devils Lake Sioux Tribe.

SEC. 10. The Secretary is authorized to take such action as may be necessary to carry out the purposes of this Act.

With the following committee amendment:

Strike all after the enacting clause and insert in lieu thereof the following:

TITLE I

SECTION 101. The Congress finds that—

(1) the Devils Lake Sioux Tribe, of the Devils Lake Sioux Reservation, North Dakota, is vigorously pursuing its goal of self-determination through development of manufacturing and farming enterprises; and

(2) the continued existence of the Devils Lake Sioux Reservation, North Dakota, as a permanent homeland of the Devils Lake Sioux Tribe and as a necessary foundation for continued self-determination requires that the Secretary of the Interior have authority to—

(A) consolidate and increase the trust land base in the reservation for the tribe and individual tribal members; and

(B) prevent further loss of trust land.

SEC. 102. (a) The Secretary of the Interior (hereinafter in this Act referred to as the "Secretary") is authorized to—

(1) purchase with any funds held by the Secretary in trust for the benefit of the Devils Lake Sioux Tribe or appropriated for the purpose, or acquire by gift, exchange, or relinquishment, any interest in land (or any improvements thereon) located within the boundaries of the Devils Lake Sioux Reservation for the benefit of the Devils Lake Sioux Tribe or individual members of such tribe;

(2) sell or approve sales of any interest in tribal trust or tribal restricted land (or any improvements thereon) located within the boundaries of the Devils Lake Sioux Reservation but only if additional tribal trust or tribal restricted land which is approximately equal in acreage or value to the interest sold is acquired by the Secretary at the time of such sale; and

(3) exchange any interest in tribal or individual trust land or tribal or individual restricted land (or any improvements thereon) for any land located within the Devils Lake Sioux Reservation but only if the values of the interests in land involved in such an exchange are equal or are equalized by the payment of money.

(b) Any purchase of Federal lands under subsection (a)(1) shall be made in accordance with the provisions of the Federal Land Policy and Management Act of 1976 (90 Stat. 2744).

SEC. 103. The Secretary shall accept any transfer of title from the Devils Lake Sioux Tribe, or from any individual member of such tribe, for any interest in land (or any improvements thereon) located within the boundaries of the Devils Lake Sioux Reservation, and shall take title to such property in the name of the United States in trust for the benefit of the Devils Lake Sioux Tribe, or for such individual member.

SEC. 104. Any acquisition, sale, or exchange of lands for the Devils Lake Sioux Tribe which is made under this title shall be made only upon the request of the authorized governing body of the Devils Lake Sioux Tribe, subject to the limitations and procedures of the tribal constitution.

SEC. 105. Notwithstanding any other provision of applicable law, the title to any interest in land, or any improvements thereon, acquired by the Secretary under this title shall be acquired in the name of the United States in trust for the benefit of the Devils Lake Sioux Tribe or an individual member of such tribe, as the case may be, and such property shall be held and treated in the same manner as other trust or restricted Indian lands are held and treated under Federal law.

SEC. 106. Money or amounts credited to the Devils Lake Sioux Tribe from the sale or exchange under this title of any interest in trust or restricted land (or any improvements thereon) may be used only for the purpose of purchasing or acquiring property under this title and shall be deposited in a special account under the control of the Secretary or his duly authorized representative.

SEC. 107. Subsection (a) of the first section of the Act of August 9, 1955 (69 Stat. 539; 25 U.S.C. 415), as amended, is further amended—

(1) by striking out "and leases of land on the Agua Caliente" in the second sentence and inserting in lieu thereof "leases of land on the Agua Caliente", and

(2) by striking out "and the lands comprising the Moses Allotment Numbered 10, Chelan County, Washington," in the second sentence and inserting in lieu thereof the following: "leases of the lands comprising the Moses Allotment Numbered 10, Chelan County, Washington, and leases to the Devils Lake Sioux Tribe, or any organization of such tribe, of land on the Devils Lake Sioux Reservation,".

SEC. 108. (a)(1) The devise or descent of any interest in trust or restricted land located within the Devils Lake Sioux Reservation to any person who is not a member of the Devils Lake Sioux Tribe shall be subject to the right of such tribe to purchase such interest within two years of the date of death of the decedent by paying to the Secretary for the benefit of such person an amount equal to the fair market value of such interest on the date of such purchase (as determined by the Secretary after appraisal).

(2) Within ninety days after the date on which the Secretary receives payment of an amount for the benefit of a person under paragraph (1), the Secretary shall pay such amount to such person.

(3) The Devils Lake Sioux Tribe may exercise its right under paragraph (1) to purchase the interest of a person only if the governing body of such tribe notifies such person and the Secretary of the intent of such tribe to purchase such interest at least ninety days prior to the date of such purchase.

(b)(1) Subsection (a) shall not apply to any interest in land acquired by the spouse of a decedent if—

(A) the spouse elects the application of this subsection prior to the date which is ninety days after the date on which the governing body of the Devils Lake Sioux Tribe notifies the spouse of its intent to acquire such interest, and

(B) prior to such date, the spouse retains a life estate in such interest and conveys the remainder of such interest to any heir of the decedent who is a member of such tribe.

(2) If the spouse of a decedent elects the application of this subsection with respect to any interest in land which was trust or restricted land immediately prior to the death of the decedent, the life estate and the remainder of such interest created by the conveyance described in paragraph (1)(B) shall acquire such trust or restricted status.

(c) This section shall only apply to interests included in the estates of decedents dying on or after the date of enactment of this title.

SEC. 109. The Devils Lake Sioux Reservation, North Dakota, is hereby declared the permanent homeland of the Devils Lake Sioux Tribe.

SEC. 110. The Secretary is authorized to take such action as may be necessary to carry out the purposes of this title.

TITLE II

SEC. 201. This title may be cited as the "Indian Land Consolidation Act".

SEC. 202. For the purpose of this title—

(1) "tribe" means any Indian tribe, band, group, pueblo, or community for which, or for the members of which, the United States holds lands in trust;

(2) "Indian" means any person who is a member of a tribe or any person who is recognized as an Indian by the Secretary of the Interior;

(3) "Secretary" means the Secretary of the Interior; and

(4) "trust or restricted lands" means lands, title to which is held by the United States in trust for an Indian or an Indian tribe or lands title to which is held by Indians or an Indian tribe subject to a restriction by the United States against alienation.

SEC. 203. The provisions of section 5 of the Act of June 18, 1934 (48 Stat. 985), shall apply to all tribes notwithstanding the provisions of section 18 of such Act: *Provided*, That nothing in this section is intended to supersede any other provision of Federal law which authorizes, prohibits, or restricts the acquisiton of land for Indians with respect to any specific tribe, reservation, or state(s).

SEC. 204. (a) Notwithstanding any other provision of law, any tribe, acting through its governing body, is authorized, with the approval of the Secretary to adopt a land consolidation plan providing for the sale or exchange of any tribal lands or interest in lands for the purpose of eliminating undivided fractional interests in Indian trust or restricted lands or consolidating its tribal landholdings.

SEC. 205. Any Indian tribe may purchase at no less than the fair market value all of the interests in any tract of trust or restricted land within that tribe's reservation or otherwise subjected to that tribe's jurisdiction with the consent of over 50 per centum of the owners or with the consent of the owners of over 50 per centum of the undivided interests in such tract: *Provided*, That—

(1) no such tract shall be acquired by any Indian or Indian tribe over the objection of three or less owners owning 50 per centum or more of the total interests in such tract;

(2) any Indian owning any undivided interest in, and in actual use and possession of such tract, may purchase such tract by matching the tribal offer;

(3) no Indian acquiring land under this section shall be eligible to apply for a fee patent in such lands for a period of 10 years after such acquisition;

(4) this section shall not apply to any tract of land owned by less than fifteen persons; and

(5) all purchases and sales initiated under this section shall be approved by the Secretary.

SEC. 206. Notwithstanding any other provisions of law, any Indian tribe may provide by appropriate action of its governing body, subject to approval by the Secretary, that nonmembers of the tribe or non-indians shall not be entitled to receive by devise or descent any interest in trust or restricted lands within that tribe's reservation or otherwise subjected to that tribe's jurisdiction: *Provided*, That in the event a tribe takes such action—

(1) the sale price or exchange value received by the tribe for land or interests in land covered by this section shall be no less than within 10 per centum of the fair market value as determined by the Secretary;

(2) if the tribal land involved in an exchange is of greater or lesser value than that land for which it is being exchanged, the tribe may accept or give cash in such exchange in order to equalize the values of the property exchanged;

(3) any proceeds from the sale of land or interest in land or proceeds received by the tribe to equalize an exchange made pursuant to this section shall be used exclusively for the purchase of other land or interest in land;

(4) the Secretary shall maintain a separate trust account for each tribe selling or exchanging land pursuant to this section consisting of the proceeds of the land sales and exchanges and shall release such funds only for the purpose of buying lands under this section; and

(5) any tribe may retain the mineral rights to such sold or exchanged lands and the Secretary shall assist such tribe in determining the value of such mineral rights and shall take such value into consideration in determining the fair market value of such lands.

(b) The Secretary must execute such instrument of conveyance needed to effectuate a sale or exchange of tribal lands made pursuant to an approved tribal land consolidation plan unless he makes a specific finding that such sale or exchange is not in the best interest of the tribe or is not in compliance with the tribal land consolidation plan.

(1) if an Indian dies intestate, the surviving non-Indian or nonmember spouse and/or children shall be entitled to a life estate in as much of the trust or restricted lands as he, she or they would have been entitled to take under existing law;

(2) if an intestate Indian decendent has no heir to whom interests in trust or restricted lands may pass, such interests shall escheat to the tribe, subject to any non-Indian or nonmember spouse and/or children's rights as described in paragraph (1) of this section;

(3) if an Indian decedent has devised interests in trust or restricted lands to persons who are ineligible for such an inheritance by reason of a tribal ordinance enacted pursuant to this section, the devise shall be voided only if, while the estate is pending before the secretary for probate, the tribe acquires such interests by paying to the Secretary, on behalf of the devisees, the fair market value of such interests as determined by the Secretary as of the date of the decedent's death; Provided, That any non-Indian or nonmember spouse and/or children of such decedent who have been devised such interests may retain, at their

option, a life estate in such interests, or be compensated by the tribe for the value of such interests.

SEC. 207. No undivided fractional interest in any tract of trust or restricted land within a tribe's reservation or otherwise subjected to a tribe's jurisdiction shall descedent by intestacy or devise but shall escheat to that tribe if such interest represents 2 per centum or less of the total acreage in such tract and has earned to its owner less than $100 in the preceding year before it is due to escheat.

SEC. 208. The Secretary in carrying out his responsibility to regulate the descent and distribution of trust lands under section 1 of the Act of June 25, 1910 (36 Stat. 855; 25 U.S.C. 372) as amended, and other laws, shall give full faith and credit to any tribal actions taken pursuant to section 206 of this title, which provision shall apply only to estates of decedent's whose deaths occur on or after the effective date of tribal ordinances adopted pursuant to this title.

SEC. 209. The Secretary shall have the authority to issue deeds, patents, or such other instruments of conveyance needed to effectuate a sale or exchange of tribal lands made pursuant to the terms of this title and to remove, at the request of an Indian owner, the trust status of individually held lands or interests therein, where authorized by law.

SEC. 210. Title to any land acquired under this title by any Indian or Indian tribe shall be taken in trust by the United States for that Indian or Indian tribe.

SEC. 211. All lands or interests in land acquired by the United States for an Indian or Indian tribe under authority of this title shall be exempt from Federal, State and local taxation.

The committee amendment was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title was amended so as to read: "An act to authorize the purchase, sale, and exchange of lands by Indian tribes and by the Devils Lake Sioux Tribe of the Devils Lake Sioux Reservation of North Dakota specifically, and for other purposes."

A motion to reconsider was laid on the table.

USE AND DISTRIBUTION OF FUNDS AWARDED TO BLACKFEET AND GROS VENTRE TRIBES OF INDIANS AND THE ASSINEBOINE TRIBE OF THE FORT BELKNAP INDIAN COMMUNITY, AND OTHERS

The Clerk called the Senate bill (S. 1986 to provide for the use and distribution of funds awarded the Blackfeet and Gros Ventre Tribes of Indians and the Assiniboine Tribe of the Fort Belknap Indian Community, and others, in dockets numbered 250–A and 279–C by the United States Court of Claims, and for other purposes.

There being no objection, the Clerk read the Senate bill, as follows:

S. 1986

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding any other provision of the law, the funds appropriated on January 23, 1981, in accordance with section 1302 of the Supplemental Appropriation Act (31 U.S.C. 724a), in satisfaction of a judgment awarded to the Blackfeet and Gros Ventre Tribes of Indians and the Assiniboine Tribe of the Fort Belknap Indian Community in dockets numbered 250–A and 279–C of the United States Court of Claims (less attorney fees and litigation expenses), including all interest and investment income accrued, shall be distributed and used as herein provided.

SEC. 2. The funds appropriated to the Blackfeet Tribe of the Blackfeet Reservation; Montana, in docket numbered 279–C, amounting to $400,000, shall be held in trust and invested by the Secretary of the Interior (hereinafter "Secretary") for the benefit of the members of the Blackfeet Tribe. The governing body of such tribe is authorized to utilize such funds on a budgetary basis, subject to the approval of the Secretary, for governmental operation and social and economic programs.

SEC. 3. The funds appropriated to the Assiniboine Tribe of the Fort Belknap Indian Community, Montana, in docket numbered 250–A, amounting to $2,170,013 shall be used and distributed as follows: *Provided,* That no person shall be eligible to share in more than one award in his own right.

(a) Eighty per centum of such funds shall be distributed in the form of per capita payments (in sums as equal as possible) to all persons duly enrolled as Assiniboin members of the Fort Belknap Indian Community and born on or prior to and living on the date of enactment of this Act.

(b) Twenty per centum of such funds shall be held in trust and invested by the Secretary for the benefit of the members of the Assiniboine Tribe of the Fort Belknap Indian Community. The treaty committee of such tribe is authorized to utilize such funds on a budgetary basis, subject to the approval of the Secretary, for social and economic programs. Such programs may include but are not limited to land acquisitions and the development of local reservation projects.

SEC. 4. The funds appropriated to the Gros Ventre Tribe of the Fort Belknap Indian Reservation, Montana, in docket numbered 279–C amounting to $2,094,987 shall be used and distributed as follows: *Provided,* That no person shall be eligible to share in more than one award in his own right.

(a) Eighty per centum of such funds shall be distributed in the form of per capita payments (in sums as equal as possible) to all persons born on or prior to and living on the date of enactment of this Act who are (1) duly enrolled members of the Gross Ventre Tribe of the Fort Belknap Indian Reservation who possess at least one quarter degree Gros Ventre blood, or (2) who are enrolled in the Fort Belknap Indian Community and are at least one-eighth degree Gros Ventre blood and at least one-eighth degree Assiniboine blood and are not eligible to share in section 3 of this Act.

(b) Twenty per centum of such funds shall be held in trust and invested by the Secretary for the benefit of the members of the Gros Ventre Tribe of the Fort Belknap Indian Reservation. The treaty committee of such tribe is authorized to utilize such funds on a budgetary basis, subject to the approval of the Secretary, for social and economic programs. Such programs may include but are not limited to land acquisitions and the development of local reservation projects.

(c) Nothing in this section is deemed in anyway to increase, diminish or in anyway affect the right of the Gros Ventre Tribe to determine its membership.

SEC. 5. The per capita shares of living competent adults shall be paid directly to them. Per capita shares of deceased individual beneficiaries shall be determined and distributed pursuant to regulations prescribed by the Secretary. Per capita shares of individuals under age eighteen shall be paid in accordance with such procedures, including the establishment of trusts, as the Secretary determines to be necessary to protect and preserve the interest of such individuals.

SEC. 6. None of the funds distributed per capita or held in trust under the provisions of this Act shall be subject to Federal or State income taxes, and the per capita payments shall not be considered as income or resources when determining the extent of eligibility for assistance under the Social Security Act or other Federal assistance programs.

SEC. 7. The Secretary of the Interior is authorized to prescribe rules and regulations to carry out the provisions of this Act, including the establishment of deadlines for filing applications for enrollment.

SEC. 8. Twenty-six and eight-tenths per centum of funds in the amount of $29,404,951.84 (less attorney fees and litigation expenses), appropriated on June 30, 1981, in accordance with section 1302 of the Supplemental Appropriation Act (31 U.S.C. 724a), in satisfaction of a judgment awarded to the Blackfeet and Gros Ventre Tribes in docket numbered 649–80L of the United States Court of Claims, shall be distributed to the Gros Ventre Tribe of the Fort Belknap Reservation in accordance with sections 4, 5, 6, and 7 of this Act.

SEC. 9. Funds in the amount of $77,780.13 (less attorney fees and litigation expenses), appropriated on July 16, 1981, in accordance with section 1302 of the Supplemental Appropriation Act (31 U.S.C. 724a), in satisfaction of a judgment awarded to the Gros Ventre Tribe of the Fort Belknap Indian Community in docket numbered 309–74 of the United States Court of Claims, shall be distributed in accordance with sections 4, 5, 6, and 7 of this Act.

With the following committee amendment:

Strike all after the enacting clause and insert in lieu thereof the following:

That, notwithstanding any other provision of law, the funds appropriated in accordance with section 1302 of the Supplemental Appropriation Act (31 U.S.C. 724a), on January 23, 1981, in satisfaction of a judgment awarded to the Blackfeet and Gros Ventre Tribes of Indians and the Assiniboine Tribe of the Fort Belknap Indian Community in dockets numbered 250–A and 279–C of the United States Court of Claims; on July 16, 1981, in satisfaction of a judgment awarded to the Gros Ventre Tribe of Fort Belknap Indian Community in docket numbered 309–74 of the United States Court of Claims; and 26.8 per centum of the funds appropriated on June 30, 1981, in satisfaction of a judgment awarded to the Blackfeet and Gros Ventre Tribes in docket numbered 649–80L of the United States Court of Claims, less attorney fees and litigation expenses, but including all accrued interest and investment income, shall be distributed and used as herein provided.

SEC. 2. The funds appropriated to the Blackfeet Tribe of the Blackfeet Reservation, Montana, in docket numbered 279-C, in an original amount of $400,000, shall be held in trust and invested by the Secretary of the Interior (hereinafter "Secretary") for the benefit of the members of the Blackfeet Tribe. The governing body of such tribe is authorized to utilize such funds on a budgetary basis, subject to approval of the Secretary, for governmental operations and social and economic programs.

SEC. 3. The funds appropriated to the Assiniboine Tribe of the Fort Belknap Indian Community, Montana, in docket numbered 250-A, in the original amount of $2,170,013 shall be used and distributed as follows: *Provided*, That no person shall be eligible to share in more than one award in his own right:

(a) Eighty per centum of such funds shall be distributed in the form of per capita payments (in sums as equal as possible) to all persons duly enrolled as Assiniboine members of the Fort Belknap Indian Community and born on or prior to, and living on, the date of enactment of this Act.

(b) Twenty per centum of such funds shall be held in trust and invested by the Secretary for the benefit of the members of the Assiniboine Tribe of the Fort Belknap Indian Community. The treaty committee of such tribe is authorized to utilize such funds on a budgetary basis, subject to approval of the Secretary, for social and economic programs. Such programs may include, but are not limited to, land acquisitions and the development of local reservation projects.

SEC. 4. The funds appropriated to the Gros Ventre Tribe of the Fort Belknap Indian Community, Montana, in docket numbered 279-C, in the original amount of $2,094,987; in docket numbered 309-74, in the original amount of $77,780.13; and in docket numbered 649-80L, in the initial amount of 26.8 per centum of $29,404,951.94, shall be used and distributed as follows: *Provided*, That no person shall be eligible to share in more than one award in his own right:

(a) Eighty per centum of such funds shall be distributed in the form of per capita payments (in sums as equal as possible) to all persons born on or prior to, and living on, the date of enactment of this Act who are (1) duly enrolled members of the Gros Ventre Tribe of the Fort Belknap Indian Reservation who possess at least one-quarter degree Gros Ventre blood or (2) who are enrolled in the Fort Belknap Indian Community and who are at least one-fourth degree Gros Ventre and Assiniboine blood, but not less than one-eighth degree Gross Ventre blood, and are not eligible to share under section 3 of this Act.

(b) Twenty per centum of such funds shall be held in trust and invested by the Secretary for the benefit of the members of the Gros Ventre Tribe of the Fort Belknap Indian Reservation. The treaty committee of such tribe is authorized to utilize such funds on a budgetary basis, subject to approval of the Secretary, for social and economic programs. Such programs may include, but are not limited to, land acquisition and the development of local reservation projects.

(c) Nothing in this section is deemed in any way to increase, diminish, or in any way affect the right of the Gros Ventre Tribe to determine its membership.

SEC. 5. The per capita shares of living competent adults shall be paid directly to them. Per capita shares of deceased individual beneficiaries shall be determined and distributed pursuant to regulations prescribed by the Secretary. Per capita shares of individuals under eighteen shall be paid in accordance with such procedures, including the establishment of trusts, as the Secretary determines to be necessary to protect and preserve the interests of such individuals.

SEC. 6. None of the funds distributed per capita or held in trust under provisions of this Act shall be subject to Federal or State income taxes, and the per capita payments shall not be considered as income or resources when determining the extent of eligibility for assistance under the Social Security Act or other Federal assistance programs.

SEC. 7. The Secretary is authorized to prescribe rules and regulations to carry out the provisions of this Act, including the establishment of deadlines for filing applications for enrollment.

SEC. 8. (a) Notwithstanding any other law, the funds appropriated by the Act of September 30, 1976 (90 Stat. 1416), in satisfaction of a judgment awarded to the Papago Tribe of Arizona in dockets numbered 345 and 102 of the Indian Claims Commission, less attorney fees and litigation expenses, but including all accrued interest or investment income, shall be used and distributed as provided in this Act.

(b) Fifty per centum of such funds shall be held in trust by the Secretary for the benefit of the Papago Tribe and shall be administered or invested by the Secretary for the best interest of the tribe under existing law. Such funds shall be held and used as follows:

(1) All interest or investment income accruing to said funds shall be available, at the request of the tribe on a quarterly basis, for use by the Papago Tribal Council on an annual budgetary basis for expenditures of the tribal government, and for health, education, and social services, capital improvements and economic development programs of the tribe and of the district and communities of the tribe's reservation. Any interest or investment income accrued during the year and remaining available at the end of the tribe's fiscal year shall, at the request of the tribe, be added to the principal amount.

(2) A portion of such funds, principal and accrued interest or investment income, but not in the aggregate a sum in excess of 20 per centum of the initial principal amount, shall be available upon the request to the tribe for capital improvement or major economic development activities of benefit to the tribe as a whole pursuant to a plan or plans developed by the Papago Tribal Council and approved by the Secretary.

(3) Sufficient funds from the principal amount of such funds shall be available to the Secretary to insure that the per capita distribution of $1,000 to each enrollee is completed as provided in subsection (c) to the extent that there are not sufficient funds in the amount set aside for per capita distribution to make such payment.

(c) Fifty per centum of such funds shall be held and administered by the Secretary for per capita distribution and such sums, together with any accrued interest or investment income, shall be distributed and used as follows:

(1) The membership roll of the tribe shall be brought current to the date of enactment of this Act pursuant to the criteria specified in the tribal constitution and the provisions of the Papago Enrollment Ordinance, ordinance numbered 5-81, and the Papago Enrollment Manual, or other ordinances and regulations adopted by the Papago Tribal Council and approved by the Secretary: *Provided*, That no application for membership of the roll may be filed or received by the tribe for purposes of per capita payments under this section one hundred and eighty days after the date of enactment of this Act.

(2) Sufficient funds shall be made available to the tribe on an annual budgetary basis from interest and investment income accruing to such funds to assist the tribe to bring the membership roll current as provided in paragraph (1) of the subsection.

(3) Per capita distributions shall be made, in shares as equal as possible, to all members of the Papago Tribe who were born on or prior to, and living on, the date of enactment of this Act, as follows:

(i) Persons whose applications for membership on the roll have been approved on the date of enactment of this Act shall be paid the sum of $1,000 within ninety days after such date.

(ii) Persons whose applications for membership on the roll have not been approved on the date of enactment of this Act shall be paid the sum of $1,000 within ninety days after their membership has been approved.

(iii) Upon completion of the membership roll and of all appeals from adverse determinations on applications for membership, and upon the expiration of the time allowed for such appeals, any remaining amount, after the payments provided in paragraph (2) of this subsection and in subparagraphs (i) and (ii) of this paragraph, shall be distributed, in sums as equal as possible, to all enrolled members of the Pagapo Tribe.

(iv) The per capita shares of living competent adults shall be paid directly to them. Per capita shares of deceased beneficiaries, legal incompetents, and minors shall be determined and distributed pursuant to regulations prescribed by the Secretary.

(v) Any amount remaining after the per capita distributions to enrollees provided in subparagraph (iii) of this paragraph shall revert to the tribe and shall be added to the principal fund held and administered by the Secretary pursuant to subsection (b) of this section.

(d) None of the funds distributed per capita or held in trust under the provisions of this section shall be subject to Federal or State income taxes, and the per capita payments shall not be considered as income or resources when determining the extent of eligibility for assistance under the Social Security Act or other Federal assistance programs.

The committee amendment was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title was amended so as to read: "An act to provide for the use and distribution of funds awarded to the Blackfeet and Gros Ventre Tribe of Indians and the Assiniboine Tribe of Fort Belknap Indian Community, in certain dockets of the United States Court of Claims and of funds awarded to the Papago Tribe of Arizona in dockets numberd 345 and 102 of the Indian Claims Commission, and for other purposes."

A motion to reconsider was laid on the table.

PROVIDING FOR THE DISTRIBUTION OF WARM SPRINGS JUDGMENT FUNDS AWARDED IN DOCKET NUMBERED 198 BEFORE THE INDIAN CLAIMS COMMISSION, AND FOR OTHER PURPOSES

The Clerk called the bill (H.R. 6243) to provide for the distribution of Warm Springs judgment funds awarded in docket number 198 before the Indian Claims Commission, and for other purposes.

There being no objection, the Clerk read the bill, as follows:

H.R. 6243

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That notwithstanding any provision of the Act approved October 19, 1973 (25 U.S.C. 1401 et seq.), any other law, and any regulation or plan promulgated pursuant to such Act or any other law, the funds appropriated by the Act approved January 3, 1974 (87 Stat. 1071), for the award to the Confederated Tribes of the Warm Springs Reservation in docket numbered 198 before the Indian Claims Commission, including all interest and investment income accrued, less attorney fees and litigation expenses, shall be distributed in accordance with section 2 of this Act.

SEC. 2. The Secretary of the Interior (hereinafter in this Act referred to as the "Secretary") shall distribute the funds referred to in the first section of this Act to the individuals enrolled by the Secretary under section 3 of this Act on a per capita basis in the following manner:

(1) The per capita share of a living competent individual who has attained the age of eighteen shall be paid directly to such individual.

(2) The per capita share of a deceased individual shall be distributed to the heir or beneficiary under a will of such individual in accordance with regulations prescribed by the Secretary and the probate code of the Confederated Tribes of the Warm Springs Reservation. In the event such individual dies intestate without heirs, the per capita share of the individual shall escheat to the Confederated Tribes of the Warm Springs Reservation.

(3) The per capita share of an individual under the age of eighteen or an individual determined by the Secretary to be incompetent to handle his own affairs shall be (A) distributed in accordance with such procedures as the Secretary determines to be necessary to protect the interests of such individual, or (B) in the discretion of the Secretary, held in trust for the benefit of such individual.

SEC. 3. The Secretary shall prepare, under such procedures as he may establish by regulation, a roll of all members of the Confederate Tribes of the Warm Springs Reservation who—

(1) were living on the date of the enactment of this Act, and

(2) have not participated in—

(A) the distribution to the Malheur Paiutes under the provisions of the Act approved August 20, 1964 (78 Stat. 563),

(B) a distribution pursuant to any other judgment under the Act approved August 13, 1946 (25 U.S.C. 70 et seq.), or

(C) any distribution under the Alaska Native Claims Settlement Act (43 U.S.C. 1601 et seq.)

The determination of the Secretary regarding the eligibility for enrollment under this section of any individual shall be final.

SEC. 4. (a) None of the funds distributed by the Secretary under section 2 of this Act (or held in trust by the Secretary pursuant to paragraph (3)(B) of such section) shall be subject to Federal or State income taxes.

(b)(1) Except as provided in paragraph (2), the availability or distribution of funds by the Secretary under section 2 of this Act may not be considered as income or resources or otherwise used as the basis for denying or reducing—

(A) any financial assistance or other benefit to which any individual enrolled as a member under section 3 of this Act, or the household of any such individual, would otherwise be entitled or for which such individual or household is otherwise eligible under the Social Security Act, or

(B) any other Federal financial assistance or other Federal benefit to which such individual or household is otherwise entitled or for which such individual or household is otherwise eligible.

(2) The restriction contained in paragraph (1) of this subsection on the consideration or use of such funds for the purpose of reducing or denying any financial assistance or benefit described in subparagraph (B) of such paragraph shall not apply to that portion of any per capita share distributed under section 2 of this Act which exceeds $2,000.

With the following committee amendments:

1. On page 2, line 18 strike all until and including the word "Reservation" on lines 22 and 23 and insert in lieu the following:

(2) The per capita shares of deceased individual beneficiaries shall be determined and distributed in accordance with 43 CFR Part 4, Subpart D.

2. On page 3, line 2, strike the word "such" and insert in lieu the word "an".

3. On page 3, strike all of lines 17 and 18 and insert in lieu thereof the following:

(1) were born on or prior to, and were alive on, the date of enactment of this Act, but also including deceased persons who were alive and enrolled as of February 18, 1975, and,

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PROVIDING FOR THE USE AND DISTRIBUTION OF FUNDS AWARDED THE PEMBINA CHIPPEWA INDIANS IN DOCKETS NUMBERED 113, 191, 221, AND 246 OF THE COURT OF CLAIMS

The Clerk called the bill (H.R. 6416) to provide for the use and distribution of funds awarded the Pembina Chippewa Indians in dockets numbered 113, 191, 221, and 246 of the Court of Claims.

There being no objection, the Clerk read the bill, as follows:

H.R. 6416

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding any provision of the Act of October 19, 1973 (87 Stat. 466; 25 U.S.C. 1401, et seq.), or any other law, regulation, or plan promulgated pursuant thereto, any funds appropriated in satisfaction of a judgment awarded to the Pembina Chippewa Indians in dockets numbered 113, 191, 221, and 246 of the Court of Claims shall be used and distributed as provided in this Act.

SEC. 2. All of the funds appropriated with respect to the judgment awarded the Pembina Chippewa Indians in dockets 113, 191, 221, and 246 (less attorney fees and litigation expenses), including all interest and investment income accrued, shall be divided by the Secretary of the Interior (hereinafter in this Act referred to as the "Secretary") among the Turtle Mountain Band of Chippewa Indians, the Chippewa Cree Tribe of Rocky Boy's Reservation, the Minnesota Chippewa Tribe, and the nonmember Pembina descendants (as a group) so that each is allocated an amount which bears the same relationship to such funds as the number of members of such band, tribe, or group who are described under section 3(1), 4(1), 5(1), or 6(a) bears to the sum of—

(1) the number of members of the Turtle Mountain Band of Chippewa Indians described in section 3(1),

(2) the number of members of the Chippewa Cree Tribe of Rocky Boy's Reservation described in section 4(1),

(3) the number of members of the Minnesota Chippewa Tribe described in section 5(1), plus

(4) the Number of nonmember Pembina Chippewas enrolled by the Secretary under section 6(a).

SEC. 3. The funds allocated by section 2 to the Turtle Mountain Band of Chippewa Indians shall be used and distributed as follows:

(1) Eighty per centum of such funds shall be distributed in the form of per capita payments (in sums as equal as possible) to all enrolled members of the Turtle Mountain Band of Chippewa Indians who are living on the date of the enactment of this Act.

(2) Twenty per centum of such funds shall be held in trust and invested by the Secretary for the benefit of the members of the Turtle Mountain Band of Chippewa Indians. The governing body of such band is authorized to use the interest and investment income accrued on such 20 per centum portion, on an annual budgetary basis subject to the approval of the Secretary, for—

(A) the administration of such band, or

(B) social and economic programs.

A proposed tribal budget utilizing $5,000 or more of such interest or investment income in any fiscal year shall be subject to a tribal referendum in accordance with the constitution of the Turtle mountain Band of Chippewa Indians. Such 20 per centum portion of the principal shall not be available for per capita payments.

SEC. 4. The funds allocated by section 2 to the Chippewa Cree Tribe of Rocky Boy's Reservation shall be used and distributed as follows:

(1) Eighty per centum of such funds shall be distributed in the form of per capita payments (in sums as equal as possible) to all enrolled members of the Chippewa Cree Tribe of Rocky Boy's Reservation who—

(A) established Pembina Chippewa ancestry to the satisfaction of the Secretary, and

(B) are living on the date of the enactment of this Act.

(2) Twenty per centum of such funds shall be held in trust and invested by the Secretary for the benefit of the members of the Chippewa Cree Tribe of Rocky Boy's Reser-

vation. The governing body of such tribe is authorized to use the interest and investment income accrued on such 20 per centum portion, on an annual budgetary basis subject to the approval of the Secretary, for—

(A) development of a tribal administration complex,

(B) land acquisition and development,

(C) a swimming pool,

(D) a roller skating rink,

(E) a bowling alley,

(F) any other recreational purposes,

(G) tribal administration, or

(H) any social and economic programs.

A proposed tribal budget utilizing $5,000 or more of such interest or investment income in any fiscal year shall be subject to a tribal referendum in accordance with the constitution of the Chippewa Cree Tribe of Rocky Boy's Reservation. Such 20 per centum portion of the principal shall not be available for per capita payments.

SEC. 5. The funds allocated by section 2 to the Minnesota Chippewa Tribe shall be used and distributed as follows:

(1) Eighty per centum of such funds shall be distributed in the form of per capita payments (in sums as equal as possible) to all enrolled members of the Minnesota Chippewa Tribe who—

(A) are designated as Pembina Band Chippewas on the basis of tribal procedures which are approved by the Secretary, and

(B) are living on the date of the enactment of this Act.

(2) Twenty per centum of such funds shall be held in trust and invested by the Secretary for the benefit of the members of the Minnesota Chippewa Tribe. The White Earth Reservation Business Committee, in consultation with the Pembina Program Planning Committee is authorized to use the interest and investment income accrued on such 20 per centum portion, on an annual budgetary basis subject to the approval of the Secretary, for—

(A) a joint investment and use program for the bands affiliated with the reservation, or

(B) reservation social and economic programs.

Such 20 per centum portion of the principal shall not be available for per capita payments.

SEC. 6. (a) In order to establish eligibility to participate in the distribution of the funds allocated to the nonmember Pembina Chippewa descendants under section 2, the Secretary shall develop a roll of all individuals who—

(1) are of at least one-quarter Pembina Chippewa blood,

(2) are citizens of the United States,

(3) are living on the date of the enactment of this Act,

(4) are not members of the Red Lake Band of Chippewa Indians, the Turtle Mountain Band of Chippewa Indians, the Chippewa Cree Tribe, or the Minnesota Chippewa Tribe, and

(5) are—

(A) enrolled, or the descendants of a lineal ancestor enrolled—

(i) as Pembina descendants under the provisions of the Act of July 29, 1971 (85 Stat. 158), for the disposition of the 1863 Pembina Award, or

(ii) on the McCumber roll of Turtle Mountain Indians of 1892, or

(iii) on the Davis roll of Turtle Mountain Indians of 1904, or

(iv) as Chippewa on—

(I) the tentative roll of the Rocky Boy Indians of May 30, 1917, or

(II) the McLaughlin census report of the Rocky Boy Indians of July 7, 1917, or

(III) the Roe Cloud Roll of Landless Indians of Montana, or

(B) able to extablish Pembina ancestry on the basis of any other rolls or records acceptable to the Secretary.

(b) The Secretary shall promulgate regulations regarding nonmember Pembina enrollment procedures and shall utilize any documents acceptable to the Secretary in establishing eligibility of an individual to receive funds under this section.

(c) Funds allocated to the nonmember Pembina descendants under section 2 shall be distributed on a per capita basis to the individuals enrolled under subsection (a).

SEC. 7. (a) Any payment of a per capita share of funds to which a living, competent adult is entitled under this Act shall be paid directly to such adult.

(b) Any per capita share of funds to which a deceased individual is entitled under this Act shall be paid, and the beneficiaries thereof determined under regulations prescribed by the Secretary.

(c) Any per capita share of funds to which a legally imcompetent individual or an individual under eighteen years of age is entitled under this Act shall be paid in accordance with such procedures (including the establishment of trusts) as the Secretary determines to be necessary to protect the interests of such individual.

SEC. 8. None of the funds distributed per capita or made available under this Act for programs shall be subject to Federal, State, or local income taxes or be considered income or resources or otherwise utilized as the basis for denying or reducing the financial assistance or benefits to any person or household participating in any Federal, State, or local programs.

With the following committee amendments:

1. On page 2, line 15, insert after the comma after the word "Tribe", the phrase "the Little Shell Band of the Chippewa Indians of Montana,".

2. On page 2, line 20, strike "6(a)" and insert in lieu "6(1) or 7(a)".

3. On page 3, line 2, strike the word "plus" and insert between lines 22 and 23 a new subparagraph (4) as follows:

(4) the number of members of the Little Shell Band of the Chippewa Indians of Montana as described in section 6(1) plus.

4. On page 3, line 6, strike out "(4)" and insert in lieu "(5)".

5. On page 3, line 7, strike out "6(a)" and insert in lieu "7(a)".

6. On page 4, line 1, strike all from the beginning of line 18 through the word "Indians." on line 5.

7. On page 5, strike all from the beginning of line 1 on page 5 through the word "Reservation." on line 14 on page 5 and insert in lieu the following:

(A) economic programs,

(B) recreation, or

(C) tribal administration.

8. On page 6, line 9 and on page 6 in line 10, strike the phrase "Committee, in consultation with the Pembina Program Planning Committee," and insert "Committee".

9. On page 6, after line 21, insert the following:

SEC. 6. The funds allocated by section 2 to the Little Shell Tribe of Chippewa Indians of Montana shall be used and distributed as follows:

(1) Eighty per centum of such funds shall be distributed in the form of per capita payments (in sums as equal as possible) to all enrolled members of the Little Shell Tribe of Chippewa Indians of Montana who are living on the date of the enactment of this Act and who would meet the enrollment criteria under Section 7(a) of this Act if they were not enrolled members of the Little Shell Tribe of Chippewa Indians of Montana.

(2) Twenty per centum of such funds shall be held in trust and invested by the Secretary for the benefit of the members of the Little Shell Tribe of Chippewa Indians of Montana. The governing body of such tribe is authorized to use the interest and investment income accrued on such 20 per centum portion, on an annual budgetary basis subject to the approval of the Secretary, for—

(A) the administration of such tribe, or

(B) social and economic programs:

Provided, That the Secretary shall act on the Tribe's petition for federal recognition prior to September 30, 1985. In the event that recognition is not approved, the twenty per centum portion shall be distributed in the form of per capita payments (in sums as equal as possible) to those persons who qualify for per capita payments under sec. 6(1); *Provided further*, That if the Secretary fails to act on the recognition petition by September 30, 1985, the Secretary shall make a report to Congress on that date outlining the reasons for his failure to act and shall make no per capita payments under this subsection until action on the petition is final.

10. On page 8, line 6 delete "SEC. 6." and insert "SEC. 7.".

11. On page 8, line 18, after the word "Tribe" insert the following phrase: "or the Little Shell Band of Chippewa Indians of Montana,".

12. On page 10, line 1, delete "SEC. 7." and insert "SEC. 8.".

13. On page 10, lines 12 and 13, insert after the word "protect" the words "and preserve".

14. On page 10, line 14, delete "SEC. 8." and insert "SEC. 9.".

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

SETTLING CERTAIN INDIAN LAND CLAIMS WITHIN THE STATE OF FLORIDA, AND FOR OTHER PURPOSES

The Clerk called the bill (H.R. 7155) to settle certain Indian land claims within the State of Florida, and for other purposes.

There being no objection, the Clerk read the bill as follows:

H.R. 7155

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Florida Indian Land Claims Settlement Act of 1982".

CONGRESSIONAL FINDINGS AND DECLARATION OF POLICY

SEC. 2. Congress finds and declares that—

(1) there is pending before the United States District Court for the Southern District of Florida a lawsuit by the Miccosukee Indian Tribe which involves certain lands within the State of Florida;

(2) the pendency of such lawsuit may result in economic hardships for residents of the State of Florida by clouding the titles to lands in the State, including lands not now involved in the lawsuits;

(3) the pendency of such lawsuit also has clouded the easement rights of the South Florida Water Management District in lands necessary for use as a water flowage and storage area, which is part of a federally authorized project for flood control and water management in central and southern Florida, and which is being used to provide and regulate a water supply for the residents of South Florida;

(4) the State of Florida and the Miccosukee Indian Tribe have executed agreements for the purposes of resolving tribal land claims and settling such lawsuit, which agreements require implementing legislation by the Congress of the United States and the Legislature of the State of Florida; and

(5) Congress shares with the parties to such agreements a desire to settle such Indian claims in the State of Florida without additional cost to the United States.

DEFINITIONS

SEC. 3. For purposes of this Act—

(1) The term "Miccosukee Tribe" means the Miccosukee Tribe of Indians of Florida, a tribe of American Indians recognized by the United States and organized under section 16 of the Act of June 18, 1934 (48 Stat. 987; 25 U.S. 476) and recognized by the State of Florida pursuant to chapter 285, Florida Statutes.

(2) The term "State of Florida" means the State of Florida, its agencies, political subdivisions, constitutional officers, officials of its agencies and subdivisions, and the South Florida Water Management District.

(3) The term "Secretary" means the Secretary of the Interior.

(4) The term "lands or natural resources" means any real property or natural resources, or any interest in or right involving any real property or natural resources including but not limited to minerals and mineral rights, timber and timber rights, water and water rights, and rights to hunt and fish.

(5) The term "lawsuit" means the action in the United States District Court for the Southern District of Florida, entitled Miccosukee Tribe of Indians of Florida against State of Florida, et al., Case No. 79-253-CIV-JWK.

(6) The term "Lease Agreement" means that perpetual lease granted by the State of Florida to the Miccosukee Tribe, involving a specifically described area in South Florida, title to which is held by the State of Florida and in which the Miccosukee Tribe is granted certain express rights and interests.

(7) The term "settlement funds" means those amounts of money which the State of Florida has agreed to pay to the Miccosukee Tribe under the Settlement Agreement in partial consideration for the settlement of the lawsuit and the extinguishment of rights to all potential or unsettled claims which the Miccosukee Tribe may have to lands or natural resources in the State of Florida.

(8) The term "Settlement Agreement" means those documents entitled "Settlement Agreement between the Miccosukee Tribe and the State of Florida" executed on April 16, 1982, by representatives of the State of Florida and representatives of the Miccosukee Tribe and filed with the secretary of state of the State of Florida which incorporate the Lease Agreement described in paragraph (6) of this section.

(9) The term "transfer" includes but is not limited to any sale, grant, lease, allotment, partition, or conveyance, any transaction the purpose of which was to effect a sale, grant, lease, allotment, partition, or conveyance, or any event or events that resulted in a change of possession or control of lands or natural resources.

FINDINGS BY THE SECRETARY

SEC. 4. Section 5 of this Act shall not take effect until the Secretary finds that the following events have occurred:

(1) the State of Florida has enacted legislation appropriating sufficient money to pay, and in fact has paid, the settlement funds to the Miccosukee Tribe;

(2) the State of Florida and the Miccosukee Tribe have executed the Lease Agreement; and

(3) the State of Florida has enacted appropriate legislation to carry out its commitments under paragraph 1b of the Settlement Agreement between the State of Florida and the Miccosukee Tribe and has given the waiver specified in paragraph 4d of such Agreement.

APPROVAL OF PRIOR TRANSFERS AND EXTINGUISHMENT OF CLAIMS AND ABORIGINAL TITLE INVOLVING FLORIDA INDIANS

SEC. 5. (a) If the Secretary finds that the State of Florida has satisfied the conditions set forth in section 4 of this Act, he shall publish such findings and the Settlement Agreement in the Federal Register, and upon such publication—

(1) the transfers, waivers, releases, relinquishments, and other commitments made by the Miccosukee Tribe in paragraph 3 of the Settlement Agreement between the State of Florida and the Miccosukee Tribe shall be of full force and effect on the terms and conditions therein stated; and

(2) the transfers, waivers, releases, relinquishments, and other commitments validated by paragraph (1) of this subsection and the transfers and extinguishments approved and validated by paragraphs (1) and (2) of subsection (b) shall be deemed to have been made in accordance with the Constitution and all laws of the United States that are specifically applicable to transfers of lands or natural resources from, by, or on behalf of any Indian, Indian nation, or tribe of Indians (including but not limited to the Act of July 22, 1790 (1 Stat. 137) and any amendments thereto and all subsequent versions thereof), and Congress does hereby approve any such transfers effective as of the date of such transfers.

(b)(1) All claims to lands within the State of Florida based upon aboriginal title by the Miccosukee Tribe, or any predecessor or successor in interest, are hereby extinguished, and any transfer of lands or natural resources located anywhere within the State of Florida, including but not limited to transfers pursuant to the statute or treaty of or with any State or the United States, by, from, or on behalf of the Miccosukee Tribe, or any predecessor or successor in interest, shall be deemed to be in full force and effect: *Provided, however,* That nothing herein shall be construed as extinguishing any aboriginal right, title, interest, or claim to lands or natural resources solely to the extent of the rights or interests defined as "excepted interests" in paragraph 3c of the Settlement Agreement between the State of Florida and the Miccosukee Tribe.

(2) By virtue of the approval of a transfer of lands or natural resources effected by this section, or an extinguishment of aboriginal title effected thereby, all claims against the United States, any State or subdivision thereof, or any other person or entity, by the Miccosukee Tribe, arising subsequent to the transfer and based upon any interest in or right involving such lands or natural resources, including but not limited to claims for trespass damages or claims for use and occupancy, shall be regarded as extinguished as of the date of the transfer.

(3) Notwithstanding any other provision of this subsection, nothing in this Act shall be construed as extinguishing any right, title, interest, or claim to lands or natural resources in the State of Florida by any individual Indian—

(A) which is based on use and occupancy, or

(B) which was acquired under Federal or State law.

and which is not derived from or through the Miccosukee Tribe, or its predecessor or predecessors in interest.

SPECIAL PROVISIONS FOR MICCOSUKEE TRIBE

SEC. 6. (a) The leasehold interest granted the Miccosukee Tribe under the Lease Agreement shall be exempt from all State and local taxes.

(b) The lands leased to the Miccosukee Tribe pursuant to the Lease Agreement shall be treated as if such lands constituted a federally recognized Indian reservation solely for purposes of determining the eligibility of the Miccosukee Tribe and its members for any Federal health, education, employment, economic assistance, revenue sharing, law enforcement over Indians, or social welfare programs, or any other similar Federal program for which Indians are eligible because of their status as Indians and of their residence on an Indian reservation.

(c) The State of Florida, through exercise of the power of eminent domain, may take or diminish any interest granted to the Miccosukee Tribe under the Lease Agreement only for a public purpose and upon payment of just compensation, but such taking or diminution shall not require the approval of Congress or any executive officer of the United States.

(d) Nothing in this Act or in any grant of leasehold rights by the State of Florida under the Lease Agreement shall affect or otherwise impair in any adverse manner any benefits received by the State of Florida under the Act of September 2, 1937 (16 U.S.C. 669 et seq.), or the Act of August 9, 1950 (16 U.S.C. 777 et seq.).

SEC. 7. Nothing in this Act shall grant to the Miccosukee Tribe any greater rights or interests in the leased area other than those expressly set forth in the Lease Agreement, and, notwithstanding any other provision of this Act, nothing in this Act shall diminish, modify, or otherwise affect the extent of the civil and criminal jurisdiction of the State of Florida in the leased area.

SEC. 8. (a) The Secretary is authorized and directed to accept the transfer to the United States, to be held in trust for the use and benefit of the Miccosukee Tribe of Indians of Florida, of the lands authorized to be conveyed to the Miccosukee Tribe by section 285.061, Florida Statutes, and the lands described in Dedication Deed No. 23228 from the Trustees of the Internal Improvement Trust Fund subject to the provisions of section 285.061, Florida Statutes, and of this section.

(b)(1) Notwithstanding the conveyance of any lands by the State of Florida to the United States in trust for the Miccosukee Tribe of Indians of Florida, the assumption

of jurisdiction in favor of the State of Florida contained in section 285.16, Florida Statutes, pursuant to section 7 of the Act of August 15, 1953 (67 Stat. 588), as in effect prior to its repeal, shall continue in full force and effect on such lands unless the State shall retrocede such civil or criminal jurisdiction in whole or in part.

(2)(A) The laws of Florida relating to alcoholic beverages (chapters 561, 562, 563, 564, and 565, Florida Statutes), gambling (chapter 849, Florida Statutes), sale of cigarettes (chapter 210, Florida Statutes), and their successor laws, shall have the same force and effect within said transferred lands as they have elsewhere within the State and the State shall have jurisdiction over offenses committed by or against Indians under said laws to the same extent the State has jurisdiction over said offenses committed elsewhere within the State.

(B) Nothing in subparagraph (A) shall permit the exercise of jurisdiction by the State of Florida as to any matter to which section 1162(b) or 1360(b) of title 18, United States Code, applies.

(c)(1) Any transfer of lands under this section shall be subject to all existing leases, easements, and rights-of-way, and all the rights, easements, and reservations in favor of the Central and Southern Florida Flood Control District (now the South Florida Water Management District) and shall not increase, diminish, modify, or otherwise affect the extent to which chapter 373, Florida Statutes, and its successor laws, have force and effect within such lands.

(2) Any transfer of lands under this section shall not confer upon the Miccosukee Tribe, or upon the lands within the reservation, any additional water rights.

LIMITATIONS OF ACTIONS

SEC. 9. Notwithstanding any other provision of law, any action to contest the constitutionality of this Act shall be barred unless the complaint is filed within one hundred and eighty days after the date of enactment of this Act. An action to contest the constitutionality of this Act may only be brought in the United States District Court for the Southern District of Florida.

REVOCATION OF SETTLEMENT

SEC. 10. In the event the Settlement Agreement between the Miccosukee Tribe and the State of Florida is ever invalidated—

(1) the transfers, waivers, releases, relinquishments, and other commitments made by the Miccosukee Tribe in paragraph 3 of the Settlement Agreement shall no longer be of any force or effect,

(2) section 5 of this Act shall be inapplicable to the lands, interests in lands, or natural resources of the Miccosukee Tribe and its members as if never enacted, and

(3) the approvals of prior transfers and the extinguishment of claims and aboriginal title of the Miccosukee Tribe otherwise effected by section 5 shall be void ab initio.

With the following committee amendment:

Page 11, line 1, strike "or 1360(b) of title 18," and insert in lieu therof "of title 18 or section 1360(b) of title 28,".

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

The SPEAKER. This concludes the call of the Consent Calendar.

APPOINTMENT OF CONFEREES ON H.R. 7109, DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES APPROPRIATIONS, 1983

Mr. SABO. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 7019) making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1983, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER. Is there objections to the request of the gentleman from Minnesota? The Chair hears none, and appoints the following conferees:

Messrs. LEHMAN, SABO, AUCOIN, GRAY, RATCHFORD, WHITTEN, COUGHLIN, CONTE, EDWARDS of Alabama, and PURSELL.

PEMBINA CHIPPEWA INDIANS JUDGMENT FUNDS

Mr. GEJDENSON. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 1735) to provide for the use and distribution of funds awarded the Pembina Chippewa Indians in dockets numbered 113, 191, 221, and 246 of the Court of Claims, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut?

Mr. WALKER. Mr. Speaker, reserving the right to object, I do so to inquire of the gentleman just what we are doing, since we just passed this House legislation. Is the gentleman simply asking that the House language be substituted for the Senate language?

Mr. GEJDENSON. Mr. Speaker, if the gentleman will yield, yes, that is correct. I am about to do that.

Mr. WALKER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1735

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding any provision of the Act of October 19, 1973 (87 Stat. 466; 25 U.S.C. 1401, et seq.), or any other law, regulation, or plan promulgated pursuant thereto, any funds appropriated in satisfaction of a judgment awarded to the Pembina Chippewa Indians in dockets numbered 113, 191, 221, and 246 of the Court of Claims shall be used and distributed as provided in this Act.

SEC. 2. All of the funds appropriated with respect to the judgment awarded the Pembina Chippewa Indians in dockets 113, 191, 221, and 246 (less attorney fees and litigation expenses), including all interest and investment income accrued, shall be divided by the Secretary of the Interior (hereinafter in this Act referred to as the "Secretary") among the Turtle Mountain Band of Chippewa Indians, the Chippewa Cree Tribe of Rocky Boy's Reservation, the Minnesota Chippewa Tribe, the Little Shell Tribe of Chippewa Indians of Montana and the nonmember Pembian descendants (as a group) so that each is allocated an amount which bears the same relationship to such funds as the number of members of such band, tribe, or group who are described under section 3(1), 4(1), 5(1), 6(1) or 7(a) bears to the sum of—

(1) the number of members of the Turtle Mountain Band of Chippewa Indians described in section 3(1),

(2) the number of members of the Chippewa Cree Tribe of Rocky Boy's Reservation described in section 4(1),

(3) the number of members of the Minnesota Chippewa Tribe described in section 5(1),

(4) the number of members of the Little Shell Tribe of Chippewa Indians of Montana as described in section 6(1), plus

(5) the number of nonmember Pembina Chippewas enrolled by the Secretary under section 7(a).

SEC. 3. The funds allocated by section 2 to the Turtle Mountain Bank of Chippewa Indians shall be used and distributed as follows:

(1) Eighty per centum of such funds shall be distributed in the form of per capita payments (in sums as equal as possible) to all enrolled members of the Turtle Mountain Band of Chippewa Indians who are living on the date of the enactment of this Act.

(2) Twenty per centum of such funds shall be held in trust and invested by the Secretary for the benefit of the members of the Turtle Mountain Band of Chippewa Indians. The governing body of such band is authorized to use the interest and investment income accrued on such 20 per centum portion, on an annual budgetary basis subject to the approval of the Secretary, for—

(A) the administration of such band, or

(B) social and economic programs.

Such 20 per centum portion of the principal shall not be available for per capital payments.

SEC. 4. The funds allocated by section 2 to the Chippewa Cree Tribe of Rocky Boy's Reservation shall be used and distributed as follows:

(1) Eighty per centum of such funds shall be distributed in the form of per capita payments (in sums as equal as possible) to all enrolled members of the Chippewa Cree Tribe of Rocky Boy's Reservation who—

(A) establish Pembina Chippewa ancestry to the satisfaction of the Secretary, and

(B) are living on the date of the enactment of this Act.

(2) Twenty per centum of such funds shall be held in trust and invested by the Secretary for the benefit of the members of the Chippewa Cree Tribe of Rocky Boy's Reservation. The governing body of such tribe is authorized to use the interest and investment income accrued on such 20 per centum portion, on an annual budgetary basis subject to the approval of the Secretary, for—

(A) economic programs

(B) recreation or

(C) tribal administration

Such 20 per centum portion of the principal shall not be available for per capita payments.

SEC. 5. The funds allocated by section 2 to the Minnesota Chippewa Tribe shall be used and distributed as follows:

(1) Eighty per centum of such funds shall be distributed in the form of per capita payments (in sums as equal as possible) to all enrolled members of the Minnesota chippewa Tribe who—

(A) are designated as Pembina Bank Chippewas on the basis of the tribal procedures which are approved by the Secretary, and

(B) are living on the date of the enactment of this Act.

(2) Twenty per centum of such funds shall be held in trust and invested by the Secretary for the benefit of the members of the Minnesota Chippewa Tribe. The White Earth Reservation Business Committee, in consultation with the Pembina Program Planning Committee, is authorized to use the interest and investment income accrued on such 20 per centum portion, on an annual budgetary basis subject to the approval of the Secretary, for—

(A) a joint investment and use program for the bans affiliated with the reservation, or

(B) reservation social and economic programs.

Such 20 per centum portion of the principal shall not be available for per capita payments.

SEC. 6. The funds allocated by section 2 to the Little Shell Tribe of Chippewa Indians of Montana shall be used and distributed as follows:

(1) Eighty per centum of such funds shall be distributed in the form of per capita payments (in sums as equal as possible) to all enrolled members of the Little Shell Tribe of Chippewa Indians of Montana who are living on the date of enactment of this Act and who meet the enrollment criteria under section 7(a) of this Act.

(2) Twenty per centum of such funds shall be held in trust and invested by the Secretary for the benefit of the members of the Little Shell Tribe of Chippewa Indians of Montana. The governing body of such tribe is authorized to use the interest and investment income accrued on such 20 per centum portion, on an annual budgetary basis subject to the approval of the Secretary, for—

(A) the administration of such tribe, or

(B) social and economic programs:

Provided, That the Secretary shall act on the Tribe's petition for Federal recognition prior to September 30, 1985. In the event that recognition is not approved, the twenty per centum portion shall be distributed in the form of per capita payments (in sums as equal as possible) to those persons who qualify for per capita payments under Section 6(1):

Provided further, That if the Secretary fails to act on the recognition petition by September 30, 1985, the Secretary shall make a report to Congress on that date outlining the reasons for his failure to act and shall make no per capita payments under this subsection until action on the petition is final.

SEC. 7. (a) In order to establish eligibility to participate in the distribution of the funds allocated to the nonmember Pembina Chippewa descendants under section 2, the Secretary shall develop a roll of all individuals who—

(1) are of at least one-quarter Pembina Chippewa blood.

(2) are citizens of the United States,

(3) are living on the date of the enactment of this Act,

(4) are not member of the Red Lake Band of Chippewa Indians, the Turtle Mountain Band of Chippewa Indians, the Chippewa Cree Tribe, or the Minnesota Chippewa Tribe, and

(5) are—

(A) enrolled, or the descendants of a linal ancestors enrolled—

(i) as Pembina descendants under the provisions of the Act of July 29, 1971 (85 Stat. 158), for the disposition of the 1863 Pembina Award, or

(ii) on the McCumber roll of Turtle Mountain Indians of 1892, or

(iii) on the Davis role of Turtle Mountain Indians of 1904, or

(iv) as Chippewa on—

(I) the tentative roll of the Rocky Boy Indians of May 30, 1917, or

(II) the McLaughlin census report of the Rocky Boy Indians of July 7, 1917, or

(III) the Roe Cloud roll of Landless Indians of Montana, or

(B) able to establish Pembina ancestry on the basis of any other rolls or records acceptable to the Secretary.

(b) The Secretary shall promulgate regulations regarding nonmember Pembina enrollment procedures and shall utilize any documents acceptable to the Secretary in establishing eligibility of an individual to receive funds under this section.

(c) Funds allocated to the nonmember Pembina descendants under section 2 shall be distributed on a per capita basis to the individuals enrolled under subsection (a).

SEC. 8. (a) Any payment of a per capita share of funds to which a living, competent adult is entitled under this Act shall be paid directly to such adult.

(b) Any per capita share of funds to which a deceased individual is entitled under this Act shall be paid, and the beneficiaries thereof determined under regulations prescribed by the Secretary.

(c) Any per capita share of funds to which a legally incompetent individual or an individual under eighteen years of age is entitled under this Act shall be paid in accordance with such procedures (including the establishment of trusts) as the Secretary determines to be necessary to protect and preserve the interests of such individual.

SEC. 9. None of the funds distributed under this Act shall be subject to Federal or State income taxes or be considered income or resources when determining eligibility for, or the amount of, assistance under the Social Security or any Federal or federally assisted program.

MOTION OFFERED BY MR. GEJDENSON

Mr. GEJDENSON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. GEJDENSON moves to strike out all after the enacting clause of the Senate bill (S. 1735) and insert in lieu thereof the provisions of the bill, H.R. 6416, as passed by the House, as follows:

That, notwithstanding any provision of the Act of October 19, 1973 (87 Stat. 466; 25 U.S.C. 1401, et seq.), or any other law, regulation, or plan promulgated pursuant thereto, any funds appropriated in satisfaction of a judgment awarded to the Pembina Chippewa Indians in dockets numbered 113, 191, 221, and 246 of the Court of Claims shall be used and distributed as provided in this Act.

SEC. 2. All of the funds appropriated with respect to the judgment awarded the Pembina Chippewa Indians in dockets 113, 191, 221, and 246 (less attorney fees and litigation expenses), including all interest and investment income accrued, shall be divided by the Secretary of the Interior (hereinafter in this Act referred to as the "Secretary") among the Turtle Mountain Band of Chippewa Indians, the Chippewa Cree Tribe of Rocky Boy's Reservation, the Minnesota Chippewa Tribe, the Little Shell Band of the Chippewa Indians of Montana, and the nonmember Pembina descendants (as a group) so that each is allocated an amount which bears the same relationship to such funds as the number of members of such band, tribe, or group who are described under section 3(1), 4(1), 5(1), or 6(1) or 7(a) bears to the sum of—

(1) the number of members of the Turtle Mountain Band of Chippewa Indians described in section 3(1).

(2) the number of members of the Chippewa Cree Tribe of Rocky Boy's Reservation described in section 4(1).

(3) the number of members of the Minnesota Chippewa Tribe described in section 5(1),

(4) the number of members of the Little Shell Band of the Chippewa Indians of Montana as described in section 6(1) plus

(5) the number of nonmember Pembina Chippewas enrolled by the Secretary under section 7(a).

SEC. 3. The funds allocated by section 2 to the Turtle Mountain Band of Chippewa Indians shall be used and distributed as follows:

(1) Eighty per centum of such funds shall be distributed in the form of per capital payments (in sums as equal as possible) to all enrolled members of the Turtle Mountain Band of Chippewa Indians who are living on the date of the enactment of this Act.

(2) Twenty per centum of such funds shall be held in trust and invested by the Secretary for the benefit of the members of the Turtle Mountain Band of Chippewa Indians. The governing body of such band is authorized to use the interest and investment income accrued on such 20 per centum portion, on an annual budgetary basis subject to the approval of the Secretary, for—

(A) the administration of such band, or

(B) social and economic programs.

Such 20 per centum portion of the principal shall not be available for per capita payments.

SEC. 4. The funds allocated by section 2 to the Chippewa Cree Tribe of Rocky Boy's Reservation shall be used and distributed as follows:

(1) Eighty per centum of such funds shall be distributed in the form of per capital payments (in sums as equal as possible) to all enrolled members of the Chippewa Cree Tribe of Rocky Boy's Reservation who—

(A) establish Pembina Chippewa ancestry to the satisfaction of the Secretary, and

(B) are living on the date of the enactment of this Act.

(2) Twenty per centum of such funds shall be held in trust and invested by the Secretary for the benefit of the members of the Chippewa Cree Tribe of Rocky Boy's Reservation. The governing body of such tribe is authorized to use the interest and investment income accrued on such 20 per centum portion, on an annual budgetary basis subject to the approval of the Secretary, for—

(A) economic programs,

(B) recreation, or

(C) tribal administration.

Such 20 per centum portion of the principal shall not be available for per capital payments.

SEC. 5. The funds allocated by section 2 to the Minnesota Chippewa Tribe shall be used and distributed as follows:

(1) Eighty per centum of such funds shall be distributed in the form of per capita payments (in sums as equal as possible) to all enrolled members of the Minnesota Chippewa Tribe who—

(A) are designated as Pembina Band Chippewas on the basis of tribal procedures which are approved by the Secretary, and

(B) are living on the date of the enactment of this Act.

(2) Twenty per centum of such funds shall be held in trust and invested by the Secretary for the benefit of the members of the Minnesota Chippewa Tribe. The White Earth Reservation Business Committee is authorized to use the interest and investment income accrued on such 20 per centum portion, on an annual budgetary basis subject to the approval of the Secretary, for—

(A) a joint investment and use program for the bands affiliated with the reservation, or

(B) reservation social and economic programs.

Such 20 per centum portion of the principal shall not be available for per capita payments.

SEC. 6. The funds allocated by section 2 to the Little Shell Tribe of Chippewa Indians of Montana shall be used and distributed as follows:

(1) Eighty per centum of such funds shall be distributed in the form of per capita payments (in sums as equal as possible) to all enrolled members of the Little Shell Tribe of Chippewa Indians of Montana who are living on the date of the enactment of this Act and who would meet the enrollment criteria under section 7(a) of this Act if they were not enrolled members of the Little Shell Tribe of Chippewa Indians of Montana.

(2) Twenty per centum of such funds shall be held in trust and invested by the Secretary for the benefit of the members of the Little Shell Tribe of Chippewa Indians of Montana. The governing body of such tribe is authorized to use the interest and investment income accrued on such 20 per centum portion, on an annual budgetary basis subject to the approval of the Secretary, for—

(A) the administration of such tribe, or

(B) social and economic programs:

Provided, That the Secretary shall act on the tribe's petition for Federal recognition prior to September 30, 1985. In the event that recognition is not approved, the 20 per centum portion shall be distributed in the form of per capita payments (in sums as equal as possible) to those persons who qualify for per capita payments under section 6(1): *Provided further*, That if the Secretary fails to act on the recognition petition by September 30, 1985, the Secretary shall make a report to Congress on that date outlining the reasons for his failure to act and shall make no per capita payments under this subsection until action on the petition is final.

SEC. 7. (a) In order to establish eligibility to participate in the distribution of the funds allocated to the nonmember Pembina Chippewa descendants under section 2, the Secretary shall develop a roll of all individuals who—

(1) are of at least one-quarter Pembina Chippewa blood,

(2) are citizens of the United States,

(3) are living on the date of the enactment of this Act,

(4) are not members of the Red Lake Band of Chippewa Indians, the Turtle Mountain Band of Chippewa Indians, the Chippewa Cree Tribe, or the Minnesota Chippewa Tribe, or the Little Shell Band of Chippewa Indians of Montana, and

(5) are—

(A) enrolled, or the descendants of a lineal ancestor enrolled—

(i) as Pembina descendants under the provisions of the Act of July 29, 1971 (85 Stat. 158), for the disposition of the 1863 Pembina Award, or

(ii) on the McCumber roll of Turtle Mountain Indians of 1892, or

(iii) on the Davis roll of Turtle Mountain Indians of 1904, or

(iv) as Chippewa on—

(I) the tentative roll of the Rocky Boy Indians of May 30, 1917, or

(II) the McLaughlin census report of the Rocky Boy Indians of July 7, 1917, or

(III) the Roe Cloud Roll of Landless Indians of Montana, or

(B) able to establish Pembina ancestry on the basis of any other rolls or records acceptable to the Secretary.

(b) The Secretary shall promulgate regulations regarding nonmember Pembina enrollment procedures and shall utilize any documents acceptable to the Secretary in establishing eligibility of an individual to receive funds under this section.

(c) Funds allocated to the nonmember Pembina descendants under section 2 shall be distributed on a per capita basis to the individuals enrolled under subsection (a).

SEC. 8. (a) Any payment of a per capita share of funds to which a living, competent adult is entitled under this Act shall be paid directly to such adult.

(b) Any per capita share of funds to which a deceased individual is entitled under this Act shall be paid, and the beneficiaries thereof determined under regulations prescribed by the Secretary.

(c) Any per capita share of funds to which a legally incompetent individual or an individual under eighteen years of age is entitled under this Act shall be paid in accordance with such procedures (including the establishment of trusts) as the Secretary determines to be necessary to protect and preserve the interests of such individual.

SEC. 9. None of the funds distributed per capita or made available under this Act for programs shall be subject to Federal, State, or local income taxes or be considered income or resources or otherwise utilized as the basis for denying or reducing the financial assistance or benefits to any person or ⅛household participating in any Federal, State, or local programs.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, passed, and a motion to reconsider was laid on the table.

A similar House bill (H.R. 6416) was laid on the table.

THE ADMINISTRATION'S OUTRAGEOUS TAX PLANS

Mr. PEYSER. Mr. Speaker, in the last 3 to 4 months we have seen this administration suggest to us that we should have a means test for medicare; suggest to us that we should be taxing social security benefits; suggest to us and carry out that we should cut from higher education and school lunch programs; suggest that we tax unemployment benefits; and finally, this weekend, come forth with the suggestion that we now should have employees be taxed for the money paid on their health benefits.

Mr. Speaker, we have rejected most of these taxing plans as being outrageous. It offends the people of this country. It attacks the middle income areas. It attacks the elderly, it attacks the poor.

When, Mr. Speaker, is this administration going to understand that this Congress is not going to follow through with these actions and, hopefully, the Congress that comes in next January in 1983 will be even stronger in rejecting these efforts.

THE CONGRESSIONAL PAY RAISE

(Mr. HIGHTOWER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HIGHTOWER. Mr. Speaker, in the next several weeks this Congress will be faced once again with the issue of whether or not to increase its own pay. Unless Congress acts otherwise, a cost-of-living increase of either $2,400 or $16,600, depending on how Congress chooses to calculate it, wil automatically be added to our base salary of about $60,000. Now, no matter what people may think about the amount of money that a Member of Congress earns—and I know that there are some who think it is too high and some who think it is too low—the bottom line is that now is not the time for a congressional pay raise.

We are nearly at the end of 1982. At this point, we are faced with an economy which, in spite of our best efforts, continues to falter. There are 11.6 million Americans out of work, the highest unemployment rate since the Great Depression. So far this year, over 22,000 American businesses have failed—nearly twice as many business failures as last year at this time. And through it all, this Government has continued to spend money at an unprecedented rate, to such an extent that our Federal deficit for last year of $110 billion was by far the highest Federal deficit we have ever had. To choose a time in our country's history with statistics as appalling as these to allow ourselves a raise in pay is completely unconscionable. I do not understand it, nor do I condone it; and I know millions of Americans standing in unemployment lines and dipping into the last of their bank accounts will not understand it, nor will they condone it.

Mr. Speaker, our economic problems are grave and will be difficult to solve.

It will be hard for this Congress to find jobs for millions of unemployed Americans; it will be impossible for this Congress to reopen businesses that have already gone bankrupt and closed their doors. But, Mr. Speaker, it should be relatively easy for this Congress to take a few simple steps to keep down the level of Federal spending, and surely one of the most obvious steps to take is to say "no" to a pay raise for ourselves. I, for one, am completely unprepared to look my unemployed constituents in the eye and try to explain why Congress picked one of the worst economic times in recent memory to give itself a raise in pay.

CENTRAL AMERICA—HINGE OF FATE

(Mr. GONZALEZ asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GONZALEZ. Mr. Speaker, Central America is confronting the hinge of fate. The United States, if it follows a sensitive, positive role, can bring forward hope and progress to the beleaguered, suffering lands of that region. Or if our Government is blind, if it makes simple-minded blunders, the future will only bring oppression, misery, and death to innocent people—people who know or care nothing about ideology, and who only want a decent chance, a little respect, and a chance to earn enough money to survive on, to build for a better tomorrow.

President Reagan says that Gen. Rios Montt is a nice fellow who has gotten a bum rap. Tell that to the people who have witnessed the murder of babies, by soldiers using bayonets made in our own country—murder repcrted to me personally by the Bishop of Chiapas, who should know. Can babies be Communists? Do nice guys countenance the murder of innocents?

The President says that the governments he supports are not burning anybody, except Communists. Yet he has every reason to know that innocent people have been killed in El Salvador, in Guatemala, and elsewhere, in acts of cold murder, not by the dozens, not by the hundreds, but by the thousands. How can it be that the murder of civilians can be justified in the name of anything?

Mr. Reagan knows that Central America today looks more and more like the Vietnam of 20 years ago. What he should also know is that no amount of money, no amount of cheerleading, no amount of blinking at the facts, and no amount of violence, is going to insure the survival of any government for very long. There is no substitute for a government that asks for and deserves the support of its people. There is no substitute for a government that legitimately represents its people and that genuinely seeks to protect their rights, to promote their interests, and to protect their future. There is no substitute for a government that is honest. There is no substitute for a government that understands schoolbooks and plows are not only cheaper than soldiers, they are more appreciated by people who want nothing less, nothing more, than a decent chance to live unfettered, and to live decently.

It is terrifying to see now, with Central America at the very hinge of fate, for our President to dismiss casually those who protest against brutality, unwarranted murder, and wholesale repression. We cannot maintain honor by supporting dishonor; we cannot promote the cause of freedom by standing behind repression and tyranny. We cannot promote hope by stifling those who have just cause for complaint. We cannot build sound policies on the basis of quick trips, quick judgments, and quick endorsements of the same kinds of policies that created the disaster in Vietnam.

OTIS ELEVATOR TO CLOSE DOWN OPERATIONS IN YONKERS

(Mr. BIAGGI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BIAGGI. Mr. Speaker, on December 1, an act of moral larceny was committed against the city and people of Yonkers, N.Y. Otis Elevator Co. which has operated in Yonkers since 1852, announced it will close all of its operations effective in mid 1983.

Otis Elevator Co. is owned by United Technologies Corp. of Hartford, Conn. United Technologies acquired Otis in a swirl of controversy in 1975 after some $14 million in Federal, State, and city money was spent in 1974 to expand Otis operations and increase its employment to 2,000.

For 6 years, United Technology has conducted a reign of economic terror at Otis reducing the work force from 1,200 to just over 320 today less than 1 year from now that number could be 0.

Once again the arrogance and cruelty of large corporate mergers and or acquisitions has produced misery for hundreds of innocent working men and women and their families—is displayed. In this instance, United Technologies has demonstrated its calloused disregard for the people of Yonkers and especially the loyal workers at Otis some of whom have been with the company 30 and 40 years and represent the second or even third generation of Otis workers from the same family.

I will be representing Yonkers and the new 19th Congressional District beginning in January, However, my efforts to try and forestall this economic tragedy have begun and will continue with the hope that United Technologies and Otis will reconsider this most ill advised and morally bankrupt proposal.

□ 1415

THE JOBS LIMITATION ACT OF 1982?

(Mr. WALKER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WALKER. Mr. Speaker, over the last several weeks we have heard an awful lot of discussion in this country about putting America back to work. There can be no greater priority than that. Yet, today later on, we will probably consider a bill which could rightfully be called the Jobs Limitation Act of 1982.

Why the Jobs Limitation Act? Well, they call it the gas tax bill, but there is a major payoff in this bill to big labor. The big labor allies have gotten together and decided to put Davis-Bacon coverage in this bill. What is Davis-Bacon coverage? Well, it relates to the prevailing wages of the Federal Government, which means, according to the General Accounting Office, that Federal projects under Davis-Bacon thereby cost as much as 20 percent more.

What does that mean to jobs? Well, it translates to less jobs. The more the project costs, the less people we can afford to employ with that amount of dollars. Perhaps 20 percent less jobs. That would mean that 50,000 or more Americans not now working would not be able to get jobs under this bill, despite raising taxes to spur employment. That is shameful. It is a shameful payoff to big labor that would mean that some who otherwise might get a job will not now be able to get a job.

A FATE WORSE THAN DEATH

(Mr. DORNAN of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORNAN of California. Mr. Speaker, last night the evening news delivered to our Nation one of the most disturbing historical announcements that we have heard in years. It was reported that eight or nine American citizens, civilians working for the CIA, were lost when their aircraft was shot down somewhere over the Soviet Union way before Francis Gary Powers' U-2 aircraft was shot down, and that was on May 1 of 1960. The news story said that John Foster Dulles, then our Secretary of State, gave secret testimony about this loss of eight or nine Americans to the

Senate Committee on Foreign Relations in 1960. The evening news reported this information has just now been declassified and the CIA takes a position of "no comment," "no comment."

What in heaven's name was the fate of these eight or nine Americans. Are their families, 22 years later, still in the dark as to what happened to them? It is long overdue that their fellow American citizens know of their fate.

Last night there was a superb 1-hour documentary by NBC about the greatest military tragedy that American citizens have ever suffered: the indescribable abuse, torture, maiming, and murder of thousands of World War II Battle of Bataan and Corregidor survivors. In an awful irony of fate, 5,000 survivors of the Bataan death march died at sea by U.S. submarine attack because the Japanese warlords would not mark the prison ships transporting our men to Japan for slave labor in their coal mines. That horrible tragedy can only be surpassed with its nightmarish torture and death, by the insane possibility that U.S. CIA members, shot down over Russia in the fifties may still be alive in Siberian Gulag camps for over 22 years, like Raoul Wallenberg, the heroic Swedish citizen who may have survived, forgotten for over 36 years.

I pray that now, 22 years later, the truth will finally come out about these heroic "Nathan Hales" of the CIA who gave the full measure of devotion to their country. We in the Congress must know their fate. The citizens of the United States must know what happened to these loyal agents lost in 1959. Further secrecy serves absolutely no purpose whatsoever about our men who met a fate worse than death.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Saunders, one of his secretaries.

PROVIDING FOR CONSIDERATION OF H.R. 6211, SURFACE TRANSPORTATION ASSISTANCE ACT OF 1982

Mr. PEPPER. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 620 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order, any rule of the House to the contrary notwithstanding, to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6211) to authorize appropriations for construction of certain highways in accordance with title 23, United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes, and the first reading of the bill shall be dispensed with. After general debate, which shall be contained to the bill and to the amendments made in order by this resolution and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Public Works and Transportation, the bill shall be read for amendment under the five-minute rule. In lieu of the amendment in the nature of a substitute recommended by the Committee on Public Works and Transportation now printed in the bill, it shall be in order to consider an amendment in the nature of a substitute consisting of the text of the bill H.R. 7360 as an original bill for the purpose of amendment under the five-minute rule, said substitute shall be considered for amendment by titles instead of by sections and each title shall be considered as having been read, and all points of order against said substitute are hereby waived. It shall be in order to consider an amendment to said substitute recommended by the Committee on Ways and Means, if offered by the chairman of the Committee on Ways and Means or his designee, inserting a new title, and all points of order against said amendment for failure to comply with the provisions of clause 7, rule XVI, and clause 5, rule XXI, are hereby waived. Said amendment shall be debatable for not to exceed two hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means, and shall not be subject to amendment except amendments recommended by the Committee on Ways and Means, which shall not be subject to amendment. After the adoption of the amendment recommended by the Committee on Ways and Means, no further amendments to the bill shall be in order. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the amendment in the nature of a substitute made in order as original text by this resolution. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER. The gentleman from Florida (Mr. PEPPER) is recognized for 1 hour.

Mr. PEPPER. Mr. Speaker, for purposes of debate only I yield the customary 30 minutes to the able gentleman from Mississippi (Mr. LOTT), and pending that I yield myself such time as I may consume.

Mr. Speaker, House Resolution 620 provides for the consideration of H.R. 6211, the Surface Transportation Assistance Act of 1982. This very important bill would extend the surface transportation program for 4 years through fiscal year 1986. The Committee on Rules met on Friday last to consider a rule for the measure so that the House might consider the bill as expeditiously as possible.

Mr. Speaker, I would like first to describe for my colleagues the provisions of the rule before us. It is a modified open rule and follows the procedure set out for consideration of comparable legislation in the past. Basically, the rule takes the two bills that make up the surface transportation measure and combines them into one legislative package for floor consideration. The bill reported from the Committee on Public Works and Transportation is an authorization for surface transportation programs and is composed of four titles. It is used as the base vehicle. The bill from the Committee on Ways and Means is the funding mechanism, and it will be offered as a separate title to the Public Works Committee bill. The authorization portion, or public works bill, will be open to amendment and any germane amendment may be proposed to it. The funding portion or tax title will not be subject to amendment except by direction of the Committee on Ways and Means. This is the procedure generally followed in the past in comparable situations.

Specifically, the rule makes in order consideration of H.R. 6211 and allows 1 hour of general debate on the bill. The time is to be equally divided and controlled by the chairman and ranking minority member of the Committee on Public Works and Transportation. During consideration of the bill for amendment, the rule specifies that an amendment in the nature of a substitute consisting of the text of H.R. 7360 shall be considered as original text. There are four titles to the substitute, and it is to be considered by title with each title considered as having been read and thus open to amendment at any point within the title. All points of order are waived against consideration of the original bill and the substitute.

Once all amendments to the public works bill are disposed of, it shall be in order for the chairman of the Ways and Means Committee to offer an additional title to the bill. Two waivers of points of order are granted to allow consideration of the amendment. Clause 7, rule XVI, the germaneness rule, and clause 5, rule XXI, appropriations in a legislative bill, are both waived. The germaneness waiver is necessary because the Ways and Means portion of the bill amends the Internal Revenue Code and the public works bill does not. The appropriations waiver is necessary because of the transfer of tax revenue into the highway trust fund.

The new title of the bill will then be debatable for 2 hours with the time equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means. No amendment shall be in order to the title except amendments from the Committee on Ways and Means which likewise would not be

subject to amendment. Upon adoption of the Ways and Means amendment, no further amendment would be allowed to the bill.

The bill then would be reported back to the House under the normal parliamentary procedure, allowing separate votes on amendments adopted in the Committee of the Whole. One motion to recommit with or without instructions would be in order prior to final passage of the legislation.

Mr. Speaker, as I said earlier in my remarks, this is a very important bill. It provides crucially needed funds to expand and maintain the vitally important networks of highways and mass transit systems in this country. The highway titles of the bill authorize some $12.1 billion in fiscal year 1983 with increasing increments over the next 3 years for a total authorization of some $53.4 billion over the 4-year period for highways and safety. This funding would allow expeditious completion of the Interstate System, clearly the system of highest Federal responsibility. Preservation of the system is provided by funding for interstate resurfacing, restoration, rehabilitation and reconstruction. Funding for system-related primary highway programs is also continued as well as authorizations for badly needed bridge replacement and rehabilitation.

The bill further changes requirements of the Highway Act to facilitate better coordination between the States and the Federal Government in constructing and maintaining highway networks. Truck size and weight provisions are revised to require States to allow larger trucks on the Interstate System.

The revenue title would add 5 cents per gallon to the fuels tax. Revenues equivalent to 1 cent per gallon of the fuels tax would be earmarked for a new mass transit account to be set up within the highway trust fund. This revenue would be available for transit capital expenditures, including new projects. Changes are also made to simplify the current highway excise tax structure and to implement the findings of the Department of Transportation's highway cost allocation study.

Mr. Speaker, while there may be specific provisions of this legislative package that Members may not agree with—indeed there are provisions particularly relating to the size of the heavy vehicle use tax increase and the rate at which it is to take effect which I along with several of my colleagues questioned during the Rules Committee hearing. The fact remains, Mr. Speaker, that the country needs this legislation. Most of the concerns expressed at the Rules Committee can be addressed through amendments to the public works portion of the bill. While the rule does not allow individual Members to directly amend the tax title, it would be possible for the Member controlling the motion to recommit to include instructions germane to that portion of the bill.

Mr. Speaker, the Rules Committee also heard testimony—most eloquently stated by our colleague, Mr. REUSS—that the added nickel gasoline tax is the wrong way to go. Mr. REUSS proposed a cap on the third year of the tax cut and asked that his amendment be allowed as an alternative. Unfortunately, this amendment is nongermane and the Rules Committee did not see fit to make it in order.

While I sympathize with my distinguished colleague's position and agree with him that there should be a cap on the third year of the tax cut, I do not believe this is the place or the time. Let us face political facts. H.R. 6211 has significant bipartisan support in the House. It is supported by the leadership of the other body and the President has endorsed the concept. Our highway and mass transit systems desperately need the funding. Although it does not come close to meeting the needs of our millions of unemployed, it does mean jobs, at least some jobs and with a 10.8-percent unemployment rate that is not a factor to take lightly. It is estimated that the bill will create some 320,000 jobs.

We must remember that politics is the art of compromise. Negotiation itself precludes the gaining of a whole loaf. Political compromise always results in gaining only a portion of the loaf. It has been ever thus. So let me urge my colleagues to take the portion we have gained and to wait for a more opportune time to reach out for a larger slice. I do not counsel abandoning the fight but simply look for higher ground on the battlefield from which to wage the assault.

Mr. Speaker, this rule is as fair a document as we could assemble at the Rules Committee. It allows the House fairly to work its will on the legislative package while maintaining the delicate balance of that package.

□ 1430

So, therefore, Mr. Speaker, I urge my colleagues to adopt House Resolution 620 so that we might consider H.R. 6211, the Surface Transportation Act of 1982, with the hope that we may soon put into effect what this program will contribute to the country.

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as has most eloquently been explained, this is the rulemaking in order consideration of H.R. 6211, the Surface Transportation Act of 1982. It is a 4-year authorization for highway construction, highway safety, and mass transportation. But, also contained in the bill is the new revenue measure which provides additional user fees on those who use the Nation's highways.

The rule does waive any rule of the House which might work against consideration of the bill. It provides for 1 hour of general debate, and makes in order an amendment in the nature of a substitute and and an amendment to that substitute. The amendment in the nature of a substitute is in lieu of the public works amendment contained in the bill, and consists of the text of H.R. 7360, the Highway Improvement Act of 1982.

The rule provides that all points of order against the substitute are waived. It also is open to amendment under the 5-minute rule, and will be read by titles instead of by sections for that purpose.

Mr. Speaker, the rule also makes in order an amendment to the substitute by the Ways and Means Committee, and provides for 2 hours of debate on this amendment. The amendment contains the new revenue measure and is not subject to amendment except by amendments recommended by the House Ways and Means Committee, which are also not open to amendment.

For the Ways and Means Committee amendment only, the rule waives clause 7, rule XVI, the provisions that are not germane to the bill; and clause 5, rule XXI, which provides for the appropriations in this bill, which is basically a legislative bill.

After adoption of the Ways and Means Committee amendment, no other amendment shall be in order. The rule provides for no other motion except one motion to recommit with or without instructions.

So, basically the situation will be this under the rule, Mr. Speaker: We will take up general debate first on the public works portion of the bill. That debate will be for 1 hour. After that period, we will then have the amendments to the public works portion of the bill. After that is completed, we will go to the Ways and Means title of the bill, which will be subject to 2 hours of debate but not subject to any amendments except amendments by the Committee on Ways and Means, which are also not subject to amendment.

So, after the 2 hours of general debate on the Ways and Means Committee, basically that would be it. I realize that there are some objections to any rule that ever is closed, partially or totally, but in order to get this legislation, which involves the two committees, before this body today and have it considered properly, with both committees having their opportunities to be heard, and with amendments to the public works section, I think it is a fair rule, and I do support the rule.

Mr. KAZEN. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from Texas.

Mr. KAZEN. Mr. Speaker, it is ironic that the portion of the bill that is going to have the least controversy has 1-hour general debate, and is subject to amendment. The portion that is the most controversial but is not subject to amendment gets 2 hours of debate. A lot of good that is going to do us when we come to figuring out what the licensing provisions and the increases in licensing for trucks and certain modes of transportation are. Those are the things that our constituents are mostly talking about. My truckers, for instance, do not object to the 5-cent gasoline tax, but they do object to the way licensing and excise taxes will be increased. They claim—one of them claims—that his rate goes from $210 to $2,000 and we will not have any opportunity to amend that portion to lower it a little bit and make it more equitable and might keep some firms from going broke.

How in the world can the Rules Committee expect us in all good conscience to be able to sit here and vote for a rule that closes this part of the bill which has so great an effect on the people of this country and on the jobs of these people who are going to lose them because of the provisions of that particular part of the bill?

Mr. LOTT. I will be glad to try to respond to the gentleman's question because I think obviously it is a very legitimate question, and one which is raised quite often and one that I generally, basically agree with the gentleman on.

There are two reasons for the 2 hours of debate; so that you can have plenty of time to ask questions and have clarification made about those provisions of title 5.

Mr. KAZEN. What good will it do me if I cannot amend it?

Mr. LOTT. The second point is, as the gentleman well knows, over his long and distinguished career here in the House of Representatives, those measures which come from the Ways and Means Committee have traditionally been, going back over the 14 years I have been here, closed, and this is a Ways and Means tax provision which we are dealing with.

Mr. KAZEN. Yes; this has always been so, where there was a danger of amending the entire Tax Code. In this instance I do not believe that is true. Other amendments would not be germane, and there is not that much to the Tax Code pertaining to the subject matter. I have supported that rule in the past on many occasions, as has the gentleman, when there was a danger of opening up the entire Tax Code to amendment, and certainly we would not be for that.

Mr. LOTT. Well, seeing as how most of the time I do agree with the gentleman and find it very difficult to defend this type of rule, I must say it is broader than the gentleman might indicate by just saying it is a very limited area, because there are, as a matter of fact, several sections involved in the Code in this particular title, but I would like to, if I might, reserve the balance of my time to allow the prospective chairman of the Rules Committee, our ranking member from Florida, to respond also.

Mr. KAZEN. I thank my colleague from Mississippi for yielding.

Mr. HARTNETT. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from South Carolina.

Mr. HARTNETT. Mr. Speaker, I appreciate the gentleman yielding to me. I find it passingly strange that the gentleman from Mississippi would all of a sudden become a disciple of a closed rule. The gentleman just told the gentleman from Texas that for 14 years anything coming out of the Ways and Means Committee is customarily a closed rule. The gentleman and I came here to do things differently from how they had been doing them for the last 14 years, and the gentleman is disenfranchising me as the Representative from the First District of South Carolina from offering any amendments to this bill whatsoever, and yet there are a substantial number of my constituents who reside in South Carolina who are going to be adversely affected by this. I wish the gentleman could tell me how he could advocate the changes which he and I propose, and still be a disciple of a closed rule on a bill that raises substantial revenue on the backs of an industry that is already adversely affected by this economy.

Mr. LOTT. I agree with the gentleman from South Carolina, there are many things we would like to change when the day comes when we are in the majority. I suspect there will be occasions when we will support what will be a modified closed rule. It is open anyway on four titles, and that is one reason why we had 2 hours of debate, so that the gentleman could ask questions, because as a matter of fact, when we get into debate on the substance of this bill I think a lot of Members are going to find that they have misconceptions or misinterpretations about what is going to be the impact of the Ways and Means Committee section.

If I might continue, this is a measure which we are trying to have considered by the House and acted upon for a variety of reasons. We have a number of vital issues facing us, including a very important bill that we will be working on and voting on tomorrow involving the defense of this Nation. We have 2 weeks in which to do an awful lot of vitally important work, and if we take this particular bill and use up 2 or 3 days it is going to be awfully hard to get a lot of other very important legislation finished.

Mr. HARTNETT. Will the gentleman yield further?

Mr. LOTT. I will yield.

Mr. HARTNETT. I think the gentleman said he gave us 2 hours, but——

Mr. LOTT. One hour on the rule, 1 hour on public works, and 2 hours on ways and means, plus the amendment process under the 5-minute rule under the public works portion.

Mr. HARTNETT. If the gentleman will yield, he gives me 2 hours of debate but only an hour on the rule, and once the rule is adopted there is no use in my doing any debating whatsoever because it is not to my advantage. I cannot offer any amendments, any deletions, any additions, no changes at all. So, the gentleman gives me, in effect, 1 hour. I say to my friend, the Republican whip, the minority rouser, he gives me 1 hour, and all my colleagues here who may want to amend this bill, 1 hour, because once this rule passes then no amendments are in order. I do not need 2 hours to amend the bill when the gentleman only gives me 1 hour to debate.

Mr. LOTT. I think the gentleman will have more than that, and he will have amendments on the public works section.

Mr. HAMMERSCHMIDT. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from Arkansas.

Mr. HAMMERSCHMIDT. Mr. Speaker, I would ask my distinguished colleague if, under this rule, it would be possible to offer a motion to recommit with instructions to title 5 of the bill.

Mr. LOTT. Would the gentleman restate the question?

Mr. HAMMERSCHMIDT. I wonder if the gentleman would tell me whether it would be possible to offer a motion to recommit with instructions to title 5 of the bill.

Mr. LOTT. A motion to recommit with instructions is in order under the rule, and would be in order. It would be possible.

Mr. HAMMERSCHMIDT. I thank the gentleman.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, let me ask a question with regard to the public works section. Do I understand that the public works section of the bill is fully open to amendment?

Mr. LOTT. That is correct.

Mr. WALKER. In other words, I have a concern about one of the greatest political payoffs in history that is in the bill, the payoff to big labor under Davis-Bacon. As I understand it, that is in the public works portion of the bill. Can I assume, then, that we

would be able to get at the Davis-Bacon language completely through the amendment process under this rule?

Mr. LOTT. Absolutely, and to facilitate the flow of debate here I would reserve some of my time if the distinguished gentleman from Florida has some additional debate.

Mr. PEPPER. Mr. Speaker, I have one request for time.

Mr. LOTT. Mr. Speaker, I reserve the balance of my time.

Mr. PEPPER. Mr. Speaker, I yield 3 minutes to the able gentleman from New York (Mr. OTTINGER).

Mr. OTTINGER. Mr. Speaker, I thank my friend from Florida for yielding. I take this time to urge a vote against this rule.

The gentleman from Wisconsin, HENRY REUSS, on behalf of himself and me, as the gentleman from Florida has indicated, sought before the Rules Committee to get made in order an alternative tax provision that would be far fairer to the American people, far less inflationary, far less a burden on the ordinary working man than the tax which the Ways and Means Committee has provided. Unfortunately, the Rules Committee did not see fit to grant us that permission, but I see no reason why the House should not be allowed to work its will on our alternative.

We have decided as a matter of tactics to make our main effort to try to defeat the tax provision which will be presented as title 5, and ask the Ways and Means Committee or the Rules Committee to make in order a more appropriate tax. The tax alternative we have proposed is to cap the third year of the tax increase scheduled to go into effect in July 1983, by $700 per taxpayer, which in effect means that the cutoff would be people making $45,000. People below that amount would have the full tax reduction, but people above that amount would bear the burden of paying for this program. Capping the reduction would produce $7 billion in revenues, considerably more than needed to pay for this program.

In last year's tax bill we substantially relieved wealthy people and all of the large corporations from their obligation to pay their fair share of taxes. Now, we come in and say we are going to put a 5-cent-a-gallon tax on gasoline, which hits the working man and woman of this country, the people who have to drive to and from their jobs and low-income Americans. The gasoline tax is highly inflationary because it will be reflected in the cost of all the goods and services that our people have to pay for. It is very regressive—the person who makes $100,000 per year pays the same 5 cents a gallon as the person making $10,000 per year. And the gasoline tax will take $5.5 billion out of the pockets of consumers, causing further layoffs and unemployment.

□ 1445

At a time when our economy is really on its uppers and many of the working people of this coountry have lost their jobs and many of them are fearful of losing their jobs and there is great pressure not to have any wage increases, to put this additional burden on the working men and women of this country is, I think just plain wrong and unconscionable; it shifts from a progressive income tax that was decimated by the Tax Reduction Act to a very regressive tax, because the millionaire pays the same 5-cent-a-gallon increase as the person who is just marginally making it with his or her spouse and he or she each working full time.

So I think this tax is wrong. I think it will have a dilatory effect on an already tottering economy. I think we ought to have the opportunity to consider the more fair and equitable capping of the tax reduction that Congressman REUSS and I sought to make in order.

Mr. Speaker, for that reason I will oppose the rule, and if we are not successful in voting down the rule, I will oppose the tax measure that is made in order under the rule.

Mr. LOTT. Mr. Speaker, I again yield myself such time as I may consume for the purpose at this point of noting that my understanding is that the amendment that would be offered by the gentleman from New York (Mr. OTTINGER) would not be germane anyway even if he should prevail.

At this point, Mr. Speaker, I will yield to the gentleman from Indiana (Mr. MYERS) for comment.

Mr. MYERS. Mr. Speaker, I thank my colleague, the gentleman from Mississippi, for yielding.

Mr. Speaker, I share the concern of the gentleman from New York about the closed nature of the tax provisions of this bill, title 5. While this certainly is no surprise or nothing new, because most tax measures do come to this floor under a closed rule, I had hoped that would not be the case because this bill covers so many different issues and so many different subjects.

I had prepared an amendment which would allow the tax increase on gasoline to provide that the States be given the first opportunity to increase the tax, to collect the tax themselves and to spend it as they saw fit on their highways or on their transportation systems.

It seems to me this would have been much better than sending the money through Washington, as we so frequently do, and getting a very, very poor return.

I have this amendment prepared and expected to introduce it. If the States did not impose the additional tax on their gasoline within a given space of time, the Federal Government would then impose the tax. I regret that I cannot offer that amendment, because I believe the needed improvement in our highways, as far as new construction, maintenance of existing highways, and replacement and repair of bridges are concerned, can be done best by the States, with the tax collected by them. I regret that we do not have the opportunity to vote on such a measure which would be getting more benefits including more money for jobs.

Mr. Speaker, I thank my colleague for yielding.

Mr. KAZEN. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I would be glad, Mr. Speaker, to yield during the limited time we have left for a question or two that the gentleman may have.

Mr. KAZEN. Mr. Speaker, I just wish to rise to express my concern with the closed part of this rule to the Ways and Means Committee portion of the bill.

This started out to be a 5-cent-a-gallon tax bill. I think most everybody would agree that this is needed for the purposes that the gentleman just stated, but the Committee on Ways and Means went way beyond that 5 cents. I do not know who it was that convinced them that we needed much more than that 5 cents at a time when the economy is in the shape it is in, but the Committee on Ways and Means has come in here with provisions on licenses, increases in license fees, and excise taxes, which may cut back on jobs at a time when unemployment is what it is today.

I would certainly hope that somehow or other, after defeating this bill, if we are able to defeat it, that we would separate the two portions of this bill and leave the public works bill intact. The constituents I have heard from do not object so much to the 5-cent gasoline tax. Their objection goes to the Ways and Means part of the bill, and I would hope that the House would go along with us in defeating this bill and seeing if we can get two separate bills or just pass the public works portion of this bill.

Mr. LOTT. Mr. Speaker, I have several requests remaining, and at this point I yield 3 minutes to the gentleman from Arizona (Mr. RUDD).

Mr. RUDD. Mr. Speaker, I am very interested in what has taken place in a couple of the colloquys here, especially those by the gentleman from Texas and also the gentleman from North Carolina. I have constituents who traveled clear across our great land to arrive here this morning to plead their case against this rule, which is not open enough to try to amend what has been put into the bill with regard to the user tax.

The small operators and truckers across this land find themselves in a great dilemma, and that dilemma means going out of business or going into bankruptcy at a time when we are talking about providing—and I am in favor of this—300,000 jobs from this tax. These truckers I am talking about are not opposed to the 5-cent-a-gallon tax; what they are opposed to is that user tax which will, as my colleagues said earlier, provide for a payment jumping from $200 a truck to $2,000 a truck, and a 10-trucker operation will be paying $20,000. This means that we may be providing jobs for the workingman, but we are going to trade those jobs and put truck drivers and the people in the trucking industry out of work.

The user tax also applies to supporting industries that sell parts to these truckers. They are going to have to go out of business. It is as simple as that.

I am opposed to this rule, which will not provide for amendments that will alleviate this terrible situation that is imposed upon the small trucking companies across the Nation. The large trucking companies can probably live with it all right because they operate on a much broader scale, traveling back and forth across the Nation but the small trucking companies cannot do it.

Mr. Speaker, I must oppose this bill, and I urge my colleagues to oppose this bill, not because we are opposed to the tax, because when it first came out, everybody agreed that we need it to provide more jobs and to repair the roads across the land, but this part of the bill is absolutely unacceptable.

Mr. Speaker, I hope we will reject the rule and recommit it to the committees so they may have a chance to amend that part of the rule.

Mr. Speaker, I rise to oppose the rule of this bill because it contains revenue provisions which I believe have not been carefully considered by this body and which are not open to amendment.

During the past several weeks, we have heard strong support for augmenting the highway trust fund in order to repair and rebuild our Nation's highways, and create about 300,000 jobs in the process.

However, the revenue amendment which has emerged from the Ways and Means Committee contains some provisions which could be devastating to the small- and medium-sized transport companies across the country. Take a close look at what is provided in this amendment, and you will see that heavy trucks will incur a 1,000-percent increase in highway user fees. Take, for instance, the operator with 10 large units. That man currently pays $210 per truck each year or $2,100 in Federal highway use taxes. His taxes under the new bill will go to $2,000 per vehicle, or $20,000, that is before the cost of the 5-cents-a-gallon increase in fuel tax is added in. Not only that, but these small operators, many of whom only make short hauls, will not benefit from the exchanges that were included in the bill which will allow transcontinental truckers to increase their productivity and make up for the increase in taxes. They will just have to take it out of their pockets.

These sorts of computations are going on right now all over the country, and the net result that trucking operators are coming up with is that they will not be in business for very much longer. These tax provisions are going to force smaller trucking companies into bankruptcy.

It does not make sense, Mr. Chairman. One of the aims of this bill is to put people back to work. All we will have done with this plan is trade truck drivers' jobs for construction jobs. Not only that, but the automotive, equipment manufacturing, and servicing industries which support the trucking industry will soon be laying off workers and closing their doors.

I do not oppose the 5-cents-a-gallon gas tax, and I believe the trucking industry is willing to invest its tax dollars in order to see roads repaired and maintenance costs on their equipment reduced. But we did not bargain for a bill which would levy a billion dollar tax increase on the trucking industry—an increase which will weigh heaviest on small operators. I urge my colleagues to vote with me against the rule, and against the revenue title of this bill. So that it may be recommitted to remedy the imposition on small truckers.

Mr. LOTT. Mr. Speaker, I yield 2 minutes to the gentleman from Minnesota (Mr. STANGELAND).

Mr. STANGELAND. Mr. Speaker, I rise in strong opposition to House Resolution 620 which makes in order the consideration of Federal-aid highway and mass transit legislation to be financed by increased highway-user excise taxes from the highway trust fund.

As a member of the House Surface Transportation Subcommittee who has participated in the extensive series of hearings and markups on the highway authorizing legislation scheduled for consideration today, I will be the first to agree that revenues from the highway trust fund have not kept pace with the necessary highway and transit programs facing this country. Highways, bridges, and our mass transit systems are deteriorating at an alarming rate, thereby jeopardizing both safety and efficiency of our basic transportation systems as well as the billions of dollars of investment we have already spent on these programs.

While I wholeheartedly agree that an increase in revenues for our programs is vital, I also feel that the impact of rebuilding and maintaining our infrastructure should not fall unduly on one class or group. Unfortunately, title V of the legislation to be considered, known as the Ways and Means Committee revenue title, unfairly burdens truckers, an industry that is already suffering from the current economic situation. Under this rule, no amendments will be allowed to the revenue portion of this bill, thereby saddling the trucking industry with huge increases in the taxes that they will have to absorb. Let me point out that any tax increase is bitter for me to swallow but the use tax proposed for heavy vehicles is particulary distasteful. For example, under existing law if the gross vehicle weight is more than 26,000 pounds, $3 per 1,000 pounds per year is charged. For an 80,000 pound truck, that comes to $240 as a use tax. Under the Ways and Means title V language, the use tax on a similar vehicle would be $2,000, or an increase of over 800 percent. This is in addition to the increase they face for the fuels tax.

Now is not the time to impose unreasonable financial burdens on the trucking community. On the contrary, we should be doing all that we can to support a strong trucking industry. As a major hauler of agricultural commodities, I am well aware of the importance in keeping this vital sector of our transportation network healthy.

For that reason, I feel that we should defeat this rule so that we will have the opportunity to structure the revenue provisions more fairly.

Mr. Speaker, I just want to point out to the committee that the figures given are accurate. On a 55,000-pound truck weight the taxes are going to go from $57 to $500, and on an 80,000-pound truck they are going to go from $240 to $2,000. That is an 800-percent increase.

I think we can stand some increase in the user tax on heavy trucks, but I think these increases are very exorbitant.

I would like to point out for the benefit of the committee that these user taxes will not go into effect until January 1, 1984. The Ways and Means Committee has adequate time next year to come back and study and analyze how much more user tax we should put on this segment of the transportation industry and come down with some sensible figures that all of us can support.

Mr. Speaker, I think we need the 5 cents, and I think we need some increase in the user tax, but this user tax that is in this legislation is exorbitant. It is unconscionable at a time when the trucking industry is having extreme difficulty in this economy.

Mr. Speaker, I urge my colleagues to vote against the rule so that we might

get this rule opened up or this provision deleted from the bill.

Mr. LOTT. Mr. Speaker, I yield such time as he may consume to the gentleman from Virginia (Mr. ROBINSON).

Mr. ROBINSON. Mr. Speaker, I rise in opposition to the rule. The gentleman from Texas (Mr. KAZEN) pointed out correctly just a moment ago that it is absurd to allot 1 hour of dabate, and full opportunity for amendments, to the least controversial aspects of the legislation, while allotting 2 hours of dabate, but no opportunity for amendment, to its most controversial tax provisions.

The rule would apply the "gag-barring amendments to the wrong part of the legislation, and should be defeated.

I object to certain tax increases recommended by the House Ways and Means Committee that go far beyond a moderate increase in the basic fuel tax. These provisions would impose an overly heavy burden on thousands of small and medium-sized trucking firms, and on related industries that supply key parts to the trucking industry.

I also object to the committee's plan to require that fully 20 percent of the revenue levied—1 cent of every nickel raised—be earmarked for mass transit assistance. That is too big a bite from a program aid for rebuilding the Nation's crumbling network of highways and bridges.

Mr. Speaker, the basic thrust of this initiative is not unreasonable in principal. But unless we are able to modify its ultra-heavy proposed tax load, which is certain to have an adverse impact on employment opportunities for truckers and workers in related industries, I intend to vote against it.

I might add that we will be performing a solid public service for unemployed construction workers, and for the taxpayers, if we should succeed in waiving the application of the Davis-Bacon Act to construction projects to be funded through the Surface Transportation Assistance Act of 1982.

Mr. LOTT. Mr. Speaker, I yield 2 minutes to the gentlewoman from Nebraska (Mrs. SMITH).

Mrs. SMITH of Nebraska. Mr. Speaker, I rise in opposition to this rule. I support certain provisions of the legislation this rule would make in order, but others could be much improved. I support increasing the gasoline tax, and rebuilding our Nation's highways. These are things on which most of us agree.

The rule would prohibit amendments to the revenue title of the bill. This title contains come controversial tax increases which, in my view, could be improved by perfecting amendments. The taxes imposed by the bill on the trucking industry should at least be subject to change on the House floor by a vote of the full House. Fifty percent or more of the truckers in Nebraska are now operating at a loss. Nebraska truck-industry officials estimate that this bill would increase the taxes on a five-axle tractor by 151 percent. These increased costs would, of course, ultimately be paid by either consumers or producers.

Another controversial provision that should be subject to amendment and full consideration deals with a new mass transit account within the highway trust fund. The revenue available in this new trust fund would go for transit capital expenditures, including new projects. These public transit facilities would be funded by a tax paid by highway users. The Nebraska Highway Commission has recommended against this use of highway revenue. Members will not have a chance to change this provision under the rule; they will not have the opportunity to make this legislation better.

Mr. Speaker, I do not ask for an open rule on these revenue provisions, but for a reasonable chance to make minor changes. These are issues the full House should decide. The Members should have more of a choice than the up-or-down choice we now have. This is particularly true when one considers the speed with which this bill is moving through the House in this lameduck session. The revenue provisions were concocted last Thursday and are on the floor on today, Monday, 1 legislative day later.

I urge defeat of this rule. Let us go back to the Rules Committee and bring back a rule that will allow the full House to consider alternatives for financing the highway trust fund.

Mr. LOTT. Mr. Speaker, I have one further request for time.

Mr. Speaker, I yield 3 minutes to the gentleman from Ohio (Mr. MILLER).

Mr. MILLER of Ohio. Mr. Speaker, I rise in opposition to the rule to H.R. 6211, because I object to the closed rule on the Ways and Means title V portion of the bill. While I believe in the user fee concept because of its general fairness, I have difficulty accepting the formula which has been devised for this bill. Specifically, title V will require those who use our roads and bridges to pay 5 cents more for a gallon of gasoline, but 1 cent of that amount will go for mass transit. Where is the equity in this proposal? Should not the users of mass transit make a contribution of some sort for the upkeep of their own transportation system? As written now, the Ways and Means proposal to the bill disproportionately burdens the rural residents of our country who are almost completely dependent on their cars for transportation. I want to see in this bill an equivalent contribution by those who use urban transit systems. I believe that one approach which would accomplish this end is a phase-out of operating subsidies to mass transit systems. I believe that H.R. 6211 has many merits. But one it does not contain is equity. I urge you to defeat the rule so that there might be an opportunity to make appropriate amendments to the revenue-raising portion of this bill in order to bring meaning to the user-fee concept.

● Mr. RITTER. Mr. Speaker, on Friday, December 3, before the Rules Committee, I testified in support of a rule which would allow the House to consider separately the onerous features of the gas-tax bill regarding heavy-duty truck manufacturing and shipping.

I rise today to urge my colleagues to consider the effects of the user-fee provisions of this proposed bill on the heavy-duty trucking industry, and to allow the full House the opportunity to address these problems. Thus, I rise in opposition to the rule which prevents Members such an opportunity.

The heavy-duty truck industry includes manufacturers, motor carriers, tire manufacturers, suppliers and, of course, workers. The proposed special increase of some 150 percent in heavy-duty truck taxes would, however, have a devastating impact on an industry already hard hit by the recession. Industrywide truck sales have dropped from 165,000 units in 1979 to 62,000 units in 1982. Mack Truck, in my own congressional district for example, has suffered over a 40-percent reduction in personnel since 1979. According to the American Trucking Association, 195 motor carriers have closed their doors since 1980, a failure rate more than double that of other businesses. The International Brotherhood of Teamsters estimates that 175,000 of their trucking-industry members are out of work today.

I realize that these special heavy duty trucking taxes are based on a particular DOT highway cost allocation study. My understanding, however, is that the Department has another study in conflict. That study finds that trucks of all weights are paying their fair share of current highway taxes. A second study, which is being used by DOT, claims that the heaviest trucks are paying less than their fair share. I do not feel that Congress, in its haste to act during this session, should accept the findings of this second study without thorough review and deliberation.

Fair treatment is what heavy-truck builders and shippers seek. And fair treatment is what I as the representative of Allentown, and the Lehigh Valley of Pa., "Truck Capitol of the World," world headquarters of the bulldog of heavy trucks, Mack Truck, seek.

Based on these realities, I urge my colleagues to vote down the rule and to allow the House to take a separate vote on the nonfuel heavy-duty tax

provisions of the bill, thus allowing those Members who do not support the additional tax on the trucking industry, to vote accordingly.●

Mr. LOTT. Mr. Speaker, I have no further requests for time.

Mr. PEPPER. Mr. Speaker, I yield myself the balance of my time.

Mr. Speaker, I just want to make two remarks, if I may, to my colleagues. The first is that no one requested the Rules Committee to allow amendments to be made in order to the Ways and Means part of the bill relative to the increased tax on heavier trucks.

Second, it would be possible under this rule for the Member controlling the motion to recommit to offer a germane motion with instructions to include a provision relative to truck weight if they wish to do so, so that would give the House an opportunity to express itself on that subject.

Mr. LOTT. Mr. Speaker, I yield back the balance of my time.

Mr. PEPPER. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. HARTNETT. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 197, nays 194, not voting 42, as follows:

Messrs. EVANS of Iowa, DAVIS, WEAVER, and MOLLOHAN changed their votes from "yea" to "nay."

Messrs. FRANK, BONIOR of Michigan, LEWIS, HUNTER, and MOLLOHAN changed their votes from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

FIVE DEFERRALS OF FISCAL YEAR 1983 FUNDS—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 97-261)

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Appropriations and ordered to be printed.

(For message, see proceedings of the Senate of today, Monday, December 6, 1982.)

SURFACE TRANSPORTATION ASSISTANCE ACT OF 1982

Mr. ANDERSON. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6211) to authorize appropriations for construction of certain highways in accordance with title 23, United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes.

The SPEAKER. The question is on the motion offered by the gentleman from California (Mr. ANDERSON).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill,

H.R. 6211, with Mr. NATCHER in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from California (Mr. ANDERSON) will be recognized for 30 minutes, and the gentleman from Pennsylvania (Mr. SHUSTER) will be recognized for 30 minutes.

The Chair recognizes the gentleman from California (Mr. ANDERSON).

Mr. ANDERSON. Mr. Chairman, I yield such time as he may consume to the gentleman from New Jersey (Mr. HOWARD), the chairman of the Committee on Public Works and Transportation.

Mr. HOWARD. Mr. Chairman, it is with pride that we bring to the House the Surface Transportation Assistance Act of 1982.

In May of this year, our committee reported out H.R. 6211, a 4-year bill combining authorizations for highways, highway safety, and public transportation. It contained authorization levels consistent with those advocated by Secretary Lewis as part of his proposal to increase revenues in amounts equivalent to a 5-cent increase in the motor fuels tax.

The President's decision to defer a decision on the issue during the regular session made it necessary for us to adopt H.R. 6965, a 1-year, scaled-down version, which the trust fund could sustain if extended a corresponding 1 year at existing revenue levels. It later became necessary to move an interim bill which passed on the last day of the regular session, and as a result, H.R. 6211 and H.R. 6965 are still alive.

What we propose to have considered in the House is a substitute for H.R. 6211, containing the following: The bulk of the provisions of that bill, some provisions of H.R. 6965, a number of technical amendments, and several provisions which have surfaced more recently and whose inclusion will expedite consideration in the House. Furthermore, it is my intention to offer two additional amendments: One which would establish a minimum level of apportionments for each State equivalent to 85 percent of each State's contribution to the highway trust fund; and second, an amendment to temporarily waive the matching requirements for the additional funds provided in the first year of the bill, with provision for a payback of funds or a reduction in future years' apportionments in lieu of payback. It is my understanding that the two amendments are supported by the National Governors Association.

Mr. Chairman, I will confine the remainder of my remarks to the highlights of the bill. The highway title authorizes in excess of $12 billion a year from the highway trust fund, up from the range of $8.5 billion in fiscal year 1982. Principal areas of expansion are interstate completion, Interstate 4-R, the primary system, and replacement and rehabilitation of bridges. To expedite completion of the Interstate System, we expand the discretionary fund by $300 million and target it to completion of high-cost gaps. For Interstate 4-R, we also permit States to transfer a limited amount of their own construction apportionments to 4-R work, provided they scale down the scope of their total system requirements. The bill also modifies the apportionment formula for 4-R to give greater weight to factors reflecting greater wear and tear on the system. Also modified are the primary system formula, to give greater weight to urban population, and the bridge formula, on the basis of updated needs estimates.

Interstate transfer substitute projects would be funded by the highway trust fund, with most of the funds apportioned on the basis of cost to complete and the remainder at the discretion of the Secretary. We also would eliminate separate funding for a number of categories authorized in existing law, but allow States which wish to continue funding them to do so from regular apportionments at a preferential Federal matching share.

The substitute also contains truck size and weight provisions, as did H.R. 6211, but with a triggering mechanism specifying that the modifications shall not take effect unless and until an equitable cost allocation adjustment is enacted into law. It is our opinion that the changes made by the Ways and Means Committee, if enacted into law, would satisfy this requirement.

On the transit side, we increase overall program levels from $3.5 to $4.15 billion a year. We also assume earmarking of the equivalent of a 1-cent increase in the fuels tax for public transportation capital. This would go out as contract authority, backed up by a public transportation account in the highway trust fund.

The program would be restructured, with a greater proportion going out by formula and less at secretarial discretion. Capital would go for the traditional public transportation purposes, including a limited number of cost-effective new starts. We also would restructure the apportionment formula, giving greater emphasis to existing levels of service. Great care has been taken to assure equitable treatment of cities of under 200,000 and areas of under 50,000 population. Operating assistance would be capped at fiscal year 1982 levels. We also provide an incentive, in the form of a higher Federal match, for communities which use for capital purposes those funds made available for either capital or operating assistance. We also provide more flexibility in procurement procedures and incentives to seek greater operating efficiency and economies, and we strengthen the Buy America provisions of existing law.

We feel that our proposed authorizations are more than warranted by the various studies documenting needs in the area of surface transportation. The Department of Transportation project annual highway spending needs ranging from $11.6 billion just to maintain 1978 conditions to $16.6 billion to meet full needs. Transit needs, just to maintain existing systems and not taking any expansions into account, will total nearly $50 billion over the next 10 years.

And last but not least, the jobs picture today makes prompt action even more imperative. The administration estimates that this program would create 320,000 jobs per year, including 170,000 directly related to the construction industry, which is hit by unemployment roughly twice the national average.

I urge my colleagues to support the bill.

□ 1530

Mr. EDGAR. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. I yield to the gentleman from Pennsylvania.

Mr. EDGAR. I thank the gentleman for yielding.

Mr. Chairman, I would like to commend the gentleman in the well for his articulate statement and for the work that he and the gentleman from California (Mr. ANDERSON) and the gentleman from Pennsylvania (Mr. SHUSTER) have done in producing this legislation.

It came through our committee, which has a divergence of opinion, Democrats and Republicans, conservatives and liberals. It came out of our committee with strong bipartisan support because we need a strong transportation bill dealing with highways, bridges, and public transit.

It is here before us in the House today because the President of the United States has committed himself to a 5-cent tax.

If I could just ask one question of the gentleman in the well. In clarifying the gentleman's two amendments, as I understand it, the gentleman has given to all of the States in the Nation no less than 85 percent of the funds that they have sent to Washington; is that correct?

Mr. HOWARD. That is correct.

Mr. EDGAR. And second, the gentleman has provided all of the States, whether they have money available or no money available an opportunity to use this legislation.

Mr. HOWARD. Yes; we do hope that only those who need it without the match will take it without the match. We did this in the midseventies and we had a rush bill during President Ford's

administration, and we made this available to the States. Sixteen States did take advantage of it. We hope that all the States will not take it all without a match because that would reduce the program, it would reduce the number of jobs.

Mr. EDGAR. I thank the gentleman for his efforts. I think that the gentleman has amended the legislation in the proper way. I hope all Members will accept the amendments as well as pass the legislation. I commend the gentleman in the well.

Mr. HOWARD. I thank the gentleman.

Mr. VOLKMER. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. Would the Chair advise me as to how much time I have left?

The CHAIRMAN. The gentleman has consumed 9 minutes.

Mr. HOWARD. I yield to the gentleman from Missouri.

Mr. VOLKMER. I thank the gentleman for yielding.

The waiver of the match for the first year for those States who do not have the funds, does that apply to all the matching Federal highway programs, construction, rehabilitation, resurfacing, and all?

Mr. HOWARD. Yes, all of them.

Mr. ROEMER. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. I yield to the gentleman from Louisiana.

Mr. ROEMER. I thank the gentleman for yielding.

I want to join others in complimenting the gentleman for the job he has done in a tough situation. One question just to clarify for the body's information. Section 154 by striking the word "initial" in regard to prevailing wage represents a major shift in policy. Would the gentleman just take a second and explain what the committee had on its mind when that was done?

Mr. HOWARD. We have had the Davis-Bacon provision in the Highway Act since the late 1960's. The 3R program of rehabilitation programs have always had the Davis-Bacon Act in it. It has always worked that way. That provision has been in that part of the bill.

The last administration and this administration indicated that perhaps they could find the word initial in initial construction to mean that maybe in the future those parts of the legislation should not come under Davis-Bacon.

So the intention we have from the administration is that they would intend to change the use of Davis-Bacon and not have it to apply where it has applied and has been the intent of Congress and the operation of the Federal Government all these years.

So the language that was put into the bill in that section merely clarifies and has the situation where what has gone on before with Davis-Bacon will go on in the future. It in no way expands it. Without that language being accepted, we will have a situation where the administration will administratively change the Davis-Bacon provision and reduce the coverage of Davis-Bacon. That is the absolute simple reason that that language is in there, to continue what we have, not to expand it, but to not reduce it. If you want to reduce it or cut back or weaken Davis-Bacon then you should vote to take that out.

If you want to have Davis-Bacon continue as it has from the beginning, then you will have it in.

I want to give the chairman a chance to explain, but I am sure it will come up in the debate.

Mr. SHUSTER. Mr. Chairman, I yield 5 minutes to the gentleman from California (Mr. CLAUSEN), the ranking minority member of the Committee on Public Works and Transportation, a gentleman who has been a distinguished Member of this Congress for many years, and I know that we will sorely miss him in the next Congress.

Mr. CLAUSEN. Mr. Chairman, I want to join in adding to the favorable comments that have been directed toward the chairman of the full committee, the gentleman from New Jersey (Mr. HOWARD); the chairman of the subcommittee, the gentleman from California (Mr. ANDERSON); and the distinguished ranking minority member of our subcommittee, the gentleman from Pennsylvania (Mr. SHUSTER), for the work that they have put forth in the coordination of the presentation of this bill. It is a tough bill. It is a tough bill to put together. And I think that you could find a number of people on the floor who may very well come to the conclusion that there are certain provisions that they could not agree with. And, I might add, that includes me because there are a number of areas that I differ with quite strongly.

But that is the problem we always face when we are attempting to deal with this kind of a comprehensive legislation under the time constraints that we have.

My own personal opinion would have been to have stayed with the original package which was H.R. 6211. I thought we did a reasonably good job with the bill and moved it out of the committee. I would like to have moved that bill through the House. But here we are.

The bill before us today offers an excellent opportunity and an all too rare opportunity at that to take a great step forward in meeting our responsibilities for surface transportation in this country, both highways and transit.

This substitute is a large bill, a comprehensive bill, and a balanced bill. To be sure it contains some controversial provisions and there is some dispute over the provisions which it does not contain which some would like to see. Understandably there are also some controversial aspects of the Ways and Means revenue package which is to be added to in the form of title V of the bill. But looked at in its entirety, the bill itself should not be regarded as controversial.

There is no doubt in my mind that through the process of amendment, here in the House, and I would hope to see amendments held to an absolute minimum, as well as in the conference itself, where we can next address the revenue title, any remaining concerns can be dealt with so that a final package can be worked out in the maximum extent feasible for all parties concerned with this legislation.

As we proceed, I urge Members to keep the following thoughts in mind.

First, there is no getting around the fact that timing and momentum play a key role in our success or failure in enacting major legislation. We now have the best chance in a generation to restore in substantial part the purchasing power of the trust fund that had been eroded by inflation, factors that increase costs beyond the rate of inflation, as well as lagging revenues.

Now is the best opportunity, certainly the best in my nearly 20 years as a Member, to set up a stable and predictable longtime funding mechanism for at least a significant portion of the public transportation capital program.

While recognizing some controversial aspects of the bill, it is basically a good bill and I support advancing it through the House, recognizing that some improvements or changes will and in my view must take place in the conference.

The bill builds on a basis of the highway trust fund which has in my view been one of the best funding mechanisms ever designed by the Federal Government. That trust fund concept is fair, it is efficient, and the users pay in direct proportion to the amount that they use. It has made it possible for us to achieve a highway system that is literally the best in the world. As a matter of fact, the airport-airways trust fund concept as a funding mechanism was adopted similar to that pattern because of the success story of the highway trust fund mechanism.

It has built the systems, and I want to emphasize that, the systems that I referred to are the Interstate System, the primary and secondary road systems as well as the urban systems that we added back in the seventies.

Without this funding source, and without the Federal aid program as we now know it, which the trust fund has made possible, we would not have those systems in place today. And you

would not have the kind of economic growth that has taken place in this country. Certainly we would not have them if every State had demanded and succeeded in nailing down every nickel of revenue paid into the trust fund in that State.

Is the system perfect? No. Nor is the bill perfect. But it is in my view a good, sound, solid system, it is a beginning and a movement on the part of this House to move the bill where we can make it even better.

Today is day 1 of week 2 of a 3-week session, so time is short. This means that it will take an unusual degree of willingness to cooperate and to compromise with the Senate and the administration to get this bill enacted into law.

So I earnestly urge my colleagues to join me in viewing this bill in that light.

I have seen a lot of legislation come and go. But I believe we can in the short time remaining put through a bill essentially along the lines of the bill we advanced through our committee.

The CHAIRMAN. The time of the gentleman from California (Mr. CLAUSEN) has expired.

Mr. SHUSTER. Mr. Chairman, I yield 1 additional minute to the gentleman from California.

Mr. CLAUSEN. Mr. Chairman, if this can be done, I will truly say I will take as much satisfaction from that as any other accomplishment I have been associated with in nearly 20 years in this body.

One final comment that I would like to make does center around the concern that I have over the concept of the donor-donee issue. There is one thing of which we must remind ourselves. When we set up this program initially it was intended to serve as a vehicle for funding a complete system. Some of the States actually received their funds in advance and as a consequence have made a donation to the balance of the completion of the system. I think we need to keep that in mind.

I am a little bit disappointed over the concept we now have, and I want to serve notice as we move to the conference I may very well be looking toward a measure of revising that donor-donee formula provision and other provisions of the bill that need revision.

□ 1545

Mr. ANDERSON. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, during the remaining days of the 97th Congress, we have the opportunity to pass historic legislation that will put our Nation's transportation network back on the right track; steering it away from its present course which is, by all accounts, a road to ruin.

During July of 1981, the Subcommittee on Surface Transportation, which I chair, held 6 days of hearings here in Washington on the country's short- and long-term highway, highway safety, and public transit needs. Numerous other hearings were held on this subject in other cities and towns around the Nation.

What we learned was devastating. We learned that our Interstate System, initiated in the 1950's with a design life of 25 years, was crumbling.

The Interstate System is deteriorating at the rate of 2,000 miles per year. Eight thousand miles of the system need total rebuilding, and 20,000 miles of interstate will require major repair within the next 12 years.

And our bridges are a national disgrace. Forty-five percent of the country's 557,000 bridges require work if they are to provide safe mobility at reasonable capacities.

In my own State of California, and I do not believe we are atypical, the road information program has estimated that 40 percent of our paved main roads, or 23,100 miles, are in need of resurfacing or rebuilding. These roads handle 91.9 percent of our total traffic.

One of the most comprehensive studies of the subject nationally, the ATAC II report, estimates Federal highway needs of over $14 billion in 1983, and the need to average $20 billion per year the next decade.

With respect to public transit, our hearings clearly indicated that too many systems around the country are structurally decaying or functionally obsolete. Too many cities need to build or rebuild their public transit systems.

Transit capital needs in this country over the next decade total about $50 billion. If this challenge is not met, beneficial public transit gains will be lost. Transit patronage has gone up about 7 percent since the gas crisis. If just these new riders are forced back into their automobiles because of insufficient capacity, the country will consume an additional 2.6 billion barrels of oil per year.

If transit capital needs are great, so is the need for operating assistance. Transit fare increases right now are far outstripping the inflation rate. Historically, patronage falls by 3 percent with every 10-percent increase in fares. And yet, there are those who say "cut out operating assistance altogether." I could not be more emphatic in disagreeing and in pointing out that it is the smaller and medium size communities; those with stable bus fleets and few capital demands, that are most in need of operating assistance. Because they are not densely populated, their farebox cannot cover operating expenses. It only makes sense to allow the Federal Government help with their operating costs.

And it would be similarly foolhardy to eliminate operating assistance to high density cities when public transit may carry as many as 70 to 85 percent of their central business district bound trips during peak hours. Cut operating assistance to these cities and their fares will rise, patronage will drop, and city streets and freeways will be gridlocked.

Mr. Chairman, this is what the Surface Transportation Subcommittee learned during our hearings.

The subcommittee and full Committee on Public Works and Transportation responded in a reasonable manner by producing legislation, H.R. 6211, which was designed based upon one overriding theme: Meeting the Nation's transportation needs.

The revenue required to do this, though, exceeds that which is currently generated. The funding needs upon which my subcommittee received extensive testimony, and which are reflected in H.R. 6211, will require the infusion of about $5.5 billion in additional moneys each year.

President Reagan has reviewed and recognizes this problem and recommended that additional user fees be raised to meet these needs. I am pleased that the Ways and Means Committee has acted so promptly to raise revenues by a similar amount.

Mr. Chairman, even the popular press now recognizes the need for improving our transportation system, as well as the increased revenues that must be generated to finance such a system. Business Week and News Week have run cover stories on the problem, and even Nation's Business, published by the U.S. Chamber of Commerce, has published a story on our funding dilemma.

Mr. Chairman, I believe our Nation's transportation needs are well-documented. And it is commonsense that those who use our transportation system, should pay for it. These two ideas, simple, basic, and obvious, are wedded in H.R. 6211. I urge the support of all our colleagues.

Mr. Chairman, this substitute contains the following: the bulk of the provisions of H.R. 6211, as reported by the committee on May 17, 1982; some provisions of H.R. 6965, the separate, 1-year bill which the committee approved on August 10 when the revenue increase appeared unlikely; and several provisions which have surfaced more recently and whose inclusion will expedite consideration on the floor.

To preclude any misunderstanding with respect to any changes in the substitute in relation to H.R. 6211, as reported, the following modifications are noted:

TITLE I

SECTION 101—SHORT TITLE

The section changes the title to the Highway Improvement Act of 1982, because the

interim bill, P.L. 97-327, was entitled Federal-Aid Highway Act of 1982.

SECTION 102—AUTHORIZATIONS FOR THE INTERSTATE SYSTEM

This substitute makes a technical change to conform to an authorization in the Federal-Aid Highway Act of 1982, but makes no substantive change in the $4 billion level of authorizations in fiscal year 1983 for Interstate construction. (These are actually fiscal year 1984 funds, because funds for the Interstate System are made available for apportionment one year in advance of the year for which initially authorized.)

SECTION 103—APPROVAL OF INTERSTATE COST ESTIMATE

The substitute makes reference to the most recently approved table for apportioning Interstate construction funds. Such table includes parking ramps and frontage roads cited in section 133 of the substitute. This section also provides that no state shall, as a result of the enactment of this legislation, lose funds. Such otherwise might be the case because the P.L. 97-327 provided a minimum one-half of one-percent for all states under the Interstate construction program, which the substitute does not provide.

SECTION 104—OBLIGATION CEILING

No change.

SECTION 105—AUTHORIZATIONS

The substitute takes account of the enactment of P.L. 97-327, the Federal-Aid Highway Act of 1982, by reducing the authorizations in H.R. 6211 for Federal-aid primary, secondary and urban highways, forest highways and public lands highways by amounts already authorized in the already-enacted legislation. The combination of the previously authorized amounts and the reduced authorizations remaining in the substitute bring total authorized amounts for fiscal year 1983 to the increased levels originally contemplated in H.R. 6211. The substitute also makes reference to a more up-to-date listing of priority primary routes which must receive priority consideration by states in the use of their regular primary system apportionments. Further provision is made to continue in operation the Federal Highway Administration office in the Virgin Islands. A separate authorization for territorial highways is repealed. (See Section 108 for provisions authorizing primary system funds for the territories.)

SECTION 106—INTERSTATE RESURFACING

No change.

SECTION 107—INTERSTATE TRANSFERS

Taking into account the fact that $518 million in general revenues has been appropriated for highway projects substituted for withdrawn segments on the Interstate System, the substitute reduces amounts in H.R. 6211 by an equal amount. The additional sum of $257 million shall be made available out of the Highway Trust Fund at the discretion of the Secretary for highway substitute projects. Thus the total $775 million originally provided under H.R. 6211 will be made available, but substitute highway projects will not be totally funded by the Trust Fund until fiscal year 1984.

The substitute also delays by one year the effective date for instituting the apportionment of transit substitute projects resulting from Interstate transfers, 25 percent at the discretion of the Secretary and 75 per cent by formula on the basis of cost-to-complete. The delay is to reflect existing appropriations for fiscal year 1983.

The substitute also makes clear that the cost-escalator provisions of existing law, whereby costs of substitute projects are adjusted on the basis of increases in construction costs, will terminate in fiscal year 1983, the deadline for withdrawal of Interstate routes. However, in the case of three projects which on May 12, 1982, were subject to judicial injunction prohibiting their construction, the 1983 withdrawal deadline is extended for a "reasonable period of time."

SECTION 108—FEDERAL-AID PRIMARY FORMULA

As in the case of the "hold-harmless" provisions in section 103 in the case of the Interstate System, the substitute assures that no fiscal year 1983 primary funds will be taken away from any state as a result of the enactment of this legislation. For the purposes of primary apportionment, the Virgin Islands, Guam and American Samoa shall be considered together as a single state, entitled to one-half per cent of each year's primary apportionment.

SECTION 109—INTERSTATE RESURFACING FORMULA

The substitute adds a hold-harmless provision to assure that fiscal year 1984 funds for the resurfacing, restoration, rehabilitation and reconstruction of the Interstate System will not be taken away from any state as a result of enactment of this legislation, which changes the formula for apportionment of such funds.

SECTION 110—ENERGY IMPACTED ROADS

No change.

SECTION 111—COST REDUCTION

No change.

SECTION 112—RESURFACING STANDARDS

The substitute establishes the clear intent of Congress that Federal-aid projects for resurfacing, restoring or rehabilitating (3R) non-freeway highways must be constructed in accordance with standards which will preserve and extend the service life of highways and enhance the safety of such highways. This provision is not necessarily intended to require that new construction standards be applied to such projects.

The substitute adds a requirement for the National Academy of Sciences to conduct a study and perform additional research if necessary to assess the safety cost effectiveness of new construction and reconstruction standards for the purpose of determining the most appropriate minimum standards that should be applied to 3R projects. After review by the Secretary of Transportation, the standards would be submitted to Congress for approval.

SECTION 113—VENDING MACHINES

No change.

SECTION 114—LETTING OF CONTRACTS

No change.

SECTION 115—CONSTRUCTION IN ADVANCE OF APPORTIONMENT

No change.

SECTION 116—ADVANCE CONSTRUCTION FOR BRIDGE PROJECTS

No change.

SECTION 117—MAINTENANCE

No change.

SECTION 118—INTERSTATE DISCRETIONARY FUNDS

No change.

SECTION 119—INTERSTATE SYSTEM RESURFACING TRANSFERS

The substitute adds a provision authorizing a State to use its own Interstate resurfacing funds on Interstate routes added to the System in connection with the withdrawal of an Interstate route under section 103(e)(4) of title 23, United States Code. The mileage of such routes thus made eligible for 4R funding is not to be counted in computing any State's apportionment of funds. Thus no other state's share of 4R apportionments is to be reduced as a result of this provision.

SECTION 120—FEDERAL SHARE

The substitute makes reference to a more up-to-date listing of priority primary routes eligible for 95 percent Federal funding under the regular primary program. Further, the Federal match for traffic control signalization projects financed by funds made available as a result of the Interstate transfer provision shall be 100 percent.

SECTION 121—HIGHWAY BEAUTIFICATION

The substitute makes clear that the requirement to pay compensation extends to situations where the State takes action to deliberately obscure advertising signs with vegetation in those cases where such vegetation is primarily intended to conceal such sign. Further, the substitute allows sign owners to replace or repair signs damaged or destroyed by an Act of God by a willful act of a third party.

SECTION 122—APPROACHES

No change.

SECTION 123—PARKING FACILITIES

No change.

SECTION 124—EQUAL OPPORTUNITY

No change.

SECTION 125—PUBLIC TRANSPORTATION

No change.

SECTION 126—BRIDGE PROGRAM APPORTIONMENT

The substitute adds a technical amendment directing the apportionment of bridge funds as soon as practicable after enactment.

SECTION 127—HIGHWAY BRIDGE REPLACEMENT AND REHABILITATION

The substitute makes a technical change to assure that no more than $200 million is made available for discretionary bridge projects in fiscal year 1983, as originally intended. In addition, technical changes are made in the existing language of the bill making the LaSalle Peru Bridge eligible for funding. A bridge over the Russian River in the vicinity of Cloverdale, California, together with necessary relocation of approach roads, also is made eligible for funding under the program, including the discretionary amount.

SECTION 128—CARPOOL AND VANPOOL PROJECTS

No change.

SECTION 129—ALLOCATION OF URBAN FUNDS

No change.

SECTION 130—HAZARD ELIMINATION PROGRAM EXTENSION

No change.

SECTION 131—FEDERAL LANDS HIGHWAYS PROGRAM

No change.

SECTION 132—BYCYCLE TRANSPORTATION

No change.

SECTION 133—PARKING RAMPS AND FRONTAGE ROADS

The substitute provides a more accurate description of a parking ramp project in Minneapolis, Minnesota than in the reported bill and also adds technical language

clarifying Congressional intent that a frontage road project in Detroit, Michigan, is also eligible for Interstate construction funds. Congressional intent is evidenced by approval of apportionment factors in the Federal-Aid Highway Act of 1982 which assumed funding for these projects. Inclusion of language in this section confirms the intent of a prior enactment.

SECTION 134—PRIORITY PRIMARY AVAILABILITY

The substitute strikes this section which is now moot, and in lieu thereof adds a new section which confirms Congressional intent that a project to depress a section of highway in Charlestown, Massachusetts will remain eligible for Interstate construction funding. Interstate apportionment factors approved by the Federal-Aid Highway Act of 1982 assumed funding for this project.

SECTION 135—FULL UTILIZATION OF APPORTIONMENT

Since section 135 is already law, it is stricken from the bill.

SECTION 136—ACCELERATION OF PROJECTS

This section is renumbered as section 135.

SECTION 137—FOUR-LANE BRIDGES

This section is renumbered as section 136.

SECTION 138—COMPETITIVE BIDDING

This section is stricken because it is unnecessary. A Comptroller General investigation of competitive bidding practices is already underway and a report to Congress is due in March, 1983.

SECTION 139—DEMONSTRATION PROJECTS

This section is renumbered as section 137, and four additional demonstration projects are added. As stated earlier in my remarks, these include: (1) The high-technology demonstration project on a segment of Route 200 from East Freedom south of the Blair County/Benford County line in Pennsylvania; (2) a congestion-alleviation project at the intersection of College Drive and Interstate 10 in East Baton Rouge, Louisiana; (3) a project to demonstrate most up-to-date techniques for both repairing and preventing highway damage resulting from shoreline erosion in the vicinity of Buhne Point, Humboldt Bay, California; (4) a project-acceleration demonstration involving Route 841 (Jefferson Freeway) from Route 60/31W (Dixie Highway) to Interstate 65, in the vicinity of Louisville, Kentucky. The entire Jefferson Freeway also is being added to the list of priority primary highways designated in a forthcoming Committee Print.

SECTION 140—VEHICLE WEIGHT, LENGTH AND WIDTH LIMITATIONS

This section is renumbered as section 138, and has been amended by addition of a provision prescribing that the modifications contained in the section shall take effect only upon enactment of a more equitable allocation of the cost burden among classes of users of the highway system.

SECTION 141—MARTIN LUTHER KING BRIDGE

This section is renumbered as section 139.

SECTION 142—MANPOWER STUDY

This section is renumbered as section 140.

SECTION 143—FERRYBOAT STUDY

This section is renumbered as section 141.

SECTION 144—STUDY OF WEATHER-RELATED FACTORS

This section is renumbered as section 142.

SECTION 145—REPORT REGARDING LONGER VEHICLES

This section is renumbered as section 143.

SECTION 144—CHANGE IN LOCATION OF INTERSTATE SEGMENTS

The substitute adds a provision authorizing the relocation of an Interstate route in the vicinity of Winston-Salem, North Carolina. The provision is justified by the following unique circumstance: The existing route requires extensive upgrading whose cost would exceed that of constructing an alternative route. Due to other limitations inherent in the project, even more costly upgrading of the existing route would not result in a less safe and less efficient transportation facility than the alternative.

SECTION 145—ACCESS CONTROL DEMONSTRATION PROJECTS

The substitute adds a technical amendment extending from September 30, 1983 to September 30, 1985, the date by which the Secretary must report to the Congress on the results of the access control demonstration projects in progress in the states of Arkansas, Colorado and New Hampshire authorized by the Surface Transportation Assistance Act of 1978.

SECTION 146—REVISION OF PROJECT AGREEMENT

The substitute authorizes modification of a project agreement for a project in New Jersey so as to provide compensation for certain economic losses not compensable under existing law.

SECTION 147—STUDY OF RECYCLED TIRES

The substitute authorizes a study of the feasibility of incorporating rubber from recycled tires into materials used for roadway resurfacing.

SECTION 148—ENFORCEMENT OF TAX

The substitute provides that highway apportionments would be denied to any state that does not require proof that the highway use tax on a heavy truck has been paid before such vehicle can be registered in the state.

SECTION 149—STUDY OF DOUBLE TRAILER COMBINATIONS

The substitute authorizes a National Academy of Sciences project to monitor the effects on highway and highway safety of the operation of double trailer combinations in states where they have not heretofore been permitted. This assumes that section 138 of the substitute, dealing with operation of double trailers, is enacted and takes effect.

SECTION 150—ADVANCEMENT OF NON-FEDERAL SHARE

The substitute allows a temporary waiver of non-Federal matching requirements, applicable only to the increase in states' ability to obligate funds as a result of the authorizations and revenues provided in the legislation. Such waivers would extend through September 30, 1983, and would be available only in cases in which the governor of the state certified that such state lacked the non-Federal funds to match the increases in funding made available by this legislation.

SECTION 151—LANE RESTRICTIONS

The substitute contains a provision prohibiting the imposition of "diamond lane" restrictions, limiting certain lanes to high-occupancy vehicles, on a certain segment of Interstate highway in Alameda County, California.

SECTION 152—UPGRADING CERTAIN INTERCHANGES

The substitute, as noted above in my remarks, assures that improvements associated with the Route 24/I-680 interchange in California are eligible for Interstate construction funds.

SECTION 153—CONVICT LABOR

The substitute adds to existing law, which prohibits the use of convict labor on Federal-aid highway projects, a prohibition against the use of materials produced by convict labor.

SECTION 154—DAVIS-BACON

The substitute contains a provision striking the word "initial" from the subsection (a) of section 113, United States Code, relating to prevailing wage determinations under the Davis-Bacon Act. The effect of the amendment is to resolve any dispute as to whether Davis-Bacon applies to all Federal-aid highway projects.

TITLE II

SECTION 201—SHORT TITLE

No change.

SECTION 202—HIGHWAY SAFETY AUTHORIZATIONS

The substitute reduces the FY83 authorizations for the bridge replacement and rehabilitation and hazard elimination programs by the amounts already authorized for those programs under the Federal-Aid Highway Act of 1982.

SECTION 203—HIGHWAY SAFETY

The substitute reduces the authorization for section 402 Highway Safety Programs (FHWA) to $100 million per year for fiscal years 1983 through 1986. This is necessary to conform to recently enacted law. This section also repeals an earlier authorization for $9.6 million in Highway safety funds which has not been used.

SECTION 204—MAXIMUM SPEED LIMIT

No change.

SECTION 205—RAIL-HIGHWAY CROSSINGS

No change.

SECTION 206—PUBLIC INFORMATION

No change.

SECTION 207—SAFETY PERFORMANCE REPORTS

The substitute makes a technical change in the proposed reporting requirements to better conform with data already being collected by the Department of Transportation.

SECTION 208—ALCOHOL TRAFFIC SAFETY PROGRAMS

The substitute delets this section as it has already been enacted into law.

SECTION 209—ANNUAL APPROTIONMENT FORMULA

This section is renumbered as section 208.

Part B—National Driver Register Act of 1982

This section is deleted as it has already been enacted into law.

SECTION 209—MINIMUM DRINKING AGE

This section, to encourage the States to establish a minimum drinking age of 21, is added to the bill.

TITLE III

SECTION 301—SHORT TITLE

No change.

SECTION 302—AUTHORIZATION OF APPROPRIATIONS

The substitute increases the authorization for sections 6, 10, 11(a), 12(a), and 20 of the Urban Mass Transportation Act to $90 million each year for fiscal years 1983 through 1986. This change reflects the action of the Committee in approving H.R. 6965.

SECTION 303—BLOCK GRANTS

No change.

SECTION 304—LETTER OF INTENT

No change.

SECTION 305—RESEARCH AND TRAINING GRANTS

No change.

SECTION 306—COMPETITIVE PROCUREMENT

No change.

SECTION 307—DEFINITION OF FIXED GUIDEWAY

No change.

SECTION 308—ADVERTISING FOR BIDS

No change.

SECTION 309—PERFORMANCE REPORTS

The substitute changes the initial reporting requirement to January 1984.

SECTION 310—CONSTRUCTION CONDITION

The substitute would permit the Georgia General Assembly, together with the Metropolitan Atlanta Rapid Transit Authority to modify the direction given by this section. This change reflects the action of the committee in approving H.R. 6965.

SECTION 311—LOAN REPAYMENT

No change.

SECTION 312—ADVANCE ACQUISITION

This section authorizes advance acquisition of transit rights-of-way.

SECTION 313—FEASIBILITY STUDY

The substitute adds a requirement for a feasibility study of new transit technology.

SECTION 314—STUDY OF LONG-TERM LEVERAGE FINANCING

The substitute contains a provision directing the Secretary to conduct a study to explore the possibility of providing long-term contracts to assure the flow of Federal funds to local or state transit agencies for periods of up to 35 years. This study, in response to transit financing problems of the New York metropolitan area, is to determine whether and to what extent such long-term, assured funding would provide incentives for the raising of funds from non-Federal sources.

TITLE IV

SECTION 401—BUY AMERICA EXTENSION

The substitute deletes subsection (a) to reflect its earlier enactment. Subsection 401(c), an amendment to clarify that Federal funds cannot be used to purchase buses or other rolling stock if 40 percent or more of the cost is derived from components which are the product of a country with which the United States has a trade deficit, is deleted from the bill.

Mr. Chariman, I would like to lend support and make clarifications on several projects which have been mentioned by several colleagues on this side of the aisle and the other.

Congressman JOHN BREAUX has a project in this legislation which could clear up a severe problem at the intersection of College Drive and Interstate 10 in East Baton Rouge, La. I agree with my colleague that this project should be given expeditious consideration.

In section 137(b) of the substitute, there is a project intended to demonstrate the latest state-of-the-art highway technology. It is stated in this section, among other criteria, that this project should close a gap of not more than 10 miles and connect both types of highway construction; one using current technology, the other an older highway using an older method of highway construction. This project should be given priority consideration. The segment of route 220 from East Freedom, Pa., south to the Blair County-Bedford County line qualifies for all the specific criteria in this section and shall be eligible for this demonstration project and shall be funded.

In regard to discretionary bridges, I would like to make reference to those bridges mentioned by the committee in House Report 97-555. I agree with my colleagues that these bridges should be given priority consideration.

I also want to make it clear that the committee intends that the relevant legislative history in House Report 97-555, including sections 105, 107, 118, 120, 127, 133, and 137 of such report, to the extent that the provisions of H.R. 6211 as reported are not inconsistent with such bill as amended by H.R. 7360, concerning special concerns and priorities apply to the appropriate provisions in our substitute.

In addition, I would agree with ROBERT MICHEL, the distinguished minority leader, that the Franklin Street Bridge in Peoria, Ill., should be given priority in the allocation of discretionary bridge funds. The Franklin Street Bridge is in serious need of replacement because it is a narrow two-lane bridge serving 12,000 vehicles daily and has been closed frequently for repairs.

Congressman TRENT LOTT has also expressed his concern about two critical projects in Mississippi. I agree with Mr. LOTT that the Fort Bayou Bridge and the Moss Point-Escatawpa Bridge qualify under the discretionary bridge program and should be given priority consideration. The Fort Bayou Bridge would need $10.3 million and the Moss Point-Escatawpa Bridge would need $27 million.

Congressman TOM HAGEDORN of Minnesota has brought to the committee's attention the need for reconstruction of the Wabasha Bridge over the Mississippi River connecting Minnesota and Wisconsin via Fap Trunk Highway 60. I agree with the Congressman that this project should receive priority consideration and funding under the discretionary bridge program. The cost of the bridge to be shared equally with Wisconsin, is $18.4 million. Additionally, Minnesota's approach cost is $2.25 million, bringing the total Minnesota cost to $11.45 million.

This bill omits the provision contained in section 138 of the substitute requiring an investigation by the Comptroller General into competitive bidding practices with respect to highway and mass transit construction in this country. Our sole reason for dropping this provision is that it has proven to be unnecessary. This is because, since the time our highway legislation was first developed this past spring, the study has been requested and is now underway.

Prior to the October 1 adjournment of the regular session, the deletion was discussed by both the House and Senate sides with full agreement that, whether initiated by statute or otherwise, this investigation is urgently needed, has the support of both the House and Senate committees, and should be completed expeditiously.

The purpose of the language in section 112 of the substitute dealing with resurfacing standards under section 109 of title 23, United States Code, is to assure that enhancement of highway safety result from the carrying out of any project for the resurfacing, restoring, or rehabilitation of any highway. The intent of this provision, moreover, is to provide some flexibility to the States in the degree of safety improvement which reasonably can be required in the circumstances of a given project. It is explicitly not the intent of the committee, for example, that new construction standards necessarily be applied in every case.

One final point on this provision: It is further the intent that adequate opportunity for public participation be provided as standards mandated under this provision are developed to the point of approval by the Congress.

Congressman JACK BRINKLEY has been instrumental in calling to the committee's attention, the 13th Street Viaduct Bridge in Columbus, Ga. The bridge is a vital link in an east-west transportation corridor which facilitates the movement of interstate and intracity traffic. Replacement of the bridge is essential for two reasons. The bridge is in a state of disrepair resulting from 57 years of service. If the bridge were to be declared unsafe and placed out of service, the disruption to traffic flow and the progress of commerce would be severe. Second, the existing viaduct no longer meets the necessary traffic capacity standards. Traffic volume presently exceeds 20,000 vehicles per day.

Similarly, the Green Bridge in Manatee County, Fla., qualifies under the discretionary bridge program. It has a sufficiency rating of 28.7, and will cost $16.1 million to replace. It is structurally deficient, functionally obsolete, and yet vitally important to surface transportation in the county. The Green Bridge should receive priority consideration when discretionary bridge funds are distributed. The committee wishes to thank Congressman IRELAND for his tireless efforts on behalf of this project.

Congressman SHAW has expressed a great concern over the availability of section 402 funding for safety projects related to motorcycle, bicycle, and pedestrian safety. It should be made quite clear that the States may apply

for such funds. We are concerned, however, that the States may be laboring under the false impression that these programs are not eligible for funding despite the fact that they have proven successful and effective, and are certainly eligible for funding under requirements set forth in the Code of Federal Regulations.

Mr. Chairman, I have also discussed a number of other projects and policy concerns with Chairman HOWARD, Mr. CLAUSEN, and Mr. SHUSTER which Mr. SHUSTER has agreed to cover on his time. I want the record to show I concur with my colleagues from California and Pennsylvania concerning the intent of the committee and wish to state we are in agreement.

I would also like to bring to the Members' attention an accelerated construction project and demonstration project for primary Route 841 known as the Jefferson Freeway. The project would be located between Route 60/31W and Interstate Route 65 in the vicinity of Louisville, Ky., and would fit the criteria established in section 137(e) of the substitute to H.R. 6211. It also should be mentioned that Route 841 in being added in its entirety to the priority primary list of projects.

At the request of the distinguished chairman of the House Ways and Means Committee, I agree that three bridges in Illinois should receive priority consideration. Those bridges are the Dan Ryan, Clark, and Staley Viaduct.

Congresswoman BARBARA KENNELLY has brought to this committee's attention a comprehensive interstate project to complete and improve the interchange of I-91 and I-84 in Hartford, Conn. The structurally deficient bridge program is an essential element of the comprehensive project. The committee believes the Charter Oak Bridge should receive priority consideration when discretionary funds are distributed.

Also, Congressman PANETTA has brought to the attention of the committee State Route 101 from Monterrey St. and Gilroy, California to Russel Road in Salinas, Calif. I believe this route qualifies to be added to the priority primary program.

In addition, Congressman FAZIO requests that Highway 99 in Sacramento, Calif. be designated as priority primary. This highway is a 13-mile stretch of roadway north from Interstate 5 to where Highways 99 and 70 divide. I believe this route is a good example of what priority primary routes are meant to be.

Regarding another matter, the Federal bridge formula and axle limits do not supersede or nullify the grandfather clause. A State may issue special permits for divisible loads that do not comply with the bridge formula or axle limits if authorized under those laws as provided in the grandfather clause.

The committee intended that deference be given to the States' determination of whether their laws comply with the grandfather clause. However, the committee also intended that these determinations be made in consultation with the Secretary of Transportation. Consultation with the Secretary is intended to insure that the Federal investment in the Interstate System is safeguarded to the maximum extent practicable. It is also intended that a State in the process of consultation with the Secretary, provide such available documentation and other information as may be necessary and appropriate to demonstrate the basis for its determination with respect to the sizes and weights of vehicles which could be lawfully operated in the State on July 1, 1956, or the date of enactment of the Federal-Aid Highway Amendments of 1974. It should be noted that the committee also intended that the Secretary exercise his right to challenge such an initial determination.

Finally, I would like to state that the grandfather clause makes no distinction between divisible and nondivisible loads for the issuance of special permits.

Ms. OAKAR. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. Yes. I am happy to yield to the gentlewoman from Ohio.

Ms. OAKAR. Mr. Chairman, I want to congratulate the gentleman on his very fine work with respect to this bill and engage in a brief colloquy, if I may, at this time.

Mr. Chairman, as the gentleman knows, under prior priority lists for transitional money, SR-8, the Brooklyn-Brighton Bridge and the Main Avenue Bridge in northeast Ohio were listed as priorities.

The following is a description of these much-needed projects. Those of us from this area are deeply grateful; I just wanted to be assured that those were still part of the priority list.

The Greater Cleveland area has many aging and deteriorating roads, bridges, and other major structures that have served the area well for decades but are now succumbing to the inevitable ravages of time. The area is also among the hardest hit in the current recessions with an unemployment rate far in excess of the national average. The Greater Cleveland area, therefore, is an excellent example of the kind of area that this bill is designed to assist.

Section 127 of the Surface Transportation Assistance Act of 1982 provides a $200 million set-aside from authorizations for highway bridge replacement and rehabilitation. The report to the bill identifies a number of important bridge projects and directs the Secretary of Transportation to assign them priority in the use of these discretionary funds. I am delighted that the distinguished chairman of the House Public Works Subcommittee on Surface Transportation agrees that two major bridge projects in Cleveland should be included in the priority funding list. These will be funded if our State has them on their priority list.

The first such project is the Brooklyn-Brighton Bridge which must be replaced, utilizing the already existing foundations. The bridge is a critical link connecting Cleveland and the suburbs such as Parma, Seven Hills, and Brooklyn Heights accommodating both commercial and private traffic as well as transit. It crosses the B&O and N&W railroads. The bridge was built in 1914. The 1,726-foot span definitely merits priority consideration. The same is true of the Main Avenue Bridge which spans the Cuyahoga River providing private, commercial, and transit access over a major waterborne shipping route in the heart of industrial Cleveland. The 6,580-foot bridge which was built in 1940 along the lake suffers from annual freezes and is in need of major rehabilitation.

In addition the SR-8 Northfield Road project is a critical need. I thank the Chair for his support.

Mr. ANDERSON. The gentlewoman from Ohio is correct. These bridges have been mentioned in previous legislative history and have equal priority with the bridges mentioned in the committee report.

Mr. STOKES. Mr. Chairman, will the gentleman yield to me?

Mr. ANDERSON. I yield to the gentleman from Ohio.

Mr. STOKES. Mr. Chairman, I rise to commend the distinguished chairman, Mr. HOWARD, with respect to section 127, the highway bridge replacement and rehabilitation of H.R. 6211. Section 127 targets $200 million in discretionary funds for unique or especially high-cost bridges which need special, Federal attention.

We are all aware that our Nation has a serious problem in bridges that are decaying and deteriorating at a rapid rate, thereby endangering the public safety and health. More than two out of every five bridges in the Nation require replacement or rehabilitation.

Mr. Chairman, my colleagues may not be aware, however, that the Cleveland area is generally recognized as having one of the most critical problems of deficient bridges in the Nation. One example of these hazardous bridges is the SR-8 Tinkers Creek Bridge in my congressional district. Thus, I am delighted that Chairman HOWARD has agreed that this bridge is one of those which should receive priority for funding under the bridge dis-

cretionary program. With the funds received under section 127, the rehabilitation of the Tinkers Creek Bridge—a $9.5 million effort—would greatly help to protect the safety of the users of Northfield Road in Bedford, Ohio.

Mr. GINN. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. I yield to the gentleman from Georgia for a colloquy.

Mr. GINN. Mr. Chairman, I am especially pleased to see in H.R. 7360 the increased authorization for reconstruction or replacement of the thousands of deteriorated bridges of this Nation. This action is long overdue.

In my own district, the Eugene Talmadge Memorial Bridge over the Savannah River in Savannah, Ga., has reached an advanced stage of deterioration. Present traffic exceeds the design volume of the structure, and the bridge design makes it impossible to modify the bridge to increase capacity.

The present structure has reached the end of its useful life. It is functionally obsolete, will require a significant investment to be rebuilt, and is an obvious candidate for replacement under the bridge discretionary program.

Safety considerations for both highway and waterborne traffic, and the use of the Port of Savannah for defense purposes during a national emergency, dictate replacement of the present bridge. After careful study, both the Georgia Department of Transportation and the Georgia Ports Authority have concluded that the Talmadge Bridge must be replaced.

The total estimated cost to replace this bridge is $125 million. Current planning would permit design to begin in fiscal year 1984. Construction would begin in fiscal year 1985, and be completed in 3 years.

There will not be sufficient apportionment of bridge funds to the State of Georgia under the pending highway bill to replace the Talmadge Memorial Bridge. Under these circumstances would it not be the intent under the pending authorization bill that this bridge be funded under the bridge discretionary program?

Mr. ANDERSON. That is correct. I am familiar with the Talmadge Bridge and its importance to the city of Savannah. It is our intent under the pending bill that the bridge be funded on a priority basis under the discretionary bridge program.

Mr. GINN. I thank the gentleman from California for his support in this matter and wish him well as he continues his outstanding work as chairman of the very important Subcommittee on Surface Transportation.

Mr. BRINKLEY. Mr. Speaker, will the gentleman yield?

Mr. ANDERSON. I yield to the gentleman from Georgia (Mr. BRINKLEY).

Mr. BRINKLEY. Mr. Chairman, I thank the gentleman from California.

I, too, wish to commend him and his committee for the excellent work which they have done in bringing this bill before the body.

I should like to ask the gentleman two questions. First, under section 120(J) I understand that sums apportioned to States under this act may be utilized for priority primary routes under section 147 of this title designated in committee print No. 97-61 at the rate of 95 percent of the cost thereof.

Mr. ANDERSON. The answer is yes.

Mr. BRINKLEY. And, Mr. Chairman, is Georgia Corridor Z a primary priority route listed in the committee print referred to?

Mr. ANDERSON. Again the answer is yes.

Mr. BRINKLEY. Mr. Chairman, if I could extend this just a bit further, we have identified the 13th Street viaduct in Columbus, Ga., as being eligible under the discretionary bridge replacement program.

Is it the gentleman's understanding that that is accurate under this act?

Mr. ANDERSON. Again the answer is yes. I make reference to the gentleman's bridge in my opening remarks.

Mr. BRINKLEY. I thank the gentleman.

Mr. FARY. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. I yield to the gentleman from Illinois.

Mr. FARY. Mr. Chairman, I thank the gentleman.

I would ask the gentleman to engage in a brief colloquy in regard to this bill.

Mr. Chairman, I am pleased that H.R. 7360 retains the discretionary bridge program in addition to the regular formula bridge program. The discretionary program is especially important to Illinois since our apportionment share under the formula program is cut by one-half in the new bill. Our State has an unusually large number of bridges and a large proportion of those are old and in need of repair or replacement. Given the fact that Illinois' immense bridge needs must now be met with only half of its past regular apportionment share, the discretionary program is essential to our State.

Mr. Chairman, I would like to point out three bridges in our State which have critical needs and which are especially deserving candidates for the discretionary program. First, the Dan Ryan Bridge: it carries an average of 225,000 vehicles a day, with trucks constituting 15 percent of those vehicles. This bridge is part of a major urban and national defense arterial, the Dan Ryan Expressway in Chicago, which is also the world's busiest highway. A second candidate is the Clark Bridge which carries U.S. 67 traffic over the Mississippi River in Alton. Built in 1928, this two-lane bridge has a dogleg in the middle and has long been a major problem in our State. Also built in 1928, is the third, the Illinois Route 121 Bridge in Decatur, or the Staley Viaduct. Structurally deficient, this 28-foot-wide bridge carriers average daily traffic of 21,000 vehicles, one of the highest traffic volumes in the Nation for a two-lane bridge. Do you agree that these bridges reflect the kind of needs which the descretionary bridge program is intended to address?

Mr. ANDERSON. Yes, I agree. These bridges should receive high priority consideration for discretionary bridge funds.

Mr. FARY. Mr. Chairman, I thank the gentleman.

Mr. ANDERSON. Mr. Chairman, I yield 2 minutes to the gentleman from Michigan (Mr. ALBOSTA).

Mr. ALBOSTA. Mr. Chairman, I had the opportunity last summer to go to Europe and rent a car and drive around and see firsthand the conditions of their roads and bridges. In fact, I was even in Eastern Europe for a short period of time and drove around Poland, Czechoslovakia, and Hungary and I saw firsthand what their roads were like. I am not going to stand here and tell this House that theirs are better than ours, but they are nearly as good.

West Europe's roads are much better than ours.

I think the debate today should be perhaps how this bill comes out and how we divide up moneys, but it should not be on its need.

Obviously, we are fast becoming a second-rate nation and if we do not do something about correcting the kinds of problems that we have now, we will become a second-rate nation.

In Western Germany, for instance, I did not travel on any roads that I found load limits on the bridges, and there are big trucks traveling their roads also. Their roads were painted better than ours. They were not cracked up and there were people out there working continually repairing the roads; not like I see here in our own country.

So for those reasons, I believe that this bill is very necessary and that we should not debate the need for the bill. We ought to debate perhaps how it is administered and how it is divided up; but the need is obviously there.

I would hope that all Members would consider the kind of need that we have in this country and whether or not we should become a second-rate nation, because we are not willing to accept the responsibilities that go with being here in this legislative body, and that is to do something about the deterioration of our highways and bridges, which are in terrible, terrible need in this country.

Mr. Chairman, my own State of Michigan will benefit from this highway and mass transit bill because we have changed the primary formula to better reflect the needs and costs associated with repairing and rebuilding primary roads in States like Michigan. As a result Michigan will receive about $16 million in additional funds for primary highways in 1983.

Likewise the bridge formula in H.R. 6211 will update the inventory of bridges needing repair and will include on and off system bridges, a change that will bring Michigan extra funds to fix up our bridges for years to come.

When it comes to the interstate construction and rehabilitation program, Michigan will receive more funds as part of this 4 year bill because we do have important segments of the Interstate Highway System that will be constructed in the next several years. Furthermore, the $2.1 billion for repair and rehabilitation of the Interstate System will help a State like Michigan where our highway system was built many years ago and is in need of major repair in order to maintain its high quality.

Finally, I would like to mention the issue of equity. It is time that we received our fair share of Federal highway and bridge funds to meet our needs in Michigan. By insuring that no State will receive less than 85 percent of the money it contributes to the highway trust fund through gas tax receipts and excise taxes on trucks and related motor vehicle parts, H.R. 6211 takes an important first step in providing for an equitable distribution of Federal highway funds. I strongly believe that Michigan will increase its share of these highway funds during the next 4 years but we will never again drop our previous low level of return.

The amendments adopted today providing for the 85-percent minimum share and allowing for States to spread their match requirements over several years will make this highway bill a better piece of legislation for Michigan and the entire country.

As I stated earlier now is the time for a major highway and mass transit bill to create over 320,000 jobs at a time when national unemployment has reached record levels. I urge my colleagues in the House to pass H.R. 6211 so that we can get on with the job of rebuilding America. This country was not built by standing still. We need to enact this highway legislation for progress, productivity and jobs.

□ 1600

Mr. SHUSTER. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman and ladies and gentlemen, I rise in strong support of this legislation which is before us today. This Nation of ours is facing a transportation crisis and it is not a crisis which we have been unaware of. It has been studied to death.

The evidence has been provided. The evidence is clear. It is incontrovertible. Unless we now act and provide for additional funding for America's transportation system, we are not going to have the kind of system which this Nation so badly requires.

The Governors, meeting in the National Governors Conference, stated, and I quote:

Transportation funding is the most serious problem facing States.

Indeed it is. We have an opportunity here today to make a historic decision by passing this legislation. Now, do not let me mislead you into thinking I support everything and I am pleased with everything in this bill, because I am not.

I am not happy about the closed rule. I am not happy about the tax structure in title V. I believe that trucks are too heavily penalized and I am sad that we do not have the opportunity under an open rule to deal with this issue.

Beyond that, let me emphasize, particularly to my friends from the rural areas, that nobody in this House had to swallow harder than I—and it is a little hard for me to swallow these days—on the 1 cent of the 5 cents for mass transit. But in the interest of compromise, in the interest of getting legislation, in the interest of addressing a very serious national problem, I indeed did swallow hard and I do support the 5-cent gas tax is it is structured.

I need not go through the details here of the justification for this legislation because it has already been amply covered. It has been my great privilege to serve for almost a decade as the ranking member of our Transportation Subcommittee and, indeed, as the chairman of the National Transportation Policy Commission, a commission created by this Congress.

The evidence is overwhelming. We must act or we must pay a price much dearer than the price of the taxes which are being levied in this legislation.

We are not only talking about rebuilding America; we are talking about saving lives, because as highways are modernized they become safer.

Do my colleagues know that the death rate on rural highways at night is 14 deaths per 100 million miles traveled, and on four-lane interstates it is as low as 1.6?

So we are talking about safety here. We are talking about highway safety.

I might add that I conducted a one-man demonstration project a month or so ago to see whether or not seatbelts worked. I can report that they do, because I would not be here today as a result of a head-on collision but for the fact that I had my seat belt on.

So we must view this legislation not only in terms of reviving our economy, not only in terms of rebuilding the infrastructure, not only in terms of the 320,000 long-term jobs which are going to be created, but also in terms of the implication for saving lives across this great land of ours.

I would like to particularly salute the bipartisan leadership of our committee, the members of the committee who have worked out this compromise. In particular, I would like to salute the Secretary of Transportation, Drew Lewis. I do not believe there has ever been a better Secretary of Transportation in these United States.

I would salute the President for coming forward to support this legislation.

Last, I would like to particularly salute the Speaker of the House. I have been known to disagree with the Speaker a few times in the past, and I have a feeling that I am probably going to disagree with him a few times in the future, but today is certainly not one of those times.

Today I rise to salute the statesmanship of the Speaker of the House. By his action, he has made it possible for this legislation to be brought before this House.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. SHUSTER) has expired.

Mr. SHUSTER. Mr. Chairman, I yield myself 1 additional minute.

Mr. Chairman, by the action of the Speaker, we have a bipartisan agreement between a Republican President and a Democratic Speaker of the House, between both parties, so that both present and future Americans will be able to travel more safely, more economically, more conveniently, because of the action taken here today.

By working together, this is possible. Within the confines of this House, but for the distinguished Speaker and his willingness to support this bill on a bipartisan basis, we would not be here today.

Mr. ROEMER. Mr. Chairman, will the gentleman yield to me?

Mr. SHUSTER. I yield to the gentleman from Louisiana.

Mr. ROEMER. I thank the gentleman for yielding to me.

Mr. Chairman, I thank my colleague and salute him for his efforts on this bill in our committee.

I would like to ask the gentleman about section 154 as I earlier asked the chairman of our committee.

Does the gentleman agree with the changes proposed in this bill on prevailing wage, striking the word "initial"?

Mr. SHUSTER. Personally, I do not agree with that, Mr. Chairman, but in the interest of compromise it got through the committee. Should there be a vote, I will vote against it.

Mr. ROEMER. Mr. Chairman, I thank the gentleman.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. SHUSTER) has again expired.

Mr. SHUSTER. Mr. Chairman, I yield 1 minute to the distinguished gentleman from Kentucky (Mr. SNYDER).

Mr. SNYDER. I thank the gentleman for yielding this time to me.

Mr. Chairman, I rise in support of the amendment in the nature of a substitute for H.R. 6211, and urge its prompt passage so as to enable us to get into conference quickly.

As I said in my individual views in the report accompanying H.R. 6211—most of which is incorporated into this substitute—I consider it a worthwhile piece of legislation despite some reservations about particular provisions. I also was concerned at the time, however, that the revenue increase whose enactment it assumed was not appropriate.

That was well over 6 months ago, Mr. Speaker, and in the interim the condition of the economy has not improved to the extent that many of us had anticipated. In recognition of this fact, I recently wrote to the President to express the view that it now appeared time to reconsider our positions on the matter, and am pleased that he has done so. I therefore am pleased to support the bill and the revenue package, despite some continuing reservations about certain of the provisions.

I am pleased, in particular, that the chairmen and ranking members, respectively, of the committee and Subcommittee on Surface Transportation have recognized the need for a project to demonstrate the potential for accelerating construction of a project on the Federal-aid primary system.

As Members may recall, there was a project acceleration effort undertaken in Pennsylvania as a result of the 1978 Surface Transportation Act. The results were astounding: A savings of 6½ years in construction time and a total cost of $25 million on a project which otherwise would have cost $50 million.

The time and cost savings achieved by that demonstration are hardly typical of what one can expect nationwide, however, since the Pennsylvania project was carried out at a time when a lack of a capital budget for the State meant that it was the only project in progress. To a unique degree, State and Federal manpower was available to cut redtape and to achieve the coordination and cooperation necessary to bring that project to completion.

Yet we are convinced that the lessons of that success can be applied elsewhere, although necessarily to a lesser degree. In fact, we provide in section 136 of this substitute that an acceleration of projects program be instituted whereby projects chosen by the Secretary and the State highway departments may be exempted from normal administrative procedures, policies, rules and regulations so long as no provision of law is violated.

The specific project which has been incorporated in this bill would apply the cost-saving acceleration approach to that State Route 841, known as the Jefferson Freeway, which extends between U.S. Routes 60/31W and Interstate Route 65, in the vicinity of Louisville, Ky. This is a high-priority project serving a major metropolitan area and one which should demonstrate the applicability of the lessons of the Pennsylvania project in a State with an active program statewide.

I also should like to point out that all of route 841 has been added to the list of priority primary routes to be published in a committee print designating such routes. While priority primary routes are not slated to receive continued funding as a separate category under this bill, it does provide for a 95-percent Federal match for the States choosing to fund such projects from their regular primary apportionments. Furthermore, all States are to receive an increase in primary apportionments, and are encouraged to give priority in the use of their increase in this category to projects so designated.

Completion of the Interstate System is rightly the highest priority from a Federal standpoint in this legislation. However, primary system highways also perform a vital function in terms of the Federal interest. This bill's authorization of project acceleration demonstration on a portion of this key highway and the designation of the remainder as a priority primary route reflect that interest and therefore merit the support of Members.

I urge enactment of the bill.

The CHAIRMAN. The gentleman from Pennsylvania (Mr. SHUSTER) has 17 minutes remaining, and the gentleman from California (Mr. ANDERSON) has 5 minutes remaining.

Mr. SHUSTER. Mr. Chairman, I yield 3 minutes to the distinguished gentleman from Pennsylvania (Mr. CLINGER).

Mr. CLINGER. Mr. Chairman, I rise in very strong support of this bill, which is long overdue and is going to address some critical problems in this country.

I would just make one point which I think deserves stressing, and that is that there is a direct linkage between the quality of our Nation's infrastructure, specifically the transportation system, and the ability with which we can respond to economic development. We cannot have economic development and growth unless we have an adequate transportation system to move our commerce around this country.

At this point, Mr. Chairman, I would ask if Chairman ANDERSON would engage in a colloquy with the gentleman from Pennsylvania (Mr. EDGAR) and me.

Mr. Chairman, the gentleman from Pennsylvania (Mr. EDGAR) and I have coauthored legislation to provide for the first and continuing capital budget for the U.S. Government. As you know, the Subcommittee on Economic Development held 4 days of hearings last September on H.R. 6591, the Federal Capital Investment Budget Act. With over 50 cosponsors in the House, the legislation has wide bipartisan support from Members throughout the Nation. A major concern of the supporters of this bill is that with each passing year that Congress fails to enact this legislation, enormous and compounding problems on the serious deterioration of the country's infrastructure result.

Mr. EDGAR. Mr. Chairman, will my colleague yield?

Mr. CLINGER. I yield to my colleague from Pennsylvania.

Mr. EDGAR. I thank the gentleman for yielding.

Mr. Chairman, it has been estimated that the United States will have to spend between $2.5 and $3 trillion in this decade just to maintain existing levels of service on public facilities, yet at present expenditure levels less than a third of these needs will be met. This crisis is evident in all parts of the country.

The decline in investment in public capital stock has occurred in virtually every public works activity. Already, one-quarter of our 42,500-mile Interstate Highway System is worn out and needs rebuilding. One-half of Conrail's rails and roadbeds are seriously decayed. Half of all the communities in the country cannot expand because their water treatment plants are at or near full capacity. Boston loses 20 percent of its water supply through leaky pipes each day, while Houston loses up to 30 percent. One-fifth of the Nation's bridges have deteriorated to the point where they are either restricted or closed.

As owner of a huge number of public facilities, the Federal Government must take the lion's share of responsibility for the deterioration of our collective holdings. Rather than addressing this critical issue directly, the Federal Government—in the current public works practices of both the executive and legislative branches—is only exacerbating the problem.

Budgeting for public works now happens on a piecemeal, project-by-project basis. In fact, most Federal capital expenditures are made in the absence of even the most basic information and policies. The Federal Government has no inventory of its physical investments; no assessments of the condition or capacity of its existing facilities; and no plan for maintenance,

repair, rehabilitation, and new construction.

□ 1610

Mr. ANDERSON. Mr. Chairman, I yield 2 minutes to the gentleman from Pennsylvania (Mr. EDGAR).

The CHAIRMAN. The gentleman from Pennsylvania (Mr. EDGAR) is recognized for 2 minutes.

Mr. ANDERSON. Mr. Chairman, will the gentleman yield?

Mr. EDGAR. I yield to the gentleman.

Mr. ANDERSON. Mr. Chairman, I wish to commend the gentleman from Pennsylvania on bringing this vital issue to the attention of this body. Media reports throughout the country are finally putting a spotlight on the troubles of our national infrastructure which now have accumulated to the point where they pose a growing obstacle to a sustained national recovery. There is also a growing awareness that the quality of life of our citizens is threatened because of public works disinvestment. I feel this issue is of such vital urgency that I will work toward placing a Federal capital investment budget bill on the top of the House Public Works Committee's agenda in the 98th Congress.

Mr. CLINGER. Will the gentleman yield?

Mr. EDGAR. I yield to the gentleman from Pennsylvania.

Mr. CLINGER. The sponsors of H.R. 6591 believe that a capital budget will enhance the unified budget process by providing basic information so that Congress can make informed decisions about allocations of public infrastructure funding. The bill would provide us with a good management document to identify our public infrastructure investments, assess their condition, estimate what is needed in the future, help establish responsibility among Federal, State, and local levels of government, and prioritize our present spending in order to bring about the greatest return on taxpayer investments.

Should the other body adopt a capital budget amendment to their transportation bill along the lines of H.R 6591, what would be the chairman's position in conference committee?

Mr. ANDERSON. You may be assured that I will support the inclusion of such an amendment in the conference report.

Mr. EDGAR. I wish to thank the chairman for his cooperation and understanding on the merits of a capital budget.

Mr. CLINGER. Let me just echo the sentiments of Mr. EDGAR. Thank you again for your consideration.

Mr. SHUSTER. Mr. Chairman, I yield myself 1 minute.

I would like to discuss with the chairman of the Surface Transportation Subcommittee, section 137(b), a project intended to demonstrate the latest state-of-the-art highway technology. It is stated in this section, among other criteria, that this project should close a gap of not more than 10 miles and connects both highway construction using current technology and older completed highway construction. I would like to ask the chairman if the segment of Route 220 from East Freedom, Pa., south to the Blair County-Bedford County line would qualify for all the specific criteria in this section and would be eligible for this demonstration project?

Mr. ANDERSON. Yes, Route 220 from East Freedom, south to the Blair Country/Bedford County line would qualify for all the criteria in this section and should be given priority consideration in the placement of this project. In my estimation, this segment of highway in Pennsylvania is an ideal location to demonstrate the latest state-of-the-art highway technology that should be embodied in this project.

Mr. SHUSTER. I thank my destinguished chairman.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. SHUSTER. Mr. Chairman, I am pleased to yield 3 minutes to the distinguished gentleman from Florida (Mr. SHAW).

Mr. SHAW. Mr. Chairman, I thank the gentleman for yielding.

As a member of the Public Works and Transportation Committee, I am extremely proud of the work that we have done to bring this most important bill to this body. I am also delighted to recommend the amendment to the bill that is going to be made by the Ways and Means Committee that will, for the first time perhaps, show light at the end of the tunnel for the construction of the interstate program, one that the State of Florida has lagged so sorely behind in.

There is one provision, however, of this bill that I am not proud of, and I would like to focus on at this point, and at a later time offer an amendment to. That is the provision that would eliminate section 131 of title 27 which would, by one single vote in a lameduck session, completely eliminate the highway beautification program for this entire country, which has been in place now for almost 20 years.

I would warn the Members of this body that this has far-reaching implications. It appears to be a States right issue on its fact but it is not.

In turning the authority over to the States, it dictates to the States how they are going to do it. It provides how they are to provide for compensation. It locks in existing location of billboards throughout the country, and in doing so it even provides that the various States will have to eliminate trees from the right-of-way that it cannot justify as being part of a general landscape design. This would simply mean that we would be eliminating trees, by cutting them down, to give the motoring public a better view of billboards along our highways. I do not think under any definition that this can be called a highway beautification program.

I think this would be a tragedy if my amendment, when I offer it at the proper time, were not accepted, to retain the existing law that seems to be working in some small way, and substitute in place thereof a study where the Public Works and Transportation Committee can go back, properly study this issue, with the Secretary of Transportation, talk to the various States, and then come up with a responsible amendment to the Highway Beautification Act that will do precisely that; that is, beautify the highways of this country.

Mr. SHUSTER. Mr. Chairman, I yield 1 minute to the distinguished gentleman from Virginia (Mr. WOLF).

Mr. WOLF. I thank the dinstinguished ranking member of the Surface Transportation Subcommittee. It is my understanding that this highway legislation makes funds available out of the highway trust fund in fiscal years 1983, 1984, 1985, and 1986 for substitute highway projects, such as the Interstate 595 withdrawal and substitution project in Arlington County in the 10th District of Virginia. Is that correct?

Mr. SHUSTER. Yes, the gentleman is correct. The availability of highway trust fund financing would effectively restore contract authority to substitute highway projects with 25 percent of the funds available in a fiscal year for substitute highway projects to be allocated at the discretion of the Secretary of Transportation. The remaining 75 percent would be apportioned on the basis of estimates of the cost to complete substitute highway projects prepared by the Secretary of Transportation and approved by the Congress. Projects such as I-595, which I understand would withdraw 0.84 miles of the unbuilt segment of the interstate project and substitute a 1.78 mile improvement project for U.S. Route 1, would certainly qualify for funds authorized under section 107 of this legislation and the allocation of interstate transfer funds to the Commonwealth of Virginia could certainly be earmarked for the I-595 project.

Mr. WOLF. I thank the gentleman. I strongly support the interstate transfer program as a cost effective way to build highways which can best meet a jurisdiction's needs. As you know, the initial plan for I-595 was to provide a spur to be constructed to interstate standards from the existing I-395, Shirley Highway, to Route 223, Na-

tional Airport connector, in Arlington County. After environmental impact study, it is recommended that the project be built instead as an improvement to U.S. Route 1, Jefferson Davis Highway, from I-35 to Route 120, Glebe Road, for a facility at less than interstate design, which could better meet the needs of this rapidly developing corridor. The withdrawal of the I-595 project and the substitution of the improvement to U.S. Route 1 is the type of interstate transfer project that certainly should be funded under provisions of Federal-aid highway legislation. I want to thank the gentleman for clarifying the interstate transfer section of this legislation.

The CHAIRMAN. The gentleman from Pennsylvania (Mr. SHUSTER) has 9 minutes remaining, and the gentleman from California (Mr. ANDERSON) has 3 minutes remaining.

Mr. SHUSTER. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from Indiana (Mr. MYERS).

□ 1620

Mr. MYERS. Mr. Chairman, I hope that the gentleman from New Jersey, the chairman of the committee, can eliminate any possible ambiguity with respect to the bill's treatment of the railroad relocation projects that are authorized under section 163 of the Federal-Aid Highway Act of 1973.

Mr. Chairman, when this bill becomes law, will the entire project in Lafayette, Ind., qualify for the priority consideration required under section 105, and for the 95-percent Federal, 5-percent State funding match provided for under section 120, even though only a portion of the total project physically impacts the Federal primary, secondary, or urban systems? It is my understanding that 20 of the 42 highway crossings that the Lafayette project will eliminate are on the Federal-aid systems. I yield to the gentleman from New Jersey.

Mr. ANDERSON. Mr. Chairman, will the gentleman yield?

Mr. MYERS. I yield to the gentleman from California.

Mr. ANDERSON. Mr. Chairman, I thank the gentleman for yielding. The gentleman is correct; the provisions in this bill for the Lafayette project, as well as for the other section 163 projects, apply to the entire project, including those portions not physically impacting the Federal-aid primary, secondary, or urban systems.

It is not the objective of the committee to terminate or deauthorize these projects. It is only our intent to integrate them into the Federal-aid systems and to make them more a part of the overall State highway programs.

Mr. MYERS. Mr. Chairman, I thank the gentleman for his clarification, and I yield back the balance of my time.

Mr. SHUSTER. Mr. Chairman, I yield 1 minute to the distinguished gentleman from Virginia (Mr. BUTLER).

Mr. BUTLER. Mr. Chairman I expect to vote for this legislative anticipation that it will make available funding for the deteriorating Williams Viaduct Bridge at Lynchburg, Va.

The Williams Viaduct Bridge connecting the northern part of the Commonwealth of Virginia to central Virginia was constructed in 1917.

It is one of only two bridges that span the James River in this part of the State.

The Williams Viaduct is deteriorating rapidly. According to a report by the city of Lynchburg's consulting engineer in 1979, "a replacement structure must be built within 5 to 8 years," 1984–88, to prevent a serious reduction in load limit on this structure.

The estimated cost of this bridge replacement structure is $40 million, which is obviously beyond the funding capability of that city based upon current State and Federal highway allocations.

This bridge is critical to the entire central Virginia area as it carries approximately 13,000 vehicles per day and serves as the one and only access to Griffin Pipe & Products Co. which has gross sales in excess of $60 million and supplies pipe to the entire eastern seaboard.

Each year the bridge continues to deteriorate to such an extent that it may be necessary to close the bridge to truck traffic and other traffic may be severely restricted.

It is imperative that the need for this replacement be recognized during the very time Congess considers the gasoline tax and bridge repair and highway rehabilitation legislation.

Mr. SHUSTER. Mr. Chairman, I yield 1 minute to the distinguished gentleman from Vermont (Mr. JEFFORDS).

Mr. JEFFORDS. Mr. Chairman, I intend to support this bill, and I certainly want to commend the committee for making some accommodations to States that will have a hard time with matching funds.

I find little fault with the premise that the Federal gasoline tax needs to be increased. It has not been raised in 23 years, and the nickel per gallon hike that is proposed today is barely half of the 9 cents per gallon which would be required to keep up with inflation over the last two decades. In addition, as the miles-per-gallon ratio improves, fewer dollars for the miles driven are being received.

Certainly this Nation's highways and bridges are in a serious state of disrepair. Sixty-five percent of the Interstate System will need major work between now and 1995. Fifty percent of the primary system will reach the end of its design life during this decade, and 40 percent of our bridges are more than 40 years old, with design life expectancies of 50 years.

The highway trust fund has been paying out more than it has been taking in recently. New revenues are required, and it makes sense to me that those who use our roads should pay for their upkeep.

The problem comes with the distribution of the $5.5 billion the tax increase will generate. A significant number of States will be unable to come up with the match required to qualify for the new funds. In Vermont, for example, over the past 2 years we have increased our rehabilitation program by $7 million annually in State funds. In fiscal year 1983, we were able to cover the increase with a combination of economy measures, including RIF's, reduced bonding, and reduced salt usage. For fiscal year 1984, the State transportation agency was planning to ask the legislature for a 3 cents per gallon hike in the State gas tax. However, there is little chance that the legislature would honor such a request with the advent of the new Federal tax.

Our State gas tax is presently at 11 cents per gallon, and delivery prices in Vermont are high. We can expect delivery prices to go even higher as the trend of major suppliers pulling out of the State continues, and competition lessens. The point here is that Vermont already has a high tax effort, and is severely limited in its ability to tap new financial resources for the purpose of highway maintenance.

The State is thus left with a $7 million shortfall in the repaving program. Since the $1.3 million of State funds we will lose were slated to match $4 million in Federal funds, the State has an $11 million problem. In summation, although Vermont could become eligible for some $25 million in new Federal funds under the tax increase, it will not be able to match all currently available Federal funds without the State gas tax increase that had been planned upon.

I understand that the committee has addressed the donor-donee problem by allowing States to certify that they cannot come up with the match; they will then receive their share of the new funds and have 2 years to cough up the match money. If they do not, after the 2 years have expired their apportionments will be reduced accordingly. I also understand that this loan proposal compromise is favored by the adminstration and that the Senate Public Works Committee is leaning that way.

I would have much preferred an easing of the matching requirements, with no payback provision, for 1 or 2 years on highway programs other than interstate. A 90 to 10 Federal/State ratio would be satisfactory. Vermont's uptapped tax base is minimal

today and will be in all likelihood 2 years from now. The ratio change would allow the State to stretch further its limited resources.

Another possibility would be to return part of the increased revenues to the States as a block grant in lieu of an increase in the non-Federal secondary and urban programs. This plan would be in keeping with the President's New Federalism initiative, which includes the return of certain highway programs to the States, and is sensible in light of the fact that the Federal gas tax increase precludes State gas tax increases.

Mr. Chairman, it would be extremely unfortunate if States with high tax efforts like Vermont are penalized in the distribution of the new revenues. We too have a joblessness problem and we too have severe bridge and highway repair problems.

I also would like to make a few comments as ranking minority member of the subcommittee dealing with unemployment. First, I would commend the committee for not trying to sell this bill as a jobs bill, as a solution to unemployment. It will, or at least may, create some jobs, but for the dollars spent, it is not very productive. For instance, there is no economic stimulus. It is a trade-off. You spend money, but you tax for it, and thus remove any pump priming. Also for the dollars spent it will have little effect on unemployment, as compared to other programs. In fact, only 3½ percent of the unemployed will receive help; 96 plus percent of the unemployed will not receive help. Let me give you some examples of more productive or meaningful expenditures for the unemployed. By funding title 3 of the new employment training bill, related to training dislocated workers, we could take care of eight times as many workers for dollars spent.

There is no money presently appropriated in that bill for title III for 1983.

We could get two to four times the punch per dollar spent for other programs.

This bill is restricted almost entirely to contruction. Half of the unemployed are women. This will provide almost no help for women.

The greatest area of unemployed is with youth yet few, if any youth, will be employed by this bill.

I will be speaking out more fully on this issue tomorrow. I would urge Members not to forget the large number of people unemployed, 96 percent that will get no help by this legislation. They have serious problems that must be faced.

The CHAIRMAN. The time of the gentleman from Vermont (Mr. JEFFORDS) has expired.

Mr. SHUSTER. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from New York (Mr. GREEN).

Mr. GREEN, Mr. Chairman, I thank the gentleman from Pennsylvania (Mr. SHUSTER) for yielding time to me, and I join my colleagues in welcoming him back to the floor.

Mr. Chairman, I rise to speak in support of H.R. 6211. I commend the Public Works and Transportation Committee for drafting an excellent piece of legislation.

I am particularly pleased with the section of the bill which reauthorizes mass transit assistance. As the Members of the House know, New York City depends heavily on mass transit. It has been estimated that 85 to 90 percent of persons entering the central business district during work hours enter by some form of public mass transit. The New York City transit system also accounts for one-third of all rides taken daily by Americans riding public transit. While New York City welcomes Federal transit assistance, it is not dependent on it solely. In fact, Federal transit assistance accounts for only 6 percent of the New York City transit budget. Cognizant of the fact that it must find ways to upgrade the system, New York City has embarked on a $7.1 billion capital improvement plan, of which only a small percentage will come from Federal funding.

Part of the funding for this bill will come from the new 5-cents-per-gallon gas tax, of which 1 cent will be dedicated to mass tranist. This is a significant step, and I am pleased that the President joined Secretary Lewis in endorsing this concept. Such support was key in the approval of the proposal by the Ways and Means Committee.

H.R. 6211 makes some important changes in how mass transit funds are distributed. It looks beyond the present population and population density formulas to service-based factors such as bus revenue miles, fixed guideway revenue vehicle miles, bus passenger miles for each dollar of operating cost, rail passenger miles for each dollar of operating cost and non-Federal operating revenue. What this approach means is that the size of a system and how much it is used will account for something in determining Federal funding. While population factors will still be used, in communities of relatively equal size the city with a bigger system that provides more services will receive more Federal aid.

The creation of a new block grant program—section 9—is another important feature contained in H.R. 6211. It recognizes that different systems have different needs and allows the funds appropriated for the block grant program to be used for either capital or operating assistance. However, systems would be limited to the fiscal year 1982 level of spending for operating assistance. I consider this to be a reasonable approach. It is far better than the administration's bill which proposed to phase out operating assistance over the next 2 years. Under the administration's proposal, there would have been $640 million available for operating assistance in fiscal year 1983, $275 million on fiscal year 1984, and nothing after that time. New York City, which received $105 million in operating assistance in fiscal year 1982, would receive $67 million in fiscal year 1983, $34 million in fiscal year 1984, and nothing in operating funds after that time. Under H.R. 6211, New York City will be able to use up to $150 million per year of the Federal funds it receives for operating assistance.

Congress has repeatedly made it clear during these past 2 years that it wants to continue Federal mass transit operating subsidies. When this bill reaches the President, I urge him to sign it even though it contains continued operating subsidies. The budget resolutions adopted last year and this with his support have contemplated continuation of such funding. I would be dismayed if he vetoed this legislation if it did not provide for the phaseout of mass transit operating subsidies.

Once, again, I want to congratulate members of the House Public Works and Transportation Committee for the work they did on this bill. Additionally, I want to commend the members of the Ways and Means Committee for the work they did on the gas tax. I urge all my colleagues in the House to support H.R. 6211.

Mr. ANDERSON. Mr. Chairman, I yield such time as he may consume to the gentleman from Texas (Mr. BROOKS) for the purpose of engaging in a colloquy.

Mr. BROOKS. Mr. Chairman, I would like to inquire as to the priorities you intend for these funds.

It is my understanding that it is the intent of the committee that priority be given to projects that will fit in with other ongoing federally supported projects.

To cite an example, in my district in Texas, the city of Port Arthur and local private interests have invested in a large project to revitalize the city. This project is a new community under the Department of Housing and Urban Development's criteria and is well on the way to completion. The tract of approximately 2,000 acres combines commercial, public and residential—including low- and moderate-income housing—and meets all of the Federal criteria for a new community development.

The city has invested in extensive improvements and the public and private commitments to this much needed project are very substantial.

One of the problems it faces, however, is inadequate access from Highway 69 and needed improvements to Ninth Avenue in Port Arthur.

I am hopeful that this project and others like it, which are presently progressing well and which offer the most immediate benefits and return on our investment, will be given the highest priority under the proposed highway improvement program.

Mr. ANDERSON. Mr. Chairman, if the gentleman will yield, I will state to the gentleman from Texas (Mr. BROOKS) that is the intention of this legislation—to provide needed improvements where they will have the most immediate effect and where they will augment other Federal and local programs to help our economy.

Mr. BROOKS. Mr. Chairman, I thank the gentleman very much.

Mr. ANDERSON. Mr. Chairman, I yield such time as he may consume to the gentleman from Puerto Rico (Mr. CORRADA).

Mr. CORRADA. Mr. Chairman, I rise in support of H.R. 6211, the Surface Transportation Act of 1982 and the committee amendments to be offered shortly.

This legislation comes before us with an added authorization for a new 5-cent-per-gallon increase in the Federal gasoline tax to finance a highway construction and rehabilitation program in addition to extending the critical transportation programs of the Federal Highway Administration and the Urban Mass Transit Administration.

I would like to commend the diligence and the foresight of the members of the House Surface Transportation Subcommittee, House Committee on Public Works and Transportation, who have spent many hours in considering the long-range impact of this important revision of the Nation's transportation programs.

All of us know, H.R. 6211 was reported last spring and, prior to the recess, a simple extension which enabled the major highway programs to continue was passed. This expires December 17.

However, the major provisions of H.R. 6211 coupled with the new transit stimulus which has received the support of both the administration and congressional leaders, particularly the House Democratic leadership, provide an added stimulus to revitalizing our transit systems, and repairing out Nation's bridges and highways.

In Puerto Rico, this legislation will continue programs which, for years, have helped develop the island's infrastructure by developing a viable transportation system on the island, enabling our local economic development to ship goods and services throughout Puerto Rico.

The 4-year authorization for the highway and mass transit programs gives our Secretary of Transportation the tools necessary to continue that development.

At the same time, Mr. Chairman, the rise in the gasoline tax will give an added stimulus which will expand on the primary premises of H.R. 6211 when it was reported last spring.

We have all heard of, in recent months, of the need to halt the deterioration of our highway and public transportation system. The increase authorization levels for highway and bridge construction and rehabilitation, for local highway safety programs, and for capital investment in the transit systems will help Puerto Rico continuation of Federal funds which help maintain an excellent highway system, and which help operate and maintain the Metropolitan Bus Authority.

This legislation, while not primarily seen as an employment bill, will certainly still result in an increase in employment, particularly in the construction and construction-related industries. It comes at a time when Puerto Rico's unemployment is at a staggering level of 22.8 percent. It comes at a time when the need to provide the capital investment to improve and rehabilitate a highway and transit system is absolutely vital. It comes at a time when some projects in the island's 5-year priority program, once canceled, might now be restored, enabling our Puerto Rico Highway Authority the means to continue a program which, when on the drawing board, will help meed increasing needs due to a sharp rise in motor vehicle registration, the growth in vehicle travel and the growth in vehicle ownership.

Mr. Chairman, H.R. 6211 is an excellent bill. It merits all of our support, coming at a time when the need to stimulate our economy, create jobs, and improve and maintain our Nation's transportation systems is absolutely vital.

I hope that the House approval of H.R. 6211 will be speedily matched by the Senate consideration of companion legislation to accomplish the same task.

Mr. SHUSTER. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from Virginia (Mr. BLILEY).

Mr. BLILEY. Mr. Chairman, I thank the gentleman from Pennsylvania for yielding this time to me, and I wonder if I might ask the gentleman a question.

I am concerned with section 122 of the bill which deals with approaches. I have one of the counties there that wishes to extend an expressway, the Powhite Expressway, as a toll road to assist a desperate traffic problem.

Is it not true that under the language of this section the county could be eligible for assistance for a portion of this road up to but not including the toll plaza?

Mr. SHUSTER. Mr. Chairman, if the gentleman will yield, let me respond to him.

If my understanding is correct, if the Robert E. Lee Bridge meets the warrants that have been mentioned and that I have been assured by the gentleman it does, then I would assume the bridge is indeed eligible to be considered for the funds needed.

Mr. BLILEY. Mr. Chairman, I thank the gentleman very much.

● Mr. CAMPBELL. Mr. Chairman, I, along with many of my colleagues, have been inundated with letters and visits from truckers and trucking firms opposing the disastrous trucking provisions of the Surface Transportation Act—and I must say Mr. Chairman, that I agree with them 100 percent.

Let me say that I do support the concept of this bill. I agree, we do need to rebuild and rehabilitate our Nation's highway system. But, I do not believe that we can single out one of the most important industries in the country and tax them to death, which is what this bill would do.

All of the truckers I have met with support the 5-cent increase in the price they pay for their diesel fuel. In fact, many have stated that they would support moderate increases in the miscellaneous taxes on truckers. But, a 163-percent increase in taxes on a typical tractor trailer truck is totally unacceptable. Heavy use taxes would be increased from $210 to $1,880. One of the truckers I met with today gave me figures that should shock everybody. This company's present tax and user costs are $81,200 per year. This bill would increase his costs by 212 percent to $253,097.

This is a phenomenal increase in taxes and fees for a single year. I want to join the truckers in asking, "who will pay for these extra costs?" The consumers may pay, but during a time of deregulation, competition has increased and prices have fallen in the trucking industry. It would be difficult to raise prices or increase trucking fleets. The more likely scenario is that many of the smaller, independent firms will fold, adding to our unemployment problem—while the larger firms will show substantial losses in their attempt to absorb the increased costs.

Mr. Chairman, I urge my colleagues to support the truckers and the thousands of jobs at stake by defeating this rule. Let us pass a bill that will rebuild our roads, without running over the truckers in the process.●

● Mr. FARY. Mr. Chairman, I rise in strong support of the substitute bill to H.R. 6211, the Surface Transportation Assistance Act of 1982. This legislation is urgently needed to help repair our deteriorating highways, bridges, and mass transportation infrastructure. This bill will provide jobs in the con-

struction industry and spur economic development.

As a member of the Public Works and Transportation Committee, I have long been aware of the necessity of passing a comprehensive multiyear highway and mass transit bill. H.R. 6211 targets funding for the most pressing highway and transit projects. Our transportation network and interstate highways are well past their original design life. The surface Transportation Subcommitte has held many days of hearings on this problem. State highway officials from all over the country have testified that the road systems in their States need major resurfacing and repair work done.

There are three sections of this bill that are of importance to my home State of Illinois. Under the interstate transfer program, the Chicago area, under the substitute bill, will receive $150 million in addition to what is included in the transportation appropriations bill. These funds will be used to complete needed highway projects. In the highway bridge replacement and rehabilitation program, the Dan Ryan Expressway is slated for funding. This expressway is a very heavily traveled route and needs major bridge repair work.

The Federal-aid urban system program is also reauthorized in H.R. 6211. The FAU program is unique in that project funding is left in the hands of local officials. This flexibility allows the local areas to have a voice in helping solve their transportation problems.

Finally, H.R. 6211 sets up a strong and effective mass transit program for capital construction and block grants. A mass transit account has been created that will earmark revenues equivalent to 1 cent of the fuels taxes for a new mass transit account within the highway trust fund.

Mr. Chairman, H.R. 6211 is an excellent piece of legislation that has been under intensive study by my committee for many months. I wholeheartedly urge my colleagues to support this measure.●

● Mr. BIAGGI. Mr. Chairman, I rise in support of H.R. 6211, the Surface Transportation Act of 1982. This legislation offers a sensible approach to deal with two of our Nation's most serious problems—record high unemployment, and deteriorating bridges, and highways.

Main features of the bill would authorize a 5-cent-a-gallon increase in the Federal gasoline tax to fund a highway construction and repair effort, and to fund important mass transit programs. Overall, the measure would authorize $53.5 billion for highway and safety programs, and $16.5 billion for public transportation programs over the next 4 fiscal years.

As New York's ranking member on the House Education and Labor Committee I am especially pleased that over 300,000 jobs are expected to be created as a result of the bridge and highway repair work that will be funded by this bill. This comes at a time when our Nation's unemployment level—now at 10.8 percent—is as high as it has ever been since the Great Depression. Some 12 million American workers are unemployed.

The 5-cents-a-gallon increase in the Federal gasoline tax would bring the total Federal tax to 9 cents per gallon. The bill would distribute 8 cents of the Federal gasoline tax in the highway trust fund, and the additional 1 cent per gallon would go to a newly established public transportation trust fund.

Several important factors justify this 5-cent-a-gallon Federal fuel tax increase. First, the gasoline tax has not been increased since 1959. As a result, the highway trust fund, which finances bridge and highway repairs, has been unable to keep up with the rising costs of maintaining our Nation's transportation system. Second, the 5-cent fuel tax increase is not an excessive economic burden. This tax increase will cost the average motorist only $30 per year—a cost that may very well be recouped since improved roadways mean reduced automobile wear and tear. Further, those persons who are obligated to pay the tax—highway users—are assured of receiving direct benefits—a better highway system.

Some of the bill's more controversial features deal with the trucking industry. The bill eliminates the tax on new, smaller trucks and truck trailers while raising the tax on larger trucks. These provisions are aimed at imposing a more equitable share of highway costs on the trucking industry, which has inflicted much of the damage on our deteriorating highways and bridges. I am hopeful these tax increases will not prove too much of a financial burden for the already-weakened trucking industry to bear.

Although I have my reservations, I am encouraged that the bill also seeks to balance out those added burdens by allowing larger trucks to operate on the Interstate System, and by imposing a national standard for truck size and weights permitted on our highways. Inconsistent truck-size standards from one State to the next have long had a detrimental effect on the trucking industry.

Other provisions of the bill that I strongly support would provide $125 million over the next 3 fiscal years to help cut down on our Nation's critical drunk-driving problem; would provide $524 million over the next 4 fiscal years for National Highway Traffic Safety Administration programs; and would clarify that Davis-Bacon wage requirements are applicable to all construction and repair work authorized in the bill.

As a Representative of our Nation's largest city, a city that depends heavily on its public transportation system, I am particularly impressed with this bill's mass transit provisions. For the first time ever, mass transit will be supported by a dedicated source of Federal revenue—1 cent out of the 5-cent fuel tax increase is targeted solely for mass transit assistance. In addition, the bill continues mass transit operating assistance at the fiscal year 1982 level, rather than phasing the program out as President Reagan has requested. Specifically, the bill authorizes $3.8 billion for mass transit programs in fiscal year 1983, $4 billion in fiscal year 1984, $4.2 billion in fiscal year 1985, and $4.5 billion in fiscal year 1986. It should also be noted that the new formula block-grant program will give the States more flexibility on how the States can use these mass transit funds, since assistance will be provided on an annual basis, instead of project by project.

Of special benefit to New York City is the fact that the distribution formula for mass transit funding has been changed to target more money to transit dependent cities.

For New York State, the numbers are equally impressive. Under H.R. 6211, New York will receive more than $6.7 billion over the next 4 years for highway, bridge, and mass transit projects. This represents a $1.5 billion increase over current funding levels for highway and bridge programs, and an extra $1.3 billion over 4 years for mass transit.

Unlike many Federal programs, where New Yorkers pay out far more in taxes than they ever receive in benefits, H.R. 6211 would mean that New York State would get back $2 billion more in highway and mass transit assistance than it would pay in taxes for these programs over the next 4 years. Carried a step further, this will also mean that the net gain per automobile in New York State will be approximately $64.

Finally, let me thank my distinguished colleague from Georgia (ED JENKINS) for working to include in this measure an extension and increase in the authorization levels for the boating safety and facilities improvement program that was first established by a bill I authored in 1980. Specifically, H.R. 6211 would authorize $25 million in motorboat fuel taxes to be deposited in the recreational boating fund for each of the next 6 fiscal years.

The program had been scheduled to expire at the end of fiscal year 1983, despite the fact that none of the fuel tax dollars designated for boating safety and facilities improvement have ever been spent. These important new

provisions should mean that recreational boaters will finally get a fair return on the fuel excise tax they have been paying over these many years.

Mr. Speaker, a close scrutiny of H.R. 6211 reveals that its cost-benefit ratio is highly favorable. Add to that the millions of Americans who would benefit from this legislation—our highway users, mass transit riders, and boaters—and we have avery important piece of legislation that deserves to be passed.●

● Mr. STUDDS. Mr. Chairman, as chairman of the Subcommittee on Coast Guard and Navigation, I would like to point out that the burden imposed by an increase in the Federal tax on gasoline falls not only on automobile motorists, but on the recreational boating community, as well. Because the gasoline tax affects motorboat fuel, recreational boaters currently contribute, according to rough estimate, some $30 million a year to the highway trust fund. Although this money is diverted by law into the land and water conservation fund, a total of $20 million is allocated to the recreational boating safety and facilities improvement fund created by the Boating Safety Act Amendments of 1980. By increasing the gasoline tax from 4 to 9 cents a gallon, we will also more than double the amount of money paid by recreational boaters to the land and water conservation fund.

It is my intention next year to introduce legislation which will guarantee that the money paid by recreational boaters as a result of the Federal gasoline tax will be utilized for purposes which benefit the boating community. This is not presently the case. Congress has thus far failed to appropriate money from the Recreational Boating Fund for the purpose of assisting State boating programs, despite the fact that this money comes not from general revenues, but from the pockets of boaters, themselves. Moreover, money in the land and water conservation fund is not generally used for purposes of direct importance to boaters.

I was tempted to offer an amendment to this legislation to establish guidelines for allocating the portion of the gasoline tax increase attributable to boaters, in order to make certain that these funds would be fully and fairly used. I am refraining from doing so only because of the urgent time contraints under which the Congress has chosen to consider this legislation. My purpose in speaking today is simply to express my hope that Congress will be willing next year to lend its support to legislation aimed at resolving the unfair situation in which the boating community now finds itself. My own committee, Merchant Marine and Fisheries, will be initiating such a bill, but we will require the cooperation and advice of other committees, as well.●

Mr. MICHEL. Mr. Chairman the respective committees involved in the preparation of this legislation deserve a good deal of credit for moving this bill to the floor with all deliberate speed.

We should now extend that good work and get this bill adopted and over to the Senate and on to conference.

I have some misgivings about portions of this legislation. I am sure that all Members do. However, the bottom line is this: The legislation is sound. The need for it is immense, and the time to act is now.

We have before us a bill that does what it should. This legislation meets a real need, both in terms of the jobs it will create and the improvements that will be made in our highways and bridges. This legislation also provides the means to meet that need, by providing for the additional revenue necessary.

It has been our habit around here to be quick to meet needs but reluctant to provide the means. That is how we dug ourselves into the recession.

This time we are putting the House to the test. You cannot reap the rewards of this legislation, without paying the price. We are backing up our political inclinations to build roads and create jobs with the tax revenues with which to do it. This bill gives you the opportunity to be fiscally responsible while you are politically responsive. That combination is the only one that will help us dig our way out of the recession.

I suspect that before this Congress ends we will be offered the temptation to revert back to the golden days of buy now, pay later politics. The siren sounds of makework jobs are already filling our ears. The vote will be very easy to cast. There is nothing like creating millions of mythical jobs without providing for one dime in taxes to pay for them.

This legislation, on the other hand, may be a tough vote politically, as it will be for me, but it is the only responsible way out.

As I mentioned, there are provisions of this bill that are not appealing to me. The authorization is extended for too long a period, and we are making some changes in highway programs that are not necessary or desirable.

There is too much provided for the operation of mass transit systems. However, when I look at my own State of Illinois, I know all too well the very immediate need there for repair and maintenance of our transportation network and the very critical need for the 26,000 jobs it will create there. I hope some of the gliches can be worked out in conference and no additional unacceptable items added before we vote on final passage.

This legislation will provide $5.5 billion and create 170,000 construction jobs and nearly as many more in other fields.

The problem is obvious to anyone who travels on our Nation's highways. We have got 4,000 miles of interstate in need of resurfacing. Half of the total system will need major work in the next 15 years, 50 percent of our primary highways will need work in this decade, and 40 percent of all our bridges are reaching the end of their lifespan in this decade.

This financing mechanism will allow us to finish the Interstate System in the next 10 years, meet most of our critical repair needs and rehabilitate all of those bridges now classified as structurally weak, or too narrow for present day traffic.

These funds will be distributed through existing highway programs so that the effect can be felt this spring. There will be no long delays while we create new bureaucracies and mountains of new regulations.

And that is the real key to this program, having an immediate impact on the economy that will be positive for those out of work.

This legislation has been criticized because it does not do enough to resolve our unemployment problems. It is true that 320,000 jobs do not put a very large dent in unemployment of 12 million. But part of our failure to meet recessionary jobs needs in the past has been our penchant for massive programs that hold out the hope of the ultimate solution, and do nothing more than bring on another round of inflation.

Meeting the unemployment problem means attacking it on many fronts, not just one.

This is but one frontal attack. There are a number of other innovative and fiscally responsible ways to address unemployment and I hope the new Congress will put them at the top of the priority list. I hope we will not be so irresponsible as to try to solve the entire problem with one grandiose sweep of our magic wand.

I urge my colleagues to take this major step and enact this legislation.

● Mr. OBERSTAR. Mr. Chairman, I opposed House Resolution 629, the rule providing for consideration of H.R. 6211, the Surface Transportation Act of 1982. I took that position reluctantly, but out of a sense that the Ways and Means Committee has not had adequate time fully to evaluate the consequences of the new and special taxes proposed for the trucking industry.

The proposed revenue title of this legislation does indeed place a disproportionate burden of the funding for highway and transit construction on the Nation's truckers. The trucking industry today is not healthy and this

kind of regressive tax could precipitate bankruptcies and increased joblessness within this recession-weakened industry.

I agree with the principle that those who use our Nation's highways should pay for that privilege. It is also evident that there is a direct relationship between a truck's weight and the amount of damage that that vehicle inflicts on the highway. But these two facts alone cannot justify the action taken by the Ways and Means Committee. Under their proposal, the average tax on a 5-axle tractor semitrailer will zoom from $1,746 to $4,374, a 151-percent increase. Only one-third of that increase is attributable to an increase in diesel fuel; well over two-thirds is attributable to increases in the so-called special taxes.

These special tax increases are enormous. The truck tire tax increases by 150 percent, the tread rubber tax by 500 percent, the excise tax on new trucks and trailers by 20 percent, the tax on larger truck parts increases by 50 percent and the highway load tax increases are both substantial and sudden. All of these new taxes for an industry that has 175,000 drivers out of work and a net profit of only 210 million after taxes. The $1 billion-plus in new taxes proposed by this title has the potential for serious economic harm to the trucking industry—though, I must concede, it is much less burdensome than the administration's costly proposal.

For this reason I wanted the House to return this title of the highway legislation to the Ways and Means Committee until a more responsible funding formula can be agreed upon, one which could phase in a tax increase over an extended period of time, allowing the industry a fair opportunity to recover from this recession and be in a better position to pay higher taxes.

● Mr. HEFTEL. Mr. Chairman, although there exists no small amount of controversy over several provisions of the revenue title of the Surface Transportation Act of 1982, I would like to take this opportunity to call attention to two provisions that clearly deserve our support. First, this legislation exempts methanol and other alcohol fuels from the full 9-cents-per-gallon fuel excise tax established in this bill. Second, the revenue provisions extend the existing exemption for both public and private buses from the full amount of the fuel excise tax, thus maintaining an important equity in the bus industry.

The complete exemption from the fuel tax is only provided in this bill for methanol, ethanol, and other alcohol fuels that are produced from sources other than crude oil and that are used in at least an 85-percent pure state, either by themselves or in combination with other alcohol fuels. However, methanol represents the only truly viable alternative to gasoline as a primary motor fuel because it can be manufactured economically from our abundant feedstock supplies of coal, natural gas, and other carbon-bearing materials.

Methanol today is primarily being manufactured from natural gas. However, the technology to manufacture methanol from coal or from wood or other sources has existed for a number of years. Thus, in the event that natural gas supplies shrink again in the coming years, methanol can be economically produced from our vast coal reserves.

In addition, because methanol must be used in an 85-percent pure state to qualify for the full exemption, methanol is thus virtually a complete substitute for gasoline. Gasohol, on the other hand, contains up to 90 percent gasoline and receives only a limited exemption under this legislation, in recognition of the high proportion of petroleum-based gasoline required for its use.

Finally, although there are many inherent virtues in methanol use, including greater safety, efficiency, and pollution control, an exemption from the fuel excise tax is necessary to help offset the additional $600 to $1,200 that it costs to modify new vehicles or convert existing vehicles to methanol use and to create greater consumer awareness of this important alternative fuel. As it now stands, potential suppliers are waiting for enough cars to be on the road to justify investment in distribution facilities. However, manufacturers will not make the necessary engine modifications until supplies of methanol are readily available. Thus, the fuel tax exemption will provide a significant incentive to help overcome this impasse and to begin to develop the distribution network that will be necessary for widespread methanol use in this country.

Second, this legislation provides for a continuation of the existing complete exemption from the fuel excise tax for both public and private buses. In 1978, Congress in the Energy Tax Act determined that all buses merited a complete exemption from the current fuel tax level of 4 cents per gallon for two reasons. First, bus transportation is more energy efficient than private automobile transportation, and second, it was considered appropriate to make the excise tax treatment of private transit and schoolbus operations consistent with the treatment of governmental and tax-exempt educational bus operations, as such systems often compete with each other for charter and other business. The reasons for enacting the original exemption in 1978 are just as important today.

Mr. Chairman, in addition to the many reasons that I have cited, by supporting these two provisions of the revenue title of this bill, Congress will be sending an important message to the American people that we have not abandoned our commitment to conservation and energy independence. Therefore, these two provisions clearly deserve the full support of this body.●

● Mr. WIRTH. Mr. Chairman, a major consensus has finally been achieved in the Congress on the urgent need to repair our Nation's deteriorating transportation network. Just as people cannot function with veins and arteries which do not work properly, so our Nation's economy cannot function properly with vital arteries of commerce that are worn out.

The condition of our Nation's infrastructure has reached crisis proportions. Our Interstate Highway System is deteriorating at a rate requiring reconstruction of 2,000 miles per year, although it has yet to reach completion, and secondary roads off the interstates are often in much worse condition. More than 100,000 of our Nation's bridges are officially listed as dangerous, and 45 percent of them are either obsolete or structurally deficient. In my home State of Colorado, needed bridge repairs alone will cost $200 million. We simply have no alternative but to begin a major effort to rebuild. In the long term this is a cost-effective effort. Estimates are that it costs five times more to rebuild a bridge once it has fallen than to repair it before it does.

Yet the past 15 years have been marked by massive underinvestment in public facilities. Since 1965, the percent of gross national product devoted to our infrastructure needs has dropped from 3.6 percent to 1.7 percent in 1980. We simply must correct this deficiency. We cannot expect our economy to achieve sustained growth if our public transportation network is in a shambles. The special task force on long-term economic policy which I chaired for the House Democratic Caucus recognized this and called for a major infrastructure investment program as one of the keys to restoring long-term economic growth to our economy.

H.R. 6211 is only a start in this direction, but it is an important first step. It addresses our twin national needs of rebuilding our deteriorating public transportation network, and providing jobs to an estimated 300,000 Americans.

While I strongly support this bill, for it will take us in a direction we simply must go, I am deeply troubled by the primary and interstate/4-R funding formulas contained in the bill.

The formulas contained in H.R. 6211 represent a dramatic change in funding which is very detrimental to the interest of not only Western States but of other States which share our geographic and demographic transpor-

tation profile. According to the Colorado Highway Commission, "the formula changes would shift the balance away from the number of lane miles of State highway and toward vehicle miles traveled, or its surrogate, fuel consumption."

The primary formula in this bill would change the present careful balance which takes into consideration such things as area, rural delivery mileage, and intercity mail route mileage to one based simply on rural and urban population. This change alone would lead to a decrease of $8.6 million annually, and my State's highway commission estimates that the combined effect of these changes could cost Colorado over $21 million in expected revenues for next year.

Additionally, the changes in the interstate 4-R program comes on top of a change made last year that already has cost the Western States millions of dollars. The formula change in H.R. 6211 represents the final step in a shift in the program away from the fair treatment of the Western States with their extensive roads and few people, and toward the exclusive interests of States with large populations and small geographic areas. In short, it removes the funding balance which is critical to a national program of this type.

I certainly hope that the floor managers of this bill in the other body follow through on their stated intention to oppose in conference any changes in the existing funding formula.

Despite this serious reservation, I urge my colleagues to support this bill. We must rise above regional disputes and competing special interests and unite to pass this important legislation to lay the foundation for long-term economic growth.●

● Mr. FORD of Michigan. Mr. Chairman, I rise in opposition to the Stenholm amendment and in support of the Davis-Bacon Act. Never before during my years in Congress has the Davis-Bacon Act been as critically needed as it is today; never have prevailing wage protections been more necessary than they are in this bill. The Surface Transportation Act will inject the Federal Government's economic power into every State and into thousands of separate localities where the road and bridge construction it generates will be by far the most important new economic activity in the community. The question before us is a simple one: Will these billions of dollars of public funds be spent in such a way as to drive local wages up or down artifically, or will Davis-Bacon Act coverage insure that local wages and working conditions are not disrupted?

For 50 years, Congress has wisely chosen through Davis-Bacon Act prevailing wage protections, to insure that wages on federally funded construction projects are the wages which construction employers normally pay in their community. Now is not the time to change this wise policy.

People sometimes argue that Davis-Bacon is a depression-era law, that it was appropriate when President Hoover signed it in 1931, but is outdated today. Mr. Chairman, is the American economy not in a depression today? Are critics of the Davis-Bacon Act aware that as many Americans are unemployed today as at the height of the Great Depression? People need work desperately. We cannot afford to set off bidding wars for Federal construction where bids are sliced and cut by cutting workers' wages. The quality of construction would suffer, local economies would be badly disrupted, and construction workers would have their wages cut unfairly. Anyone who professes to believe in Federalism, who seeks a less instrusive role for the Federal Government in American society, should oppose any attempt to weaken or remove Davis-Bacon Act protections. I urge my colleagues to defeat the amendment.●

● Mrs. KENNELLY. Mr. Chairman, I rise in support of the Weiss amendment.

Since 1973, States have been able to withdraw nonessential segments from the Interstate System, upon the approval of the Secretary of Transportation. When State and local communities agreed in good faith to withdraw highways, they did so based on a commitment from the Federal Government that an equivalent amount of funds would be available in interstate transfer grants for substitute projects at a later date. Unfortunately, due to the vagaries of the budget and appropriations process, some communities have not received transfer grants on either a timely or a strictly fair basis.

The Hartford and Hartford/New Britain regions in the State of Connecticut are two of those communities. They have been badly short changed in the funding process. For instance, in fiscal year 1981 when the regions were prepared to undertake projects requiring $32 million in Federal assistance, they received only a $9 million appropriation.

The combined value of Connecticut's tradeins are $546 million. Even after receiving appropriations of $56 million this calendar year, the State has only received 20 percent of what it is due. By contrast, four other communities which traded in highways at about the same time had received 100, 88, 83, and 51 percent of their totals on December 31, 1981.

The Public Works Committee has included in this bill significant improvements in the interstate transfer grants program. I have strongly supported our efforts except for the cap we place on inflation. We fund substitute highway projects from the highway trust fund and we distribute funding on a fair and predictable formula basis. I am convinced this is the best way to remedy the problems of communities which had been short changed in the past.

I still beieve, however, that these communities are entitled to the full equivalent value of their withdrawn highways. Without compensation for the inevitable increases due to inflation, the eligible communities will be unable to fund all the work they have planned. In my State, this could mean serious transportation deficiencies will not be addressed in full. It would be one thing if we could order inflation to cease on September 30, 1983. Since we can't I urge my colleagues to support the Weiss amendment.●

● Mr. HAMMERSCHMIDT. Mr. Chairman, as a member of the House Public Works and Transportation Committee who has actively supported the revitalization and expansion of our highways to be funded through the equivalent of a 5-cent-per-gallon increase in the highway user fee, I regret that I must rise in opposition to the bill in the form it appears before us today.

My objection to this proposal centers on title V of the bill relating to increased taxes on tires, tread rubber, and trucks. Our Nation's trucking industry is still reeling from the combined effects of the Motor Carrier Deregulation Act of 1980 and depressed economic markets. This combination has produced a financial condition that saw 2 out of 3 regulated motor carriers losing money in the fourth quarter of 1981 and the first quarter of this year. Carriers as a whole barely broke even for the first 6 months of this year. A financially ailing industry cannot afford skyrocketing tax increases. It is interesting to note that in 1982, the entire regulated trucking industry will have a net income of less than one-half of 1 percent. The total cost of the increases advocated in this legislation approximates 10 times this projected income.

Basically, this measure would increase total taxes on a typical 18-wheel truck from $1,746 to about $4,000 per year. The rationale for these increased taxes is based upon a study which related virtually all highway damage to weight and ignores the effects of weather, environment highway maintenance and chemicals. Such a high increase in taxes would be untenable at any time, but under the current economic situation in the trucking industry they become confiscatory.

Originally intended to spur productivity, if this proposal prevails it will hamper employment efforts in the trucking industry and have a ripple effect on related industries such as truck and trailer manufacturers, tire manufacturers and manufacturers of

truck equipment and components. The employment gains in the construction industry through the highway program will surely be offset by the employment losses in the transportation network.

Moreover, these provisions come to the floor without substantiation from a complete hearing record on the merits and demerits of singling out one segment of our transportation system to face an undue share of the tax burden which eventually will be passed on to consumers through increased shipping costs. In addition, Congress should investigate the impact of tire tax modifications on highway safety and Korean tire imports.

The truck size and weight increases in H.R. 6211 can do their part in helping alleviate the present condition by allowing carriers needed productivity increases. But, excessive taxes in H.R. 6211 would wholly offset any productivity gains and further depress the industry's financial condition. Even if the tax increases were based on a highway cost allocation method that was defensible, which it is not, they represent cost increases that could not possibly be absorbed. It is implied that the tax increases that are recommended can be passed on to the consumer through increased freight charges and, therefore, we should not be alarmed. I cannot accept such a cavalier treatment of what the consumer can or cannot be called upon to pay. The pervasiveness of motor truck service, because of the role it plays in freight transportation, is such that increased costs of truck transportation mean increased costs to the consumer. This is not time to talk about increased consumer costs when we are finally bringing inflation under control. But the major point is that increased costs of any magnitude have no place in our economy when they are based on a misguided approach to highway cost responsibility calling for a punitive assessment of taxes against the trucking industry, resulting in increased costs of everything we eat, wear, and use.

The trucking industry has never disputed its responsibility for extra tax payments for extra highway facilities its vehicles require. However, there is no basis in terms of highway use or highway responsibility to justify such a high tax assessment against the larger vehicles. The Department of Transportation (DOD) maintains that a tax level such as this against the larger truck is justified by a highway cost allocation study. But, if you look at this study carefully, you will find that the tax proposal was based on the premise that truck traffic in virtually the sole cause of highway wear and tear. Any competent highway engineer will tell you that among the major causes of highway deterioration are the weather, the environment and age. All highways need resurfacing or reconstruction, regardless of truck traffic. This is borne out by the experience of highways that trucks never use, such as the Merritt Parkway in Connecticut, and the southern portion of the Baltimore Washington Parkway. Both of these road sections needed major repair, or resurfacing within their design life, of approximately 20 years. Yet, they never carried truck traffic.

If the DOT highway cost methodology is correct it means that highways that never carry truck traffic will last forever. This is ridiculous. We are talking about a tax increase of close to $2 billion in taxes on an industry which at this time is in its worst financial condition since the Great Depression. Voting against the excise tax increases related to trucks is not possible under the rule we adopted so I will vote against title J in the hopes that the Committee on Ways and Means would come up with a cost allocation package which is more equitable than the one before us today.●

● Mr. RAHALL. Mr. Chairman, today, America is at a crossroads in transportation planning. Over the years we have profoundly changed the way Americans conduct business, seek recreation and enjoy the advantages of mobility through the construction of the Interstate Highway System, improvement of roads and bridges and expansion of mass transit systems.

However, the history of our efforts in the area of road construction sharply contrasts with the future continued viability of the highway system. At present, America's transportation infrastructure is almost in ruins.

In West Virginia, nearly half the bridges are functionally obsolete or structurally deficient. Interstates in the State such as I-64, I-77, and I-70, the most heavily used in West Virginia, are in bad need of repair on those portions constructed years ago. The 34-mile gap in I-64 between Beckley and Sam Black Church is the only uncompleted link in the interstate from St. Louis, Mo., to Norfolk, Va., and has been designated as an "essential gap" serving national needs by the Department of Transportation. In addition, crumbling primary and secondary roads in the State are costing West Virginia drivers wasted dollars in gasoline costs at an average of about 13 cents on every gallon of gasoline purchased.
